ANNUAL REPORT

OF THE

BOARD OF REGENTS

OF THE

SMITHSONIAN INSTITUTION,

SHOWING

THE OPERATIONS, EXPENDITURES, AND CONDITION
OF THE INSTITUTION

TO

JULY, 1885.

PART II.

WASHINGTON:
GOVERNMENT PRINTING OFFICE.
1886.

REPORT
OF THE
UNITED STATES NATIONAL MUSEUM,
UNDER THE DIRECTION OF
THE SMITHSONIAN INSTITUTION,
TO
JULY, 1885.

REPORT OF THE UNITED STATES NATIONAL MUSEUM FOR THE HALF YEAR ENDING JUNE 30, 1885.

SUBJECTS.

- PART** I.—Report of the Assistant Director upon the condition and progress of the Museum.
- II.—Reports of the Curators and Acting Curators of the several departments.
- III.—Bibliography of the National Museum for the half year ending June 30, 1885.
- IV.—Annotated list of accessions to the collections.
- APPENDIX (Part V).**—Papers illustrating the collections in the Museum.

UNITED STATES NATIONAL MUSEUM,
Washington, July 1, 1885.

SIR: I have the honor to submit herewith a report upon the present condition of the U. S. National Museum, and upon the work accomplished in its various departments during the half year ending June 30, 1885.

Very respectfully,

G. BROWN GOODE,
Assistant Director.

Prof. SPENCER F. BAIRD,
*Secretary of the Smithsonian Institution and
Director of the U. S. National Museum.*

STATISTICS. By Thomas Donaldson (with special index and paging).

PART I.

REPORT UPON THE CONDITION AND PROGRESS OF THE U. S. NATIONAL
MUSEUM DURING THE HALF YEAR ENDING JUNE 30, 1885.

BY

G. BROWN GOODE, ASSISTANT DIRECTOR.

REPORT UPON THE CONDITION AND PROGRESS OF THE U. S. NATIONAL MUSEUM DURING THE HALF YEAR ENDING JUNE 30, 1885.

A.—GENERAL CONSIDERATIONS.

1. INTRODUCTORY REMARKS.

The report now presented embraces the period between January 1 and June 30, 1885. This change is made in accordance with the vote of the Regents of the Smithsonian Institution to the effect that reports upon the condition of the Smithsonian Institution and its dependency, the National Museum, shall in the future have reference to the fiscal year, from July 1 to July 1, instead of, as in the past, covering the calendar year.

There has been a constant increase in the number of the accessions to the Museum; during these six months there were nearly twice as many contributions as in the entire year of 1884.

Owing to the fact that the greater portion of these six months was consumed in the preparation of exhibits for New Orleans, no manuscript was offered for publication in the form of Museum Bulletins, but it will be seen that 236 papers bearing upon the collections in the various departments of the Museum, were published during the first half of 1885, which is far in excess of one-half the number of similar papers published during the year 1884.

There has been no important change in the character of the work of the Museum as described in previous reports. It is pleasing to note that nearly every curator states that considerable progress has been made in the development both of the study and the exhibition series. The space allotted to each department is more definitely fixed, and many additional cases have been constructed and put into use.

A statement relating to the exhibit made by the Institution at the New Orleans Exposition is submitted, but since, at the close of the period covered by this report, the exposition was still in progress, the final and exhaustive article bearing upon this subject will be reserved for the next report.

It was the intention of myself and my associates in the Museum, to present in this report a review of the past history of the Museum as a

whole, and of its several departments. This feature is, however, necessarily omitted on account of the absence of several of the curators at New Orleans during these six months. I trust, however, that it will be practicable to prepare such a summary in time for the next report of the Museum.

2. FOUNDATION AND SCOPE OF THE MUSEUM.

The National Museum was organized in 1846 by act of Congress, the nucleus of its collections being the "National Cabinet of Curiosities," which at that time were on exhibition in the Patent Office building. These collections were not, however, removed to the Smithsonian Institution building until eleven years afterwards, and their custody was accepted by the Regents of the Smithsonian Institution, on condition that the appropriation of a sufficient sum of money for their proper care be continued by Congress.

The National Museum is under the direction of the Smithsonian Institution, which is governed by an establishment consisting of the President of the United States and his Cabinet, the Commissioner of Patents, and the Board of Regents, which latter is composed of the Vice-President, Chief Justice of the United States, three members of the Senate, three members of the House of Representatives, and six other persons not members of Congress, two of whom are residents of the city of Washington.

The Secretary of the Smithsonian Institution, to whom is intrusted the actual management of its affairs, is *ex officio* the Director of the National Museum. The Museum staff at the present time is composed of an assistant director, and twenty-four curators and acting curators, fifteen of whom receive no salary from the Museum appropriation. There are also twelve administrative departments.

The collections of the Museum are made up, in large part, of the following materials:

1. The natural history and anthropological collections accumulated since 1850 by the efforts of the officers and correspondents of the Smithsonian Institution.

2. The collections of the Wilkes exploring expedition, the Perry expedition to Japan, and other naval expeditions.

3. The collections of the scientific officers of the Pacific Railroad survey, the Mexican boundary survey, and of the surveys carried on by the Engineer Corps of the Army.

4. The collections of the U. S. geological surveys under the direction of the U. S. geologists, Hayden, King, and Powell.

5. The collections of the U. S. Fish Commission.

6. The gifts by foreign Governments to the Museum or to the President and other public officers of the United States, who are forbidden by law to retain such gifts in their private possession.

7. The collections made by the United States to illustrate the animal

and mineral resources, the fisheries, and the ethnology of the native races of the country, on the occasion of the International Exhibition at Philadelphia in 1876, and the fishery collections displayed by the United States in the International Fisheries Exhibition at Berlin in 1880 and at London in 1883.

8. The collections given by the Governments of the several foreign nations, thirty in number, which participated in the exhibition at Philadelphia.

9. The industrial collections given by numerous manufacturing and commercial houses of Europe and America, at the time of the Philadelphia Exhibition and subsequently.

10. The material received, in exchange for duplicate specimens, from the museums in Europe and America, at the time of the Philadelphia Exhibition and subsequently.

In connection with the general work of administration there is in the Museum a library, a chemical laboratory, a photographic establishment, and various workshops for taxidermy, modeling, and for the preparation of skeletons for exhibition. In connection with the department of art and industry two preparators are constantly employed.

The publications of the Museum consist of (1) The Annual Report; (2) The Proceedings of the United States National Museum; (3) The Bulletin of the United States National Museum; (4) Series of circulars. These are all reprinted in the volumes of the Smithsonian Miscellaneous Collections.

3. THE FUNCTIONS AND AIMS OF THE MUSEUM.

The broad plan upon which the operations of the National Museum are now conducted, was anticipated as far back as 1853, when, in the report of the Smithsonian Institution for 1852, Professor Henry wrote: "There can be little doubt that in due time ample provision will be made for a library and museum at the capital of this Union worthy of a Government whose perpetuity depends upon the virtue and intelligence of the people." The difficulties attending the formation of such a museum were appreciated by Professor Henry, and in the report of the Institution for 1849, he dwelt with much emphasis on the caution required in assuming under the direction of the Institution the care of the national collections. At length, in 1857, it was ordered by law that all collections belonging to the United States should be delivered to the Regents of the Smithsonian Institution. From that time annual appropriations for the preservation of these collections have been made by Congress.

Professor Henry, in the report of the Institution for 1870,* carefully considered the character which should be given to the National Museum. "There is," he wrote, "scarcely any subject connected with science and education to which more attention is given at the present day than that of collections of objects of nature and art, known under

the general denomination of museums. This arises from their growing importance as aids to scientific investigation and instruction."

In the report for 1873* allusion is made to the enormous increase in the national collections, "requiring the utmost exertions of the limited force connected with the National Museum for its proper treatment." And although the appropriations for the Museum have of late years been more liberal, it is certain that, on account of the immense annual increase in the quantity of material received, quite as much care and caution is still needed in order to carry out fully the aim of the Museum, which consists not only in securing collections, but in arranging for exhibition a complete set of specimens, preparing a duplicate set for purposes of study, and distributing far and wide such duplicates as it may be found practicable to spare.

4. SYSTEMS OF CLASSIFICATION.

There has been no change in the plan of arrangement of the collections or in the system of classification since the writing of the report for 1884, and it is therefore deemed unnecessary to recapitulate what has there been said. For the benefit of those who may not be acquainted with the principles which are considered in the arrangement of the collections, the following general rules, printed in the last report, are here repeated :

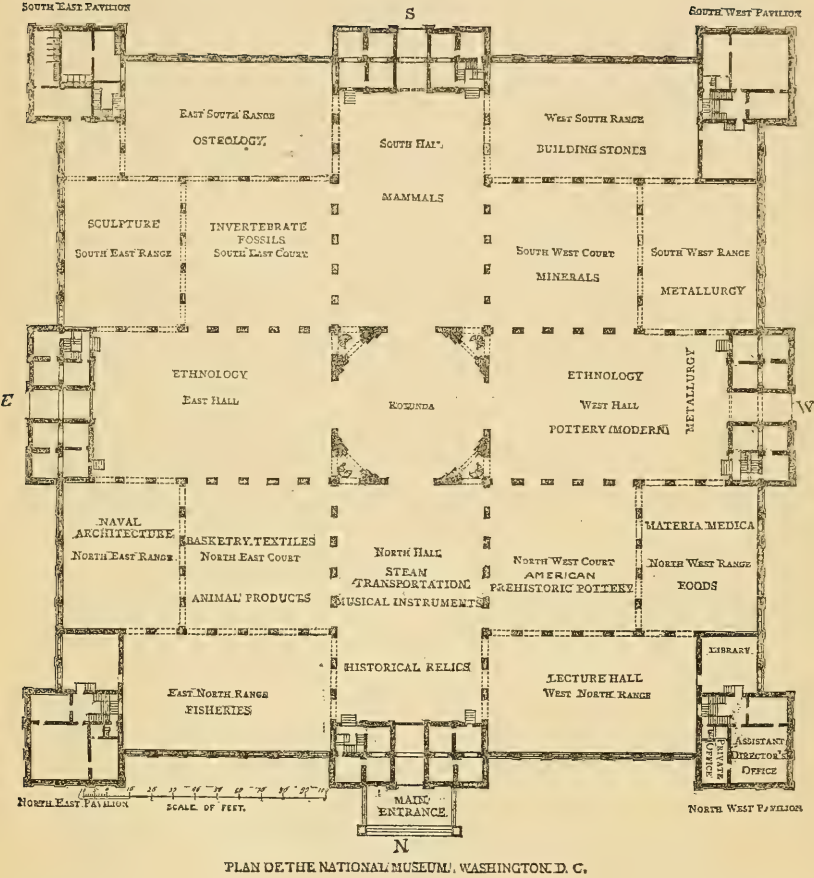

1. No object will be placed on exhibition which is not of evident educational value, and likely to interest and instruct a considerable percentage of the persons visiting the Museum.

2. The exhibition of duplicate material is to be avoided, except in instances where similar objects can be shown to advantage in different divisions of the Museum.

3. Each object will be placed in a case of the form best suited for its effective display, and the light, color of the background, &c., will be so adjusted as to show it to the best possible advantage, and with the least possible fatigue to the eyes of the visitor.

4. Each object, or group of objects, will be accompanied by a large plainly-printed label, which will give a concise description of what is shown, an account of its origin and uses, a synopsis of its history, and the name of the person or organization contributing it to the Museum. The character of the Museum is such that any labels which might suggest advertising for business purposes, must be excluded. It will be the policy of the Museum, however, to give prominence on each label to the name of the person or business house from whom it has been received, provided that the object is a gift to the Museum.

5. The objects will be grouped together in systematic order, and each case will be provided with a general descriptive label. In the case of collective exhibits, the general label may also give the name of the contributor.

PLAN OF THE NATIONAL MUSEUM, WASHINGTON, D. C.

6. The specimens will be illustrated and supplemented by pictures, diagrams, books, and maps, in such manner that the Museum may form an encyclopædia, the illustrations for which are in the exhibition cases, the text in the labels.

7. Guide-book manuals of the different departments will be published, which will embody in concise and systematic form the information given by the specimen labels, together with such illustrative material as it may seem necessary to present in addition.

By reference to the accompanying plan, it will be seen that the four main divisions of the Museum building are the north, south, east, and west "halls." The four square halls included between the main halls in the angles joining the Rotunda are called "courts." The "ranges" are eight in number. Those on the north side are the "North range—" "East North" and "West North." Those on the east side are the East range—"North East" and "South East." Those upon the south side are the South ranges—"East South" and "West South." Those on the west side are the West ranges—"South West" and "North West."

In the pavilions and towers are the offices and laboratories connected with the various departments.

The accompanying plan shows the exhibition space allotted to each department, although many of the departments are still without any exhibition room whatever. An additional Museum building can alone remedy this condition of affairs. The apportionment of space is at present a provisional one and will doubtless be considerably modified hereafter.

B.—THE MUSEUM STAFF.

The staff of the Museum includes two classes—scientific and administrative, the former reporting to the Director of the Museum, and consisting of curators, acting curators, assistant curators, assistants and aids, the latter reporting to the Assistant Director, and consisting of a superintendent of buildings with his force, which is detailed elsewhere, and a number of clerks and copyists.

5. THE SCIENTIFIC STAFF.

There have been no changes made in the scientific staff since the writing of the last report, except that the section of American prehistoric pottery has been included in the Department of Ethnology, instead of the Department of Antiquities, as heretofore. The Section of Steam Transportation was added to the Department of Arts and Industries in June, under the honorary curatorship of Mr. J. E. Watkins, of the Pennsylvania Railroad Company. Active operations have not been commenced in this section, and a detailed account of its condition will be

deferred until the next report. The curatorships are now organized as follows:

DIVISION OF ANTHROPOLOGY.

Department I.—Arts and Industries, the Assistant Director acting as curator (A. Howard Clark, assistant, two preparators), with adjunct curatorships as follows:

(a) *Materia Medica.* H. G. Beyer, M. D., U. S. N., honorary curator; one clerk.

(b) *Textile Industries.* Romyn Hitchcock, acting curator.

(c) *Fisheries.* R. Edward Earll, curator.

(d) *Animal Products.* R. Edward Earll, acting curator.

(e) *Naval Architecture.* J. W. Collins, U. S. Fish Commission, honorary curator.

(f) *Foods.* Romyn Hitchcock, acting curator.

(g) *Historical Relics.* A. Howard Clark in charge.

In this department, it may be stated, is administered very much of the material usually arranged by museums in their ethnological series, and the curator of Ethnology is acting as adjunct curator in the Department of Arts and Industries.

(h) *Steam Transportation.* J. E. Watkins, honorary curator.

Department II (A).—Ethnology. Otis T. Mason, curator; one preparator and two clerks.

Department II (B).—American Prehistoric Pottery. W. H. Holmes, Bureau of Ethnology, honorary curator; one preparator.

Department III.—Antiquities. Charles Rau, curator, E. P. Upham, assistant.

DIVISION OF ZOOLOGY.

Department IV.—Mammals. Frederick W. True, curator; one clerk, two preparators.

Department V (A).—Birds. Robert Ridgway, curator, Leonhard Stejneger, assistant curator; one clerk and one preparator.

Department V (B).—Birds' Eggs. Capt. Charles Bendire, U. S. A., honorary curator; one clerk.

Department VI.—Reptiles and Batrachians. H. C. Yarrow, M. D., U. S. A., honorary curator.

Department VII.—Fishes. Tarleton H. Bean, curator; two assistants detailed from the U. S. Fish Commission.

Department VIII.—Comparative Anatomy. Frederick W. True, curator, F. A. Lucas, assistant; one preparator.

Department IX.—Mollusks. W. H. Dall, curator, R. E. C. Stearns, adjunct curator; one clerk.

Department X.—Insects. C. V. Riley, honorary curator.

Department XI.—Marine Invertebrates. Richard Rathbun, U. S. Fish Commission, curator; one assistant, and one clerk detailed from the U. S. Fish Commission.

Department XII (A).—Invertebrate Fossils, Paleozoic. C. D. Walcott, U. S. Geological Survey, honorary curator.

Department XII (B).—Invertebrate Fossils, Meso-Cenozoic. C. A. White, U. S. Geological Survey, honorary curator, J. B. Marcou, U. S. Geological Survey, honorary assistant; one clerk.

DIVISION OF BOTANY.

Department XIII.—Fossil and Recent Plants. Lester F. Ward, U. S. Geological Survey, honorary curator; one clerk, one preparator.

DIVISION OF GEOLOGY.

Department XIV.—Mineralogy. F. W. Clarke, U. S. Geological Survey, honorary curator, W. S. Yeates, assistant.

Department XV.—Lithology and Physical Geology. George P. Merrill, acting curator; one preparator.

Department XVI.—Metallurgy and Economic Geology. Fred. P. Dewey, curator.

Some additions and changes in this classification are contemplated.*

These twenty-seven departments and sections are administered by twenty-four curators and acting curators, of which number at present only nine receive salaries from the Museum appropriation. Of the remaining fifteen, five are connected with the Geological Survey; one the Bureau of Ethnology; two with the Fish Commission; two with the Army; one with the Navy, and one with the Agricultural Department.

6. THE ADMINISTRATIVE STAFF.

The only change made in the classification of this branch of the Museum work is the addition of a department of labels under the charge of Mr. A. Howard Clark.

The administrative departments are at present organized as follows:

Department A (Direction).—This department is under the immediate charge of the Assistant Director, and embraces the general supervision of the routine work of the other departments, in addition to the performance of his special duties as the executive officer of the Museum, such as the care of the installation of specimens, the construction of cases, the purchase of supplies, the assignment of work and apartments, leaves of absence, correspondence, &c.

Mr. R. I. Geare, executive clerk, has rendered most efficient service in this department, both in the management of the correspondence of the Museum and in the work of preparing the Museum report.

* The departments of Exploration and Field Work, Chemistry, Experimental Physiology, and Vivaria are still unorganized, although Mr. John A. Ryder, embryologist of the U. S. Fish Commission, is frequently referred to in the case of accessions whose special features are related to embryology and physiology. These accessions are alluded to in index B to Part IV, under Department XVII.

Department B (Registry and Storage).—This department is under the supervision of Mr. S. C. Brown, whose duties pertain to the reception, unpacking and distribution of accessions and other packages, the shipment of boxes, the storage of accessions not immediately required, and the custody of department catalogue books.

Department C (Archives).—Mr. S. C. Brown has charge of papers relating to accessions to the Museum, applications for specimens, and the distribution of Museum material.

Department D (Library).—Mr. F. W. True, librarian, Mr. H. W. Spofford, assistant.

Department E (Publications).—The various publications of the Museum have been, as hitherto, under the editorial supervision of Dr. Tarleton H. Bean.

The publication of the special report upon the Fisheries of the United States, in quarto, which, in addition to its descriptive, historical, and statistical contents, will in reality constitute a monograph of the American portion of the fisheries collection in the Museum, has been in process of publication under the supervision of the Assistant Director and Mr. A. H. Clark, who are rendering this service to the Fish Commission as volunteers.

Department F (Labels).—Mr. A. Howard Clark in charge. His duties consist in the arrangement of material for labels, in receiving the printed labels from the printer, and in arranging a duplicate set for reference.

Department G (Duplicates and Exchanges).—Mr. S. C. Brown in charge.

Department H (Property and Supplies).—Mr. C. W. Schuermann in charge.

Department I (Accounts).—Mr. W. V. Cox in charge. All disbursements are made under the direction of the chief clerk of the Smithsonian Institution. Estimates for supplies and the general care of contracts and orders are included in the work of this department.

Department K (Buildings and Labor).—Mr. Henry Horan, superintendent of buildings, in charge. This department is thus subdivided: (1) police and inspection, (2) mechanics and labor, (3) construction and repairs, (4) cleaning and public comfort, (5) heating and lighting.

Department L (Electric Service).—In this department are embraced the care of the instruments used in connection with the telephone service, time service, burglar-alarm service, and watch-clock service.

Department M (Preparation).—The subdivisions in this department have undergone no material change since last year. Statements showing the amount and nature of the work performed in the various sections will be found in the statement of the work of the Museum preparators.

C.—THE CONDITION OF THE COLLECTIONS.

7. INCREASE IN THE COLLECTIONS.

In the report for 1884 the number of specimens in the several departments of the Museum was estimated at a little less than one and a half millions. This provisional census of the collections has not been revised for the present report, but it is safe to assume that, from all sources, including the increase from the New Orleans Exposition, the total has been increased by at least ten thousand.

8. ASSIGNMENT OF SPACE.

Early in the year, the north-east court was cleared of packing-boxes, &c., for the exhibition of specimens belonging to the Department of Ethnology. The north side of the west hall was assigned to the exhibit of modern pottery and terra-cotta. It having been found that the modelers were not furnished with working space adequate to their needs, rooms were constructed and fitted up for their use in April. For the speedy prosecution of the work of preparing the collection of building-stones for the American Museum of Natural History, a temporary wooden building was put up west of the poisoning-shed for the use of the stone-cutters. In June the northwest gallery of the Smithsonian building was fitted with casing and shelving for the collections of marine invertebrates, which were transferred thither from the west hall.

The laboratory and offices of the curator of Metallurgy were early in the year moved from the first floor of the south-west pavilion to the second floor, and the offices of the curator of Mammals have been transferred from the south tower to the first floor of the south-west pavilion. A portion of the west hall has been devoted to the textile exhibit. One-half of the south-west court has been assigned to the Mineral Department, and cases for the reception of the specimens arranged.

Owing to the crowded condition of the exhibition halls in the Museum building, it is impossible to assign exhibition space for the collections of birds, birds' eggs, reptiles, fishes, mollusks, or marine invertebrates. The collections of birds and fishes are at present inadequately provided for in the Smithsonian building. There is no suitable space for the exhibits, which are being collected by the curator of Steam Transportation, and the collections of animal products and foods are very insufficiently housed. It is to be earnestly hoped that Congress will give serious consideration to the pressing necessity for more room, and make provision for the erection of another Museum building.

D.—REVIEW OF THE ADMINISTRATIVE WORK OF THE YEAR.

9. ACCESSIONS TO THE MUSEUM.

Accessions to the Museum are acquired by gift, by exchanges with home or foreign institutions, by the deposit of the collections of various surveys and Government departments, from special expeditions, or as a result of the explorations carried on, in whole or in part, by the Smithsonian Institution, U. S. Fish Commission, and National Museum.

The total number of packages recorded by the registrar as received during the period covered by this report was 10,591. Of this number, 3,884 contained specimens for the National Museum, forming 658 accessions (Nos. 15551–16208), an accession frequently including the contents of many boxes or packages. The remainder were intended for the Smithsonian Institution and the U. S. Fish Commission, or for officers connected therewith. The increase in the number of incoming packages may be illustrated by the statement that during the entire year 1884 the number received was 5,507, only a little more than half the number (10,591) received during the first six months of 1885. The above figures also show a proportional increase in the number of accessions, there being 658 received during the first half of 1885 against 1,084 for the entire year 1884. An annotated list of the accessions will be found in Part IV of this report. Some of the most important are discussed at greater length in the curators' reports, in Part II.

There is a great increase in the number of ores, minerals, &c., sent for analysis. The curators are always willing to furnish careful identifications of specimens sent, but cannot, of course, undertake detailed analyses unless the Museum should be ordered by Congress to make special provisions for work of this character.

Upon receipt of an accession the registrar writes upon an accession card the name and address of the sender, together with the nature of the specimen or specimens forming the accession. This card is submitted to the management for assignment to one of the scientific departments. When assigned, the accession is transferred to the laboratory of the department, together with the card and all papers bearing upon it. If an accession contains objects of more than one kind, the collections are sent to the assorting-room, where they are separated before leaving the hands of the registrar. As soon as the curator has examined the accession he indorses a brief statement as to its character and value upon the card, returning this, with the papers, to the registrar. These are transmitted to the office of the executive clerk, whose duty it is to attend to the necessary correspondence. Finally the papers are returned to the registrar to be filed.

10. PROGRESS IN CLASSIFICATION AND ARRANGEMENT.

(a) Laboratory work and catalogue entries.

On pages 27 and 28 of the Report of the Museum for 1884 is a detailed list of the storage-cases and other furniture in use in the several laboratories at the end of that year. There have been no material changes or additions during the past six months. The laboratory cases are entirely distinct from those used for the display of the specimens in the exhibition series, and are of course not seen by the public; but it is safe to say that the accommodations provided in this respect are in most cases ample for the requirements. Every available means is being adopted toward supplying any deficiencies.

The following table shows the number of entries* made in the catalogues of the various departments and sections during the first half of 1885:

No. of department.	Name of department.	Last entry in 1884.	Last entry in June, 1885.	Total number of entries.
I ...	Arts and Industries:			
	Materia Medica	53,669	53,716	47
	Textile Industries	6,857	7,440	583

(b) Development of the exhibition and study series.

The comparatively empty appearance of some of the exhibition halls during the past six months is accounted for by the fact that collections aggregating about 140,000 pounds in weight were taken from the halls

*An entry in many instances includes hundreds of specimens.

and sent to the New Orleans Exposition, in addition to about 37,000 pounds previously sent to Cincinnati and Louisville. It is no less certain, however, that by the close of the year the exhibition series will be much more attractive than it has ever been. Especial attention will be paid to the development (i) of the section of historical relics in the Department of Arts and Industries; (ii) of the basketry exhibit in connection with the Department of Ethnology; (iii) of the osteological exhibit, closely affiliated with the Department of Mammals; and (iv) of the display of textiles. Before the end of the year the celebrated collection of Mexican casts belonging to Señor Eufemio Abadiano will be open to the public, in the south east range. This collection has been temporarily deposited in the National Museum. A list of the casts is given in Part IV, under Acc. 16185.

(c) Construction of cases.

In the report for 1884* a full account was given of the number and styles of cases made and delivered in the Museum during the year. The main features of the plan of installation were discussed, and it was intended to present in this report a complete description, with illustrations, of the various methods of installation which have been adopted. I regret to say that the special work in connection with the preparation of the exhibit for the New Orleans Exposition has rendered it necessary to defer the completion of this matter until the next report (July 1, 1885 – July 1, 1886). No cases were received during the first six months of 1885, nor were any new styles of construction adopted, although several plans have been under consideration.

(d) Labels and printing.

During the six months ending June 30, 1885, very material progress was made in the preparation and printing of descriptive labels for the exhibition series and for the reserve and duplicate collections. Early in the year copy for about 3,000 forms of labels was sent to the Public Printer through the Interior Department. Most of them were for the Materia Medica and Metallurgical Departments of the Museum. There are still great numbers of unlabeled objects in most of the departments; for many of them, however, labels have been written and are ready for printing.

The Museum printing-press has been in use constantly during the year, in charge of one of the clerks, who has been engaged in printing miscellaneous circulars and blanks required for immediate use, which could not be sent out without delay and consequent detriment to the service, as well as certain special and temporary labels.

11. PROGRESS OF GENERAL AND INCIDENTAL WORK.

(a) Library.

The following sketch of current operations has been furnished by Mr. F. W. True, librarian.

At no time in its history has the demand for books been so general or so great. The accessions also show a decided increase over those of last year. These were derived by (1) gift, (2) exchange, (3) purchase, the ratio being in the order given.

Table showing number of accessions from January to June, 1885.

Months.	Museum.	Smithsonian.	Total.
January.....	46	163	209
February }	240	133	373
March }			
April }	65	86	151
May }	103	156	259
June }			
Total.....	454	538	992

The accessions of public documents, except those pertaining to natural science, and of regular periodicals, are not included in this table. Forty-one of the works were obtained by purchase. In June, sixty-eight volumes belonging to the U. S. Fish Commission were received on deposit, through Professor Baird.

The principal contributors were the following :

Contributors.	Volumes.	Pamphlets.	Charts, &c.
Prof. S. F. Baird.....	38	82	3
Dr. Georg Baur.....	3	5	
British Museum.....	3	2	
U. S. Geological Survey.....	11	4	1
Second Geological Survey, Pennsylvania.....	4		11
Interior Department.....	1	3	16
Geological and Natural History Survey, Canada.....	2	1	Maps, &c.

The periodical list of the library comprises many of the standard scientific, and technical journals of the world. The periodical register shows that 1,604 numbers and parts of serials were received.

Table showing number of books issued and returned during each month.

Months.	Drawn.	Returned.
January.....	411	142
February }	513	523
March }		
April }	413	261
May }	169	196
June }		
Total.....	1,506	1,122

The number of persons entitled to the privileges of the library is eighty.

The card-catalogue by authors has been materially augmented during this period. The following will show the number of books and pamphlets catalogued during each month:

Months.	Books.	Pamphlets.	Total.
January.....	90	137	227
February }	133	226	399
March }			
April }	58	129	187
May }	36	298	334
June.....			
Total.....	317	790	1,147

Probably the most important feature in the operations of the library during this period has been the transfer of the Smithsonian accounts with the Library of Congress to the Museum library. This change necessitates a different system of record from that previously used in withdrawing books from the Congressional Library, and the call-cards adopted were used indiscriminately for both libraries. It has been found necessary to carefully examine the entire account with the Library of Congress since 1877, a large number of books having been detained by borrowers for many years; and the work of comparing the records of the sectional libraries will occupy several months.

About one hundred books of a more or less popular nature, such as works of travel, narratives of scientific expeditions, &c., have been set apart for the use of messengers, clerks, and others debarred by the regulations from drawing books from the library proper. These books are in constant demand, and if popular works of travel and biography could occasionally be added to the library, its utility would be greatly increased.

The sectional libraries are in good condition. They are sixteen in number, and contain the larger part of the most important monographic and specific works belonging to the library. The system of their administration, described in a previous report, has proved very satisfactory.

In March Mr. H. W. Spofford was appointed assistant librarian.

Recommendations.

Since the usefulness of the library is each year increasing, and since it is especially deficient in the latest editions of reference books, which are continually called for, it is suggested that this branch of the library should first receive attention. It is evident that if the growing importance of the library is to be maintained, a small fund should soon be provided for the purchase of works absolutely essential.

The librarian calls attention to the crowded state of the library. On the first floor, where the beneficiaries of the library consult the books,

and periodicals, space is very much restricted, owing to the fact that there are a number of large desks, tables, and stands, which are of course necessary adjuncts to a library, but are greatly in the way in so small a room. The shelves of the first floor and of the gallery are now quite full. The periodical department, on the upper floor, is particularly in need of more commodious quarters. The larger periodicals and newspapers are packed away in inconvenient places, and some are quite inaccessible. The overcrowded condition of this department is increased by the cases and material of the Department of Labels stored in the gallery of the library room.

It is suggested that the present upper story of the library room could be extended toward the north-west and west-north ranges. This change could be made at comparatively small cost, and would not mar the architectural effect of the interior of the Museum. Something might be gained by building galleries on the west wall of the west-north range and the north side of the north-west range, at the level of the floor of the second story of the library.

(b) *Distribution of duplicates and exchanges.*

The following table represents the character and number of boxes and packages of specimens distributed to museums and colleges and in exchange with correspondents during the half year:

	Boxes and packages.
Mammal skins and skeletons	12
Birds' skins, nests, and eggs	27
Minerals (more than 1,200 specimens)	19
Reptiles	2
Marine invertebrates (in sets)	16
Marine invertebrates, miscellaneous packages	13
Fossils	2
Pottery	6
Indian relics	34
Fishes	2
Plants	5
Casts (plaster)	2
Rocks	4
Shells	6
Corals	1
Insects	1
Total	152

The total number of packages sent out was 1,474, 152 of which (including more than 15,000 specimens of all kinds) were, as shown in the preceding table, in the form of gift or exchange with institutions or individuals.

During the six months there have been recorded twenty-five applications for specimens, many of which have been attended to.

Numerous requests have been received for photographs and working drawings of Museum cases. So frequent are these requests becoming that with the beginning of the new fiscal year a detailed record of such matters will be kept for publication.

In the report of the curator of the Department of Marine Invertebrates may be found a list of the recipients of sets of marine invertebrates expressly prepared for distribution.

A loan of several cases was made to Capt. R. H. Pratt, of the Indian Training School at Carlisle, Pa., for the exhibition of his collection at New Orleans. After their return from the exposition, these cases were finally permanently transferred to Captain Pratt, in exchange for specimens of Indian costumes.

(c) *Publications.*

The seventh volume of the "Proceedings" was finished in February, and of the eighth volume, the printing of which was begun in March, 221 pages were printed prior to the 1st of July. A list of signatures published during the first half of the year is given in Part III of this report. At the present time two Bulletins are in the hands of the printer—No. 29, "Results of Ornithological Explorations in the Commander Islands and in Kamtschatka," by Leonhard Stejneger, and No. 30, "Bibliography of publications relating to the collection of fossil invertebrates in the U. S. National Museum," including complete lists of the writings of Fielding B. Meek, Charles A. White, and Charles D. Walcott, by John Belknap Marcou.*

In Part III of this report will be found a detailed list of the publications of the Museum during the half-year, and also a bibliography of the papers by officers of the Museum and by others whose writings are based upon specimens in the collections. The authors of these papers number 60, 28 of whom are connected with the Museum, 13 being honorary officers. These papers number 273, and are thus distributed under the following subjects:

* This forms Part III of "Bibliographies of American Naturalists." Part I is entitled "The Published Writings of Spencer Fullerton Baird, 1843-1882," by G. Brown Goode, constituting Bulletin 20, U. S. National Museum; and Part II, "The Published Writings of Isaac Lea, LL. D.," by Newton Pratt Scudder, constituting Bulletin 23, U. S. National Museum.

Subjects.	Papers published by Museum officers.	Papers by other inves- tigators.	Total.
Arts and industries:			
Foods.....	1	0	1

General.....	1	0	1
Total.....	180	93	273

A comparison of this table with that included in the report for 1884* shows a decided increase in the line of original research during the first half of 1885, the total number of papers published during 1884 being 335.

In the report for 1884, Part III, are published six papers† based upon Museum collections. The following is a list of their titles, accompanied by a brief synopsis:

I. THROWING-STICKS IN THE NATIONAL MUSEUM. By Otis T. Mason.—This deals with the throwing-sticks used in the hyperborean regions of North America. In this paper the author applies zoological methods to a specific human art, studying the case of each specimen, structure, function, and geographical distribution.

II. BASKET-WORK OF THE NORTH AMERICAN ABORIGINES. By Otis T. Mason.—In order to test the value of human art as evidences of race, the author has made an exhaustive collection of the basketry of the world; has analyzed the methods of fabrication, materials used, forms, and decorations. The result of this study is very satisfactory, showing that by comparison the products of that art can be exactly traced to the authors when no definite information exists.

III. A STUDY OF THE ESKIMO BOWS IN THE U. S. NATIONAL MUSEUM. By John Murdoch.—This paper points out the fact that the bows stiffened by cords of sinew on

* Page 31.

†Since at the time of sending to press the present report, the report for 1884 had not been published, it is deemed not inappropriate to refer to these in this place as forming part of the current work of the Museum. In continuation of this plan of devoting one part of each Museum report to original papers bearing upon Museum collections, an extensive and illustrated paper by Mr. Thomas Donaldson, entitled "The George Catlin Indian Gallery in the U. S. National Museum (Smithsonian Institution), with Memoir and Statistics," is published in Part V of the report now presented.

the back, which are used by all Eskimos, have this backing made of one continuous cord, often of great length, and frequently put on in a very complicated pattern.

All Eskimo bows from that part of America west of the valley of the Mackenzie River may be referred to one of three types, which are modifications of one primitive type to be found in its least modified form in the islands north of Hudson's Bay. These three types have each a definite geographical distribution, and probably owe their peculiarities to the relative facility of obtaining wood suitable for making bows in the different regions where they are found. They are: I. The Arctic type, found from the Mackenzie region to Bering Strait. II. The southern type, from Bering Strait to the island of Kadiak; and III. The western type, found on the Siberian coast and the island of Saint Lawrence.

The Arctic type is peculiar in having the cords of the backing twisted into tense cables by a process hitherto undescribed.

IV. ON A SPOTTED DOLPHIN APPARENTLY IDENTICAL WITH THE *Prodelphinus doris* OF GRAY. By Frederick W. True.—This paper contains a description of the external appearance and skeleton of a dolphin received fresh from Pensacola, Fla., and believed to be identical with *Prodelphinus doris* (Gray). The species is found to be very abundant in the Gulf of Mexico and off the coast of the South Atlantic States. Although there are skulls in very many museums, external characters of the species have until now remained unknown.

V. THE FLORIDA MUSKRAT, *Neofiber alleni*, True. By Frederick W. True.—This paper contains a detailed description of the superficies and skeleton of a new muskrat having a round tail, a single specimen of which was received from Georgiana, Fla. It appears to replace *Fiber zibethicus* in this region.

VI. ON THE WEST INDIAN SEAL, *Monachus tropicalis*, Gray. By Frederick W. True and F. A. Lucas.—In this article the skull of *Monachus tropicalis* Gray is described in detail and compared with *M. albiventer* and other species of *Phocidæ*. The specimen on which the description is based was obtained by Prof. Felipe Poey in Cuba. The skull is the only one, so far as known, in any museum, and the cranial characters of the species have not been hitherto described. The species seems to be closely allied to *M. albiventer* of the Mediterranean.

(d) Visitors.

During the half year the number of visitors to the Museum building has been 107,365, and to the Smithsonian Institution, 60,428. Total, 167,793.

The monthly register, as kept by the doorkeepers, is here recorded:

Month.	National Museum.	Smithsonian.
January	12, 482	6, 213
February	13, 577	6, 614
March	41, 372	28, 723
April	16, 043	6, 851
May	12, 789	6, 087
June	11, 102	5, 940
Total	107, 365	60, 428
Daily average	692	390

The large number of visitors in March was due to the inauguration season. Between March 2 and March 6, 48,148 people visited the two buildings, and in order to give all more ample opportunity the buildings were kept open until 5 p. m. On March 3, 20,500 people visited the Smithsonian and Museum buildings.

In the report for 1881 it was estimated that the number of visitors to the Museum building during 1880 was at least 150,000. This number in 1882 was increased to 167,455 and in 1883 to 202,112. In 1884 the number was 195,322, and, as given in the table above, 107,365 people visited the Museum during the first six months of 1885.

(e) *Students and lectures.*

As in previous years the Museum has afforded facilities to several students who have in some instances rendered a partial equivalent by volunteer work upon the collections.

In the Department of Ethnology Dr. Franz Boas, of Germany, spent some time in January studying the collections of Hall and others from Baffin's Land. In February Dr. Simmons, formerly of Japan, compared the carvings of the Northwest Coast Indians with the forms familiar to him in Japanese art. Dr. Nash also spent several days in receiving special instructions with relation to collections intended to be made in Northwest Alaska.

In the Department of Minerals volunteer service was rendered by Harry P. Ingram, who commenced work in February.

Mr. Albert Koeble was detailed from the Department of Agriculture to assist the curator of the Department of Entomology in arranging and classifying the collections.

Mr. J. Warner Edwards rendered valuable service at New Orleans in connection with the arrangement of collections for the Museum.

In the photographic laboratory instructions were given by Mr. T. W. Smillie to Lieut. Winterhalter, U. S. N.; Dr. Nash, U. S. N.; Mr. H. L. Turner, U. S. Geological Survey, and also to Mr. George P. Merrill and Mr. James Templeman Brown, of the National Museum.

As in previous years the use of the lecture hall has been granted for a series of lectures delivered on Saturday afternoons under the joint auspices of the Biological and Anthropological Societies of Washington. These were largely attended. Many of the lectures had direct reference to the work of the Museum, and were illustrated by specimens.

The programmes of the two courses are here given:

PROGRAMME OF THE FIRST PART.

February 7.—Prof. John Fiske: Results in England of the surrender of Cornwallis.

February 14.—Dr. George M. Sternberg, U. S. A.: Germs and germicides.

February 28.—Hon Eugene Schuyler: The machinery of our foreign service.

March 7.—Mr. William T. Hornaday: Natural history and people of Borneo.

March 14.—Mr. Charles D. Walcott: Searching for the first forms of life.

March 21.—Prof. E. M. Gallaudet: The language of signs and the combined method of instructing deaf-mutes.

PROGRAMME OF THE SECOND PART.

March 28.—Dr. James C. Welling: Oldest history in the light of newest science.

April 4.—Mr. Frederick W. True: *Ornithorhynchus*, a mammal that lays eggs.

April 11.—Medical Director A. L. Gihon, U. S. N.: Sanitary ignorance among high and low.

April 18.—Mr. J. S. Diller: A trip to Mount Shasta, California.

April 25.—Dr. D. E. Salmon: Our invisible enemies, the plagues of animal life.

May 2.—Prof. T. C. Mendenhall: Weighing the earth.

The members of the joint committee in charge of the arrangement of the lectures were: Lester F. Ward, William Birney, Robert Fletcher, Grove K. Gilbert, Theodore N. Gill, Jerome H. Kidder, Otis T. Mason, John W. Powell, Frederick W. True.

(f) *Meetings of societies.*

By permission of the Director of the Museum several societies have held their meetings in the Museum lecture hall. During the first six months of the year the following societies have availed themselves of this privilege: The National Academy of Sciences, the American Fisheries Society, the Society of Naturalists of Eastern North America, the Biological Society of Washington, and the Entomological Society of Washington.

A list of the papers submitted is given below.

NATIONAL ACADEMY OF SCIENCES.

April 21-24.

Dr. J. S. BILLINGS and Dr. W. MATTHEWS, U. S. A.—Methods of measuring the cubic capacity of crania.

S. H. SCUDDER.—Winged insects from a paleontological point of view.

A. S. PACKARD.—The *Synsarcida*, a hitherto undescribed group of extinct malacostracous Crustacea; the *Gampsonychidae*, an undescribed family of fossil schizopod Crustacea; the *Anthracahidæ*, a family of Carboniferous macrurous decapod Crustacea, allied to the *Eryonidæ*.

ALEXANDER AGASSIZ.—The coral reefs of the Sandwich Islands; the origin of the fauna and flora of the Sandwich Islands.

T. STERRY HUNT.—The classification of natural silicates.

ELIAS LOOMIS.—The cause of the progressive movement of areas of low pressure.

C. B. COMSTOCK.—The ratio of the meter to the yard.

C. H. F. PETERS.—An account of certain stars observed by Flamsteed, supposed to have disappeared.

J. E. HILGARD and A. LINDENKOHL.—The submarine geology of the approaches to New York.

THEODORE GILL.—The orders of fishes.

J. W. POWELL.—The organization of the tribe.

G. W. HILL.—On certain lunar inequalities due to the action of Jupiter, and discovered by Mr. E. Neison.

E. D. COPE.—The pretertiary vertebrata of Brazil; the phylogeny of the placental Mammalia.

C. A. YOUNG.—Some recent observations upon the rotation and surface-markings of Jupiter.

H. A. ROWLAND.—On the value of the ohm.

F. A. GENTH and GERHARD VON RATH.—On the vanadium minerals—vanadinite, endlicheite, and descloizite—and on iodyrite, from the Sierra Grande mine, Lake Valley, New Mexico.

A. N. SKINNER.—On the total solar eclipse of August 29, 1886.

THEODORE GILL and JOHN A. RYDER.—The evolution and homologies of the flukes of cetaceans and sirenians.

IRA REMSEN.—Chemical action in a magnetic field.

A. GRAHAM BELL.—The measurement of hearing-power.

A. GRAHAM BELL and F. DELLA TORRE.—On the possibility of obtaining echoes from ships and icebergs in a fog.

THE AMERICAN FISHERIES SOCIETY.

May 5-6.

Opening address, Hon. Theodore Lyman, president of the society.

Appointment of committees and other business.

R. E. C. STEARNS.—The giant clams of Puget Sound.

JAMES A. HENSHALL, M. D.—Hibernation of the black bass.

FRED. MATHER.—Smelt hatching.

FREDERICK W. TRUE.—The porpoise fishery of Cape Hatteras.

FRANK N. CLARK.—Results of artificial propagation and planting of whitefish in the Great Lakes.

A. NELSON CHENEY.—Does transplanting affect the food or game qualities of certain fishes?

J. S. VAN CLEEF.—How to restore our trout streams.

TARLETON H. BEAN.—Exhibition of complete series of salmon and trout of North America.

MARSHALL McDONALD.—Objective points in fish culture.

W. V. COX.—A glance at Billingsgate.

FRED. MATHER.—Work at Cold Spring Harbor.

EUGENE G. BLACKFORD—Oyster-beds of New York.

JOHN A. RYDER.—On some of the protective contrivances developed by and in connection with the ova of various species of fishes.

O. T. MASON.—The use of the throwing-stick by Eskimo in fishing.

THEODORE GILL.—The chief characteristics of North American fish fauna.

MARSHALL McDONALD.—Suggestions as to the development of oyster culture in the Chesapeake area.

CHARLES G. ATKINS.—Biennial spawning of salmon.

The roll of membership now includes about 150 names, 24 new members having been elected during this meeting.

BIOLOGICAL SOCIETY OF WASHINGTON.

The Biological Society of Washington, as heretofore, has held its fortnightly meetings in the lecture hall of the National Museum.

January 24.

The fifth anniversary meeting of the society.

The retiring president, Prof. Charles A. White, delivered an address upon "The Application of Biology to Geological History."

COMMUNICATIONS.

February 7.

Dr. THEODORE GILL.—The relative values of different types in paleontology.

Dr. H. G. BEYER, U. S. N.—Report on intracellular digestion and its relations to pathology.

Dr. J. A. RYDER.—On the probable origin and homologies of the flukes of cetaceans and sirenians.

Mr. J. L. WORTMAN.—A method for exhibiting the relationships of the bones of the skull.

Mr. FREDERICK W. TRUE.—The recent stranding of right whales on Long Island.

February 21.

Dr. THEODORE GILL.—The relative values of different types in paleontology.

Dr. H. G. BEYER, U. S. N.—Genital apparatus of *Lingula*.

Mr. J. L. WORTMAN.—A method for exhibiting the relationships of the bones of the skull.

Mr. FREDERICK W. TRUE.—The recent capture of right whales off Long Island.

March 7.

Dr. C. A. WHITE.—On the use of gutta-percha in making casts of fossils.

Dr. H. G. BEYER, U. S. N.—Report on intracellular digestion and its relations to pathology.

Mr. G. BROWN GOODE.—Remarks on the velocity of animal motion.

March 21.

Mr. WILLIAM H. DALL.—On the marsupium of *Milneria*.

Prof. J. W. CHICKERING, Jr.—Exhibition of some botanical drawings and paintings.

Dr. TARLETON H. BEAN.—Some features of collecting at Cozumel Island, Yucatan.

Dr. J. A. RYDER.—On the development of the mammary glands in the Cetacea.

Mr. LESTER F. WARD.—Phyllotaxy of *Paulownia imperialis*.

April 4.

Prof. C. A. WHITE.—On vegetable cells.

Mr. FRANK H. KNOWLTON.—Remarks on some Alaskan willows and birches.

Mr. FRANK BAKER.—Muscular equalization.

April 18.

Dr. D. E. SALMON and Dr. THEOBALD SMITH.—Koch's method of isolating and cultivating bacteria, as used in the laboratory of the Bureau of Animal Industry.

Mr. A. B. JOHNSON.—The ship-worm and the sheepshead.

Mr. G. BROWN GOODE.—Remarks on the velocity of animal motion.

Mr. ROMY HITCHCOCK.—Exhibition of a preparation of the "comma bacillus" of cholera.

May 2.

Dr. THOMAS TAYLOR.—The white rust of cabbages, *Cystopus candidus* (with illustrations).

Mr. H. W. HENSHAW.—Hybrid quail.

Mr. WILLIAM H. DALL.—Notes on a journey in Florida.

May 16.

Mr. FREDERICK W. TRUE.—Exhibition of a specimen of the Guereza monkey.

Dr. TARLETON H. BEAN.—Note on a new fish from Florida, allied to *Muraenoides*.

Mr. J. L. WORTMAN.—On the reduction of the molar teeth of the Carnivora.

Prof. OTIS T. MASON.—On post-mortem trepanning.

Mr. LESTER F. WARD.—Some Cretaceous fossil plants from the Laramie group.

May 30.

Mr. LESTER F. WARD.—Recent flowering of the Ginkgo tree in Washington, with remarks on the phylogeny of the genus.

Dr. H. G. BEYER, U. S. N.—The physiological effects of cocaine.

Dr. C. V. RILEY.—Notes on the periodical cicada.

Col. MARSHALL McDONALD.—A theory to explain the phenomenal abundance of migratory fishes in certain seasons.

Dr. THOMAS TAYLOR.—How to distinguish animal and vegetable fats.

SOCIETY OF NATURALISTS OF EASTERN NORTH AMERICA.

January 29.

CHARLES S. MINOT.—A new cabinet for microscopical specimens.

CHARLES S. MINOT.—A new feeding trough.

CHARLES S. MINOT.—An apparatus for calculating intervals of days rapidly.

S. H. GAGE.—The use of Müller's fluid for preserving the dark colors of animals.

S. H. GAGE.—The use of collodion for protecting the rubber rings of museum jars.

S. H. GAGE.—Glass bulb canulæ for the injection of silver nitrate, gold chloride, &c.

H. F. OSBORN.—A simple method of injecting the entire arterial and nervous systems in different colors.

H. P. BOWDITCH.—A new form of stop-cock for rubber tubing.

R. RAMSAY WRIGHT.—On methods of staining series of sections.

B. G. WILDER.—The use of slips in scientific correspondence.

C. S. MINOT.—On a new staining solution for histological use.

C. A. ASHBURNER.—Notes on barometric hypsometry.

H. C. LEWIS.—A summer school of geology.

C. A. ASHBURNER.—Methods in practical geology.

H. N. MARTIN.—The use of modeling clay to illustrate lectures.

H. F. OSBORN.—Methods of investigating the embryology of the opossum.

THEO. GILL.—On osteological collections.

January 30.

C. D. WALCOTT.—The collecting and working of invertebrate palæontologic material.

G. K. GILBERT.—Geological bibliography.

GEORGE P. MERRILL.—Exhibition of a colored, enlarged photo-micrograph of a thin section of a rock.

G. BROWN GOODE.—Description of the unit-system of cases used in the U. S. National Museum.

J. A. RYDER.—On Museum alcoholics.

B. G. WILDER and S. H. GAGE.—An investigator's table with double or triple revolving top and movable book-rests.

R. R. WRIGHT.—On the use of series of sections in laboratory teaching and a convenient method of obtaining them.

H. A. HOWELL.—On the use of terrapin blood for the demonstration of the phenomena of coagulation.

HARRISON ALLEN.—Exhibition of the palatograph.

C. V. RILEY.—On the mounting of alcoholic specimens in insect cabinets.

C. V. RILEY.—On a preserving fluid for soft galls and plant tissues.

JOHN MURDOCH.—New application of the towing net in the Arctic regions.

F. W. TRUE.—On the preservation of type specimens.

G. BROWN GOODE.—The use of photography for making large diagrams.

W. H. NILES.—Shall we define groups of organisms?

L. F. WARD.—On a method of rapid drawing for photo-engraving.

R. E. CALL.—Dentition of certain mollusks.

ENTOMOLOGICAL SOCIETY OF WASHINGTON.

January 8.

Prof. C. V. RILEY.—On a larva of *Scenopinus* (Diptera) found infesting the blanket of a Navajo Indian.

Dr. GEORGE MARX.—Discovery of the male of *Gasteracantha* (Arachnida).

March 12.

Annual address by the president, Prof. C. V. Riley.

Mr. B. P. MANN.—Advisability of exact transcription of titles in making references to publications.

Mr. E. A. SCHWARZ.—On a Scolytid beetle (*Pityophthorus consimilis*) infesting sumac.

April 2.

Mr. E. A. SCHWARZ.—Habits of *Rhagium lineatum*.

Mr. E. A. SCHWARZ.—On the character of the coleopterous fauna of the Alleghany Mountains.

Mr. L. O. HOWARD.—On the eggs of *Tingis* (Heteroptera).

Mr. L. O. HOWARD.—On a *Pteromalus* bred from the bags of *Thyridopteryx ephemeraeformis*, and on the difficulty in distinguishing between primary and secondary parasites.

Dr. GEORGE MARX.—On the Arachnidæ collected in Labrador by Mr. L. M. Turner.

Mr. E. A. SCHWARZ.—On the identity of the genera *Eutyphlus* Le Conte and *Nicotheus* Casey.

May 6.

Mr. E. A. SCHWARZ.—On the process of losing the mandibular appendages in *Otiorynchidæ*.

Mr. E. A. SCHWARZ.—On the hibernation of certain *Cerambycidæ* in the imago state.

June 4.

Mr. L. O. HOWARD and Prof. C. V. RILEY.—On the edibility of the periodical cicada.

Prof. C. V. RILEY.—Observations on the natural history of *Cicada septendecim*.

Mr. E. A. SCHWARZ.—On a *Scolytus* bred from hickory bark and wrongly referred to *S. rugulosus*.

Prof. C. V. RILEY.—*Walshia amorphella* bred from roots of loco weed.

Prof. C. V. RILEY.—The habits of *Padisca scudderiana*. *P. saligneana* not identical with *scudderiana*, as generally supposed.

Prof. C. V. RILEY.—On the identity of the noctuid genera *Arzama* and *Sphida*.

12. CURRENT ADMINISTRATIVE WORK.

(a) Buildings and labor; police and public comfort.

On January 1 the staff employed for police and inspection under the charge of Henry Horan, superintendent of buildings, consisted of 2 assistant superintendents, 10 watchmen, 5 doorkeepers; for construction, care of buildings and repairs, 3 carpenters, 2 painters; for labor and cleaning, 19 laborers, 6 cleaners, and 7 attendants. For heating and lighting there was employed 1 engineer, with 4 firemen.

From February 17 to March 9, 4 additional female attendants were engaged on account of the increase in the number of visitors which was anticipated during the inauguration season. On May 27 three extra carpenters were employed for a short time, owing to the press of work

in connection with the preparation of cases for the reception of the exhibits then shortly expected from New Orleans.

From the semi-annual report of the superintendent are abstracted the following paragraphs, which will serve to show in part the work accomplished by the laboring force during the first half of the year:

In January the cases containing the collection of fossils were removed from the east-south and west-south ranges into the south-east court. The north-east court was cleared for the exhibition of specimens in the Department of Ethnology. The laboratory and offices of the curator of Metallurgy were moved from the first floor of the south-west pavilion to the second floor. The offices of the curator of Mammals were moved from the south tower to the first floor of the south-west pavilion. The installation of certain metallurgical exhibits was commenced. Some of the specimens are very heavy, and required much time and a large force to effect their transfer properly.

In February cases were prepared for the reception of the basket exhibit by the Department of Ethnology. The cases containing the textile exhibit were arranged in the west hall. The collections of modern pottery and terra-cotta were installed on the north side of the west hall. Several cases containing minerals were removed from the west-south range into the Mineral hall. The handling of heavy cases full of specimens was continued for several days during this month.

In March the force of attendants was increased, and many of the laborers assigned to duty as watchmen, on account of the extra crowds of visitors expected during the "inauguration season." During the five days, March 2 to March 6, no less than 48,148 people visited the Smithsonian building and the National Museum. On March 3 10,781 people were registered in the Museum and 9,719 in the Smithsonian building. On March 19 the heavy specimens of pottery, terra-cotta, tiling, &c., were transferred from the Smithsonian building to the Museum. The walls of the south hall were decorated with heads of elk, deer, and buffaloes.

In April the U. S. Fish Commission steamer Albatross arrived with several wagon-loads of specimens for the Department of Marine Invertebrates. These were transferred without delay. Work-rooms were constructed and fitted up in the Annex building for the use of the modelers. A large and heavy portion of the exhibits from the London Fisheries Exhibition, which had been stored on the east balcony, were assigned and transferred to the proper departments. The laboratory of the Department of Mollusks was fitted with standard wall cases.

In May a shed for the accommodation of stone-cutters was built between the Museum building and the Annex. The south and east fronts of the Museum building were paved with concrete. A very large collection of birds was removed from the Agricultural Department to the Smithsonian building. Much time was devoted to the preparation of cases for the exhibits to be returned from the New Orleans Exposition.

In June a loft was constructed in the Annex building for storage purposes. The collection of scientific apparatus was removed from the Smithsonian building into the Museum building and installed in suitable cases. The north-west gallery of the Smithsonian building was cleared and fitted with cases and shelving for the collections of marine invertebrates, which were transferred thither from the west hall. This work involved the expenditure of much time and labor. Nineteen car-loads of metallurgical exhibits were received from Philadelphia and unpacked. The painting of the exterior wood-work of the Smithsonian building was commenced.

(b) *Electric service.*

The only additions during the first half of the year consisted in (1) replacing the 50-drop annunciator with a 100-drop instrument; (2) a new standard-time clock connected with the Naval Observatory and

placed in the Smithsonian building, and (3) the establishment of a fire-alarm box connecting the National Museum with the fire headquarters. In April a telegraph office was opened in the telephone room, providing for the transmission and receipt of messages over the Western Union, Baltimore and Ohio, and Government lines. An underground cable was laid for telephone wires from the south front of the Smithsonian building to the north-west basement of the Museum building.

All the doors and windows in the Museum building are connected with an electric communicator, which contains 100 drops. By this means the watchman is notified if any door or window is open after the closing of the Museum, or of any burglarious entry. There are also insulated wires laid under all the marble floors at a distance of 8 feet apart. These are easily accessible, and are for the purpose of connecting the exhibition cases to a 50-drop annunciator. To all of the alarm apparatus switches are attached for the purpose of disconnecting during business hours any or all portions of the Museum building that may be desired.

The time-service consists of one Howard Company's standard eight-day electric-clock movement, which by metallic circuit connects with and gives correct time to six 36-inch dials placed in the main exhibition halls of the Museum and Smithsonian buildings, and also to seven 18-inch dials situated in the offices of the buildings. The motive power is supplied by 50 cells of Smee battery, situated in the basement of the Museum and controlled by two electric relays. There are two standard clocks, one in the Museum building and the other in the Smithsonian building, which have a metallic connection with the Naval Observatory, and by that means are corrected every day, thereby giving exact time in both buildings. There is also a Howard Company's standard time and watch clock in the electrical room. This is connected to fourteen station boxes. These station boxes are visited every hour by the watchman patrolling the building, who, by inserting his key in each box, registers the time of each visit upon the dial placed within the clock. There is also a similar clock of smaller dimensions placed in the superintendent's office of the Smithsonian Institution, which works in the same manner.

Electrical push-buttons are arranged on each corner of all the exhibition halls of the Museum. These are connected with an electric annunciator for the use of floor inspectors, watchmen, and others who may need immediate assistance.

The electric call-bell system is comprised of twelve large gongs placed in different portions of the Museum building. These are connected with call-buttons for the purpose of calling the officers or messengers.

A similar system, consisting of six gongs, is also distributed through the Smithsonian building. There is also a system of District messenger call-boxes, by which outside messengers can be summoned any time day or night.

The watchmen in charge of the buildings are required to report

through the messenger call-boxes to the District messenger headquarters every hour during the time when the buildings are closed.

The electrical-light system is comprised of one six-light dynamo and governing dial run by a twenty horse-power engine. This supplies a current to six electric arc lamps of 1,500 candle-power, for which suitable wires and connections are placed in all the main exhibition halls. The dynamo is used principally for supplying current to two photographic electric lamps. There is also a single-light dynamo and lamp used as a reserve. One Brush storage battery, consisting of sixty-three elements, is used for supplying current to forty incandescent lamps, which supply light to the lecture hall.

In connection with the electrical service there is at the Armory building an electric hydrostatic indicator for the purpose of giving the height and depth of the water in the reservoir in the building.

The telephone system now consists of forty separate lines. These include two lines to the city exchange, and lines connecting the residences of the chief officers, and all annexes and branches of the Museum and Smithsonian buildings. The lines connect to a switch-board in the Museum building, through which communication can be had at any time either day or night. The number of communications transmitted and received through these lines daily averages one hundred and twenty-five.

"Nature," commenting upon the electric service in the Museum, in an article of the issue dated June 28, 1883, says:

"The National Museum at Washington is one of the best examples in the United States of the practical application of electricity. In so large a building it was found advisable to take advantage of the best means of communication, first being its system of telephones and call-bells, by which those in any room can communicate with every room in the building. Twenty-six telephones are connected by a local telephone exchange, which in turn is connected with the main telephone office of the city. The result is that but three messengers are needed in this vast establishment. The photographic laboratory is independent of the sun, owing to the electric light there used. If one of the 850 windows or 230 doors is opened, a bell rings, and an annunciator shows to an attendant at the main office which window or door it is. This system is soon to be applied to every case of specimens. The watchmen at night, also, are kept to their posts by hourly releasing an electric current at certain stations, which pierces a dial and records their visit. The sixteen clock-dials are likewise run by electric currents."

The following is a complete list of the electrical property of the National Museum on June 30, 1885:

2 100-drop Museum annunciators.	1 Brush reflecting lamp.
2 25-drop Museum annunciators.	40 Swan incandescent lamps.
1 6-drop Rosseau annunciator.	1 Howard tower clock.
1 Howard time and watch clock.	13 Western Electric Company's bells.
18 Howard time and watch clock stations.	30 LeClanche battery cells.
6 Howard 30-second clocks.	1 Barnes's foot-lathe.
7 Howard 15-second clocks.	1 bench vise.
50 cells Howard clock battery.	1 set of lathe drills.
1 Brush storage battery.	2 lathe chucks.
1 Brush single light dynamo.	1 set taps dies.
5 Brush electric lamps.	1 step-ladder.
	3 post-magneto bells.

(c) Property and supplies.

The property clerk is charged with the inspection of all articles of furniture and with the distribution of supplies under the prescribed rules. It is intended to bring this department into closer connection with the department of accounts and requisitions, and for this reason a detailed statement of the exact duties of this office will be deferred until the next report.

(d) Accounts.

The routine work pertaining to the issue of orders and the adjustment of accounts, preparatory to their payment from the office of the chief clerk of the Smithsonian Institution, has been carefully and satisfactorily performed by Mr. W. V. Cox, financial clerk. A statement of the receipts and expenditures of the Museum will be found in the report of the executive committee of the Board of Regents of the Smithsonian Institution.

13. THE WORK OF THE MUSEUM PREPARATORS.

The work of preparing specimens for exhibition in the Museum or for the study series has progressed very satisfactorily during these six months. The force of preparators now includes nine men of undoubted skill, whose work amply testifies to the thoroughness of their methods.

(a) William T. Hornaday, chief taxidermist; Henry Marshall.

(b) Frederic A. Lucas, osteological preparator.

(c) Joseph Palmer and J. W. Hendley, modelers.

(d) T. W. Smillie, photographer.

(e) A. Zeno Shindler, artist.

(f) E. H. Hawley and T. W. Sweeney, preparators in the Division of Anthropology.

(a) Taxidermists.

The most valuable accessions of fresh specimens in the Taxidermic Department during the first half of 1885 were as follows:

A water-buck, dorcas gazelle, axis deer, and a fine ostrich from Mr. W. A. Conklin.

A fallow deer, olive baboon, and dog-faced baboon from Barnum, Bailey & Hutchinson.

A Coypu rat, Hoffman's sloth, and two kangaroos from A. E. Brown, superintendent Philadelphia Zoological Gardens.

A white-faced antelope and olive baboon from W. T. Hornaday.

A fine series of 8 large skins of California elephant seal.

Three skins of harp-seal from C. Hart Merriam.

Three tiger cubs from Mr. Adam Forepaugh.

The most noteworthy of the animals mounted during the same period were as follows:

A fine specimen of the rare and remarkable guereza monkey, an olive

baboon, a mandrill, a Japanese macaque, a large mountain sheep, a prong-horned antelope, harnessed antelope, a peccary, a large dusky shark (*Carcharinus obscurus*), a fine dugong, ten feet in length, and three heads of large mammals.

In addition to the above, twelve large Mammal heads were repaired, remounted, and hung in the mammal hall.

The collection of mammals sent from the Museum and the exhibit of the Society of American Taxidermists were unpacked and installed at the New Orleans Exposition in the month of January, and in June were repacked for return shipment, all of which greatly lessened the number of specimens which would have been mounted during the half year.

The following is a list of the mammals, etc., mounted in the taxidermic workshops from January 1 to July 1, 1885:

PRIMATES.	UNGULATA.
14511. <i>Colobus guereza</i> .	14938. <i>Memimna indica</i> .
14672. <i>Cynocephalus sphinx</i> .	14517. <i>Ovis montana</i> .
14229. <i>Cynocephalus porcarius</i> .	<i>Ovis cycloceras</i> .
14324. <i>Cynocephalus anubis</i> .	14708. <i>Ovis nivicola</i> .
14956. <i>Cynocephalus anubis</i> .	14874. <i>Antilocapra americana</i> .
13632. <i>Ædipus titi</i> .	14875. <i>Antilocapra americana</i> . (Head.)
13830. <i>Macacus speciosus</i> .	14326. <i>Tragelaphus scripta</i> .
14604. <i>Papio maimon</i> .	14667. <i>Dicotyles torquatus</i> .
14664. <i>Sennopithecus</i> sp.	
CARNIVORA.	MARSUPIALIA.
14123. <i>Ursus americanus</i> , var. <i>cinnamomeus</i> .	14665. <i>Macropus gigas</i> .
SIRENIA.	MISCELLANEOUS OBJECTS.
13721. <i>Halicore australis</i> (10 feet long).	<i>Carcharinus obscurus</i> (Dusky shark, 10 feet long).
RODENTIA.	<i>Ardetta exilis</i> (Least bittern).
14995. <i>Myopotamus coypu</i> .	<i>Chroicocephalus philadelphia</i> (Bonaparte's gull). Two specimens.
14065. <i>Neofiber Allenii</i> .	<i>Salmo salar</i> (Potomac salmon).

16 mammals skinned and preserved.

11 heads of large mammals repaired and remounted.

19 skins of large mammals poisoned, dried, and dressed.

22 mounted mammals dismounted and made into skins.

28 mounted mammals dismounted and destroyed.

1 *Lagenorhynchus* repaired.

5 boxes of skins packed and shipped.

The following exhibits were unpacked and installed at the New Orleans Exposition:

	Specimens.
Mammals	147
Mammal casts	14
Skeletons	28
Taxidermic exhibit	56

The following exhibits were packed at the New Orleans Exposition for return shipment :

	Specimens.
Mammals	150
Birds	163
Skeletons	28
Society of American Taxidermists	56
Casts of mammals	14
Heads of mammals	8
Antlers of mammals	8

The following is a list of mammals, etc., in flesh secured for the taxidermic department during first half of 1885.

14750. <i>Cynocephalus babouin</i> , Baboon.	14952. <i>Cervus axis</i> , Axis Deer.
14956. <i>Cynocephalus anubis</i> , Olive Baboon.	14999. <i>Cervus dama</i> , Fallow Deer.
14763. <i>Semnopithecus siamensis</i> .	15054. <i>Cervus dama</i> (young).
14984. <i>Felis tigris</i> , Tiger (cub).	14938. <i>Memimna indica</i> , Musk Deer.
14984. <i>Felis tigris</i> , Tiger (cub).	14997. <i>Kobus ellipsiprimnus</i> , Waterbuck.
14984. <i>Felis tigris</i> , Tiger (cub).	14995. <i>Myopotamus coypu</i> , Coypu Rat.
14956. <i>Damalis pygarga</i> , Bonte-bok.	21765. <i>Cholæpus Hoffmanii</i> , Sloth.
14955. <i>Gazella dorcas</i> , Dorcas Gazelle.	14772. <i>Macropus rufus</i> , Red Kangaroo.
	<i>Struthio camelus</i> , Ostrich.

The following is a list of objects donated to the National Museum for the exhibit of the Society of American Taxidermists, and placed in charge of W. T. Hornaday, curator of the collection of the Society of American Taxidermists :

Name of donor.	Object.
W. T. Hornaday	Setter dog and quails, "Coming to the Point." (Silver medal.)
F. A. Lucas	Group of hawks, "An Interrupted Dinner." (Diploma of honor.)
F. A. Lucas	Group of turtles. (Bronze medal.)
F. A. Lucas	Group of herons.
F. S. Webster	Wounded heron. (Bronze medal.)
T. W. Fraine	Peacock screen.
Prof. Henry A. Ward	Head of caribou.
John Wallace	Bald eagle.
John Wallace	Great horned owl. (Bronze medal.)
Mr. and Mrs. George H. Hedley	Group of humming birds.
Joseph Palmer	Group of squirrels.
William Palmer	Group of ducks.
J. F. D. Bailly	Two groups of frogs. (Grotesque.)
E. A. Capen	Dead gull.
P. W. Aldrich	Fox squirrel.
Thomas Rowland	Snowy egret.
J. F. D. Bailly	Portrait of Jules Verreaux.
G. L. Nicholas	Series of 5 specimens to show process of removing and preserving bird skins.
G. L. Nicholas	Series of 14 bird skins.
G. L. Nicholas	Series of 3 bird pedestals, showing style adopted by the Museum of the College of New Jersey.
Dr. J. B. Holder	Series of 2 bird pedestals, to show the styles adopted in the American Museum of Natural History.

Mr. Henry Marshall devoted his time, as usual, to mounting specimens for the Department of Birds. During the six months covered by this report he prepared 235 specimens for the exhibition series, nearly all of which were mounted from dried skins,

(b) Osteological preparator.

Mr. Frederic A. Lucas reports that during the last six months twelve specimens, mostly of large size, have been received and cared for, nineteen cleaned, and twenty-nine mounted and placed in the exhibition series. Chief among these last is an almost unique skeleton of the extinct sirenian, *Rhytina gigas*. The regular work of maceration was begun early in the spring, nine jars, thirty-five barrels, and three large tanks being filled with some two hundred specimens. The collection of bird bones has been removed from the Smithsonian to the Museum building, and part of the material, received in exchange from the Army Medical Museum, transferred to the Institution. The rapid growth of the osteological collections necessitates frequent changes in the arrangement of both the exhibition and study series, and a continual increase of time in caring for the specimens. It is to be regretted that the force available in this section is so small, since the work, owing to its peculiar nature, is necessarily slow and subject to frequent interruptions. One more trained assistant would relieve the chief osteologist of much of the manual work and leave him time for more important duties. The limit of work in cleaning skeletons with the present force has been reached, and it is difficult, if not impossible, to keep pace with the accessions of material. Mr. Lucas has been assisted by Mr. Scollick.

(c) Modelers.

Mr. Joseph Palmer states that his principal work has been that of casting from molds which have accumulated from former years, and in repairing fish, reptile, and porpoise casts that had been returned broken from the various expositions to which they had been sent. A fine specimen of the rare sperm-whale porpoise, *Kogia breviceps*, in the flesh, was received and molded, and also a spotted porpoise, *Prodelphinus*, the molds of which, together with others, notably a large grampus, bottle-nosed porpoise, halibut, spiny shark, &c., have been prepared and cast, and are now ready for painting.

In making a mold of a snake it was found that usually a globule of air would form at the point of the scales and produce in the cast a similar globule of plaster, the removal of which caused considerable minute work. By experiment this has been remedied by molding the snake in a wet condition, which allows the air to be taken up by the plaster used in making the mold.

Improvements have also been made in the method of making paper casts of the large fishes, porpoises, &c., and the work has been greatly facilitated thereby.

Major Powell having vacated the room for several years occupied by his photographers, Mr. Marshall has moved into them, thus giving increased space, which has been still further added to by the use of a shed at the rear of the Smithsonian building for casting the larger molds.

It is to be regretted that better accommodations under a single roof cannot be furnished for this work.

Mr. Hendley made and painted a large number of casts of archaeological specimens for display at the New Orleans Exposition, and also of twenty-seven mound pipes. A series of experiments was also made in the use of cements in casting.

(d) *Photographer.*

During the six months 410 negatives have been added to the files; of these 293 are ethnological, 43 of fishing-boats and fish-hatching stations, &c., and 74 mineralogical, lithological, osteological, and miscellaneous.

Sixteen hundred and six prints have been made, as follows:

Ethnological and archaeological.....	1,002
Mineralogical prints	87
Fishing vessels, boats, &c.....	232
Miscellaneous.....	25

Three hundred and six cyanotypes, plans of cases, &c. (for distribution to correspondents).

Sixty-one enlargements by electric light have been made, as follows:

For the Department of Metallurgy.....	27
For the Department of Fabrics	13
For the Department of Mammals.....	10
For the Department of Lithology.....	2
Of fish-hatching stations, &c	9

The numbering and filing of negatives has been completed to date, and a sample book of photographs is now being prepared.

Five pupils have been instructed in the elements of the art of photography. Lieutenant Winterhalter has already done valuable work in photographing the eclipse of the sun. Mr. Merrill has photographed for his own department numerous stone quarries, mud cracks, drift bowlders, &c. Mr. J. Templeman Brown has photographed a number of fishing vessels, and Dr. Nash is now in Alaska with Lieutenant Stoney, in charge of the photographic work of the expedition.

(e) *Artist.*

Mr. A. Zeno Shindler painted several life-size busts of Indians, modeled by Achille Collin, sculptor; also, a large number of photographs of costumes. He restored an ancient oil-painting of Constantinople, and colored several casts of Indian implements for the Department of Antiquities.

(f) *Preparators in the Division of Anthropology.*

Mr. E. H. Hawley devoted a portion of his time to the completion of exhibits for the New Orleans Exposition.

The installation of the collection of costumes has been commenced. It is intended to exhibit with each costume a photograph. In some cases persons wearing a given costume have already been photographed, and these photographs, colored by Mr. Shindler, will be displayed in connection with the costumes. By this means the visitors can not only see the costume, but learn its manner of habiliment. For the preservation of certain costumes whose fibers or colors are too delicate to be poisoned in the usual way, Mr. Hawley has adopted the method of sealing the boxes with strips of cloth smeared with poisoned glue. The installation of the Chelsea Art Castings, contributed by the Magee Furnace Company, a collection of Indian blankets, and a series of models of Zuñi idols, symbols, &c., has also been commenced. Labels are in course of preparation for the collection of Hindoo religious and household utensils, and for the small statuettes illustrating the castes and costumes of those people.

In order to place on permanent record the work accomplished in this department of the Museum service, the management issued a circular on June 1 to all preparators, requiring that after that date reports should be made as to the amount and character of work received, commenced, and finished during each week.

14. SKETCH OF THE EXHIBIT MADE BY THE SMITHSONIAN INSTITUTION AT THE NEW ORLEANS EXPOSITION.

On pages 51 and 52 of the Report for 1884 reference is made to the participation of the Smithsonian Institution, including the National Museum, in the New Orleans Exposition, with a brief statement of the exhibit made by the Museum. The weight of the collections sent from the Institution was 176,000 pounds. A portion of this material had already been exhibited at the Louisville and Cincinnati exhibitions and was forwarded from those places to New Orleans. In the middle of November, 1884, was commenced the shipment of material from Washington, and the entire collection, consisting of seventeen car-loads, was forwarded within a few weeks. The extent of the space allotted to this exhibit in the building provided for the display of Government and State exhibits, was $81\frac{1}{2}$ feet wide and 300 feet long, including 24,750 square feet.

On December 6, Mr. G. Brown Goode and Mr. R. E. Earll started for New Orleans to begin the work of installing the collections, and at various times during the progress of the Exposition many of the curators whose departments were represented, attended the Exposition in the interests of their exhibits. A brief sketch of these collections is now given, the exhibits being referred to in order, according to the amount of floor-space occupied.

The Animal Products exhibit occupied the largest amount of space (2,400 square feet). Specimens of fur from nearly every fur-bearing animal in the United States were shown, and in general the methods of

utilizing the hair, fur, feathers, skin, scales, flesh, bones, horns, teeth, claws, viscera, and excrements of various animals were displayed. A collection of models and illustrations of traps were also included.

In the section of Fisheries and Fish-culture (2,345 square feet) was displayed a large collection of fishing apparatus and 150 photographs illustrative of the methods employed in our sea and river fisheries; also a large number of plaster models of food-fishes of North America. The operations of hatching young fish of several species were fully shown.

The exhibit of the Department of Metallurgy and Economic Geology (1,274 square feet) was one of the largest prepared by the Smithsonian Institution. The various kinds and grades of the ores of each metal were shown, and also collections representing the processes for the extraction of the metals from their ores.

The exhibit of the Department of Ethnology (1,904 square feet) consisted of a collection illustrating the social condition of the various tribes of North American Indians and Eskimo.

The Textile display (1,624 square feet) was intended to show the numerous fibers used in the manufacture of textiles, and, as far as practicable, the various stages of preparation and the processes of manufacture. The fibers of foreign countries were largely represented.

The exhibit of the Department of Mollusks (1,328 square feet) included several cases of the fresh-water mussels, marine shells, the edible mollusca of the United States, and selected specimens from the Indo-Pacific region.

In the Mineral exhibit (1,290 square feet) was a collection of the minerals which afford gems and ornamental stones, and several specimens of cut and polished stones.

The Mammal exhibit (1,082 square feet) consisted of 160 specimens, representing 150 species and varieties, and including all of the North American ruminants except the musk-ox, the important carnivores, the noxious rodents, representative species of porpoises, the manatees, and the more characteristic monkeys, sloths, bats, and insectivores.

A collection illustrating the development of the vessels of the merchant marine was shown in the space allotted to the section of Naval Architecture (686 square feet). Prominent among these were models showing the development of cotton-ships.

In the Art exhibit (652 square feet) a collection of 120 autotypes was arranged chronologically by countries, and was intended to represent the most noted pictures of the principal artists of the world and the most renowned pieces of sculpture. The process of photo-engraving was also illustrated by a collection from the Photo-Engraving Company of New York.

An interesting exhibit was made by the Society of American Taxidermists. This occupied 595 square feet, and included specimens prepared by some of the leading members of the society.

The collection of birds, occupying 540 square feet of floor-space, con-

sisted of 163 finely-mounted specimens of the game birds of North America, mounted on stands made of polished black walnut.

A collection of stone implements from various localities in North America, occupying 406 square feet, was exhibited in six cases.

The exhibit from the Department of Lithology and Physical Geology (384 square feet) consisted of (1) a collection of 358 4-inch cubes representing the building and ornamental stones of the United States; (2) 12 specimens of foreign and native marbles; (3) 150 specimens of rock-forming minerals; (4) a "structural series," intended to represent all the more common forms of rock structure and texture; (5) 198 specimens of rocks illustrating the geology and lithology of the Comstock lode and Washoe district, Nevada; and (6) a lithological collection of 500 specimens of rocks of various kinds.

An extensive series of models in plaster of the turtles and snakes of North America, occupying a floor-space of 300 square feet, was shown. These casts were life-size and accurately colored from living specimens or colored sketches.

These collections attracted marked attention, and sustained the reputation of the Smithsonian Institution in its ability to prepare creditable displays at very short notice.

E.—REVIEW OF THE HALF YEAR'S WORK IN THE SCIENTIFIC DEPARTMENTS.

15. DIVISION OF ANTHROPOLOGY.

(a) *Department of Arts and Industries.*

In the Department of Arts and Industries several sections have already been organized.

That of *Materia Medica*, under the charge of Dr. H. G. Beyer, U. S. N., who has been detailed for this service by the Surgeon-General of the Navy, is in excellent condition, and the collection is the most extensive of its kind in America. The work of labeling has been finished, and during the year the exhibition series will be extended and rearranged. Dr. Beyer is prosecuting a chemical investigation of the different species of cinchona barks in the collection—numbering over one hundred—and has made some important determinations of the alkaloids of some cinchona barks from new regions in Guatemala and Costa Rica. He has also carried on investigations upon the physiological actions of atropia, cocaine, and caffeine on the circulatory apparatus, the results of which have already been published in the *American Journal of the Medical Sciences*. Other experiments on the action of atropine on the heart, and of blood at different temperatures, have been discussed in the *Proceedings of the Museum*.

In the section of Foods, under the honorary curatorship of Professor

Atwater, some progress has been made in the work of building up a collection illustrating the physiological action of foods and the composition of the human body, similar to the famous collection in the Bethnal Green Museum in London.

Mr. Hitchcock, who is acting curator of this collection, has, however, devoted most of his time to the development of the section of Textiles, which is directly under his charge. This section has been largely increased by donations from abroad, but especially through collections made by himself while preparing for the exposition at New Orleans. The object of these collections is twofold: First, to place upon view the various textile fibers available for use in this country and abroad, with specimens of articles made therefrom, such as cloth, rope, twine, mats, &c.; second, to provide a series of specimens of every fiber that can be used in the arts, to be used for scientific examination, tests of tensile strength, and especially to serve as type specimens for the identification of other fibers by microscopical examination. A number of collections which have been received are worthy of special mention; among these a particularly fine set of fibers from Brazil, collected by Dr. J. Charles Berrinni, of Quissanam, who has devoted unusual care and labor to the work. All the textile fibers in the museum of the Department of Agriculture were placed in Mr. Hitchcock's charge during January, and from this collection some valuable specimens have been selected and placed on exhibition. Mr. George W. Bond, of Boston, has selected a large collection of native and foreign wools, from samples belonging to the United States customs department, which have been prepared for exhibition; they are not yet, however, on exhibition, as the cases for their display are not yet made. This collection is probably already the best thing of the kind to be found in any museum, and when all the wools belonging to the Museum collections are mounted, the display of this textile will be, if not quite complete, at least very large and valuable.

Owing to the restricted floor-space in the Museum which has been assigned to this department, it has been impossible to make the display of specimens as instructive and attractive as it might be. By far the greater part of the collection, and some of the most interesting specimens, have been sent to the exposition at New Orleans, where this department was well represented. A detailed account, however, of the display there made would not be of interest in this report, and the subject may be passed over with the statement that there were sent to New Orleans 290 unit boxes to represent the Textile Department of the Museum. The display is said to have been very attractive.

Mr. Hitchcock has also been requested to take charge of the physical apparatus belonging to the Smithsonian Institution which has been transferred to the National Museum and placed in cases. The arrangement has been necessarily very unsystematic, owing to the limited space at his disposal, but in a general way it is classified under three heads,

namely : apparatus for experiments on sound, heat and light, and electricity. A list of the instruments in this collection (which is of interest as having been used by Professor Henry) is in course of preparation. In connection with it may be mentioned the relics of electrical and chemical apparatus of Dr. Joseph Priestley, which is on exhibition in the same place.

The collection of historical relics has received but little attention during the six months, and no effort is at present being made to increase its extent. Perhaps no part of the Museum is more attractive to visitors than that in which the relics of Washington are displayed, and it is believed that the section of Historical Relics will receive from year to year a constant increment of valuable memorials of the past. The heirs of General Robert E. Lee have presented a claim for the recovery of articles of furniture removed from Arlington in 1862, and since then on exhibition with the Washington relics at the Patent Office and in the Museum. Most of these appear never to have been the property of General Washington. They will, however, be held in the Museum until official instruction for their delivery has been received.

There has been little activity in connection with the section of Fisheries, the section of Naval Architecture, and the collection of Musical Instruments, all of which are, however, in excellent order and have been considerably extended, though without direct effort. An accession to the section of Naval Architecture of very great popular interest is the corrugated metallic life-car invented by Joseph Francis.*

*Joseph Francis was born in Massachusetts, March 12, 1805. When only eleven years old he manufactured a boat to which he applied cork, confined in wood, in the bow and stern, as a buoyant power. This boat, when filled with water, supported four men. This determination to devote his life to the invention of life-saving apparatus was fixed by the occurrence of many terrible shipwrecks along the coasts of New Jersey and Long Island in 1812, and between this year and 1821 he made a series of experiments with the view of obtaining more buoyant power in boats. In 1819 he invented and built a light, fast row-boat, possessing all the life-saving qualities he had perfected up to that time, and for this he was awarded an "honorable recognition" at the first fair of the Massachusetts Mechanics' Institute.

Among the special boats constructed under the direction of Mr. Francis may be mentioned the Brazilian barge; the barge ordered for the Emperor of Russia; a section metallic bateau for the Russian Government; the first Venetian gondola made in the United States; portable screw-boats which were easily adjusted, being built in sections and fastened together with screws; the life and anchor launch; the double or reversed bottom life-boat, &c.

The crowning success in Mr. Francis's life, as an inventor, was the discovery of the fact that corrugated metal could be used as a substitute for wood in the construction of life-cars or life-boats. He found very great difficulty in corrugating metal on curved and irregular surfaces. After repeated experiments two perfect sides of a boat were produced with deep and full corrugations and with a surface free from wrinkles; the two sides were riveted together, and the "first corrugated metal boat was made," being the first practical result of his invention of the covered life-car, invented in 1838. His experiments in connection with the corrugating of metal continued during 1840 and 1841. It was not, however, until 1847 that Mr. Francis manufactured a life-car which he considered absolutely perfect. The original Ayrshire life-car con-

An illustrated catalogue of the Catlin collection of Indian paintings has been prepared by Mr. Thomas Donaldson, and constitutes Part V of this report.

Mr. J. E. Watkins, of Camden, N. J., who is one of the leading authorities in the country upon the history of railroads and steam transportation, and who is indorsed by many of the leading railroad men of the country, was in June appointed honorary curator of the section of Steam Transportation. It is intended, as opportunity offers, to gather in the Museum a collection of objects illustrating the history of American railroads and steamboats, with a view to preserving permanently the memorials of the growth of this most important interest, which has been so closely connected with the material progress of the United States. Several important specimens have already been received, notably the "John Bull" locomotive engine, which was built in 1831, in England, by George and Robert Stephenson, for the Camden and Amboy Rail and Tramway Company, by whom this engine was used from 1831 to 1861. This is now stored at the Armory building, but will be on exhibition as soon as proper space can be provided.

(b) Department of Ethnology.

The Department of Ethnology has made rapid advances under the care of its new curator, Prof. Otis T. Mason, although his detail for special services in connection with the New Orleans Exposition necessitated his absence for nearly two months. During the remainder of the time he has been occupied in preparing for exhibition monographic collections of those classes of objects in which the Museum is rich, paying special attention to the subject of aboriginal baskets, throwing-sticks, and weapons.

(c) Department of American Prehistoric Pottery.

Mr. William H. Holmes, of the Bureau of Ethnology, has continued the installation of aboriginal pottery, directing his efforts chiefly to labeling, cataloguing, and classifying the accessions received in the summer and fall of 1884. The very extensive collections of Pueblo

constructed in 1847 was the first of the kind ever used, and this was only used once, when, on January 12, 1850, two hundred men, women, and children were saved from the wreck of the ship *Ayrshire*. This life-car is now on exhibition in the National Museum.

After the discovery of corrugating iron many metallic forms of boats, military pontons, ponton-wagons, buoys, steamers, floating-docks, whale-boats, canal-boats, &c., were produced.

In the "History of Life-Saving Appliances and Military and Naval Constructions," from which many of the above facts are derived, is a very interesting account of the exhibition and test of the iron corrugated military ponton-wagon at Closternewburg, before the Emperor of Austria. His interviews with foreign potentates were numerous, and the exhibitions of his wonderful inventions always aroused great enthusiasm.

material made for the Exposition in New Orleans arrived too late to be made fully available for exhibition, but a small representative series of vessels and other objects of clay was forwarded to New Orleans. The collection of ancient pottery, recently obtained from Chiriqui, Panama, and partially paid for from the exposition funds, was also represented. The most important accessions have been from the explorations of Mr. L. H. Aymé, in Mexico. It is hoped that a portion at least of the pottery court will be opened to the public by the end of the present calendar year.

(d) *Department of Antiquities.*

Dr. Charles Rau has continued his work in the Department of Antiquities, carrying on toward completion the system of arrangement which he began ten years ago. He reports important accessions from the Bureau of Ethnology; from explorations of Edward Palmer in Arizona; from Oaxaca, Mexico, by L. H. Aymé; from Costa Rica by J. C. Zeledon; and from the island of Guadeloupe by Guesde. A very valuable collection of casts of antiquities of Mexico and Yucatan has been deposited in the Museum by Señor Eufemio Abadiano, of Mexico, by whom they were made. This collection, of which a list is given in Part IV* of this report includes full-size reproductions of thirty-two exceedingly important objects, such as the Mexican Aztec Calendar Stone, the Sacrificial Stone, the Aztec Goddess of Death (Teoyoamiqui), and the wonderful reclining figure of Chac-Mool. This collection has been forwarded from New Orleans and will soon be on exhibition, and it is hoped that by some means it may ultimately become the property of the Museum. It will be installed by the side of the Lorillard collection and other Central American antiquities. These two collections of casts, together with the originals already in possession of the Museum, will entirely fill one of the small exhibition galleries and constitute a display of native American sculpture and architecture which is equaled nowhere in the world.

16. DIVISION OF ZOOLOGY.

(a) *Department of Mammals.*

At the beginning of the year the work of the Mammal Department, incident upon the preparation of a collection to be exhibited in New Orleans, having been entirely completed, the regular routine work was resumed. The Mammal exhibition hall has been rendered less attractive than formerly by the removal of numerous large specimens to New Orleans, and a temporary rearrangement of the collections was attempted in order to make the deficiencies less conspicuous. During the first quarter of the year thirty-three mounted specimens were added to the exhibition series, including several large forms, such as Siberian sheep, a baboon, &c. A list of all the mounted mammals was made in February, and soon afterwards temporary labels were written and distrib-

* Accession 16185.

uted among the specimens. Manuscript for printed labels for the entire series was also prepared.

In April the Commissioner of Fisheries offered a reward for the capture of a specimen of a spotted dolphin, said to be abundant in the Gulf of Mexico. A fresh specimen was soon afterwards received through Messrs. Warren and Stearns, of Pensacola, Fla., and proved to be remarkably interesting scientifically. On the 9th of April three telegrams were received from life-saving-station keepers, announcing the stranding of cetaceans, two having reference to blackfish stranded near Cape Henry, and the third to a finback whale ashore near Truro, Mass. The most interesting cetaceans received during the half year were a male pygmy sperm-whale (*Kogia*) and the skull of an Atlantic right whale (*Balaena cisarctica*).

Messrs. Barnum, Bailey & Hutchinson, Mr. Adam Forepaugh, and the authorities of the Philadelphia Zoological Gardens (through Mr. A. E. Brown), and the Central Park Menagerie (through Mr. W. A. Conklin), have continued to send many interesting animals in the flesh.

In June the chief taxidermist was ordered to New Orleans to superintend the packing of the mammals exhibited in that city. During his stay he negotiated an exchange in behalf of the Museum by which three valuable specimens of *Quadrupana* were acquired, including a specimen of the interesting gibbon, *Hylobates concolor*. The New Orleans exhibit was not received at the Museum until after the 1st of July. (For a preliminary account of this collection see Museum report, 1884, p. 133.)

At the beginning of the year an office and a commodious laboratory in the south-west pavilion of the Museum building were assigned to the department. In consequence of this arrangement the collections are now more accessible than formerly.

(b) *Department of Birds.*

Mr. Ridgway, curator of birds, prepared for exhibition at the New Orleans Exposition a collection of North American game-birds, numbering 163 finely-mounted specimens and representing nearly all the species. The exhibit was at first intended to be much more comprehensive, the original plan being to exhibit all the known species of North American birds, so far as they could be secured, together with typical groups to illustrate the avian fauna of the several zoo-geographical divisions of the earth's surface. To this end more than 700 specimens were mounted by special contract, it being impossible to make up a suitable collection from the birds already mounted. The collection had been nearly completed on the original plan, when it became necessary, on account of the limited space available, to make a great reduction. This collection was installed by Dr. Leonhard Stejneger, assistant curator, who, left Washington January 3 and returned on the 16th of the month. Dr. Stejneger reports that "in regard to complete-

ness, perfection of mounting and preservation, scientific exactness, and popular instructiveness" this collection "was superior to any other ornithological exhibit at the Exposition." The collection filled two double Museum cases, fitted with two rows of terraced shelves, the exhibition surface amounting to a little over 600 square feet. Each specimen was mounted on a stand of polished black walnut, and provided with a printed label, on which were printed in large, clear type both the scientific and popular names.

The curator in his report calls attention to the "American Ornithologists' Union," which was formed at the urgent request of the various ornithological interests of the country for the main purpose of harmonizing existing differences in the nomenclature of North American birds, and thereby removing the most serious obstacle to the study of ornithology. At the meeting of organization in New York City, a "committee on classification and nomenclature" was formed, of which the curator of the Department of Birds in the United States National Museum was made a member; and this committee, in pursuance of a call from the chairman, held a meeting in Washington, from April 15 to 23, inclusive, in the office of the bird department, the collections of which were appealed to in all cases where there was a difference of opinion among members of the committee, and many perplexing problems were thus settled to the satisfaction of the committee as a whole. The importance to ornithology of this meeting, together with one held the previous year in the office of the bird department, can scarcely be overstated, the whole subject of zoological nomenclature having been exhaustively reviewed, and a carefully prepared code adopted, in which the satisfactory rules of the existing codes were maintained and their unwieldy provisions rejected. This new code has been the guide of the committee in the preparation of a new list of North American birds, and will, without much doubt, be adopted by zoologists generally. The curator having been charged by the above-mentioned committee with the determination of names of North American birds, according to the new code of nomenclature, this duty has been very carefully performed, and the copy for the new list put in the hands of the president of the union. At this date the list is being printed.

The naturalists of the U. S. Fish Commission steamer *Albatross* having made an extensive collection of birds on the almost unknown island of Cozumel, off the coast of Yucatan, it became the duty of the curator, as a part of his official work, to determine the species and describe those which proved new to science. The latter were no less than nineteen in number, the greater part of which have already been published, while the remainder are described in a full report upon the collection now being printed as a part of Volume VIII of the Proceedings of the National Museum.

The offer of the mounted birds which had for some years been on exhibition in the museum of the Department of Agriculture having been

accepted by the Museum, the transfer of the specimens to the Smithsonian building was effected during the month of May. This collection, numbering 712 specimens, consisted largely of common North American birds, the mounting of which was not up to the standard required for exhibition in the Museum collection. Being, however, suitable for purely educational purposes, this surplus stock is at present being made up into sets for distribution to schools or other public educational establishments which may require such material. The remainder of the collection, consisting of a very good series of the different varieties of the domesticated fowl and a smaller number of specimens of exotic *Phasianida*, has been properly arranged for exhibition in the Museum cases.

Mr. Ridgway reports the accession of 3,681 specimens of birds and 185 specimens of nests and eggs.

(c) *Department of Reptiles and Batrachians.*

Active work in this department has been practically suspended during these six months, owing to the absence of the honorary curator, Dr. H. C. Yarrow, on business connected with the Army Medical Museum.

(d) *Department of Fishes.*

Dr. Tarleton H. Bean, curator of the Department of Fishes, reports 297 entries on the catalogue. The most important collections were made, as usual, by the vessels of the U. S. Fish Commission. The Albatross collections are very large and important. The curator accompanied the Albatross from the 3d of January to the 20th of February, during her cruise off the southern coast and the West Indies, and in the Caribbean Sea, and in the Gulf of Mexico until the time of her arrival at New Orleans, being engaged in making observations upon the living specimens of the deep-sea fishes and upon the southward range of the east coast food-fishes. During the week spent at the island of Cozumel he had opportunity, incidentally, of aiding Mr. Benedict in securing a large series of the birds of that island, while the seining for fishes along the shore yielded 57 species. At New Orleans a short time was spent in attaching descriptive labels to casts of fishes in the exposition.

(e) *Department of Comparative Anatomy.*

This department is under the care of Mr. F. W. True, curator of mammals.

Mr. F. A. Lucas has prepared the osteological specimens for the exhibition and study series, and it is hardly too much to say that a more beautiful and accurately mounted collection is not anywhere to be found.

Early in the year a number of exhibition cases were set up in the east-south range, and in the latter part of February a provisional ar-

rangement of the exhibition series of vertebrate skeletons was effected. A month later the entire collection of bird skeletons was brought from the Smithsonian building and stored in the exhibition hall. An arrangement was made with the authorities of the Army Medical Museum for the exchange of a collection of human skulls for skeletons and skulls of North American vertebrates, and in April the first installment, consisting of about 500 skulls and 350 skeletons of North American vertebrates, was transferred to the U. S. National Museum.* In April an agreement was entered into between the Army Medical Museum and the National Museum to undertake post-mortem examinations of animals in the flesh received by the Institution, and of which the donors desire to know the cause of death. Under this arrangement it was agreed that the viscera of such animals should become the property of the Army Medical Museum, the skeletons, unless otherwise specified, to be returned to the National Museum. A series of casts of bones of *Dinoceras*, presented by Prof. O. C. Marsh, was placed on exhibition. One of the most interesting of the recently exhibited skeletons is that of *Rhytina gigas*, obtained by Dr. L. Stejneger for the Institution in Bering Island. Some progress has been made in the preparation of a series of specimens illustrative of the modifications of the limbs and other portions of the skeletons in the different classes of vertebrates. Experiments in special cases for the exhibition of this and other similar series have proved very successful. But little work has been done in connection with the reserve series, except for the purpose of ascertaining that the specimens are in good order.

(f) *Department of Mollusks.*

This department has been making extraordinary progress under the charge of Mr. William H. Dall, assisted by Dr. R. E. C. Stearns. Mr. Dall reports that the department under his charge has been making steady advance in its administration upon the mass of accumulations of the last ten years, and, except in regard to the New Orleans exhibit, has

* *Summary of specimens received from Army Medical Museum.*

Vertebrates.	Crania.	Skeletons.
Mammals.....	108	23
Birds.....	241	13
Reptiles and Amphibians.....	74	95
Fishes.....	71	220
Total.....	494	351

The curator reports that while this showing is good in quantity, yet the quality is very poor. The larger crania are good, or fairly so; but a large part of the smaller skulls are imperfect and not clean. The skeletons are all small and united by natural ligaments. None were in sufficiently good shape to be placed on exhibition, and owing to the methods of preparation they cannot be now cleaned. They may eventually be used to break up for study specimens, but that is their only value.

little more to offer than a record of such uneventful work which is indispensable for making the collections useful for the paleontologist or the conchologist who may desire to consult it. The most interesting accession was a small lot of Japanese shells contributed by Mr. Uchimura, and containing several great rarities. The preparation of material for the New Orleans Exposition, which absorbed several months' time prior to the beginning of the year, was completed under the direction of Dr. Stearns, so that the boxes containing the specimens and the cases required for their display reached their destination and were ready for arrangement early in January. About the middle of the month Dr. Stearns proceeded to New Orleans and remained there until the installation of this exhibit was complete. The exhibit in this division of natural history probably surpassed in extent and general excellence any previously made at any great Exposition. It was arranged in twenty-one table-cases, equivalent to a floor-space of not less than 400 square feet, the species being placed in trays inside of the cases and labeled. The general system followed was a geographical one, and presented a characteristic representation of the more conspicuous and interesting forms of the various zoological zoo-geographical provinces. The exhibit included several cases of the fresh-water mussels of the Mississippi drainage area, which is remarkable for the great number and beauty of the shells; also the rare and peculiar forms belonging to this group from other parts of the world. The land and pond snails of the Mississippi basin were each represented by a separate case. The marine shells of the Atlantic coast of America, from the Arctic Sea to the Caribbean, and the sea-shells of the Pacific coast from Bering Sea to Panama, were also shown, including the principal species inhabiting the tidal areas of Puget Sound in the north, and the Gulf of California in the south. Other cases contained selected specimens from the Indo-Pacific region, such as live in the warm waters of the great coral areas of the tropical and semi-tropical seas between the shores of Western America and Eastern Asia. Four cases were devoted to the edible mollusks of the United States. Two of these contained clams, cockles, &c., of the Atlantic seaboard, and two cases were devoted to similar forms peculiar to the coast of Western North America from Alaska to San Diego, Cal. The systematic and critical selection of the foregoing involved a great deal of work and the overhauling of a large quantity of material, the accumulation of many years. This labor was, however, incidentally advantageous to the Museum, as a considerable portion of the work consisted in the examination and partial preparation of molluscan material, hereafter to be incorporated in the national collection, and of very great importance for reference in connection with the study of fossil forms of Quaternary or even of the Tertiary ages. Unlike the results to some other departments of the Museum, the additions made to this exhibit at the Exposition were of very small moment, and, indeed, the Museum was the only contributor of an important molluscan exhibit.

(g) Department of Insects.

Prof. C. V. Riley continues to perform the duties of curatorship without assistance, but arrangements have been made for the appointment of a paid assistant curator at the beginning of the next fiscal year. Professor Riley reports a number of important accessions, including a large collection of Coleoptera and Lepidoptera sent from Sikkim by the Rev. C. H. A. Dall, of Calcutta. A varied collection of insects was secured by the U. S. Fish Commission steamer Albatross, from the West Indian region, and an important general collection of alcoholic material was received from Dr. R. W. Shufeldt, stationed at Fort Wingate, New Mexico. The most valuable addition, from a classificatory standpoint, to the collection is the collection of diptera, flies, &c., of Mr. Edward Burgess, treasurer of the Boston Society of Natural History, which was bought by Professor Riley; while the most valuable from a popular and economic view was the exhibit collection prepared for the New Orleans Exposition. This has been returned with little injury, and is only awaiting space for permanent placing in the Museum. It is made up of the following material, arranged in cases made on the same unit plan as those of the Museum:

1. *Insects injurious to agriculture.*—Arranged according to the particular plant and the particular part of the plant affected, and containing, as far as possible, the different states of growth of the insect, its enemies and parasites, a statement of the remedies or preventives available, and a reference to the chief articles where full information can be found upon it. These references are principally to Government and State reports, to which the farmer will most likely have access.

2. *Insecticide substances.*—In the catalogue of this collection the aim has been to add, as briefly as possible, a statement of the method of using such substances, so that whenever in the first section a particular substance is recommended for a particular insect the reader can turn to this second section for further details.

3. *Insecticide machinery and contrivances for destroying insects.*—In the catalogue of this section there is given such information as will add to the instructive value of the exhibit, and a large proportion of the more useful contrivances are such as have been designed and perfected in the work of the Entomological Division, or of the U. S. Entomological Commission during the past four years.

4. *Bee culture.*—This collection is designed to show all the more valuable methods and contrivances now in use among the advanced apiarists.

5. *Silk culture.*—In this collection the aim has been to make the exhibit instructive rather than full in detail. The collection includes, in addition to the foregoing, a number of framed plates, both colored and plain, that have been prepared in the work of the division, and a number of Prof. Riley's enlarged colored diagrams of some of the more im-

portant injurious insects were also used. A catalogue of this exhibit has been published under the direction of the Department of Agriculture, giving a full and detailed statement of its contents.

The routine work of the department has consisted in answering letters, and in acknowledging and determining accessions. A good deal of work has also been done in the proper arrangement and classifying of material, particularly in the Micro-Lepidoptera and in the Lepidoptera generally. In this work Prof. Riley was assisted by Mr. Albert Koebele, who was detailed from the Department of Agriculture for the purpose.

The researches in entomology have been carried on chiefly in connection with the work of the curator for the Department of Agriculture. Some of the results have been published in the bulletins and publications of that Department.

(h) *Department of Marine Invertebrates.*

Mr. Richard Rathbun, curator, reports that the most important addition to this department was made by the U. S. Fish Commission steamer Albatross in April, on her return from a three months' cruise in the Gulf of Mexico, mainly spent in investigating the grouper and red-snapper fishing grounds off our southern coast. The collection turned over to the Museum was much larger and contained many more novelties than that made by the Albatross in the same region and the Caribbean Sea the previous year, and the unassorted materials filled nearly 1,000 packages of all sizes. Of peculiar interest was a series of several hundred specimens of sea-lilies, mostly collected off Havana, Cuba, and representing the various stages of growth of two species of *Pentacrinus* and one of *Rhizocrinus*. Over thirty species of Echini or sea-urchins were also contained in the collection, and other divisions of the Echinodermata, as well as the Cœlenterata, Crustacea, and Mollusca were very fully represented. The bathymetrical range covered by these explorations extended from the shore level to a depth of 1,467 fathoms.

Prof. A. E. Verrill, of New Haven, has transferred to the Museum over 1,000 packages of identified specimens resulting from the explorations of the Fish Commission in former years.

Mr. Henry Hemphill continued his collecting on the Florida coast, begun the previous winter, until March of this year, and has contributed several cases of specimens belonging to many groups.

The other principal accessions have been a fine series of the sea-urchins and star-fishes of the west coast of Mexico, from Mr. A. Forrer; numerous specimens of Pacific corals and echinoderms from Prof. R. E. C. Stearns, and the collection of marine invertebrates made by Lieut. George M. Stoney, U. S. N., in Alaska, in 1884.

Much progress has been made in the determination and cataloguing of specimens.

Prof. Walter Faxon has completed his studies of the collection of

cray-fishes, which is now the second in size and number of species in the United States, being exceeded only by that at the Museum of Comparative Zoology, Cambridge. It contains forty-six North American species. The collection of Echini, which holds the same relative rank, has also been almost completely identified, and other groups are being rapidly worked over.

In June, the west hall of the Smithsonian building, devoted to the exhibition of marine invertebrates, was opened to the public, and although the collections now displayed, fill only the wall cases surrounding the room, they present a very creditable appearance, and all the groups belonging to this department are represented to a greater or less extent. The dried collections not on exhibition have been mostly transferred to the north-west gallery of the main hall, which will also serve as a general work-room for the department.

Soon after the middle of June, the curator and his assistants left for Wood's Holl, Mass., to take part in the summer explorations of the U. S. Fish Commission.

(i) Department of Invertebrate Fossils (Paleozoic).

Mr. Charles D. Walcott, honorary curator of this department, reports that his principal work has consisted in identifying and labeling a collection of Carboniferous fossils which were in the old Smithsonian collection. This work is now well advanced, and will soon be completed as far as identifying the species from the register can be done. In the laboratory the time of the curator has been chiefly devoted to the preparation and study of the Cambrian faunas of North America. This has been done in connection with his work for the Geological Survey.* A large number of types and a great quantity of specimens of described species will be added to the Museum collections as a result of this work. A number of minor accessions have been received from various persons throughout the country. A large addition was made to the collection in the latter part of 1884, a full discussion of which was presented in the report for that year. Another valuable contribution from the Geological Survey will probably be made in the autumn of the present year.

(k) Department of Invertebrate Fossils (Meso-Cenozoic).

Dr. Charles A. White, the honorary curator of this department, states that a number of important accessions have been received during the first six months of this year, and that some of them constitute new additions to the collection. Descriptions of these have been published in the various bulletins of the U. S. Geological Survey. The work of preparing the collections of the Museum has been in progress, and the installation of types has been commenced. Since the beginning of the year considerable space has been assigned to this department in the gallery of the Smithsonian Institution, and the work of preparing ma-

* See Bulletin 10, U. S. Geol. Survey.

terials for exhibition has steadily progressed. The space in the south-east court of the Museum building is occupied by specimens belonging to this department which have been turned over to the Museum, and in this court the collections are prepared for installation.

17. DIVISION OF BOTANY.

Departments of Fossil and Recent Plants.

Prof. Lester F. Ward, curator, reports that the work of his department was exclusively confined to fossil plants until near the close of the year 1884, and no collections of recent plants were received until February last, when rooms were assigned to him for the purpose, and the "Joad Collection" from Kew was placed in his charge. With this Professor Ward joined his own collection, consisting of nearly five thousand species. The two collections combined form a nucleus for a future herbarium of not less than fourteen thousand species, represented by twice that number of herbarium specimens. He submits the following suggestions:

All botanical collections have for many years been turned over to the Department of Agriculture to be cared for by the botanist of that Department. When, in 1881, I was requested to take charge of the fossil plants of the National Museum, and consented to do so, I perceived at once the great inconvenience to the Department of Fossil Plants of this arrangement. The collections of fossil plants were largely undetermined and required to be studied and identified. Most of them were from recent formations, and represented types of vegetation still living, requiring constant comparison with the recent forms to be seen in herbaria. Even the installation and care of those that were named necessitated such comparison, and the difficulties of this nature that were encountered were very great. It was rarely possible to carry the fossils to the Department of Agriculture, and as it was usually necessary to search through large families of plants, the temporary transportation of the botanical specimens was still more impracticable. I therefore early began to urge the establishment of a permanent collection at the Museum of the plants still growing in America and other countries where the catalogues of fossil plants were likely to occur.

While I am highly gratified at the progress in this direction already made as reported above, still it must be evident to you that only a beginning has thus far been made, and that the present collection of living plants is still very inadequate. The Joad collection represents chiefly the flora of Southern Europe, which is widely different from all Tertiary floras, and especially so from the Cretaceous and Tertiary floras of North America. The collections that I have made are exclusively American, and, in so far as they go, are valuable aids to the study of American fossil plants; but they are, of course, too limited in extent to be trusted in critical cases. The parts of the world next after those in North America with which our fossil floras most closely agree are Eastern Asia, the East Indies, Australia, and South Africa, and from all these vast regions scarcely any representatives are to be found in the present herbarium of the National Museum. It is therefore highly desirable as a necessary adjunct to the Department of Fossil Plants, and aside from the still greater desideratum of establishing a truly national herbarium at the Museum, that all reasonable efforts be made to enlarge and enrich the botanical collections.

The routine work of the department of botany has been entrusted to Mr. Frank H. Knowlton, who, in addition to identifying and installing the material, has devoted much time to bibliographical research

and to the development of the sectional library. Very large collections have been made by Mr. A. Schott during the spring and summer months from the parks and gardens of the city. These collections are designed primarily to aid in the preparation of a catalogue of the ornamental plants of Washington, but while serving this purpose they are at the same time valuable accessions to the herbarium and highly useful in connection with the study of fossil plants. In collecting and preserving these specimens, Mr. Schott has shown great industry and skill. In addition to this work Mr. Schott has undertaken the preparation of a check-list of genera from the *Genera Plantarum* of Bentham and Hooker, of which about half the manuscript was completed at the end of June. The time of the curator was almost exclusively spent in the study and determination of fossil plants collected by himself, and over one hundred species, many of which are new, were identified and will be duly incorporated in the Museum collections.

18. DIVISION OF GEOLOGY.

(a) *Department of Minerals.*

This department has been under the charge of Prof. F. W. Clarke, assisted by Mr. William S. Yeates. There have been made during the first half of the year 534 entries, representing 2,137 specimens, all of which are new accessions except 138 specimens, which were found in the old collections without evidence of having been previously catalogued. Eighteen sets of minerals have been sent out as exchanges, comprising about 1,200 specimens, and much valuable material has been obtained in return. This department was represented at New Orleans by collections of the minerals from which are obtained gems and ornamental stones, and also by a collection of cut and polished stones. These collections attracted the general attention of connoisseurs and visitors to the Exposition. The minerals were classified after Dana's system and were arranged in seven flat-top table-cases. The gems were displayed in two cases, the specimens being mounted on white and black velvet pads. This department did not secure a large amount of material from the New Orleans Exposition, most of the mineral collections on exhibition belonging to private individuals, to whom the agents were responsible for the safe return of their specimens. One-half of the south-west court has been assigned to this department as its exhibition space, and the collections have been removed thither.

(b) *Department of Lithology and Physical Geology.*

The curator, Mr. George P. Merrill, was on duty at the New Orleans Exposition at the beginning of the year, but has nevertheless accomplished very satisfactory results in the work of reinstalling the collections upon the extended floor-space recently assigned to this department. The opening of the year found the affairs of this department in

a quiescent though somewhat confused state, owing to the fact that since the preceding July the entire energies of the working force had been devoted to the preparation of the exhibit designed for the New Orleans Exposition, and the regular work of the Museum had consequently fallen behind. The special exhibit was completed late in December and the extra hands discharged. This exhibit consisted of (1) a collection of 358 specimens of building and ornamental stones of the United States in the form of 4-inch cubes; (2) a collection of some twelve specimens of foreign and native marbles in the form of polished slabs; (3) a collection of 150 specimens of rock-forming minerals; (4) a collection called a "structural series," intended to represent all the common forms of rock structure and texture; (5) a collection of 198 specimens of rock illustrating the geology and lithology of the Comstock lode and Washoe district, Nevada; (6) a lithological collection comprising 500 specimens of various rocks, this last, together with numbers 3 and 4, forming a part of the regular educational series of the Museum. As these collections were all fully described in the report of this department for 1884 no further reference to them in this place is necessary. The large quantity of building-stone and other material occupying the space in the south-west court was removed and stored temporarily in a shed outside the eastern entrance of the Museum, the court being less available for exhibition purposes. By a reassignment of exhibition space, this department was made to include the whole of the west-south range, and a portion of the court, as heretofore. The new arrangement is vastly preferable both on account of better light thus obtained, and of convenience in arranging and classifying the exhibit. In May the force of the department was increased by the addition of one aid, one clerk, and three stone-cutters, and the preparation of a collection of building-stones was commenced for the American Museum of Natural History in New York. This collection will, when complete, comprise not less than one thousand specimens, and an equal number of thin sections for microscopical study. This work was still in progress at the end of June. The number of entries in the department catalogue during the six months has been 486, comprising some 700 specimens. Considerable time has been devoted to the preparation of the various exhibition series, particularly those included under lithology, and historical, dynamical, and structural geology. The last three are as yet far from completion, and at the present rate of progress, which is necessarily very limited, must so continue for several years. On this point Mr. Merrill comments as follows:

"I may, perhaps, be pardoned for mentioning here the fact that from past experience I am convinced that the only satisfactory way in which these last named branches of my department can be built up is to allow the curator or some experienced person a certain sum of money to be expended either in the purchase of collections under his direct supervision or of especially desirable material. A very considerable portion of the material now necessary for this purpose is of such a nature—principally on account

of the bulk and weight of the specimens—as to be beyond the scope of the ordinary collector, and in too little demand to be found in many of the natural history stores. I might mention such examples as fault structure, examples of folds, contortion, false bedding, &c., which can scarcely be obtained by other than the means suggested.”

(c) *Department of Metallurgy and Economic Geology.*

At the opening of the year the curator, Mr. F. P. Dewey, was still detained at New Orleans arranging the collection which had been sent from his department to the exposition, and he did not return to Washington till the middle of January. The design of the collections of this department was to show, as far as the time and means at disposal would permit, the prominent occurrences of each metal, the methods of abstracting the metals from their ores, and the utilization of the metals. To these were added a few illustrations of non-metallic ores and their utilization, including a very extensive and valuable illustration of the coal industry. Most of the ore material was selected from the Museum collection, and only a very few new collections were made. These latter were selected upon a systematic plan, representing the mine as a unit. In the plan adopted, specimens were taken to represent sections across and up and down the vein, and to show an average of the product of the vein, while to these were added the walls and other interesting material. In representing the abstraction and utilization of the metals, it was the design to begin with the ore as it leaves the mine, and to follow it through the various steps in all the operations to the production of the finished article, showing, when possible, every material going into each operation and every product of each operation. In the case of coal, the collections were based largely on the ethnological aspects of the question, and thus included many specimens aside from those of an economic or geological value.

Throughout the new collections of the department special attention has been paid to gathering as full and complete a description of everything shown as possible, while the pictorial side of the question has been treated very elaborately, and includes some views of the interior of a coal mine taken by electric light, the first views of the kind ever taken. These collections form a basis for a full and complete representation of the mineral resources of the country, and it is hoped that they will increase until they shall fill their highest educational value. They have been fully described in Museum Circular No. 31. The regular force of the department having been reduced to a scientific assistant and a laborer, the work of preparing the collections in the Museum has been at a comparative standstill during the first half of the year. The laboratory of this department has been moved to the second floor of the south-west pavilion, and the work-room on the floor of the Museum has been cleaned out and space prepared for exhibition purposes, so that now the entire work of preparing material for exhibition has been concentrated into one place. The work of investigating the New

Orleans material has been carried on as far as practicable, and, with the assistance of Mr. Allen, a number of very valuable analyses have been made. A large number of accessions have been received, among which may be specially mentioned an interesting series representing the smelting of copper from the oxidized ores of Arizona, donated by the Copper Queen Company, and a series of apatite from many localities, donated by Pickford and Wingfield, of London, England. In the middle of May the curator returned to New Orleans to pack up the collection and to solicit contributions for increasing the value of the permanent collections. No attempt was made to obtain large, entire collections without regard to their value to the Museum, requests being made for material of only two classes, *i. e.*, those of intrinsic value, and of such as would fill gaps in our permanent collections. This effort was so successful that much very valuable material was obtained and some of the most important gaps were filled; among the former should be especially noticed the important and interesting collection received from Mexico, and among the latter the valuable series of iron ores from the Menominee region in Michigan. After the return of the curator to Washington, in June, the collection donated to the Museum by the American Institute of Mining Engineers commenced to arrive, and claimed his attention during the remainder of the fiscal year.

PART II.

REPORTS OF THE CURATORS AND ACTING CURATORS OF THE
UNITED STATES NATIONAL MUSEUM UPON THE
PROGRESS OF THEIR WORK DURING THE
HALF YEAR ENDING JUNE 30, 1885.

REPORT ON THE SECTION OF MATERIA MEDICA IN THE U. S. NATIONAL MUSEUM, 1885.

By H. G. BEYER, M. D., *Assistant Surgeon, U. S. N., Honorary Curator.*

The accessions to this section between January 1 and June 30 are here given:

Targua.	Black canula.	Myrospermum toluiferum.
Jequirity.	Syzgium jambolanum.	Camacusan nuts.
Cuprea bark.	Hinteah.	Eupatorium aya-pana.
Cupreine sulphate.	Datura stramonium.	Ocimum canum.
Butyrosom tomentosum.	Aconitum heterophyllum.	Levisticum chinensis.
Black quinine bark.	Diospyros embryopteris.	Smilax zeylanica.
Bonssingaultia baselloides.	Withania coagulans.	Bucha spinosa.
Piper betel.	Compleurum cerulatum.	Cinchona Remijia.
Michelia nilgherica.	Quassia wood.	Remijia Purdeana.
Canutilla mexicana.	Odongo.	Pterocarpus edulis.
Gracillaria lichenoides.	Sethia acuminata.	Guain tea.
Aconitum ferox.	Raffia vinifera.	Para rubber seed.
Premna serratifolia.	Vitus agnus costus.	Herpestris monniera.
Justicia adathoba.	Poimiana regia.	Macha root.
Chaulmugra seeds.	Debrudwa wood.	Yarkasura nuts.
Toddalia aculeata.	Palm fiber from Ceylon.	

Character of routine work.—When specimens are received, they are, after being carefully examined, entered upon the register, and, according to their condition, dried, bottled, and labeled, after which they are added to the exhibit, which is arranged as follows: (1) animal products; (2) vegetable products; (3) products of fermentation and distillation; (4) inorganic products; the entire collection being prefaced by an array of all the “medicinal forms” in which medicines occur.

Review of researches and papers published.—In January a translation from the German of Professor Heubner’s “Experimental Diphtheria” made by the curator of this section, was published by George S. Davis & Co., of Detroit, Mich.

In February two specimens of cinchona bark, one from Guatemala and one from Costa Rica, were presented to this section of the Museum for assay. This was performed with the following results:

Habitat.	Total alkaloids.	Ether soluble alkaloids.
	<i>Per cent.</i>	<i>Per cent.</i>
Guatemala.....	8.00	4.00
Costa Rica.....	0.80

In March a package of plants was received from A. R. Fellows, Colorado, for botanical determination. They were found to consist of specimens of *Aplopappus Fremontii*, and the desired information was forwarded to Mr. Fellows.

In May a revised edition of the Catalogue of Materia Medica was received and a number of copies distributed.

A paper on the action of cocaine, atropine, and caffeine by the curator of this section was prepared and printed in the July number of the American Journal of the Medical Sciences. Also a paper on "The influence of variations of temperature upon the rate and work of the heart of the slider terrapin (*Pseudemys rugosa*).

In June the assaying of all the cinchona barks in the collection was begun.

The present state of the collection is shown in the following statement:

Number of specimens on register.....	4,490
Number of specimens exhibited.....	3,222
Number of duplicates.....	300
Number of last entry in 1884.....	53,669
Number of last entry in June, 1885.....	53,716

REPORT ON THE SECTION OF TEXTILE INDUSTRIES IN THE U. S. NATIONAL MUSEUM, 1885.

By ROMYN HITCHCOCK, *Acting Curator.*

Among the more important additions to the collection of textiles during the first six months of the year 1885, may be mentioned the following:

A model of the original Whitney cotton-gin, presented by Eli Whitney.

A fine collection of textile fibres from the vegetable kingdom used in Brazil, presented by Dr. J. Carlos Berrini. This collection was made especially for the Museum by Dr. Berrini, at my request. It embraces more than thirty specimens, well named, and particularly well selected for museum purposes.

A number of specimens of cocoons, and reeled silk from North Carolina cocoons, presented by M. Virion des Lanriers.

A large number of textile fibres from the museum of the Department of Agriculture. This collection includes wools, silks, and vegetable fibres, many of which are valuable specimens, but a large number have not been deemed suitable for exhibition for various reasons, and these have been placed in the study series. The collection of wools in bottles received from the Department is a good one.

A collection of American and foreign wools from Mr. George W. Bond, of Boston. This is an exceedingly valuable collection, the specimens having been carefully selected by Mr. Bond, who is a recognized authority on wools. More than one hundred different wools have been selected for exhibition, and these, in connection with the specimens from the Department of Agriculture, when installed in Museum cases in the manner adopted, will make the largest and most complete collection of wools to be found.

The routine work consists in the identification and cataloguing of specimens for exhibition, and the examination of such material as is sent to the Museum for report concerning its value for manufacturing purposes. After a specimen is catalogued, it is either placed on exhibition immediately, or held in reserve, or put in the study series.

The only scientific studies that have been conducted in this section are such as have been required in the ordinary course of identifying fibres of uncertain character. There has been no opportunity to prose-

cute original investigations. An article on the "Study of Vegetable Fibres" was published by the curator in the *American Microscopical Journal*,* and a "Method of Analysis of Fibres, Tissues, &c.," translated by my assistant, Mr. Rufus W. Deering, from "*Études sur les Fibres*," by M. Vétillart, was published in the same journal.†

In addition to the ordinary routine work, it is intended, as soon as possible, to display with each typical fibre a large photomicrograph, showing the peculiarities of structure as revealed by the microscope. A number of specimens have been prepared and mounted for this special purpose.

The number of specimens in the collection at the end of June, 1885, can only be approximately estimated. Including a large number sent to the New Orleans Exposition, there were probably not less than 1,520 in the exhibition series and 200 in the study series. The number in the reserve series at that time is unknown.

The last number on the textiles catalogue of 1884 is 6857, and the last entry in June, 1885, is 7440, making a total of 583 additions to the collection.

* Vol. VI, p. 23.

† Vol. VI, p. 47.

REPORT ON THE SECTION OF FOODS IN THE U. S. NATIONAL MUSEUM, 1885.

By ROMYN HITCHCOCK, *Assistant Curator.*

The work in the section of foods, drinks, &c., which includes narcotics, the methods of preparing articles of food, and the comparison of the nutritive value of foods, is comprehensive, and the collection can undoubtedly be made one of the most instructive, as well as interesting, in the Museum. Unfortunately, however, so much time has been required by the demands of the textiles collection, especially in preparing for the Exposition at New Orleans, that the work in this section has thus far been almost wholly confined to the routine of cataloguing and preserving the specimens.

During the six months the following valuable additions have been made:

A collection of the elements of the human body, from Prof. W. O. Atwater.

A specimen of Gail Borden's meat biscuit, manufactured in Mexico, from Prof. Spencer F. Baird.

A collection of the compounds of the human body, from Prof. W. O. Atwater. This collection, in connection with the elements already noticed, is intended to represent the composition of the human body. The specimens are on exhibition with temporary labels attached, but the set is not yet complete.

The last number of the register of the year 1884 is 480, the last entry of June, 1885, is 547, making the total number of additions 67.

A statement of the number of specimens in the collection, on exhibition or in reserve, cannot now be made, since an actual count would necessarily include many that will be thrown out, either as duplicates or imperfect specimens, or as having no place in the collection when a systematic arrangement is undertaken.

REPORT ON THE DEPARTMENT OF ETHNOLOGY IN THE U. S. NATIONAL MUSEUM, 1885.

By OTIS T. MASON, *Curator*.

During the first six months of the year 1885 the work accomplished in the Department of Ethnology has been as follows:

The curator, having spent the first year of his official connection with the Museum in getting control of all the material relating to ethnology, commenced, the present year, to arrange the different kinds of objects upon the following basis:

Considering the whole human race in space and time as a single group, and all of the arts and industries of man in the light of genera and species, the arrangement of the material will be such as to show the natural history of the objects. All of the lines of investigation pursued by naturalists in their respective fields may here be followed.

With a view to the elaboration of this idea, three monographs were prepared—two by the curator and one by Mr. John Murdoch—to illustrate the plan here adopted.

These papers were published in the Museum report for 1884.

The collections which were received during these months will be described according to geographical distribution, classes of objects, and the several collectors. Large accessions to the department were made from the New Orleans Exposition, which will be described in the next report.

In the first half year much time was spent in devising the best means of exhibiting such objects as spears, bows and arrows, and material that could not be installed in the ordinary Museum cases.

Facilities for study have been afforded to every student who has made application for the privilege of examining specimens.

In January, Dr. Franz Boas, of Germany, spent a great deal of time in studying the collections of Hall and others from Baffin's Land. His report will be published by the Bureau of Ethnology.

In February, Dr. Simmons, formerly of Japan, compared the carvings of the Northwest Coast Indians with the forms familiar to him in Japanese art. In this month also Dr. Nash spent several days in receiving special instructions with relation to collections intended to be made in Northwest Alaska.

Exchanges have been made with T. L. Flood, of Meadville, Pa., and Prof. E. B. Tylor, for the University of Oxford, England.

In March, Col. James Stevenson turned over a large collection of ethnological material from Zuñi, and spent some time with the curator in describing the specimens and giving requisite information for labels.

The Rev. S. M. Jefferson, on his way to the Congo region, spent a day or two in receiving information to guide him in making a collection of ethnological material.

During the month of April the curator examined the collections at the New Orleans Exposition with reference to securing material for the Museum.

During the month of May several of the Mexican commissioners visited the Museum to study the collections of ethnology.

The curator returned to New Orleans in June to secure the material examined in April.

Mr. W. P. Tisdell brought from the Congo regions a fine collection of ethnological objects, and spent a day or two with the curator in giving required information.

CLASSIFIED LIST OF ACCESSIONS TO THE DEPARTMENT OF ETHNOLOGY.

Point Barrow, Alaska.—Lieut. P. H. Ray: Ivory bird bolas, with sinew strings (1); water-proof seal-skin boots (1 pair); photographs of Eskimo life (100).

Kotzebue Sound, Alaska.—Lieut. G. M. Stoney (Acc. 15688): Model harpoon, complete (1); deer lance, flint point (1); whetstone (1); pigulkas (fish-knives) (2); ivory needle-cases (2); carving of whale in lead ore (1); wooden spoon (1); stone lamp (1); iron pipe-bowl (1); stone anvil (1); carved box-handle (1); bone awl (1); dagger lances, iron point (2).

Saint Michael's Island, Alaska.—Lieut. G. M. Stoney (Acc. 15688): Harpoon points (3).

Eskimo, Kadick and surrounding region.—William J. Fisher (Acc. 15687): Wooden dishes (2); stone lamps (6); stone chisel (1); flint knives (3); stone axes (3); spear-heads (6); stone pestles (2); dolls (3); fish-knives (5); almanacs (2); head-dresses (4); dance wands (2); shaman's rattle (1); masks (5); horn spoon (1); fragments found in digging (16).

Copper River Indians, Alaska.—William J. Fisher (Acc. 15687): Set of beaded hunting implements (5); knife and sheath (2).

Aliuts, Unalashka.—C. L. McKay: Amber beads (2); specimen of jade (1).

Indians of Sitka, Alaska, and vicinity.—J. J. McLean (Acc. 15504 and 15716): Armor of rods, woven together (2); powder-horn (1) gun-charger (1); cartridge-boxes (3); cartridge-belt (1); fish-hooks (12); stone sinker (1); harpoon-heads, iron, copper, bone, steel (12); harpoon barb, iron (1); seal-skin bag; (1) bone traps (3); bows and arrows (10); spear (1); spear-heads of slate (2); wooden mortars (4); stone mortars (18); mortar of whale vertebra (1); stone pestles (22); box of wood-carver's tools (1); awl (1); stone-mauls (3); stone adzes (11); stone hammers (5); celts (2); war knife (1); fish-knives (2); bone knives (2); knives (6); wooden spoons (22); horn spoons (34); horn dishes (11); wooden dishes (2); food-trays (40); fire-sticks (3 sets); wooden hooks (3); carved trunks or boxes (6); grass-bag (1); ivory carvings (24); stone carvings (24); dance wands (16); horn carving (1); carved wooden rattles (5); drum (1); wooden masks (9); dolls, bone heads (7); gambling sticks (7 sets); carved pipes, wood and bone (20); totem posts (2); totem stick (1); matting (1); piece of shaman's ivory necklace (2); carved wooden heads for shaman's head-gear (a set); leather cloak (1); moccasins (1 pair); gloves (2 pairs); labrets, stone, bone, and wood (7); carved bracelets (1 pair); abalone earrings (8); necklace of teeth (2); horn combs (2); snow-shoes (1 pair); ivory slave-killer (1); ivory tusk (1); peccary tusk (1).

- Alaska*.—Dr. John Gibson (Acc. 15640): Stone celt (1); stone adze (1); ivory carving (1).
- Haida Indians, Queen Charlotte Islands*.—J. G. Swan (Acc. 15690): Carved bowl (1); sitzee, ivory slave-killer (1); carved rattles (3); chief's wand (1); carved box (1); masks (5); carved drinking cup (1); animal carvings (3); small basket (1); war lance (1).
- Bilhoola Indians, British Columbia*.—J. G. Swan (Acc. 15690): Model of totem posts (7).
- Maka Indians, Cape Flattery, Neah Bay, Washington Territory*.—James G. Swan (Acc. 15690): Wooden paddles (4); yew bows and cedar arrows (44); small seal-skin buoy (1); fish-hooks, spruce root (24); set of canoe-builder's tools (1); yew wedges (3); cedar-bark mats (13); stone hammer (1); coil whale tow-line (1).
- Puget Sound, Washington Territory*.—M. Eels: Set of gambling disks (10).
- Shasta Indians, California*.—Loren W. Green (Acc. 16057): Bows and arrows (12); pipe (1); harpoon points (2).
- California*.—H. N. Rust: Basket mortar and pestle (2).
- Sioux Indians, Dakota*.—Capt. R. H. Pratt (Acc. 15995): Indian girl's costume, complete (1); shoes made by an Indian boy (3 pairs).
- Dakota*.—B. Andrews: Grass fuel (1).
- Dakota*.—C. Cavilear: Set of harness for Red river cart.
- Sioux Indians, Dakota*.—Mrs. Anderson (Acc. 15738): Beaded cradle (1).
- Chippewa Indians*.—Horatio Hale (Acc. 15625): Model of birch-bark canoe (1).
- Chippewa Indians*.—Dr. John Gibson (Acc. 15640): Fine wicker baskets (4).
- Chippewa Indians*.—R. E. C. Stearns (Acc. 14666): Birch-bark box, embroidered and quilted (1).
- Chitimache Indians, Louisiana*.—A. S. Gatschet: Blue calico coat (1).
- Pai Ute Indians, Southern Utah*.—A. L. Siler (Acc. 15624): Rabbit net and feather rope (2).
- Seminole Indians, Florida*.—A. Collin: Bust of Osceola.
- Frontier collection*.—Dr. Edward Palmer: Broom of twigs.
- Navajo Indians, Arizona*.—Dr. Washington Matthews: Crucible for silver (1); bone medicine whistle (1); medicine sprinklers (2); medicine rattle (1); sidereal map on a gourd (1); toy blanket (1); game of seven dice (1); pack of monte cards (1); game of three sticks (1); wheel game (1); gourd rattle (1); dyed wool (4).
- Zuñi Indians, New Mexico*.—Col. J. S. Stevenson, through the Bureau of Ethnology (Acc. 15874): stone hammers (44); stone axes (22); * drill (1); baskets (4); carrying king of yucca fiber (1); basket bottles (2); armlets (2 pairs); ceremonial bow and arrows (12); head-dresses (6); spear (1); spear-heads (2); war club (1); plume sticks (4); cup (1); breech-clout (1); dance wand (1); bull-roarers (2); lightning-stick (1); drum-sticks (2); notched rattle-sticks (4); flute (1); gourd rattle (1); shinny-stick (1); stone gaming ball (1); sling (1); wooden spoons (5); gourd spoon (1); gourd (1); paint (2); stone adze (1); stone hatchet (1); Chile mortars (8); stone pestles (5); paint-mortars (24); mush-shovels (2); stirring-sticks (3); corn-planters (7); cactus tongs (2); rabbit-sticks (12); shepherd's crooks (8); weaving-frames (4); rope-twisters (3); powder-horns (3); gun-racks (2); weft-sticks (5); weaving-knives (13); weaving-sticks (11); spindles (2); weaving-comb (1); leather box (1); leather pouches (2); notched rattle-stick (1); box (1); wooden hook (1); bone awl (1); child's shoes (2 pairs); wooden dolls (2); polishing-stones (28); minerals used in pottery-making (6).
- Indians of Pima and Yuma stocks, Arizona*.—Dr. E. Palmer (Acc. 15930): Specimens of vegetable food, medicines, and narcotics (33); summer-house (model), (1); winter-house (model), with utensils (10); granary (1); food-frame (1); seed-gourds (3); water-gourds (3); food-trays (2); wooden ladle (1); wooden dishes (4); carrying-net (1); fish-net (1); pottery vessels (46); bows and arrows (21); baskets (17); carrying-ring (1); mat (1); mortars and pestles (4); head-dresses (3); wrist-guards

* The Zuñis use many ancient stone axes as hammers for paint and pottery.

Indians of Pima and Yuma stocks, Arizona—Continued.

(2); basket hat (1); sandals (1 pair); nose-pegs (2); spines of mesquite and charcoal for tattooing (2 sets); mud for the hair (1); hair-brush (1); cotton and willow-fiber; loom, complete, and cotton blanket (12); leather sling (1); planting-stick (1); mush-shovels (3); specimens of paint (8); set of potter's tools (10); shield and war clubs (19); pipe (1); gourd rattle (1); reed flute (1); gambling-sticks and games for men (16); women's gambling-sticks (2 sets).

Mexico.—Suartze & Whitney (Acc. 15875): Carved sacrificial yoke (stone) (1); ornamental vases (2).

T. J. Pickett (Acc. 15149): Stone carvings (8); vase (1).

Mexican Commission, New Orleans Exposition (Acc. 16895): Obsidian labret (1).

S. Mexico.—Trocadéro Museum, Desiré Charnay (Acc. 15758): Pottery (4); musical instruments (2); shield (1); bows and arrows, Lacandone Indians (4); necklaces (2); spindle-whorl (1); incense-burners (2); fragments stucco-work (4).

Louis H. Aymé (Acc. 15686): Hand-brooms (9); hair-brushes (9); wooden spoons (4); mealing-stones (8); molinillos (12); fire-making (4).

Guatemala.—Harry Stuart (Acc. 16798): Iron stirrups (1 pair).

Miles Rock (Acc. 15735): Wooden crosses (1 lot); rain cloaks (3); woven bags (2).

Dr. John Gibson (Acc. 15640): Gourd (1); finger-rings (2); pottery (2); rope and leather harness (2 sets).

Nicaragua.—Dr. John Gibson (Acc. 15640): Carved jicara (1).

Joseph Libbey (Acc. 15622): Carved jicara (1).

Hayti.—L. M. Turner: Wooden tray (1).

Costa Rica.—J. A. McNeil: Gold ornaments (9).

Trocadéro Museum (Acc. 15758): Pottery vessels.

J. Lamson & Brother: Woven bags (24); packages of bones (3).

South America, Ancon, Peru.—Dr. William H. Jones: Mummies (3); trephined skull (1); fragments of silver and gold jewelry (6); pottery (59).

Lima, Peru.—Dr. William H. Jones: Brass mortar (1).

South America.—A. Heidemann (Acc. 16061): Ivory nuts; wing bone of albatross (2).

Ensign A. P. Niblack (Acc. 15760): Outfit for drinking Paraguay tea (4); arrow, glass point (1); Fuegian necklace (1).

Amazon River.—Trocadéro Museum (Acc. 15758): Bow (1).

Brazil.—R. Rathbun (Acc. 15677): Bow and three arrows (4).

Bogota.—Department of Agriculture: Bags (4).

England.—Lieut. P. H. Ray: Core for gun-flint maker.

Madeira Islands.—Ensign A. P. Niblack (Acc. 15760): Guitar (1); cap (1).

L. M. Turner: Tinder box (1); wooden tray (1).

Greece.—Dr. George W. Samson (Acc. 15645 and 15674): Fragments from various buildings (28); Albanian costume, complete (11); silver jewelry (1).

Italy.—Dr. George W. Samson (Acc. 15645 and 15674): Fragments from buildings, &c. (5).

Palestine.—Dr. George W. Samson (Acc. 15645 and 15674): Fragments and mementos (85); Arab sheik's dress, complete (7 pieces); Syrian gentleman's dress, complete (18 pieces).

Egypt.—Dr. George W. Samson (Acc. 15645 and 15674): Antiquities and specimens of modern life (104); coins from various sources (105).

Damascus.—Miss Helen Griggs: Silver ear-rings (2); gold pendants (1); ear-rings (3 pairs); gold chain and pendants (1 set).

Congo Basin, Africa.—W. P. Tisdell (Acc. 16168): Loom, complete (7 pieces); musical instruments (5); shields (3); cinetures (2); food-gourd (1); pipes (3); spears (3); rattle (1); pottery vessels (2); knives (3); bow and arrows (5); necklace (1); ex-

Congo Basin, Africa—Continued.

executioner's sword (1); baskets (4); elephant's tusk (1); chief's sword (1); brass anklets (1 pair).

Morocco.—Trocadéro Museum (Acc. 15758): Saber (1); dish (1).

Algiers.—Miss Helen Griggs: Tabula (1); silver coffee spoon (1).

West Africa.—Trocadéro Museum (Acc. 15758): Gourd vase (1); bows and arrows (16); assagais (5).

Madagascar.—Lieutenant Shufeldt (Acc. 15575): Filanzana or carrying-chair (1); guns (2); axe (1); shields (2); haversack (1); coffee-cup (1); bottles (2); pistol (1); bow (1); mat (1); cotton-cloth pillows (2); dishes (3); knife (1); ladle and tins (2); assagais (6).

India.—Berlin Museum: Cast of foot-print of Buddha.

Calcutta, India.—Rev. C. H. A. Dall (Acc. 15573): Set of mats (12); fans (8); brushes, peacock's feathers (2); native bracelets (22); Buddhist's prayer-wheels (2).

Japan.—Corcoran Art Gallery (Acc. 15754): Japanese bow (1); Japanese measure (1).

China.—A. Heidemann (Acc. 16061): Chinese puzzle (11 pieces).

Polynesia, Philippine Islands.—Trocadéro Museum (Acc. 15758): Shell bracelets (5).

Isle of Fate.—(Acc. 15758:) Bow and arrows (15).

New Caledonia.—(Acc. 15758:) War clubs (1); spears (2).

Coins, medals, badges, &c., miscellaneous sources (134).

REPORT ON THE SECTION OF AMERICAN PREHISTORIC POTTERY IN
THE U. S. NATIONAL MUSEUM, 1885.

By W. H. HOLMES, *Honorary Curator.*

The curator has continued the installation of aboriginal pottery, directing his efforts chiefly to labeling, cataloguing, and classifying the accessions received in the summer and fall of 1884. The very extensive collections of Pueblo material made for the World's Industrial and Cotton Centennial Exposition, in New Orleans, arrived too late to be made fully available for exhibition, but a small representative series of vessels and other objects of clay was forwarded to New Orleans. The collection of ancient pottery recently obtained from Chiriqui, Panama, and partly paid for from the exposition funds, was also represented. The most important accessions have been from the explorations of Mr. L. H. Aymé in Mexico. It is hoped that a portion, at least, of the pottery court will be opened to the public by the end of the present calendar year.

REPORT ON THE DEPARTMENT OF ANTIQUITIES IN THE U. S.
NATIONAL MUSEUM, 1885.

By CHARLES RAU, *Curator*.

REVIEW OF IMPORTANT ACCESSIONS.

The following is a review of the most important accessions, arranged geographically :

MASSACHUSETTS.

E. J. Rockwood, Worcester, sent a stone carving in the shape of a beaver. It is made of a gneissoid rock with small particles of black mica, and was found in East Brookfield, Worcester County. The specimen was lent by Mr. Rockwood, and a cast taken in the National Museum. (Received in 1884.)

CONNECTICUT.

D. N. Couch, Norwalk, Fairfield County, sent a large copper spear-head with broad, straight base, found in the drift of the valley of the Norwalk River. This specimen is of great interest on account of showing not only the lamination produced by beating a piece of native copper, but also, on one side, the ridges and other projections which have wrongly been considered as resulting from the process of smelting. (Acc. 16115.)

NEW YORK.

J. S. Twining, Copenhagen, Lewis County, forwarded for examination a pipe of steatite of a mottled, dark grayish-brown color, which was found within an old earthwork at Dexter, Jefferson County. A figure representing a human skeleton is incised on the back of the pipe. A cast was made in the National Museum.

In the Museum collection are two pipes of similar form, found respectively in Montgomery and Oswego Counties, New York, which bear on their backs corresponding tracings of skeletons. (Acc. 16001.)

PENNSYLVANIA.

Dr. H. D. Moore, New Lexington, Somerset County, contributed 2 fragments of worked brown sandstone, forming an incomplete pipe, which terminates in a bear's head. It was found near New Lexington.

ton by a farmer, while engaged in clearing a piece of woodland. (Acc. 16106.)

H. R. Kervey, West Chester, Chester County, presented 16 arrow and spear-heads, 2 grooved axes, and 3 fragments of potstone vessels, from Chester County. (Acc. 16152.)

WEST VIRGINIA.

E. H. Vaughan, Roanoke, Lewis County, sent a clay pipe, a stem of a clay pipe, and 3 fragments of pottery, all from a mound in Montgomery County. (Acc. 16096.)

C. P. Dorr, Webster Court-House, Webster County, transmitted to the Museum a polished celt and one-half of a perforated discoidal stone, found near Buffalo Fork, Little Kanawha River, Webster County. (Acc. 16178.)

NORTH CAROLINA.

From J. M. Spainhour, Lenoir, Caldwell County, were received cutting-tools, arrow and spear-heads, perforators, grooved axes, a club-head-shaped stone, a stone pick (?), a discoidal stone, a perforated sinker (?), a perforated pendant made of a pebble of banded slate, a small cup of potstone, a stone slab with mortar-cavity, and a potstone mortar. (Acc. 15733.)

W. C. Jirdenstone sent 2 celts and a boat-shaped object, from Ashe County. (Acc. 15880.)

G. A. Jacobs, Highlands, Macon County, contributed a very large pipe of serpentine, with a representation of a wolf's head at one end. It was found by a plough-boy in a field 3 miles west of Webster, Jackson County.

This very fine specimen is only externally finished, forming a solid piece of stone, as there is no cavity in the bowl and no perforation in the stem. (Received in 1884.)

GEORGIA.

To H. M. Ellington, Ellijay, Gilmer County, the Museum is indebted for a large shuttle-shaped flint implement, notched at one end. It was found in Gilmer County. There is no similar specimen in the collection. (Acc. 15973.)

FLORIDA.

Joseph Willcox, Media, Delaware County, Pennsylvania, sent a collection of flakes and rude implements of palæolithic type, from the surface of a mound in Hernando County, and 2 celt-like shell implements from Cedar Keys. (Acc. 15857.)

W. H. Dall, U. S. National Museum, added to the collection 8 flint flakes and a piece of worked bone, from a railroad-cut near Gaines-

ville, Alachua County. (Acc. 15939.) Also a collection from a mound at Old Enterprise, consisting of 136 shells of different species (all determined), fragments of bone, fish-scales, and a piece of shell-marl. (Acc. 16094.)

ALABAMA.

Dr. E. B. Johnson, Eufaula, Barbour County, sent a polished celt, from Eufaula. This is a very fine specimen, $13\frac{1}{2}$ inches long. There is no North American celt of equal length in the collection. (Acc. 15631.)

Dr. J. W. R. Williams, Opelika, Lee County, sent one-half of a small pierced ceremonial weapon, found near Opelika. (Acc. 16169.)

Frank Burns, U. S. Geological Survey, presented a collection of flint flakes, arrow and spear-heads, a discoidal stone, and water-worn pebbles, from Barbour County, and a pestle, from Blount County. (Acc. 16138.)

OHIO.

From Warren K. Moorehead, Granville, Licking County, was received a perforated tablet of peculiar shape, made of a compact black slate, and found near Fort Ancient, Warren County. It was sent as a loan, with two other specimens, to the National Museum, where a cast was taken. (Acc. 15612.)

J. P. MacLean, Hamilton, Butler County, lent a tablet bearing incised figures somewhat analogous to those on the well-known "Cincinnati tablet." It consists of compact Waverly sandstone of a bluish-gray color in the fracture. The polished surfaces are of a light-brown color, apparently produced by the material used in polishing. The specimen was found in a mound near Waverly, Pike County, and Mr. MacLean sent it to the National Museum for the purpose of taking a cast. (Acc. 15935.)

INDIANA.

J. H. Stotsenburg, New Albany, Floyd County, gave the Museum a bone fish-hook and a bone perforator, from an Indian grave at Clarks-ville, Clark County. (Acc. 15890.)

Dr. J. C. Neal, Archer, Alachua County, Florida, presented a stone carving representing a bird's head, from Wabash County, and 3 stone pipes, a ceremonial weapon, and a trowel-shaped object of stone, from the neighborhood of Marion, Grant County. (Acc. 15940.)

George Spangler, Madison, Jefferson County, lent 2 very fine ceremonial objects. One, prismatic, with a longitudinal perforation, was found on Cooper's Bar, in the Ohio River, 3 miles below Madison, and the other, in the shape of a double hatchet, was ploughed up on a farm near Big Creek, Jefferson County, about 12 miles northwest of Madison. (Acc. 15714.)

J. R. Nissley, Mansfield, Richland County, Ohio, contributed a large grooved stone implement of unknown use (sinker?), found $1\frac{1}{2}$ miles east

of Santa Fé, Miami County, and a ceremonial or ornamental object made of cannel-coal, narrow in the middle and terminating at both ends in semi-lunar-shaped expansions. The narrow part is perforated with two holes. Length 9 inches.

According to Mr. Nissley, "the specimen was discovered last summer (1884) by men who were prospecting for gravel suitable for a road on the farm of F. A. Crisler, Greene Township, Jay County. Mr. Crisler and others informed me that a plain cylinder-shaped pipe (?), made of hard stone of a light color, occurred with the tablet. Both specimens were found from 4 to 5 feet below the surface, during the first day's digging, which also exposed sixteen human skeletons. I could learn of no other relics having been discovered, excepting a clay vessel, said to be about the size of a gallon measure, and taken out in fragments." There is in the National Museum a cast of a somewhat similar object of cannel-coal, found under the surface in Ross Township, Butler County, Ohio. The cast was sent by Mr. J. P. MacLean, and the original is figured on page 167 of his "Mound Builders" (Cincinnati, 1879).

The specimen acquired from Mr. Nissley is, on account of its size, regular form, peculiar material, and perfect state of preservation, a most valuable addition to the archaeological collection of the National Museum. (Acc. 16030.)

W. M. Linney, Harrodsburg, Mercer County, Kentucky, loaned a large flat-sided grooved axe, found in Indiana. A cast was taken at the National Museum. (Acc. 16013.)

ILLINOIS.

From Bert Stewart, Decatur, Macon County, were received a spear-head from Logan County, 2 celts from De Witt County, and a grooved axe from Macon County. (Acc. 16137.)

KENTUCKY.

J. B. Vickers, Lyonina, Hancock County, sent a leaf-shaped implement, a trimmed flake, a scraper, arrow and spear-heads, a pestle, 2 celts, and 3 grooved axes from fields and rock-shelters near Panther Creek, Hancock County. (Acc. 15638.)

To W. M. Linney, Harrodsburg, Mercer County, we are indebted for the loan of a flint cutter, the original from Central Kentucky. A cast was taken in the National Museum. (Acc. 16013.)

A. E. Douglass, New York City, sent a large pipe of greenish steatitic material not unlike serpentine. It presents the form of a tube surmounted by the figure of a duck. The original was found in a mound at Ashland, Boyd County, Kentucky. A cast was made in the National Museum.* (Acc. 16068.)

* This very fine specimen is described and figured in Dr. Hamy's *Revue d'Ethnographie*, Vol. III, p. 60, &c.

TENNESSEE.

W. M. Linney, Harrodsburg, Mercer County, Kentucky, sent a discoidal stone of unusual size (nearly $7\frac{1}{2}$ inches in diameter) from Eastern Tennessee. A cast was taken in the National Museum. (Acc. 16013.)

COLORADO.

Horace Beach, Prairie du Chien, Wisconsin, sent a cast of a sculptured foot-track. The original was cut out from the rock *in situ* near Colorado Springs. (Acc. 15633.)

NEW MEXICO.

J. M. Shields, Jemez, Bernalillo County, sent a clay pipe of unusual form, from a ruined pueblo at Jemez Springs. (Acc. 16146.)

ARIZONA.

Mr. E. Palmer's collection, from ruins on the Rio Verde, Maricopa County, included leaf-shaped implements, arrow-heads, grooved axes (single and double-edged), grooved mauls, hammer-stones, small and large metates, paint-mortars, paint-mullers, pebbles used in forming the bottom and sides of clay vessels, polishing-stones, stone digging-tools, stone balls used in games, a stone ring, shell pendants and gorgets, bone perforators, a wooden club, clay vessels (plain and painted), and fragments of pottery; 198 specimens. (Acc. 15930.)

According to Mr. Palmer, "the ruins are situated about 60 miles north of Phoenix, in a locality known as the Lower Verde Settlement. They are located on the west bank of the river on a mesa 125 feet high, and contain 175 contiguous rooms, on an average 30 feet long, 14 feet wide, and originally about 10 feet high. The floors are of clay, and the walls built of irregular pieces of stone laid up with mud. The roofs were made of cedar joists covered with mud, and the entrance to the rooms was from the top. Two rooms only were connected by a doorway. The cedar joists had been cut with stone tools. The fragile articles on the floors were in fragments, owing to the destruction of the roofs and walls by fire, and there was an accumulation of ashes and clay, with impressions of grass, poles, and sticks. Below the floors were found human skeletons, with pottery and other articles. The bodies seem to have been interred without regard to the points of the compass, and in some graves the clay vessels, &c., were placed near the head and sides. The people formerly inhabiting this building obtained their supply of water from the Rio Verde, as shown by still existing ditches, in some places 5 feet deep. The Pimas have a tradition that they drove the people from this country into New Mexico."

Collection from stone ruins near the Pima Agency: A stone mortar, a small stone carving in the shape of a bird, digging-tools, grooved

axes, arrow-shaft-straighteners, an incised stone, and a turquoise pendant; 18 specimens.

"These ruins," says Mr. Palmer, "consist of small houses, of one or more rooms, and do not form a village, but are scattered. The walls are built in the same manner as the Rio Verde building. Remains of cisterns are still to be seen."

Collection from adobe ruins, $2\frac{1}{2}$ miles from Mesa City: Chipped quartzite discs, cutting-tools, grooved mauls, rubbing-stones, a paint-mortar, stone balls used in games, large stone mortars, and fragments of shell ornaments; 20 specimens.

Collection from adobe ruins near Phoenix: A clay spindle-whorl, a paddle-shaped wooden implement used in making pottery, and fragments of shell ornaments; 17 specimens.

Mr. Palmer says: "At a distance the ruins appear like ordinary Indian mounds, and vary from 5 to 20 feet in height. Correctly speaking, the walls are not of adobe, but are made of adobe earth or mud, which is pressed into large wooden boxes, and when it is sufficiently dry the box is raised up, moved along, and again filled.* The inner surfaces of the walls are made smooth and sometimes covered with a whitewash. The whole country has a dry and barren appearance, and is covered with plants seen nowhere else but on deserts; embracing the numerous species of cactus, the mesquite, *Larrea mexicana*, and plants of that character. The number of dwellings in ruins warrants the conclusion that an extensive population inhabited this country in past times."

E. W. Nelson, Springerville, Apache County, forwarded a collection from caves in the vicinity of Springerville, consisting of arrow and spear-heads, a flint hammer-stone, a round pebble, a rubbing-stone, "tanning-stones," a grooved stone (arrow-shaft-straightener?), a conical stone object with longitudinal perforation, and a turquoise pendant. (Acc. 16085.)

Miss Hattie Carlton, Pima, Graham County, sent 26 small arrow-heads of obsidian, jasper, &c., 26 shell beads and pendants, and a small ornament of turquoise. (Received in 1884.)

ALASKA.

From C. L. McKay, Unalashka Island, were received a grooved hammer-stone and an adze. (Received in 1882.)

MEXICO.

Louis H. Aymé, Oaxaca, Mexico, forwarded a collection from Oaxaca, including 8 stone carvings representing human figures, a squared stone with grooves, a metate with rubbing-stone, 8 stone pendants, a stone head, a bone implement (perforator?), a polished piece of iron

* A similar account is given by Mr. J. R. Bartlett in his "Personal Narrative," (Vol. II, p. 277.)

pyrites of hemispherical shape (mirror), a specimen of magnetite, 7 copper bells, a copper chisel, 69 T-shaped axes (so called), and a specimen of adobe. (Acc. 15686.)

COSTA RICA.

J. C. Zeledon, San José, presented 5 stone celts, 2 pierced club-heads (?), a metate (ornamented), 2 baking-plates, 2 stone carvings representing human figures, a stone carving (head of human figure), a small stone ornament, a natural formation (concretion), and a spool-shaped object of clay. (Received in 1884.)

PERU.

From Dr. W. H. Jones, U. S. S. Wachusett, was received a carved wooden image (human figure) from Chimbote. (Acc. 15755.)

GUADELOUPE ISLAND, W. I.

M. Louis Guesde, Pointe-à-Pitre, sent 4 celts and 17 notched axes (mostly broken). (Acc. 15848.)

ISLAND OF HAYTI.

From the Trocadéro Museum, Paris (through Dr. Hamy), was received a cast of a stone celt and handle in one piece. (Acc. 15758.)

CHARACTER OF ROUTINE WORK.

The arrangement and classification of the collections, and the preparation of the exhibition and study series, have received very careful and constant attention. As in former years, I have followed a dualistic system in arranging the antiquities received in this department, by adding them either to the general classified collection, or by making special collections whenever the number of specimens from one locality warranted such a proceeding.

Much time was spent in assorting and preparing for exhibition a number of collections (mostly obtained in the course of mound explorations) which were received from the Bureau of Ethnology.

Quite a number of objects of archæological interest were loaned to this department for examination, and many of them, as stated, reproduced in plaster of-Paris.

Duplicates were sent in exchange to W. Champlin Robinson, Baltimore, Maryland, (28 specimens), Rev. Luigi Sartori, Baltimore, Maryland, (2 specimens), and M. Louis Guesde, Point-à-Pitre, Guadeloupe, W. I. (141 specimens).

The following is a list of special collections which have been placed on exhibition :

From private individuals.—North Carolina (Caldwell County), J. M.

Spainhour; Florida (Hernando County), Joseph Willcox; Florida (Alachua County), W. H. Dall; Arizona (Maricopa and Pinal Counties), E. Palmer; Costa Rica, J. C. Zeledon; Guadeloupe Island, W. I., L. Guesde; Peru, W. F. Lee; Peru, G. H. Hurlbut; Japan, P. L. Jouy.

From the Bureau of Ethnology.—West Virginia (Preston and Kanawha Counties); North Carolina (Caldwell and Montgomery Counties); South Carolina (Chester County); Georgia (Bartow and Early Counties); Alabama (Elmore, Talladega, and Lauderdale Counties); Texas (Red River and Bowie Counties); Ohio (Warren County); Illinois (Union and Jackson Counties); Kentucky (Nicholas, Mason, and Lewis Counties); Tennessee (Hardin, McMinn, Sevier, Cocke, Polk, Bledsoe, and Jefferson Counties); Wisconsin (Vernon and Crawford Counties); Dakota (Burleigh County).

The collection of stone implements from Guadeloupe sent by M. Louis Guesde, of Pointe-à-Pitre, and mentioned in this report, was placed in the hands of Prof. Otis T. Mason, and used by him in the preparation of a monograph on the antiquities of Guadeloupe, which will appear in the Smithsonian report for 1884.

The department has been visited by a great many persons interested in archæology, who made inquiries and took notes, for the purpose of self-information, and in some cases, perhaps, for literary utilization. I have myself been much engaged in making investigations preparatory to the composition of a large work on the stone antiquities of North America.

Present state of the collection.

REPORT ON THE DEPARTMENT OF MAMMALS IN THE U. S. NATIONAL MUSEUM, 1885.

By FREDERICK W. TRUE, *Curator*.

REVIEW OF IMPORTANT ACCESSIONS.

In importance the specimens received during this period compare favorably with those acquired during the previous year. None are new to science, but many represent species not previously in the collection. The proprietors of the great menageries of the country, and the various scientific bureaus of the Government have made important contributions as hitherto. The number of private contributors reached twenty-nine.

TERRESTRIAL MAMMALS.

United States.—One of the most interesting specimens of North American mammals was a fairly good skin of the black-footed ferret (*P. nigripes*), received from Mr. G. H. Ragsdale, of Gainesville, Tex. A skin of *Perognathus fasciatus* was obtained from the same collector. The only other North American specimens of special interest were included in a collection made by Mr. E. W. Nelson, in Arizona. (Acc. 15602.) Mention of a portion of these specimens has been made in a previous report (see Museum Report, 1884, p. 130). Among the skins received this half-year were two excellent examples of Abert's squirrel and two of the Arizona squirrel (*S. Aberti* and *S. arizonensis*). The collection also contained a badger and good specimens of the coyote, wolf, antelope, mule deer, &c.

Central America and the West Indies.—From Mr. José C. Zeledon the Museum received a skin of a black jaguar (*Felis onca*). (Acc. 15574.) Among the spoils of the expedition of the U. S. Fish Commission steamer Albatross to the island of Cozumel, Yucatan, were two peccary skins, two of the coatimundi (*Nasua narica*), and an opossum (*Didelphys aurita*). (Acc. 15718.)

*Accessions of osteological material are referred to in the report on the Department of Comparative Anatomy.

Other parts of the world.—During this period, as in the years immediately preceding, the most important accessions of exotic mammals were received from the proprietors of menageries and dealers in live animals. While the exact localities from which the specimens of this series were originally derived are seldom ascertained, they are not the less valuable for purposes of exhibition.

The specimens received from these sources are as follows:

From Messrs. Barnum, Bailey & Hutchinson, an albino fallow deer (*Cervus dama*). (Acc. 16053.)

From Mr. H. B. Everett, a *Semnopithecus albocinereus*. (Acc. 15678.)

From Mr. Adam Forepaugh, a tiger *one day old*. (Acc. 16010.)

From the Central Park Menagerie (through Mr. W. A. Conklin), a European badger (*Meles taxus*) (Acc. 15834); a water chevrotain (*Hymoschus aquaticus*); an axis deer (*Cervus axis*) (Acc. 15916); a dorcas gazelle (*Gazella dorcas*) (Acc. 15944); a young fallow deer (Acc. 16170).

From Mr. W. T. Hornaday, an antelope (*Damalis pygarga*); a baboon (*Cynocephalus anubis*). (Acc. 15948.)

From the Philadelphia Zoological Garden (through Mr. A. E. Brown), a Coypu rat (*Myopotamus coypu*) (Acc. 16040); two kangaroos (*Macropus giganteus*) (Acc. 15708).

From Mr. Dobbin, a water-buck (*Kobus ellipsiprimus*). (Acc. 16054.)

Mr. C. G. H. Lloyd presented a series of skins of Tasmanian mammals, which, unfortunately, however, arrived in the department in very bad order.* (Acc. 15886.)

AQUATIC MAMMALS.

Seals.—Only a small number of seals were added to the collection. Chief among these are the Californian sea-lion and sea-elephants collected by Mr. Charles H. Townsend on the coast of California. (Acc. 15885.) A young otary (*O. jubata*), from the coast of Peru, was received from Dr. William H. Jones, U. S. N.

Cetaceans.—The most important cetacean received during this period was a spotted dolphin from Pensacola, Fla., believed to be identical with Gray's *Prodelphinus doris*, which was obtained for the Institution by Silas Stearns, Esq., of Messrs. Warren & Co., fish dealers, of Pensacola. An account of this valuable specimen will be found in the report for 1884.† A second specimen of the pygmy sperm-whale (*Kogia breviceps*), a male, was received through Mr. I. I. Hobbs, keeper of Kitty Hawk life-saving station, North Carolina. (Acc. 15560.) The skull of one of four Atlantic right whales (*B. cisarctica*), captured off Southampton, Long Island, was secured for the collection. Other interesting specimens are a common porpoise (*P. communis*), from East Orleans station (M. M. Pierce, keeper), (Acc. 15737); a striped porpoise (*P. lineata*), from Ips-

* For list of specimens see Accession List, Part V.

† Pages 317-324.

wich Bay station (S. J. Martin, keeper), (Acc. 15751), and a young black-fish (*Globiocephalus melas*), from Provincetown station (Peaked Hill Bar, I. G. Fisher, keeper). The U. S. Fish Commission secured two specimens of the common dolphin (*Delphinus delphis*), one from Wood's Holl, Mass., and one from Cape Hatteras, North Carolina. (Acc. 16,143.)

ROUTINE WORK.

A statement of the size and character of the exhibit sent to New Orleans will be found in a previous report.* Work upon this series was not finished before January 1, 1885, and specimens were withdrawn from rather than added to the permanent exhibition series. To render the collection still attractive to the visiting public in spite of its deficiencies, a partial rearrangement was made early in the year.

Meanwhile the work of mounting new specimens was vigorously pushed forward by the chief taxidermist and his assistants. Before May thirty-three new specimens were added to the series, including a Siberian sheep, a baboon, and several other large forms.

Finding that printed labels could not be got ready for a considerable time the curator wrote labels for such portions of the collection as were unprovided with the former. Copy for the printer was prepared at the same time. On account of the withdrawals from and changes in the collection it was found necessary to prepare a new list of the whole for reference.

Further experiments were made looking to the manufacture of new cases, better adapted than those at present in use, for the display of the collection. The problem of how best to display large mounted specimens, to which allusion has been made in previous reports, was again attacked. The erection of a very large case in the center of the hall was first considered. The curator finally came to the conclusion, however, that such a case would prove unsatisfactory on account of reflected light. The proposition to build railings around the low terraces already in use was next considered. The objection to this plan lies in the fact that a great deal of floor-space is wasted.

It is evident to every museum officer, however, that specimens must be protected from the rude handling or mutilation of unthinking or unscrupulous visitors. If they cannot be placed under glass or surrounded by railings, only one other mode of arrangement remains to be considered, namely, the erection of high terraces, which take the specimens out of the reach of visitors. A terrace of this character was made for the mounted mammals exhibited at New Orleans, and seems to have been generally regarded effective both from an æsthetic and a practical point of view. It is proposed to erect a similar terrace, with modifications, at the south end of the hall. Particular groups, such as that of the fur-seals, and certain very valuable specimens, such as the musk-oxen, may be placed in specially designed cases.

* Museum Report, 1884, pp. 133-135.

No case suitable for large seals has yet been planned. The difficulties here are fully as great as with the ruminants. Being wide and low, the specimens cannot be placed on high shelves. If arranged in low, broad cases, having a single shelf at the center of height, the parallax is such that the central and further portions of the floor of the case are hidden by the shelf. Low cases without shelves hold but little in proportion to the floor-space they occupy. In the British Museum, high cases with one or two shelves are employed, but the effect is not all that could be desired.

WORK IN THE GENERAL COLLECTION.

At the beginning of the year the office and laboratory of the department were removed from the south balcony to the first floor of the southwest pavilion. The large skins, the alcoholics, and a certain part of the smaller skins were brought together in the laboratory. A case was also planned to contain the remainder of small skins. Before the end of the year the whole of the duplicate and reserve series will be brought together in this room. The advantages of this change are very great.

Little work was done upon the reserve series beyond that of poisoning newly acquired skins and selecting series of specimens desired by different parties for study, dissection, &c., or to serve as exchanges. Reference to these exchanges will be found on page 84.

The standing rule that the entry of freshly acquired specimens must take precedence over other work was strictly observed, and the records are now fully up to date.

Considerable work was done in connection with the osteological series, a statement of which will be found in the report on the Department of Comparative Anatomy.

No additions to the office force have been made. The curator and one assistant (Dr. W. G. Stimpson) have carried on the entire work of the department, at the same time registering and caring for the collections in comparative anatomy and to a certain extent those of vertebrate paleontology as well.

INVESTIGATIONS IN PROGRESS.

The subject of porpoise fishing has recently attracted considerable attention in this country. The curator responded to numerous letters of inquiry and also read a paper before the American Fisheries Society relative to the fishery at Cape Hatteras (reported in *Forest and Stream*, June 18, 1885).

In June he was requested by the Director to report on the distinguishing characters of the scalps of the wolf and the different species of foxes, it having been discovered that in a certain county in Illinois unscrupulous hunters were attempting to secure bounty on fox scalps by representing them to be those of wolves.

Mr. A. H. West, keeper of the United States life-saving station of Sea Bright, N. J., reported the appearance off that coast of a remarkable cetacean, of which he made a sketch. The drawing represents an animal like a sperm-whale, but with a sharp fin on the back and a spout-hole on the top of the head. As the specimen was not secured it is impossible to say whether the animal was other than a sperm-whale.

The curator has continued to collect material for a monograph on the American cetacea. He also wrote in May, for Part III of the Museum report for 1884, a description of the spotted dolphin (*Prodelphinus*) obtained from Pensacola, Fla.; described at length the new Florida muskrat; and, conjointly with Mr. F. A. Lucas, prepared an essay upon the osteology of the West Indian seal.

He has corresponded with Dr. G. E. Dobson, of Netley, England, relative to certain types or species of Soricidæ in the Museum collection; with Dr. C. H. Merriam relative to *Putorius nigripes*; with Mr. Oldfield Thomas, of the British Museum, relative to the type of *Mus peruvianus*, Peale (which cannot at present be found); with Dr. Chr. Fr. Lütken, of Copenhagen, relative to the pygmy sperm-whale; with Dr. G. E. Manigault, of Charleston, S. C., relative to the transfer to the Museum of the type of *Hyperoodon semijunctus* of Cope; with Dr. R. W. Shufeldt, U. S. A., at Fort Wingate, N. Mex., relative to a supposed new species of *Hesperomys*.

Material for study was, with the permission of the Director, sent to Dr. Merriam, Dr. Dobson, and Dr. Shufeldt.

PRESENT CONDITION OF THE COLLECTIONS.

The mounted specimens sent to New Orleans not having returned, the exhibition series remains as on January 1, except that 44 freshly mounted specimens have been added.

RESERVE AND DUPLICATE SERIES.

The totals on January 1, 1885, were as follows:

Skins and alcoholics	4,870
Skeletons and skulls	4,087

The number of specimens added between January 1, 1885, and July 1, 1885, is as follows:

Skins and alcoholics	256
Skeletons and skulls	345

Including the exhibition series, the number of specimens now in the collection is as follows:

Skins and alcoholics	6,034
Skeletons and skulls	4,432

ENTRY NUMBERS.

The first entry in the register for skins, on January 1, 1885, is 14715; the last, on June 30, 1885, is 15075.

In the osteological catalogue the first, on January 1, 1885, is 21623; the last, on June 30, 1885, is 21972.

DISTRIBUTION AND EXCHANGES.

The distribution of specimens during this period was as follows:

To Museum of Comparative Zoology, Cambridge, Mass., 8 sperm-whale bones.

To the British Museum of Natural History, London, England, 1 skin of *Putorius nigripes*, and 1 *Hesperomys leucogaster* in alcohol.

To Dr. Georg Baur, Peabody Museum, New Haven, Conn., 1 foetal *Erethizon* in alcohol.

The following exchanges were effected:

(1) With Mr. H. A. Ward, of Rochester, N. Y. (in part), for a group of oranges (received), 17 skins of North American mammals).

(2) With the K. Landwirthschaftliche Hochschule, Berlin, Germany (Prof. Dr. Alf. Nehring), for domestic dog skulls, (to be received), 5 skulls of Indian dogs.

The following material was loaned for study:

To Dr. R. W. Shufeldt, Fort Wingate, N. Mex., 5 skins and 2 skulls of *Hesperomys leucopus*.

To Dr. C. Hart Merriam, New York, N. Y., 4 skulls and 1 skin of *Putorius nigripes*.

REPORT ON THE DEPARTMENT OF BIRDS IN THE U. S. NATIONAL MUSEUM, 1885.

By ROBERT RIDGWAY, *Curator.*

REVIEW OF IMPORTANT ACCESSIONS.

The number of specimens added to the bird collection of the Museum during the six months ending June 30 is, of birds (stuffed or in alcohol), 3,681, and of nests and eggs, 185, the number for each separate month being as follows:

Months.	(a) Specimens of birds (stuffed or in alcohol).	(b) Entries of öcological spec- imens (nests and eggs).
January	984	2
February	840	0
March	409	3
April	501	6
May	728	130
June	219	44
Total	3,681	185

Among the most important accessions are the following: A collection of 80 specimens, 35 rare species, from Charles K. Worthen, Warsaw, Ill. A collection of 215 specimens, 96 species, chiefly from Costa Rica, sent by José C. Zeledon, including two new species, *Cyanocorax cucullatus* and *Vireolanius viridicoronatus*. A large collection of 236 specimens, 96 species, from Henry Seeböhm, London; this collection is very valuable, embracing several conspicuous species new to the collection, besides others of great importance for purposes of comparison. A noteworthy collection contributed by the U. S. Fish Commission, from Key West, Fla., and Cozumel Island, Yucatan; this latter was of particular interest, as revealing 19 new species or subspecies previously unknown to science. A very valuable collection of 68 specimens, 40 species, of gulls and terns, from Howard Saunders, London. An adult male specimen of Brewster's warbler (*Helminthophila leucobronchialis*), obtained near Washington, by Wm. Palmer. A varied and valuable collection of 75 specimens, 22 species, from the vicinity of Fort Custer, contributed by Capt. Charles E. Bendire, U. S. A., and including 12 sage-grouse (*Centrocercus uroph-*

sianus). A nest and four eggs of the black-chinned sparrow (*Spizella atrigularis*), from J. E. Blaisdell, San Diego, Cal., the first known to have been taken; this is a most valuable acquisition.

SPECIMENS DISTRIBUTED.

The number of specimens distributed during the six months ending June 30 is 421, representing 323 species, as follows:

Months.	(a) Exchanged.		(b) Lent for examination.	
	Specimens.	Species.	Specimens.	Species.
January	174	132	2	2
February	8	8	0	0
March	174	137	9	4
April	5	4	45	32
May	0	0	4	4
June	0	0	0	0
Total	361	281	60	42

LIST OF DISTRIBUTIONS.

(a) Exchanges.

Henshaw, H. W., U. S. Geological Survey: 61 specimens, 37 species, from various localities.

Fox, Dr. W. H., Washington, D. C.: 110 specimens, 93 species, from various localities.

Webster, F. S., Washington, D. C.: 2 specimens, 1 species.

Worthen, Charles K., Warsaw, Ill.: 7 specimens, 7 species.

Coale, H. K., Chicago, Ill.: 1 specimen.

Hargitt, Dr. Edward, London, England: 66 specimens, 30 species, of American woodpeckers.

Hartlaub, Dr. G., Bremen, Germany: 1 specimen of Pacific eider (*Somateria v-nigra*).

Berlepsch, Count von, Muenden, Germany: 6 specimens, 5 species, from Cozumel Island, Yucatan.

Lawrence, George N., New York City: 8 specimens, 7 species, from Cozumel Island.

McIlwraith, Thomas, Hamilton, Ontario: 18 specimens, same number of species, from various localities. (Three specimens returned April 9, 1885.)

Townsend, Charles H., Smithsonian Institution: 75 specimens, same number of species, being duplicates of his collection in Northern California.

Maynard, C. J., & Co., Boston, Mass.: 3 sets of eggs (3 species) from Arctic America.

Parker, H. G., Chester, Pa.: 2 sets of eggs (2 species), from Massachusetts and Montana.

(b) *Lent for examination.*

Shufeldt, Dr. R. W., U. S. A., Fort Wingate, N. Mex.: 2 alcoholic birds (*Alcidæ*).

Lawrence, George N., New York City: 3 specimens of *Ceryle torquata*.

Brewster, William, Cambridge, Mass.: 3 specimens of *Colinus graysoni*, and 2 of *C. coyolcos*.

Sclater, Dr. P. L., London, England: 1 skin of an undetermined ant thrush (*Thamnophilus*) from Bahia.

Cory, Charles B., Boston, Mass.: 44 specimens, 31 species, chiefly from the West Indies.

Cory, Charles B.: 1 specimen of Guilding's parrot (*Chrysotis guildingi*) from Saint Vincent, West Indies.

Goss, N. S., Topeka, Kans.: 4 specimens, same number of species.

(NOTE.—Without a single exception, all the specimens loaned for examination, as above, were duly returned in good order to the Museum.)

(c) *Gift.*

Coues, Dr. E., Smithsonian Institution: 1 set of eggs of mourning dove (*Zenaidura macroura*).

PACKAGES SENT OUT.

The total number of packages sent out from the office of the curator of the Department of Birds during the six months ending June 30, 1885, was 69, as follows:

	January.	February.	March.	April.	May.	June.	Total.
Express.....	10	3	8	5	10	4	40
Mail.....	3	5	10	5	1	1	25

BIRDS MOUNTED FOR EXHIBITION SERIES.

The number of birds mounted by Mr. Marshall for the exhibition series is as follows:

	Specimens.
In January	55
In February	24
In March	15
In April	56
In May	37
In June	48
Total.....	235

Nearly all of these were mounted from dried skins.

SPECIAL WORK ACCOMPLISHED.

New Orleans Exposition.—In compliance with instructions, the curator of the Department of Birds and his assistants prepared for exhibition at the New Orleans World's Cotton Exposition a collection of North American game birds, numbering 163 finely mounted specimens, and representing nearly all the species. It was at first intended to make the exhibit much more comprehensive, and in fact a collection of much broader scope had been nearly completed, when it became necessary, on account of the limited space available at the exposition, to make the great reduction which ensued. This collection was installed by the assistant curator, Dr. Leonhard Stejneger, who for the purpose left Washington January 3 and returned on the 16th of the month. Dr. Stejneger reports that "in regard to completeness, perfection of mounting and preservation, scientific exactness and popular instructiveness," this collection "was superior to any other ornithological exhibit at the exposition."

The collection filled two double Museum cases fitted with two rows of terraced shelves, the exhibition surface amounting to a little more than 600 square feet. Each specimen was mounted upon a stand of polished black walnut, and provided with a printed label on which were printed, in large, clear type, both the scientific and popular names.

Meeting of the Committee on Classification and Nomenclature of the American Ornithologists' Union.—The organization known as "The American Ornithologists' Union" was formed at the urgent request of the various ornithological interests of the country, for the special purpose of harmonizing existing differences in the nomenclature of North American birds, and thus removing the most serious obstacle to the study of ornithology. At the meeting of organization, in New York City, in September, 1883, a "Committee on Classification and Nomenclature" was appointed, the curator of this department being honored by his selection as a member. This committee, in pursuance of a call from the chairman, held a meeting in Washington, during the period extend-

ing from April 15 to 23, inclusive, in the office of the Department of Birds of the U. S. National Museum, as being the most appropriate and convenient place, where the books and specimens belonging to the department could be directly appealed to in all cases where there should be difference of opinion among the members of the committee, as must necessarily sometimes be the case. This meeting, together with one held the previous year, also in the curator's office, resulted in the adoption of a very carefully prepared and thoroughly revised code of zoological nomenclature, in which all satisfactory rules of existing codes were incorporated, and many new rules, which were decided in the judgment of the committee to be necessary, added. This new code has been the guide of the committee in their preparation of a new list of North American birds, in regard to which a further account may here be not out of place.

New list of North American birds.—The curator and assistant curator of the Department of Birds having been intrusted by the above-mentioned committee with the task of determining the correct names of all the known species of North American birds according to the new code of nomenclature, this duty has been very carefully performed, and the copy for the new list delivered to the president of the Union. This new list is passing rapidly through the press, and will be completed by the end of December.

Collection of birds from Cozumel.—The naturalists of the U. S. Fish Commission steamer Albatross having made an extensive collection of birds on the almost unknown island of Cozumel, off the coast of Yucatan, it became the duty of the curator of the Department of Birds, as a part of his official work, to determine the species and describe such as proved new to science. The latter, no less than 19 in number, have been described in full in Volume VIII of the "Proceedings" of the Museum, in which is also given a catalogue of all the species known to inhabit the island.

Transfer of the collection of birds from the Department of Agriculture.—The offer of the collection of mounted birds, which had for some years been on exhibition in the museum of the Department of Agriculture, having been accepted by the National Museum, the transfer of the collection to the Smithsonian building was effected during the month of May. This collection, numbering 712 specimens, consisted largely of common North American birds, the mounting of which is not up to the standard required for exhibition in the national collection. Such specimens, being, however, suitable for purely educational purposes, have been made up into sets for distribution to schools or other public institutions which may require the use of such material. The remainder of the collection, consisting of a very fairly mounted and rather extensive series of the different varieties of domesticated fowl, and smaller number of specimens of various *Phasianidæ*, has been properly arranged in the exhibition cases.

Emptying of cases in the northwest gallery.—The north-west gallery of the lower main hall of the Smithsonian building having been required for the laboratory of the Department of Marine Invertebrates, the specimens of mounted birds contained in the cases therein were removed to other cases on the floor of the hall.

General rearrangement of the exhibition series.—A number of cases having been remodeled according to plans and specifications furnished by the curator, and others added to the hall, the arrangement of the mounted specimens was improved to as great an extent as is possible with fixed terraced shelves, and prosecuted as rapidly as the work of repairing and painting the cases was completed. The rearrangement is yet incomplete, however, owing to the circumstance that some of the cases are not ready for the accommodation of the specimens.

Assistance rendered to special investigators and students.—A very considerable proportion of the work required of the curator consists of assistance rendered to special investigators and students of ornithology, who, in the absence of books for reference or named specimens for comparison at their command, refer to him for determination very many questions of identification. Such matters often require special investigation on the part of the curator, but all such questions referred to him have been cheerfully answered to the best of his ability, and as promptly as proper attention to current routine work of the department would allow.

PROVISION FOR THE PURCHASE OF IMPORTANT DESIDERATA.

The Department of Birds stands greatly in need of specimens of certain species of birds which are urgently required for purposes of comparison, and which can be obtained only by purchase, and there are frequent opportunities for the purchase of very desirable specimens at prices which would make their acquisition by this means far preferable to their acquirement by exchange, even were the latter possible. The curator has no suggestion to make concerning this matter further than to say that if a certain annual sum could be placed at his disposal, under the usual rules governing the purchase of supplies and material—or if he could know the *maximum* amount which could for each current year be expended on account of such purchases—he would be enabled to use his discrimination to much greater advantage.

SERVICES OF ASSISTANTS.

The curator desires to acknowledge the valuable services performed by the assistants who have been appointed or assigned to his department: Dr. Leonhard Stejneger, assistant curator; Mr. C. W. Beckham, and Mr. Hugh M. Smith, who have each performed their respective duties with their usual efficiency and faithfulness. Miss Harriet S. Perkins, in charge of the Oölogical section during the absence of

Captain Bendire, honorary curator of that section, has also served her trust with faithfulness and ability.

The invoicing of specimens in the reserve, or study series (skins only), by Mr. C. W. Beckham, has been completed through the "first series" (or type series), and through the *Turdidæ*, *Sylviidæ*, *Troglodytidæ* (including the *Miminæ*), *Certhiidæ*, *Sittidæ*, *Paridæ*, *Chamæidæ*, *Motacillidæ*, and part of the *Mniotiltidæ*, of the second series, the total number of specimens invoiced being 2,655.

This work, which has included the writing and tying on each specimen of a new standard Museum label, with all the data, and the name according to the most modern nomenclature, and a special red label on every type specimen, has been done by Mr. Beckham during intervals between his regular routine work, such as cataloguing collections received, &c., and represents a very large amount of labor.

REPORT ON THE DEPARTMENT OF REPTILES AND BATRACHIANS IN THE U. S. NATIONAL MUSEUM, 1885.

By H. C. YARROW, *Honorary Curator.*

IMPORTANT ADDITIONS DURING THE HALF YEAR.

A collection from Cozumel, collected by the naturalist of the U. S. Fish Commission steamer Albatross, containing seventeen specimens. These were sent to Prof. E. D. Cope, by direction of Professor Baird. A collection from the northwest coast of Mexico, from Alphonso Forrer, containing twenty-four specimens. A collection from Mr. G. H. Ragsdale, of Texas, containing fifteen specimens. Dr. George W. Nelson sent a good collection from Panama, which was forwarded for study to Prof. E. D. Cope. Mr. Charles R. Orcutt contributed an excellent collection from San Diego, California.

Some very fine turtles, of almost unknown species, were sent by Mr. G. Kohn, from Mobile Bay, Alabama. A collection was also received from Mr. C. C. Nutting, Pilot Town, Florida. Specimens were also received from the following: William Palmer, Arlington, Virginia; H. W. Turner, Nevada; Fletcher M. Noe, Minnesota; Herbert B. Creel, Ripley Landing, West Virginia; Harry Simpson, Analostan Island, District of Columbia; O. P. Hay, Indiana; H. G. Dodge, Clark County, Illinois; F. W. Heyward, South Carolina; Charles H. Townsend, coast of Lower California; C. G. H. Lloyd, Tasmania; L. M. Turner, Fort Chimo; G. P. Merrill, U. S. National Museum; Albert Koebeler, Surinam; Lieut. George M. Stoney, U. S. N., Alaska; Newton Simmons, El Paso, Texas; Forest Ball, California.

CHARACTER OF ROUTINE WORK.

The routine work of the Department of Reptiles has been described in previous reports. Careful attention is given to entering all specimens received, and to the proper selection of those needed for the two great sets, known as the "reserve" and "general" series.

REVIEW AND RESEARCHES.

A considerable amount of material has been forwarded to Prof. E. D. Cope for study and investigation, and will be treated of in his forthcoming work on South American reptiles. No papers have been published by the curator or his assistant on material belonging to the department.

The tabulated statement here presented shows the extent of the collections at the present time:

Number of specimens received from January 1 to June 30, 1885	134
Number of specimens in reserve series.....	8,926
In general series.....	8,819
Exhibition series (selected for),.....	750
Not classified and exotic specimens, probably.....	5,000
<hr/>	
Total	23,629
Number of entries in Museum catalogue from January 1 to June 30, 1885....	82
Last number in catalogue for 1884.....	14,066
Last catalogue number in June, 1885.....	14,148

RECOMMENDATIONS.

The curator respectfully reiterates his recommendations of previous years with regard to the great necessity for more space for the collection, and adds that it appears particularly desirous that the reptile specimens, which are mostly alcoholic, should be preserved in a separate fire-proof building.

REPORT ON THE DEPARTMENT OF FISHES IN THE U. S. NATIONAL MUSEUM, 1885.

By TARLETON H. BEAN, *Curator*.

PRESENT STATE OF THE COLLECTION.

The number of specimens added to this Department during the interval covered by this report is about 1,000. The present census of the collection is as follows:

	Specimens.
In reserve series.....	36,400
On exhibition.....	20,400
Duplicates.....	12,200
Total.....	69,000

IMPORTANT ACCESSIONS.

The most noteworthy additions to the collection of fishes during the six months ending June 30, 1885, are from the following sources:

- (1) SPECIES OF INTEREST TO FISH-CULTURISTS, OBTAINED THROUGH THE U. S. FISH COMMISSION.

A whitefish (*Coregonus albula*, L.) has been introduced into the United States recently. Specimens in alcohol were received from Max von dem Borne, May 28, 1885 (catalogue numbers 37201, 37202). This is a small species of the "lake herring" (*C. artedi*) type, and is native to the north of continental Europe. Von dem Borne's are from Lakes Telder and Baland, in Prussia. *Coregonus albula* is distinguished from *C. artedi* by its smaller number of gill-rakers (39) and longer dorsal and anal rays. The scale formula is about the same in both. The head of *C. albula* is comparatively shorter than in *C. artedi*. The two species will certainly be confounded if taken in the same waters, but the characters above mentioned will aid in their separation.

Mr. Frank N. Clark, of the U. S. Fish Commission, sent some specimens of the common whitefish (*Coregonus clupeiformis*), which he reared from eggs in the U. S. Hatchery at Northville, Mich. (catalogue numbers 37180, 37181). There are three individuals one year old, and two aged two years; all of these were fed in ponds and are in thrifty condition. The feasibility of pond-rearing for the whitefish is a decided

advantage to the successful introduction of the species. Recent experiments by the U. S. Fish Commission indicate that all of the important Salmonoids and certain of the Clupeoids may be brought forward in inclosures to such a size as will insure the subsequent attaining to maturity of a very large percentage of individuals.

From Mr. J. C. Courts, of Huntingdon, Tenn., were received a scale carp (37211) and a mirror carp (37212), together with two very dangerous little enemies of the eggs and young carp (*Lepomis cyanellus* and *Gambusia patruelis*). The carp were introduced by the U. S. Fish Commission.

Mr. R. J. Donaldson sent from Georgetown, S. C., two mirror carp (37050), a result of introduction similar to the preceding.

Mr. William E. Stuart, of Washington, D. C., forwarded to the Museum a Maine salmon (*Salmo salar*), weighing 9½ pounds, which was caught at Indian Head, Potomac River, June 16, 1885. This is supposed to have resulted from U. S. Fish Commission efforts. The skin has been mounted for the fish-culture series.

Mr. J. C. Wigglesworth, of Wilmington, Del., forwarded an ovary and a spermary obtained from a shad (*Clupea sapidissima*). (Acc. 15945; catalogue number, 37191.) Mr. Ryder examined these organs and pronounced them to be a genuine instance of hermaphroditism.

(2) COLLECTIONS MADE UNDER GOVERNMENT AUSPICES.

(A) *By early exploring expeditions.*—The fishes of the Wilkes Exploring Expedition, which were sent to Prof. Louis Agassiz for study, were returned to the National Museum, with the manuscripts and illustrations based upon them.

(B) *By the steamer Albatross, of the U. S. Fish Commission.*—The Albatross was engaged from January to April in making deep-sea collections in the Gulf of Mexico and the Caribbean Sea and in shore work in Florida and on the island of Cozumel, Yucatan. At Key West particular attention was given to seining around the outlying mangrove keys, and large numbers of fishes were taken. These have not yet been studied, but they include many species of *Labridæ*, *Balistidæ*, *Gerridæ*, *Pristipomatidæ*, *Serranidæ*, and other West Indian families. In the Tampa Bay region, also, large collections were made from the shore. At Pensacola the shores were not much investigated, but the trawl was very active on the Red Snapper banks. In the Gulf of Mexico, between the delta of the Mississippi and Cedar Keys, rich returns were obtained from the trawling, and some very important additions to the deep-sea fauna will be announced as a result of that work. In the deep waters of the Caribbean Sea a great deal was accomplished for the collection. Around the west side of Cozumel Island the seine was hauled as frequently as the rough nature of the bottom permitted, and we secured 57 species of fishes, several of which are apparently new to science. These are a species of *Scarus* and two species of *Xyrichthys*. Our inves-

tigation of Cozumel was made late in January, and we found the following summer visitors to the eastern coast of the States present at the time: *Tetrodon spengleri*, *Ostracion trigonum*, *Monacanthus hispidus*, *Balistes vetula*, *Pomacanthus aureus*, *Teuthis hepatus*, *Trachurops crumenophthalmus*, *Trachynotus goreënsis*, *Hypeneus maculatus*, *Ocyurus chrysurus*, *Lutjanus griseus*, *Sphyræna picuda*, *Tylosurus caribbæus*, *Albula vulpes*, *Stolephorus mitchillii*, *Carcharias cæruleus*. None of the important economic species of the New England fisheries were observed so far south. The barracuda (*Sphyræna*) was the favorite food-fish among the Cozumel people. There was no native fishing of any kind during our stay. This is an admirable field for tide-pool collecting, but shore seining is extremely difficult because of the abundance of *Porites* and the submerged débris of hurricane action.

(C) *By collectors in the interest of the U. S. National Museum and the U. S. Fish Commission.*—Dr. William H. Jones, U. S. N., attached to the U. S. S. Wachusett, has continued his valuable contributions to the Museum. Accession 15474 is a large invoice of Peruvian fishes forwarded from Galapagos and Chatham Islands.

Prof. D. S. Jordan, president of Indiana University, forwarded the types of the following species of Florida fishes: *Narcine umbrosa*, *Anthias vivanus*, *Prionotus stearnsii*, *Prionotus ophryas* (Acc. 15585); also a specimen of *Acanthocybium solandri* taken at Key West.

Dr. Augustus C. Kinney, U. S. A., sent a fine collection of Oregon fishes (Acc. 15926), which contains, among other species, *Clupea sapidissima*, *Trichodon stelleri*, *Brama raii*, and *Icosteus enigmaticus*.

Dr. B. H. Warren, at Deland, Fla., obtained a collection of fresh-water fishes (Acc. 16000), including *Lepomis mystacalis* and *elongatus*, which are new to the Museum.

(D) *By the U. S. Signal Bureau.*—Mr. Lucien M. Turner, who established stations in various parts of Labrador for the collection of meteorological data, had opportunity also for securing natural-history material of great value, and particularly rich in marine and fresh-water fishes (Acc. 15576; catalogue number 36968). This invoice, together with several other lots mentioned in preceding reports, completes one of the largest collections of northern fishes in the possession of the Museum. The *Salmonidæ* are represented by an abundance of fine specimens of sea salmon, sea trout, lake trout, brook trout, whitefish, smelt, and capelin.

(E) *By the U. S. Life-Saving Service.*—Capt. A. H. Myers, keeper of Quoddy Head life-saving station, Lubec, Me., forwarded a sleeper-shark (*Somniosus microcephalus*), measuring 11 feet in length (Acc. 15811; catalogue number 37038). From the stomach of this shark its captors took a peck of herring and six yards of gill-net.

(F) *By occasional contributors and exchanges.*—From Mr. Robert S. Day, of New Orleans, was obtained, by request of the Director, a new species of *Tyntlastes*, which was found in the Gulf of Mexico (Acc. 16205). The genus is new to North America.

Mr. Alphonse Forrer sent 23 species of fishes of Northwestern Mexico, collected at Rio Presidio, Mazatlan, and Tres Marias Islands, representing the following genera: *Balistes*, *Culius*, *Eleotris*, *Gobius*, *Clinus*, *Salarias*, *Pseudojulis*, *Heros*, *Gerres*, *Corvina*, *Holocentrum*, *Mulloides*, *Pristipoma*, *Hamulon*, *Lutjanus*, *Centropomus*, *Sphyræna*, *Mugil*, *Mustelus*, &c.

Dr. T. B. Legaré, of Camden, S. C., obtained the first specimen known in that State of *Labidesthes sicculus*, Cope (Acc. 16093; catalogue number 37200). This species, now known to occur in Florida and South Carolina, was supposed to inhabit the Mississippi basin only.

Dr. J. A. Watson obtained at Asheville, N. C., a specimen of *Hadrop-terus aurantiacus*, Cope (Acc. 15967; catalogue number 37175). This has been noticed in Proceedings U. S. National Museum, 1885, pp. 165, 166, as the first occurrence of the species east of the Alleghanies.

ROUTINE WORK.

During the first six months of 1885, 297 entries were made in the catalogue of fishes, the first entry in January being 36935, and the last one in June, 37231. The duties of cataloguing and labeling specimens and changing alcohol, &c., have been continued as usual with the assistance of Messrs. B. A. Bean and Peter Parker.

EXPLORATIONS.

The number of outfits furnished for collectors was very small.

Mr. C. C. Leslie, of Charleston, S. C., was furnished with an 8-gallon tank of alcohol for collecting Charleston fishes, and Mr. Benjamin Miller, of Georgetown, D. C., received a Baird seine and a tank of alcohol for collecting fishes of the District of Columbia.

The most important collections were made, as usual, by the vessels of the U. S. Fish Commission. The Albatross collections, which are referred to in the list of accessions, are very large and important. The curator was aboard this steamer from the 3d of January to the 20th of February, during her work off the southern coast and in the West Indies, Caribbean Sea, and the Gulf of Mexico, up to the time of her arrival at New Orleans. He was sent out to make observations upon the living specimens of deep-sea fishes and upon the southward range of the east coast food-fishes.

During the week spent at the island of Cozumel he had opportunity, incidentally, of aiding Mr. Benedict in securing a large series of the birds of that island, while the seining for fishes along shore yielded 57 species.

At New Orleans a short time was spent in attaching descriptive labels to casts of fishes in the exposition.

ILLUSTRATIONS OF FISHES.

Mr. H. L. Todd made 48 drawings and Miss Smith during the same period completed 20 drawings, after which she was obliged to give up the work on account of ill-health.

REPORT ON THE DEPARTMENT OF COMPARATIVE ANATOMY IN THE U. S. NATIONAL MUSEUM, 1885.

By FREDERICK W. TRUE, *Curator*.

The establishment of a Department of Comparative Anatomy, or rather of comparative osteology, was in reality effected many years ago, and long before the present Museum building was erected. A large series of skulls of mammals, a considerable number of mounted skeletons of representatives of all the classes of vertebrates, together with certain vertebrate fossils, were displayed in cases in the balcony of the main hall of the Smithsonian building. Much additional material was placed in storage.

From the beginning separate registers were kept for the osteological material, and in reorganizing the department, therefore, there has been no need to transcribe or change the numbers on the specimens.

In 1882 Dr. R. W. Shufeldt, U. S. A., volunteered to work upon the bird skeletons, and did much to put that part of the collection in order.

In 1883 the entire collection of skulls and unmounted skeletons of mammals was removed from the Smithsonian building to one of the courts in the Museum, where it was overhauled and classified and finally placed in table-cases in the east south range. This was an immense task and occupied nearly three-fourths of the year.

In 1884 the first steps were taken towards the installation of an exhibition series. A large case was built on the north side of the range and a raised base for the south side planned. A number of the larger whale skeletons were suspended from the roof.

Thus far the collection represented only mammalian osteology, but at the beginning of the present year the plans for the establishment of a Department of Comparative Anatomy, considered during 1883 and 1884, were adopted, and all the accessible anatomical material was brought together. The department was therefore in reality established, or rather reorganized, at the beginning of the present year, although in the reports of 1883 and 1884 a curator of comparative anatomy and an assistant are already mentioned among the officers of the Museum.

THE PLAN OF ORGANIZATION.

Like other departments of the Museum, this has a threefold function to perform. It must keep, as far as possible, a perpetual record of past researches; it must furnish material for future investigations; it must instruct and interest the public.

To meet all these ends perfectly with the present material and facilities is obviously impossible. Under existing circumstances only a few limited lines of work can be followed out. The material at command consists of skulls and skeletons of vertebrates, entire specimens of vertebrates and invertebrates in alcohol, a few embryos, a few tanks of viscera, also in alcohol.

Injections and dissections of soft parts, embryological and anatomical casts there are none, nor are there the means of obtaining them. It is evident, therefore, that for the present the department must practically be one of comparative osteology, rather than of comparative anatomy.

The reserve and duplicate series will not be differently administered from those of other departments. The exhibition collection will be divided into several distinct series:

First, a series representing the varieties of structure of bone.

Second, a series representing the comparative morphology of the skull, limbs, and other parts of the skeleton.

Third, a series of mounted skeletons representing the orders of vertebrates.

Fourth, a series of mounted skeletons representing by families, genera, or perhaps even species, the vertebrate fauna of North America.

To these it is proposed to add:

Fifth, a series representing the races of domestic animals.

To the building up of these series and to the care of the reserve collection the time of the curator and assistants has been devoted during the past half year.

Early in the year exhibition cases were placed in the range, and nuclei for all the above-mentioned series have been formed.

On June 30, the following number of specimens were on exhibition:

Class.	Skeletons.	Skulls.
Mammals	127	50
Birds	10	1
Reptiles	16
Total	153	51

The morphological and histiological series included 43 pieces.

This comparatively small number of specimens did not, of course, occupy but a few of the exhibition cases in the hall. On the other hand the storage cases were full of material belonging to the reserve series, or belonging to the exhibition series, but not ready to be displayed.

The number of movable cases in the hall on the 30th of June was as follows:

Unit table storage cases	19
Half unit table storage cases	8
Total storage cases	27
Unit table-top exhibition cases	18
Half unit table-top exhibition cases	8
Experimental anatomical case	1
Door-screen case	1
Alcove case	1
Total exhibition cases	29

The curator has been aided by Mr. F. A. Lucas, who has rendered highly praiseworthy and efficient service in the double capacity of assistant and preparator. The registers and card catalogues are kept in the Department of Mammals, and are managed by the clerk of that department.

The chief osteological preparator, Mr. Lucas, and his assistant have worked continuously upon the enlargement of the exhibition series. The work done in their laboratory is of the highest order, and is deserving of special commendation.

REVIEW OF ACCESSIONS.

Early in the year a large series of mounted skulls and skeletons of North American vertebrates was received from the Army Medical Museum. The skulls included many interesting specimens in good order, but the skeletons, especially of the fishes, were almost without exception in very bad condition and worthless for exhibition purposes.

The principal accessions of interest were mammals and birds. Only one fish skeleton, aside from those already mentioned, was received, namely, a *Polypterus*.

Mammals.—A large number of human skulls collected near Ancon, Peru, by Dr. W. H. Jones, U. S. N., and near Oaxaca, Mexico, by Louis H. Aymé, were received in the early part of the year. Mr. Charles Ruby sent the skeleton of a wapiti. Among the collections made by Mr. L. M. Turner in the Hudson's Bay territory were numerous reindeer skulls with antlers. The skull of a California gray whale (*Rhachianectes*) from Kamtschatka was secured by Mr. Charles H. Townsend, and that of an Atlantic right whale (*Balena cisarctica*) from Southampton, N. Y., by the U. S. Fish Commission (through Nelson Burnett, esq., keeper U. S. life-saving station). Mr. F. A. Lucas presented a fine skeleton of a capybara (*H. capybara*), collected by Mr. William T. Hornaday, on the Orinoco River. A fresh specimen of Hoffman's sloth (*Cholopus Hoffmani*), from which a skeleton was prepared, was presented by the Philadelphia Zoological Society (through Mr. A. E. Brown).

Birds.—A fine ostrich skeleton was received from the Central Park Menagerie (through Mr. W. A. Conklin). Two cockatoos (*C. roseica*-

pilles and *C. galerita*) were presented by the Dime Museum of Washington. Among the specimens obtained by Dr. L. Stejneger in Bering Island were sterna, portions of the skeleton, of specimens of the thick-billed guillemot (*Uria arra*); the tufted puffin (*Lunda cirrhata*); the horned grebe (*Podiceps auritus*), and other interesting marine species.

PRESENT CONDITION OF THE COLLECTION.

It is impossible at this time to give statistics of the osteological collection. Some data regarding the mammals will be found in the report of the Department of Mammals. A large number of birds, reptiles, and fishes are still in storage, and the majority of those turned over to the department have not been checked up in the register.

RECOMMENDATIONS.

A clerk is very much needed in this department. The assistant is obliged to devote the larger part of his time to the preparation of specimens, while the clerk of the Department of Mammals, upon whom the management of the registers, &c., has devolved, has more than enough to do in connection with the department to which he is properly attached.

REPORT ON THE DEPARTMENT OF MOLLUSKS IN THE U. S. NATIONAL MUSEUM, 1885.

By WILLIAM HEALEY DALL, *Honorary Curator.*

The force of the Department of Mollusks, besides the curator, consists of Dr. R. E. C. Stearns, U. S. Geological Survey, adjunct curator, Mr. J. B. Crowe, and Miss Agnes Nicholson, clerical assistants, whose fidelity to the work has enabled the department to make satisfactory progress during the half year.

ADDITIONS TO THE COLLECTION.

The mass of the additions to the collection is detailed in the list of accessions forming Part IV of this report, both as regards character and number of specimens.

The accessions of exceptional interest or importance are not numerous, but perhaps make up for their small number in other ways.

We have been indebted to Dr. Isaac Lea for a valuable and interesting series of land shells, especially some of particular beauty from the Philippine Islands. Dr. Lea has also presented some American and exotic fresh-water shells which will form a welcome addition to the collection.

Mr. Uchimura, of Japan, presented a small lot of Japanese shells containing several great rarities from that region. This is the most valuable collection of its size which the Museum has received for a long time.

The concluding portions of the Jeffreys collection have been received from the executor of the estate of the late Dr. Gwyn Jeffreys. The extraordinary value of this collection has been before referred to. In British shells and especially historical type specimens it stands unrivaled. With the exception of the British Museum series, no other collection approaches it in its deep-sea material, much of which is and will always remain practically unique. For North Atlantic, North European, and Arctic shells generally, it is conceded to be the finest single collection extant. Joined with the Arctic material already collected by American explorers, it will form a representation of the Polar Mollusk fauna, which can have no superior, and for many years probably no equal.

The collections of Mr. Henry Hemphill in Florida have been continued

during the year, and comprise the most satisfactory series ever received by the curator from any collector in the field. They include many novelties, and are a most important contribution toward a better knowledge of the fauna of the Floridian region, which they show to be more and more closely connected with the Antillean fauna.

Interesting Arctic shells have been received from Mr. Lucien M. Turner and Ensign H. J. Dresel; Prof. A. G. Wetherby and Mr. R. Ellsworth Call have contributed some acceptable material to the land and fresh-water series.

NEW ORLEANS EXHIBIT.

The preparation of material for the New Orleans Exposition, which absorbed several months' time prior to January 1, was completed under the supervision of Dr. R. E. C. Stearns, adjunct curator, so that the boxes containing the same and the cases required for exhibiting the specimens reached their destination and were ready for arrangement early in January. About the middle of the month Dr. Stearns proceeded to New Orleans, and remained there until the specimens were put in their places and ready for exhibition. The exhibit in this department of natural history probably surpassed in extent and general excellence any previously made at the great expositions. It was arranged in twenty-one flat table cases, equivalent to a floor area of not less than 400 square feet, the specimens being placed in trays inside of the cases and each of the trays fully labeled.

The general system followed was a geographical one and presented a characteristic representation of the more conspicuous and interesting forms of the various zoo-geographical provinces.

The exhibit included several cases of the fresh-water mussels (*Unionidae*) of the Mississippi drainage area, remarkable for the great number and beauty of these shells, also the rare and peculiar forms belonging to this group from other parts of the world. The land and pond snails of the Mississippi basin were each represented by a separate case.

The marine shells of the Atlantic coast of America from the Arctic Sea to the Caribbean, and the sea shells of the Pacific coast from Bering Sea to Panama, including the principal species inhabiting the tidal areas of Puget Sound, in the north, and the Gulf of California, to the south, were similarly displayed.

Other cases contained selected specimens from the Indo-Pacific region such as live in the great coral areas of the warm seas between Western America and Eastern Asia.

Four cases were devoted to the edible mollusca of the United States. Two of these contained the clams, cockles, &c., of the Atlantic seaboard, and two those of the shores of Western America from Alaska to San Diego.

The systematic and critical selection of the foregoing involved a great

deal of work and the overhauling of a large quantity of material, the accumulation of many years.

This labor was incidentally advantageous to the Museum, as a considerable part of the work consisted in administration upon material hereafter to be incorporated in the reserve collection and of great importance for reference in connection with the identification and study of the Tertiary and Quaternary fossils of the United States.

The result of the exhibition to the Department of Mollusks was less advantageous than to other departments of the Museum, as the exhibition, outside of the national exhibit, contributed little or nothing to this section; in fact, with that exception, nothing of much scientific importance in this line was exhibited.

OTHER WORK OF THE DEPARTMENT.

The chief work of the department during the period has been the identification of Tertiary fossils sent in by the U. S. Geological Survey, from time to time, of collections of shells sent by various collectors to be named for assistance in their studies, and in preparing for exhibit or reference the Tertiary fossils and recent shells which have accumulated in the storage of the National Museum during the past six or eight years. Since for the uses of the student of paleontology and malacology it is absolutely necessary to have reference series of named and classified fossil and recent shells, the curator has felt that whatever was done in other directions, his first duty in regard to the accumulated material was to put it into shape for reference. This work has been steadily prosecuted, interrupted only by calls for the immediate determination of, or report upon; new material sent by the Directors of the Museum or the Geological Survey at the request of their correspondents or collectors. This latter work has in all cases been attended to at once, and there are no arrears in it. The classification of the material previously on hand has gone on steadily, but is always a slow process, and, from our inability to employ skilled assistants, will probably be a matter of several years in accomplishment.

A large number of specimens of shells has been sent out in exchange or by way of donation from the National Museum during the period covered by this report. A list of these sendings is appended. Much of this has been in return for material furnished other departments of the Museum, and has not benefited the Department of Mollusks in any way. If this method is to be continued, it will be necessary to purchase or obtain otherwise a quantity of material for this express purpose, as the available store of attractive duplicates, such as are suited to the requirements of most persons supplied in this way, is already almost expended.

The progress of the work upon the arrears, though slow, has made as good progress as could be expected, and what has been done will not

need to be done again, as was constantly the case under the old and obnoxious system of mounting specimens on tablets.

RESEARCHES IN PROGRESS.

The routine work of the department has occupied most of its energies, but incidentally something has been practicable.

The fauna of the eastern coast of the United States north of Hatteras is being investigated by Professor Verrill, of Yale College, under the auspices of the Fish Commission. The mollusk material belonging to and eventually to be deposited in the national collection, is in the hands of this gentleman and his assistants, of whose progress and researches I have no official cognizance, though it is well known that their scientific results are of great interest and value. It would perhaps be desirable that they should report annually to the Director of the National Museum as to the extent and direction of their researches and the kind and quantity of Museum material which is in their hands. Only by some such means as this can the actual riches of the collection in its various branches be properly estimated.

For the region south of Hatteras the curator has been engaged, so far as time and opportunity admitted, in prosecuting investigations into the mollusk-fauna. It is the least known and apparently the richest region bordered by the coast of the United States. Owing to various circumstances, well understood, scientific research in this part of the country, formerly active, has been for some twenty years almost at a standstill, except where promoted by national organizations, such as the Geological Survey, the Fish Commission, and the Smithsonian Institution. There are evident signs that a new era has begun, and to foster and encourage local students can be only desirable and beneficial to the Museum and to science. The curator has by correspondence, by identifying specimens, and by personal endeavors done his best to promote activity and interest in students in that part of the country, and with satisfactory, if only preliminary, results. The publications on topics germane to this report by those engaged in the study of the national collections of Mollusks are included in Part III of this report. They are 7 in number, 5 being written by the curator, one by Prof. A. E. Verrill, and 1 by Miss Katherine Bush. It will be seen that the most important of them relate to the exploration of our southern and southeastern coast.

PRESENT STATE OF COLLECTION.

As stated in the report for 1884, the total number of specimens in the custody of the Department of Mollusks, in the present state of affairs, can only be estimated. Not including the material in the hands of Professor Verrill and associates, but including duplicates and alcoholic specimens, the total must be in the vicinity of four hundred thousand specimens. The number received during the year has not been counted,

as, for the safety of the material, much of it is still packed up. Not until our arrearages are cleared up shall we be able to state categorically the annual numerical changes in the collection, which comprises so many minute objects, often some hundreds in a single box or bottle.

The number of entries in the Museum register during the period January to June, 1885, inclusive, was 5,457, averaging not less than 2.5 specimens each, or nearly 14,000 specimens, determined, labeled, catalogued, and registered.

The fact that series of numbers have from time to time been set aside for the use of the Fish Commission collectors, &c., and that this department has not in all cases received the list corresponding to these numbers to be entered in the register, and that gaps caused by haste or inadvertence have now and then been left unfilled in the older volumes of the register, have rendered it impracticable to determine the total number of entries in any one year by subtracting the first from the last number entered for that year. To avoid this confusion as much as possible in future, I have had the volumes gone over, and all gaps known to be unfilled or unassigned filled up. But the gaps in the assigned series cannot be filled until the original lists are all received from the Fish Commission, which is now the only holder of such blank series.

The last entry of June, 1885, was number 48,156; the first in January was 37,360, but, as before pointed out, the difference between these two numbers does not indicate the correct number of entries for the period.

The department prepared for the Fish Commission exhibit, in the National Museum building, a series of economic mollusks and their products. This has been catalogued in the Reports on the Centennial and London Fisheries Exhibition, and was also exhibited at Berlin. The New Orleans exhibit, when returned from that place (a fact accomplished at the actual date of writing) and unpacked, will form the basis of an exhibit in the Smithsonian building, which will be put in place as soon as suitable cases are provided for it.

It has already been explained why a categorical enumeration of the material, reserve and duplicate, in the custody of this department is at present impracticable, and even an estimate of it as given further on must be of a very approximate nature.

RECOMMENDATIONS AND GENERAL REMARKS.

It has been shown that the entries of the past six months exceed somewhat those for the twelve months next preceding them, and there is reason to believe that the coming year will show a much greater increase. This is the result of assiduous work by all connected with the department.

The great need of the department is moderately skilled and intelligent clerical labor. One or two persons who could be trusted to assort mixed material, recognize the commoner genera, and label without constant supervision would be invaluable.

But the character of the natural history taught in schools and colleges at present, though perhaps useful as an element of general culture, is not fitted to produce systematic students or good museum assistants. A smattering of physiology, a confused notion of embryology, a vast admiration for high-flying hypotheses, and a sort of contempt for systematic zoology and the hard study and drudgery that it requires, are poorly adapted to produce the qualifications needed in a great museum. As a matter of fact they do not produce them; and this class of biological workers has ceased to gain any recruits from the university students.

It is to be hoped that the need of such workers, when attention has been called to it, may find some other suitable source of supply, for it is evident that, unless it does, when the present generation has retired from its labors there will be no persons qualified to succeed them. The proposition to take into the Museum service, as aids or working students, young persons interested in natural history, with a view to supplying the anticipated need from such as proved suitable, is worthy of consideration. The pay should be small; for any rate of pay large enough to be in itself an object will invite parasites not acceptable in any sense, and no one who has not the necessary devotion to put money considerations aside, at least until he has won his spurs, would be a permanently desirable acquisition to the corps of workers.

Under present circumstances the weight of clerical labor falling upon the curator of this department, and probably of other departments, is very great, and absorbs a very large proportion of his time which might be devoted to a higher grade of work. Everything which diminishes the time given to such matters contributes to the efficiency of the Museum corps.

I would venture the suggestion that stated, say monthly, meetings of the Assistant Director, the curators, assistant curators, and others engaged in the administration of the different departments would be of much use. At such meetings methods of labeling, preparing, and exhibiting material could be compared; standard schedules of materials, such as boxes, trays, bottles, &c., discussed and decided upon so as to unify more completely the methods in use in the different sections; and the experience of the different curators utilized in matters involving money, time, and labor.

The introduction of estimates by the curators for material needed during the coming year, for the information and consideration of the Assistant Director, has been a decided step in advance in the methods of organization of the Museum work. I would respectfully suggest that another step is needed to complete this mode of co-operation between the officers of the Museum and its directing authority. That is, that, when the allotments have been decided upon, an official letter should be addressed to each curator informing him of the decision in regard to his estimates, so that he may have official knowledge of what his working material for the year is going to consist.

I would also recommend that, in addition to its list of accessions, the

annual and monthly reports of each curator should contain a statement of specimens sent out, in exchange or by donation, or with names, for the assistance of local students. Much of this work is among the important results of the Museum organization and should be put on record in the reports as such, in order that the Museum may receive due credit for it, and that the public may know that such services are rendered.

It would also add to the completeness of the exhibit of the activity of the National Museum were such specialists as receive material from the Museum for investigation, or books from the Museum library for use in study, to be called upon to make an annual report, more or less precise, of the kind and amount of material, or the number of books, in their hands, to the Director of the Museum.

It may be thought that some of these suggestions exceed in their range those limits which might be supposed to hedge in a curatorship. If this be the case, I have only to say that they are inspired by a desire for the utmost efficiency and prosperity of the institution to which I have devoted so much of my time and strength for nearly twenty years, and that, whatever be the decision upon them, I shall cheerfully acquiesce in it.

MATERIAL SENT OUT IN EXCHANGE, AS DONATIONS, OR NAMED FOR THE ASSISTANCE
OF STUDENTS.

1. Cope, Prof. E. D., Philadelphia, Pa. January 8, 1885. Donation. One specimen, *Chelysoma macleayanum* B. & S., for study.
2. Carter, Warren, secretary Wallingford Society of Natural History, Wallingford, Delaware County, Pennsylvania. April 27, 1885. One collection of miscellaneous shells belonging to the society named, for their assistance in study.
3. Dresel, H. G., Ensign, U. S. N. January 12, 1885. (Names furnished.) Seven species shells collected by the Greely Relief Expedition; names reported on, for his use in official report.
4. Dugès, Prof. Alfred, Guanajuato, Mexico. January 17, 1885. (Names furnished.) Specimens of *Bulimus alternatus*, Say, from Oaxaca, named for the donor.
5. Fedderson, Arthur, Copenhagen, Denmark. February 19, 1885. (Exchanges.) One hundred and fifty-three named species, about five hundred specimens, furnished at request of Professor Goode for exchanges in fisheries section.
6. Greigor, Isaiah, Jacksonville, Fla. April 23, 1885. (Names furnished.) Names furnished of Florida shells for purposes of study.
7. Hemphill, Henry, Tampa, Fla. June 20, 1885. (Names furnished.) Names furnished of two hundred species Florida shells for purposes of study.
8. Lovett, Edward, Croydon, England. February 19, 1885. (Exchanges.) Twenty-eight species, sixty-three specimens, American edible mollusks furnished at request of Professor Goode for exchanges not mollusks.
9. Mazyck, W. G., Charleston, S. C. April 23, 1885. (Names furnished.) Names of several South Carolinian shells furnished for purposes of study.
10. Manigault, Dr. Gabriel, Charleston, S. C., for the Museum of Charleston College. April 25, 1885. (Exchanges.) Thirty-seven species, one hundred and fifty specimens British shells, furnished at request of Prof. S. F. Baird for exchanges not mollusks.
11. Orcutt, C. R., San Diego, Cal. January 2, 1885, and March 5, 1885. (Names furnished.) Two lots marine mollusks of San Diego and vicinity named for purposes of study.

12. *Orcutt, C. R., San Diego, Cal.* June 8, 1885. (Exchanges.) Fifty-four species, three hundred and nine specimens, miscellaneous mollusks, sent in exchange for mollusks and shells donated to the Museum.
13. *Spinner, Hon. F. E., Jacksonville, Fla.* June, 1885. (Names furnished.) Names of collection of species of shells from Florida furnished at the request of the donor.
14. *Warner, Mrs. E. S., Palma Sola, Fla.* May 25, 1885. (Names furnished.) Names of Florida shells and other invertebrates furnished for purposes of study.
15. *Wetherby, Prof. A. G., Cincinnati, Ohio.* February 4, 1885. (Names furnished.) Names of land and fresh-water shells, chiefly from Florida, furnished for purposes of study.

NOTE.—Numerous Tertiary fossils of various kinds, submitted by the U. S. Geological Survey or its officers in the regular official course, have been reported upon or identified by the curator or by Dr. R. E. C. Stearns, assistant curator.

STATEMENT OF REGISTRATION FROM VOLUME I OF THE REGISTERS
TO JUNE 30, 1885.

The mode of registration hitherto, owing to the practice of setting aside sets of numbers for specialists working on Museum material, has been very irregular. To avoid the trouble hitherto encountered whenever any question of registration has been raised, I have had a complete collation of the books made, those entries which had been left blank by inadvertence being assigned to the year most probable from other considerations. This shows that to date 42,440 entries had been made in the registers, a number equivalent, at the ratio of two and a half specimens to an entry, a fair average, to 106,100 specimens registered and labeled. In 1876 Dr. Lewis revised the whole of the American land and fresh-water shells, for which he used 4,050 entries, of which about 3,500 were second entries of the same specimens, a plan adopted to save time and trouble, but somewhat objectionable on other grounds. Deducting these, leaves 97,350 specimens, to which may be added 12,000 entries of about 30,000 specimens made since June 30, 1885. There being at least an equal number of unregistered specimens, and probably more, this would bring the census of the collection as a whole up to 260,000 specimens as a minimum.

REPORT OF DEPARTMENT OF INSECTS.

C. V. RILEY, *Honorary Curator.*

LIST OF ACCESSIONS.

Acc. number.

15563. Bags of *Thyridopteryx*. Texas. From L. R. Tuttle, box 494, Washington, D. C. Received January 8.
- 15573.* Large collection of Coleoptera and Lepidoptera. Sikkim, East India. From C. H. A. Dall, Calcutta, India. Received January 7. This is one of the collections made and mounted by the natives of Sikkim. Contains many hundred specimens, especially Lepidoptera, in pretty fair condition, though the boxes were badly infested with *Anthrenus* and *Tribolium* when received at the Museum.
15606. *Tischeria heliopsisella*, Chamb. (Tineid moth). Mexico. From Alfred Dugès, Guanajuata, Mexico. Received January 17.
15688. Various alcoholic specimens (Diptera, Homoptera). Alaska. From Lieut. George M. Stoney, U. S. N., U. S. S. Ounalaska, Mare Island, Cal. Received February 2. Specimens in very bad condition, having been kept in dirty alcohol for many months; not worth keeping.
15878. *Dynastes tityus*. Tennessee. From James W. Rogan, Rogersville, Tenn. Received April 3.
15888. *Scolopendra* sp. Napa County, California. From H. W. Turner, Lake County, Georgia. Received April 7.
15918. Various insects. West Indian region. From U. S. Fish Commission steamer Albatross. Received April 14. The collection contains about 300 specimens, the number of species being estimated at about 50, representing various orders of insects proper and Arachnida.
15963. *Belostoma americanum*. Electric-light station, Hell Gate, New York. From D. W. Fox, Astoria, N. Y. Received April 24.
16016. *Murgantia histrionica*. Rogersville, Tenn. From James W. Rogan, Rogersville, Tenn. Received May 7.
16027. *Pieris napi*. Alaska. Dr. W. H. Dall, U. S. National Museum. Received May 11.
16088. *Leucaretha aeræa* (larva). Paris, Tex. Murphy Brothers, Paris, Tex. Received May 26.
16116. *Anisomorpha buprestoides*; *Mantis carolina*; *Nephela plumipes*. Pilot Town, Fla. From C. C. Nutting, Carlinville, Ill. Received June 3.
16174. *Eurycreon rantis* (larva). Elk County, Kansas. From T. J. Holcombe, Malone, Elk County, Kansas. Received June 22.
16202. *Doryphora 10-lineata* (larva and imago); *Epitrix brevis* (imago). Tennessee. From Dr. C. M. Wilcox, Shell Creek, Carter County, Tennessee. Received June 29.

*Accession of great importance.

The following are old accessions placed in the entomologist's room on the dates stated:

8133. *Calliphora* sp.; *Lucilia* sp.; *Silpha lapponica* (larva). Alaska. From E. W. Nelson, U. S. National Museum. Dated September 24, 1880. Received May 13, 1885. Specimens not in good condition.
16802. *Dytiscus* sp.; *Colymbetes* sp. Alaska. From E. W. Nelson, Sitka, Alaska. Dated December 10, 1881. Received April 14, 1885. Specimens entirely broken and unfit for further determination.
14796. Number of alcoholic insects from Isthmus of Panama, province of Cheregin, New Granada. From J. A. McNeil (through L. Lanson & Brother), 77 Maiden Lane, New York. Received March 2. About 40 specimens, comprising two or three species of Myriapoda, two species of Scorpionida, several Orthoptera of the families Locustida and Acridida, a few species of Coleoptera, and one Mygale (Arachnida). All common species.
15539. A number of named Coleoptera. Algeria. Donor unknown. Received March 2. Seventeen specimens and 15 species, in rather dilapidated condition.

Dr. Nash, U. S. N., accompanying the expedition under Lieutenant Stoney to Alaska, received in February and March a complete entomological outfit, and careful instructions how to collect and preserve specimens. It is to be hoped that a good collection of insects may be brought from that region.

Dr. Warrington Eastlake, of Tokio, Japan, placed, March 12, 1885, at the disposal of the Museum a paper on the Lepidoptera of the island of Hong-Kong, which was afterwards published in the Proceedings of the American Philosophical Society of Philadelphia.

From correspondence, unaccompanied by specimens, the following is perhaps worthy of note:

Mr. G. W. Peters, Caldwell, Sumner County, Kansas, not dated, in March, complained of injury done to young carp by some water insect, which from his description was determined as a species of *Dytiscus* or *Cybister*. Capturing the beetles with a net was recommended as a remedy.

Mrs. A. C. Bowels (letter April 9, 1885), of Abington, Mass., desired information regarding the "buffalo bug" (*Anthrenus scrophulariæ*).

Mr. de Plason, of Vienna, Austria, offered his large collection of Coleoptera for sale, price \$5,000; but for various reasons I could not recommend its purchase.

Several letters with questions regarding mounting, &c., of specimens were answered.

The larva received under accession 16174, *Euryercon rantalis*, is of considerable interest as having appeared in phenomenal abundance over a very large portion of the West and Southwest, webbing up and devouring all garden vegetables, and even corn and some other field crops. I received very many communications about it during the summer, and shall publish a full account of it in my forthcoming report to the Department of Agriculture.

Quite a lot of alcoholic material has been received through Dr. R. W.

Shufeldt, from Fort Wingate, N. Mex. As it was his desire to have this material determined as far as possible, I have taken pains to separate and mount it carefully, and have kept it intact for him and sent on a full list of the determinations.

The most valuable addition, from a classificatory standpoint, to the collection during that period, however, is the Dipterological collection of Mr. Edward Burgess, treasurer of the Boston Society of Natural History, which was obtained by purchase; while the most valuable from a popular and economic view is the exhibit collection prepared for the New Orleans Exhibition. This has been returned with little injury, and is only awaiting space for permanent placing in the Museum. It is made up of the following material, arranged in cases made on the same unit plan as those of the Museum:

(1) *Insects injurious to agriculture*.—Arranged according to the particular plant and the particular part of the plant affected, and containing, as far as possible, the different states of growth of the insect, its enemies and parasites, a statement of the remedies or preventatives available, and a reference to the chief articles where full information can be found upon it. These references are principally to Government and State reports, to which the farmer will most likely have access.

(2) *Insecticide substances*.—In the catalogue of this collection the aim has been to add, as briefly as possible, a statement of the method of using such substances, so that whenever in the first section a particular substance is recommended for a particular insect the reader can turn to this second section for further details.

(3) *Insecticide machinery and contrivances for destroying insects*.—In the catalogue of this section there is also added such information as will add to the instructive value of the exhibit, and a large proportion of the more useful contrivances are such as have been designed and perfected in the work of the Entomological Division of the Department of Agriculture or of the U. S. Entomological Commission during the past four years.

(4) *Bee culture*.—This collection is designed to show all the more valuable methods and contrivances now in use among the advanced apiarists.

(5) *Silk culture*.—In this collection the aim has been to make the exhibit instructive rather than full in detail.

The collection includes, in addition to the foregoing, a number of framed plates, both colored and plain, that have been prepared in the work of the division; and a number of Dr. Riley's enlarged colored diagrams of some of the more important injurious insects were also used.

A catalogue of this exhibit has been published under the direction of the Department of Agriculture, giving a full and detailed statement of its contents.

The routine work of the department has consisted in answering letters and in acknowledging and determining accessions. A good deal of

work has also been done in the proper arrangement and classifying of material, particularly in the Micro-Lepidoptera, and in the Lepidoptera generally. In this work I was assisted by Mr. Albert Koebele, who was detailed from the Department of Agriculture for the purpose.

The researches in entomology have been done chiefly in connection with my work for the Department of Agriculture. Some of the results have been published in the bulletins and publications of said Department.

REPORT ON THE DEPARTMENT OF MARINE INVERTEBRATES IN THE U. S. NATIONAL MUSEUM, 1885.

By RICHARD RATHBUN, *Curator.*

REVIEW OF ACCESSIONS.

There was received from the U. S. Fish Commission, in April, a very large and valuable collection of marine invertebrates, made by the steamer Albatross in the Gulf of Mexico and off the coast of the Southern Atlantic States between January and April of this year. An account of the explorations of the Albatross during that time, with a brief description of the materials obtained, is given elsewhere. The collection filled 775 packages, of which 21 were sixteen-gallon tanks, and 4, barrels. The fishes were transferred to Dr. Bean, and the mollusks to Mr. Dall, but by far the larger portion of the collection belonged to this department. It is impossible at present to describe its composition in detail, but an especial feature is a series of over 400 specimens of stalked crinoids from off Havana, Cuba, representing 4 species. The Echini have already been determined and contain fine specimens of many species, which have hitherto been poorly represented in the Museum collection. Of the remaining groups of Echinoderms, and of Crustaceans, Anthozoa, and Sponges, there are many specimens.

A small collection, consisting of 74 packages, was brought in by the Albatross in June, as the result of a short fishing cruise made to the edge of the Gulf Stream, off Cape Hatteras, North Carolina. In regard to the Fish Commission collections received at Washington direct from the steamer, it should be explained that the number of packages cited gives no clue to the number either of species or specimens they contain, as the material is seldom sorted before reaching Washington, being generally transferred in bulk to the several receptacles, from the dredge or trawl, or the sieves in which it has been washed.

In May, Prof. A. E. Verrill, of New Haven, Conn., turned over to the Museum a large collection of identified species, obtained by the Fish Commission on the eastern coast of the United States during previous years, and retained by him and Prof. S. I. Smith for examination. Of Mollusks there were 800 packages, transferred to Mr. Dall; of Crusta-

cea, 86 packages and 29 species; of Echinoderms, 192 packages and 33 species, and of Anthozoa, 37 packages and 12 species.

Mr. Henry Hemphill has contributed many specimens of marine invertebrates, collected about Key West, Fla., in continuation of his explorations begun two years ago. The collection of this year consists principally of the smaller species of Crustacea, Echinoderms, Corals, and Sponges, and contains many valuable additions to the Museum. It is partly dried and partly preserved in alcohol.

A valuable collection of marine invertebrates, made by Lieut. George M. Stoney, U. S. N., in Alaska, in connection with his explorations during 1884, was received in February. It consisted of 23 lots of specimens obtained by dredging and by the use of the surface tow-net. The principal groups of invertebrates common to that region, are well represented, and especially the Crustaceans, Echinoderms, and Tunicates.

Many interesting additions have been made by Prof. R. E. C. Stearns to the collection previously turned over by him to this department. They consist mainly of rare species of Aleyonian corals from both the eastern and western coasts of the Pacific Ocean, and also include three species of crustacean whale parasites (*Oyamus*).

Other accessions worthy of notice are the following:

A fine collection of dried specimens of sea-urchins and star-fishes from the west coast of North America, containing 9 species and 43 specimens of the former group, and 12 species and 41 specimens of the latter, received from Mr. Alphonse Forrer, of Santa Cruz, Cal. These specimens were all identified and in excellent condition.

Seven species of South Sea Island corals donated by the Hon. H. F. French, Assistant Secretary of the Treasury. Specimens of Echinoderms and Corals from the west coast of Mexico, received from Prof. Alfred Dugès, Guanajuato, Mexico. Specimens of star-fishes and sea-urchins from the coasts of California and Lower California, collected by Mr. C. H. Townsend. Specimens of a new and interesting variety of fresh-water sponge (*Meyenia plumosa* Carter, var. *Palmeri* Potts), collected on the banks of the Colorado River, near Lerdo, Sonora, in Northwestern Mexico, by Dr. Edward Palmer. Two finely preserved specimens of *Metalia pectoralis*, a large sea-urchin, and several specimens of Gorgonian corals, collected at Nassau, Bahama Islands, by Mr. B. H. Van Vleck, of Boston.

ROUTINE WORK.

The general care of collections has occupied the greater part of the time of our small force, and has prevented the accomplishment of much original work. A large quantity of material has been received during the past six months, and the greater part of it has been of such a nature as to demand immediate attention. The large collection brought in by the steamer Albatross, from the Gulf of Mexico, in April, was entirely sorted and catalogued by the first part of June, and placed in

suitable condition to insure its safety until it can be properly worked over and identified. The Echini have already been determined and combined with the general collection representing that group; the fishes and mollusks have been separated out and transferred to the departments to which they properly belong. The collection of Fish Commission specimens received from Professor Verrill, in May, has also been suitably arranged and catalogued. The other accessions obtained during the half year and some of older date have been overhauled, assorted, and preserved in good condition. Among the latter were included many lots of surface towings, consisting, for the most part, of multitudes of small objects, which required much time and careful handling, and in the assorting of which several hundred homœopathic vials were used.

Two of the groups of animals belonging to this department have now been nearly completely worked up, and conveniently arranged for reference. These are the crayfishes and Echini. For the revision of the former group we are indebted to the volunteer assistance of Prof. Walter Faxon, of Harvard College, whose studies upon our collections have been referred to in previous reports. All of the specimens have now been identified, placed in suitable bottles, and systematically arranged in the cases. A list of the same has also been furnished for publication; it records 47 species and varieties, and 204 lots of specimens, mostly from North America. The collection of Echini, which is of much greater extent, is in equally good condition, except as to the few doubtful species which it is proposed to take to Cambridge for identification. It is partly dried and partly preserved in alcohol. The dried specimens are contained in covered pasteboard boxes, as an additional precaution against the attack of museum pests, and have been mostly arranged in the drawers under the exhibition cases, on the east side of the marine invertebrate hall. In addition to the labels placed inside the boxes, a brief inscription is written on the covers, to facilitate reference to the specimens of the several species from each locality. Many of the dried specimens have also been mounted for exhibition. The alcoholic specimens are arranged in cases in the west basement hall, where they are easy of access. The systematic card catalogue of this collection is now complete, and a list of all the specimens will soon be ready for publication.

The collection of dried specimens of Gorgonian corals has been entirely arranged in unit trays, excepting the specimens on exhibition, and a large number of the species have been identified. This collection has been greatly increased in size and value during the past two years by accessions from Dr. Edward Palmer, Mr. Henry Hemphill, Prof. R. E. C. Stearns, and the Fish Commission. The sponges collected in Florida by Dr. Edward Palmer, in 1884, have all been catalogued, and add many entries to our record book. Some of the stony corals obtained by him have also been identified and catalogued.

The collection of barnacles, from all sources, has been brought together, with a view to selecting out the deep-sea species to send to Dr. P. P. C. Hoek, of Holland, for identification, but want of time has prevented the carrying out of that plan this spring.

As collections have been overhauled and determined, many duplicate specimens have been set aside for the purposes of exchange and for distribution to institutions of learning throughout the country. It will probably be possible, at an early date, to make up a number of special sets of this nature, but there is not enough material on hand at present. The rapid increase in the size of our alcoholic collections has imposed a heavy task in the way of keeping such materials in good condition, and constant attention is required to prevent injury to specimens from the loss of alcohol due to evaporation or the breaking of jars. The alcohol which has remained in many of the receptacles for a number of years has also been of uncertain strength; and to remove all doubt as to the safety of the collections, they have been completely gone over during the past six months, and every jar and bottle refilled with alcohol. Redistilled alcohol of 75 to 80 per cent. has been used for this purpose where a greater strength was not required. We have also attempted to reduce the amount of alcoholic material by drying large numbers of specimens, which it is possible to do in such groups as the sea-urchins, star-fishes, &c. Nearly all of the collections sent in by the Fish Commission have been preserved in alcohol, as it is impossible to dry most specimens in good condition on the sea shore or on the steamers. The work of drying so much material has taken much time, but it will relieve us of a great deal of trouble in the future; and for the ordinary purposes of observation, dried specimens are often preferable to alcoholic ones. A sufficient number of specimens of each species dried are, however, retained in alcohol.

All collections have been catalogued as soon as received and sorted, whether identified or not, and in this manner a continuous record is kept of the approximate number of specimens on hand, their origin, and disposition. For identified collections, the card catalogues have been continued, to permit of a systematic record of the species being kept. A statement of the amount of cataloguing done during the past six months is given further on. The other records of the department for the previous five years have also been put in as complete order as was possible, considering the fact that they are in manuscript. It is proposed to transfer all that are of permanent value to book form as soon as time will allow.

All of the objects of pottery remaining in the invertebrate exhibition hall, except the large center piece, were removed in March, giving us some additional room, which has long been much needed for storage. This hall was kept closed to the public until the latter part of June, and was used as a general storage and work room, especially for the dried collections, all of which were brought in from the floor of the

bird hall, in order to concentrate them and render them more convenient for reference. Four of the standard half-unit cases were allowed the department, and were placed in this hall, together with four of the old style of table-cases formerly used for shells. These have afforded convenient storage space, which has been devoted mainly to the dried collections of Crustaceans, Gorgonian corals, and Bryozoa. The greater portion of the dried collections has, however, been kept in separate unit trays, arranged in piles on the floor. The tops of the exhibition cases have been used for the storage of alcoholic specimens, for which there was no room in the basement.

It was decided in June to give this department the use of the north-west gallery in the bird hall as a general storage and work room; and in order that the invertebrate exhibition hall might be opened to the public during the summer, all the specimens stored in the latter, except such as were contained in cases, were transferred to that gallery. As there was no time to fit up the proper cases in the gallery, the trays and boxes have been piled on the floor, pending a better arrangement next fall.

My only assistants during the past six months have been Mr. A. H. Baldwin and Miss M. J. Rathbun, but through their faithful attention to duties, it has been possible to transact promptly all the necessary business of the department and to retain the collections in exceptionally good condition. Arrangements for the summer explorations of the Fish Commission were begun in May and continued through the first half of June, and on June 18 the curator and both his assistants left for the Wood's Holl station of the Commission to take part in the work of investigation.

RESEARCHES.

In such intervals as could be spared from the routine work of the department, the curator has given most of his time to the identification of the Echini contained in the general collection, and those obtained by the steamer Albatross in the Gulf of Mexico and Caribbean Sea, in 1884 and 1885. Work upon the collection made by the Albatross in 1884 was completed in February, and a report upon the same was published in the "Proceedings" of the Museum for this year (pp. 83-89). Twenty-three species were recognized, but none of these were new to science. The second collection of the same character, made by the Albatross this year, was not received until April, but before leaving Washington for Wood's Holl, in June, the curator had identified all but a few doubtful forms, which latter were to be taken to Cambridge, Mass., for comparison with the types of Mr. Alexander Agassiz. In the same way, the determinations of the general collection of Echini has been finished, so far as could be done in Washington, but by arrangements with Mr. Agassiz it will be possible to compare the doubtful species with the very full collection at the Museum of Comparative Zoology some time

during the summer. A catalogue of all the species and specimens contained in our collection has also been prepared, and will be submitted for publication in the fall.

The specimens of stalked crinoids collected by the steamer Albatross in the Gulf of Mexico and Caribbean Sea, in 1884, several hundred in number, have all been examined and identified, and placed in good condition. There are but two species of *Pentacrinus* (*P. Mülleri* and *P. decorus*), and one species of *Rhizocrinus* (*R. Rawsoni*).

A beginning has been made toward revising the older part of the collection of Gorgonian corals, and identifying the specimens of the same group recently received. The collections made in Florida during the past two years by Dr. Edward Palmer and Mr. Henry Hemphill have already been examined and mostly named. A brief preliminary report upon the marine invertebrates (exclusive of the Mollusca) collected in the Alaskan region, in 1884, by the revenue steamer Corwin, Capt. M. A. Healy commanding, was transmitted to the chief of the Revenue Marine Service. Much has also been done in the way of revising and adding to the unpublished manuscripts of fishery reports, prepared for publication in the quarto fishery report, now going through the press.

Prof. A. E. Verrill, Prof. S. I. Smith, and Miss K. J. Bush have continued their studies on the Fish Commission collections of the eastern coast of the United States, at New Haven, Conn. Professor Verrill has devoted most time to the Mollusks, Echinoderms, and Anthozoa, and Professor Smith has been occupied exclusively with the Crustaceans. Other collaborators on Fish Commission collections, from which results may be expected at an early date, are Prof. L. A. Lee, of Bowdoin College, Brunswick, Me., intrusted with the Foraminifera; Mr. James E. Benedict, naturalist of the steamer Albatross, who is studying the Annelids; and Prof. Edwin Linton, of Washington and Jefferson College, Washington, Pa., and Prof. B. F. Koons, of the Storrs Agricultural School, Mansfield, Conn., who are engaged in working up the collection of internal parasites of fishes.

The Hon. Theodore Lyman, of Brookline, Mass., continued to interest himself in this department as long as he remained in Washington, and, as often as his Congressional duties permitted, gave us the benefit of his experience in the special line of investigations in which he has taken so prominent a stand. He has nearly completed the identifications of the numerous specimens of Ophiurans collected by the steamer Albatross in the Gulf of Mexico and Caribbean Sea during the past two winters, and will finish this task in Cambridge, to which place the remainder of the collection will be sent in the fall.

Mr. J. Walter Fewkes, of the Museum of Comparative Zoology, Cambridge, Mass., has kindly volunteered to work up and report upon the free Medusæ obtained by the Fish Commission, and from other sources, and all of the materials of this character in the Museum have been forwarded to him. Most of the free Medusæ collected by the Fish Com-

mission have, however, been stored at New Haven, in charge of Professor Verrill, who has also sent the specimens in his keeping to Mr. Fewkes.

A few recent additions to the collection of fresh-water crayfishes (*Astacidae*) were sent to Prof. Walter Faxon, of Harvard College, in April, for identification, and have since been returned by him, together with a complete list of all the species and specimens of this group belonging to the Museum, for publication in the "Proceedings."

Collections have been sent out for study, during the past six months, as follows:

To Prof. A. E. Verrill, New Haven, Conn., 603 packages of Mollusks collected by the steamer Albatross, off the eastern coast of the United States, in the fall of 1884. To Prof. S. I. Smith, New Haven, Conn., 43 packages of Crustaceans, obtained in the Gulf of Mexico, in 1884, by the steamer Albatross. To Mr. J. Walter Fewkes, Cambridge, Mass., 35 packages of Medusæ, mostly from the collections of the steamer Albatross during 1884 and the spring of 1885. To Prof. Walter Faxon, Cambridge, Mass., 4 packages of *Astacidae* (crayfishes) from various sources. To Prof. Sven Lovén, director of the Royal Swedish Museum, Stockholm, Sweden, a specimen of *Echinus* (*Phyllacanthus gigantea*) for special study.

EXPLORATIONS.

The principal explorations by which this department has been benefited during the past half year, have been those made by the Fish Commission steamer Albatross in the Gulf of Mexico and off the coast of the Southern Atlantic States.

The steamer Albatross, Lieut. Commander Z. L. Tanner, U. S. N., commanding, left Norfolk, Va., the first part of January, for the purpose of exploring the fishing grounds located in the Gulf of Mexico, off the southern coast of the United States. On the trip to Key West, observations were made by means of trawl-lines and the beam-trawl off the coast of South Carolina, in depths of 80 to 100 fathoms; and on the return trip from Key West to Washington several lines of serial temperatures were carried out from the capes of Virginia across the area in which the schools of mackerel and menhaden first make their appearance in their spring migrations towards the north. At Key West, the important fishing interests centering at that place were studied with great care, and thence the Albatross proceeded to Havana, Cuba, spending about four days on the famous *Pentacrinus* ground, located off Havana light, a portion of the party at the same time making a brief examination of the fisheries and fishing craft of that region. The next localities visited were the island of Cozumel and Campeche Bank, off Yucatan, where seines, hand-lines, and the beam-trawl were employed in making collections of fishes and other marine animals. The remainder of the cruise, excepting about two weeks spent at New Orleans, was

devoted to exploring the fishing grounds in the northern and north-eastern parts of the Gulf of Mexico, between the mouth of the Mississippi River and Cedar Keys, Fla., and between the latter place and the Dry Tortugas. The investigations were all carried on with extreme thoroughness, and included many lines of dredgings across the fishing-grounds to ascertain the character and richness of the fauna occupying them, upon which the abundance of the food-fishes must depend.

One hundred and ten dredging stations (serial numbers 2311 to 2420 inclusive) were made, in depths of 21 to 1,467 fathoms, the deepest series, ranging from 730 to 1,467 fathoms, being located directly south of Mobile, Ala. Capt. Joseph W. Collins was in charge of the practical fishery investigations, and Mr. James E. Benedict chief naturalist, assisted by Mr. Thomas Lee. Dr. T. H. Bean, curator of the Department of Fishes in the National Museum, also accompanied the steamer during the first half of the cruise. An account of the material obtained will be found among the accessions.

During the first week in June, the Albatross made a short fishing trip to the edge of the Gulf Stream, off Cape Hatteras, North Carolina, bringing back a small but interesting collection of marine invertebrates.

Mr. Henry Hemphill continued his collecting in Southern Florida during the first three or four months of the year, and contributed a large amount of interesting material obtained from the reefs and shores about Key West. The collection sent in by him contains many species, mainly of Crustaceans, Echinoderms, Corals, and Sponges, the smaller forms, which are less readily obtained, composing a large portion of it. Mr. Hemphill's careful explorations during the past two years have secured for the Museum a most valuable series of the shallow-water marine invertebrates of Southern and Western Florida, a region that had previously been but poorly represented in our collections. Only a small part of his collections has yet been carefully examined, but they undoubtedly contain many new species.

Lieut. George M. Stoney, U. S. N., in connection with his explorations in Alaska during the summer of 1884, made several dredgings and surface towings, in which he obtained many specimens of marine invertebrates. These have been turned over to the Museum in good condition, and add greatly to our previous collections from the same region.

Small collecting outfits have been supplied to the following persons, whose collections, either in full or in part, are to be given to the Museum: Lieut. George M. Stoney, U. S. N., for explorations in Alaska during 1885; Lieut. E. D. Taussig, U. S. N., commanding the U. S. Coast and Geodetic Survey steamer McArthur, on the Pacific coast; Dr. W. H. Rush, medical officer of the U. S. Coast Survey steamer Blake, on the Atlantic coast; Dr. Stephen Bowers, Buenaventura, Cal.; Mr. L. P. Gratacap, of the American Museum of Natural History, New York City; Mr. Henry Hemphill, collecting in Florida in the interests of the Museum.

DISTRIBUTION OF DUPLICATES.

No new sets of duplicates were made up during the period covered by this report, as the stock of duplicates of identified species is now rather small. It is intended, however, to prepare a limited number of special sets, representing a few subjects only, in the course of a year or two. Regular duplicate sets of the old series, described in previous reports, were distributed to the following institutions :

Ripon College, Ripon, Wis.; Illinois Wesleyan University, Bloomington, Ill.; Facultad de Medicina de Lima, Peru; the Greek Government; the Lowell School, Boston, Mass.; Olivet College, Olivet, Mich.; Haverford College, Pennsylvania; Trinity College, Toronto, Canada; Kansas State Agricultural College, Manhattan, Kans.; Denison University, Granville, Ohio; Indiana Institute for educating the deaf and dumb, Indianapolis, Ind.; North Division High School, Chicago, Ill.; McDonogh School, Baltimore County, Maryland; Coe College, Cedar Rapids, Iowa; State Normal School, Saint Cloud, Minn.; Wallingford Natural History Society, Wallingford, Pa.; Michigan State Normal School, Ypsilanti, Mich.

In addition to the above, a few small special lots of duplicates, consisting of but a few species and specimens each, have been furnished to investigators and teachers.

GENERAL REMARKS.

The curator deeply regrets that he has been unable to make greater progress toward the permanent opening up of the exhibition hall of this department to the general public, but a combination of circumstances has interfered with the proposed arrangements in that direction up to the present time. The want of proper storage and work-rooms to accommodate the immense stock of specimens with which this department is now entrusted, and which is being constantly added to, has necessitated the use of the exhibition hall for such purposes, and the care and preservation of the general collections require so much attention that it has been impossible to devote any time to the display series, which is still in the same condition as when my last report was submitted. Admission to the hall is not refused, however, to any one specially interested in examining the specimens, and during the summer months it will be temporarily opened to the public. The additional space afforded by the north-west gallery in the bird hall gives much relief, and, if proper cases are constructed, there will be no difficulty in making a suitable arrangement of the dried specimens, but the alcoholic materials are greatly in excess of the storage room allotted to them, and it is this portion of the collection that is increasing most rapidly.

Except for the fact of this constant increase, the bulk of the collections could be speedily and greatly decreased by the elimination of du-

plicates, but the latter cannot be selected out until all the specimens of each species have been examined, and those required for the reserve series decided upon. Work of this character progresses slowly, especially in view of the many other duties of more immediate importance which belong to the department. Another way in which the extent of the alcoholic collections is being reduced is by the drying of many specimens belonging to certain groups possessing a hard covering, such as the sea-urchins, star-fishes, corals, &c. In many of these animals the parts mainly relied upon for purposes of classification are shown nearly or quite as well in the dried as in alcoholic specimens, and the former are the most convenient for reference. A fair representation of each species must, however, be retained in alcohol, and this necessitates the same careful identifications before drying as in the case of selecting duplicates. In nearly all the groups, except the corals, the majority of specimens received are preserved in alcohol, and this is especially the case with the collections of the Fish Commission. Collectors seldom have the means of making good dried preparations in the field, and it is not always possible for them to decide what can best be studied dried and what best in alcohol. Seaside stations are generally characterized by a moist atmosphere, in which specimens dry with difficulty, if at all, and are apt to mould at any time; and for that reason the drying of most kinds of specimens is not now attempted at the stations of the Fish Commission.

The favor with which the distribution of duplicates is regarded by the public, fully justifies the amount of time spent upon this work. Its expense is but slightly additional to that demanded for the general maintenance of the collections, and the scheme is directly in accord with the policy of the Smithsonian Institution, as expressed by the founder. The duplicates hitherto distributed have been derived mainly from the collections of the Fish Commission, examined and described by Professors Verrill and Smith, of Yale College. These have been put up in sets, covering, so far as possible, all the groups of marine invertebrates common to the New England coast, and have been especially adapted to the use of institutions of learning. Over 200 such sets have already been distributed, and applications for others of the same kind are constantly being received. The researches now being carried on in this department have reference mainly to the identification of all the materials belonging to certain groups, from whatever source obtained. The collections of sea-urchins have, in this manner, been carefully examined during the past two years, and those of the star-fishes and ophiurans are now under way. The duplicates selected in the future will, therefore, for the most part, represent limited groups, and the sets prepared for distribution will be of a special rather than a general nature, thereby possessing greater scientific value.

It is unfortunate that more inducements cannot be offered to special workers in this department, for, as will be seen by the present and

previous reports, but few researches have been conducted in the Museum, upon the general collection of marine invertebrates. It is, however, but fair to regard the numerous investigators engaged by the Fish Commission in this line of work as collaborators of the Museum, as their materials are turned over to its keeping generally in the best of order, and requiring only the mechanical labor of cataloguing, the re-bottling of some specimens, and the drying of others, to bring them into uniformity with the arrangements of the department. The number of types of new species in the collection is very large and is rapidly increasing.

REPORT ON THE DEPARTMENT OF INVERTEBRATE FOSSILS (PALEO-ZOIC), IN THE U. S. NATIONAL MUSEUM, 1885.

By C. D. WALCOTT, *Honorary Curator.*

The additions to the collections are here presented in order:

Acc. numbers.	Specimens.
15579. From Mr. C. A. Barrett, Clearfield, Pa.:	
<i>Pleurotomaria tabulata</i> , Hall? (Carboniferous. Du Bois, Pa.)....	1
15735. From Miles Rock, Guatemala:	
<i>Maclurea</i> ? sp.?.....	2
15827. From L. W. Bailey, Fredericton, New Brunswick:	
Three fragments of limestone with <i>Spirifera</i> , <i>Terebratula</i> , and <i>Productus</i> represented.	
16065. From J. M. Trimble, Reily, Butler County, Ohio:	
One box containing a large collection of the common species of the Hudson River Group.	
16102. From J. Le Moyne Hupp, Wheeling, West Va.:	
<i>Orthis lynx</i>	5
<i>Rhynchonella capax</i>	23
	28
16121. From Fred. W. Taylor, Lake Valley, New Mexico:	
<i>Amplexus fragilis</i> , W. and St. John	1
<i>Streptorhynchus crenistria</i>	1
<i>Orthis resupinata</i> , Martin	2
<i>melina</i> , L'Eville	1
<i>Spirifera centronatus</i> , Winchell	10
<i>Athyris lamellosa</i> , Hall	4
sp. (?)	1
<i>Conocardium</i> sp. (?)	1
	21
16126. Cambrian fossils from the Geological Survey of Canada:	
<i>Stenotheca elongata</i>	1
<i>Hyolithes communis</i>	3
<i>princeps</i>	4
<i>Americanus</i>	3
<i>obtusa</i>	3

Acc. numbers.		Specimens.
16126.	Cambrian fossils from the Geological Survey of Canada—Continued.	
	<i>Hyolithellus nicans</i>	1
	<i>Obolella gemma</i>	8
	<i>crassa</i>	6
	<i>chromatica</i>	4
	<i>circe</i>	2
	<i>Kutorgina cingulata</i>	2
	<i>Olenoides laevis</i>	2
	<i>Agraulos strenuus</i>	2
	<i>socialis</i> (electrotypes)	2
	<i>Protypus senectus</i>	6
	<i>Ptychoparia Adamsi</i>	6
	<i>Tencer</i>	4
	<i>trilineata</i>	2
	<i>Salterella pulchella</i>	5
	<i>rugosa</i>	1
		<hr/> 67 <hr/>
16135.	From F. C. Green, Milwaukee, Wis.:	
	Niagara Group:	
	<i>Orthoceras annulatum</i> (?), Sowerby	1
	<i>Illæus insignis</i> , Hall	4
	<i>Sphærezochus Rominger</i> , Hall	1
	<i>Calymene Niagrensis</i>	1
		<hr/> 7 <hr/>
	Devonian:	
	Sponge (?)	1
	<i>Orthis impressa</i> , Hall	5
	<i>Atrypa reticularis</i> , Linnæus	6
	<i>Chonetes deflecta</i> (?), Hall	1
	<i>Spirifera mesostriatus</i> , Hall	15
	<i>Orthoceras</i> sp. ?	1
	<i>Gomphoceras breviposticum</i> , Whitfield	1
	<i>fusiforme</i>	2
	sp. ?	1
	<i>Cytoceras</i> sp. ?	2
	Fish plate	1
		<hr/> 36 <hr/>
16167.	From G. K. Gilbert, U. S. Geological Survey:	
	One block of Medina sandstone from Medina, N. Y., containing:	
	<i>Lingula cuneata</i>	
	<i>Pleurotomaria</i> ? <i>pernetusta</i>	
	<i>Modiolopsis</i> ? <i>primæginia</i>	
16186.	From Henry Ami, Ottawa, Canada, and Charles D. Walcott, U. S.	
	Geological Survey:	
	Specimens of fossils from the Utica slate	45
— ?	From Dr. R. W. Shufeldt, U. S. A.:	
	<i>Productus semireticularis</i> , Martin	8

The following accessions, although received by the Museum prior to the date covered by this report, have only recently been worked up:

14680. From L. O. Perley, Emporia, Kans:

One box containing a large number of specimens of *Streptorhynchus crenistria*, from the Coal measures about Emporia, Kans.

14836. From Charles H. Townsend, Baird, Shasta County, California:

Two boxes of specimens collected under authority from you, for study in this office.

——? From R. E. C. Stearns:

Fossils from Trenton Falls, N. Y.:

<i>Delthyris lynx</i> , Eichwald	2
<i>Orthis testudinaria</i> , Dalman	4
<i>Leptæna deltoidea</i> , Cox	3
<i>Zygospira recurvirostra</i> , Hall	5
	<hr/>
	14

15142. From Dr. H. C. Yarrow, U. S. A.:

Ptychoparia Kingii, Meek 10

From House Range, Antelope Springs, Utah.

Casts of the following species of Lower Cambrian fossils were taken from typical specimens and added to the collections:

<i>Paradoxides Harlani</i> , Green	12
<i>Harlani</i> , Green (received from the Boston Society of Natural History)	1
<i>Bennetti</i>	3
<i>Bennetti</i> (received from the Boston Society of Natural History)	1
<i>spinosus</i> , Broeck	3
<i>Ptychoparia Rogersi</i> , Walcott	1
<i>Agraulos quadrangularis</i> , Whitfield	5
<i>Hyalithes Shaleri</i> , Walcott	3
	<hr/>
	29

During the half year Bulletin 10, U. S. Geological Survey, was issued. This is based upon material belonging to the museum of Cornell University. Arrangements, however, have been made to obtain a duplicate collection from the university.

The total number of specimens on hand April 1, 1885, according to actual count, and exclusive of some not then unpacked, was 72,649, a table* of which was furnished to you with my report for the month of April.

WORK ON THE COLLECTIONS.

The direct work on the collections of the Museum has been the identifying, recording, and labeling of the material mentioned under the accessions, and the continuation of the arrangement and labeling of the old collections of the Smithsonian Institution. Not having an assistant who can give all of his time to the work, progress has been slow

* A similar table will be found on p. 208 of the Museum Report for 1884.

and will be until an assistant is provided by the Museum, as the assistants I now have give their time to work on the collections of the Geological Survey. As soon as the study of the latter collections is completed, they are transferred to the National Museum, and in this way the Museum receives the benefit of all the work done in this department.

The principal study has been that of the Middle Cambrian faunas. Over 80 species have been identified and illustrated, and the work will be continued until all the known species have been examined. The result will appear as a "Second Study on the Faunas of North America" some time during the year 1886.

RECOMMENDATIONS.

I repeat my recommendation of the last report, that an assistant curator be employed by the Museum, whose time can be given entirely to the care of the collections. This is necessary, in order to bring up the old collections to a satisfactory condition, and to record and install the accessions promptly.

More room is also required for the rough work on the collections.

REPORT ON THE DEPARTMENT OF INVERTEBRATE FOSSILS (MESO-CENOZOIC) IN THE U. S. NATIONAL MUSEUM, 1885.

By CHARLES A. WHITE, *Honorary Curator.*

No detailed report upon the operations of this department has been received. The curator has stated verbally that a number of accessions have been received during the first six months of this year, and that some of them constitute new additions to the collection. Descriptions of these have been published in the various bulletins of the United States Geological Survey. The work of preparing the collections of the Museum has been in progress, and the installation of types has been commenced.

Since the beginning of the year considerable space has been assigned to this department in the gallery of the Smithsonian Institution, and the work of preparing material for exhibition has steadily progressed. The space in the southeast court of the Museum building is occupied by specimens belonging to this department which have been turned over by the Geological Survey to the Museum, and in this court the collections are prepared for installation.

REPORT ON THE DEPARTMENT OF PLANTS IN THE U. S. NATIONAL MUSEUM, 1885.

By LESTER F. WARD, *Honorary Curator.*

DEPARTMENT OF RECENT PLANTS.

This department was organized in February with a nucleus of about 5,000 species and 1,500 specimens, and numerous duplicates previously constituting my private herbarium. The large and valuable collection from Kew, which had been stored for some time in the basement of the Smithsonian, was added soon after, and its installation begun. This work had proceeded as far as the Order *Compositæ* at the end of June.

The technical botanical work of the department has been intrusted almost exclusively to Mr. F. H. Knowlton, who has displayed both ability and industry which are worthy of all praise.

A large amount of material from various sources was identified by him with perfect accuracy and incorporated in the collection, and the whole was installed in as safe and permanent a manner as the imperfect facilities would admit of. It had been my custom to make species cards of all my plants and arrange them in drawers as a card catalogue of my herbarium. The great value of this system in actual practice, coupled with the fact that it was already commenced, led me to undertake its extension to the entire Museum collection. This necessarily involved much labor, but was satisfactorily accomplished by Mr. Knowlton.

A small collection of plants made by Mr. C. L. McKay in Western Alaska was worked up by Mr. Knowlton, and the result published in the Proceedings of the Museum, Vol. VIII, pp. 213-221. In this list several species new to the flora of Alaska are noted, and full accounts given of other rare forms.

No exhibition series has as yet been undertaken, but it is expected that one will be commenced soon.

Through the generosity of Mr. W. R. Smith, of the U. S. Botanical Gardens, a number of species of living plants, principally palms, were obtained in the hope that they might be successfully grown in the rotunda of the Museum. Some of the plants first selected were found not to be well adapted to the change of surroundings, but later selections have resulted satisfactorily.

The following species, among others, are found to do well: *Livistona australis*, *Livistona Borbonica*, *Archorhophænix Alexandræa*, *Pandanus utilis*, &c. Both species of agave (*A. rigida* and *A. Hendersoni*), instead of thriving as they were expected to do, assumed an unhealthy appearance, and in the latter part of June put forth flowering stems, and bloomed during the summer, attracting considerable attention.

The living plants have been under the charge of Mr. A. L. Schott, who, when not employed in caring for them, has also been engaged in making collections of botanical specimens from the parks and green-houses about the city. The plants procured in this way are very valuable, as they are mostly exotics and poorly represented in herbaria. These plants will also be of use in the preparation of a catalogue of the cultivated plants of the District, mentioned in your circular of March 1, 1883, which is in course of preparation. In the arrangement and installation of the collections a check-list of the "Genera Plantarum" of Bentham and Hooker was found to be almost indispensable. The preparation of this check-list was intrusted to Mr. Schott, and at the end of June he had completed about half the MS.

The following is a summary exhibit of the state of the collection :

Number of catalogue entries.....	23
Number of identified species.....	14, 212
Number of herbarium specimens (estimated).....	20, 000
Number of additional species represented only by fruits and seeds (estimated)	500

DEPARTMENT OF FOSSIL PLANTS.

No active work has been done in this department except to care for such accessions as came in during the six months.

The following statement shows the present status of the collection :

(1) Total number of specimens of catalogued material (exclusive of my recent collection still in hand for study and not yet formally turned over to the National Museum)	7, 346
(2) Number of specimens not specifically identified.....	2, 297
(3) Determined material.....	5, 049
(4) Duplicates now stored in Armory building.....	1, 091
(5) Number of distinct species identified, catalogued, and installed.....	938
(6) Of which there are Paleozoic	281
(7) Mesozoic	142
(8) Cenozoic.....	515

REPORT ON THE DEPARTMENT OF MINERALS IN THE U. S. NATIONAL MUSEUM, 1885.

BY F. W. CLARKE, *Honorary Curator.*

The growth of the Department of Minerals has not been so rapid, during the past six months, as during the year before, when the preparations for the New Orleans Exposition caused such an unusual amount of activity in the accumulation of material. We have, however, received several donations from various friends of the Museum, the most important being a lot of thirty-five specimens of wavellite, quartz and arkansite from the vicinity of Hot Springs, Ark., the gift of Mr. Charles F. Brown of Hot Springs, and a small lot of minerals from Mr. Fred. C. Green of Milwaukee, Wis., among which were two fine specimens of millerite with calcite from a cement quarry at Milwaukee. The additions accruing from our exchanges have been much greater. From this source we have received 591 specimens, as follows:—

From the University of Cincinnati, 100 specimens, representing various localities in Austria, Hungary, Prussia and other European countries; from Prof. Charles U. Shepard of New Haven, Conn., a collection of 391 specimens, from various American localities, the greater number being material for replenishing our duplicate series; from Mr. N. H. Perry, of South Paris, Me., 61 specimens of green and pink tourmaline, lepidolite triplite and massive topaz, principally from the Stoneham and Auburn localities; from Dr. L. W. Bailey, of Fredericton, New Brunswick, 38 specimens of native antimony, stibnite, manganite, stilbite, pyroxene etc., from New Brunswick, Nova Scotia and other provinces of Canada; and from Mr. C. M. Yeates, of this city, a handsome specimen of ruby corundum, from Clay County, North Carolina. Only one addition has been made to the collection of Meteorites during the past six months, namely, a clipping from a meteoric iron from Santa Rosa, Coahuila, Mexico, recently described by Prof. N. P. Lupton of Vanderbilt University, in the American Journal of Science, and by him given to the Museum. We have under consideration several exchanges, which will enlarge the Meteorite collection, in the near future.

A glance at the character of the work done in this department may not be uninteresting. A specimen coming into the department is first carefully examined, to see whether it is worthy of a place in the collec-

tion. The nature of the mineral is then determined, and its name, locality and donor or collector, with its number of accession and date of entry, are entered on the department register, after which it is assigned a place either in the reserve or duplicate series, according to its value or the scarcity of such material in the collection, such assignment being duly entered on the record, opposite the original entry of the specimen. If it is worthless, it is so recorded, and deposited for six months in a receptacle for that purpose. The specimens which receive a place in the collection are carefully cleaned and trimmed so as to show them off to the best advantage. Their catalogue numbers are then permanently attached to them, and a label is written for each specimen, giving the names of the minerals upon the specimen, their locality and the name of the donor or collector. Specimens designed for exhibition are suitably mounted on wooden blocks and given a place in the exhibition series, a printed label, with more complete information, taking the place of the written one. The specimens for the study and duplicate series, with their labels, are placed in paper trays, and those for the former are deposited in drawers in the exhibition hall, while those for the latter are stored for future use in the cases, arranged along the walls of the department laboratory. At present we are engaged in a careful selection and classification of the exhibition and reserve series. The system of classification, as was stated in our report for 1884, is essentially that devised by Prof. James D. Dana. Large wall cases have been designed to accommodate specimens too large and heavy to be included in our systematic series. Other routine work consists in the selection and shipment of sets of minerals from our series of duplicates, and such correspondence as is necessary in connection with the department work.

There are in the Museum at this time, as nearly as can be estimated, about 15,580 specimens. On account of the work of classification which is at present going on, it is not practicable to give, as yet, the number of specimens belonging to any one series. The last entry in the department register during 1884 was 45,217, and the last entry made, during the six months ending June 30, 1885, was 45,843, making a total of 626 entries. A single entry may represent many specimens.

REPORT ON THE DEPARTMENT OF LITHOLOGY AND PHYSICAL GEOLOGY IN THE U. S. NATIONAL MUSEUM, 1885.

By GEORGE P. MERRILL, *Acting Curator*.

The total number of accessions during this time as shown by the department catalogue has been four hundred and eighty-five. As these are described in Part IV of this report, mention will here be made only of a few of the most important.

Healy, Capt. M. A. Collection of rocks from Saliwick Lake and Kowak River, Alaska. (Acc. 15278.)

Mason, C. F. Two specimens fulgurites, from Sumter, S. C. (Acc. 15994 and 16052.)

Ophite Marble Company, New York. A large ophite marble mantel and wainscoting. (Acc. 16043.)

Stoney, Lieut. G. M. A collection of eruptive rocks (hornblende andesite) from the volcano on Bogosloff Island; also collection of rocks from Saliwick Lake and Kowak River, Alaska. (Acc. 15688.)

U. S. Geological Survey. A collection numbering some 125 and specimen rocks, from the Lower Silurian formations of Tennessee. Received from G. K. Gilbert.

U. S. Geological Survey. A collection of tufas and eruptive rocks, from Nevada, California, Oregon, and Utah. Received from I. C. Russell. (Acc. 15872.)

The fulgurite tubes received from Mr. C. F. Mason, of Sumter, S. C., form a valuable addition to our already fine collection of these peculiar objects. They present the usual form of very irregular corrugated tubes with glassy interiors, but are remarkably thick and strong. They are reported by Mr. Mason as being found some 20 feet below the surface while digging a well. The large ophite mantel and wainscoting, the gift of the Ophite Marble Company, of New York, although a manufactured article and possibly open to objection in that it partakes of the nature of an advertisement, is nevertheless of great value as showing the wide variations in texture and structural peculiarities common to this stone, and also the effective manner in which these points can be brought out by judicious cutting.

The collections brought in by Capt. M. A. Healy and Lieut. G. M. Stoney from Saliwick Lakes and the Kowak River, Alaska, were not only of inter-

est as showing the character of the rock in these little-explored regions, but from the fact that both parties supposed they had found the source of the so-called Alaskan jade, and had included rough samples thereof in their collections. A careful examination of the material by myself, however, showed it to consist almost entirely of a compact, fine-grained, greenish quartzite and serpentine, the latter in both the ordinary massive form and in the thin-bladed variety, *picrolite*. Not a particle of true "jade" (*pectolite*, according to Clarke's analysis) was contained in either collection. Inasmuch as the reports in the various scientific papers had been to the effect that the source of the jade had actually been discovered, proof to the contrary seemed of sufficient importance to call for a note on the subject, which was therefore published in "Science" for March 13, 1885.

Mr. I. C. Russell, of the U. S. Geological Survey, has further added valuable material to our already extensive collection of the calcareous tufas from Lake Lahontan, Nevada. Inasmuch as these have been the subject of considerable study by Mr. Russell from a geological standpoint, and by Mr. E. S. Dana* from a mineralogical standpoint, the material is now of particular value.

ROUTINE WORK OF THE YEAR.

The beginning of the calendar year found the affairs of the department in a quiescent though somewhat confused state, owing to the fact that since the preceding July the entire energies of the working force had been devoted to the preparation of the exhibits designed for the New Orleans Exposition, and the regular work of the Museum had consequently fallen behind. This work was completed late in December and the extra force that had been employed then discharged. January 5, under instructions from the Assistant Director, I left Washington for New Orleans, returning the 17th following, the intervening time having been occupied in arranging in their proper cases, in the exhibition building, the various exhibits prepared as stated above.

These exhibits consisted of (1) a collection of 358 specimens of building and ornamental stones in the form of 4-inch cubes, (2) a collection of some 12 specimens foreign and native marbles in the form of polished slabs, (3) a collection of 150 specimens of rock-forming minerals, (4) a collection called a "structural series" intended to represent all the more common forms of rock-structure and texture, (5) a collection of 198 specimens of rocks illustrating the geology and lithology of the Comstock Lode and Washoe District, Nevada, and (6) a lithological collection comprising 500 specimens of rocks of various kinds and from many sources, both native and foreign; this last, together with collections Nos. 3 and 4, forming a part of the regular educational series of the Museum. As these were all described in my report for 1884, no further reference to them is necessary here.

* Bulletin No. 12, U. S. Geological Survey.

On my return from New Orleans the routine work of the Museum was resumed and carried forward as rapidly as possible with the small force of assistance at my command. The large quantity of building-stone and other material occupying space in the southwest court was removed and stored temporarily in a shed at the eastern entrance of the Museum, the court thus being thrown open for exhibition purposes. By a reassignment of exhibition space this department was made to include the whole of the west south range instead of a portion of this range and a portion of the court as hitherto. The new arrangement is vastly preferable, both on account of light and convenience in classifying and arranging the exhibits. Early in May, acting under instructions from yourself, the force of the department was again increased by the addition of one aid, Mr. L. H. Merrill, one clerk, Miss B. Frankland, and three stone-cutters, and the work begun of preparing a collection of building-stone that shall in part duplicate our own, for the American Museum in New York City; the collection to comprise, when complete, not less than one thousand specimens and an equal number of thin sections for microscopic study. This work was still in progress at the close of the fiscal year.

Owing to the pressure of other work, I did not deem it advisable to return to New Orleans at the close of the exposition in June, and requested of the Assistant Director that other employés of the Museum be authorized to oversee the packing and shipment of the material belonging to this department. This was accordingly done. I wish here to return especial thanks to Mr. J. Warner Edwards for assistance rendered, both during and at the close of the exposition, in arranging, labeling, and packing the collections. Mr. Edwards's aid was purely voluntary but none the less valuable and well appreciated.

REVIEW OF RESEARCHES.

From the foregoing it will be apparent that the curator could give but little time to the preparation of original papers with an idea to publication. Nevertheless certain material that came into the department was of such a nature as seemingly to demand a more than passing notice, and to such was given what time could be gleaned at odd moments and by working extra hours. The brief papers resulting are included in the bibliography of this report.

The condition of the collections is as yet such as to offer but little inducement for others than officers of the Museum to come here for the purpose of study, and no papers relating to objects in the collection have been prepared other than those mentioned above.

PRESENT STATE OF THE COLLECTION.

The present state of the collection is such that no accurate figures can be given regarding the number of specimens. This fact will, I

think, be readily comprehended when I state that, aside from the material withdrawn to be sent to New Orleans, the entire building-stone collection is undergoing a thorough overhauling to sift out duplicate material for the American Museum in New York. After the return of the New Orleans material and the completion of the New York collection I hope to be able to give figures that shall be approximately correct.*

RECOMMENDATIONS AND REMARKS.

In the way of recommendations and remarks I can add but little to what was said in my report for 1884. The condition of the collections is now such that it seems useless to rely upon donations from either private individuals or the many public expositions for material necessary to fill out the numerous gaps in various systematic series. While it is true that we obtain a great deal of valuable material in this way, still it will be readily understood by all engaged in the building up of systematic collections how much absolutely indispensable material is never received from these sources and can be obtained only by purchase or by collection of especially interested parties. The curator knowing precisely what is needed can doubtless procure the same in better condition and at less cost than others whose knowledge of what is wanted is less definite, or whose interest is merely a pecuniary one. If a certain small sum of money could be set aside annually to be utilized by the curator in collecting or having collected certain specific material, this difficulty could be largely done away with.

A portable photographic camera and accessories could be utilized to excellent advantage in procuring illustrations of geological phenomena of such a nature as cannot be illustrated by means of specimens. To rely on local artists has proven unsatisfactory both in the matter of expense and quality of work. I therefore venture to suggest that such an outfit be obtained for the use of this department. Our present great need is more cases for exhibition purposes.

* In my report for 1884 the total number of specimens was estimated at eighteen thousand, of which three thousand were duplicates, and three thousand were then on exhibition. With the exception of the duplicate collection, which has been extensively drawn on to obtain material for New York, these figures will doubtless be found considerably increased when a count is actually made.

REPORT ON THE DEPARTMENT OF METALLURGY AND ECONOMIC GEOLOGY IN THE U. S. NATIONAL MUSEUM, 1885.

By F. P. DEWEY, *Curator*.

Of the thirty-four accessions received during the first half of 1885 only four are worthy of special mention.

These are: A large series of 32 specimens to represent the operation of the Ziervogel process for the treatment of argentiferous copper ores as practiced at the Boston and Colorado Works at Argo, Colo., presented by Hon. N. P. Hill (Acc. 16189); closely connected with this collection is an exceedingly interesting collection of alloys of gold and bismuth, prepared by Mr. Richard Pearce at the same works (Acc. 16184); a collection to illustrate the smelting of the oxidized ores of copper of Arizona, presented by the Copper Queen Company (Acc. 15603), this collection was solicited for the New Orleans Exposition, but did not arrive in time to be utilized there; a very interesting collection of apatite, used in the manufacture of fertilizers, from many prominent localities, presented by Pickford and Winkfield (Acc. 16028).

At the opening of the year the curator was still detained at New Orleans arranging the collection of the department there, and did not return to Washington until the middle of January. This work at New Orleans should not have consumed more than ten days, but owing to the unfavorable conditions there, it required nearly thirty days to complete it.

The design of the collections of this department was to show, as far as the time and means at disposal would permit, the prominent occurrences of each metal, the methods of extracting the metals from their ores, and the utilization of the metal. To these were added a few illustrations of non-metallic ores and their utilization, including a very extensive and valuable illustration of the coal industry.

Most of the ore material was selected from the Museum collections, and only a very few new collections were made. The new collections, however, were taken upon a systematic plan to represent the mine as a unit rather than to gather a few specimens selected at random, as is the usual case with such collections. In following the plan, specimens were taken to represent sections across and up and down the vein, and an average of the product of the vein, while to these were added the wall

rocks of the vein and other interesting material, especially the tools used in and about the mine.

In representing the extraction and utilization of the metals, it was designed to begin with the ore as it leaves the mine and to follow through the various steps in all the operations to the production of the finished articles, showing, when possible, every material going into each operation and every product of the operation.

In the case of coal the collections were based largely on the ethnological aspect of the question, and thus included many specimens aside from those of an economic or geological value.

Throughout the new collections of the department special attention has been given to gathering as full and complete a description of everything shown as possible, while the pictorial side of the question has been treated very elaborately and includes some views of the interior of a coal mine taken by electric light, the first views of the kind ever taken.

These collections form the basis for a full and complete illustration of the mineral resources of the country, and it is hoped that they will be increased until they shall fill their highest educational value. They have been fully described in Circular No. 31 of the Proceedings of the Museum.

The regular force of the department having been reduced to the curator, a scientific assistant, and a laborer, the work of preparing the collections in the Museum for installation has been at a complete standstill through the whole six months. During that time, however, the office of the department has been moved to the second floor of the southwest tower, and the work-room on the floor of the Museum has been cleared out and the space prepared for exhibition purposes, so that now the entire work of preparing material for exhibition has been concentrated into one place.

The work of investigating the New Orleans material has been carried forward as rapidly as possible, and, with the assistance of Mr. Allen, a number of very valuable analyses have been made.

The curator has published a letter in regard to the aims and objects of the department in the *Engineering and Mining Journal* of New York, Vol. xxxix, p. 258.

Mr. R. A. Brock, of Richmond, Va., who presented some pieces of slag from the old furnace at Falling Creek, Virginia, published a history of the locality in the *Proceedings of the National Museum*, 1885, pp. 77-80.

Mr. Richard Pearce described the collection of gold-bismuth alloys presented by him, before the American Institute of Mining Engineers, under the title, "Certain Interesting Crystalline Alloys," *Transactions American Institute of Mining Engineers*, Vol. xiii, pp. 738-742.

Thirty-four accessions have been received and 106 entries made. Owing to the small force of the department some of the accessions were not entered until after July 1, and owing to the time between the

donation at New Orleans and the arrival in Washington the contributions from the New Orleans Exposition were not accessioned until after July 1.

The general state of the collections remains as at the last report.

After the close of the New Orleans Exposition, when the small possibility of its reopening became evident, the work of collecting material was carried forward with vigor and marked success. In making collections for this department material of only two kinds was solicited: first, that which was intrinsically valuable, and, second, material that would fill gaps in our present collections.

The material consists almost entirely of ores, the display of metallurgical material at New Orleans being very poor. Besides the material for this department, a large amount of material for the rock department and a considerable amount for the mineral department were collected by this department.

From Arkansas were obtained specimens of stibnite, manganese ore, novaculite, and coals, contributed by Dr. J. Guy Lewis, of Little Rock.

From Colorado were obtained a very interesting and valuable collection of the ores of Lake County, contributed by Mr. Lewis R. Sharp, of Leadville, and a small but interesting collection from Gilpin County, contributed by Dr. Hall, of Central City, Colorado.

From California were obtained specimens of antimony, tin, mercury, and iron ores, together with a catalogue of the collection in the State museum, contributed by Prof. Henry G. Hanks.

From Dakota was obtained a small but interesting collection of the tin ores of the Black Hills, together with some specimens of mica.

From Georgia were obtained specimens of manganese and iron ores and some very valuable specimens of corundum presented in exchange by Mr. N. P. Pratt.

The Territory of Idaho was poorly represented in our former collections, and a special effort was made to strengthen this collection. Col. G. W. Shoup, the commissioner, presented a large series of the gold and silver ores of Idaho, which will add materially to our collections and fill an important gap.

From Kentucky was obtained a very large collection of the coals of the State, including eight sections of veins, presented by Professor Proctor, the State geologist.

From Michigan was obtained a large series of iron ores, more especially those of the Menominee region, which was formerly very poorly represented in our collections. This is one of the regions that have been mentioned in each of the former annual reports as having been developed since the Centennial, and from which a collection should be obtained. This collection therefore fills a very important gap in our permanent collections, and was presented by Mr. F. W. Noble.

From Montana was obtained a large collection of the silver-lead and

silver-copper ores of the Territory, presented by Messrs. Harris & Clark.

From North Carolina was obtained a large collection of the gold and copper ores, corundum, and coal, presented by Col. P. W. Wilson.

From Nevada was obtained a large and valuable collection which fills several important gaps in our previous collections. The collection includes, especially, stibnite, cobalt, and nickel ore, mercury ores, and a very handsome piece of tripoli; also a very large series of pictures representing mining scenes, presented by Mr. W. H. Havennor.

From New Mexico was obtained a small collection containing, especially, copper ores, presented by Prof. N. Spatcier.

From New Jersey was obtained a collection of zinc ores, including duplicate material from the Franklin locality, contributed in exchange by Professor Cook.

From Oregon was obtained a small but interesting collection of the ores of the State, presented by Mr. J. C. Swash.

From Pennsylvania was obtained a series of pictures of the works of the Powellton estate; also three specimens made by the Krupp dephosphorizing process at the Cambria Iron Company's works, presented by that company.

From Rhode Island were obtained some pictures of an iron foundry, presented by Mr. P. O. Clarke.

From South Carolina were obtained a series of gold ores and some phosphatic rock for duplicate material.

From Tennessee was obtained a small but interesting collection of iron and copper ores, especially valuable for the specimens from the old Ducktown copper mine and the magnetic iron ores from the extreme eastern section of the State, presented by Mr. A. J. McWhirter; also a small collection of iron and copper ores, presented by Mr. F. H. Waring.

From Texas was obtained a collection of coals, presented by Mr. F. E. Roesler.

The only foreign country from which it was possible to obtain anything for this department was Mexico; from this country, however, I succeeded in obtaining a very large collection, representing the ores of the country.

The finest collection in the Mexican exhibit was from the State of Zacatecas. Many of the best specimens in this collection, however, were owned by private parties, and the commissioner could not dispose of them. However, a very good collection was presented by Mr. Bonilla, who is very anxious to open a series of exchanges with the Museum, and promised to obtain some of the specimens exhibited at New Orleans for the Museum on his return to Zacatecas.

From the State of Sonora a small but interesting collection was first presented by Señor Agilla. Afterwards, by order of the governor, the

entire mineral exhibit of Sonora was presented to the Museum, and forms a very valuable addition to our collections.

From Pachuca was obtained a very large and interesting collection, including very complete illustrations of the mines of the Real del Monte Mining Company, which are especially valuable as having been taken with the view of representing the various mines of the Real del Monte Mining Company, and containing many specimens taken from many different locations in the mines. These collections were presented by José de Landeros y Cos, director of the Real del Monte Mining Company, through Mr. Drocina.

Mr. Drocina also presented collections from the States of Hidalgo, Durango, Oaxaca, Mexico, Michoacan, Guerrero, Tlascala, Puebla, San Luis Potosi, and Guanajuato. These collections are some of them quite small, only a few specimens being obtained from some States, but taken as a whole they form an excellent illustration of the mineral resources of the country.

The material gathered at New Orleans will be of great value in filling gaps in our ore collections; besides this, the way has been opened for future acquisitions, either by purchase or exchange, of much material that will be desirable to obtain.

After the return of the curator to Washington the latter part of June, the collections donated to the Museum by the American Institute of Mining Engineers began to arrive, and claimed attention till the close of the year.

LIST OF PAPERS.

WILBUR O. ATWATER. The chemistry of foods.

Rep. Sec. Comm. Board of Agriculture for 1884-'85. Hartford, 1885, pp. 83-115.

A lecture delivered before the Connecticut Board of Agriculture, in which were expressed many of the ideas which have been embodied by Professor Atwater in the plan for illustrating the composition of the human body, and the "Day's Rations Collection" in the Museum.

TARLETON H. BEAN. Notes upon an exploration on Long Island Sound.

Bull. U. S. Fish Com., v, January 19, 1885, p. 33.

Brief general notes on the species observed communicated in letter to the Commissioner.

TARLETON H. BEAN. Translation of a paper by G. M. Dannevig, entitled "Report of operations at the hatching establishment for marine fishes, Arendal, 1884." *

Bull. U. S. Fish Com., v, April 25, 1885, pp. 154-160.

TARLETON H. BEAN. Description of a new species of *Plectromus* (*P. crassiceps*) taken by the U. S. Fish Commission.

Proc. U. S. Nat. Mus., viii, April 23, 1885, pp. 73-74.

- TARLETON H. BEAN. Description of a new species of *Aspidophoroides* (*A. Guntherii*), from Alaska.
Proc. U. S. Nat. Mus. viii, April 23, 1885, pp. 74-75.
- TARLETON H. BEAN. On *Stathmonotus*, a new genus of fishes related to *Muranoides*, from Florida.
Proc. U. S. Nat. Mus., viii, June 1, 1885, pp. 191-192; plate xii.
- TARLETON H. BEAN. Note on *Stoasodon narinari*, Euphrasen.
Proc. U. S. Nat. Mus., viii, June 1, 1885, pp. 192-193.
- TARLETON H. BEAN. On the occurrence of *Hadropterus aurantiacus* (Cope) in the French Broad River, North Carolina.
Proc. U. S. Nat. Mus. viii, June 1, 1885, pp. 165-166.
- TARLETON H. BEAN. On the identity of *Cottus maculatus*, Fischer, with *Cottus bubalis*, Euphrasen.
Proc. U. S. Nat. Mus. viii, June 1, 1885, pp. 166-167.

Report of the Smithsonian Institution for 1883 (1885), pp. 263-266. (Also, pp. 103-106 of Report on National Museum, published as a separate.)

CHARLES MORRIS. On the air-bladder of fishes.*

Proc. Ac. Nat. Sci. Phila., 1885, p. 124.

JOHN MURDOCH. Description of seven new species of crustacea and one worm from Arctic Alaska.

Proc. U. S. Nat. Mus., vii., 1884 (1885), pp. 518-522.

The following species were obtained by the Point Barrow Signal Service party, under command of First Lieut. P. H. Ray, U. S. A., and of which Mr. Murdoch was a member. They were collected at Point Barrow, Point Franklin, and Norton Sound, and are here published in advance of the general report:

CRUSTACEA.

	Page.
<i>Pandalus dapifer</i>	519
<i>Mysis Rayii</i>	519
<i>Acanthozona polyacantha</i>	520
<i>Melita formosa</i>	520
<i>Melita leonis</i>	521
<i>Dulichia arctica</i>	521
<i>Polyartemia Hazeni</i>	522

VERMES.

<i>Arenicola glacialis</i>	522
----------------------------------	-----

JOHN MURDOCH. Notes on some species of birds attributed to Point Barrow, Alaska.

The Auk, ii, pp. 200-201.

Based on collections and observations made by the author for the National Museum.

WILLARD NYE, JR. Notes upon octopus, flying-fish, &c., taken during the Albatross cruise in January, 1884.

Bull. U. S. Fish. Com., v, June 29, 1885, pp. 187-190.

* Bearing indirectly on Museum material.

RICHARD PEARCE. Certain interesting crystalline alloys.

Trans. Amer. Inst. Mining Engineers, xiii, pp. 738-742.

A description of the collection of gold-bismuth alloys presented by the author to the U. S. National Museum.

RICHARD RATHBUN. Report upon the Echini collected by the U. S. Fish Commission steamer Albatross, in the Caribbean Sea and Gulf of Mexico, January to May, 1884.

Proc. U. S. Nat. Mus., viii, May 20, 1885, pp. 83-89.

Twenty-three species are enumerated, with brief notes and lists of the stations at which they were taken. None of the species are new.

RICHARD RATHBUN. [The Crustaceans, Worms, Radiates, and Sponges of the United States.]

The Fisheries and Fishery Industries of the United States, I, Part V, pp. 763-850. Plates 260-277.

RICHARD RATHBUN. Report on the department of marine invertebrates, U. S. National Museum, 1883.

Report of the Smithsonian Institution for 1883 (1885), pp. 250-260. (Also in Report on National Museum, pp. 90-100, published as a separate.)

CHARLES RAU. Report on the department of antiquities, U. S. National Museum, 1883.

Report of the Smithsonian Institution for 1883 (1885), pp. 198-207. (Also in Report on National Museum, pp. 38-47, published as a separate.)

ROBERT RIDGWAY. Description of three supposed new honey-creepers from the Lesser Antilles, with a synopsis of the species of the genus *Certhiola*.

Proc. U. S. Nat. Mus., viii, April 20, 1885, pp. 25-30.

Certhiola finschi, from Dominica; *C. sundevalli*, from Guadeloupe, and *C. sancti-thomæ*, from St. Thomas.

ROBERT RIDGWAY. Description of a new race of the red-shouldered hawk from Florida.

Proc. U. S. Nat. Mus., vii, January 19, 1885, pp. 514-515.

ROBERT RIDGWAY. On two hitherto unnamed sparrows from the coast of California.

Proc. U. S. Nat. Mus., vii, January 19, 1885, pp. 516-518.

ROBERT RIDGWAY. On *Estrelata fisheri* and *Ce. defilippiana*.

Proc. U. S. Nat. Mus., viii, April 20, 1885, pp. 17-18.

ROBERT RIDGWAY. Description of a new species of *Contopus* from tropical America.

Proc. U. S. Nat. Mus., viii, April 20, 1885, p. 21.

Contopus pileatus; habitat unknown.

ROBERT RIDGWAY. Description of a new warbler from Yucatan.

Proc. U. S. Nat. Mus., viii, April 20, 1885, p. 23.

Granatellus sallæi boucardi.

ROBERT RIDGWAY. *Icterus cucullatus*, Swainson, and its geographical variations.

Proc. U. S. Nat. Mus., viii, April 20, 1885, pp. 18-19.

ROBERT RIDGWAY. Note on the *Anser leucopareius* of Brandt.

Proc. U. S. Nat. Mus., viii, April 20, 1885, pp. 21-22.

The Alaskan small goose usually identified with *Anser leucopareius*, Brandt, described as a new species, *Branta minima*, Ridgw.

ROBERT RIDGWAY. Description of two new birds from Costa Rica.

Proc. U. S. Nat. Mus., viii, April 20, 1885, pp. 23-24.

Cyanocorax cucullatus and *Vireolanus pulchellus verticalis*.

ROBERT RIDGWAY. On *Cathartes burrovianus*, Cassin, and *C. urubitinga*, Pelz.

Proc. U. S. Nat. Mus., viii, April 23, 1885, pp. 34-36.

The type of the former compared with one of the original specimens of the latter, and found to be specifically identical.

H. Mis. 15, pt. 2—11

ROBERT RIDGWAY. On *Onychotes gruberi*.

Proc. U. S. Nat. Mus., viii, April 23, 1885, pp. 36-38.

This bird, a standing puzzle to American ornithologists, having been originally described as from California, determined to be identical with *Buteo solitarius*, Peale, of the Sandwich Islands.

ROBERT RIDGWAY. Remarks on the type specimen of *Buteo oxypterus*, Cassin.

Proc. U. S. Nat. Mus., viii, April 23, 1885, pp. 75-77.

Determined to be identical with *B. swainsoni*, Bonap.

ROBERT RIDGWAY. Description of a new species of boat-billed heron from Central America.

Proc. U. S. Nat. Mus., viii, May 20, 1885, pp. 93-94.

Cancrona zeledoni.

ROBERT RIDGWAY. On the *Buteo harlani*, Aud., and *B. cooperi*, Cass.

The Auk, ii, pp. 165-166.

Further evidence presented tending to confirm the supposed specific identity of the two birds, first suggested by the author in a previous article.

ROBERT RIDGWAY. Description of a new hawk from Cozumel.

Proc. U. S. Nat. Mus., viii, May 20, 1885, pp. 94-95.

Rupornis gracilis.

ROBERT RIDGWAY. On *Peuca mexicana*, Lawr., a sparrow new to the United States.

Proc. U. S. Nat. Mus., viii, May 23, 1885, pp. 98-99.

Based on specimens obtained at Fort Brown, Texas, by Dr. J. C. Merrill, U. S. A.

ROBERT RIDGWAY. Note on *Psaltiriparus grindæ*, Belding.

Proc. Biol. Soc. Washington, ii (1884), 1885, p. 96.

ROBERT RIDGWAY. Remarks on the Californian vulture, *Pseudogryphus californianus*.

The Auk, ii, pp. 167-169.

Refers chiefly to dimensions, the measurements being given of six examples received (four of them in the flesh) at the National Museum.

ROBERT RIDGWAY. Note on *Sarcorhamphus aquatorialis*, Sharpe.

The Auk, ii, pp. 169, 170.

Proving this bird to be the young of the common condor, *S. griphus*.

ROBERT RIDGWAY. Descriptions of some new North American birds.

Proc. Biol. Soc. Washington, ii, 1885, pp. 89-94.

1. *Parus atricapillus turneri*. 2. *Psaltiriparus minimus californicus*. 3. *Colaptes mexicanus saturator*. 4. *Myiarchus mexicanus magister*. 5. *Myiarchus lawrencei olivascens*. 6. *Pediacetes phasianellus campestris*. 7. *Lophortyx californicus brunnescens*. 8. *Phalacrocorax dilophus albociliatus*. Types of all in the National Museum collection.

ROBERT RIDGWAY. Description of a new American kingfisher.

Proc. Biol. Soc. Washington, ii, 1885, pp. 95, 96.

Ceryle superciliosa stictoptera, Yucatan.

ROBERT RIDGWAY. Note on the generic name *Calodromas*.

Proc. Biol. Soc. Washington, ii, 1885, p. 97.

The name preoccupied in zoology (*Coleoptera*), and another therefore required. *Calopezus* proposed as a substitute.

ROBERT RIDGWAY. A review of the American crossbills (*Loxia*) of the *L. curvirostra* type.

Proc. Biol. Soc. Washington, ii, 1885, pp. 101-107.

Two new races described, viz, *L. curvirostra bendirei*, from Northern Rocky Mountains, etc., and *L. curvirostra japonica*, from Japan.

ROBERT RIDGWAY. Note on *Anas hyperboreus*, Pall., and *Anser albatus*, Cass.

Proc. Biol. Soc. Washington, ii, 1885, pp. 107, 108.

ROBERT RIDGWAY. Remarks on the type specimens of *Muscicapa fulvifrons*, Girard, and *Mitrephorus pallescens*, Cones.

Proc. Biol. Soc. Washington, ii, 1885, pp. 108-110.

ROBERT RIDGWAY. Note regarding the earliest name for *Carpodacus hemorrhous* (Wagler).

Proc. Biol. Soc. Washington, ii, 1885, pp. 110, 111.

ROBERT RIDGWAY. Report on the department of birds, U. S. National Museum, 1883.

Report of the Smithsonian Institution for 1883 (1885), p. 220-225. (Also in *Report on National Museum*, pp. 60-65, published as a separate.)

CHARLES V. RILEY. Report of the Entomologist, Charles V. Riley, M. A., Ph. D., for 1884.

Report of the Department of Agriculture (1884-'85), pp. 7+134+2+8 (with original pagination also), ten plates.

Separate, author's ed., of "Report of the Entomologist," by Entomologist of [U. S.] Department of Agriculture, 1884 (Rept. U. S. Commiss. Agric. for 1884-'85, pp. 285-418, pp. 1-2, pl. 1-10), with addition of t.-p. cover, t.-p. [p. 1], table of contents [p. 3-7], general index [p. 1-7], and plant index [p. 7-8]. [For analysis and list of contents, see record of the original work.]

CHARLES V. RILEY. Cabbage insects.

Report of the Entomologist Department of Agriculture (1884-'85), pp. 289-323, [5-39]; plates 2-4; plate 5, fig. 2; plate 7, fig. 4; plate 8, figs. 5, 6; plate 9, fig. 7.

Contains divisions and sub-chapters with the titles given below:—CABBAGE CUT-WORMS, pp. 289-290 [5-6].—The Dark-sided cut-worm. Larva of *Agrotis messoria* Harr., pp. 290-291 [6-7], pl. 2, fig. 6.—The Granulated cut-worm. Larva of *Agrotis annexa* Treitschke, pp. 291-292 [7-8], pl. 2, fig. 1.—The Shagreened cut-worm. Larva of *Agrotis malefida* Guen., pp. 292-293 [8-9], pl. 2, fig. 3.—The W-marked cut-worm. Larva of *Agrotis clandestina* Harr., pp. 293-294 [9-10], pl. 2, fig. 4.—The Greasy cut-worm. Larva of *Agrotis ypsilon* Rott., pp. 294-295 [10-11], pl. 2, fig. 2.—The Speckled cut-worm. Larva of *Mamestra subjuncta* G. & R., p. 296 [12], pl. 2, fig. 5.—The Glassy cut-worm. Larva of *Hadena devastatrix* Brace, pp. 296-297 [12-13], pl. 3, figs. 3-4.—The Variegated cut-worm. Larva of *Agrotis saucia* Treitschke, pp. 297-298 [13-14], pl. 3, figs. 1-2.—REMEDIES FOR CABBAGE CUT-WORMS, pp. 298-300 [14-16].—OTHER CABBAGE INSECTS.—The Imbricated snout-beetle. *Epicærus imbricatus* Say, pp. 300-301 [16-17], pl. 3, fig. 5.—The Wavy-striped flea-beetle. *Phyllotreta vittata* Fabricius, pp. 301-304 [17-20], pl. 3, fig. 6.—Zimmermann's flea-beetle. *Phyllotreta zimmermanni* Crotch., pp. 304-308 [20-24], pl. 4, fig. 1.—The Colorado cabbage flea-beetle. *Phyllotreta albionica* Le Conte, p. 308 [24], pl. 9, fig. 7.—The Colorado potato-beetle. *Doryphora decemlineata* Say, pp. 308-309 [24-25].—The Harlequin cabbage-bug. *Murgantia histrionica* Hahn, pp. 309-312 [25-28], pl. 4, fig. 2.—The Tarnished plant-bug. *Lygus lineolaris* Beauv., pp. 312-315 [28-31], pl. 4, fig. 3-4.—The False chinch-bug. *Nysius angustatus* Uhler, pp. 315-317 [31-33], pl. 5, fig. 2.—The Cabbage plant-louse. *Aphis brassicæ* Linn., pp. 317-319 [33-35], pl. 7, fig. 4.—The Cabbage anthomyia. *Anthomyia brassicæ* Bouché, pp. 319-321 [35-37], pl. 8, fig. 5.—The Cabbage oscinis. *Oscinis brassicæ* n. sp., p. 322 [38], pl. 8, fig. 5 [6].—The Rocky Mountain locust. *Caloptenus spretus* Uhler, p. 323 [39].—SUCCESSFUL INTRODUCTION OF A PARASITE OF THE IMPORTED CABBAGE-WORM, p. 323 [39].

CHARLES V. RILEY. Cabbage cut-worms.

Report of the Entomologist, Department of Agriculture 1884 (1885), pp. 289-290 [5-6].

General characters and habits, seasons, and places of oviposition of "cut-worms."

CHARLES V. RILEY. The Granulated cut-worm. Larva of *Agrotis annexa*, Treitschke.

Report of the Entomologist, Department of Agriculture, 1884 (1885), pp. 291-292 [7-8]; plate 2, fig. 1.

Habits, seasons, food-plants, ravages, and geographical distribution of *Agrotis annexa*; figures and general description of larva and imago, description of egg and detailed descriptions and figures of details of larva and pupa.

CHARLES V. RILEY. The Shagreened cut-worm. Larva of *Agrotis malefida*, Guen.

Report of the Entomologist, Department of Agriculture, 1884 (1885), pp. 292-293 [8-9]; plate 2, fig. 3.

Habits, food-plants, and geographical distribution of *Agrotis malefida*; distinctions between its larva and that of *A. annexa*; figures of larva and imago; detailed description of larva and pupa, and figure of details of larva.

CHARLES V. RILEY. The W-marked cut-worm. Larva of *Agrotis clandestina*, Harr.

Report of the Entomologist, Department of Agriculture, 1884 (1885), pp. 293-294 [9-10]; plate 2, fig. 4.

Habits, seasons, food-plants, and geographical distribution of *Agrotis clandestina*; figures and general description of larva and imago.

CHARLES V. RILEY. The Greasy cut-worm. Larva of *Agrotis ypsilon*, Rott.

Report of the Entomologist, Department of Agriculture, 1884 (1885), pp. 294-295 [10-11]; plate 2, fig. 2.

Habits, seasons, food-plants, ravages, enemies, geographical distribution, and synonymy of *Agrotis ypsilon*; figures and general description of larva and imago; description of eggs; figure of head of larva.

CHARLES V. RILEY. The Speckled cut-worm. Larva of *Mamestra subjuncta*, G. & R.

Report of the Entomologist, Department of Agriculture, 1884 (1885), p. 296 [12]; plate 2, fig. 5.

Habits, seasons, food-plant (cabbage), enemy (*Paniscus geminatus*), and geographical distribution of *Mamestra subjuncta*; general description of eggs, larva, and imago; figures of imago and of details of larva.

CHARLES V. RILEY. The Glassy cut-worm. Larva of *Hadena devastatrix*, Brace.

Report of the Entomologist, Department of Agriculture, 1884 (1885), pp. 296-297 [12-13]; plate 3, figs. 3-4.

Habits, seasons, and food-plants of *Hadena devastatrix*; figures and general description of larva and imago.

CHARLES V. RILEY. The Variegated cut-worm. Larva of *Agrotis saucia*, Treitschke.

Report of the Entomologist, Department of Agriculture, 1884 (1885), pp. 297-298 [13-14]; plate 3, figs. 1-2.

Habits, place of oviposition, seasons, food-plants, ravages, and geographical distribution of *Agrotis saucia*; figures and general description of eggs, larva, pupa, and imago.

CHARLES V. RILEY. The Dark-sided cut-worm. Larva of *Agrotis messoria*, Harr.

Report of the Entomologist, Department of Agriculture, 1884 (1885), pp. 290-291 [6-7]; plate 2, fig. 6.

Habits, ravages, and geographical distribution of *Agrotis messoria*; figures and general description of larva and imago; references to earlier and fuller descriptions.

CHARLES V. RILEY. Remedies for Cabbage cut-worms.

Report of the Entomologist, Department of Agriculture, 1884 (1885), pp. 298-300 [14-16].

Notice of means hitherto generally employed against "cut-worms," especially wrapping the stems of young plants with a leaf or with paper, trapping, ditching, and fall plowing; the use of poisoned baits found superior to other means.

CHARLES V. RILEY. The Imbricated snout-beetle, *Epicærus imbricatus*, Say.

Report of the Entomologist, Department of Agriculture, 1884 (1885), pp. 300-301 [16-17], plate 3, fig. 5.

Habits, food-plants, ravages, and geographical distribution of and means against *Epicærus imbricatus*; figures of imago; cabbage plants in Massachusetts injured by an *Otiiorhynchus*, which Packard determines as *O. picipes*, but Riley thinks likely to be either *O. sulcatus* or *O. ligneus*.

CHARLES V. RILEY. The Wavy-striped flea-beetle, *Phyllotreta vittata*, Fabricius.

Report of the Entomologist, Department of Agriculture, 1884 (1885), pp. 301-304 [17-20], plate 3, fig. 6.

Habits, food-plants, and ravages of and means against *Phyllotreta vittata*; food-habits of larva; figures and general description of larva and imago; general description of eggs, and detailed description of larva.

CHARLES V. RILEY. Zimmermann's flea-beetle, *Phyllotreta zimmermanni*, Crotch.

Report of the Entomologist, Department of Agriculture, 1884 (1885), pp. 304-308 [20-24]; plate 4, fig. 1.

Seasons, food-plants, and parasite of *Phyllotreta zimmermanni*; food-habits of larva; description of eggs; detailed descriptions of larva and pupa; figures of larva, pupa, and ♀ imago, of antenna of ♂ imago and of mouth-parts of larva; detailed comparative description of adolescent states and imagos of *Ph. zimmermanni* and *Ph. vittata*; distinctive characters of *Ph. bipustulata*; geographical distribution of the species of *Phyllotreta* in North America; food-plants of the genus in Europe; description of *Pleurotropis phyllotretæ* n. sp., parasitic on the larva of *Ph. zimmermanni*.

CHARLES V. RILEY. The Colorado cabbage flea-beetle *Phyllotreta albionica*, Le Conte.

Report of the Entomologist, Department of Agriculture, 1884 (1885), p. 308 [24]; plate 9, fig. 7. Seasons, food-plants, and habitat of *Phyllotreta albionica*; figure and general description of imago; *Ph. oregonensis* doubtless affects cabbage on the Pacific coast of United States.

CHARLES V. RILEY. The Colorado potato-beetle, *Doryphora decemlineata*, Say.

Report of the Entomologist, Department of Agriculture 1884 (1885) pp. 308-309 [24-25].

Extract, with introductory paragraph, from author's "The Colorado potato-beetle" (4th Ann. Rept. State Entom. Mo. [Apr.], 1872), pp. 10-11; food-plants of *Doryphora decemlineata*; acquisition of the habit of feeding on cabbage; this habit exceptional and not to be feared.

CHARLES V. RILEY. The Harlequin cabbage-bug, *Murgantia histrionica*, Hahn.

Report of the Entomologist, Department of Agriculture, 1884 (1885), pp. 309-312 [25-28]; plate 4, fig. 2.

Habits, seasons, food-plants, ravages, geographical distribution, and spread of and means against *Murgantia histrionica*; general description of eggs and young larvæ; figures of eggs, larva, pupa, and imago; extracts from author's "The harlequin cabbage bug" * * * (4th Ann. Rept. State Entom. Mo., 1872), pp. 35, 36; *Leptoglossus phyllopus* doubtfully considered an enemy of the *Murgantia*.

CHARLES V. RILEY. The Tarnished plant-bug, *Lygus lineolaris*, Beauv.

Report of the Entomologist, Department of Agriculture, 1884 (1885), pp. 312-315 [28-31]; plate 4, figs. 3-4.

Habits, seasons, food-plants, ravages, geographical distribution, and synonymy of and means against *Lygus lineolaris*; figures of various stages and of adult insect; variation in colors of imago; poisonous effect of its attacks on plants, especially on strawberry, with critical review of S. A. Forbes's opinions on this subject.

CHARLES V. RILEY. The False chinch-bug, *Nysius angustatus*, Uhler.

Report of the Entomologist, Department of Agriculture, 1884 (1885), pp. 315-317 [31-33]; plate 5, figure 2.

Habits, seasons, food-plants, ravages, and synonymy of and means against *Nysius angustatus*; general description of larva and pupa; figures of pupa and imago and of injured leaf of potato.

CHARLES V. RILEY. The Cabbage plant-louse, *Aphis brassicæ*, Linn.

Report of the Entomologist, Department of Agriculture, 1884 (1885), pp. 317-319 [33-35]; plate 7, fig. 4.

Habits, seasons, food-plants, enemies, and geographical distribution of and means against *Aphis brassicæ*; figures and general description of winged and wingless viviparous females; general description of young; male and oviparous female unknown.

CHARLES V. RILEY. The Cabbage anthomyia, *Anthomyia brassicæ*, Bouché.

Report of the Entomologist, Department of Agriculture, 1884 (1885), pp. 319-321 [35-37]; plate 8, fig. 5.

Habits, seasons, food-plants, ravages, and enemies of and means against *Anthomyia brassicæ*; references to other accounts of this insect; figures of larva, pupa, ♀ imago, head of ♂ imago, and antennæ of both sexes.

CHARLES V. RILEY. The Cabbage oöcinis, *Oöcinis brassicæ* n. sp.

Report of the Entomologist, Department of Agriculture, 1884 (1885), p. 322 [38]; plate 8, fig. 5 [6].

Figures and detailed descriptions of larva, puparium, and ♀ imago of *Oöcinis brassicæ* n. sp., the larva of which mines cabbage leaves in June; figures of details of the larva; description of the mine.

CHARLES V. RILEY. The Rocky Mountain locust, *Caloptenus spretus*, Uhler.

Report of the Entomologist, Department of Agriculture, 1884 (1885), p. 323 [39].

Cabbage is one of the food-plants of *Caloptenus spretus*, for full accounts of which insect reference is made to other reports.

CHARLES V. RILEY. Successful introduction of a parasite of the imported cabbage-worm.

Report of the Entomologist, Department of Agriculture, 1884 (1885), p. 323 [39].

Apanteles glomeratus, parasite on *Pieris rapæ* in Europe, imported and caused to breed at liberty in the vicinity of Washington, D. C.

CHARLES V. RILEY. General truths in applied entomology.

Report of the Entomologist, Department of Agriculture, 1884 (1885), pp. 323-330 [39-46].

Reprint of C. V. Riley's "General Truths in applied Entomology. Essay" (Trans. Georgia State Agric. Soc., 1884, pp. 153-159), *which see*; with omission of a few answers to questions following the address.

CHARLES V. RILEY. Kerosene emulsions.

Report of the Entomologist, Department of Agriculture, 1884 (1885), pp. 330-334 [46-50].

Importance and efficacy of kerosene emulsions as insecticides; formula for making an emulsion; ill effects of the use of mixtures containing kerosene or crude petroleum not perfectly emulsified; ill effects of the use of strong mixtures of lye in California, as recommended there by the State inspector of fruit pests.

CHARLES V. RILEY. Miscellaneous insects.

Report of the Entomologist, Department of Agriculture, 1884 (1885), pp. 334-358 [50-74]; plate 5, figure 1; plate 6, figures 2-3; plate 7, figures 2-3; plate 8, figures 1-4; plate 9, figures 1-4; plate 10.

Consists of sub-chapters with the titles given below.—The American cimbex, *Cimex americana*, Leach, p. 334-336 [50-52], pl. 5, fig. 1.—The Streaked cottonwood leaf-beetle, *Plagioderia scripta*, Fabr., p. 336-340 [52-56], pl. 8, fig. 1-2.—The Southern Buffalo-gnat, *Simulium* sp. p. 340-345 [56-61], pl. 9, fig. 1-3.—The Angoumois grain-moth, *Gelechia cerealella*, Oliv., p. 345-350 [61-66], pl. 6, fig. 2-3.—The Cottony maple scale, *Pulvinaria innumerabilis*, Rathvon, p. 350-355 [66-71], pl. 10, fig. 1-4.—The Cranberry fruit-worm, *Acrobasis vaccinii* n. sp. p. 355-357 [71-73], pl. 9, fig. 4.—The Larger wheat-straw isosoma, *Isosoma grande*, Riley, p. 357-358 [73-74], pl. 7, fig. 2-3; pl. 8, fig. 3-4.

CHARLES V. RILEY. The American Cimbex, *Cimex americana*, Leach.

Report of the Entomologist, Department of Agriculture, 1884 (1885), pp. 334-336 [50-52], plate 5, fig. 1.

Habits and ravages of and means against imagoes of *Cimex americana*, injurious to willow [*Salix*]; descriptions of eggs and of the blisters in leaves in which eggs are deposited; figures of egg, egg-blisters, newly-hatched and full-grown larvæ, cocoons, pupæ, female imago and her ovipositor, and injured willow twig; mention of *Galeruca decora* as the most numerous and most dangerous enemy of willow, and of *Colapsis tristis* as the next most abundant; general description of eggs and larvæ of the *Galeruca*, with remarks on the habits of both these latter species.

CHARLES V. RILEY. The Streaked cottonwood leaf-beetle, *Plagioderia scripta*, Fabr.

Report of the Entomologist, Department of Agriculture, 1884 (1885), pp. 336-340 [52-56]; plate 8, figures 1-2.

Habits, ravages, food-plants, and seasons of and means against *Plagioderia scripta*; figures and descriptions of eggs, of successive stages of larvæ, and of several varieties of imago; figure of pupa; remarks on the acquisition of new tastes for food by this species and by *Trypeta pomonella*; directions for the preparation and administration of London purple as an insecticide.

CHARLES V. RILEY. The Southern Buffalo-gnat, *Simulium* sp.

Report of the Entomologist, Department of Agriculture, 1884 (1885), pp. 340-345 [56-61]; plate 9, figures 1-3.

Ravages of the "Buffalo-gnat" in southwestern United States and of the "fly of Columbaez" in Hungary; summary of the main facts known about these and related species of *Simulium* and means against them, with references to the literature about *Simulium*.

CHARLES V. RILEY. The Angoumois Grain-moth, *Gelechia cerealella*, Oliv.

Report of the Entomologist, Department of Agriculture, 1884 (1885), pp. 345-350 [61-66], plate 6, figs. 2-3.

Civil history and geographical distribution, habits, oviposition, seasons, ravages, and parasites of and means against *Gelechia cerealella*; general description of egg, larva, and imago, and figures of these, of pupa, of details, and of injured grain and ear of corn; detailed description of egg.

CHARLES V. RILEY. The Cottony Maple-scale, *Pulvinaria innumerabilis*, Rathvon.

Report of the Entomologist, Department of Agriculture, 1884 (1885), pp. 350-355 [66-71]; plate 10, figs. 1-4.

Geographical distribution, civil history, synonymy, life-history, seasons, food-plant, habits, enemies and parasites of and means against *Pulvinaria innumerabilis*; influence of several agencies, especially birds and spiders, in the dissemination of coccidæ; figures of eggs, larva, male and female scale, and egg-masses.

CHARLES V. RILEY. The Cranberry Fruit-worm, *Acrobasis vaccinii* n. sp.

Report of the Entomologist, Department of Agriculture, 1884 (1885), pp. 355-357 [71-73]; plate 9, fig. 4.

Civil history, oviposition, habits, food-plants [*Vaccinium oxycoccus*], seasons and ravages of and means against *Acrobasis vaccinii* n. sp.; figures and detailed descriptions of eggs, larva, pupa, and imago; figure of cocoon; comparison of *A. vaccinii* with related species; criticism of A. R. Grote's views on the value of *Phycis* and on the synonymy of *Acrobasis* and of *A. juglandis*.

CHARLES V. RILEY. The Larger wheat-straw isosoma, *Isosoma grande*, Riley.

Report of the Entomologist, Department of Agriculture, 1884 (1885), pp. 357-358 [73-74]; plate 7 figs. 2-3; plate 8, figs. 3-4

Importance and convincing character of the proof that *Isosoma tritici* and *I. grande* are phytophagous; figures and descriptions of egg, larva, pupa, and female imago, and of methods of oviposition of this insect; *I. tritici* and *I. grande* probably not dimorphic forms of one species.

CHARLES V. RILEY. Silk-culture.

Report of the Entomologist, Department of Agriculture, 1884 (1885), pp. 359-361 [75-77].

Report of the establishment and doings of the silk division of the bureau of entomology of the U. S. Department of Agriculture in 1884; measures taken to secure the distribution of healthy eggs of mulberry silk-moths; importance of establishing a Government filature and a home market for cocoons; prospective value of the Serrel silk-reel; successful establishment of a private filature in New Orleans.

CHARLES V. RILEY. Notes of the year.

Report of the Entomologist, Department of Agriculture, 1884 (1885), pp. 403-418 [119-134].

Consists of sub-chapters with the titles given below, all cited under the name of C. V. Riley as author:—Chinch-bug notes, p. 403-405 [119-121].—Notes on the grape phylloxera, p. 405-409 [121-125].—Miscellaneous notes, p. 410-418 [126-134].

CHARLES V. RILEY. Chinch-bug notes.

Report of the Entomologist, Department of Agriculture, 1884 (1885), pp. 403-405 [119-121].

Statement and criticism of the views of J. A. Lintner in regard to the abundant and destructive occurrence of *Blissus leucopterus* in Saint Lawrence County, New York, in 1882 and 1883; this occurrence not regarded by author as an "invasion," nor an occasion for serious alarm; author's views confirmed by the events of 1884.

CHARLES V. RILEY. Notes on the Grape phylloxera.

Report of the Entomologist, Department of Agriculture, 1884 (1885), pp. 405-409 [121-125].

Brief recapitulation of the main facts known concerning *Phylloxera vastatrix*, which are of importance in determining to what extent international exchange of grape-vine and other cuttings and plants should be regulated by law; discussion and decision in regard to the responsibility resting upon private parties for the alleged introduction of *Phylloxera vastatrix* from one graperly into another.

CHARLES V. RILEY. Miscellaneous notes.

Report of the Entomologist, Department of Agriculture, 1884 (1885), pp. 410-418 [126-134].

Consists of sub-chapters bearing the following titles: The Box psylla found in the United States, p. 410 [126].—The dwarfing of oaks by *Mallodon melanopus*, Linn., p. 410-411 [126-127].—The Clover-seed midge, *Cecidomyia leguminicola*, Lintn., p. 411 [127].—The Potato stalk-weevil, *Trichobaris trinotatus*, Say, p. 411 [127].—The Red-humped prominent, *Oedemasia concinna*, Smith and Abbot, p. 411 [127].—The Varying anomala, *Anomala varians* Fabr., p. 412 [128].—White-lined morning-sphinx, *Deilephila lineata* Fabr., p. 412 [128].—The Apple-tree Tent-caterpillar, *Olisioecampa americana* (?) Harr., p. 412-413 [128-129].—Corn bill-bugs, *Sphenophorus robustus* Horn, and *S. sculptilis* Uhler., p. 413 [129].—A swarming mite, *Bryobia* sp., p. 413 [129].—New enemy to white roses, *Euphoria kernii* Hald., p. 413 [129].—A beetle injuring peach leaves, *Pristocelis ater* Bland., p. 413 [129].—VOYLE, J. Effect of cold on eggs of bark-lice, p. 413-414 [129-130].—Ravages of grain weevils in Florida, probably *Calandra oryzae*, p. 414 [130].—Fuller's rose-beetle, *Anomopactus fulleri*, Horn., p. 414 [130].—The Blood-sucking conorhinus, *Conorhinus sanguisuga*, Leconte, p. 414-415 [130-131].—JOHNSON, L. C. The catalpa sphinx, *Sphinx catalpae*, p. 415 [131].—Notes on cotton-worms, p. 415, 416 [131-132].—Pyrethrum, p. 416 [132].—MURTFELDT, M. E. Notes from Missouri, p. 416-418 [132-134].

CHARLES V. RILEY. The collection of insects in the National Museum.

Science, v, March, 1885, pp. 188-189.

Reply to criticisms in C. H. Fernald's "On the care of entomological museums," (*op. cit.*, Jan. 9, 1885, v, p. 25) of the provisions made for the care of entomological collections in the U. S. National Museum; these collections cared for by the Entomologist of the Department of Agriculture, and by his assistants when necessary, and provided for by annual appropriations of Congress.

CHARLES V. RILEY. A note from Prof. C. V. Riley.

Rural New-Yorker, xlv., March 14, 1885, p. 170.

Appreciation of value of *Rural New-Yorker*; need of reform in U. S. Department of Agriculture; "the little really important original research done in the Department should, I think, have all the more appreciation because of the difficulties and discouragements under which it is done."

CHARLES V. RILEY. Ants and Aphides.

Rural New-Yorker, xliv., March 14, 1885, p. 171.

Inquiry by J. McF., of Watertown, Wis., with answer of C. V. Riley; explanation of the relations of ants and aphides; no northern species of ants known to injure growing field crops; an injection of bi-sulphide of carbon or a strong kerosene emulsion recommended to rid the ground of ants.

CHARLES V. RILEY. Circular No. 9 [of *U. S. Department of Agriculture, Division of Entomology*], May 1, 1885, one page, fo., one figure.**CHARLES V. RILEY.** Rust of Orange.

Rural New-Yorker, xliv., May 16, 1885, p. 355.

Nature of Orange Rust defined; Rust Mites (*Phytoptus oleivorus*) and a rusted orange described and figured; habits of and means against the mites.

CHARLES V. RILEY. Destroying cicadas; Scurfy Apple bark-louse.

Rural New-Yorker, xliv, May 23, 1885, p. 353.

Answer to inquiries by J. A. K., of Warrenton, Va.; inefficacy of substances hitherto used to kill or repel *Cicada septendecim*; kerosene emulsion may prove effectual; the only known efficacious remedy is to catch and kill the insects; a dilute kerosene emulsion is the best wash to apply to kill *Chionaspis furfurus*.

CHARLES V. RILEY. Expected advent of the Periodical Cicada.

Scientific American, lii, May 23, 1885, p. 320.

Announcement of expected occurrence of a 13-year and a 17-year brood of *Cicada septendecim* in 1885; enumeration of regions in which these are expected to occur, respectively; chronology of the 17-year brood; verification of gradual development of these insects.

CHARLES V. RILEY. Cold-water remedy against cabbage-worms.

Scientific American, lii, May 23, 1885, p. 322.

Abstract of author's letter in the "*Rural New-Yorker*," making known Mr. C. H. Erwin's cold-water remedy against cabbage-worms.

CHARLES V. RILEY. Poisonous spider.

Rural New-Yorker, xliv, May 23, 1885, p. 354.

Communication from Dr. W. H. G., of Salt Lake City, Utah, criticising the statement of C. V. Riley's "that all true spiders are useful to man;" mention of a poisonous spider: reply, by C. V. Riley, that "no such poisonous spider is known to me, or to any other arachnologist whom I have questioned;" probability that the insect mentioned by Dr. G. is not a spider.

CHARLES V. RILEY. The Periodical or Seventeen-year Cicada.

Harper's Weekly, xxix., June 6, 1885, p. 363.

Remarks on the interest attaching to the occurrence of *Cicada septendecim*; reference to previous accounts of this insect by the author, with brief description of its habits, and figures of its structure and of twigs in which its eggs have been laid; map and enumeration of regions in which a 13-year and a 17-year brood respectively are expected to occur in 1885.

CHARLES V. RILEY. Rust of Orange.

Coleman's Rural World, xxxviii., June 18, 1885, p. 195.

Reprint of author's "Rust of Orange" (*Rural New-Yorker*, May 16, 1885, xliv, p. 355): definition of Orange rust; description and figures of the Rust Mite (*Phytoptus oleivorus*); habits of and means against the mites.

Abstract of a paper read before the Biological Society of Washington.

CHARLES V. RILEY. The winged pests of the west.

Globe-Democrat (Saint Louis, Mo.), June 1885.

Interview in which C. V. Riley expresses his opinion regarding the prospects of locust injury in the Mississippi Valley in 1885.

CHARLES V. RILEY. Notes on North American Psyllidæ.

Proc. Biol. Soc. Washington, ii, 1885, pp. 67-79.

CHARLES V. RILEY. Remarks on the Bag-Worm, *Thyridopteryx ephemeraeformis*.

Proc. Biol. Soc. Washington, ii, 1885, pp. 80-83.

CHARLES V. RILEY. Department of Insects, U. S. National Museum, 1883.

Report of the Smithsonian Institution for 1883 (1885): pp. 239-244. (Also in *Report on National Museum*, pp. 79-84, published as a separate.)

- JOHN A. RYDER. Note on the male organs of the eel.
Bull. U. S. Fish Com., v, Jan. 19, 1885, pp. 1-3.

- SIDNEY I. SMITH. Description of a new crustacean allied to *Homarus* and *Nephrops*.
Proc. U. S. Nat. Mus. viii, June 1, 1885, pp. 167-170.
This form, which is new both generically and specifically, has been named *Eunephrops Bairdii*. It was taken by the U. S. Fish Commission steamer Albatross in the Gulf of Darien, Caribbean Sea, in 1884, at a depth of 155 fathoms. But a single specimen, a female, was obtained.
- SIDNEY I. SMITH. On some genera and species of *Penaidæ*, mostly from recent dredgings of the United States Fish Commission.
Proc. U. S. Nat. Mus., viii, June 1, 1885, pp. 170-190.
The following genera are defined:
- | | Page. |
|---|-------|
| <i>Penæus</i> Fabr. (restricted) | 170 |
| <i>Parapenæus</i> , gen. nov. | 170 |
| <i>Hymenopenæus</i> Smith | 179 |
| <i>Solenocera</i> Lucas | 185 |
| <i>Xiphopenæus</i> Smith | 188 |
| And the following new species are described: | |
| <i>Parapenæus megalops</i> | 172 |
| <i>Parapenæus Goodei</i> | 176 |
| <i>Hymenopenæus robustus</i> | 180 |
| <i>Hymenopenæus modestus</i> | 183 |
| Many additional species, of older date, are described at some length. | |
- SIDNEY I. SMITH. On some new or little known decapod crustacea, from recent Fish Commission dredgings off the east coast of the United States.
Proc. U. S. Nat. Mus., vii, 1884 (1885), pp. 493-511.
Two new genera are described, viz:
- | | Page. |
|--|-------|
| <i>Ephyrina</i> | 506 |
| <i>Benthonectes</i> | 509 |
| And the following new species: | |
| <i>Munidopsis crassa</i> | 494 |
| " <i>similis</i> | 496 |
| <i>Bythocaris gracilis</i> | 497 |
| " <i>nana</i> | 499 |
| <i>Acanthephyra microphthalmus</i> | 502 |
| " <i>brevirostris</i> | 504 |
| <i>Ephyrina benedicti</i> | 506 |
| <i>Benthonectes filipes</i> | 509 |

- LUCIEN M. TURNER, *U. S. Signal Service*. Notes on the birds of the Nearer Islands, Alaska.
The Auk, ii, pp. 154-159.
 An annotated list of 66 species, based chiefly on a collection made by the author for the National Museum.
- ADDISON E. VERRILL. Notice of the remarkable marine fauna occupying the outer banks off the southern coast of New England, No. 11, by A. E. Verrill. Brief contributions to zoology from the museum of Yale College, No. lviii.
Am. Jour. Sci. and Arts, xxix, February, 1885, pp. 149-157.
 General account of the zoological results of the explorations of the steamer *Albatross* off the southern coast of New England during the summer of 1884, with a list of the dredging stations. The marine invertebrates only are discussed, and the following new genera and species are described in foot-notes:

ANTHOZOA.

	Page.
<i>Benthoptillum</i> , gen. nov.	149
" <i>sertum</i> , sp. nov.	149
<i>Desmophyllum nobile</i> , sp. nov.	150

ASTERIOIDEA.

<i>Hymenaster modestus</i> , sp. nov.	151
<i>Archaster sepius</i> , sp. nov.	151
<i>Solaster abyssicola</i> , sp. nov.	152

OPHIUROIDEA.

<i>Ophiacantha crassidens</i> , sp. nov.	152
" <i>enopla</i> , sp. nov.	153
" <i>granulifera</i> , sp. nov.	153
" <i>aculeata</i> , sp. nov.	153
<i>Ophiomitra spinea</i> , sp. nov.	153

ADDISON E. VERRILL. Third catalogue of mollusca recently added to the fauna of the New England coast and the adjacent parts of the Atlantic, consisting mostly of deep-sea species with notes on others previously recorded.

Trans. Conn. Acad. Sci., vi, April, June, 1885, pp. 395-452, pl. xlii-xlix.

CHARLES D. WALCOTT. Note on some Paleozoic Pteropods.

Amer. Jour. Sci., xxx, art. ii, July, 1885, pp. 17-21.

CHARLES D. WALCOTT. On the Cambrian faunas of North America.

Bull. U. S. Geol. Survey, No. 10, 1884 (1885), pp. 1-55. Ten plates.

The collection on which Bulletin 10 of the Geological Survey is based belongs to the museum of Cornell University, but arrangements have been made to obtain a duplicate collection from the university.

The principal study has been that of the Middle Cambrian faunas. Over eighty species have been identified and illustrated, and the work will be continued until all the known species have been examined. The result will appear as a "Second Study on the Faunas of North America" some time during the year 1886.

CHARLES D. WALCOTT. Paleozoic notes. List of species from the St. John Group, and new genus *Brachiopoda*, *Linnarssonina*.

Amer. Jour. Sci., xxix, pp. 114-117.

CHARLES D. WALCOTT. Paleozoic notes; new genus of Cambrian trilobites, *Mesonacis*.

Amer. Jour. Sci., 3rd series, xxix, pp. 328-330. Two figures.

CHARLES D. WALCOTT. Report on the department of invertebrate fossils (paleozoic), U. S. National Museum, 1883.

Report of the Smithsonian Institution for 1883 (1885), pp. 261-263. (Also in Report on National Museum, pp. 101-103, published as a separate.)

LESTER F. WARD. List of all plants added to the flora of Washington and vicinity from April 1, 1882, to April 1, 1884.

Proc. Biol. Soc. Washington, ii, 1885, pp. 84-87.

This is a continuation of the general catalogue as published in Bulletin 22, U. S. National Museum, and conforms in arrangement, type, &c., as nearly as possible with that publication.

Extras printed April 10, 1884.

LESTER F. WARD. Report on the department of fossil plants, U. S. National Museum, 1883.

Report of the Smithsonian Institution for 1883 (1885), p. 263. (Also in Report on National Museum, pp. 27-28, published as a separate.)

CHARLES A. WHITE. Certain phases in the geological history of the North American continent, biologically considered.

Proc. Biol. Soc., Washington, ii, 1885, pp. 41-66.

CHARLES A. WHITE. Report on the department of invertebrate fossils (meso-cenozoic), U. S. National Museum, 1883.

Report of the Smithsonian Institution for 1883 (1885), pp. 260-261. (Also in Report on National Museum, pp. 100, 101, published as a separate.)

H. C. YARROW. Report on the department of reptiles, U. S. National Museum, 1883.

Report of the Smithsonian Institution for 1883 (1885), pp. 225-228. (Also in Report on National Museum, pp. 65-68, published as a separate.)

W. S. YEATES. Accessions to the department of minerals, U. S. National Museum, 1883.

Report of the Smithsonian Institution for 1883 (1885), pp. 266-268. (Also in Report on National Museum, 106-108, published as a separate.)

JOSÉ C. ZELEDON. Catalogue of the birds of Costa Rica, indicating those species of which the United States National Museum possesses specimens from that country.

Proc. U. S. Nat. Mus., viii, May 23, 1885, pp. 104-118.

A very carefully prepared and accurate list, enumerating 692 species, of which 522 are represented in the National Museum by Costa Rican specimens.

ANON. The last cruise of the steamer Albatross in the Gulf of Mexico.

Science, v, No. 113, 1885, pp. 275, 276.

Abstract of a report by Lieutenant-Commander Z. L. Tanner, U. S. N., commanding the U. S. Fish Commission steamer Albatross, respecting the first part of the cruise of that steamer, which began January 3 and terminated early in April, 1885.

ANON. The Island of Cozumel.

Science, v, No. 114, 1885, pp. 290-292.

An account of some of the principal features of the island, abstracted from a report of Mr. N. B. Miller, yeoman and photographer of the steamer Albatross, to Professor Baird, U. S. Fish Commissioner.

ANON. The United States at the Fisheries Exhibition.

Science, v, No. 118, 1885, p. 386.

Brief review of Bull. 27, U. S. Nat. Mus.

PART IV.

LIST OF ACCESSIONS TO THE U. S. NATIONAL MUSEUM DURING
THE FIRST HALF OF 1885, TOGETHER WITH DESCRIPTIVE
NOTES AND INDICES.

INTRODUCTORY NOTE.

The following order has been observed in the description of each object or group of objects mentioned in the List of Accessions:

- (1) Name of specimen or of the class to which related.
- (2) Description of specimen, with locality whence obtained.
- (3) Name of sender, with address.
- (4) Current accession number in Museum register.
- (5) Calendar year in which the specimen was received.
- (6) Number of the department to which the accession has been assigned, these numbers corresponding with those given in the classification of the scientific departments on pages 8 and 9.

LIST OF ACCESSIONS.*

MOLLUSKS. Two specimens each of *Chlamydoconcha Orcuttii* and *Teredo bipartita*, in alcohol, from San Diego Bay.

C. R. ORCUTT, San Diego, Cal. 15551. '85. (IX)

MOLLUSKS, *Mya arenaria*, from Connecticut.

J. WILLIAMS, Stonington, Conn. 15552. '85. (IX)

BOTTLE-NOSED DOLPHIN, *Tursiops tursio*. A skull from Pensacola, Fla.

SILAS STEARNS, Pensacola, Fla. 15553. '85. (IV)

KYAK and equipment, consisting of a great harpoon, staff and line, throwing-stick, boat-hook, fish-prong, and double paddle, from Fort Chimo, Ungava Bay, H. B. T.

LUCIEN M. TURNER, U. S. Signal Service. 15554. '85. (II)

MEXICAN HAIRLESS DOG, *Canis familiaris*, in the flesh.

WILLIAM J. RHEES, Smithsonian Institution. 15555. '85. (IV)

RAINBOW TROUT, *Salmo gairdneri*, ♀. Fresh specimen from a pond owned by the Southside Club, Long Island.

SOUTHSIDE CLUB, Long Island. 15556. '85. (VII)

JADE BRACELET, from China. Cut and polished. Diameter, 7^{cm}. Purchased.

Through Commander C. F. GOODRICH, Ordnance Office, Washington Navy-Yard. 15557. '85. (XIV)

ROCKS containing pyrites. For examination. Returned.

NOAH BOWLUS, Frederick City, Md. 15558. '85. (XIV)

CETACEAN. *Kogia breviceps*, ♂, in the flesh. From coast of North Carolina.

I. I. HOBBS, keeper life-saving station, Kitty Hawk, N. C. 15560. '85. (IV)

INDIAN INDUSTRIAL WORK. Seven boxes. General collection, showing the proficiency in work of the Indians at the Carlisle Training School, Pennsylvania. Returned.

Capt. R. H. PRATT, Superintendent of Schools. 15561. '85. (II)

YELLOW OCHRE, from Colorado.

E. C. BRADSTREET, Gold Hill, Colo. 15562. '85. (XIV)

BAG-WORM, *Thyridopteryx*, sp. and cases, from Texas.

L. R. TUTTLE, Washington, D. C. 15563. '85. (X)

BLACKFISH, *Globiocephalus melas*, juv. Specimen in the flesh.

J. G. FISHER, Provincetown, Mass. 15564. '85. (IV)

SHELLS AND CORALS. Mainly dried specimens of Gorgonian and Actinian corals, millipores, and mollusks. The alcoholics consist of star-fishes, sea-urchins, holothurians, ophiurans, crabs, and shrimps. Florida.

HENRY HEMPHILL, Key West, Fla. 15565. '85. (IX)

*When the locality of an accession is the same as the address of the sender, no mention of locality is made in connection with the description of the accession.

CORALS, ECHINODERMS, AND CRUSTACEA (dry, and alcoholic).

HENRY HEMPHILL, Key West, Fla. 15565. '85. (XI)

TARQUÁ PLANT. Specimens of leaf, bark, fruit, and juice, from Costa Rica.

FREDERICK STEARNS, Detroit, Mich. 15566. '85. (I)

DANALITE, with cryophyllite and Amazon stone in granite. Four specimens.

T. T. BOUVÉ, Boston, Mass. 15567. '85. (XIV)

GAHNITE IN CHALCOPYRITE, from Rowe, Mass.

ARNOLD G. DANA, New Haven, Conn. 15568. '85. (XIV)

MINERALS. A collection of 15 specimens, consisting of aragonite, calcite, calamine, and wulfenite, from Eureka Consolidated Mines, Eureka County, Nevada.

J. S. CURTIN, U. S. Geological Survey. 15569. '85. (XIV)

SPODUMENE (crystal). A large specimen from Blanchville, Conn.

Prof. S. J. BRUSH, New Haven, Conn. 15570. '85. (XIV)

COLUMBITE (crystal). From Andrews's feldspar quarry. Purchased.

G. H. ANDREWS, Glastonbury, Conn. 15571. '85. (XIV)

CANCRINITE IN ELEOLITE-SYENITE AND SODALITE, from Litchfield, Me.

T. F. LAMB, Portland, Me. 15572. '85. (XIV)

WEAVER BIRDS' NEST.

Rev. C. H. A. DALL, Calcutta, India. 15573. '85. (V, A)

SHELLS, *Helix* sp. and *Cyclostoma* sp. Three specimens from Daryiling, foot-hills of the Himalaya Mountains.

Rev. C. H. A. DALL, Calcutta, India. 15573. '85. (IX)

LEPIDOPTERA and *Coleoptera*, from Sikkim, East India.

Rev. C. H. A. DALL, Calcutta, India. 15573. '85. (X)

JEWELRY,* Table-mats, prayer-wheels, fans, and fly-brushes, from Calcutta, India.

Rev. C. H. A. DALL, Calcutta, India. 15573. '85. (II)

BIRD SKINS. Sixteen specimens from Ecuador, Guatemala, and Panama.

JOSÉ C. ZELEDON, San José, Costa Rica. 15574. '85. (V, A)

CINCHONA BARK. Two packages.

JOSÉ C. ZELEDON, San José, Costa Rica. 15574. '85. (I)

MAMMALS. Two Skins, *Didelphys quica* and *Felis onca* (black).

JOSÉ C. ZELEDON, San José, Costa Rica. 15574. '85. (IV)

FILANZANA, a carrying-chair used in Madagascar. Lieut. Mason A. Shufeldt crossed the island in this chair. (Distance, 1,080 miles. Time, 6 months.)

Lieut. MASON A. SHUFELDT, U. S. N. 15575. '85. (I)

FISHES (in alcohol). One hundred and twenty specimens, from Fort Chimo, Ungava Bay, H. B. T.

L. M. TURNER, U. S. Signal Service. 15576. '85. (VII)

REINDEER, *Rangifer tarandus*. Heads, crania, sterna, and fetus, from Fort Chimo, Ungava Bay, H. B. T.

L. M. TURNER, U. S. Signal Service. 15576. '85. (IV)

FISHES, *Mallotus villosus*, *Gasterosteus pungitius*, *G. biaculeatus*, *Coregonus quadrialateralis*, and *Uranidea richardsoni*, &c., from Fort Chimo, Ungava Bay, H. B. T.

L. M. TURNER, U. S. Signal Service. 15576. '85. (VII)

BIRDS. Seventy-eight specimens in alcohol, from Ungava Bay.

L. M. TURNER, U. S. Signal Service. 15576. '85. (V, A)

* See Part II, p. 67.

- PIIRYNOSOMA.** Four specimens from Fort Chimo.
L. M. TURNER, U. S. Signal Service. 15576. '85. (VI)
- LIMONITE** and conglomerate limestone, from Virginia.
Hon. N. GOFF, Jr., United States House of Representatives. 15577. '85.
(XIV)
- GOLDEN SHINER OR BREAM**, *Notemigonus chryssoleucus*. Fresh specimen.
F. A. HUTTY, Grand Haven, Mich. 15578. '85. (VII)
- FOSSIL GASTROPOD**, *Pleurotomaria tabulata*, Hall; from Rochester Colliery, Du Bois, Pa. Found in drift about 300 feet under ground.
C. L. BARRETT, Clearfield, Pa. 15579. '85. (XII, A)
- MINERAL WATER**, from Springfield Farm, Maryland.
JAMES H. HALLOWELL (through Hon. L. E. McCOMAS), Hagerstown, Md. 15580. '85. (XV)
- POUCHED RAT**, *Geomys tuza* (local name, "Salamander"). Living specimens.
GEORGE C. RIXFORD, Rixford, Fla. 15581. '85. (IV)
- MOSAIC PICTURE.** Roman? Returned.
JOHN A. MILLIGAN, Portsmouth, Va. 15582. '85. (I)
- NATIVE SILK COCOONS AND REELED SILK.** Showing the cocoons raised in North Carolina and the quality of silk raised therefrom.
VIRION DES LANRIERS, New York, N. Y. 15583. '85. (I)
- BIRDS.** About 100 mounted specimens transmitted for determination. Returned.
AMERICAN MUSEUM OF NATURAL HISTORY, New York. 15584. '85. (V, A.)
- FISHES**, from San Francisco, Cal.; Key West, Fla.; Pensacola, Fla.; and San Cristobal Bay, Lower California; including *Clupea sapidissima* (spent ♂) 2 feet long, San Francisco; *Narcine umbrosa* (type), *Acanthocybium solandri*, *Anthias vivanus* (type), *Prionotus stearnsi* (type), *Prionotus ophryas* (type), *Pomacentrus caudalis*, *Rupiscartes atlanticus*, *Labrosomus xanti*, *Gobiesox rhessodon*.
DAVID S. JORDAN, Bloomington, Ind. 15585. '85. (VII)
- CHALCEDONY** on Basalt, from Tunitcha Plateau, Arizona.
F. S. DELLENBAUGH, New York, N. Y. (through Ensign O. G. DODGE, U. S. N.) 15586. '85. (XIV)
- MINERALS.** Eighty-one specimens from Virginia and District of Columbia.
ERNEST HOWARD, U. S. Geological Survey. 15587. '85. (XIV)
- GOLDEN-CRESTED KINGLET**, *Regulus satrapa* (skin), from Lookout Mountain, Tenn.
W. H. FOX, Washington, D. C. 15588. '85. (V, A)
- PORTRAIT OF GENERAL JACKSON.** Supposed to have been painted by Earle. Deposited.
E. R. MCKEAN (care of G. L. McKean, Washington, D. C.). 15589. '85. (I)
- PROUSTITE**, argentite, and calcite (crystals); also native silver in quartz and calcite rock; from Batopilas mine, Mexico. Exchanged for a Pueblo pot.
Miss MASON; 15590. '85. (XIV)
- DEEP-SEA SOUNDING APPARATUS.** Thirty-three pieces.
U. S. FISH COMMISSION. 15591. '85. (I)
- METALLURGICAL CHARTS.** (1) Statistical chart of the work accomplished by the Pennsylvania Diamond Drill Company; (2) a chart of coal measures of the Philadelphia and Reading Coal and Iron Company, with section as cut by the Diamond drill.
PENNSYLVANIA DIAMOND DRILL COMPANY, Pottsville. 15592. '85. (XVI)

BIRD SKINS, one hundred and eight specimens, 37 species.

Dr. B. H. WARREN, West Chester, Pa. 15593. '85. (V, A)

COAL. Samples from Texas.

THOMAS FORSTER, Hoxie, Palo Pinto County, Tex. 15594. '85. (XIV)

INSECTS AND COMB. Two specimens found destroying the comb.

Dr. DANIEL BERRY, Carmi, Ill. 15595. '85. (X)

FOSSILS, from Minnesota.

W. A. FINKELNBURG, Winona, Minn. 15596. '85. (XII, A)

PORTFOLIO of Photographic Illustrations. "Les Habitants de Surinam." One volume.

Prince ROLAND BONAPARTE, Paris, France. 15597. '85. (II)

FOSSIL WOOD. Specimen found in the new reservoir shaft, near the Howard University, Washington, D. C.

HENRY P. GRAVES, Washington, D. C. 15598. '85. (XIII, A)

AMERICAN WOODS. Polished sections.

R. B. HOUGH, Lowville, N. Y. 15599. '85. (XIII, B)

METEORITES (stone and iron). From Wachita County, Texas, Tazewell, Tenn., and Iowa County, Iowa.

Prof. C. W. SHEPARD, Charleston, S. C. For exchange. 15600. '85. (XIV)

SODA-LIME BORATE (hydrous).

B. A. HAMILTON, Ivanpah, San Bernardino County, Cal. 15601. '85. (XIV)

PRONG-HORNED ANTELOPE, *Antilocapra americana*. Eight skins from Arizona.

E. W. NELSON, Springerville, Ariz. 15602. '85. (IV)

ORES. A collection to illustrate the smelting of the oxidized copper ores of Bisbee, Ariz., including some very beautiful specimens of cuprite, malachite, and azurite.

COPPER QUEEN MINING COMPANY, Bisbee, Ariz. 15603. '85. (XVI)

MINERALS. One hundred and forty specimens from Madagascar, including amazon stone (1); native copper, cuprite, and malachite (1); corundum crystal (1); amethyst (1); wax opal (1); amazon stone containing garnet and pyrite (1); menaccanite (1); rutile (1); garnet (1); grains of gold; cornelian agate (1); lazulite (1); black tourmaline (1); quartz pebbles and fragments.

Lieut. M. A. SHUFELDT, U. S. N. 15604. '85. (XIV)

RECENT PLANTS, from Madagascar.

Lieut. M. A. SHUFELDT, U. S. N. 15604. '85. (XIII, B)

COTTON. Samples from Madagascar.

Lieut. M. A. SHUFELDT, U. S. N. 15604. '85. (I)

ETHNOGRAPHICAL OBJECTS, from Madagascar.

Lieut. M. A. SHUFELDT, U. S. N. 15604. '85. (II)

LIVE PECCARY, *Dicotyles torquatus*, from Texas.

Dr. J. S. BILLINGS, Army Medical Museum, Washington. 15605. '85. (IV)

OWL, Doves (2), sparrow, fly-catcher, and warbler, from Mexico.

ALFRED DUGÈS, Guanajuato, Mexico. 15606. '85. (V, A.)

LAND SHELLS, *Bulimus alternatus*, Say, from Rio Verde, Oaxaca, Mexico. Three specimens for determination.

ALFRED DUGÈS, Guanajuato, Mexico. 15606. '85. (IX)

TINEID MOTH, *Tischeria heliopsisella*, Chamb.

ALFRED DUGÈS, Guanajuato, Mexico. 15606. '85. (X)

DAPHNIA AND CYPRIO.

ALFRED DUGÈS, Guanajuato, Mexico. 15606. '85. (XI)

MERCURY, from Cedar Grove Plantation, Louisiana.

FRED P. DEWEY, U. S. National Museum. 15607. '85. (XVI)

ILLUSTRATIONS OF HORSES. "Old Henry Clay," "Harry Clay," "Nellie Clay," "Jack Shepard," and "Red Bird."

R. HUNTINGTON, Rochester, N. Y. 15608. '85. (IV)

HEN EGG (double).

H. C. POWELL. 15609. '85. (V, B)

FOSSILS. Sixteen specimens from Lower Silurian Drift; 2 specimens from Lower Magnesian; 13 specimens from Upper Potsdam.

E. C. PERKINS, Prairie du Sac, Wis. 15610. '85. (XII, A)

CHALCOPYRITE and Magnetite (crystals).

W. C. ROBINSON, Baltimore, Md. 15611. '85. (XVI)

STONE IMPLEMENTS. A cast of a perforated tablet of peculiar shape. The original, made of a compact black slate, was found near Fort Ancient, Warren County. Returned.

WARREN K. MOORHEAD, Granville, Ohio. 15612. '85. (III)

MOUND-BUILDER'S CLOTH.

WARREN K. MOORHEAD, Granville, Ohio. 15612. '85. (III)

SHELLS (fossil and recent), *Glandina* and *Bulimus* sp. Three specimens.

THOMAS T. MUMFORD, Uniontown, Perry County, Ala. 15613. '85. (IX)

GUASA, JEW-FISH, *Promicrops itaiara* (Licht.), closely related to *Epinephelus*. Fresh specimen from the coast of Florida.

E. G. BLACKFORD, Fulton Market, New York. 15614. '85. (VII)

BABOON, *Cynocephalus babouin*, in the flesh.

BARNUM, BAILEY & HUTCHINSON, Bridgeport, Conn. 15615. '85. (IV)

BIRD SKINS. Sixteen specimens, seven species, namely: Mountain Chickadee, *Parus montanus*; Raven, *Corvus carnivorous*; Common Crow, *Corvus americanus*; Long-crested Jay, *Cyanocitta macrolopha*; Piñon Jay, *Cyanocitta cyanocephala*; Wood-house's Jay, *Aphelocoma woodhousei*; Lead-colored Tit, *Psaltiriparus plumbeus*.

E. W. NELSON, Springerville, Ariz. 15617. '85. (V, A.)

MAMMAL SKINS, including *Cervus macrotis*, *Canis latrans*, *Castor fiber*, *Lepus campestris*, *Lepus sylvaticus arizonæ*, and *Neotoma cinerea*.

E. W. NELSON, Springerville, Ariz. 15617. '85. (IV)

LIZARDS. Three living specimens from vicinity of New Orleans, La.

GEORGE P. MERRILL, U. S. National Museum. 15618. '85. (VI)

CORAL (Cyathophylloid). Probably of the genus *Amplexus*. Cast of the interior.

E. H. RANDLE, Lauderdale Institute, Ripley, Tenn. 15619. '85. (IX)

STONE IMPLEMENTS. One large muller or rubbing-stone, probably not aboriginal; fragments of flint, and one scraper from aboriginal workshop.

J. L. KITE, Damascus, Ohio. 15620. '85. (III)

STONE IMPLEMENTS, from Pennsylvania. Returned.

G. M. BARNETT, Northumberland, Pa. 15621. '85. (III)

JICARA, from Chinandega, near the port of Realejo, Nicaragua.

JOSEPH LIBBEY, Washington, D. C. 15622. '85. (II)

CINCHONA BARK, from Guatemala, Central America.

W. I. FORSYTH, Guatemala, Central America. 15623. '85. (I)

RABBIT NET.

A. L. SILER, Ranch, Kane County, Utah. 15624. '85. (II)

FEATHER ROPE.

A. L. SILER, Ranch, Kane County, Utah. 15624. '85. (II)

BARK CANOE, Indian manufacture.

HORATIO HALE, Clinton, Ontario, Canada. 15625. '85. (II)

VICUNIA WOOL, from Peru.

GEORGE W. BOND, Boston, Mass. 15626. '85. (I)

WHISTLING SWANS, *Olor columbianus*, three specimens in the flesh.

WILLIAM SOHIER, Swan's Island, North Carolina. 15627. '85. (V, A)

QUARTZ CRYSTALS (on quartzite) 2, from Mexico.

W. S. GEORGE, Saint Louis, Mo. 15628. '85. (XIV)

IRON ORE (clayey), from Missouri.

JOSEPH G. CLARKSON, Arcadia, Mo. 15629. '85. (XIV)

LIMONITE, pseudomorph after pyrite, halloysite impregnated with hematite, cuprite, melaconite, chrysocolla, native copper, native silver, cerargyrite, and quartz, from Arizona.

C. D. WALCOTT, U. S. Geological Survey. 15630. '85. (XIV)

STONE IMPLEMENT. A very fine polished celt, 13½ inches long.

E. B. JOHNSON, Eufaula, Ala. 15631. '85. (III)

AFRICAN OSTRICH, *Struthio camelus*, in the flesh.

W. A. CONKLIN, superintendent Central Park Menagerie, New York. 15632. '85. (VIII)

SCULPTURED FOOT TRACK. The original was cut from the rock *in situ* near Colorado Springs.

HORACE BEACH, Prairie du Chien, Wis. 15633. '85. (III)

CRUDE PETROLEUM.

E. B. PRICE, Amargo, N. Mex. 15634. '85. (XVI)

STONE IMPLEMENTS.

JAMES D. HOUSTON, Hot Springs, Ark. 15635. '85. (III)

CRYSTALS. Sent for examination and returned.

JAMES D. HOUSTON, Hot Springs, Ark. 15635. '85. (XIV)

KAOLIN.

G. W. WATKINS, Moriah, Essex County, N. Y. 15636. '85. (XIV)

SILICATE OF ALUMINA, iron, lime, and magnesia.

L. W. JOHNSTON, Phoenix, Ariz. 15637. '85. (XVI)

STONE IMPLEMENTS. Twenty-five specimens of leaf-shaped implements from Kentucky, including scraper, flake, arrow and spear-heads, pestle, celts, and grooved axes, from fields and rock shelters near Panther Creek, Hancock County. Exchanged for publications.

J. B. VICKERS, Lyonia, Hancock County, Ky. 15638. '85. (III)

BIRD SKINS. Two hundred and twenty-six specimens, 96 species, chiefly from the Palearctic Region. A very valuable collection embracing several conspicuous species new to the collection, besides others of great importance for purposes of comparison, including Cassin's Bullfinch, *Pyrrhula cassini*, Siberia Turnstone, *Arenaria interpres*, *Tringa subarquata*, Spoonbill Sandpiper, *Eurynorhynchus pygmaeus*, Japan, *Puffinus leucomelas*, and *Anser ruficollis*.

HENRY SEEBOHM, London, England. 15639. '85. (V, A.)

- SNIELLS.** Collected by Dr. John Gibson, U. S. N.
 Mrs. E. J. SEARS, Mount Carmel, Ill. 15640. '85. (IX)
- FAN CORAL (GORGONIAN) and Sea-Urchin.** Probably from Florida or West Indies; also small fragments of coral. Collected by Dr. John Gibson, U. S. N.
 Mrs. E. J. SEARS, Mount Carmel, Ill. 15640. '85. (XI)
- ROCKS.** Collected by Dr. John Gibson, U. S. N.
 Mrs. E. J. SEARS, Mount Carmel, Ill. 15640. '85. (XV)
- PLANTS AND SEEDS,** collected by Dr. John Gibson, U. S. N.
 Mrs. E. J. SEARS, Mount Carmel, Ill. 15640. '85. (XIII, A)
- JAWBONE OF SHARK, and two tusks of Walrus, *Rosmarus*.** Collected by Dr. John Gibson, U. S. N.
 Mrs. E. J. SEARS, Mount Carmel, Ill. 15640. '85. (XII)
- TURTLE-SHELLS *Pseudemys elegans* (?)**. Collected by Dr. John Gibson, U. S. N.
 Mrs. E. J. SEARS, Mount Carmel, Ill. 15640. '85. (VI)
- QUARTZ, Selenite, Calcite, &c.** Eleven specimens. Collected by Dr. John Gibson, U. S. N.
 Mrs. E. J. SEARS, Mount Carmel, Ill. 15640. '85. (XIV)
- ETHNOGRAPHIC OBJECTS** collected by Dr. John Gibson, U. S. N.
 Mrs. E. J. SEARS, Mount Carmel, Ill. 15640. '85. (II, A)
- GRAY WHALE, *Rhachianectes glaucus* (skull).**
 C. H. TOWNSEND, San Francisco, Cal. 15641. '85. (IV)
- PAROQUET, *Polytelis barranbandi*, from Australia.**
 ZOOLOGICAL SOCIETY OF PHILADELPHIA (through A. E. BROWN). 15642. '85. (V, A)
- MOCKING BIRD, *Mimus polyglottus*, in the flesh.**
 Dr. FRANK DEFOUR, Riverdale, Md. 15643. '85. (V, A)
- APATITE (yellow and translucent), four fragments from the diamond-fields, Arizona.**
 VICTOR MINDELEFF, U. S. Geological Survey. 15644. '85. (XIV)
- ANTIQUITIES, from Egypt and the Holy Land.**
 Dr. G. W. SAMSON, Harlem, N. Y. 15645. '85. (II, A)
- DRUM-FISH.** Portion of the mouth for examination. Returned.
 ISAAC BULL, Eau Claire, Wis. 15646. '85. (VII)
- MOUNTED REPTILES.** One specimen of Lizard and one of Bufo, from Surinam.
 ALBERT KOEBELE, Agricultural Department, Washington. 15647. '85. (VI)
- FOSSIL LEAVES.** Thirty-five specimens of coal and leaves from North Greenland.
 Ensign A. A. ACKERMAN, U. S. N. 15648. '85. (XIII, A)
- FOSSIL COAL PLANTS, *Lepidodendron*.** Two specimens collected by Dr. J. H. Britts in the lower coal measures of Henry County, Missouri.
 C. G. BROADHEAD. 15649. '85. (XIII, A)
- FOSSIL PLANT** containing *Sigillaria*, from Missouri.
 Dr. J. H. BRITTS. 15650. '85. (XIII, A)
- FOSSIL LEAF, from Georgetown, Cal.**
 WILLIAM P. BLAKE, Georgetown, Placer County, Cal. 15651. '85. (XIII, A)
- FOSSIL LEAVES.** Ninety-one specimens.
 G. F. BECKER, Clear Lake, Cal. 15652. '85. (XIII, A)
- FOSSIL FERNS (Carboniferous).** Thirteen specimens from Eugene, Ind.
 I. COLLETT. 15653. '85. (XIII, A)

FOSSIL PLANTS. Two specimens from Ottawa.

J. N. DAWSON, Montreal, Canada. 15654. '85. (XIII, A)

FOSSIL FERNS (Carboniferous). Five specimens from Deavertown, Ohio.

S. C. GRAY. 15655. '85. (XIII, A)

FOSSIL WOOD, from Grand Cañon District.

Ensign E. E. HAYDEN, U. S. N. 15656. '85. (XIII, A)

FOSSIL PLANTS, &C. Seven specimens.

WILLIAM H. HOLMES, Bureau of Ethnology, Smithsonian Institution. 15657. '85. (XIII, A)

FOSSIL FERNS (Carboniferous). Two specimens. Collected by A. H. Worthen, Grundy County, Illinois.

ILLINOIS GEOLOGICAL SURVEY. 15658. '85. (XIII, A)

FOSSIL WOOD, from Pope's Creek, Maryland.

J. D. MCGUIRE. 15659. '85. (XIII, A)

FOSSIL WOOD. Twenty-five specimens.

C. MCKINLEY, Saint Clair, Ala. 15660. '85. (XIII, A)

FOSSIL PLANTS, from Dakota, New Jersey, and France. The leaves are from the Pleistocene, of Bridgeton, N. J.; the wood from the Cretaceous, or Laramie Group, Moreau River, Dakota, and the stem from the base of the Lignite at Tureau (Bouches-du-Rhône), France.

J. B. MARCOU, U. S. Geological Survey. 15651. '85. (XIII, A)

FOSSIL FERNS (Carboniferous). Three specimens from Rawley Springs, Virginia, and two specimens from Green County, Pennsylvania.

BENJAMIN MILLER, Georgetown, D. C. 15662. '85. (XIII, A)

FOSSIL LEAVES. Two specimens from Mt. Norris National Park, Wyoming.

P. W. NORRIS. 15663. '85. (XIII, A)

FOSSIL WOOD AND LEAVES. Four specimens of wood from Utah, and 22 specimens of fossil leaves from White River.

Maj. J. W. POWELL, U. S. Geological Survey. 15664. '85. (XIII, A)

FOSSIL LEAVES. Five specimens.

HOWARD SCHRIVER, Wytheville, Va. 15665. '85. (XIII, A)

FOSSIL WOOD, from 25 miles north of Fort Union.

Dr. SUCKLEY. 15666. '85. (XIII, A)

FOSSIL WOOD, from Brightwood, D. C.

LOUIS SAVORY, Washington, D. C. 15667. '85. (XIII, A)

FOSSIL PLANTS. Fifteen specimens from Nevada, Wyoming, Utah, and California, collected by Maj. J. W. Powell.

U. S. GEOLOGICAL SURVEY, Washington, D. C. 15668. '85. (XIII, A)

FOSSIL PLANTS. Four specimens containing calamites from coal measures, Trinity River, Jackson County, Texas, collected by A. R. Roessler.

DEPARTMENT OF THE INTERIOR, Washington, D. C. 15669. '85. (XIII, A)

FOSSIL WOODS AND PLANTS. Seventy-one specimens. Woods: Triassic, from Vermillion Cliffs, Kane County, Utah; Cretaceous or Lower Tertiary, from Deer Creek, San Carlos, Ariz. Fucoids: Upper Devonian, from Everhardt, White Pine County, Nev. Two specimens of calamite from Commercial Summit, Whitney County, Ky., and one specimen of wood from the east side of Sink Valley, Utah.

CHARLES D. WALCOTT, U. S. Geological Survey. 15670. '85. (XIII, A)

FOSSIL LEAVES, &c., from Colorado, Iowa, Indian Territory, Alabama, &c. (10), collected by Dr. C. A. White, from 12 miles below Las Animas, Colo.; Dakota Group, borings (3) from Fort Lyon, Colo., collected by H. Beach; calamite (1) from Eu-faula, Indian Territory, collected by H. F. Buckner; sigill (1) from Alabama, collected by Frank Burns; lignite (1) from Cleveland, Iowa, collected by Harry White.
Dr. C. A. WHITE, U. S. Geological Survey. 15671. '85. (XIII, A)

FOSSIL PLANTS. Five specimens from Separation, Colo.

Prof. LESTER F. WARD, U. S. Geological Survey. 15672. '85. (XIII, A)

FOSSIL PLANTS. Leaves (10) from Station No. 49, near Mesa Station; stigmara (2); wood (1) from Sabine River, Abert, California.

WILLIAM S. YEATES, U. S. National Museum. 15673. '85. (XIII, A)

ETHNOGRAPHIC OBJECTS,* from Egypt and the Holy Land.

Dr. GEORGE W. SAMSON, New York City. 15674. '85. (II)

FELT. A collection showing the varieties manufactured, as follows: Hammerfelt, underfelt, damperfelt, and wedgefelt, for piano manufacturing purposes; polishing and rubbing felts used by manufacturers of musical instruments, jewelers, watchmakers, brass and glass manufacturers, marble-yards, ivory and celluloid manufacturers, also used by wall-paper hangers, and for stamping and printing purposes. Cloth felts used by piano and organ manufacturers, cornplasterfelt as used by manufacturers, filters for essential oils (chemists and brewers), ladies' felt slippers (seamless) in modern shades, ladies' felt slippers (sewed) with common-sense heels, ladies' sandals, ladies' high-cut lace shoes (without heels) trimmed with plush, ladies' fancy felt slippers in modern shades, trimmed with buckles and French heels, and gents' ordinary felt slippers in black and grey, with plush and without heels.

ALFRED DOLGE, New York City. 15675. '85. (1)

PLANTS.

C. G. PRINGLE, Charlotte, Vt. 15676. '85. (XIII, B.) (Sent to Department of Agriculture.)

INDIAN WEAPONS. A bow and three poisoned arrows; from the Botocudo Indians, of the Colonia Leopoldina, province of Bahia, Brazil.

RICHARD RATHBUN, Smithsonian Institution. 15677. '85. (II)

MONKEY, *Simnopithecus siamensis*, in the flesh.

H. B. EVERETT, Philadelphia, Pa. 15678. '85. (IV)

PAINT. Water-proof.

HORACE D. DUNN, San Francisco, Cal. 15679. '85. (I)

LARK, *Eremophila alpestris*, in the flesh, from Medina, Orleans County, N.

WILLIAM PALMER, Smithsonian Institution. 15680. '85. (V, A)

SCREECH OWL, *Megascops asio*, in the flesh. Caught in the upper hall of the Smithsonian building.

Dr. CHARLES RAU, Smithsonian Institution. 15681. '85. (V, A)

EARTH, from a well in Arredonda, Fla. For examination.

GEORGE REESE, Arredonda, Fla. 15682. '85. (XV)

MINERAL SALTS, including carbonate of lime with common salt and sulphates of calcium or sodium, from Utah.

S. P. LASATER, Tooele City, Utah. 15683. '85. (XIV)

RED-TAILED HAWK, *Buteo borealis*, from Illinois.

J. SCHNECK, Mount Carmel, Ill. 15684. '85. (V, A)

* See Part II, p. 66.

VOLCANIC DUST AND SAND, from Furnas and Harlan Counties, Nebraska. (See Proc. U. S. N. M., VIII, p. 99.)

HENRY ZAHN, Plattsmouth, Nebr. 15685. '85. (XIV)

POTTERY, modern and ancient, from Mexico.

LOUIS H. AYMÉ, Oaxaca, Mexico. 15686. '85. (II, B)

HUMAN BONES, from Mexico.

LOUIS H. AYMÉ, Oaxaca, Mexico. 15686. '85. (VIII)

STONE CARVINGS (8), representing the human form, squared stone with grooves (1), metate with rubbing-stone (1), stone pendants (8), stone bead (1), bone implements (1), a polished piece of iron pyrites of hemispherical shape (mirror), specimen of magnetite, copper bells (7), copper chisel (1), T-shaped copper axes, (so called) (69), and a specimen of adobe, from Mexico; 101 specimens.

LOUIS H. AYMÉ, Oaxaca, Mexico. 15686. '85. (III)

ETHNOGRAPHIC SPECIMENS, from Mexico.

LOUIS H. AYMÉ, Oaxaca, Mexico. 15686. '85. (II)

BIRD EGGS, from Alaska, 139 specimens.

WILLIAM J. FISHER, Saint Paul, Kodiak Island, Alaska. 15687. '85. (V, B)

BIRD SKINS, from Alaska, 48 specimens; 19 species of water birds, excepting 3 specimens of the hawk owl, *Surnia ulula caparoch*.

WILLIAM J. FISHER, Saint Paul, Kodiak Island, Alaska. 15687. '85. (V, A)

ETHNOLOGICAL SPECIMENS (from Alaska), including articles of dress, implements, and household utensils.

WILLIAM J. FISHER, Saint Paul, Kodiak Island, Alaska. 15687. '85. (II)

FLINT OBJECTS, from Alaska.

Lieut. GEORGE M. STONEY, U. S. N., Mare Island, Cal. 15688. '85. (II)

ROCKS AND STONES, from Saliwick Lake and Kowak River, Alaska.

Lieut. GEORGE M. STONEY, U. S. N., Mare Island, Cal. 15688. '85. (XV)

MARINE SHELLS, *Limnaea ampla* (alcoholic), from Kowak River, Alaska.

Lieut. GEORGE M. STONEY, U. S. N., Mare Island, Cal. 15688. '85. (IX)

ECHINODERMS, CELENTERATES, CRUSTACEANS, etc., from Alaska.

Lieut. GEORGE M. STONEY, U. S. N., Mare Island, Cal. 15688. '85. (XI)

COAL, from Alaska.

Lieut. GEORGE M. STONEY, U. S. N., Mare Island, Cal. 15688. '85. (XVI)

BIRD EGGS, from Alaska.

Lieut. GEORGE M. STONEY, U. S. N., Mare Island, Cal. 15688. '85. (V, B)

FROG (alcoholic), from Alaska.

Lieut. GEORGE M. STONEY, U. S. N., Mare Island, Cal. 15688. '85. (VI)

FISHES, six species, from Alaska.

Lieut. GEORGE M. STONEY, U. S. N., Mare Island, Cal. 15688. '85. (VII)

ESKIMO OBJECTS, from Alaska.

Lieut. GEORGE M. STONEY, U. S. N., Mare Island, Cal. 15688. '85. (II)

SEEDS AND PLANTS, from Alaska.

Lieut. GEORGE M. STONEY, U. S. N., Mare Island, Cal. 15688. '85. (XIII, B)

INSECTS (from Alaska). Alcoholic specimens of *Diptera* and *Homoptera*.

Lieut. GEORGE M. STONEY, U. S. N., Mare Island, Cal.

SHELLS, *Argonauta pacifica*, Dall, and other shells from the beach of Magdalena Bay, Lower California, and Natividos Island, Lower California.

C. H. TOWNSEND, San Francisco, Cal. 15689. '85. (IX)

SEA-ELEPHANT, *Macrorhinus angustirostris*: Seal, *Zalophus californianus*. Coyote, *Canis latrans*. Gopher, *Thomomys talpoides*. From California.

C. H. TOWNSEND, San Francisco, Cal. 15689. '85. (IV)

SEA ELEPHANT OIL.

C. H. TOWNSEND, San Francisco, Cal. 15689. '85. (I, D)

BIRD SKINS. Twenty-seven specimens, from California, namely: Large-billed Sparrow, *Passerculus rostratus* (1); Snowy Heron, *Garzetta candidissima* (5); Louisiana Heron, *Hydranassa tricolor* (1); White-crowned Night Heron, *Nyctherodius violaceus* (1); Snowy Plover, *Ægialites nivosus* (4); Sanderling, *Calidris arenaria* (4); Marbled Godwit, *Limosa fæda* (1); Willet, *Symphemia semipalmata* (1); Surf Duck, *Pelionetta perspicillata* (1); Western Gull, *Larus occidentalis* (1); Heerman's Gull, *Larus heermanii* (2); Royal Tern, *Sterna maxima* (1); Fulmar Petrel, *Fulmarus pacificus* (2); Western Grebe, *Æchmophorus occidentalis* (1); Cassin's Auk, *Ptychorhampus aleuticus* (2).

C. H. TOWNSEND Francisco, Cal. 15689. '85. (V, A)

INDIAN OBJECTS. 7 posts, 4 masks, 5 carvings, 3 rattles, 4 sets of bows and arrows, 5 dance-wands, 24 fish-hooks, 4 paddles, 1 drinking-cup, 1 set of canoe-builder's tools, 1 banner, 3 wedges, 12 cedar bark mats, and a buoy and tow-line, from Washington Territory.

JAMES G. SWAN, Port Townsend, Wash. 15690. '85. (II, A)

EGGS OF CALIFORNIA TROUT.

MYRON GREEN, McCloud River, California. 15691. '85. (VII)

SNAKES. Four living specimens.

KELLY & CHAMBERLIN, Washington, D. C. 15692. '85. (VI.) (Sent to the Zoological Gardens, Philadelphia.)

EGGS OF CALIFORNIA TROUT.

MYRON GREEN, McCloud River, California. 15694. '85. (VII)

INDIAN OBJECTS. 5 arrow-points, 1 stone ax, several pieces of pottery, pieces of 2 skulls and bones, from mound No. 1 in Sangamon County, Illinois.

WILLIAM T. TALBOTT, Farmingdale, Ill. 15695. '85. (III)

FRESH-WATER SHELLS, from Florida and Alabama. Seven species.

A. G. WETHERBY, Cincinnati, Ohio. 15696. '85. (IX)

DIABASE and sandstone, from Albany County, Oregon. Four samples.

FRANK WOOD, Linn County, Oregon. 15697. '85. (XV)

LEAD AND SILVER ORES.

LEAD MINE MILL and CITY ROCK MINE, Utah. 15698. '85. (XVI)

LEAD AND SILVER ORES.

NORTHERN CHIEF MINE, Utah. 15699. '85. (XVI)

LEAD AND SILVER ORES.

HORN SILVER MINE, Utah. 15700. '85. (XVI)

ORES, from Washington Territory. For report.

GEORGE DE GRAF, Seattle, Wash. 15701. '85. (XIV)

RED CROSSBILL, *Loxia curvirostra minor*, from Bardstown, Ky. Probably the first bird the National Museum has ever received from any portion of that State. Also, a Snow-bird, *Junco hyemalis*, with distinct white wing-bands, from Ilchester, Md.

C. W. BECKHAM, Smithsonian Institution. 15702. '85. (V, A)

TEXTILE FIBERS. Samples of wools, cottons, silks, and vegetable fibers; also woven fabrics.

DEPARTMENT OF AGRICULTURE, Washington, D. C. 15703. '85. (I)

FISHES: *Microgadus tomcodus*, *Albula vulpes*, *Merlucius bilinearis*, *Brevoortia tyrannus*, *Clupea harengus*, *Ctenolabrus adspersus*, *Mugil albula*, *Caranx hippos*, *Tautoga onitis*, *Serranus atrarius*, *Cottus aeneus*, *Bothus maculatus*, *Trachynotus carolinus*, and *Stromateus triacanthus*.

L. B. THURBER, Patchogue, L. I. 15704. '85. (VII)

BIRDS: *Lanius borealis*, *Uria brunnicki*, *Asio wilsonianus*.

L. B. THURBER, Patchogue, L. I. 15704. '85. (V, A)

SQUILLA (3 specimens) and Crab.

L. B. THURBER, Patchogue, L. I. 15704. '85. (XI)

SNOW SEDIMENT, from Colorado.

ALEXANDER MCDUGAL, Gunnison City, Colo. 15705. '85. (XVII)

AMBLYSTOMA (alcoholic), from El Paso, Tex.

NEWTON SIMMONS, U. S. Fish Commission. 15706. '85. (VI)

SHELL LIMESTONE, partly decomposed, from south of Lake City.

C. L. BRUSH, Lake City, Fla. 15707. '85. (XIV)

KANGAROO, *Macropus giganteus* (female). Two specimens in the flesh.

ARTHUR E. BROWN, Zoological Society, Philadelphia, Pa. 15708. '85. (IV)

COTTON THREAD. Three small spools, three-ply, No. 400.

WILLIMANTIC LINEN COMPANY, Willimantic, Conn. 15709. '85. (I)

FOSSIL PLANTS.

L. A. WARD, Point of Rocks, Wyo. 15711. '85. (XIII, A)

MOLLUSKS, *Mya arenaria*. Living specimens.

BOARD OF TRADE, Portland, Oreg. 15712. '85. (IX)

SALMO PURPURATUS (alcoholic).

M. F. SPENCER, Portland, Oreg. 15713. '85. (VII)

FOSSILS. Five boxes of specimens. Purchased by U. S. Geological Survey.

GEORGE SPANGLER, Madison, Ind. 15714. '85. (XII, A)

CEREMONIAL OBJECTS. Two fine specimens. One, prismatic, with a longitudinal perforation, was found on Cooper's Bar, in the Ohio River, 3 miles below Madison. The other, in the shape of a double hatchet, was plowed up on a farm near Big Creek, about 12 miles northwest of Madison.

GEORGE SPANGLER, Madison, Ind. 15714. '85. (III)

CHLOANTHITE, native arsenic, native bismuth, ganomontite, helvite, liebigite, eulytite, kermesite, &c. Principally from Prussia and Austria. For exchange.

UNIVERSITY OF CINCINNATI, Cincinnati, Ohio. 15715. '85. (XIV)

*STONE IMPLEMENTS, &c.

JOHN J. MCLEAN, Sitka, Alaska. 15716. '85. (II, A)

BIRD SKINS. Nineteen specimens from Texas and Bird Rocks (Nova Scotia?).

C. J. MAYNARD, Boston, Mass. 15717. '85. (V, A)

BIRD SKINS (dried and alcoholic), from the island of Cozumel, Yucatan, and Key West, Fla. Collected by James E. Benedict and Thomas Lee, on the U. S. Fish Commission steamer Albatross.

U. S. FISH COMMISSION, Washington. 15718. '85. (V, A)

MAMMAL SKINS, *Dicotyles torquatus*, *Nasua narica*, *Didelphys aurita*, from the island of Cozumel, Yucatan. Collected by James E. Benedict and Thomas Lee, on the U. S. Fish Commission steamer Albatross.

U. S. FISH COMMISSION, Washington. 15718. '85. (IV)

TOURMALINE, cimolite, beryl, garnet, lepidolite, muscovite, tripolite, topaz, autunite, montmorillonite, and damonite.

N. H. PERRY, South Paris, Me. 15719. '85. (XIV)

MAMMAL SKINS AND SKELETONS: *Vulpes velox*, *Canis latrans*, *Lepus sylvaticus*, *Lepus campestris*, *Cynomys ludovicianus*, *Perognathus fasciatus*, and *Dipodomys ordi*.

A. B. BAKER, Banner, Trego County, Kans. 15721. '85. (IV)

REPTILES, from the island of Cozumel, Yucatan. Collected by the U. S. Fish Commission steamer Albatross.

U. S. FISH COMMISSION, Washington. 15722. '85. (VI)

AIR PLANTS, from the island of Cozumel, Yucatan. Collected by the U. S. Fish Commission steamer Albatross.

U. S. FISH COMMISSION, Washington. 15722. '85. (XIII, B.) (Sent to Botanical Garden, Washington.)

ESKIMO SUIT, from Cumberland Gulf.

Dr. F. BOAS. 15723. '85. (II.)

* ETHNOGRAPHIC OBJECTS, from the Yuma and Cocopa Indians of Arizona and New Mexico.

Dr. E. PALMER, U. S. National Museum. 15724. '85. (II)

PTARMIGAN, *Lagopus Alleni* (mounted), from Newfoundland.

F. H. MELLIS. 15725. '85. (V, A)

METEORITES: (1) Slice of stone meteorite containing native iron found on Tomhannock Creek, Rensselaer County, New York, 1863-'64; (2) slice of iron meteorite found in 1823 at Tocavita, Boyaca River, New Granada; (3) fragment of iron meteorite found by Pallas, 1772-'76 at Krasnojarsk, Siberia; (4) section of iron meteorite found in 1844 at Arva, Szlanicza, Hungary; (5) section of iron meteorite found prior to 1860 in Greenland; (6) stone meteorite which fell January 1, 1869, at Hersle, near Upsala, Sweden; (7) section of stone meteorite containing native iron, which fell June 6, 1838, at Chandakapore, Valley of Berar, India. For exchange.

S. C. H. BAILEY, Cortland-on-the-Hudson, Westchester County, N. Y. 15726. '85. (XIV)

COPPER COINS, BADGES, etc.

CHARLES S. OWENS, Utica, N. Y. 15727. '85. (II)

SIGILLARIA (?), probably of Carboniferous formation.

CHARLES S. OWENS, Utica, N. Y. 15727. '85. (XIII, A)

ORES.

CHARLES S. OWENS, Utica, N. Y. 15727. '85. (XVI)

CELESTITE, analcite, and fragments of rocks and minerals.

CHARLES S. OWENS, Utica, N. Y. 15727. '85. (XIV)

BIRDS' NESTS.

CHARLES S. OWENS, Utica, N. Y. 15727. '85. (V, B)

PUDDING-STONE.

CHARLES S. OWENS, Utica, N. Y. 15727. '85. (XV)

MEAT BISCUIT. Manufactured at Galveston, Tex., by Gail Borden, in the year 1851.

Prof. S. F. BAIRD, Smithsonian Institution. 15728. '85. (I)

CALCAREOUS COATINGS around rushes, from an elevation of about 1,000 feet.

N. A. FOSS, Maiden, Mont. 15729. '85. (XV)

BLACK BEAR, *Ursus Americanus*. Skull and skin.

D. L. SNYDER, Stribling Springs, Va. Purchased, \$10. 15730. '85. (IV)

BIRD SKINS, from Pilot Town and Mayport, Fla. For selection of desiderata.

C. C. NUTTING, Carlinville, Ill. 15731. '85. (V, A)

MINERALS.

GEORGE KIEFER, Lima, Peru. (Sent to A. E. Foote, Philadelphia, for sale.) 15732. '85. (XIV)

INDIAN OBJECTS. One hundred specimens from North Carolina, including cutting-tools, arrow and spear-heads, perforators, grooved axes, stone-club head, stone pick(?), a discoidal stone, a perforated sinker(?), a small potstone cup, stone slab with mortar-cavity, a potstone mortar, and a perforated pendant made of a pebble of banded slate.

J. M. SPAINHOUR, Lenoir, N. C. 15733. '85. (III, A)

SEEDS of *Onosmodium molle*, Michx. A plant in the borage family.

JOHN W. EMMERT, Mountainville, Tenn. 15734. '85. (XIII, B)

FOSSILS. *Maclurea* sp.? (2).

MILES ROCK, Guatemala. 15735. '85. (XII, A.)

ANTIQUITIES. A collection of crosses and notched darts from the summits of the volcanoes Tacanna and Tajnmulco, and high mountains in their vicinity, in the western part of Guatemala, used there by the Mam Indians in their secret and primitive religious rites ("costumbres").

Rain-shields or cloaks of palm leaves used by the Ixtatan and other Indians in the western parts of the department of Huehuetenango.

Boulder with rudely-sculptured human face, from the ruins of Saculeo (near Huehuetenango, Guatemala), the ancient capital of the Mam Indian Kings.

Sculptured (sun?) stone from the débris around an altar in ruins of ancient Ixtatan temple on the summit of Cerro Ixbul, 40 miles south-east from Comitán, in Mexico. This is a monument on the Guatemala boundary.

MILES ROCK, Guatemala. 15735. '85. (II, A)

ROCKS.

MILES ROCK, Guatemala. 15735. '85. (XV)

WOOD AND LEAVES.

MILES ROCK, Guatemala. 15735. '85. (XIII, B)

SMOKED PORPOISE, *Phocæna communis*. Two samples: one of meat from the side; the other a sausage, two-thirds porpoise meat and one-third beef.

GEORGE L. SPARKS, Philadelphia, Pa. 15736. '85. (I)

PORPOISE, *Phocæna communis*, in the flesh.

M. M. PIERCE, keeper Orleans life-saving station, East Orleans, Mass. 15737. '85. (IV)

INDIAN CRADLE-BOARD, made by the Ogalalla Sioux Indians of Black Hills.

Mrs. ANDERSON, Washington, D. C. Purchased, \$6. 15738. '85. (II, A)

MINING SCENES in Bannock mining district, Beaver Head County, Montana.

PHILIP SHENON, Montana Territory. 15739. '85. (XVI)

PHOTOGRAPH of smelting works.

J. P. GAZZAM, Saint Louis, Mo. Purchased. 15740. '85. (XVI)

BIRD SKINS. Two specimens of *Icterus cucullatus*, from Yucatan.

CHARLES K. WORTHEN, Warsaw, Ill. 15741. '85. (V, A)

BIRD SKINS, *Agelaius tricolor*, *Lophophanes inornatus*, *Troglodytes parkmani*, from California.

H. W. HENSHAW, U. S. Geological Survey. 15742. '85. (V, A)

THRUSHES: *Turdus aliciae*, *Turdus swainsoni*, *Turdus pallasi*.

H. K. COALE, Chicago, Ill. 15743. '85. (V, A)

BIRDS, *Anthocheira inauris*, *Cinclosoma* sp., *Synoicus diemensis*, and *Coturnix pectoralis*, from Tasmania. Three of these are new to the collection.

N. ROWE, Chicago, Ill. 15744. '85. (V, A)

BIRD SKINS, *Simorhynchus pygmaeus* (2), from Copper Island, Kamtschatka.

Dr. L. STEJNEGER, U. S. National Museum. 15745. '85. (V, A)

BIRD SKINS: *Sialia sialis*, *Otocoris pratincola*, *Otocoris chrysouleuca*, *Numenius longirostris*, *Larus occidentalis*, *Larus californicus*, *Larus glaucescens*, *Larus heermanni*, *Larus philadelphia*, *Sterna maxima*, *Sterna forsteri*, *Cerorhinca monocerata*.

H. W. HENSHAW, U. S. Geological Survey. 15746. '85. (V, A)

PURPLE GRACKLE, *Quiscalus purpureus*. Fifty-three skins.

Dr. B. H. WARREN, West Chester, Pa. 15747. '85. (V, A)

RUFFED GROUSE, *Bonasa umbelloides* (skin), from Manitoba.

ERNEST T. SETON, Carberry, Manitoba. 15748. '85. (V, A)

SEA-WEEDS, from Raritan Bay and Staten Island Sound.

Rev. D. S. ANDERSON, Perth Amboy, N. J. 15749. '85. (XIII, B)

SERPENTINE. Two specimens.

JOHN S. F. BATCHEN, Chicago, Ill. 15750. '85. (XV)

FÆTAL PUFFER, *Phocæna? lineata*, taken from the womb of a puffer caught in a cod gill-net in Ipswich Bay.

S. MARTIN, Gloucester, Mass. 15751. '85. (VII)

NEST AND EGGS OF *Argyria nigricauda*, from Bonito, Pernambuco, Brazil.

ALBERT KOEBLE, Agricultural Department. 15752. '85. (V, B)

BIRDS. One hundred and seventy-five specimens, chiefly from the British Islands and France.

EDWARD HARGITT, London, England. 15753. '85. (V, A)

JAPANESE OBJECTS. One bow from Tokio and one measure from Nagasaki, collected by W. H. Shock, Chief Engineer, U. S. N.

CORCORAN GALLERY OF ART, Washington, D. C. 15754. '85. (II)

ETHNOLOGICAL OBJECTS from Peru, including three mummies, one brass mortar, one gourd, and two photographs.

Dr. WILLIAM H. JONES, U. S. N., Guayaquil, Ecuador. 15755. '85. (II)

CYPRÆA from west coast of South America, *Cypræa Mauritiana*, Indo-Pacific.

Dr. WILLIAM H. JONES, U. S. N., Guayaquil, Ecuador. 15755. '85. (IX)

SKULLS, *Homo sapiens*. Specimens and fragments from Peru.

Dr. WILLIAM H. JONES, U. S. N., Guayaquil, Ecuador. 15755. '85. (IV)

BROAD-WINGED HAWK, *Buteo pennsylvanicus* (skull), from Illinois.

H. K. COALE, Chicago, Ill. 15756. '85. (IV)

VULTURE, *Pseudogryphus californicus*; sternum with coracoids, scapula, &c., of adult ♂ California vulture, from Jolon, Cal.

H. W. HENSHAW. U. S. Geological Survey. 15757. '85. (V, A)

*ETHNOGRAPHIC OBJECTS. About seventy specimens. (Exchange.)

TROCADERO MUSEUM, Paris, France. 15758. '85. (II)

CAST OF STONE CELT with handle, in one piece, from Hayti.

TROCADÉRO MUSEUM, Paris, France (through Dr. HAMY). 15758. '85. (III)

FISHES (alcoholic), from the Gulf of Mexico; collected by the U. S. Fish Commission steamer Albatross.

U. S. FISH COMMISSION. 15759. '85. (VII)

ETHNOGRAPHIC SPECIMENS, consisting of 2 necklaces from Fuigian Indians, Southern Chili, 1 cap from Madeira Islands, 2 buckets from Fuigian Indians, Southern Chili, 1 machet (musical instrument) from Madeira Islands, 1 pipe and outfit for "Paraguayan tea," Paraguay, S. A., 1 Fuigian arrow, of commerce, from Indians of Queen Adelaide Archipelago, Southern Chili.

Ensign A. P. NIBLACK, U. S. N., Mare Island, Cal. 15760. '85. (II, A)

DENDRITE and manganese oxide or quartzite, from the valley of the Risnac River, above Lima, Peru.

Ensign A. P. NIBLACK, Mare Island, Cal. 15760. '85. (XIV)

COPPER AND COPPER ORES, from the smelting works of Madam Consino, at Lota, Chili.

Ensign A. P. NIBLACK, Mare Island, Cal. 15760. '85. (XVI)

WANDERING ALBATROSS, *Diomedea exulans* (skeleton), from Gulf of Peñas, Chili.

Ensign A. P. NIBLACK, Mare Island, Cal. 15760. '85. (VIII)

BIRD SKINS, *Bubo virginianus subarcticus*, *Parabuteo unicinctus harrisi*, ♂ and ♀, *Astur palumbarius*, *Circus gouldi*, *Rallus phillipensis*, *Porphyrio melanotis*, from Texas. For exchange.

T. MCILWRAITH, Hamilton, Ontario, Canada. 15761. '85. (V, A)

COLYMBUS SEPTENTRIONALIS, from Chester River. For identification.

HIRAM BROWN, Pomona, Md. 15762. '85. (V, A)

WOOD, from an artesian well 85 feet under ground.

J. T. WOFFORD, Fort Mason, Florida. 15763. '85. (XIII, B)

PLANTS, found in the mountains of El Paso, Texas. For name.

W. F. CUMMINS, Dallas, Tex. 15764. '85. (XIII, B)

TORTOISE SHELL. Donor unknown. 15765. '85. (I)

VULTURES, *Pseudogryphus californicus*, in the flesh.

F. MCCORMACK, Jolon, Cal. 15766. '85. (V, A)

PAPER. Samples illustrating the early methods of manufacture in the United States.

C. L. HAMILTON, Philadelphia, Pa. 15767. '85. (I)

CUPREA BARK.

THOMAS CHRISTY, London, England. 15768. '85. (I)

SEEDS.

ROYAL GARDENS, Kew, England. 15769. '85. (XIII, B) Sent to the Government Carp Ponds.

JAPANESE OBJECTS. One cup and saucer. Deposited.

Miss BLANCHE FRANKLAND, Washington, D. C. 15770. '85. (I)

PHOTOGRAPHS of "Eskimo Joe and Hannah" of the Polaris Expedition; also autograph letter written by Joe.

GEORGE WOLTZ, National Museum. 15771. '85. (I)

SHELLS.

C. R. ORCUTT, San Diego, Cal. 15772. '85. (IX)

CEMENT. A piece from the Coliseum at Rome, Italy.

GEORGE H. BOEHMER, Smithsonian Institution. 15773. '85. (I)

BEAR, *Ursus americanus* (skull).

F. M. NOE, Indianapolis, Ind. 15774. '85. (IV)

SORA RAIL, *Porzana Carolina* (skin).

FRED. J. HASE, San Diego, Cal. 15775. '85. (V, A)

CLAY PIPE.

T. H. WISE, Wheaton, Ill. Returned. 15776. '85. (II, A)

SHELLS, *Spirula Peronii* Lam.

HENRY HEMPHILL, Key West, Fla. 15777. '85. (IX)

PRESSED PLANTS.

Donor unknown. 15778. '85. (XIII, A)

SILK DRESSING-GOWN, supposed to have belonged to the wardrobe of Louis XIV.

Mrs. MARTHA MUNSÖN, Baraboo, Wis. 15779. '85. (I) Returned.

"CRAB'S EYES" OR "GASTROLITHS," taken from the stomach of a crawfish.

TOM MOORE, Livingston, Tex. 15780. '85. (XI)

COMPOSITE PLANTS, *Aplopappus Fremontii*. For report.

A. R. FELLOWS, South Pueblo, Colo. 15781. '85. (I)

MAGNETIC IRON ORE. Iron pyrites, highly bituminous coal, tremolite, and actinolite or epidote, probably the latter.

Mrs. E. W. P. GUYE, Seattle, Wash. 15782. '85. (XIV)

MARBLE.

Mrs. E. W. P. GUYE, Seattle, Wash. 15782. (XIV)

MINERALS.

CHRISTIAN NELSON, Virginia City, Mont. 15783. '85. (XIV)

HORSESHOES. Samples.

RHODE ISLAND HORSESHOE COMPANY, Providence, R. I. 15784. '85. (XVI)

ERUPTIVE ROCKS. Twenty-five specimens. In exchange.

C. H. HITCHCOCK, Hanover, N. H. 15785. '85. (XV)

ECHINODERMS, Corals, Millepores, and Mollusca. Dried and alcoholic.

HENRY HEMPHILL, Key West, Fla. 15786. '85. (XI)

CAST OF STONE PIPE of banded slate, in the form of a grotesque human face. Original was found in Jefferson County. Returned.

B. F. HARRISON, Shepherdstown, Jefferson County, W. Va. 15787. '85. (III)

RIGHT WHALE, *Balæna cisarctica* (skull.)

NELSON BURNETT, Southampton, N. Y. 15788. '85. (IV)

EGG OF GRIFFON VULTURE, *Gyps fulvus*. Laid in a menagerie.

W. A. CONKLIN, superintendent Central Park Menagerie, New York City, N. Y. 15789. '85. (V, A.)

CUPREINE SULPHATE.

THOMAS CHRISTY, London, England. 15790. '85. (I)

PLANTS, from Alaska.

Dr. T. H. BEAN, U. S. National Museum. 15791. '85. (XIII, B)

MONITE, Apatite with Eozoön structure, Tremolite, Fowlerite ("Keatingine"), Pyro-lusite, Massive Apatite, Apatite crystals, Pelhamine with Phæstite, Mesolite, Anorthite (Indianite), Enstatite, Corundophilite, etc. The single thin section examined shows it to be composed almost entirely of a light greenish monoclinic mineral—perhaps Sahlite—and Apatite. Three hundred and seventy-five specimens. For exchange.

C. W. SHEPARD, New Haven, Conn. 15792. '85. (XIV)

H. Mis. 15, pt. 2—13

PHOSPHATIC ROCK, from Coosaw, S. C.

C. W. SHEPARD, New Haven, Conn. 15792. '85. (XII, B)

SHARK'S TEETH (3), from South Carolina (?).

C. W. SHEPARD, New Haven, Conn. 15792. '85. (IV)

COPROLITES. Two bottles of specimens from South Carolina (?).

C. W. SHEPARD, New Haven, Conn. 15792. '85. (IV)

STURGEON, *Acipenser rubicundus*, in the flesh.

J. W. TAYLOR, Winnipeg, Manitoba. 15793. '85. (VII)

CRYOLITE, from Pike's Peak, Colo.

C. W. CROSS, U. S. Geological Survey, Washington, D. C. 15794. '85. (XVI)

INDIAN COSTUME, worn by Rosa White—Thunder.

Capt. R. H. PRATT, Carlisle, Pa. 15795. '85. (II) (Exchange.)

YELLOW-SHAFTED FLICKER, *Colaptes auratus* and Rufous-crowned Sparrow, *Peucaea ruficeps*.

FOREST BALL, San Bernardino, Cal. 15796. '85. (V, A)

TARANTULOID and head of *Dynastes Grantii*.

FOREST BALL, San Bernardino, Cal. 15796. '85. (X)

REPTILES (in alcohol), including one specimen of *Bufo*.

FOREST BALL, San Bernardino, Cal. 15796. '85. (VI)

PRAIRIE SHORE LARK, *Otocorys alpestris praticola* (skin), from Alexandria County, Virginia.

WILLIAM PALMER, U. S. National Museum. 15797. '85. (V, A)

BIRD SKINS. A very valuable collection from Central Guatemala, department of Baja Vera Paz, in the country around the city of Salama, consisting of 293 specimens, 106 species, including five series of several more or less rare species, and one species (*Prionerhynchus carinatus*) new to the collection.

MILES ROCK, Guatemala. 15798. '85. (V, A)

DRUGS. Forty-four very rare specimens of *Materia Medica* from England.

THOMAS CHRISTY & Co., 155 Fenchurch street, London. 15799. '85. (I)

SEEDS FROM JAMAICA.

Donor unknown. 15800. '85. (XIII, B)

SANDSTONE. Small chips for examination.

Dr. P. G. LE GRAND, Weatherford, Tex. 15801. '85. (XXV)

BIRD SKIN, *Aneides fernandezianus*, from Fernandez Island.

Prof. E. C. REED, Valparaiso, Chili (through Ensign A. P. NIBLACK, U. S. N.). 15802. '85. (V, A)

FOSSIL SHELLS AND ORES from Queriquina Island, Concepcion Bay, Chili.

Dr. FRANK COWAN, Valparaiso, Chili (through A. P. NIBLACK). 15803. '85. (XII, B)

STEAM ENGINE "John Bull," with tender, pilot, and two pairs of tender-wheels.

PENNSYLVANIA RAILROAD COMPANY, Philadelphia, Pa. 15804. '85. (I)

LIZARD (alcoholic), *Opheosaurus ventralis*.

E. M. SHAW, Spring Creek, Nebr. 15805. '85. (VI)

HORSESHOE, made from spikes taken from the "New Orleans," which was built in 20 days from standing timber at Sackett's Harbor, during the war of 1812 (accompanied by two photographs).

JOHN B. WILDER, Sandy Creek, Oswego County, N. Y. 15806. '85. (I)

AFRICAN PAROQUET, *Agapornis pullarius*, ♂ ad.

Dr. W. W. GODDING, Superintendent Government Hospital for the Insane, District of Columbia. 15807. '85. (V, A)

CINCHONA WEED AND RATTLESNAKE RANTIN.

Dr. W. LEWIS, Petersburg, Va. 15808. '85. (I)

MICA-SCHIST, containing iron pyrites. Decomposed.

J. G. STUFFLEBEAM, Delaney, Madison County, Ark. 15809. '85. (XIV)

CALIFORNIAN CONDOR, *Pseudogryphus californianus*. Five specimens in the flesh.

F. McCORMACK, Jolon, Cal. 15810. '85. (V, A)

SHARK, *Somniosus microcephalus*, in the flesh. About 11 feet long. Out of the stomach had been taken 1 peck of herrings and 6 yards of a gill-net.

A. H. MYERS, keeper Quoddy Head life-saving station, Lubec, Me. 15811. '85. (VII)

SHELLS. Installment of the North European and British collection of the late Dr. J. Gwyn Jeffreys.

J. GWYN JEFFREYS (through HOWEL JEFFREYS), 61 Bedford Gardens, Kensington, London. 15812. '85. (IX)

PRAIRIE HEN, *Tympanuchus pinnatus*, in the flesh.

ALEXANDER SKINNER, Washington, D. C. 15813. '85. (V, A)

JAPANESE PORCELAIN. Purple dish, 4½ inches square. (Deposited.)

G. BROWN GOODE, Washington. 15814. '85. (I)

SALT. An impure mixture of common salt and sulphate of sodium.

E. S. STOVER, Albuquerque, N. Mex. 15815. '85. (XIV)

MUSKRAT, *Fiber zibethicus*, from Quantico, Va.

H. W. HENSHAW, U. S. Geological Survey. 15816. '85. (IV)

LIFE-BOAT MODEL. Life-boat and life-car combined.

FRED. S. ALLEN, Cuttyhunk, Mass. 15817. '85. (I)

BIRD SKIN, *Thamnophilus radiatus* ♂ juv.?, from Bahia.

H. K. COALE, Chicago, Ill. 15818. '85. (V, A)

FOSSILS.

GEORGE SPANGLER, Madison, Ind. Purchased by the U. S. Geological Survey. 15819. '85. (XII, A)

CASTS OF DINOCERATA, including *Dinoceras mirabile*, *Dinoceras laticeps*, *Tinoceras ingens*, and *Tinoceras longiceps*.

Prof. O. C. MARSH, New Haven, Conn. 15820. '85. (VIII)

WOOD RAT, *Neotoma floridana*, var. *Mexicana*.

Dr. R. W. SHUFELDT, U. S. A., Fort Wingate, New Mexico. 15822. '85. (IV)

RED FOX SCALPS. A pair from Illinois. Called by the hunters "wolf" scalps, in order to secure the bounty.

J. P. LEACH, Rushville, Ill. 15823. '85. (IV)

WINTER WREN, *Troglodytes hyemalis*, and Tufted Titmouse, *Lophophanes bicolor*. For name.

JAMES W. ROGAN, Rogersville, Tenn. 15824. '85. (V, A)

ARROW-HEADS. From Willamette River, Oregon, and from mound-builders' burial-ground on Fox River, Wisconsin.

THEO. H. WISE, Wheaton, Ill. 15825. '85. Returned.

HEAD OF PORPOISE, *Phocæna communis*, from Gurnet, near Plymouth, Mass. Jaw with abnormal dentition.

JOHN F. HOLMES, keeper U. S. life-saving station, Gurnet, Mass. 15826. '85 (IV)

MINERALS. Thirty-eight specimens from New Brunswick and Nova Scotia, including albertite, stibnite, native antimony, gypsum, anhydrite, vesuvianite, picrolite, manganite, scapolite, pyroxene, hornblende, apatite, stilbite, chalazite, and analcite. For exchange.

L. W. BAILEY, Fredericton, New Brunswick. 15827. '85. (XIV)

FISHES. For exchange.

L. W. BAILEY, Fredericton, New Brunswick. 15827. '85. (VII)

FOSSILS. Three fragments of limestone with *Spirifera*, *Terebratula*, and *Productus*, represented. For exchange.

L. W. BAILEY, Fredericton, New Brunswick. 15827. '85. (XII, A)

BERYL, found on east shore of Connday's Harbor, Phippsburg, Me.

GEORGE T. STORER, Winnegance, Sagadahoc County, Me. 15828. '85. (XVI)

HORNBLLENDE and Arsenical Pyrites.

C. W. HITCHCOCK, Custer City, Custer County, Dak. 15829. '85. (XIV)

HISTORICAL RELIC. Portion of a causeway made by General Andrew Jackson's army in the war of 1812-'15, during its march from the Chattahoochee River through the Creek Nation, to New Orleans, La., from 12 miles southwest of Eufaula, Barbour County, Ala.

FRANK BURNS, U. S. Geological Survey. 15830. '85. (I)

SHAD, *Clupea sapidissima*. Fresh specimen caught at the mouth of the Suwannee River, Florida (first shad taken in the season of 1885).

W. S. BUNTING, Cedar Keys, Fla. 15831. '85. (VII)

CORALS. Eight specimens from the South Sea Islands, including *Fungia*, *Halomitra*, *Astræa*, *Goniastrea*, *Mussa*, *Madrepora*, also some hydroid coral.

Hon. H. F. FRENCH, Assistant Secretary of the Treasury, Washington, D. C. 15832. '85. (XI)

SEA LAMPREY, *Petromyzon marinus* (dried).

W. ST. J. MASYCK, Waverly Mills, S. C. 15833. '85. (VII)

EUROPEAN BADGER, *Meles tazus*, juv., in the flesh.

W. A. CONKLIN, superintendent Central Park Menagerie, New York. 15834. '85. (IV)

SHELLS. Specimens of *Planorbis* and *Physa*.

F. W. HEYWARD, Oakley, S. C. 15835. '85. (IX)

ALLANITE, Samarskite, and Ilmanite.

J. B. COLVARD, Jefferson, N. C. 15836. '85. (XIV)

LARIDÆ. Sixty-eight specimens, 40 species, from various parts of the world. A very valuable lot, embracing a number of species new to the collection, among them a North American bird, *Larus affinis*, Reink.

HOWARD SAUNDERS, London, England. 15837. '85. (V, A)

PURPLE FINCH, *Carpodacus purpureus* ♂, in the flesh.

WILLIAM BURDINE, Washington, D. C. 15838. '85. (V, A)

CORUNDUM (Crystal of Ruby), from Towns County, Georgia, and one specimen of massive ruby, from Shooting Creek, Clay County, N. C.

C. M. YEATES, Washington, D. C. 15839. '85. (XIV)

IRON METEORITE, from Santa Rosa, Coahuila, Mexico.

Prof. N. T. LUPTON, Nashville, Tenn. 15840. '85. (XIV)

IRON PYRITE in slate, pyrrhotite in quartz, and galena in quartz, from Georgia.
For examination.

Hon. J. C. CLEMENTS, House of Representatives. 15841. '85. (XVI)

ORES, from the Franklin and McDonald mine, Georgia.

JAMES MCCREIGHTON (through General Land Office), 430 Walnut street,
Philadelphia. 15842. '85. (XVI)

FISHES. Alcoholic specimens of *Pinephales promelas*, Raf. Mostly females.

SAMUEL MCCLELLAND, Salt Springs, Mo. 15843. '85. (VII)

PLANTS AND GRASSES.

H. H. ROTTAKEN, Little Rock, Ark. 15844. '85. (XIII, B)

Planted in the Government Carp Ponds.

HEAD OF BISON, *Bison americanus* (mounted).

Brig. Gen. STEPHEN V. BENÉT, U. S. A., Washington. 15845. '85. (IV)

BOTTLE-NOSE DOLPHIN, *Tursiops tursio* (skull); from Indian Creek, Biscayne Bay,
Florida.

H. D. PIERCE, Lake Worth, Florida. 15846. '85. (IV)

STALACTITE. Two specimens from Missouri.

G. M. CLEMENS, Midway, Boone County, Mo. 15847. '85. (XV)

STONE IMPLEMENTS. Seventeen specimens, including chipped celts and arrow and
spear-heads.

G. M. CLEMENS, Midway, Boone County, Mo. 15847. '85. (III)

STONE IMPLEMENTS. Four celts and 17 notched axes.

M. LOUIS GUESDE, Pointe-à-Pitre, Guadeloupe. 15848. '85. (III)

STONE IMPLEMENTS from McNairy County, Tennessee.

C. H. WRIGHT, Adamsville, McNairy County, Tenn. 15849. '85. (III)

PORPOISE, *Delphinus delphis* (head), from near Parramore's Beach Station, Va.

N. B. RICH, keeper U. S. life-saving station. 15850. '85. (IV)

ORES. Two specimens from the Belle mica mine, of Custer County, Custer mining
district, Dakota Territory.

WILLIAM NEVIN, Custer City, Dak. 15851. '85. (XIV)

SEA MOSSES from the water-front of navy-yard at Pensacola, Fla.

EDWIN CRISSEY, U. S. N., U. S. navy-yard, Pensacola, Fla. 15852. '85. (XI)

HAWK, *Circus hudsonius* ♀ ad. in the flesh.

A. F. WOOSTER, Norwalk, Conn. 15853. '85. (V, A)

CROWN OF HUMAN SKULL, *Homo sapiens*, found on the Lower San Joaquin River,
near Borden, Fresno County, Cal. Race unidentifiable.

T. S. PRICE, Borden, Cal. 15854. '85. (IV)

NEST AND EGGS of White-rumped Shrike, *Lanius ludovicianus excubitorides*.

T. S. PRICE, Borden, Cal. 15854. '85. (V, B)

SHELLS. Installment of the North European and British collection of the late Dr.
Gwyn Jeffreys. Purchased.

J. GWYN JEFFREYS (through HOWEL JEFFREYS), 61 Bedford Gardens, Ken-
sington, London. 15855. '85. (IX)

GREAT HORNED OWL, *Bubo virginianus*. Living specimen.

J. C. WILSON, Sligo, Montgomery County, Md. 15856. '85. (V, A)

FOSSILS from Orbitoides rock (Oligocene), Tampa, Fla.

JOSEPH WILLCOX, Media, Pa. 15857. '85. (XIII, A)

STONE AND SHELL IMPLEMENTS, including flakes and rude implements of palcolithic type from the surface of a mound in Hernando County, Florida, and two celt-like shell implements from Cedar Keys, Fla.

JOSEPH WILLCOX, Media, Pa. 15857. '85. (III)

FOSSILS, chiefly *Orbitoides* and other *Foraminifera*, from Vicksburg Oligocene beds.

JOSEPH WILLCOX, Media, Pa. 15857. '85. (IX)

CHALCEDONY. Five specimens from Florida.

JOSEPH WILLCOX, Media, Pa. 15857. '85. (XIV)

ARCHÆOLOGICAL MAPS AND ANTIQUITIES from Mexico.

LOUIS H. AYMÉ, Oaxaca, Mexico. 15858. '85. (III)

POTTERY. A small collection of ancient American pottery. Earthen pot, ornamented. Earthen tripod, ornamented. Pottery fragments, human face. Pottery tube, with animal's head. Pottery fragments, human head. Pottery fragment, frog. Stone pendant, carved. Stone beads (4.) Stone beads. Polishing-stone, or celt.

LOUIS H. AYMÉ, Oaxaca, Mexico. 15858. '85. (II, B)

ORE, containing arsenical pyrites and zinc-blende, with a little iron pyrites, in quartzite rock.

F. W. LEDBITTER, Weatherford, Tex. 15859. '85. (XIV)

FOSSILS AND STONE IMPLEMENTS.

DR. NAT. R. NELSON, White's Creek, Davidson County, Tenn. Returned. 15860. '85. (XII A and III)

GEOLOGICAL SPECIMENS.

GEORGE T. STORER, Winnegance, Sagadahoc County, Me. 15861 '85. (XV)

BIRD SKINS. Eight specimens from Colorado: *Dendroica aestiva* (Summer Yellow-bird); *Sturnella neglecta* (Western Meadow Lark); *Dendroica auduboni* (Audubon's Warbler); *Cyanocitta stelleri macrolopha* (Long-crested Jay); *Geothlypis macgillivrayi* (Macgillivray's Warbler); *Picus villosus harrisi* (Harris' Woodpecker); *Poæcetes gramineus confinis* (Western Grass Finch); *Sphyrapicus thyroideus* (Black-breasted Woodpecker).

DENIS GALE, Philadelphia, Pa. 15862. '85. (V, A)

NESTS AND EGGS. Eighty-six eggs and two nests from Colorado.

DENIS GALE, Philadelphia, Pa. 15862. '85. (V, B)

RICHARDSON'S OWL, *Nyctale richardsoni*.

F. H. KING, River Falls, Wis. 15863. '85. (V, A)

FOSSIL LEAVES (21), from Silver Cliff, Colo.

MR. CROSS, U. S. Geological Survey. 15864. '85. (XIII, A)

FOSSIL PLANTS (50), from Crested Butte, Gunnison County, Colo.

G. H. ELDRIDGE, U. S. Geological Survey. 15865. '85. (XIII, A)

FOSSIL PLANTS (30), from Deer Creek coal fields, Arizona.

CHARLES D. WALCOTT, U. S. Geological Survey. 15866. '85. (XIII, A)

CARBONIFEROUS FOSSIL PLANTS (65) from Centreville, Tenn.

IRA SAYLES, U. S. Geological Survey. 15867. '85. (XIII, A)

FOSSIL WOOD (3) from Vermilion Cliffs, Southern Utah.

CHARLES D. WALCOTT, U. S. Geological Survey. 15868. '85. (XIII, A)

FOSSIL SHELLS of the Jacksonian Group. Eocene period. From Jackson, Miss.

F. A. SAMPSON, Sedalia, Mo. 15869. '85. (XII, B)

DOWNY WOODPECKER, *Picus pubescens* (Skin).

JAMES W. ROGAN, Rogersville, Tenn. 15870. '85. (V, A)

TORTOISE, *Xerobates polyphemus* (?).

T. K. GODBY, Waldo, Fla. 15871. '85. (VI)

ERUPTIVE ROCKS AND TUFFA. One hundred and fifty specimens from California, Nevada, Oregon, and Utah.

I. C. RUSSELL, U. S. Geological Survey. 15872. '85. (XV)

LIMESTONE CONCRETION. Returned.

SAMUEL B. WALTON, Battle Creek, Calhoun County, Mich. 15873. '85. (XIV)

*ETHNOGRAPHIC OBJECTS, from Zuñi, N. Mex.

JAMES STEVENSON, Bureau of Ethnology, Smithsonian Institution. 15874. '85. (II, A)

SACRIFICIAL YOKE (carved stone) and Pottery, from Mexico. Sent for inspection.

SUZARTE & WHITNEY, New York City. 15875. '85. (II)

MUSKRAT, *Fiber zibethicus* and Semi-albino, in the flesh.

H. K. LANDIS, Landis Valley, Pennsylvania. 15876. '85. (IV)

BIRDS. Twenty-three specimens, 18 species, from various localities.

H. K. COALE, Chicago, Ill. 15877. '85. (V, A)

BEETLE, *Dynastes tityus*. ♀

JAMES W. ROGAN, Rogersville, Tenn. 15878. '85. (X)

GOLDEN-CROWNED KINGLET, *Regulus satrapa*. ♂

JAMES W. ROGAN, Rogersville, Tenn. 15878. '85. (V, A.)

FISHES, from Mexico. Twenty-four alcoholic specimens.

ALPHONSO FORRER, Santa Cruz, Cal. 15879. '85. (VII)

REPTILES, including *Stenosaura cycluroides* (4), *Sceloporus magister* (3), *Leptodactylus caliginosus* (5), *Phyllomedusa daenicolor* (4), *Hyla* (2), *Cinosternum scorpioides* (2), *Hyla baudini* (1), *Cnemidophorus sexlineatus* (1), *Rana halecina* (1), and one other specimen unidentified. From Northwestern Mexico.

ALPHONSE FORRER, Santa Cruz, Cal. 15879. '85. (VI)

SEA-URCHINS and Star-Fishes (dried), from the west coast of North America.

ALPHONSE FORRER, Santa Cruz, Cal. 15879. '85. (XI)

STONE IMPLEMENTS. Two celts, one boat-shaped specimen, and four fragments of spear-heads.

W. C. JIRDINSTON (through Prof. F. W. CLARKE). 15880. '85. (III)

MARINE INVERTEBRATES. Star-fish, from Lower California, and Sea-urchin, *Strongylocentrotus purpuratus*, from the Farallone Islands.

C. H. TOWNSEND, Washington Territory. 15881. '85. (XI)

SNAKE, from Cerros Island, Lower California, and *Sceloporus*, from the coast of Lower California.

CHARLES H. TOWNSEND, Washington Territory. 15881. '85. (VI)

ARROW-HEADS (7), from Gaffney City, S. C.

Mrs. C. E. GILBERT. 15882. '85. (III)

COINS (8). English half-penny, 1723; Token, stamped "A. H.," no date; Two centimes, 1822; Two centimes, 1827; Portuguese penny, 1821; Belgian two-cent piece, 1834; Penny, 1829.

Mrs. E. P. TEDSDALE, Dorchester County, Maryland. 15883. '85. (I)

* For list see Part II, p. 65.

PERFORATED PLATE. Said to have been brought from England by Edward Wright, one of the early settlers of Somerset County, Maryland, in 1668.

Mrs. E. P. TEDSDALE, Dorchester County, Maryland. 15883. '85. (I)

ANTLERS OF *Cervus alces*, from Norway.

STAVANGER MUSEUM, Stavanger, Norway. 15884. '85. (IV)

SEA ELEPHANTS, *Macrorhinus angustirostris*. Eight skins and six complete skeletons, with parts of skeletons, from San Cristobal Bay, Lower California.

CHARLES H. TOWNSEND, Smithsonian Institution. 15885. '85. (IV)

MAMMALS: *Phalangista fuliginosa*, *Bettongia curriculus*, *Perameles gunnii*, *Perameles obesula*, *Dasyurus maculatus*, and *Echidna hystrix*.

C. G. H. LLOYD, Bryn Estyn, New Norfolk, Tasmania. 15886. '85. (IV)

SNAKE SKIN, from Tasmania.

C. G. H. LLOYD, Bryn Estyn, New Norfolk, Tasmania. 15886. '85. (VI)

SAND containing garnets.

CHRISTIAN NELSON, Virginia City, Mont. 15887. '85. (XIV)

CENTIPEDE, *Scolopendrus* sp., from Napa County, California.

H. W. TURNER, U. S. Geological Survey, San Francisco, Cal. 15888. '85. (X)

RODENT, *Sorex* sp., from geysers in Sonoma County, California.

H. W. TURNER, U. S. Geological Survey, San Francisco, Cal. 15888. '85. (IV)

LIZARD, *Gerrhonotus*, from Lake County, California.

H. W. TURNER, U. S. Geological Survey, San Francisco, Cal. 15888. '85. (VI)

UNIONIDÆ and miscellaneous land and fresh-water shells from New York, Iowa, and other localities.

R. ELLSWORTH CALL, Des Moines, Iowa. 15889. '85. (IX)

INDIAN IMPLEMENTS. A bone fish-hook and bone perforator from the grave of an Indian chief, on the present site of Clarksville, Clark County, Ind.

JOHN H. STOTSENBERG, New Albany, Ind. 15890. '85. (III)

PINITE, from Milton, Mass.

G. P. MERRILL, U. S. National Museum. 15891. '85. (XIV)

BIRD SKINS (8), collected by Mr. Fairbank, in Wadale, India; including *Corychus saclaris*, *Pratincola caprata*, *Malacocercus melcolmi*, *Euspiza melanocephala*, *Spizolanda deva*, *Ploceus baya*, *Passer indicus*, *Passer flavicollis*.

JOSEPH S. HANCOCK, Chicago, Ill. 15892. '85. (V, A)

BOAT MODEL. Smack "Jeff. Brown," of Key West, Fla.

WILLIAM C. PIERCE, Key West, Fla. 15893. '85. (I)

BOAT MODEL. Key West sponge-sloop.

LAWRENCE HIGGS, Key West, Fla. 15894. '85. (I)

BOAT MODELS. Schooner-smacks "City of Havana" and "Emma L. Lowe," of Key West.

WILLIAM J. ALBURY, Key West, Fla. 15895. '85. (I)

LICHEN. A carposporous plant from Saint John's River, Florida.

J. L. ZABRISKI, Nyack, N. Y. 15896. '85. (XVII)

MUSK DEER, *Moschus moschiferus*, in the flesh.

W. A. CONKLIN, superintendent Central Park Menagerie, New York. 15897. '85. (IV)

KAOLIN, or PORCELAIN CLAY.

W. P. COUPEE, Leesburg, Fla. 18898. '85. (XIV)

LEPOMIS CYANELLUS (4), from Texas.

G. H. RAGSDALE, Gainesville, Tex. 15899. '85. (VII)

BIRDS (59), from Texas. For identification.

G. H. RAGSDALE, Gainesville, Tex. 15899. '85. (V, A)

REPTILES (15), from Texas; including *Caudisoma*, *Cyclophis æstivus*, *Coluber*, *Ophibolus*, *Cnemidophorus*, *Sceloporus*, *Hyla*, etc.

G. H. RAGSDALE, Gainesville, Tex. 15899. '85. (VI)

BIRD SKINS (5), two from Texas, two from France, and one from New Zealand. For exchange.

THOMAS McILWRAITH, Hamilton, Ontario, Canada. 15900. '85. (V, A)

BARIUM SULPHATE, or barytes, from Missouri. Used for adulterating white lead.

B. A. SHEPLEY, Des Arc, Iron County, Mo. 15901. '85. (XIV)

HORNBLLENDE.

GEORGE F. STORER, Winnegance, Me. 15902. '85. (XV)

DISINFECTANT. Manufactured by the Ravenswood Chemical Company.

RAVENSWOOD CHEMICAL COMPANY, Long Island City, N. Y. 15903. '85. (I)

MINERALS. Three specimens from Nova Scotia and New Jersey: chalcocite and malachite (1), datolite and pyrolusite.

N. H. DARTON, New York, N. Y. 15904. '85. (XIV)

SHELLS. Installment of the collection of J. Gwyn Jeffreys.

J. GWYN JEFFREYS (through HOWEL JEFFREYS, 61 Bedford Gardens, Kensington, London, England). 15905. '85. (IX)

TEREDO-BORED WOOD. Piece of main topmast of a fishing-vessel wrecked on Brown's Bank.

Capt. S. J. MARTIN, Gloucester, Mass. 15906. '85. (IX)

BIRD SKINS collected by Edward M. Brigham, principally from Para, Brazil, for determination and selection of desiderata. Forty-two specimens, 32 species, have been retained, of which the following are new to the collection: *Monasa morpheus*, *Picinsareus cirrhatius*, *Dendronis eytoni*, *Dendrex etastes* sp. nov.; *Nasica longirostris*, 2 specs., *Pipula cujubi*, *Icterus cayennensis*, *Gallula cyaneicollis*, *Trogon meridionalis*, *Pteroglossus inscriptus*, 2 specs., ♂ and ♀; *Brologerys irrescens*, *Urochroma purpurata*, 2 specs., ♂ and ♀; *Caica leucogastra*.

Prof. D. S. JORDAN, Bloomington, Ind. 15907. '85. (V, A)

VOLCANIC DUST, from Harlan County, Nebraska. These specimens formed the basis of an article by Mr. George P. Merrill on deposits of volcanic dust and sand in Southwestern Nebraska. (See "Proc. U. S. Nat. Mus.," viii, May 23, 1885, pp. 99, 100.)

HENRY ZAHN, Plattsmouth, Nebr. 15908. '85. (XV)

WHITE-BELLIED NUT-HATCH, *Sitta carolinensis*, and Yellow-throated Warbler, *Dendroica dominica*.

JAMES W. ROGAN, Rogersville, Tenn. 15909. '85. (V, A)

ARROW-HEADS.

JAMES W. ROGAN, Rogersville, Tenn. 15909. '85. (III)

STONE IMPLEMENTS (2).

J. M. SPAINHOUR, Lenoir, N. C. 15910. '85. (III)

FAN, of shell and bone of tortoise, from Key West, Fla.

JOSEPH W. COLLINS, U. S. Fish Commission. 15911. '85. (I)

CALCAREOUS SINTER. Sample of a deposit from the Quelitas Ranch Springs, Valencia County, New Mexico.

L. AND H. HUNING, Las Lunas, N. Mex. 15912. '85. (XIV)

LAND AND MARINE SHELLS, from the San Pablo Plantation, at the mouth of the Saint John's River, Florida.

Dr. E. HAWORTH, Mayport, Duval County, Fla. 15913. '85. (IX)

PALMETTO CROWN, from the San Pablo Plantation, at the mouth of the Saint John's River, Florida.

Dr. E. HAWORTH, Mayport, Duval County, Fla. 15913. '85. (I)

GALENA, Zinc-blende, Siderite, and Quartz.

H. P. STUFFLEBEAM, Delaney, Madison County, Ark. 15914. '85. (XIV)

WOOLS. Valuable samples from various localities.

GEORGE W. BOND, Boston, Mass. 15915. '85. (I)

AXIS DEER, *Cervus axis*, in the flesh.

W. A. CONKLIN, superintendent Central Park Menagerie, New York. 15916. '85. (IV)

BIOTITE MICA.

MICKE HENDRICKSEN, Rocky Point, Mont. 15917. '85. (XIV)

FISHES, collected by the U. S. Fish Commission steamer Albatross.

U. S. FISH COMMISSION, Washington, D. C. 15918.* '85. (VII)

MARINE INVERTEBRATES.

U. S. FISH COMMISSION, Washington. 15918. '85. (XI)

REPTILES.

U. S. FISH COMMISSION, Washington. 15918. '85. (VI)

INSECTS. About 300 specimens, 50 species.

U. S. FISH COMMISSION, Washington. 15918. '85. (X)

GEOLOGICAL SPECIMENS, from the West Indies. Collected by Ensign A. A. Ackerman, U. S. N.

U. S. FISH COMMISSION, Washington. 15918. '85. (XV)

QUARTZ (10) and Calcite (1). Collected by Ensign A. A. Ackerman, U. S. N.

U. S. FISH COMMISSION, Washington. 15918. '85. (XIV)

SHELLS, from the West Indies. Collected by Ensign A. A. Ackerman, U. S. N.

U. S. FISH COMMISSION, Washington. 15918. '85. (IX)

FOSSIL BONES AND SHARK'S TEETH. (Latter returned.)

MCDONOUGH INSTITUTE, McDonough, Md. 15919. '85. (VIII)

MIRROR CARP, *Cyprinus carpio*.

R. J. DONALDSON, Georgetown, S. C. 15920. '85. (VII)

BROWN HAWK OWL, *Minox scutulata*, probably from the East Indies.

C. B. CORY, Boston, Mass. 15921. '85. (V, A)

FISH-TRAP, for catching pickerel through the ice.

EDWARD A. GOULD, Falmouth, Mass. 15922. '85. (I)

EMBRYO FISHES (alcoholic).

Miss ROSA SMITH, San Diego, Cal. 15923. '85. (XVII)

BLACKFISH, *Globiocephalus melas* (skeleton).

BAILEY T. BARCO, keeper life saving station No. 3, sixth district, Sand Bridge, Va. 15924. '85. (IV)

*All the collections having this number were made by the naturalists on the Fish Commission steamer Albatross, in the winter of 1884-'85.

SHELLS, from Dr. Isaac Lea.

Dr. ISAAC LEA, Philadelphia, Pa. 15925. '85. (IX)

FISHES: *Oncorhynchus chouicha*, *Brama raii*, *Merlucius productus*, *Clupea mirabilis*, *Chimæra coliei*, *Parophrys vetulus*, *Clupea sapidissima*, *Squalus acanthias*, *Trichodon stelleri*, *Cottopsis asper*, *Micrometrus aggregatus*, *Icosteus ænigmaticus*, *Lumpenus anguillaris*, *Osmerus thaleichthys* (alcoholic).

Dr. AUG. C. KINNEY, Astoria, Oreg. 15926. '85. (VII)

SEA ELEPHANT, *Macrorhinus angustirostris* (skull and bones), from South California.

CHARLES H. TOWNSEND, Smithsonian Institution. 15927. '85. (IV)

BIRD SKINS (28 specimens, 12 species), from Massachusetts, Maine, and South Carolina, including ♂ and ♀ juv. of *Helonæ swainsoni*, Bachman's finch, *astivalis bachmanni*, and *Peucaea*.

WILLIAM BREWSTER, Cambridge, Mass. 15928. '85. (V, A)

LIZARD, *Amblystoma* (alcoholic), from Lake County, California.

H. W. TURNER, U. S. Geological Survey, San Francisco, Cal. 15929. '85. (VI)

STONE IMPLEMENTS AND POTTERY. One hundred and ninety-eight specimens from stone ruins near Mesa City and Phoenix, Ariz.

Collection from stone ruins near the Pima Agency: A stone mortar, a small stone carving in the shape of a bird, digging-tools, grooved axes, arrow-shaft straighteners, an incised stone, and a turquoise pendant; 18 specimens.

"These ruins," says Mr. Palmer, "consist of small houses, of one or more rooms, and do not form a village, but are scattered. The walls are built in the same manner as the Rio Verde building. Remains of cisterns are still to be seen."

Collection from adobe ruins, $2\frac{1}{2}$ miles from Mesa City: Chipped quartzite disks, cutting-tools, grooved mauls, rubbing-stones, a paint-mortar, stone balls used in games, large stone mortars, and fragments of shell ornaments; 20 specimens.

Collection from adobe ruins near Phoenix: A clay spindle-whorl, a paddle-shaped wooden implement used in making pottery, and fragments of shell ornaments; 17 specimens.

Mr. Palmer says: "At a distance the ruins appear like ordinary Indian mounds, and vary from 5 to 20 feet in height. Correctly speaking, the walls are not of adobe, but are made of adobe earth or mud, which is pressed into large wooden boxes, and when it is sufficiently dry, the box is raised up, moved along, and again filled.* The inner surfaces of the walls are made smooth, and sometimes covered with a whitewash."

E. PALMER, National Museum. 15930. '85. (III)

SPONGES. Fresh-water specimens from Arizona.

E. PALMER, National Museum. 15930. '85. (XI)

ETHNOGRAPHIC OBJECTS, from the Pima Indians, Arizona.

E. PALMER, National Museum. 15930. '85. (II)

MOLE, *Hesperomys leucopus*, from District of Columbia.

ALBERT KOEBELE, Department of Agriculture. 15931. '85. (IV)

GARFIELD PLAQUE, made by Royal Worcester Company, London, England.

M. W. BEVERIDGE, Washington, D. C. 15932. '85. (I)

SAND PIKE OR LIZARD FISH, *Synodus fætens* (alcoholic).

VINAL N. EDWARDS, Wood's Holl, Mass. 15933. '85. (VII)

* A similar account is given by Mr. J. R. Bartlett in his "Personal Narrative." (Vol. II, p. 277.)

FOSSILS (Hudson River Group) from Ohio. (1) Common trilobite, *Calymene senaria*. An incrusting hyozoon which, aided by a little carving, gives a curious form to the head. The small crinoidal plates probably formed the lower portion of the arm of a crinoid. (2) Apparently a portion of a crinoid.

R. W. MERCER, Cincinnati, Ohio. 15934. '85. (XII, A)

ANCIENT TABLET (cast), bearing incised figures somewhat analogous to those on the well-known "Cincinnati Tablet." The original consists of compact Waverly sandstone of a bluish-gray color in the fracture. The polished surfaces are of a light-brown color, apparently produced by the material used in polishing. The original was found in a mound near Waverly, Pike County, Ohio.

J. P. MACLEAN, Hamilton, Ohio. 15935. '85. (III)

SEA-HORSE, *Hippocampus heptagonus*.

D. M. TATE, Kitty Hawk, N. C. 15936. '85. (VII)

EGG OF GRAY PARROT, *Psittacus erithacus*; laid in captivity.

WYNDHAM LEYWOOD, Gainesville, Va. 15937. '85. (V, A)

YELLOW SPHENE. Believed to be the first specimen of the kind found in the District of Columbia.

G. P. MERRILL, National Museum. 15938. '85. (XIV)

STRIPED MUMMY, *Mollienesis latipinna*, and three specimens of *Notemigonus americanus*, from Lake Monroe, Florida.

WILLIAM H. DALL, U. S. Geological Survey. 15939. '85. (VII)

DIADOPHIS PUNCTATUS, from Gainesville, Fla.

WILLIAM H. DALL, U. S. Geological Survey. 15939. '85. (VI)

STONE IMPLEMENTS. Eight flint flakes and a piece of worked bone, from 1½ feet below the surface. Found in a railway cutting near Gainesville, Fla.

WILLIAM H. DALL, U. S. Geological Survey. 15939. '85. (III)

STONE CARVING, representing a bird's head; from Wabash County. Three stone pipes, a ceremonial weapon, and a trowel-shaped object of stone from the neighborhood of Marion, Grant County, Ind.

Dr. J. C. NEAL, Archer, Fla. 15940. '85. (III)

BUILDING-STONE, from North Carolina.

Donor unknown. 15941. '85. (XV)

MOUSE, *Hesperomys leucopus*.

Dr. R. W. SHUFELDT, Fort Wingate, New Mexico. 15942. '85. (IV)

HORNED GREBE, *Colymbus auritus*.

WILLIAM HAMLIN, Havre de Grace, Md. 15943. '85. (V, A)

SMALL-MOUTHED BLACK BASS, *Micropterus dolomieu*, and Wall-eyed Pike, *Stizostedion vitreum*.

WILLIAM HAMLIN, Havre de Grace, Md. 15943. '85. (VII)

GAZELLE, *Gazella dorcas*, in the flesh.

W. A. CONKLIN, superintendent Central Park Menagerie, New York City. 15944. '85. (IV)

SHAD ROE AND SMELT. A well-marked case of hermaphroditism, in which the transition from the histological character of the ovary to that of the spermmary may be observed.

J. C. WIGGLESWORTH, Wilmington, Del. 15945. '85. (VII)

QUARTZ, containing hematite.

J. M. TROUT, Troutsville, Va. 15946. '85. (XIV)

SKULLS AND BONES of *Homo sapiens*.

W. E. WOODWARD, Roxbury, Mass. 15947. '85. (IV)

ANTELOPE, *Damalis pygarga*, and BABOON, *Cynocephalus anubis*, in the flesh. From Cape of Good Hope.

W. T. HORNADAY, U. S. National Museum. 15948. '85. (IV)

ARROW-HEADS.

Mrs. M. R. BARNES, Beebe, White County, Ark. 15949. '85. (III)

SLOTH, *Cholopus Hoffmanni*, in the flesh.

ZOOLOGICAL SOCIETY OF PHILADELPHIA, Philadelphia, Pa. 15950. '85. (IV)

BUILDING-STONES, four samples from Pitkin, Colo., and one from Minnesota.

JOHN S. F. BATCHEN, Chicago, Ill. 15951. '85. (XV)

FOSSILS.

W. R. LIMPERT, Golden, N. Mex. 15952. '85. (XII, A)

HEN'S EGG. Specimen of an "egg within an egg."

Mrs. C. W. DAVIS, Washington, D. C. 16953. '85. (V, A)

PARASITES taken from birds. Five vials.

JOSÉ C. ZELEDON, San José, Costa Rica. 15954. '85. (XVII)

FOSSIL MOLLUSKS, from the Eocene and Oligocene limestones of Florida and South America.

WILLIAM H. DALL, U. S. Geological Survey. 15955. '85. (IX)

SHELLS, *Unio*, *Ampullaria*, *Melania*, and *Vivipara*, from Florida shell-mounds at Enterprise on Lake Monroe, and Satsuma, Saint John's River, 20 miles south of Jacksonville.

WILLIAM H. DALL, U. S. Geological Survey. 15956. '85. (IX)

MARINE SHELLS, from Cedar Keys, Fla., and *Haliotis tubifera* L., from Japan.

WILLIAM H. DALL, U. S. Geological Survey. 15957. '85. (IX)

LAND AND FRESH-WATER SHELLS (dry and alcoholic), from the interior of Florida, Alachua County, and localities along the Saint John's River, south to Lake Monroe.

WILLIAM H. DALL, U. S. Geological Survey. 15958. '85. (IX)

MARINE SHELLS, seven species, including *Neritina* and *Limnaea* from Florida Keys, Palma Sola, and the mouth of Saint John's River, Florida.

ISAIAH GREGG, Jacksonville, Fla., 15959. '85. (IX)

SHELLS, *Unio*, *Ampullaria*, and *Neritina*, from Lake Monroe, Florida, and *Helix melanostragus* from Borneo, East Indies.

General F. E. SPINNER, Jacksonville, Fla. 15960. '85. (IX)

SHELLS, *Terebra concava* Say, from South Carolina, and *Murex spinicostatus*, from Pawley's Island, South Carolina. Both rare.

W. G. MAZYCK, Charleston, S. C. 15961. '85. (IX) For examination.

MATERIA MEDICA. Specimen of *Canutillo Mexicana*.

J. W. COLCORD, Lynn, Mass. 15962. '85. (I)

GREAT WATER BUG, *Belostoma americanum*, caught in the engine room at electric-light station, Hell Gate, New York. For identification.

D. W. FOX, Astoria, N. Y. 15963. '85. (X)

CRABS. Specimens of small crabs which climb trees and live under logs, from southwest coast of Florida.

JOSEPH WILLCOX, Meadville, Pa. 15964. '85. (XI)

OLD COIN, for examination.

G. B. HASSETT, Alma, Crawford County, Ark. 15965. '85. (Sent to U. S. Mint, Philadelphia.)

TURTLE-SHELL and tree frog.

H. G. HODGE, York, Clark County, Ill. 15966. '85. (VI)

COFFEE-NUT POD; nail from stomach of hog; wheat and nuts.

H. G. HODGE, York, Clark County, Ill. 15966. '85. (I)

STONE IMPLEMENTS (27), 8 flakes, 16 arrow-heads, 2 hammer-stones, and 1 celt, from Clark County, Illinois.

H. G. HODGE, York, Clark County, Ill. 15966. '85. (III)

WOOD. Two specimens from Clark County, Illinois.

H. G. HODGE, Clark County, Illinois. 15966. '85. (XIII, B)

FRESH-WATER SHELLS, from Wabash River, Illinois.

H. G. HODGE, Clark County, Illinois. 15966. '85. (IX)

GOLDEN DARTER, *Hadropterus aurantiacus*: one of the southern Darters.

Dr. J. A. WATSON, Asheville, N. C. 15967. '85. (VII)

NEST AND EGGS (4) of Black-chinned Sparrow, *Spizella atrigularis*. The first set of eggs of this species known to have been taken.

G. E. BLAISDELL, Poway, Cal. 15968. '85. (V, A)

EARTH from an Indian grave at Roxbury, Mass.

W. E. WOODWARD, Roxbury, Mass. 15969. '85. (IV)

HEMATITE IRON (2 specimens), from Maricopa County, Arizona. For report.

J. B. FORD, Phoenix, Maricopa County, Ariz. 15970. '85. (XIV)

SEALING WAX. Samples of ingredients and manufactured products.

- (1) Bottles containing the following ingredients: Shellac, lac, bleached shell, A. G. garnet, rosin, white rosin, whiting, barytes, powdered tartaric acid, gam camphor, carbonate magnesia, Venetian turpentine, oxychloride bismuth, vermilion Engl., red, carmine, gold, spangled, blue, ultramarine blue, emerald green, brown, ivory black, bottle green, French gray, bronze, pink, lavender, pearl, Indian red.
- (2) One set, each grade, commercial wax in sticks of sizes 4, 6, 10, 20, 40.
- (3) Assorted colors bottling wax 6^s.
- (4) One cabinet, displaying various colors in 10, 20, 40.
- (5) Samples tobacco wax.
- (6) Package wax.
- (7) Department wax.
- (8) Sealing-wax in the rough, before molding.
- (9) Unfinished wax before being ironed.
- (10) One box assorted colors. Perfect. 40^s.
- (11) One box assorted colors. Perfect. 20^s.

DENNISON MANUFACTURING COMPANY, Boston, Mass. 15971. '85. (I)

STONE AXES (2), &c., from an Indian mound.

WILLIAM ANDERSON, Corning, Ohio. 15972. '85. (III)

FLINT IMPLEMENT (large, shuttle-shaped) notched at one end. Found in Gilmer County. No similar specimen in the collection. Purchased, \$2.

HORACE M. ELLINGTON, Ellijay, Ga. 15973. '85. (III)

ORCHARD ORIOLE, *Icterus spurius*, adult male.

JAMES W. ROGAN, Rogersville, Tenn. 15974. '85. (V, A)

MEDAL. Copy of the medal struck by the American Numismatic Society to commemorate the Centennial celebration of the evacuation of New York by the British, and the erection by this chamber of the statue of Washington on the sub-treasury building in Wall street, New York.

CHAMBER OF COMMERCE, New York. 15975. '85. (II)

OWL, *Strix nebulosa*, in the flesh.

WILLIAM R. LIGHTON, Ottumwa, Iowa. 15976. '75. (V, A)

NODULAR CARBONATE OF IRON (2). (Laramie Age.) From Grand River, Dakota, near Black Horse Butte. Collected by Bailey Willis, October, 1884.

J. S. DILLER, U. S. Geological Survey, Washington. 15977. '85. (XV)

HISTORICAL STATEMENT relating to the original Morse telegraph instrument; signed by Albert Vail.

STEPHEN VAIL, New York City. 15978. '85. (I)

GOLDEN EYE, *Hyodon alosoides*, 14 inches long, from Yallabusha River.

J. H. CAMPBELL, Grenada, Miss. 15979. '85. (VII)

ANCIENT COPPER COIN found 4 miles from London, England. Returned.

I. K. STRACHAN, Winnipeg, Manitoba. 15980. '85. (II)

MISCELLANEOUS COLLECTION from the museum of Tokio, Japan, including vegetable, animal, and mineral specimens, a book containing specimens of woods, and five volumes devoted to botany. Purchased, \$37.50.

HENRY G. SEAVER, Brooklyn, N. Y. 15981. '85.

GOVERNOR PRUNING HOOK. Combined knife and saw for pruning.

R. T. HUNN, Babylon, N. Y. 15982. '85. (Sent to U. S. Carp Ponds.)

BIRD SKINS. One hundred and seventy-nine specimens, 73 species, chiefly land birds.

Dr. W. H. FOX, Rockwood, Tenn. 15983. '85. (V, A)

FOLDING ANCHORS (2), showing the construction of the "Chester" model.

Capt. H. C. CHESTER, Wood's Holl, Mass. 15984. '85. (I)

AUSTRALIAN PLANTS. Thirty specimens.

FRANK H. KNOWLTON, U. S. National Museum. 15985. '85. (XIII, B)

HERBARIUM. A fine and extensive collection, containing 15,000 specimens (5,000 species) with large collections of seeds, herbarium cores, paper, etc.

LESTER F. WARD, U. S. Geological Survey, 15986. '85. (XIII, B)

ORE OF MANGANESE (impure) and a mineral of the hornblende group.

CHARLES J. PERKINS, Daggett, Cal. 15987. '85. (XIV)

LIGNITE, from a coal bank in Bienville Parish, Louisiana.

C. J. BARROW, New Orleans, La. 15988. '85. (XVI)

COAL, from near Seattle, Wash. Possibly lignitic anthracite from the Tertiary formation, metamorphosed by local volcanic disturbance.

G. H. WATSON. 15989. '85. (XVI)

TRACING on linen cloth or indicator cards from the steam-engine used to drive the dynamo in illuminating Indian Ridge Colliery, Schuylkill County, Pennsylvania, by means of electric light, September 6, 1884.

E. F. C. DAVIS, Pottsville, Pa. 15990. '85. (XVI)

TRACINGS. One represents the underground operation of the 20-inch bull pump used in draining the Pottsville Shaft Colliery, including cross-sections of the main gangway and sump, and the pump and wagon ways of the pump slope. The other shows the manner in which the two shafts of the colliery were sunk, and indicates with accurate measurements the positions of the Diamond-drill holes used in blasting the rock. This is the deepest coal mine in the United States.

JOHN H. STRAUCH, Pottsville, Pa. 15991. '85. (XVI)

TRACING of ground plan of Kohenoir Colliery at Shenandoah, Pa.; with tidal measurements, illustrative of the photographic work performed for the Smithsonian Institution in 1884. One sketch indicates the position of the breast and the seat of the dynamo used on that occasion.

JOHN H. POLLARD, Ashland, Pa. 15992. '85. (XVI)

ANTHRACITE COAL from the Vesperline rocks of Berkeley County, West Virginia. For examination.

Col. PHILIP G. PENDLETON, West Virginia. 15993. '85. (XVI)

FULGURITE, found 23 feet below the surface.

C. F. MASON, Sumter, S. C. 15994. '85. (XV)

AUDUBON PLATES. Six of the original copper plates of "Audubon's Birds"; framed.

WILLIAM E. DODGE, New York. 15996. '85. (I)

WHITEFISH, *Coregonus clupeiformis* (5) and *C. quadrilateralis*.

FRANK N. CLARK, Northville, Mich. 15997. '85. (VII)

GRAYLING EGGS.

FRANK N. CLARK, Northville, Mich. 15997. '85. (XVII)

CARBONATE OF LIME (impure). From Nemaha County, Kansas.

HENRY B. ROBERTSON, Havensville, Kans. 15998. '85. (XIV)

LIVING SIRENS, *Siren lacertina* (3).

F. W. HAYWARD, Oakley, S. C. 15999. '85. (VI)

LOUISIANA HERON, *Hydranassa tricolor*.

Dr. B. H. WARREN, De Land, Fla. 16000. '85 (V, A.)

REPTILES, *Eutania* and *Crotalus*.

Dr. B. H. WARREN, De Land, Fla. 16000. '85. (VI)

INSECTS.

Dr. B. H. WARREN, De Land, Fla. 16000. '85. (X)

FISHES: *Molliensia latipinna*, *Gambusia patruelis*, *Notemigonus americanus*, *Opisthonema oglini*, *Lepomis punctatus*, *L. mysticalis*, *L. elongatus*, *Amia calva*, and *Amiurus* juv. (alcoholic).

Dr. B. H. WARREN, De Land, Fla. 16000. '85. (VII)

NEOTOMA FLORIDANA (alcoholic).

Dr. B. H. WARREN, De Land, Fla. 16000. '85. (IV)

INDIAN IMPLEMENTS (bone), including perforators, needles, a barbed fish-hook, and a harpoon-head. Also a fragment and entire disk made from human skulls, a carved steatite pipe, and clay pipes of the Iroquois pattern.

J. S. TWINING, Copenhagen, N. Y. 16001. '85. (III) Lent.

PIED-BILLED GREBE, *Podilymbus podiceps*, and Butterball, *Clangula albeola*, from Iowa.

BURDETTE HASSETT, Howard Center, Howard County, Iowa. 16002. '85. (V, A)

OBSCURE ORES, from Dakota.

J. P. FORAN, Custer City, Dak. 16003. '85. (XIV)

HEN EGG. One half, light brown, the other, spotted with white dots.

Mrs. MARY SWITZER, Raphine, Va. 16004. '85. (V, B)

IMPURE LIMESTONE. For examination.

WILLEY STUFFLEBEAM, Delaney, Madison County, Ark. 16005. '85. (XIV)

HUMMING BIRD, *Trochilus colubris*, in the flesh.

JOHN S. WEBB, Disputanta, Va. 16006. '85. (V, A)

CRAYFISH, *Cambarus*, from Chapowamsie Island, Prince William County, Virginia.

Dr. H. C. YARROW, Army Medical Museum, Washington. 16007. '85. (XI)

ANTIQUE COINS. Photographed on tin. Returned.

CHARLES W. LOGAN, Ashland, Oreg. 16008. '85.

LIMESTONE. Two specimens.

HOOSIER STONE COMPANY, Bedford, Ind. 16009. '85. (XV)

TIGER, *Felis tigris*, in the flesh (cub). Born in captivity at Steubenville, Ohio.

ADAM FOREPAUGH, Steubenville, Ohio. 16010. '85. (IV)

OBSCURE ORES. Four specimens for examination.

JOHN FARLEY, Custer City, Dak. 16011. '85. (XIV)

TWO PHOTOGRAPHS: One, of an apparatus for the inside haulage of coal by the "tail-rope" or "endless-rope" system, showing double engines of 100 horse-power and drum; the other, of a self-oiling car-wheel.

THOMAS E. KNAUSS, Nelsonville, Ohio. 16012. '85. (XVI)

INDIAN IMPLEMENTS. A collection of 2,314 specimens from Indiana, Kentucky, North Carolina, and East Tennessee. For inspection. Also a discoidal stone, a flint cutter, and a large flat-sided grooved axe.

W. M. LINNEY, Harrodsburgh, Ky. 16013. '85. (III)

MASTODON TOOTH. *Elephas* sp. Fragments.

Dr. L. H. L. WILLIAMSON, Engle, N. Mex. 16014. '85. (IV)

FOSSILS. Carboniferous limestone containing fragment of *Nautilus*.

Dr. L. H. L. WILLIAMSON, Engle, N. Mex. 16014. '85. (XII, A)

FAT-HEAD (Black-head Minnow) *Pimephales promelas* (alcoholic), from Missouri. For determination.

SAMUEL MCCLELLAND, Salt Springs, Mo. 16015. '85. (VII)

MURGANTIA HISTRIONICA (living). For determination.

JAMES W. ROGAN, Rogersville, Tenn. 16016. '85. (X)

DOUBLE HEN'S EGG.

C. V. RILEY, Department of Agriculture. 16017. '85. (V, B)

SEA-ROBIN, *Prionotus palmipes*, fresh specimen. For determination.

Dr. VIRGIL BUELL, Plainville, Conn. 16018. '85. (VII)

TIGER, *Felis tigris* (cubs), in the flesh.

ADAM FOREPAUGH, East Liverpool, Ohio. 16019. '85. (IV)

REPTILE. *Amblystoma brachysomum* (alcoholic). Type specimen.

O. P. HAY, Indianapolis, Ind. 16020. '85. (VI)

QUARTZ containing pyrite.

CHARLES L. JONES, Amherst, Va. 16021. '85. (XVI)

MAMMAL BONES. *Arctomys flaviventer* (?); *Cariacus* sp. Collected by C. S. L. Stanley at Fault Monitor Mine, Taylor, Nev., 80 feet below the surface. (Through W. H. Dall.)

U. S. GEOLOGICAL SURVEY. 16022. '85. (IV)

ROCK-BASS, Red-eye or Golden-eye (alcoholic). For identification.

EUGENE M. HAWKINS, Huntingdon, Tenn. 16023. '85. (VII)

SIX-LINED LIZARD, *Cnemidophorus sexlineatus* (alcoholic).

EUGENE M. HAWKINS, Huntingdon, Tenn. 16023. '85. (VI)

KELP.

JAMES G. SWAN, Port Townsend, Wash. 16024. '85. (II, A)

H. Mis. 15, pt. 2—14

SNAKES. Twelve alcoholic specimens from Panama, including two young of an Ecuadorian snake. These, with 34 others, were born in the Bay of Panama, *en route* to the Zoological Gardens, New York.

GEORGE W. NELSON, Central Hospital, International Canal, Panama. 16025. '85. (VI)

HAY. Four specimens of the residuum of hay burned by lightning.

ABRAHAM MANN, Rossville, Ill. 16026. '85. (Sent to the Department of Agriculture.)

NORTHERN CABBAGE BUTTERFLY, *Pieris napi*, from Alaska.

WILLIAM H. DALL, U. S. Geological Survey. 16027. '85. (X)

APATITE, used in the manufacture of fertilizers.

PICKFORD & WINKFIELD, London, England. 16028. '85. (XVI)

SNAKE (living).

Donor unknown. 16029. '85. (VI)

STONE AND COAL IMPLEMENTS. A large grooved stone implement of unknown use (sinker?), found $1\frac{1}{2}$ miles east of Santa Fé, Miami County, and a ceremonial or ornamental object made of cannel coal, narrow in the middle and terminating at both ends in semi-lunar-shaped expansions. The narrow part is perforated with two holes. Length, 9 inches. According to Mr. Nissley, the specimen was discovered last summer (1884), by men who were prospecting for gravel suitable for a road on the farm of F. A. Crisler, Greene Township, Jay County. Mr. Crisler and others stated that a plain cylinder-shaped pipe (?), made of hard stone of a light color, occurred with the tablet. Both specimens were found from 4 to 5 feet below the surface during the first day's digging, which also exposed sixteen human skeletons. Nothing could be learned in regard to other relics having been discovered, excepting a clay vessel, said to be about the size of a gallon measure, and taken out in fragments. There is in the collections a cast of a somewhat similar object, of cannel coal, found under the surface in Ross Township, Butler County, Ohio. The cast was sent by Mr. J. P. MacLean, and the original is figured on page 167 of his "Mound Builders." (Cincinnati, 1879.) The specimen acquired from Mr. Nissley is, on account of its size, regular form, peculiar material, and perfect state of preservation, a most valuable addition to the archaeological collection of the National Museum. Purchased, \$15.

J. R. NISSLEY, Bunker Hill, Miami County, Ind. 16030. '85. (III)

DRIED PLANTS. Forming part of W. A. Stearns' Labrador collection.

W. A. STEARNS, Amherst, Mass. 16031. '85. (XIII, B)

WATER SNAKE, *Tropidonotus* sp. (living), from Analostan Island, Potomac River.

HARRY SIMPSON, Washington, D. C. 16032. '85. (VI)

FOSSILS. Cretaceous fossils from California (type of new genus *Coraliochama*, White).

C. R. ORCUTT, San Diego, Cal. 16033. '85. (XII, B)

POTTERY, from New Mexico.

E. W. NELSON, Alma, N. Mex. 16034. '85. (II, B)

MINERAL.

Capt. CHARLES BENDIRE, Fort Custer, Montana. 16035. '85. (XIV)

ARROW-HEAD.

CHARLES RUBY, Fort D. A. Russell, Wyoming. 16036. '85. (III)

POISON WEED.

CHARLES RUBY, Fort D. A. Russell, Wyoming. 16036. '85. (Department of Agriculture.)

HUMMING BIRDS (2). Returned.

Hon. JOHN S. WISE, Richmond, Va. 16037. '85. (V, A)

ECHINOID (1), from Texas.

CHARLES F. BROWN, Hot Springs, Ark. 16038. '85. (XII, B)

ARKANSITE. Seven crystals from Magnet Cove.

CHARLES F. BROWN, Hot Springs, Ark. 16038. '85. (XIV)

CORUNDUM.

Mrs. JOHN E. OSBORNE, Olin, Iredell County, N. C. 16039. '85. (XIV)

COYPU RAT, *Myopotamus coypu*, in the flesh.

ZOOLOGICAL SOCIETY OF PHILADELPHIA. 16040. '85. (IV)

TABLET AND CEREMONIAL STONES. One of the former and three of the latter. Lent.

WILLIAM WALLACE TOOKER, Sag Harbor, N. Y. 16041. '85. (III)

MOLE, *Scalops aquaticus* (living).

R. L. B. CLARK, Washington, D. C. 16042. '85. (IV)

OPHITE MARBLE. Mantel and wainscoting combined. Valuable as showing the wide variations in texture and structural peculiarities common to this stone, and also the effective manner in which these points can be brought out by judicious cutting.

OPHITE MARBLE COMPANY, New York. (F. O. Munroe, secretary.) 16043. '85. (XV)

AUTOTYPES. Two boxes. Reproductions of the works of representative European masters. Purchased.

WILLIAMS & EVERETT, Boston, Mass. 16044. '85. (I?)

YELLOW-BIRD, *Chrysomitris tristis*, ♂; Redstart, *Setophaga ruticilla*, ♂; and Water Thrush, *Sciurus noveboracensis*.

JAMES W. ROGAN, Rogersville, Tenn. 16045. '85. (V, A)

HICKORY WALKING-STICK, from a tree which was planted in commemoration of the inauguration of President Jackson.

JAMES CARTWRIGHT, Ellicott City, Md. 16046. '85. (I)

WOOL. Forty-nine samples.

GEORGE W. BOND, Boston, Mass. 16047. '85. (I)

HARRIS' CHIPMUNK, *Tamias harrisi* (alcoholic).

C. R. ORCUTT, San Diego, Cal. 16048. '85. (IV)

REPTILES (alcoholic specimens from Lower California): *Eutania*, *Phimothya grahami*, *Bascanium*, *Ophibolus getulus boylii*, *Caudisona*, *Pityophis sayi*, *Charina bottæ*, *Crotaphytus*, *Sceloporus* (2).

C. R. ORCUTT, San Diego, Cal. 16048. '85. (VI)

BLACK AND WHITE CREEPER, *Unioitila varia*. For identification.

JAMES W. ROGAN, Rogersville, Tenn. 16050. '85. (V, A)

ROSE-BREADED GROSBEAK, *Zamelodia ludoviciana*, ♂; Indigo Bird, *Passerina cyanea*, ♂; and Red-eyed Vireo, *Vireosylva olivacea*. For identification.

JAMES W. ROGAN, Rogersville, Tenn. 16051. '85. (V, A)

FULGURITE. Two specimens from Sumter, S. C. These fulgurite tubes form a valuable addition to our already fine collection of these peculiar objects. They present the usual form of very irregular corrugated tubes with glassy interiors, but are remarkably thick and strong. They are reported by Mr. Mason as being found some 20 feet below the surface, while digging a well.

C. F. MASON, Sumter, S. C. 16052. '85. (XV)

FALLOW DEER, *Cervus dama*, in the flesh.

BARNUM, BAILEY & HUTCHINSON. 16053. '85. (IV)

WATER BUCK, *Kobus ellipsiprimus*, male, in the flesh. Purchased.

MR. DOBBIN, New York. 16054. '85. (IV)

SKATE, *Raia eglanteria* (alcoholic), from the beach of Hampton Roads, Virginia.

HARRY C. PHIBBS, Old Point Comfort, Va. 16055. '85. (VII)

MINERALS. Five specimens for identification: (1) Ferruginous sandstone; (2) Iron ore carrying manganese; (3) Manganese ore; (4) Calcite; (5) Iron ore carrying manganese.

HOWARD SHRIVER, Wytheville, Wythe County, Va. 16056. '85. (XIV)

ETHNOLOGICAL SPECIMENS. Two bows made of Shasta yew by Shasta Indians, 10 arrows with points, and 1 pipe, from California.

LOREN W. GREEN, Baird, Shasta County, Cal. 16057. '85. (II, A)

FISHES. Three alcoholic specimens: (1) *Gnathypops mystacinus* (type), Pensacola, Fla.; (2) *Salmo purpuratus*, Tacoma, Wash.; (3) *Ammocetes epyptera*, Bean Blossom Creek, Indiana.

Prof. D. S. JORDAN, Bloomington, Ind. 15058. '85. (VII)

GERMAN CARP, *Cyprinus carpio*, fresh specimen; weight, 4½ pounds.

U. S. FISH COMMISSION. 16059. '85. (VII)

SEA-ROBIN, *Prionotus palmipes*. Fresh specimen.

T. E. SKINNER, U. S. National Museum. 16060. '85. (VII)

SEA-WEED, from Hong-Kong, China.

ADOLPH HEIDEMANN, Washington, D. C. 16061. '85. (XIII, B)

CHINESE PUZZLES AND PIPE. The latter of vegetable ivory, with stem of wing-bones of albatross.

ADOLPH HEIDEMANN, Washington, D. C. 16061. '85. (II)

CANADA WARBLER, *Myiodiodes canadensis*; Cape May Warbler, *Perissoglossa tigrina*;

Carolina Chickadee, *Parus carolinensis*. For identification.

JAMES W. ROGAN, Rogersville, Tenn. 16062. '85. (V, A)

FIRE PINK or CATCH-FLY, *Silene virginica*, Linn.

M. G. MYERS, Salem, Ill. 16063. '85. (XIII, B)

PRESSED PLANTS. From Lady Franklin Bay.*

Lieut. A. W. GREELY, U. S. A. 16064. '85. (XIII, B)

* PLANTS OF THE GREELY EXPEDITION.

List of plants collected in the summer of 1882 and 1883 by Lieut. A. W. Greely and members of the Lady Franklin Bay Expedition, in the vicinity of Fort Conger, Grinnell Land, situated in latitude 81° 44' north, longitude 64° 45' west. (Read in part before the Botanical Club of the American Association for the Advancement of Science, at the Ann Arbor meeting, August, 1885.)

- "1. *Ranunculus nivalis* R. Br. var. *sulphureus* Wahl. From the sea level to 1,800 feet. 5 to 7 inches high.
2. *R. affinis* R. Br. 1,800 feet altitude. 5 inches high.
3. *Papaver nudicaule* Linn. Sometimes nearly white flowered.
4. *Cochlearia officinalis* Linn.? 1 to 3 inches high.
5. *Braya alpina* Sternb. var. *glabella*. (*B. purpurascens* R. Br.)
6. *Vesicaria arctica* Rich. Sea-coast to 1,000 feet altitude. The largest specimen 4 inches high and spreading 6 to 7 inches wide.
7. *Parrya arenicola* Hook. f.?
8. *Extrema Edwardsii* R. Br.

FOSSILS. One box containing species of the Hudson River Group.

J. M. TRIMBLY, Reiley, Butler County, Ohio. 16065. '85. (XII, A)

OLD WHEAT, from Venezuela.

E. MARTINEZ, New Orleans, La. 16066. '85. (Department of Agriculture.)

ORE.

K. ELLINGSON, Virginia City, Mont. 16067. '85. (XIV)

CAST OF STONE PIPE (carved) of greenish steatitic material, not unlike serpentine. It presents the form of a tube surmounted by the figure of a duck. The original was found in a mound at Ashland, Boyd County, Ky.

This very fine specimen is described and figured in Dr. Hamy's *Revue d'Ethnographie*, Vol. III, p. 60.

A. E. DOUGLAS, New York. 16068. '85. (II, A)

EAGLE RAY, *Sloasodon narinari*, caught near Cedar Keys, Fla.

E. F. DENECHAUD, New Orleans, La. 16069. '85. (VII)

CARP, *Cyprinus carpio*. Two fresh specimens.

CENTRAL STATION, U. S. FISH COMMISSION. 16070. '85. (VII)

GROUND ROBIN, *Pipilo erythrophthalmus*, typical. For name. Returned.

ERNEST E. T. SETON, Toronto, Canada. 16071. '85. (V, A)

BUFFALO WOOL. Manufactured.

ERNEST E. T. SETON, Toronto, Canada. 16071. '85. (I)

RENILLA (dried), from 90 miles SE. by E. off Cape San Blas, 13 fathoms.

SILAS STEARNS, Pensacola, Fla. 16072. '85. (XI)

9. *Cheiranthus pygmaeus* Adams. (*Hesperis pygmaeus* Hook.) From 50 to 1,000 feet altitude. The specimens are young and mostly less than 2 inches high, the largest 6 inches. A few found with stem and pods of two preceding years' growth.

10. *Draba hirta* Linn. (*D. arctica* Vahl.) 2 to 3 inches high.

11. *D. rupestris* R. Br.

12. *D. alpina* Linn. In flower June 16.

13. *Lychnis apetala* Linn. From the coast to 1,000 feet altitude. The specimens from 1 to 5 inches high, rarely 2 or 3 flowered.

14. *Lychnis triflora* R. Br. With the preceding, the stem and leaves more pubescent, mostly 1 flowered, rarely 2 or 3 flowered.

15. *Arenaria Grœnlandica* Spring? In leaf only.

16. *A. verna* Linn. var. *hirta*. 200 to 1,000 feet altitude.

17. *Cerastium alpinum* Linn. (*C. lanatum* Lam.)

18. *Stellaria longipes* Goldie, var. *Edwardsii* T. & G. From the sea to 1,000 feet altitude. 2 to 4 inches high.

19. *Potentilla nivea* Linn. Coast to 1,000 feet altitude. 2 to 5 inches high.

20. *P. nivea*, var. *quinata* Lange.

21. *P. pulchella* R. Br.

22. *P. maculata* Pourr.

23. *Dryas octopetala* Linn. var. *integrifolia*. Coast to 1,000 feet altitude.

specimens are 1 to 2 inches high, leaves mostly entire, sometimes minutely toothed. The most common plant found, beds of acres in extent being frequent, especially in the interior. Often with many petals.

24. *Saxifraga oppositifolia* Linn. Coast to 1,900 feet altitude. Flowers from 4 to 9 petaled, varying from pink to dark purple.

25. *S. flagellaris* Willd. 1,200 to 1,800 feet altitude, generally 1 flowered.

26. *S. tricuspidata* Retz. Not found below 800 feet altitude. 2 to 4 inches high.

27. *S. caespitosa* Linn.

28. *S. nivalis* Linn. Found between 800 and 1,200 feet altitude. Specimens mostly 2 to 3 inches high, some found as high as 6 inches.

29. *S. cernua* Linn. From 200 to 1,800 feet altitude. 3 to 8 inches tall.

30. *S. rivularis* Linn. var. *hyperborea* Hook.

31. *Epilobium latifolium* Linn. Coast to 1,200 feet altitude. Found only on rocky soil. Specimens from 2 to 4 inches high.

32. *Erigeron uniflorus* Linn. Coast to 800 feet altitude, becoming larger at the higher altitudes. Specimens 2 to 5 inches high.

CANNON BALL, found on the battle-field of New Orleans, 1814.

Col. A. F. ROCKWELL, U. S. A., Washington. 16073. '85. (I)

CYANOTYPES of the Stutz coal-washing machinery, used at Clearfield, Pa.

S. STUTZ, Pittsburgh, Pa. 16074. '85. (XVI)

EURYPTERUS REMIPES, De Kay. Matrix from the water-line formation of Western New York. An unusually fine specimen.

THOMAS HODGSON, Buffalo, N. Y. 16075. '85. (XVI)

TOPOGRAPHICAL MAP of the Loyal Sock Coal Basin in Sullivan County, Pennsylvania.

J. RAYMOND CLAGHORN, Philadelphia, Pa. 16076. '85. (XVI)

PLANT. For name.

HOWARD OSGOOD, Rochester, N. Y. 16077. '85. (XIII, B)

RUSSET-BACKED THRUSH, *Hylocichla ustulata*; Azure Blue-bird, *Sialia azurea*; Ruby-crowned Kinglet, *Regulus calendula*; Townsend's Warbler, *Dendroica townsendi*; Least Vireo, *Vireo pusillus*; Painted Bunting, *Passerina ciris*; Wright's Flycatcher, *Empidonax obscurus*; Hammond's Flycatcher, *Empidonax hammondi*. From Arizona, for identification. Returned excepting *Sialia azurea*. This form has only recently been recorded from Arizona, and the specimen presented is the first one from the United States in the collection.

Lieut. HARRY C. BENTON, U. S. A., Fort Huachuca, Arizona. 16078. '85. (V, A) (See Acc. 16064.)

INTESTINAL WORMS from *Polyodon*.

CHARLES. H. GILBERT, Cincinnati, Ohio. 16079. '85. (XI)

33. *E. compositus* Pursh, var. *trifidus* Gr. From 100 to 800 feet altitude. Specimens from 1½ to 3 inches high, generally 1 flowered.
34. *Arnica alpina* Olin. Coast to 1,500 feet altitude. 2 to 6 inches high.
35. *Taraxacum officinale* Web. var. *lividum* Koch. Coast to 200 feet altitude. 2 to 4 inches high, two shades of color, deep yellow and yellowish-white.
36. *Cassiope tetragona* Linn. From 100 to 500 feet altitude.
37. *Androsace septentrionalis* Linn. 50 to 500 feet altitude.
38. *Pedicularis capitata* Adams. From 100 to 700 feet altitude.
39. *P. Langsdorffii* Fisch. var. *lanata* Gr. From 50 to 100 feet above the sea, in company with *Dryas*.
40. *Oxyria digyna* Camp. Specimens from 5 to 7 inches high.
41. *Polygonum viviparum* Linn. From 100 to 800 feet altitude.
42. *Salix arctica* Pall. Coast to 1,800 feet altitude. From 1 to 1½ feet in length.
43. *Luzula hyperborea* R. Br. (*L. confusa* Lindb.)
44. *Juncus biglumis* Linn. Margin of small ponds. 3 to 6 inches high.
45. *Eriophorum angustifolium* R. Br. 800 to 1,200 feet. 3 to 8 inches high.
46. *Kobresia scirpina* Willd.
47. *Carex nardina* Fries.
48. *C. rupestris* All.
49. *C. ustulata* Wabl. var. *minor* Boott.
50. *C. vulgaris* Fr. var. *hyperborea* Boott.
51. *Alopecurus alpinus* Linn. Specimens from 4 to 18 inches high.
52. *Arctagrostis latifolia* Gris. Coast to 800 feet altitude. From 5 to 6 inches high.
53. *Deschampsia brevifolia* R. Br. (*Aira arctica* Spr.) Specimens from 2 to 4 inches high. Not the *Aira arctica* of Rothrock's Flora of Alaska, nor *Aira cæspitosa*, var. *arctica* of authors.
54. *Trisetum subspicatum* Beauv. Coast to 800 feet altitude. From 3 to 7 inches high.
55. *Poa cerisia* All. (*P. arctica* R. Br.) From 2 to 5 inches high.
56. *P. abbreviata* R. Br.?
57. *P. alpina* Linn. var. *vivipara*.
58. *P. laxa* Haenke. Specimens 3 to 8 inches high.
59. *P. cæsia* Smith, var.
60. *Festuca rubra* Linn. var. From 3 to 5 inches high.
61. *Agropyrum violaceum* Hornm. From 2 to 7 inches high.
62. *Equisetum variegatum* Schl.
63. *E. arvense* Linn.
64. *Cystopteris fragilis* Bernh. Coast to 1,300 feet. From 3 to 6 inches high."

HEN-HAWK, *Accipiter cooperi*, in the flesh.

Dr. G. F. NEEDHAM, Seabrook, Md. 16080. '85. (V, A)

DRESSED LIMESTONE (2).

HOOSIER STONE COMPANY, Bedford, Ind. 16081. '85. (XV)

PLANTS (49). Collected by the Lady Franklin Bay Expedition.

Lieut. A. W. GREELY, U. S. A., Washington. 16082. '85. (XIII, B.) Sent to Dr. Asa Gray. (See Acc. 16064.)

SURF DUCKS, *Melanetta velvetina* ♂ (2); *Edemia americana* (1), and *Pelionetta perspicillata* ♂ (1). Skeletons prepared.

ISAAC M. JACKSON, Plymouth, Mass. 16083. '85. (VIII)

LAND AND FRESH-WATER SHELLS, *Neritina*, *Unio*, *Glandina*, *Helix*, *Ampullaria*, and *Otholiticus*, from near Palma Sola, Fla. Also some small hydroids.

Mrs. E. S. WARNER, Palma Sola, Fla. 16084. '85. (IX)

STONE IMPLEMENTS, etc., from ruins on the Upper San Francisco River, New Mexico:

Hammer-stones, grinding-stones, pestles, grooved axes, paint-mortars and millers, stone picks (?), tanning-stones (?), one-half of a stone disk, fragments of a stone plate with many biconical perforations, a stone carving representing the head of a coyote (?), a stone carving in the shape of an owl, stone tubes and pipes, a small arrow-head, twenty-four small turquoise pendants (flat, pierced), and a number of fragments of turquoise pendants, bone perforators, fragments of a bone spear-head, a bear's claw, shell-heads and ornaments, a perforated sea-shell, a small brass bell (European), a nugget of native copper, a piece of graphite, and pieces of red and green mineral paint; 165 specimens.

E. W. NELSON, Springerville, Ariz. 16085. '85. (III)

POTTERY, from Arizona.

E. W. NELSON, Springerville, Ariz. 16085. '85. (II, B)

CALIFORNIAN BLUE-BIRD, *Sialia mexicana*; Rocky Mountain Blue-bird, *Sialia arctica*; Gray-headed Snow-bird, *Junco caniceps*; Oregon Snow-bird, *Junco oregonus*; Pink-sided Snow-bird, *Junco annectens*; Plain Titmouse, *Lophophanes inornatus*; Red-naped Woodpecker, *Sphyrapicus nuchalis*; *Aphelocoma* sp.; Massena Quail, *Cyrtonyx massena*; Mexican Turkey, *Meleagris gallopavo*. (29 specimens, 12 species.) From New Mexico.

E. W. NELSON, Springerville, Ariz. 16085. '85. (V, A)

MAMMAL SKINS and SKULLS. Thirty-seven specimens: *Sciurus aberti* (2), *Sciurus arizonensis* (2), *Urocyon virginianus* (1), *Cariacus macrotus* (1), *Cariacus columbianus* (1), *Canis lupus griseo-albus* (2), *Canis latrans* (1), *Taxidea americana* (1), *Homo sapiens* (26).

E. W. NELSON, Springerville, Ariz. 16085. '85. (IV)

MASSIVE GARNET. For report.

ISAAC P. ELROD, Jefferson, Ga. 16086. '85. (XIV)

BROWN IRON ORE. Specimen for report.

G. W. WHITE, Webster, Miss. 16087. '85. (XIV)

CATERPILLARS, *Leucarctia acraea* Sm. Larvæ of a bombycid moth, of medium size.

The larva has been named by Harris ("Insects Injurious to Vegetation," page 351) the "Salt-marsh Caterpillar."

MURPHY BROTHERS, Paris, Tex. 16088. '85. (X)

FRESH-WATER TURTLE, *Aspionectes ferox* (living), from New Canton, Ill.

GEORGE B. WEAVER & Co., New York. 16089. '85. (VI)

TOOTH OF RECENT HORSE, *Equus caballus*. For name.

WILLIAM DAVIS, Kent, Wash. 16090. '85. (IV)

- GERMAN CARP, *Cyprinus carpio*, and LAKE WHITEFISH, *Coregonus clupeiformis*. Fresh specimens from the Central Station.
U. S. FISH COMMISSION. 16091. '85. (VII)
- BIRD SKINS. Two hundred and fifty-nine specimens, 109 species, from Wheatland, Ind.
ROBERT RIDGWAY, U. S. National Museum. 16092. '85. (V, A)
- BROOK SILVERSIDE, *Labidesthes sicculus* (alcoholic). For name.
T. BERWICK LEGARÉ, Camden, S. C. 16093. '85. (VII)
- SHELLS. One hundred and forty-four specimens from a mound at Old Enterprise, Fla., including shells, old fragments of fish and mammalian bones, fish-scales, fragments of glass found 3 feet below the surface, and a specimen of shell marl.
WILLIAM H. DALL, U. S. Geological Survey. 16094. '85. (III)
- ROSE-BREADED GROSSBEAK, *Zamelodia ludoviciana* ♀. Head, wing, and tail. For identification.
FRED. C. GREEN, Marion, Iowa. 16095. '85. (V, A)
- POTTERY AND CLAY PIPE; three fragments of the former. Also a clay pipe and stem of a clay pipe. From an Indian mound in Montgomery County.
E. H. VAUGHAN, Roanoke, Va. 16096. '85. (III)
- EUROPEAN WHITEFISH, *Coregonus albula* (3), (alcoholic); from Baland and Talender Lakes, Prussia.
MAX VON DEM BORNE, Berneuchen, Germany. 16098. '85. (VII)
- MARINE INVERTEBRATES. Four boxes of alcoholic specimens collected by U. S. Fish Commission on the east coast of the United States.
Prof. A. E. VERRILL, New Haven, Conn. 16099. '85. (XI)
- BLUE-BIRD, *Sialia azurea*, from Arizona. A species but recently added to the North American fauna.
Lieut. HARRY C. BENTON, U. S. A., Fort Huachuca, Ariz. 16100. '85. (V, A)
- BIRDS. Seven hundred and nine specimens (nearly 380 species), most of them mounted, representing principally game-birds and domestic poultry. Several species of *Phasianidae* new to the collection.
DEPARTMENT OF AGRICULTURE. 16101. '85. (V, A)
- STONE IMPLEMENTS: An arrow-head and spear-head from West Virginia, a polished celt from Belmont County, Ohio, a grooved axe from Washington County, Pennsylvania. Also a box of human bone-dust(?) from a mound at Moundsville, W. Va.
F. J. LE MOYNE HUPP, Wheeling, W. Va. 16102. '85. (III)
- MINERALS.
F. J. LE MOYNE HUPP, Wheeling, W. Va. 16102. '85. (XIV)
- FOSSILS, *Rhynchonella copax* (5) and *Orthys lynx* (23). Hudson River Group. Probably collected in Southern Ohio or Northern Central Tennessee.
F. J. LE MOYNE HUPP, Wheeling, W. Va. 16102. '85. (XII, A)
- PECCARY, *Dicotyles tajacu*. Three skins from Fort McIntosh, Tex.
Dr. JOHN S. BILLINGS, U. S. A.; Army Medical Museum. 16103. '85. (IV)
- PECCARY, *Dicotyles tajacu*. One male skeleton from Fort McIntosh, Tex.
Dr. JOHN S. BILLINGS, U. S. A.; Army Medical Museum. 16103. '85. (VIII)
- PYTHON, *P. molurus*, Gray (*P. bivittatus*, Schy.), in the flesh.
ZOOLOGICAL SOCIETY OF PHILADELPHIA. 16104. '85. (VIII)
- BENDIRE'S THRASHER, *Harporhynchus bendirei*. Adult and young. The young plumage of this species hitherto unrepresented in the collection. Collected by Dr. Charles Carter at Sacaton, Pinal County, Ariz.
WARREN CARTER, Wallingford, Ariz. 16105. '85. (V, A)

INDIAN PIPE. Two fragments of worked brown sandstone, forming an incomplete pipe with a bear's head; found near New Lexington.

Dr. H. D. MOORE, New Lexington, Somerset County, Pa. 16106. '85. (III)

CRANIA AND BONES of *Homo sapiens*.

LOUIS H. AYMÉ, Oaxaca, Mexico. 16107. '85. (IV)

POTTERY, from Mexico.

LOUIS H. AYMÉ, Oaxaca, Mexico. 16107. '85. (II, B)

ARCHÆOLOGICAL OBJECTS, from Oaxaca. Obsidian flakes and cores; a hammer-stone; polished celts, one 11 inches in length; polishing-stones; water-worn pebbles; stones with grooves resembling Polynesian bark-beaters, but used in Mexico as chili-crushers; small stone pendants; a stone slab with notches on one edge; fragment of a pestle; two large stone carvings representing human figures; part of a stone carving in the shape of a human head with widely-opened mouth; tiger's head of stone (part of a figure); small squatting figures (human), pierced for suspension; a well-polished disk of jadeite (pendant); fragments of worked alabaster; a piece of stucco; beads made of entire shells, either pierced with a hole or truncated at the apex; a large pierced shell (*Strombus*); a shell bead; a shell disk with central hole; fragments of shells, and a large number of calcareous pebbles—212 specimens.

LOUIS H. AYMÉ, Oaxaca, Mexico. 16107. '85. (III)

SEA-URCHINS AND CORALS, *Metalia pectoralis* (2), and several young specimens of the Fan Coral, *Gorgonia flabellum*.

B. H. VAN VLECK, Boston, Mass. 16108. '85. (XI)

LIVING TURTLES, *Pseudemys rugosa* (3), *P. troosti*, *P. mobilensis* (2), from Mobile Bay.

G. KOHN, New Orleans, La. 16109. '85. (VI)

BIRD SKINS. Seventy-five specimens (22 species), containing series of *Parus septentrionalis*, *Leucosticte tephrocotis* (11), *Otocoris arenicola* (6), *Colaptes mexicanus*, *Scops asio mazwelliæ* (3), *Bubo virginianus subarcticus* (5), *Centrocercus urophasianus* (12), *Pediocates phasianellus campestris* (8). Of these the *Scops*, *Bubo*, and *Centrocercus* are particularly interesting and valuable.

Capt. CHARLES BENDIRE, U. S. A., Fort Custer, Mont. 16110. '85. (V, A)

CARBONATE OF COPPER, an eruptive rock (trap?) and white crystals (barite).

CHARLES J. PERKINS, Daggett, Cal. 16111. '85. (XIV)

SCALPS OF *Vulpes fulvus*, from Illinois.

J. P. LEACH, Rushville, Ill. 16112. '85. (IV)

QUARTZITE ROCK, white mineral, chrome iron ore, and impure black mineral.

Mrs. E. W. P. GUYE, Seattle, Wash. 16113. '85. (XIV)

FISHES. *Lepomis megalotis*, *Ackirus brownii*. Head of *Alutera schapfi* (alcoholic).

T. S. DORON, Montgomery, Ala. 16114. '85. (VII)

REPTILE. *Spilotes*.

T. S. DORON, Montgomery, Ala. 16114. '85. (VI)

COPPER SPEAR-HEAD, with broad straight base; found in the drift of the valley of the Norwalk River. This specimen is of great interest, showing not only the lamination produced by heating a piece of native copper, but also, on one side, the ridges and other projections which have wrongly been considered as resulting from the process of smelting. Property of Fred. Betts, Norwalk, Conn. Deposited.

D. N. COUCH, Norwalk, Conn. 16115. '85. (III)

CUTTLE-FISH, *Octopus* sp. (alcoholic). Two specimens.

C. C. NUTTING, Carlinville, Ill. 16116. '85. (IX)

FISHES, *Tetodon lineatus*, *Gobius sordidus*, *Fundulus grandis*, *Cyprinodon gibbosus*, and *Mugil albula* (alcoholic), from Pilot Town, Fla.

C. C. NUTTING, Carlinville, Ill. 16116. '85. (VII)

REPTILES, *Crotalus adamanteus* (1), *Ophibolus dolius* (1), *Coluber* (1), *Ophiosaurus ventralis* (3), *Anolis principalis* (2), and *Hyla* (1), from Pilot Town, Fla.

C. C. NUTTING, Carlinville, Ill. 16116. '85. (VI) .

INSECTS, from Pilot Town, Fla.

C. C. NUTTING, Carlinville, Ill. 16116. '85. (X)

PORPOISE, *Prodelphinus doris*, in the flesh. Purchased, \$15.

WARREN & Co., Pensacola, Fla. 16117. '85. (IV)

TRIPOLITE. Infusorial earth from near the mouth of Rosier's Creek, Potomac River.

W. O. CROSBY, Boston, Mass. 16118. '85. (XIV)

DRESSER'S "BIRDS OF EUROPE." In 59 parts.

HENRY SEEBOHM, London, England (through C. HART MERRIAM, Locust Grove, N. Y.). 16119. '85. (Smithsonian Library.)

ROCKS AND MINERALS. About 20 specimens from near Baltimore, Md.

GEORGE P. MERRILL, U. S. National Museum. 16120. '85. (XV)

VANADANITE, Endlichite, and Deschoizite (3).

FRED. W. TAYLOR, Lake Valley, N. Mex. 16121. '85. (XIV)

FOSSILS. *Amplexus fragilis*, W. & St. John (1); *Streptorhynchus crenistria* (1); *Orthis resupinata*, Martin (2); *Orthis michelina*, L'Eveille (1); *Spirifera centronotus*, Winchell (10); *Athyris lamellosa*, Hall (4); *Athyris* sp. (?) (1); *Conocardium* sp. (?) (1).

FRED. W. TAYLOR, Lake Valley, N. Mex. 16121. '85. (XII, A)

MIRROR AND SCALE CARP, *Cyprinus carpio*; *Lepomis cyanellus*, Raf.; *Gambusia patricialis* (B. & G.).

JAMES C. COURTS, Huntington, Tenn. 16122. '85. (VII)

NESTS AND EGGS of 40 species. The most interesting are *Cyanocitta stelleri frontalis* and *Dendroica nigrescens*.

LOREN W. GREEN, Baird, Shasta County, Cal. 16123. '85. (V, B)

BIRD SKINS. Fifty-eight specimens (34 species), chiefly from Ilchester, Md., and the District of Columbia, and a few specimens from Kentucky.

C. W. BECKHAM, Washington, D. C. 16124. '85. (V, A)

ARTESIAN WELL APPARATUS. Presented by the U. S. Geological Survey. The longer piece may be called "rubber packing," used to control the flow of artesian wells and to prevent lateral wastage. The shorter piece is a "seed-bag," and is used for the same purpose.

U. S. GEOLOGICAL SURVEY (through Prof. T. C. CHAMBERLAIN). 16125. '85. (XVI)

CAMBRIAN FOSSILS: *Stenotheca elongata* (1); *Hyolithes communis* (3); *Hyolithes princeps* (4); *Hyolithes americanus* (3); *Hyolithes obtusa* (3); *Hyolithellus micans* (1); *Obolella gemma* (8); *Obolella crassa* (6); *Obolella chromatica* (4); *Obolella circe* (2); *Kutorgina cingulata* (2); *Olenoides leavis* (2); *Agraulos strenuus* (2); *Agraulos socialis* (electrotypes) (2); *Protypus senectus*, (6); *Ptychoparia adamsi* (6); *Ptychoparia Teucer* (4); *Ptychoparia trilineata* (2); *Salterella pulchella* (5); *Salterella rugosa* (1).

GEOLOGICAL SURVEY OF CANADA, Ottawa, Canada (through Dr. A. R. SELWYN). 16126. '85. (XII, A)

CYANOTYPES, made from drawings of metal works from various localities.

E. L. ZUKOSKI, Saint Louis, Mo. 16127. '85. (XVI)

- FEATHER FLOWERS. Twelve cards of flowers made out of feathers. Handwork.
MRS. A. J. RUGG, Leominster, Mass. 16128. '85. (I)
- TOBACCO, from Melwood plantation, Upper Marlborough, Md.
F. H. TOWNE, Washington. 16129. '85. (I)
- PHOSPHATIC FORMATION, taken from the paunch of a deer.
THOMAS M. BUTLER, Davis P. O., La. 16130. '85. (IV)
- SLATE. Two specimens from Connecticut (dressed).
A. E. VERRILL, New Haven, Conn. 16131. '85. (XV)
- NEST AND EGGS (4) of Yellow-throat *Geothlypis trichas*, from Ilchester, Md.
Dr. L. STEJNEGER, U. S. National Museum. 16132. '85. (V, B)
- FISHES. Three alcoholic specimens of "Shiners," a small-scaled group, belonging to the genus *Notropis*.
T. BERWICK LEGARÉ, Camden, S. C. 16133. '85. (VII)
- NEST AND EGGS (4) of Summer Red-bird, *Piranga astiva*, from Ilchester, Md.
C. W. BECKHAM, U. S. National Museum. 16134. '85. (V, A)
- FOSSIL FISH, from Wyoming.
FRED. C. GREEN, Milwaukee, Wis. 16135. '85. (VII)
- FERNS, *Neuropteris*. Three specimens from Grundy County, Illinois.
FRED. C. GREEN, Milwaukee, Wis. 16135. '85. (XII, B)
- ARROW-HEADS (6), celt and grooved axe from Wayne County, North Carolina, and arrow-head from Ontonagon County, Michigan.
FRED. C. GREEN, Milwaukee, Wis. 16135. '85. (III)
- FOSSILS.

NIAGARA GROUP.

Orthoceras annulatum (?), Sowerby (1); *Ilænus insignis*, Hall (4); *Sphærocrochus Rominger*, Hall (1); *Calymene Niagrensis* (from Ohio ?), (1).

DEVONIAN GROUP.

Sponge? (1); *Orthis impressa*, Hall (5); *Atrypa reticularis*, Linnæus (6); *Chonetes deflecta* (?), Hall (1); *Spirifera mesostriata*, Hall (15); *Orthoceras* sp.? (1); *Gomphoceras breviposticum*, Whitfield (1); *Gomphoceras fusiforme*, Whitfield (2); *Gomphoceras* sp.? (1); *Cytoceras*, sp.? (2); Fish plate (1).

FRED. C. GREEN, Milwaukee, Wis. 16135. '85. (XII, A)

MINERALS. Millerite, with calcite (2), from cement quarry. Marcasite, calcite crystals, and massive quartz, showing two cleavage planes, from Buncombe County, North Carolina. Garnet crystals (partly altered), from Pigeon River Valley, North Carolina. Chlorite and quartz, from Ontonagon County, Michigan.

FRED. C. GREEN, Milwaukee, Wis. 16136. '85. (XIV)

THE "AYRSHIRE LIFE-CAR." With this were also received a copper man-of-war (model), dies upon which the life-car model was made, and diploma from the International Shipwreck Society of France. (For descriptive note of inventions of Joseph Francis see Part I, pp. 39, 40.)

JOSEPH FRANCIS, New York. 16136. '85. (I)

SPEAR-HEAD from Logan County; celts (2) from De Witt County; and a grooved axe from Macon County.

BERT STEWART, Decatur, Ill. 16137. '85. (III)

FLINT FLAKES (3), arrow and spear heads (9), a discoidal stone, and water-worn pebbles, (3) from Barber County, and a pestle from Blount County.

FRANK BURNS, Blountsville, Blount County, Ala. 16138. '85. (III)

POTTERY. Fragmentary pieces.

FRANK BURNS, Blountsville, Ala. 16138. '85. (II, B)

MAMMAL SKINS. *Cariacus columbianus* (1); *Canis lupus griseo-albus* (2); *Canis latrans* (1); *Taxidea americana* (1).

E. W. NELSON, Springerville, Ariz. 16139. '85. (IV)

FISHES. Alcoholic specimens of *Liparis lineata* and *Cyclopterus lumpus*, juv. from Gedbaut, on north shore of the entrance to the Gulf of Saint Lawrence, and Sable Island.

C. HART MERRIAM, Locust Grove, N. Y. 16140. '85. (VII)

BIRD SKINS. Twelve specimens (8 species) from Elk Mountains, Colorado, collected in 1881: *Cinclus mexicanus* (1); *Leucosticta australis* (2); *Calamospiza bicolor* (1); *Cyanocitta macrolopha* (2); *Lagopus leucinus* (2); *Canace obscura* (2); *Bubo subarcticus* (1); *Tringa semipalmata* (1).

JAMES STEVENSON, Bureau of Ethnology, Smithsonian Institution. 16141. '85. (V, A)

MAMMAL SKINS, *Tamias harrisi*, *Tamias asiaticus quadrivittatus*, *Spermophilus 13-lineatus*, *Neotoma cinerea*, from Elk Mountains, Colorado.

JAMES STEVENSON, Bureau of Ethnology, Smithsonian Institution. 16141. '85. (IV)

SACRED PLUME STICKS (4) of the Moqui Indians, New Mexico. Collected in 1884.

COSMOS MINDELEFF, U. S. Coast and Geodetic Survey. 16142. '85. (IIA)

PORPOISES, *Delphinus delphis* (2), in the flesh; also one skeleton and one skin. Collected by the Albatross in May, 1885.

U. S. FISH COMMISSION. 16143. '85. (IV)

MARINE INVERTEBRATES. Twenty-nine jars, 30 bottles, 14 vials, and 1 tank. Collected by the Albatross off Cape Hatteras.

U. S. FISH COMMISSION. 16143. '85. (XI)

FISHES, *Eulamia obscura*, *Epinephelus nigrilus*, *Caulolatilus microps*, *Macrurus*, *Merluccius*, *Raia*, *Phycis*, *Scylliorhinus*, and other marine species (alcoholic). Sharks in the flesh and skin of shark. Four fishes on ice. Collected by steamer Albatross off Cape Hatteras.

U. S. FISH COMMISSION, Washington. 16143. '85. (VII)

ORCHID, *Sobalia* sp.

Donor unknown. 16144. '85. (XIII, B)

CROSS FOX, *Vulpes fulvus decussatus*. Habitat: Racquette River, Adirondacks, New York. Mounted by H. H. Miner.

CHARLES M. LEA, Philadelphia, Pa. 16145. '85. (IV)

CLAY PIPE, of unusual form, from an ancient pueblo.

J. M. SHIELDS, Jemez, Bernalillo County, N. Mex. 16146. '85. (III)

ARROW AND SPEAR HEADS (4), a perforator, a hammer-stone, a small conical pestle, and a grooved axe of quartzite. Returned.

Mrs. E. A. GUTHRIE, Corydon, Henderson County, Ky. 16148. '85. (III)

CHAIN CLASP, from Norway, for fastening a cloak or some other garment. An example of the forged iron work for which Norway has long been celebrated. This specimen was found in the western part of that country about ninety years ago.

Dr. A. NELSON, Aldal, Minn. 16149. '85. (I)

LIZARDS, *Crotaphytus collaris* (2) (alcoholic).

H. W. TURNER, Steamboat Springs, Nev. 16150. '85. (VI)

CRYSTALS, limpid, black and red. For examination and report.

W. T. EXLINE, Van Wert, Ohio. 16151. '85. (XIV)

- ARROW AND SPEAR HEADS (16), grooved axes (2), and fragments of potstone vessels; also, a grooved axe from Gloucester County, New Jersey.
H. R. KERVEY, West Chester, Pa. 16152. '85. (III)
- BONES of *Homo sapiens*, from an Indian mound near Andersonville, Franklin County, Ind.
H. R. KERVEY, West Chester, Pa. 16152. '85. (IV)
- Bow, made from rib of buffalo.
H. R. KERVEY, West Chester, Pa. 16152. '85. (II, A)
- MOLLUSKS. Fresh-water gastropods, including five or six species.
H. R. KERVEY, West Chester, Pa. 16152. '85. (IX)
- BLUE CHINA PLATES. One marked "Old Delft Plate," from Dr. Pennock's collection; bought at Portsmouth in 1876. The other marked "Old India China Plate."
H. R. KERVEY, West Chester, Pa. 16152. '85. (I)
- GUM. For examination and report.
JOHN T. MOORE, Lawrence, Kans. 16153. '85. (I)
- PENOBSCOT SALMON, *Salmo salar* L. Fresh specimen from the Potomac River.
WILLIAM E. STUART, Washington, D. C. 16154. '85. (VII)
- LIVING SNAKES, *Pityophis sayi sayi* (2), from Minnesota.
FLETCHER M. NOE, Indianapolis, Ind. 16155. '85. (VI)
- OLD ENGLISH RAILS. Five pieces of English rail, rolled by the first rolls of the pattern, with the base (for "John Bull" engine).
PENNSYLVANIA RAILROAD COMPANY (through J. E. WATKINS, Esq.). 16156. '85. (I)
- HORNBLende AND GARNET, containing pyrrhotite.
E. A. SWAIN, New York, N. Y. 17157. '85. (XVI)
- ANTHOPHYLLITE (2) from copper mine near Baltimore, Md., and Sphenes in prochlorite (1) from District of Columbia.
GEORGE P. MERRILL, U. S. National Museum. 16158. '85. (XIV)
- FERNS. Ten species of Western ferns. Several new to the collection.
H. W. HENSHAW, Bureau of Ethnology, Smithsonian Institution. 16159. '85. (XIII, B)
- PLANTS. A collection of 500 species from Hungary, a locality not hitherto well represented in the herbarium.
F. H. KNOWLTON, Washington, D. C. 16160. '85. (XIII, B)
- ART CASTINGS. Thirty-five specimens.
MAGEE FURNACE COMPANY, Boston, Mass. 16161. '85. (I)
- FLAG of the Scientific Corps of the Western Union Telegraph Company's Expedition to Alaska.
WILLIAM H. DALL, U. S. Geological Survey. 16162. '85. (I)
- BOWS AND ARROWS, made by Tahahowtl, or Byron, a Makah Indian of Neah Bay, Washington Territory. Purchased.
JAMES G. SWAN, Port Townsend, Wash. 16163. '85. (II, A.)
- STONE IMPLEMENT for examination.
Col. CHARLES C. JONES, Jr., Augusta, Ga. 16164. '85. (III)
- STONE IMPLEMENTS, chips, flakes, arrow-heads, potsherds, etc., from the neighborhood of Gainesville and Waldo, Alachua County, Fla.
L. C. JOHNSON (through Dr. C. A. SIMMONS, U. S. Geological Survey). 16165. '85. (III)

MOLLUSKS, miscellaneous lot from Florida.

HENRY HEMPHILL, Key West, Fla. 16166. '85. (IX)

FISHES, INVERTEBRATES, ETC. A miscellaneous collection from Florida.

HENRY HEMPHILL, Key West, Fla. 16166. '85. (IX)

MEDINA SANDSTONE. One block from Medina, N. Y., containing *Lingula cuneata*, *Pleurotomaria? pernetusta*, *Modiolopsis? primægenia*.

G. K. GILBERT, U. S. Geological Survey. 16167. '85. (XII, A)

REPTILES, four alcoholic specimens, including *Ancistrodon piscivorus*, *Bascanium constrictor*, and *Coluber guttatus*, from Florida.

HENRY HEMPHILL, Key West, Fla. 16166. '85. (VI)

* ETHNOGRAPHIC OBJECTS from the Congo country, Africa, including musical instruments, weapons, charms, carvings, ornaments, etc.

W. P. TISDEL, Department of State. 16168. '85. (IIa)

CEREMONIAL OBJECT. Half of a small pierced ceremonial weapon, found near Opelika.

DR. J. W. R. WILLIAMS, Opelika, Lee County, Ala. 16169. '85. (III)

FALLOW DEER (young), *Cervus dama*, in the flesh.

W. A. CONKLIN, superintendent Central Park Menagerie, New York. 16170. '85. (IV)

DOLPHIN, *Coryphæna hippurus*, fresh specimen.

WARREN & CO., Pensacola, Fla. 16171. '85. (VII)

ELECTRICAL APPARATUS. A telegraph relay instrument.

W. J. GREEN, U. S. National Museum. 16172. '85. (I)

FISH SCALES from a specimen of Tarpum, *Megalops atlanticus*, caught in the sound near Nag's Head, North Carolina. For identification.

D. M. TATE, Kitty Hawk, N. C. 16173. '85. (VII)

WORMS AND PLANT, showing the destruction of the plant by the insect *Euryereon rantalis* (larva).

T. J. HOLCOMB, Moline, Kans. 16174. '85. (X)

LOWER PHARYNGALS OF FRESH-WATER DRUM, *Haploidonotus grunniens*.

J. I. BIZZELL, Pine Apple, Ala. 16175. '85. (VII)

WILSON'S PLOVER, *Ægialites wilsonius* (2). For examination.

G. NOBLE, Savannah, Ga. 16176. '85. (V, A)

EGGS OF LEAST TERN, *Sterna antillarum*.

G. NOBLE, Savannah, Ga. 16176. (V, B)

LIMESTONE AND IRON ORES from Texas. For examination.

J. P. DOUGLAS, Tyler, Tex. 16177. '85. (XV)

EARTH from Texas. For examination.

J. P. DOUGLAS, Tyler, Tex. 16177. '85. (XV)

STONE IMPLEMENTS. A polished celt and half of a perforated discoidal stone, found near Buffalo Fork, Little Kanawha River, West Virginia.

C. P. DORR, Webster Court-House, Webster County, West Va. 16178. '85. (III)

GALENA IN QUARTZ, from California. For report.

C. J. PERKINS, Daggett, Cal. 16179. '85. (XIV)

MINERALS, from New Mexico.

V. M. GABRIELLE, Bernalillo, N. Mex. 16180. '85. (XIV)

STAR-FISH, *Solaster endeca*, from Maine.

PHILLIPS CLARK, Washington, D. C. 16181. '85. (XI)

CINDERS from the furnaces of the Reading Bolt and Nut Works.

READING BOLT AND NUT WORKS (through J. H. STERNBERGH, Reading, Pa).
16182. '85. (XVI)

PARAKEET, *Psittuteutes chlorolepidotus*, and Red-bellied Weaver Bird, *Estrelda astrild*, in the flesh.

ZOOLOGICAL SOCIETY OF PHILADELPHIA. 16183. '85. (V, A)

SNAKE, from Japan, in the flesh.

ZOOLOGICAL SOCIETY OF PHILADELPHIA. 16183. '85. (VI)

CRYSTALLINE ALLOYS. A very interesting collection of newly-discovered alloys of gold, silver, and platinum with copper and bismuth, described by Mr. Richard Pearce, of Denver, at the meeting of the American Institute of Mining Engineers in February, 1885.

AMERICAN INSTITUTE OF MINING ENGINEERS (through R. W. RAYMOND, secretary, 13 Burling Slip, New York City). 16184. '85. (XVI)

CASTS OF ANTIQUITIES from Mexico and Yucatan.

No. 1. Aztec calendar stone. No. 2. Teoyoamiqui, or Goddess of Death. No. 3. Mictlanteuhtli. No. 4. Cuauhxicalli of Tizoc. No. 5. Chac-Mool. No. 6. Commemorative stone. No. 7. The Mexican cycle. No. 8. Gigantic head. No. 9. Monolith of Tenango. No. 10. Goddess of Water. No. 11. Cross of Palenque. No. 12. Yoke of Orizaba. No. 13. Cihuacoatl. No. 14. Yohualteuhtli. No. 15. Bas-relief from Palenque. No. 16. Palenque divinity. Nos. 17, 18, 19, 20. Mythological animals. No. 21. Red-painted idol. No. 22. Statue of a humpback. No. 23. Statue. No. 24. Funeral urn. Nos. 25, 26. Funeral urns. No. 27. Great vase or tub. No. 28. Bas-relief. No. 29. Aztec nun. No. 30. Chapolin, or grasshopper. No. 31. Statuette. No. 32. Face of Chinese type. No. 33. Obsidian vase. No. 34. Vases.

Deposited by EUFEMIO ABADIANO, City of Mexico, Mexico. 16185. '85. (III)

FOSSILS. Forty-five specimens from the Utica slate at Ottawa, Canada.

HENRY AMI, Ottawa, Canada, and C. D. WALCOTT, U. S. Geological Survey.
16186. '85. (XII, A)

FOSSILS. Eight specimens of *Productus semireticulatus*, Martin. Carboniferous lime stone formation, from Fort Wingate, New Mexico.

Dr. R. W. SHUFELDT, U. S. A., Fort Wingate, New Mexico. 16187. '85. (XII, A)

LIGNUM-VITÆ BLOCKS for pulleys; showing process of manufacture from the rough state to the finished wheel.

ROYAL GARDENS, Kew, England (through Prof. W. T. THISELTON-DYER).
16188. '85. (I?)

INSECTS, from China.

ROYAL GARDENS, Kew, England (through Prof. W. T. THISELTON-DYER).
16188. '85. (X)

BASKET.

ROYAL GARDENS, Kew, England (through Prof. W. T. THISELTON-DYER).
16188. '85. (II, A)

BARK FIBERS, etc.

ROYAL GARDENS, Kew, England (through Prof. W. T. THISELTON-DYER).
16188. '85. (I)

WHITE WAX; also candles made from the same.

ROYAL GARDENS, Kew, England. 16188. '85. (I)

ORES AND ORE PRODUCTS. An extensive series of ores from many localities, together with a series of products illustrating the extraction of silver and copper from these ores; also, incidentally and partially, the extraction of gold. The whole forms a very systematic and complete representation of the Ziervogel process as carried on at works having command of a large variety of ores.

BOSTON AND COLORADO SMELTING COMPANY (through R. PEARCE, superintendent, Argo, Colo). 16189. '85. (XVI)

EGGS OF SHORT-EARED OWL, *Asio accipitrinus* (Pall.). Returned.

JOHN T. JONES, Malden, Mass. 16190. '85. (V, B)

MICA SCHIST. For examination.

DAVID H. ADAMS, Gainesborough, Va. 16191. '85. (XV)

LICHENS, from Buda-Pesth.

Prof. HUGO LOJKA, Buda-Pesth, Hungary. 16192. '85. (XIII, B)

ACTINOLITE, from the north line of Mercer County, New Jersey. Partially altered.

JACOB J. RUNK, Laurel, Ind. 16193. '85. (XIV)

MOLLUSKS (dry and alcoholic). A large and valuable collection.

HENRY HEMPHILL, Cedar Keys, Fla. 16194. '85. (IX)

BONES of *Homo sapiens*, from half a mile south of Hayne's Bluff, on a mound on the Yazoo River, Mississippi.

FRANK BURNS, U. S. Geological Survey. 16195. '85. (VIII)

POTTERY. Fragments from a mound near Hayne's Bluff, on Yazoo River, Mississippi.

FRANK BURNS, U. S. Geological Survey. 16195. '85. (II, B)

SHELLS, from Japan and Bonin Islands, including some very rare and valuable specimens.

JON KANZOA UCHIMURA, Delaware City, Pa. 16196. '85. (IX)

FISH, infested with *cercariae*—larvæ of a parasitic trematode.

RICE SHINDLER (through Dr. VAN S. DEATON, Alcony, Ohio). 16197. '85. (VII)

SEA-MOUSE, *Aphrodite aculeata*, taken in a lobster-pot off Block Island. For name.

W. WILLIAMS, Stonington, Conn. 16198. '85. (XI)

LIVING SNAKE, *Cyclophis æstivus*.

HERBERT B. CREEL, Ripley Landing, W. Va. 16199. '85. (VI)

KOLAH PASTE.

THOMAS CHRISTY & Co., London, England. 16200. '85. (I)

CRETACEOUS FOSSIL SHELLS, *Gryphosa pitcheri*, Morton, from Soldier Creek, Arkansas River, Kansas.

FRANK J. FORD, Greensburg, Kans. 16201. '85. (XII, B)

INSECTS, including *Doryphora 10-lineata* (larva and imago) and *Epitrix brevis* (imago), from Tennessee.

Dr. C. W. WILCOX, Shell Creek, Carter County, Tennessee. 16202. '99. (X)

VEGETAL CELLULAR MATTER; contents removed and bleached by exposure; perhaps the pith of some plant.

A. B. MACCREA, Berwick, Pa. 16203. '85. (I)

PICTURES (36) OF KENTUCKY SOCIAL LIFE.

STATE GEOLOGICAL SURVEY OF KENTUCKY. 16204. '85. (II, A)

FISH. A new species of *Tyntastes*. For report.

R. S. DAY, New Orleans, La. 16205. '85. (VII)

CATLIN CARTOONS. Five boxes; also one box of oil paintings. Deposited.

Mrs. ELIZABETH W. CATLIN, New York, N. Y. 16206. '85. (I)

SKELETON OF WHALE, *Hyperoodon semijunctus*, Cope (type); with rods for mounting.

Dr. G. E. MANIGAULT, Charleston, S. C. 16207. '85. (IV) In exchange.

CEREMONIAL OBJECTS, from India and China. One large gilt teakwood Idol; one silver sacred Hindoo Temple Bell; one Sooryudebor, or God of the Sun (stone), dug from the mud on Gunga Sangum (Sugar Island), near the mouth of the Ganges; height, 39 inches; width, 22 inches. One Chinese Wooden Devil, a curious piece of carving, of the quaintest design, from China. On approval.

THOMAS DONALDSON, Philadelphia, Pa. 16208. '85. (II, A)

INDEXES TO ACCESSION LIST.

DEPARTMENT IV.

MAMMALS: 15555, 15560, 15564, 15574, 15576, 15581, 15602, 15605, 15608, 15615, 15617, 15678, 15686, 15689, 15708, 15718, 15721, 15730, 15737, 15755, 15756, 15774, 15788, 15792, 15816, 15822, 15823, 15826, 15834, 15845, 15846, 15850, 15854, 15876, 15884, 15885, 15886, 15888, 15897, 15916, 15924, 15927, 15931, 15941, 15944, 15947, 15948, 15950, 15969, 16000, 16010, 16014, 16019, 16022, 16040, 16042, 16048, 16053, 16054, 16085, 16090, 16103, 16107, 16112, 16117, 16130, 16139, 16141, 16143, 16145, 16152, 16170, 16195, 16207.

DEPARTMENT V.

(A) BIRDS: 15573, 15574, 15576, 15584, 15588, 15593, 15606, 15617, 15627, 15639, 15642, 15643, 15680, 15681, 15684, 15687, 15689, 15702, 15704, 15710, 15717, 15718, 15725, 15731, 15753, 15757, 15761, 15762, 15766, 15775, 15789, 15796, 15798, 15802, 15807, 15810, 15813, 15818, 15824, 15837, 15838, 15853, 15856, 15862, 15863, 15870, 15877, 15878, 15892, 15899, 15900, 15907, 15909, 15921, 15928, 15937, 15943, 15953, 15968, 15974, 15976, 15983, 16000, 16002, 16006, 16037, 16045, 16051, 16062, 16071, 16078, 16080, 16085, 16092, 16095, 16100, 16101, 16105, 16110, 16124, 16134, 16141, 16176, 16183.

(B) BIRDS' EGGS: 15609, 15687, 15688, 15727, 15752, 15797, 15854, 15862, 16004, 16017, 16123, 16132, 16177, 16190.

DEPARTMENT VI.

REPTILES: 15576, 15618, 15640, 15647, 15688, 15692, 15706, 15722, 15741, 15742, 15743, 15744, 15745, 15746, 15747, 15748, 15796, 15806, 15871, 15879, 15881, 15888, 15899, 15918, 15929, 15939, 15966, 15999, 16000, 16020, 16023, 16025, 16029, 16032, 16089, 16109, 16114, 16116, 16150, 16155, 16166, 16183, 16199.

DEPARTMENT VII.

FISHES: 15553, 15556, 15576, 15578, 15585, 15614, 15640, 15646, 15688, 15691, 15693, 15694, 15704, 15713, 15751, 15759, 15793, 15811, 15827, 15831, 15833, 15843, 15879, 15899, 15918, 15920, 15926, 15933, 15939, 15943, 15945, 15967, 15979, 15997, 16000, 16015, 15018, 16023, 16055, 16058, 16059, 16060, 16069, 16070, 16091, 16093, 16097, 16098, 16114, 16116, 16122, 16133, 16135, 16140, 16143, 16154, 16171, 16173, 16175, 16197, 16205.

DEPARTMENT VIII.

COMPARATIVE ANATOMY: 15632, 15760, 15820, 15919, 16083, 16103, 16104.

DEPARTMENT IX.

MOLLUSKS: 15551, 15552, 15565, 15606, 15613, 15619, 15640, 15688, 15689, 15696, 15712, 15772, 15777, 15812, 15835, 15855, 15857, 15889, 15905, 15906, 15913, 15925, 15955, 15956, 15957, 15958, 15959, 15960, 15961, 15966, 16084, 16116, 16152, 16166, 16194, 16196.

DEPARTMENT X.

INSECTS: 15573, 15576, 15595, 15606, 15688, 15796, 15878, 15888, 15963, 15918, 16000, 16016, 16018, 16027, 16088, 16116, 16174, 16188, 16202.

DEPARTMENT XI.

MARINE INVERTEBRATES: 15563, 15565, 15606, 15640, 15688, 15704, 15780, 15832, 15852, 15879, 15881, 15918, 15964, 16007, 16072, 16079, 16099, 16108, 16143, 16181, 16198.

DEPARTMENT XII.

(A) INVERTEBRATE FOSSILS: (Palaeozoic): 15579, 15596, 15610, 15714, 15735, 15819, 15827, 15934, 15952, 16014, 16065, 16121, 16126, 16135, 16186, 16187.

(B) INVERTEBRATE FOSSILS: (Meso-Cenozoic): 15792, 15803, 15869, 16033, 16038, 16102, 16201.

DEPARTMENT XIII.

(A) FOSSIL PLANTS: 15640, 15649, 15650, 15651, 15652, 15653, 15654, 15655, 15656, 15657, 15658, 15659, 15660, 15661, 15662, 15663, 15664, 15665, 15666, 15667, 15668, 15669, 15670, 15671, 15672, 15673, 15688, 15727, 15734, 15778, 15857, 15864, 15865, 15866, 15867, 15868, 16167.

(B) RECENT PLANTS: 15598, 15599, 15604, 15676, 15722, 15735, 15749, 15763, 15764, 15769, 15791, 15800, 15844, 15966, 15985, 15986, 16031, 16061, 16063, 16064, 16077, 16082, 16135, 16144, 16159, 16160, 16192.

DEPARTMENT XIV.

MINERALS: 15557, 15558, 15562, 15567, 15568, 15569, 15570, 15571, 15572, 15577, 15586, 15587, 15590, 15594, 15600, 15601, 15604, 15628, 15629, 15630, 15635, 15636, 15644, 15683, 15685, 15701, 15707, 15715, 15719, 15726, 15727, 15732, 15760, 15782, 15783, 15792, 15809, 15815, 15827, 15829, 15836, 15839, 15840, 15841, 15857, 15859, 15873, 15887, 15891, 15898, 15901, 15904, 15912, 15914, 15917, 15918, 15938, 15970, 15987, 15998, 16003, 16005, 16011, 16035, 16038, 16039, 16056, 16067, 16086, 16087, 16102, 16111, 16113, 16118, 16121, 16135, 16151, 16158, 16179, 16180, 16193.

DEPARTMENT XV.

LITHOLOGY AND PHYSICAL GEOLOGY: 15559, 15580, 15640, 15682, 15685, 15688, 15697, 15727, 15729, 15735, 15750, 15785, 15801, 15841, 15842, 15847, 15862, 15872, 15902, 15908, 15918, 15941, 15951, 15977, 15994, 16009, 16043, 16052, 16081, 16120, 16131, 16177, 16191.

DEPARTMENT XVI.

METALLURGY AND ECONOMIC GEOLOGY: 15698, 15699, 15700, 15727, 15739, 15740, 15760, 15794, 15828, 15946, 15988, 15989, 15990, 15991, 15992, 15993, 16012, 16021, 16028, 16074, 16075, 16076, 16125, 16127, 16157, 16182, 16184, 16189.

DEPARTMENT XVII.

EMBRYOLOGY AND EXPERIMENTAL PHYSIOLOGY: 15705, 15896, 15923, 15954, 15997.

INDEX.

[Numbers in black-faced type indicate important references.]

A.

- Abadiano, Señor Eufemio, casts by, 41.
deposited Mexican casts, 14.
- Abert's squirrel obtained, 79.
- Aborigines, basket-work of, 19.
- Acanthocybium solandri obtained, 97.
- Accession list, indexes to, **225**.
- Accessions by departments of Museum, 232.
locality, 225.
name of donor, lender, &c., **234**.
disposition of, 12.
increase of, 12.
list of, **175**, 177.
number of, 12.
of public documents, 15.
sources of, 12.
to museum, 12.
- Accounts, 10, 30.
- Acrobasis vaccinii, notes on, 166.
- Administrative staff, 9.
work current, 26.
reviewed, 12.
- Ædipus titi, 31.
- Africa, ethnologica from, 66.
West, implements from, 67.
- Agassiz, Alexander, consulted on Echini, 121.
paper by, **226**.
Louis, fishes studied by, 96.
- Agave Hendersoni in the museum, 136.
rigida in the museum, 136.
- Agaves flowering in the museum, 136.
- Agilla, Señor. presented Sonora ores, 146.
- Agraulis quadrangularis, casts of, 131.
socialis, electrotypes of, 130.
strenuus obtained, 130.
- Agricultural Department, textiles from, 59.
- Agriculture, birds from Department of, 89.
- Agrotis annexa, larva of, 163.
clandestina, larva of, 163.
malefida, larva of, 163.
messoria, larva of, 164.
saucia, larva of, 164.
ypsilon, larva of, 164.
- Air-bladder of fishes, 160.
- Alabama antiquities obtained, 73.
turtles, 93.
- Alarm apparatus, 28.
- Alaska, antiquities from, 76.
birds of Nearer Islands, 172.
ethnologica from, 65.
Aleuts of, 64.
Copper River Indians, 64.
Kadiak region, 64.
Kotzebue Sound, 64.
Point Barrow, 64.
Saint Michael's, 64.
Sitka, 64.
insects from, 113, 114.
marine invertebrates from, 118.
new invertebrates from, 160.
notes on plants from, 159.
plants from, 135.
rocks from, 139.
- "Albatross," collected Cozumel birds, 43, 89.
fishes, 96.
marine invertebrates, 117.

- "Albatross," collections, 98.
of fishes, 44.
of insects, 47, 113.
crinoids administered upon, 122.
cruise in Gulf of Mexico, 174.
notes on, 160.
off Cape Hatteras, 117, 124.
crustacea sent out for study, 123.
echini reported upon, 121, 161.
explorations, **123**.
off Havana, 123.
invertebrate collections, 27, 48.
invertebrates assorted, 118.
medusæ sent out for study, 123.
mollusca described, 155.
mollusks sent out for study, 123.
reptiles from Cozumel, 93.
took West Indian insects, 113.
- Albula vulpes, 97.
- Aleidæ lent for study, 87.
- Aldrich, P. W., exhibit of, 32.
- Alewite, branch, in New York lakes, 154.
- Alewites, notes on, 159.
- Algeria, coleoptera from, 114.
- Algiers utensils, 67.
- Aliuts, ethnologica from Unalashka, 64.
- Allen, Harrison, paper by, 25.
- Alloys, crystalline, 161.
of gold and bismuth, 143.
- Amazon River bow, 66.
- Amblystoma copeianum described, 157.
- America, geological history of, 173.
- American Fisheries Society meetings, 22.
papers, 23.
fishes in Linnæan collection, 157.
Institute of Mining Engineers, collections from, 54, 147.
Museum, building-stones prepared for, 11, 141.
- Ornithologists' Union, 43.
committee meeting of, 88.
prehistoric pottery, department 7, 8.
report on, **69**.
taxidermists' exhibit, 32.
Society, exhibit of, 36.
- Ami, Henry, sent fossils, 130.
- Amplexus fragilis obtained, 129.
- Analecta ornithologica, 171.
- Analyses of ores and minerals, 12.
fiber, tissues, &c., 156.
- Anas hyperboreus and albatrus, 162.
- Anatomy, comparative, accessions to, 101, 233.
condition of collections in 102.
department of, 8, 44.
function of department of, 100.
material at hand for, 100.
exhibited, 100.
stored, 100.
movable cases for, 101.
organization of department of, 100.
recommendations from curator of, 102.
reorganized, 99.
report on, **99**.
series in collection of, 100.

- Anderson, Mrs., Indian cradle from, 65.
 Andrews, B., grass fuel from, 65.
 Animal products exhibited at New Orleans, 35.
 section, 8.
 Animals mounted, 30.
 post-mortem examinations of, 45.
 fates of domestic, 100.
 Anisomorpha buprestoides obtained, 113.
 Annelids studied by J. E. Benedict, 122.
 Annex building for storage, 27.
 Annunciator for police service, 23.
 replaced, 27.
 Annunciators, 23.
 Anon., on cruise of Albatross, 174.
 the island of Cozumel, 174.
 United States at Fisheries Exhibition, 174.
 Anser leucopareius, note on, 161.
 Antelope mounted, prong-horned, 31.
 Anthias vivanus, type of, 97.
 Anthomyia brassicae, notes on, 165.
 cabbage, 165.
 Anthracidæ, 22.
 Anthrenus scrophularia, correspondence about, 114.
 Anthropological Society lectures, 21.
 Anthropology, curatorships in, 8.
 notes on, 159.
 preparators in, 34.
 progress of, 159.
 work in, 37.
 Anthozoa from the "Albatross," 117.
 new genus and new species of, 172.
 researches upon, 122.
 returned from Yale College, 118.
 Anticosti ptarmigan discussed, 155.
 Antilocapra americana, 31.
 Antimony ores obtained, 145.
 Antiquities, accessions to, 71, 78, 232.
 arrangement of, 77.
 casts of, 77.
 collection, present state of, 78.
 department of, 8, 41.
 report on, 71.
 duplicate, exchanged, 77.
 exhibited, special collections of, 77.
 for 1883, report on, 161.
 from mounds exhibited, 77.
 routine work upon, 77.
 Ants and aphides, 168.
 Apanteles glomeratus introduced, 165.
 Apatite for fertilizers, 143.
 series obtained, 54.
 Aphis brassicae, notes on, 165.
 Aplopappus Fremontii received, 58.
 Apparatus of Dr. Priestly, 39.
 Professor Henry, 39.
 physical, 39.
 transferred, 27.
 Applications for specimens, 17.
 Arachnida from West Indies, 113.
 Labrador, 26.
 Archistome theory, 169.
 Archives department, 10.
 Archontophoenix Alexandræa living in the Museum, 136.
 Ardetta exilis, 31.
 Arizona and Sonora birds, notes on, 155.
 antiquities from, 75.
 Indian implements, &c., 65.
 squirrel obtained, 79.
 Arkansas, ores, &c., from, 145.
 Army collections, 4.
 Medical Museum, skeletons from, 45.
 skulls and skeletons from, 101.
 Arrangement, progress in classification and, 13.
 Art exhibit at New Orleans, 36.
 Artist, Museum, 34.
 Arts and industries, accessions to, 222.
 department, 8.
 work, 37.
 Arzama equals Spbida, 26.
 Ashburner, C. A., papers by, 25.
 Aspidophoroides Güntherii described, 154.
 Assignment of space, 11.
 Assistant Director's report, 151.
 Astacidæ sent to Prof. Faxon, 123.
 Asteroidea, new species of, 172.
 Athyris lamellosa obtained, 129.
 sp.(?) obtained, 129.
 Atkins, Charles G., paper by, 23.
 Atlantic right whale skull obtained, 80, 101.
 shells at New Orleans Exposition, 104.
 Atropia, influence of, 154.
 physiological action of, 37.
 Atropine, action of, 58.
 on the heart, 37.
 Atrypa reticularis obtained, 130.
 Attendance increased, 27.
 Atwater, Prof. W. O., collection from, 61.
 on chemistry of foods, 153.
 work of, 38.
 Autotypes at New Orleans, 36.
 Axis Deer obtained, 32.
 Aymé, Louis H., antiquities from, 41, 76.
 Mexican ethnologica from, 66.
 pottery from, 41, 69.
 sent human skulls, 101.
 Aztec calendar stone, 41.
 Goddess of Death, 41.
 B.
 Baboon mounted, 41.
 olive, 30.
 obtained, 32.
 dog-faced, 30.
 olive, 32.
 Bag-worm, remarks on, 168.
 Bailey, Dr. L. W., minerals from, 137.
 sent fossiliferous limestone, 129.
 Bailly, J. F. D., exhibits of, 32.
 Baird, Prof. S. F., documents from, 15.
 exchange requested by, 109.
 meat biscuit from, 61.
 writings of, 18.
 Baker, Frank, papers by, 24.
 Balæna cisarctica received, 42.
 skull obtained, 80, 101.
 Baldwin, A. H., assisted Mr. Rathbun, 121.
 Balistes, 98.
 vetula, 97.
 Balistidæ from Key West, 96.
 Ball, Forest, sent reptiles, &c., 93.
 Bark-louse, scurfy apple, 168.
 Barnacles brought together, 120.
 Barnum, Bailey & Hutchinson, gifts from, 30.
 sent fallow deer, 80.
 mammals, 42.
 Barracuda at Cozumel, 97.
 Barrett, C. A., sent pleurotomaria tabulata, 129.
 Bartlett, J. R., 76.
 Basketry exhibit installed, 27, 40.
 to be developed, 14.
 Basket-work of North American aborigines, 19.
 Bass, name of striped, 158.
 Batrachians, report on reptiles and, 93.
 Batrachidæ reviewed, 169.
 Baur, Dr. Georg, porcupine sent to, 84.
 sent pamphlets, 15.
 Beach, Horace, sent cast of foot-track, 75.
 Bean, B. A., duties of, 98.
 Bean, Dr. T. H., accompanied the Albatross, 124.
 curator, 8, 44, 95.
 editor, 10.
 exhibited Salmonidæ, 23.
 field work of, 98.
 fishes transferred to, 117.
 on American fishes in Linnæan collection, 157.
 Aspidophoroides Güntherii, 154.
 branch alewife, 154, 159.
 cottus maculatus, 154.
 department of fishes, 1883, 154.
 Hadropterus, 154.
 Haliutella lappa, 157.
 Long Island Sound exploration, 153.
 Lota maculosa, 154.
 new fishes, 154.
 Plectromus crassiceps, 153.
 Stathmonotus, 154.
 Stoasodon, 154.
 papers by, 24, 153, 154.

- Bean, Dr. T. H., report of, **95**.
translated G. M. Dannevig, 153.
Judge Fiedler, 154.
- Beckham, C. W., on *Ereunetes occidentalis*, 154.
services of, 90, 91.
- Bee culture collection, 115.
exhibit, 47.
- Bell, A. Graham, papers by, 23.
- Belostoma americanum from New York, 113.
- Bendire, Capt. Charles, birds from, 85.
honorary curator, 8, 91.
- Benedict, James E., collecting at Cozumel, 44, 98.
collections of, 124.
studying Annelids, 122.
- Bering Island plants, 157.
voyage around, 171.
- Berlepsch, Count von, birds exchanged with, 86.
- Berlin exhibition collections, 5.
Museum, cast from, 67.
- Berrinni, Dr. J. C., fibers from, 38.
textiles from, 59.
- Beyer, Dr. H. G., honorary curator, 8.
on atropia, 154.
intracellular digestion, 154.
materia medica collection, 151, 154.
papers by, 23, 24, 25, 58.
report of, **57**.
researches and papers of, 57.
studied cinchona barks, 37.
translated paper on diphtheria, 154.
work of, 37.
- Bibliographies of American naturalists, 18.
- Bibliography of U. S. National Museum, 18, **149**.
- Bilhoola Indians' ethnologica, 65.
- Billings, Dr. J. S., papers by, 22.
- Biological Society lectures, **21**.
meetings, 22, 23.
- Bird bones transferred, 33.
classification and nomenclature, 43.
discussed, 88, 89.
- packages sent out, 87.
- Birds, accessions to, 85, 232.
at New Orleans, museum exhibit of, 43.
classification and nomenclature of, 88.
department of, 8, 42.
distributed, 86.
exchanged, 86.
exhibited at New Orleans, 36.
from Agricultural Department, 27, 43.
Cozumel, 89.
identified by Robert Ridgway, 90.
important accessions to, **85**.
invoiced and labeled, 91.
lent for examination, 87.
list of North American, 43.
mounted for exhibition, 88.
new list of, 89.
North American, 162.
of Costa Rica, 173.
the standard natural history, 171.
on exhibition rearranged, 90.
prepared for New Orleans exposition, 88.
purchase of *des derata* for department of, 90.
received from Department of Agriculture, 89.
report on department of, **85**.
for 1883, 163.
returned from New Orleans, 32.
routine work on, 87.
skeletons of, 101.
special work done on, 88.
transferred, 27.
from gallery, 90.
work of assistants in department of, 90.
- Birds' eggs, accessions to, 232.
department of, 8.
given away, 87.
skins, nests, and eggs distributed, 17.
- Birney, William, on lecture committee, 22.
- Bittern mounted, least, 31.
- Black-fish obtained, young, 81.
stranded, 42.
- Blackford, E. G., paper by, 23.
- Black Hills tin ores obtained, 145.
- Blaisdell, J. E., sent nest and eggs of *Spizella atrigularis*, 86.
- Blanks printed, 14.
- Boas, Dr. Franz, studied ethnologica, 21, 63.
- Bogosloff Island eruptive rocks, 139.
notes on, 155.
- Bogota bags, 66.
- Bond, George W., wools from, 38, 59.
- Bone, illustrations of structure of, 100.
- Bonilla, Mr., presented Zacatecas ores, 146.
- Bonte-bok obtained, 32.
- Boone, Max von dem, sent *Coregonus albulus*, 95.
Botany, division of, 9, **50**.
- Bothriocephalus in a trout, 159.
- Bottle-nosed porpoise cast, 33.
- Bowditch, H. P., paper by, 25.
- Bowels, Mrs. A. C., correspondence with, 114.
- Bowers, Dr. Stephen, outfit supplied to, 124.
- Bows, study of Eskimo, 19.
- Brachiopoda, British fossil, reviewed, 155.
- Brama raii from Oregon, 97.
- Branch alewife in New York lakes, 154.
- Brazil, bow and arrows from, 66.
textile fibers from, 59.
- Brewster, William, birds lent to, 87.
on *Anticosti Ptarmigan*, 155.
birds of Arizona and Sonora, 155.
Peucaea aestivalis, 155.
Rock Ptarmigan, 155.
- Brewster's warbler obtained, 85.
- British Columbia ethnologica, 65.
Museum, mammals sent to, 84.
publications sent, 15.
- Brock, R. A., historical paper by, 144.
on early iron manufacture, 155.
- Brown, A. E., sent mammals, 30, 80.
sloth, 101.
Charles F., sent minerals, 137.
J. T., photographs by, 34.
studied photography, 21.
S. C., duties of, 10.
- Brush storage battery, 29.
- Buffalo bug, correspondence about, 114.
gnat, southern, 166.
- Building and ornamental stones at New Orleans, 37, 52, 140.
stones moved from southwest court, 141.
removed, 52.
stones for American Museum Natural History, 11, 52.
- Buildings and labor, 10, 26.
- Bulimus alternatus from Mexico, 109.
- Bulletins of 1885, 18.
- Burbot, the, 154.
- Bureau of Ethnology, antiquities from, 41, 78.
- Burgess, Edward, diptera bought from, 115.
- Burnett, Nelson, secured whale skull, 101.
- Burns, Frank, antiquities from, 73.
- Bush, Katherine J., mollusk paper by, 106.
on mollusca of Cape Hatteras, 155.
studied invertebrates, 122.
- Buteo harlani and cooperi discussed, 162.
oxypterus, type of, 162.
- C.
- Cabbage-bug, harlequin, 165.
cut-worms, Riley on, 163.
insects, Riley on, 163.
worm parasite imported, 165.
worms, cold water remedy against, 168.
- Cable, underground, 28.
- Caffeine, action of, 58.
physiological action of, 37.
- California, gray whale skull obtained, 101.
Indian utensils, 65.
ores obtained, 145.
reptiles, &c., from C. R. Orcutt, 93.
- Call, R. E., paper by, 25.
shells from, 104.
- Call-bells, electric, 28.
- boxes for District messengers, 28.
- Calliphora from Alaska, 114.
- Calodromas, note on, 162.
- Caloptenus spretus, notes on, 165.
- Calymene Niagrensis obtained, 130.
- Camera for showing geological phenomena, 142.
- Campeche Bank examined, 123.
- Cambria Iron Works, specimens from, 146.

- Cambrian faunas of North America, 173.
 studied, 49.
 fossils from Canada Geological Survey, 129.
 trilobites, 173.
- Canada Geological Survey publications, 15.
 sent Cambrian fossils, 129.
- Capen, E. A., exhibit of, 32.
- Capybara skeleton obtained, 101.
- Carboniferous fossils identified, 49.
- Carcharias cœruleus, 97.
- Carcharhinus obscurus, 31.
 mounted, 31.
- Card catalogue of library, 16.
- Caribbean Sea fishes obtained, 96.
- Carlton, Hattie, sent Arizona antiquities, 76.
- Carnivora, mounted, 31.
- Carp and its enemies from Tennessee, 96.
 from South Carolina, 96.
 injured by water insect, 114.
- Carpenters, temporary increase of, 26.
- Carpodacus hæmorrhous, earliest name for, 163.
- Carter, Warren, shells named for, 109.
- Cases, construction of, 14.
 laboratory, 13.
 requests for illustrations of, 13.
 selection of, 6.
- Casts distributed, 17.
 improving paper, 33.
 repair of, 33.
- Catalogue entries, 13.
 tabulated, 13.
- Catalpa tree, nectar glands of, 169.
- Catbird on the Farallones, 171.
- Catfish, habits and food-value of, 157.
- Cathartes burrovianus and urubitinga, 161.
- Catlin Indian Gallery, paper on, 19.

- Cyanocorax cucullatus obtained, 85.
- Cyanotypes made, 34
- Cybister attacking carp, 114.
- Cynocephalus anubis, 31, 32.
obtained, 89.
baboon, 32.
porcarius, 31.
sphinx, 31.
- Cyprinidae and Catostomidae of Girard, 158.
notes in, 159.
- Cytoceras sp. obtained, 130.
- D.
- Dakota Indian fuel, 65.
harness, 65.
ores obtained, 145.
- Dall, Rev. C. H. A., Indian Coleoptera and Lepidoptera from, 113.
sent ethnologica from India, 67.
- W. H., antiquities from, 72, 78.
collected Pieris, 113.
honorary curator, 8, 103.
identified Tertiary fossils, 110.
mollusks transferred to, 117.
on Bogosloff Island, 155.
British fossil Brachiopoda, 155.
Connecticut oyster fishery, 155.
department of mollusks, 1883, 156.
earthquake, 155.
John Gwyn Jeffreys, 155.
Hydrocorallinae, 155.
Nadaillac's Prehistoric America, 155.
papers by, 24, 166.
report of, **103**.
work of, 45.
- Damalis pygarga, 32.
obtained, 80.
- Damascus ornaments, 66.
- Dana, E. S., studied tufas, 140.
Prof. James D., followed in classification, 138.
- Dannevig, G. M., on Arendal fish culture, 153.
- Day, Robert S., sent new fish, 97.
- Deer obtained, axis, 32.
fallow, 32.
musk, 32.
- Deering, Rufus W., translation by, 60, 156.
- Della Torre, F., paper by, 23.
- Delphinus delphis obtained, 81.
- Delthyris lynx obtained, 131.
- Denison University received invertebrates, 125.
- Department of Agriculture, birds from, **89**.
Bogota, bags from, 66.
- Departments still unorganized, 9.
- Devonian fossils received, 130.
- Dewey, F. P., at New Orleans, 53, 143.
changes in office and work rooms of, 144.
curator, 9, 53, 143.
letter of, 144.
on metallurgy and economic geology in 1883, 156.
objects of U. S. National Museum, 156.
report of, **143**.
- Dicotyles torquatus, 31.
- Didelphys anrita from Cozumel, 79.
- Diller, J. S., lecture by, 22.
on topaz from Maine, 155.
with F. W. Clarke, 156.
- Dime Museum sent cockatoos, 102.
- Dinoceras bones, casts of, 45.
- Diomedea brachyura, variations in beak of, 170.
- Diphtheria, experimental, essay on, 154.
- Diptera bought from Edward Burgess, 47, 115.

- Direction, department of, 9.
 Distribution of duplicates and exchanges, **17**.
 District cultivated plants, catalogue of, 136.
 Dobbin, Mr., sent water-buck, 80.
 Dobson, Dr. G. E., correspondence with, 83.
 studied mammals, 83.
 Documents received, public, 15.
 Dodge, H. G., sent reptiles, 93.
 Dolphin, bottle-nose, 172.
 description of spotted, 83.
 obtained, common, 81.
 spotted, 80.
 reward for spotted, 42.
 True on a spotted, 20.
 Donaldson, R. J., sent carp, 96.
 Thomas, catalogue by, 40.
 paper by, 19.
 See Part V, 1-915.
 Dorcas Gazelle obtained, 32.
 Dorr, C. P., sent antiquities, 72.
 Doryphora decemlineata, 165.
 obtained, 113.
 Douglass, A. E., sent pipe, 74.
 Dresel, H. G., collected Arctic shells, 104.
 on new fishes, 154.
 new flounder, 156.
 shells named for, 109.
 with T. H. Bean, 156.
 Drocina, Mr., presented Mexican minerals, 147.
 Sonora collection obtained by, 147.
 Drum, notes on fresh-water, 153.
 Dugès, Prof. Alfred, sentechinoderms and corals, 118.
 Mexican moth, 113.
 shell named for, 109.
 Dugong, mounted, 31.
 Duplicates and exchanges, 10.
 distributed, 17.
 Dynamos, 29.
 Dynastes tityus, from Tennessee, 113.
 Dytiscus attacking carp, 114.
 from Alaska, 114.
- E.
- Earl, R. E., at New Orleans, 35.
 curator, 8.
 Earthquake of January 2, 155.
 Eastlake, Dr. Warrington, paper by, 114.
 Echini determined, 119.
 from the "Albatross," 48, 161.
 identified, 49.
 researches upon, 121.
 revised and installed, 119.
 Echinoderms from the "Albatross," 117.
 west coast Mexico, 118.
 Pacific, 48.
 researches upon, 122.
 returned from Yale College, 118.
 Echinus sent to Professor Lovén, 123.
 Edwards, J. W., assisted at New Orleans, 141.
 at New Orleans, 21.
 Eel, male organs of, 169.
 Eels, M., gambling disks from, 65.
 Egypt, ethnologica from, 66.
 Eigenmann, Carl H., on etheostomatinae, 158.
 with D. S. Jordan, 156.
 Electric communicator, 28.
 hydrostatic indicator, 29.
 light enlargements, 34.
 service, 10, 27.
 Electrical light system, 29.
 property, 29.
 Eleotris, 98.
 Ellington, A. M., sent flint implement, 72.
 Embiotocidæ, notes on, 158.
 Embryology and experimental physiology, accessions to, 234.
 England, gun-flint maker's core from, 66.
 English herring fisheries described, 155.
 Enlargements by electric light, 34.
 Entomological Society meetings, 22.
 Entomologist, report of, 163.
 Entomology, researches in, 116.
 Epicærus imbricatus, 164.

 list of accessions to, 64.
 monographs relating to, 63.
 report on, **63**.
 students of, 63.
 work in, 63.
 Eunephrops Bairdii described, 170.
 Eurycreon rantis larva obtained, 113.
 ravages of, 114.
- Euryonidæ, 22.
 Eutyphlus and Nicotheus identical, 26.
 Everett, H. B., Semnopithecus from, 80.
 Exchanges and gifts to be recorded, 109.
 distributed, 17.
 Exhibition and study series, development of, 13.
 balls crowded, 11.
 space, 7.
 Exploring Expedition fishes, 96.
- F.
- Fallow deer, albino, 80.
 Faxon, Prof. Walter, revised crayfishes, 119.
 studied crayfishes, 48, 123.
 Feddersen, Arthur, shells exchanged with, 109.
 Felis onca obtained, 79.
 tigris, 32.
 Fellows, A. R., sent plants, 58.
 Ferret, black-footed, 79.
 Fewkes, J. W., Medusa sent to, 123.
 to report on Medusa, 122.
 Fiber zibethicus replaced in Florida, 20.
 Fibers from Agricultural Department, 38.
 Brazil, 38.
 identified, 59.
 illustrated by photomicrographs, 60.
 number of specimens of, 60.
 received, vegetable, 59.
 shown at New Orleans, 36.
 study of vegetable, 60.
 textile, 38.
 tissues, &c., analysis of, 60.
 vegetable, 157.
 Fiedler, Judge, on salmon migration, 154.
 Finback whale stranded, 42.
 Fire-alarm box established, 28.
 Fish casts at New Orleans, 36.
 embryos, collecting embiotocoid, 169.
 hatching at New Orleans, 36.
 parasites studied, 122.
 ova, protective contrivances of, 169.
 plate obtained, 130.
 Fisher, I. G., sent black-fish, 81.
 Wm. J., Copper River ethnologica from, 64.
 Eskimo ethnologica from, 64.
 Fisheries and fish-culture at New Orleans, 36.
 fishery industries of United States, 157.
 of Key West studied, 123.
 report on United States, 10.
 section, 8, 39.
 Fishery photographs at New Orleans, 36.
 reports revised, 122.
 Fishes, accessions to, 233.
 by Dr. Gill, 156.
 changes in pelvic fins of embryo, 169.
 collected by Government, 96.
 department of, 8, 44.
 development of rays of, 169.
 unpaired fins of, 169.
 viviparous, 169.
 distributed, 17.

- Fishes, explorations for, 98.**
 from Chatham Island, 97.
 Cozumel, 97.
 exploring expeditions, 96.
 Galapagos Islands, 97.
 occasional contributors, 97.
 Oregon, 97.
 Peru, 97.
 illustrations of, 98.
 important accessions to, 95.
 number of, in collection 95.
 obtained by exchange, 98.
 from United States Life-Saving Service, 97.
 of interest to fish-culturists, 95.
 San Cristobal, 170.
 present state of, 95.
 report on department of, **95**, 154.
 routine work upon, 98.
- Fishing apparatus at New Orleans, 36.**

- Grebe, skeleton of horned, 102.
- Greece, ethnologica from, 66.
- Gregor, Isaiah, shells named for, 109.
- Greek Government received duplicate invertebrates, 125.
- Greely Expedition plants, 212.
Relief Expedition shells named, 109.
- Green, Fred. C., sent minerals, 137.
sent Niagara Group fossils, 130.
- Loren W., Indian implements from, 65.
- Griggs, Helen, Algiers, utensils from, 67.
Damascus, ornaments from, 66.
- Grinnell Land plants, 212.
- Guadeloupe Island antiquities, 77.
- Guatemala ethnologica, 66.
- Guesde, Louis, antiquities exchanged with, 77, 78.
- Guide-book manuals, 7.
- Guilding's parrot lent for study, 87.
- Guillemet, skeleton of thick-billed, 102.
- Gulf of California shells at New Orleans Exposition, 104.
Mexico collections and investigations, 124.
dredging stations in, 124.
fishes from, 96.
invertebrates, 117.
assorted, 118.
new fishes from, 154.
tyntlastes from, 97.
- Gull mounted, Bonaparte's, 31.
- Gulls and terns obtained, 85.
- H.
- Hadena devastatrix, larva of, 164.
- Hadropterus aurantiacus from North Carolina, 98,
in North Carolina, 154.
- Hæmulon, 98.
- Haida Indians' implements, 65.
- Hale, Horatio, sent canoe model, 65.
- Halibut cast, 33.
- Halicore australis, 31.
- Haliutella lappa described, 157.
- Hall, Dr., collected ores, 145.
E. A., on Batrachidae, 160.
Mullidae, 157.
with Seth E. Meek, 157.
- Hamy, Dr., cast obtained from, 77.
figured pipe, 74.
- Hanks, Prof. H. G., collected ores, 145.
- Haploidnotus grunniens, notes on, 153.
- Hargitt, Dr. Edward, birds exchanged with, 86.
- Harris and Clark presented Montana ores, 146.
- Hartlaub, Dr. G., bird exchanged with, 86.
- Havana fisheries studied, 123.
stalked crinoids from, 117.
- Havennor, W. H., sent ores &c., 146.
- Haverford College received duplicate invertebrates, 125.
- Hawk, new Cozumel, 162.
race of, 161.
- Hawley, E. H., 30.
work of, 34, 35.
- Hay, O. P., on Amblystoma copeianum, 157.
sent reptiles, &c., 93.
- Hayti, cast of celt from, 77.
wooden tray, 66.
- Healy, Capt. M. A., report on invertebrates of, 122.
sent Alaskan rocks, 139.
- Hedley, G. H., exhibit of, 32.
- Heidemann, A., Chinese puzzle from, 67.
South American ethnologica from, 66.
- Helminthophila, leucobronchialis obtained, 85.
- Hemphill, Henry, collected at Key West, 124.
corals, 119.
Florida invertebrates, 124.
shell, 103.
collections of, identified, 122.
invertebrates from, 43.
outfit supplied to, 124.
- Hemphill, Henry, sent invertebrates, 113.
shells named for, 109.
- Hendley, J. W., modeler, 30, 34.
- Henshall, Dr. J. A., paper by, 23.
- Henshaw, H. W., birds exchanged with, 86.
paper by, 24.
- Henry, Prof. Joseph, apparatus used by, 39.
on museum character, 5.
direction, 5.
- Heron, new boat-billed, 162.
- Heros, 98.
- Herring fisheries, English, 155.
- Herrings of the Pacific, 159.
- Hesperomys, correspondence about, 83.
leucogaster distributed, 84.
leucopus studied, 84.
- Heubner, Dr. Otto, translated, 154.
- Heubner's, "Experimental Diphtheria" translated, 57.
- Heyward, F. H., sent reptiles, &c., 93.
- High School, Chicago, received invertebrates, 125.
- Hilgard, J. E., paper by, 22.
- Hill, Hon. N. P., ore specimens from, 143.
G. W., paper by, 22.
- Hindoo collection, work on, 35.
- Historical relics collection, 39.
section, 8.
to be developed, 14.
- Hitchcock, Romyn, acting curator, 8, 59.
assistant curator, 61.
on foods and textiles, 1883, 157.
vegetable fibers, 157.
paper by, 24, 60.
report of, 59, 61.
work of, 38.
- Hobbs, I. I., sent pygmy sperm-whale, 80.
- Hoek, Dr. P. P. C., to study barnacles, 120.
- Hoffman's sloth skeleton prepared, 101.
- Holcombe, T. J., sent larva, 113.
- Holder, Dr. J. B., exhibit of, 32.
- Holocentrum, 98.
- Holmes, W. H., honorary curator, 8, 69.
report of, 69.
work of, 40.
- Honey-creepers, new, 161.
- Horan, Henry, duties of, 10.
extract from report of, 27.
staff of, 26.
- Hornaday, W. T., at New Orleans, 42.
chief taxidermist, 30.
collected capybara, 101.
exhibit of, 32.
lecture by, 21.
mammals from, 30, 80.
- Hornblende andesite from Bogosloff, 160.
- Howard Company's electric clock, 28.
- Howard, L. O., papers by, 26.
- Howell, H. A., paper by, 25.
- Hudson River Group fossils obtained, 129.
- Hudson's Bay Territory, skulls and antlers from, 101.
- Human body, compounds of, 61.
elements of, 61.
- Hunt T. S., paper by, 22.
- Hupp, J. Le Moyne, sent invertebrate fossils, 129.
- Hurlbut, G. H., antiquities from, 78.
- Hybognathus hayi described, 158.
- Hybopsis montanus of Meek, 160.
- Hydrocoralline described, 155.
- Hydrostatic indicator, 29.
- Hylobates concolor obtained, 42.
- Hyalothellus micans obtained, 130.
- Hyolithes Americanus obtained, 129.
communis obtained, 129.
o tusa obtained, 129.
princeps obtained, 129.
shaleri, casts of, 131.
- Hyomoschus aquaticus obtained, 80.
- Hyphenus maculatus, 97.
- Hyperoodon semijunctus, correspondence about, 83.
capybara skeleton obtained, 101.
- I.
- Icosteus enigmaticus from Oregon, 97.
- Ictalurus punctatus, habits and food-value of, 157.
- Icterus cucullatus and its variations, 161.
- Idaho gold and silver ores obtained, 145.

Plænus insignis obtained, 130.
Illinois antiquities obtained, 74.
 new bird for, 155.
 Wesleyan University received duplicate
 invertebrates, 125.
 Inauguration increased visitors, 20.
 Increase of collections, 11.
 Indexes to accession list, 225.
 India, ethnologica from, 67.
 Indian blankets installed, 35.
 costumes from Captain Pratt, 18.
 relics distributed, 17.
 Indiana antiquities obtained, 73.
 Institute received invertebrates, 125.
 Indians illustrated at New Orleans, 36.
 of Sitka, ethnologica from, 64.
 Indo-Pacific shells at New Orleans Exposition, 104.
 Ingersoll, Ernest, on museum making, 157.
 Ingram, Harry P., volunteer work of, 21.
 Insect-destroying contrivances, 47.
 Insecticide machinery, 47, 115.
 substances, 47, 115.
 Insects, accessions to, 113, 233.
 arranged and classified, 48, 116.
 department of, 8, 47.
 distributed, 17.
 exhibited at New Orleans, 115.
 for New Orleans Exposition, 47.
 from Dr. Shufeldt, 115.
 East India, 113.
 Edward Burgess, 47.
 New Mexico, 47.
 Panama, 114.
 West Indies, 47, 113.
 injurious to agriculture, 47, 115.
 report on department of, 113.
 for 1883, 168.
 routine work on, 115.
 U. S. National Museum collection of, 167.
 Interior Department publications, 15.
 International Exhibition at Berlin, collections
 from, 5.
 London, collections
 from, 5.
 of 1876, collections
 from, 5.
 Intracellular digestion, report on, 154.
 Invertebrate fossils, Paleozoic, report on, 129.
 Invertebrates, accessions to marine, 117.
 assorted and catalogued, 119.
 cataloguing, 48.
 department of marine, 8, 48.
 difficulty of selecting duplicate, 126.
 distributed, 17.
 from A. Forrer, 48.
 Lieutenant Stoney, 48, 118.
 Professor Stearns, 48.
 Professor Verrill arranged,
 119.
 installed, 49.
 list of recipients of, 18.
 marine, accessions to, 233.
 assistants to curator of, 121.
 cases for, 121.
 catalogued and sorted, 120.
 distributed, 125.
 dried, 120, 126.
 duplicates of, 120.
 explorations for, 123.
 from Florida, 124.
 general remarks on, 125.
 inducements to students
 of, 126.
 moved to gallery, 121, 125.
 overhauled, 120.
 preserved in alcohol, 126.
 report on, 117.
 for 1883, 161.
 researches in progress
 upon, 126.
 of museum col-
 laborators
 upon, 127.
 upon, 121.
 routine work on, 118.
 sent out for study, 123.
 sets of duplicate, 125.
 stored in hall, 120, 125.
 taken off Hatteras, 124.

Invertebrates, marine, transferred, 90.
 types of new species of, 127.
 value of duplicate, 126.
 of Alaska, report on, 122.
 Gulf of Mexico, assorted, 118.
 outfits for collecting, 124.
 publications on fossil, 18.
 sent by H. Hemphill, 118.
 to students and teachers, 125.
 transferred, 11, 27.
 Iowa fishes described, 158.
 Iron foundry pictures, 146.
 manufacture, early, 155.
 ores from Michigan, 145.
 Tennessee, 146.
 obtained, 145.
 Isle of Fate, bow and arrows from, 67.
 Isosoma grande, notes on, 167.
 larger wheat-straw, 167.
 Italy, building, fragments from, 66.

J.

Jacobs, G. A., sent antiquities, 72.
 Jade, Alaskan, examined, 140.
 supposed crude, 160.
 Japan, implements from, 67.
 valuable shells from, 46, 103.
 Jefferson, S. M., received instruction, 64.
 Jeffreys, Dr. John Gwyn, note on 155.
 shells from estate of, 103.
 Jirdenstone, N. C., sent antiquities, 72.
 "Joad collection" of plants, 50.
 "John Bull" engine, 40.
 Johnson, A. B., paper by, 24.
 Dr. E. B., sent celt, 73.
 Jones, Dr. W. H., collected fishes, 97.
 human skulls from, 101.
 Peruvian ethnologica from, 66.
 sent image, 77.
 otary, 80.
 Jordan, D. S., on Catostomidae, 159.
 Corvinas and Roncadors, 158.
 Cyprinidae, 159.
 Dolly Varden trout, 159.
 Embiotocidae, 158.
 Epinephelus nigrilus, 158.
 Etheostoma varietum, 158.
 Etheostomatinae, 158.
 flying-fishes, 158.
 fresh-water drum, 158.
 Garman's, paper, 158.
 Girard's Cyprinidae and Catos-
 tomidae, 158.
 Iowa and Missouri fishes, 158.
 Lake Superior fishes, 158.
 name of yellow perch, &c., 158.
 new Hybognathus, 158.
 Pensacola fishes, 158.
 North American fishes, 158.
 Pacific herrings, 159.
 salmons, 159.
 sharks, 159.
 rock cods, 158.
 trouts, 158.
 Serranoid fishes, 158.
 Siluridae, 159.
 sunfishes, 158.
 the channel cat-fish, 157.
 lesser white fishes, 159.
 log perch, 158.
 sent types of fishes, 97.
 Jouy, P. L., antiquities from, 78.

K.

Kadiak ethnologica, 64.
 Kamtschatka exploration, 18.
 new birds from, 171.
 Kangaroo obtained, red, 32.
 Kansas Agricultural College received inverte-
 brates, 125.
 fishes, new, 156.
 Kentucky antiquities obtained, 74.
 coals obtained, 145.
 Kerosene emulsions, 166.
 Korvey, H. R., antiquities from, 72.
 Kew Gardens, plants from, 50, 135.
 Key West birds obtained, 85.

- Key West fisheries studied, 123.
fishes obtained, 96.
- Kidder, Dr. J. H., on lecture committee, 22.
- Kingfisher, new American, 162.
- Kinney, Dr. Augustus C., sent fishes, 97.
- Knowlton, Frank H., botanical work of, 50, 135.
on Alaskan plants, 135, 159.
paper by, 24.
- Kobus ellipsiprinus, 32.
obtained, 80.
- Koebele, Albert, assisted Professor Riley, 116.
sent reptiles, 93.
work of, 48.
worked on insects, 21.
- Kogia breviceps cast, 33.
obtained, 42, 80.
- Kohn, G., sent Alabama turtles, 93.
- Koons, Prof. B. F., studying fish-parasites, 122.
- Kotzebue Sound ethnologica, 64.
- Kutorgina cingulata obtained, 130.
- L.
- Labels and printing, 14.
department, 10.
for museum objects, 6.
stored in library, 17.
- Labidesthes sicculus from South Carolina, 98.
- Laboratory furniture, 13.
work, 13.
- Labrador arachnida, 26.
batrachians obtained, 93.
fishes from Mr. Turner, 97.
salmonida obtained, 97.
- Labridae from Key West, 96.
- Lagenorhynchus repaired, 31.
- Lake Superior fishes, 158.
- Lamson, J., & Bro., Costa Rican ethnologica from, 66.
- Landeros y Cos, José de, presented mining collections, 147.
- Lanius robustus, remarks on, 171.
- Launiers, M. Virion des, cocoons from, 59.
- Larrea mexicana, 76.
- Lawrence, George M., birds exchanged with, 86.
birds lent to, 87.
- Lea, Dr. Isaac, sent fresh-water shells, 103.
land shells, 103.
writings of, 18.
- Leaf-beetle, streaked cottonwood, 166.
- Lectures, committee on, 22.
- Lectures in Museum, 21.
Saturday, 21.
- Lee, General R. E., furniture of, 39.
Prof. L. A., studying Foraminifera, 122.
Thomas, assisted on "Albatross," 124.
W. F., antiquities from, 78.
- Legaré, Dr. T. B., sent Labidesthes, 98.
- Leidy, Joseph, on Bothricephalus, 159.
- Lepidoptera arranged, 116.
from India, 47, 113.
of Hong-Kong, paper on, 114.
- Lepomis cyanelus, an enemy of carp, 96.
elongatus obtained, 97.
mystacalis obtained, 97.
- Leptæna deltoidea obtained, 131.
- Leslie, C. C., collecting fishes, 98.
- Lencarcia acrae from Texas, 113.
- Lewis, Dr. J. G., Arkansas ores, &c., from, 145.
H. C., paper by, 25.
- Libbey, Joseph, carved jicara from, 66.
- Library accessions, 15.
card-catalogue, 16.
contributors to, 15.
crowded state of, 16.
department, 10.
extension proposed, 17.
of Congress accounts transferred, 16.
popular circulating, 16.
privileges, 16.
report of 1883, 172.
wants, 16.
work in, 15.
- Life-car, metallic, 39.
- Life-saving apparatus of Joseph Francis, 39.
- Lima Facultad de Medicina received duplicate invertebrates, 125.
- Limbs, modifications of, illustrated, 45.
- Lindenkohl, A., paper by, 22.
- Lingula cuneata obtained, 130.
- Linney, W. M., lent ax, 74.
flint cutter, 74.
stone, 75.
- Linton, Prof. E., studying fish-parasites, 122.
- Lithology, &c., at New Orleans, 52.
and physical geology—
accessions to, 139, 234.
additional space for, 141.
at New Orleans, 37.
department of, 9, 51.
desirability of buying specimens in, 142.
exhibition series in, 52.
in 1883, 160.
money wanted for, 52.
need of cases for, 142.
new space for, 52.
number of specimens in, 142.
recommendations about, 142.
report on, 139.
researches upon, 141.
routine work in, 140.
state of collections in, 141.
- Livistona australis living in the Museum, 136.
Borbonica living in the Museum, 166.
- Lloyd, C. G. H., mammals from, 80.
sent reptiles, 93.
- Locust injury, opinion regarding, 168.
Rocky Mountain, 165.
- Loft for storage, 27.
- Loncheres armatus in Martinique, 171.
- London exhibition collections, 5.
fisheries exhibits installed, 27.
- Long Island Sound exploration, 153.
- Loomis, Elias, paper by, 22.
- Lophius, development of anterior dorsal of, 170.
- Lota maculosa, paper on, 154.
- Louisiana, Indian coat from, 65.
- Louisville Exposition, collections sent to, 14.
- Lovén, Prof. Sven, Echinus sent to, 123.
- Lovett, Edward, edible mollusks furnished to, 109.
- Lowell School, Boston, received duplicate invertebrates, 125.
- Lower Cambrian fossils, casts of, 151.
Silurian rocks obtained, 139.
- Loxia reviewed, 162.
- Lucas, F. A., assistant, 8.
exhibits of, 32.
on Monachus tropicalis, 83.
preparing skeletons, 159.
rough skeletons, 151.
osteological preparator, 30, 101.
presented skeleton, 101.
report of, 33.
work of, 101.
- Lucilia from Alaska, 114.
- Lunda cirrhata skeleton obtained, 102.
- Lupton, Prof. N. P., sent meteorite, 137.
- Lutjanus, 98.
griseus, 97.
- Lütken, Dr. Chr. Fr., correspondence with, 83.
- Lygus lineolaris, notes on, 165.
- Lyman, Hon. Theodore, address by, 23.
studied Ophiurans, 122.
- M.
- Macacus speciosus, 31.
- Macaque mounted, Japanese, 31.
- McCaughan, J. Z. A., on Mullidæ, 157.
with E. A. Hall, 159.
- McDonald, Marshall, on shad and alewives, 159.
papers by, 23, 25.
- McDonogh School received invertebrates, 125.
- McIlwraith, Thomas, birds exchanged with, 86.
- McKay, C. L., Aleut ethnologica from, 64.
collected Alaskan plants, 135.
notes on plants of, 159.
sent Alaska antiquities, 76.
- Mackerel fisheries, English, 155.
- Mac Lean, J. P., lent tablet, 73.
sent cast, 74.
J. J., Sitka ethnologica from, 64.
- Maclurea? obtained, 129.
- McNeil, J. A., gold ornaments from, 66.

- McNeil, J. A., sent insects, 114.
Macropus giganteus obtained, 80.
 gigas, 31.
 rufus, 32.
 McWhirter, A. J., sent ores, 146.
 Madagascar, ethnologica, 67.
 Maderia Islands, ethnologica from, 66.
 Magee Furnace Company, gift from, 35.
 Maka Indians' ethnologica, 65.
 Malformation, hereditary, 159.
 Mamestra subjuncta, lava of, 164.
 Mammal department, offices moved, 27, 42.
 report on, **79**.
 exhibit at New Orleans, 36.
 heads mounted, 31.
 offices moved, 11.
 skins and skeletons distributed, 17.
Mammals, accessions to, 232.
 added from January to July, 1885, 83.
 attended to, 31.
 department of, 8, 41.
 for 1883, 172.
 distributed and exchanged, 84.
 entry members of, 81.
 from Central America, 79.
 West Indies, 79.
 important accessions to, 79.
 in collection, number of, 83.
 flesh obtained, 32.
 reserve and duplicate series, 83.
 investigations concerning, 82.
 labels for, 41, 81.
 lent for study, 84.
 list of, 81.
 mounted, 31, 41.
 mounted, 41, 81.
 new cases for, 81.
 obtained, aquatic, 80.
 exotic, 80.
 office of, moved, 82.
 overhauling skulls and skeletons of, 99.
 poisoned, 82.
 present condition of, 83.
 proposed terrace for, 81.
 rearranged, 81.
 record of, completed, 82.
 report on department of, **79**.
 returned from New Orleans, 32.
 routine work on, 81.
 selected for exchanges, 82.
 study, 82.
 sent to New Orleans, 31, 41.
 skulls and skeletons of, 101.
 terrestrial, 79.
 work on general collection of, 82.
Manatees and sea-cow, 172.
Mandril, mounted, 31.
Manganese ore from Arkansas, 145.
 ores obtained, 145.
Manigault, Dr. G. E., correspondence with, 83.
 shells furnished to, 109.
Mann, B. P., paper by, 26.
Mantis carolina obtained, 113.
Maple-scale, cottony, 166.
Marbles from Ophite Marble Company, 139.
 shown at New Orleans, 37, 52, 140.
Marcou, J. B., Bulletin by, 18.
 honorary assistant, 9.
 on Invertebrate Paleontology, 159.
Marine invertebrates, report on, **117**.
Marsh, Prof. O. C., casts from, 45.
Marshall, Henry, 30.
 birds mounted by, 88.
 moved, 33.
 work of, 32.
Marsupialia, mounted, 31.
Martin, H. N., paper by, 25.
 S. J., sent porpoise, 81.
Marx, Dr. George, papers by, 26.
Mason, C. F., sent fulgurites, 139.
 Otis T., anthropological notes of, 159.
 at New Orleans, 62.
 curator, 8, 63.
 monographs by, 63, 78.
 on anthropology, 159.
 basket-work, 19.
 hereditary malformation, 139.
 lecture committee, 22.
 throwing-sticks, 19.
Mason, Otis T., papers by, 23, 24.
 report of, **63**.
 work of, 40, 63.
Massachusetts, stone carving from, 71.
Materia medica accessions, 57.
 catalogue revised, 58.
 collection, arrangement of, 57.
 classification of, 151.
 state of, 58.
 labels, 14.
 section, **S**.
 routine work in, 57.
 report on, **57**.
 work of, 37.
Mather, Fred., papers by, 23.
Matthews, Dr. Washington, Navajo ethnologica from, 5.
 paper by, 22.
Maynard, C. J. & Co., birds exchanged with, 86.
Mazatlan fishes obtained, 93.
Mazyck, W. G., shells named for, 109.
Meat biscuit from Mexico, 61.
Medina sandstone fossils, 130.
Medusa sent out for study, 123.
 to be reported upon, 122.
Meek, F. B., writings of, 18.
 Seth E., on Batrachidæ, 160.
 flying-fishes, 158.
 Iowa and Missouri fishes, 158.
 new Hybopsis, 160.
Meetings of societies, 22.
Meles taxus obtained, 80.
Memimna indica, 31, 32.
Mendenhall, Prof. T. C., lecture by, 22.
Merchant marine vessels illustrated, 36.
Mercury ores from Nevada, 146.
 obtained, 145.
Merriam, Dr. C. H., correspondence with, 83.
 sent harp seal skins, 30.
 studied mammals, 83.
 Putorius nigripes, 84.
Merrill, George P., acting curator, 9, 139.
 at New Orleans, 51, 140.
 collected reptiles, 93.
 curator, 51.
 on hornblende andesite, 160.
 supposed jade, 160.
 volcanic dust, 160.
 papers by, 25, 141.
 photographs by, 34.
 report of, **139**.
 studied photography, 21.
 work of, 51.
 L. H., assistant, 140.
Meso-Cenozoic invertebrate fossils, 9, 49.
 1883, 173.
 accessions to, 133.
 described, 133.
 report on, **133**.
 work on, 49, 133.
Mesozoic fossil plants, 136.
Metalia pectoralis obtained, 118.
Metallurgist's office, &c., moved, 11.
Metallurgy and economic geology—
 accessions to, 143, 144, 234.

making, 157.
objects, grouping of, 6.
of Comparative Zoology, sperm-whale bones sent to, 84.
offices and laboratories, 7.
plan, 7.
preparators, work of, 30.
publications, 3, 5, 151.
receipts and expenditures, 130.
report, 3.
change of period in, 3.
for 1883, 157.
scientific staff, 7.
staff, 4, 7.
work, 3.
- Musical instruments, 39.
- Musk deer obtained, 32.
- Muskrat, new, Florida, 20, 83.
- Mussels at New Orleans, fresh-water, 104.

Mussels of Mississippi basin, 46.
Mustelus, 98.
Mya arenaria, green gills of, 169.
 Myers, Capt. A. H., sent sleeper shark, 97.
Myopotamus coypu, 31, 32.
 obtained, 80.

N.

Nadallac's Prehistoric America reviewed, 155.
Narcine umbrosa, type of, 97.
 Nash, Dr., instructions to, 21, 63.
 photographs of, 34.
 received ontomological outfit, 114.
 studied photography, 21.
Nasna narica from Cozumel, 79.
 National Academy of Sciences' meetings, 22.
 papers for, 22.
 cabinet of curiosities accepted, 4.
 Museum exhibit at New Orleans, 35.
 organized, 4.
 Naturalists of Eastern North America, Society of, 25.
 Naturalists' Society meetings, 22.
 "Nature" on the Museum electric service, 29.
Navajo Indian ethnologica, 65.
 Naval architecture section, 8, 39.
 Neal, Dr. J. C., sent stone implements, 73.
 Negatives made, 34.
 numbered and filed, 34.
 Nehring, Prof. Dr. Alf., skulls exchanged with, 84.
 Nelson, E. W., Arizona antiquities from, 76.
 sent Alaskan insects, 114.
 mammals, 79.
 Dr. George W., sent Panama reptiles, 93.
Neofiber allenii, paper on, 20.
 allenii, 31.
Nepa and *notonecta*, egg of, 169.
Nephela plumipes obtained, 113.
Nevada ores obtained, 146.
New Caledonia, ethnologica from, 67.
 England, marine fauna of, 172.
 Jersey zinc ores, 146.
 Mexico, clay pipe from, 75.
 copper ores, 146.
 insects from, 47, 115.
 Zuni ethnologica from, 65.
 New Orleans, "Albatross" at, 123.
 Exposition, birds for, 88.
 cases made, 27.
 casts painted, 34.
 collections sent to, 14.
 ethnologica, 64.
 from, 63.
 exhibit of mammals, 42.
 exhibits installed, 31.
 returned, 32.
 fishes labeled, 98.
 lithology and physical geology at, 140.
 material investigated, 144.
 metallurgy collections from, 54.
 metals, &c., analyzed, 54.
 mollusks for, 104.
 new ores, &c., from, 145, 147.
 textiles in, 60.
 New York antiquities obtained, 71.
 Niagara group fossils obtained, 130.
 Niblack, A. P., Madeira ethnologica from, 66.
 South American ethnologica from, 66.
Nicaragua ethnologica, 66.
 Nicholas, G. L., exhibits of, 32.
 Nicholson, Agnes, clerk in department of mollusks, 103.
 Nickel ore from Nevada, 146.
Nicotheus equals *Eutypilus*, 26.
 Niles, W. H., paper by, 25.
 Nissley, J. R., antiquities from, 73.
 Noble, F. W., collected iron ores, 145.
 Noe, Fletcher M., collected Minnesota reptiles, 93.
 North American aboriginal basket-work, 19.
 fishes, notes on, 153.
 Carolina antiquities obtained, 72.
 ores obtained, 146.

H. Mis. 15, pt. 2.—17

Novaculite from Arkansas, 145.
 Nutting, C. O., sent Florida reptiles, 93.
 insects, 113.
 Nye, Willard, jr., on octopus, flying-fish, &c., 160.
Nysius angustatus, notes on, 165.

O.

Obolella chromatica obtained, 130.
 circe obtained, 130.
 crassa obtained, 130.
 gemma obtained, 130.
Octopus, notes on, 160.
Ocyurus chrysurus, 97.
Ostrelata fisheri and *defilippiana*, 161.
Ohio antiquities obtained, 73.
Olenoides laevis obtained, 130.
 Olivet College received duplicate invertebrates, 125.
Onychotes gruberi discussed, 162.
 Ophite Marble Company sent mantel, &c., 139.
Ophiurans, researches upon, 122.
Ophiuroidea, new species of, 172.
 Orange, rust of, 168.
 Orangs received in exchange, 84.
 Orcutt, C. R., mollusks exchanged with, 110.
 named for, 109.
 sent California reptiles, 93.
 Ore material shown at New Orleans, 143.
 works, pictures of, 146.
Oregon fishes from Dr. Kinney, 97.
 ores obtained, 146.
 Ores and minerals for analysis, 12.
 exhibited at New Orleans, 36, 53.
 from California, 145.
 Colorado, 145.
 Georgia, 145.
 Mexico, 146.
 New Orleans Exposition, 145, 147.
 Oregon, 146.
 Sonora, 146, 147.
 non-metallic, and their utilization, 143.
 report on department of, 143.
 Ornithologists' Union committee meeting, 88.
Ornithorhynchus, lecture on, 21.
Orthis impressa obtained, 130.
 lynx obtained, 129.
 melichina obtained, 129.
 resupinata obtained, 129.
 testudinaria obtained, 131.
Orthoceras annulatum (?) obtained, 130.
 sp. ? obtained, 130.
Ortyx, new species of, 155.
 Osborn, H. F., papers by, 25.
Osceola, bust of, 65.
Oscinis brassicae, notes on, 165.
 cabbage, 165.
 Osteological catalogue entries, 84.
 exhibit to be developed, 14.
 force insufficient, 33.
 preparator's work, 33.
 series, work on, 82.
 Osteology, comparative, 99.
 material for, 100.
 department of comparative, 99.
 exhibition series in, 99.
 registers for, 99.
Ostracion trigonum, 97.
Ostrich skeleton obtained, 101.
 obtained, 32.
O. jubata obtained, 80.
Otary obtained, 80.
Otiiorhynchidae, changes in, 26.
Ovis cycloceras, 31.
 montana, 31.
 nivicola, 31.
 Oyster, development of viviparous edible, 169.
 life history of, 170.
 Oysters, rate of growth of, 169.

P.

Pachuca ores obtained, 147.
 Pacific invertebrates from Professor Stearns, 118.
 Railroad survey collections, 4.
 shells at New Orleans Exposition, 104.
 Packard, A. S., paper by, 22.
Pædisca saligneana, 26.
 scudderiana, habits of, 26.

- Painting of Smithsonian building, 27.
 Pai Ute Indian utensils, 65.
 Paleontology, progress of North American invertebrate, 159.
 Palaeozoic invertebrate fossils, 9, 49.
 additions to, 129.
 number of, 131.
 recommendations about, 132.
 report on, **129**.
 1883 report on, 173.
 work on, 131.
 fossil plants, 136.
 notes, 173.
 Palmer, E., antiquities from, 78.
 Arizona antiquities from, 75.
 collected corals, 119.
 collections of, identified, 122.
 ethnologia from, 65.
 explorations of, 41.
 obtained new sponge, 118.
 twig broom from, 65.
 Joseph, modeler, 30.
 exhibit of, 32.
 work of, 33.
 William, exhibit of, 32.
 collected reptiles, &c., 93.
 obtained Brewster's warbler, 85.
 Palestine, ethnologia from, 66.
 Panama insects obtained, 114.
 reptiles from Dr. Nelson, 93.
 Pandanus utilis living in the Museum, 136.
 Papers based on Museum material, 19, **152**.
 Papers on Museum material, list of, **153**.
 Papio maimon, 31.
 Paradoxides Bennetti, casts of, 131.
 Harlani, casts of, 131.
 spinosus, casts of, 131.
 Paridæ invoiced, 91.
 Parker, H. G., birds exchanged with, 86.
 Peter, duties of, 98.
 Part I, Assistant Director's Report, **1**.
 II, Curator's Reports, **55**.
 III, Bibliography, **149**.
 IV, List of Accessions, **175**.
 Passer saturatus from Japan, 171.
 Pastinacas, generic name of, 156.
 Pearce, Richard, on alloys, 144, 161.
 sent alloys, 143.
 Peccary, mounted, 31.
 skins from Cozumel, 79.
 Penæidæ, genera of, defined, 170.
 new species of, described, 170.
 of U. S. Fish Commission, 170.
 Pennsylvania antiquities obtained, 71.
 Geological Survey publications, 15.
 ore collections, 146.
 Pensacola fishes, new species of, 158.
 obtained, 96.
 Pentacrinus from off Havana, 43.
 ground off Havana examined, 123.
 mülleri and decorus obtained, 122.
 Perch, log, notes on, 158.
 name of yellow, 158.
 Percina caprodes, notes on, 158.
 Periodicals for library, 15.
 Perkins, Harriet, assisted with birds' eggs, 90.
 Perley, L. O., sent fossils, 131.
 Perognathus fasciatus obtained, 79.
 Perry Japan expedition collections, 4.
 N. H., minerals from, 137.
 Peru, ethnologia from, 66.
 fishes from, 97.
 human skulls from, 101.
 image from, 77.
 Peters, C. H. F., paper by, 22.
 G. W., correspondence with, 114.
 Peucea æstivalis discussed, 155.
 mexicana new to United States, 162.
 Phasianidæ, exotic, 44.
 from Department of Agriculture, 89.
 Philadelphia exhibition collections, 5.
 industrial collections, 5.
 Zoological Garden, mammals from, 80.
 sent animals, 42.
 Society, sent sloth, 101.
 Philippine Islands, bracelets from, 67.
 land shells from, 103.
 Phocæna communis obtained, 80.
 dalli described, 172.
 lineata obtained, 80.
 Phosphatic rock obtained, 146.
 Photo-engraving illustrated at New Orleans, 36.
 Photographer, work of, 34.
 Photographic enlargements, 34.
 negatives made, 34.
 prints made, 34.
 Photography by electric light, 29.
 pupils in, 34.
 Phyllacanthus gigantea sent out for study, 123.
 Phyllotreta albionica, 164.
 vittata, 164.
 zimmermanni, 164.
 Phylloxera, notes on, 167.
 Physical apparatus transferred, 38.
 Pickett, T. J., Mexican ethnologia from, 66.
 Pickford and Winkfield sent apatite, 54, 143.
 Pierce, M. M., sent porpoise, 80.
 Pieris napi from Alaska, 113.
 Pima Indian ethnologia, 65.
 Pisciculture, Goode on, 157.
 Pityophthorus consimilis on sumac, 26.
 Plagiodera scripta, notes on, 166.
 Plant-bug, tarnished, 165.
 louse, cabbage, 165.
 Plants added to flora of Washington, 173.
 card catalogue of, 135.
 Cenozoic fossil, 136.
 collected by A. L. Schott, 126.
 department of fossil, 136.
 and recent, 9, 50.
 recent, organized, 135.
 determined for A. R. Fellows, 58.
 distributed, 17.
 fossil, accessions to, 233.
 administered upon, 136.
 catalogued, 136.
 stored in Armory, 136.
 undetermined, 136.
 work on, 136.
 from Alaska reported upon, 135.
 Commander Islands, 157.
 "Joad collection" of, 50.
 list of genera of, 51.
 Mesozoic fossil, 136.

- Sheep, Siberian, 41.
- Shells, &c., named for Mrs. Warner, 110.
Arctic, from H. G. Dresel, 104.
L. M. Turner, 104.
at New Orleans, marine, 46.
deep-sea, from the Jeffreys collection, 103.
distributed, 17.
exchanged and given away, 105.
at London Exhibition, 109.
exotic, from Dr. Lea, 103.
Floridian, obtained, 104.
for New Orleans Exposition, 104.
marine, 46.
from the Jefferys estate, 103.
Japanese, 46.
named for Henry Hemphill, 109.
Hon. F. E. Spinner, 110.
Isaiah Greeger, 109.
Professor Wetherby, 110.
Wallingford Society, 109.
W. G. Mazyek, 109.
- obtained from Dr. Lea, 103.
land and fresh-water, 104.
Japanese, 103.
of Greeley relief expedition named, 109.
purchase of duplicate, proposed, 105.
recent, identified, 105.
researches in progress upon, 106.
sent to Charleston College, 109.
New Orleans Exposition, marine, 104.
Tertiary fossil, identified, 105.
- Shepard, Prof. Charles U., American minerals from, 137.
- Shields, J. M., sent pipe, 75.
- Shindler, A. Z., artist, 30.
work of, 31, 35.
- Shoup, Col. G. W., presented Idaho ores, 145.
- Shufeldt, Dr. R. W., alcidæ lent to, 87.
arranged bird skeletons, 99.
correspondence with, 83.
insects from, 47.
on beak of Diomedea brachyura, 170.
sent fossil, 130.
studied Hesperomys, 84.
- Shufeldt, Dr. R. W., studied mammals, 83.
Lieutenant, Madagascar ethnologica from, 67.
- Siberian sheep mounted, 41.
- Siler, A. L., Pai Ute utensils from, 65.
- Silk culture collection, 115.
exhibit, 47.
report on, 167.
from North Carolina cocoons, 59.
- Silks received, 59.
- Silpha lapponica obtained, 114.
- Siluridae, notes on, 159.
- Silver-copper ores from Montana, 146.
lead ores from Montana, 145.
ores from Idaho, 145.
- Simmons, D., studied carvings, 21, 63.
Newton, collected reptiles, &c., 93.
- Simpson, Harry, reptiles from, 93.
- Simulium sp., notes on, 166.
- Sioux Indian clothing, 65.
cradle, 65.
- Sirenia mounted, 31.
- Sitka Indian ethnologica, 64.
- Sittidae invoiced, 91.
- Skeleton cases, 44.
- Skeletons from Army Medical Museum, 45.
installed, 45.
preparation of, 151, 159.
returned from New Orleans, 32.
series of mounted, 100.
special cases for, 45.
- Skinner, A. N., paper by, 22.
- Skins packed, 31.
- Skulls and skeletons overhauled, 99.
- Sleeper-shark from Maine, 97.
- Sloth obtained, 32.
- Smillie, T. W., gave lessons in photography, 21.
photographer, 30.
- Smith, Dr. Theobald, paper by, 24.
Hugh M., services of, 90.
Mary M., drawings by, 98.
Rosa, on fishes of San Cristobal, 170.
Prof. S. I., crustaceans sent to, 123.
duplicate invertebrates examined by, 126.
on a new crustacean, 170.
new decapod crustacea, 170.
Penaidæ, 170.
researches of, 122.
returned marine invertebrates, 117.
- W. R., furnished living plants, 135.
- Smithsonian Institution, accounts with Library of Congress transferred, 16.
collections, 4.
control of Museum, 4.
exhibit at New Orleans, 35.
- Snails of Mississippi basin, 46.
at New Orleans, 104.
- Snake-molding improved, 33.
- Snout-beetle, imbricated, 164.
- Societies, meetings of, 22.
- Somniosus microcephalus obtained, 97.
- Sonora, ores obtained, 146, 147.
- Soricidae, correspondence about, 83.
- South America, ethnologica from, 66.
work on reptiles of, 94.
Carolina, gold ores, 146.
Sea Island corals received, 118.
- Space, assignment of, 11.
- Spainhour, J. M., antiquities from, 78.
sent antiquities, 72.
- Spangler, George, lent ceremonial objects, 73.
- Sparrow, black-chinned, nest and eggs of, 86.
- Sparrows from California, unnamed, 161.
- Spatier, Prof. N., sent copper ores, 146.
- Spears, bows and arrows, mode of exhibiting, 63.
- Sperm-whale obtained, pygmy, 80.
- Sphærexochus Rominger obtained, 130.
- Sphida equals Arzama, 26.
- Sphyræna, 98.
picuda, 97.
- Spider, poisonous, 163.
- Spinner, Hon. F. E., shells named for, 110.
- Spiny shark cast, 33.
- Spirifera centronatus obtained, 129.
mesostriatus obtained, 130.

- Spirifera obtained, 129.
 Spizella atrigularis, nest and eggs obtained, 86.
 Spofford, H. W., 10.
 assistant librarian, 16.
 Sponge (?), Devonian, obtained, 130.
 new fresh-water, 118.
 Sponges, catalogued, 119.
 from the "Albatross," 117.
 of United States, 161.
 Squirrel obtained, Abert's, 79.
 Arizona, 79.
 Staff, administrative, 9.
 Star-fishes from the Pacific, 118.
 west coast of Mexico, 48.
 obtained by C. H. Townsend, 118.
 Stathmonotus described, 154.
 Station boxes visited hourly, 28.
 Steam transportation section, 7, 8, 40.
 Stearns, Dr. R. E. C., adjunct curator, 8, 103.
 at New Orleans, 46, 104.
 collected corals, 119.
 fossils, 131.
 invertebrates from, 48.
 Pacific invertebrates from, 118.
 paper by, 23.
 presented birch-bark box, 65.
 reported upon fossils, 110.
 work of, 45, 46.
 Silas, new fishes from, 158.
 sent spotted dolphin, 80.
 Stejneger, Dr. Leonhard, *Analecta ornithologica*, 171.
 assistant curator, 8.
 at New Orleans, 42.
 auf eine Umseglung der Bering-Insel, 171.
 birds' skeletons from, 102.
 Bulletin by, 18.
 installed birds at New Orleans, 88.
 obtained Rhytina, 45.
 on birds of standard natural history, 171.
 Commander Islands plants, 171.
 Lanius robustus, 171.
 new birds, 171.
 Passer saturatus, 171.
 shedding claws in ptarmigan, 171.
 paper on plants of, 157.
 services of, 90.
 Stenotheca elongata obtained, 129.
 Stephens, F., paper on birds of, 155.
 Sternberg, Dr. George M., lecture by, 21.
 Stevenson, James, sent Zuni ethnologica, 64, 65.
 Stewart, Bert, sent stone implements, 74.
 Stilbite from Arkansas, 145.
 Nevada, 146.
 Stimpson, Dr. W. G., work of, 82, 101.
 "Sting rays," generic name of, 156.
 Stolasodon narinari, note on, 154.
 Stolephorus mitchillii, 97.
 Stone antiquities, contemplated work upon, 78.
 cutters added to Museum force, 141.
 shed built, 11, 27.
 implements shown at New Orleans, 37.
 Stones at New Orleans, cut and polished, 51.
 building and ornamental, 52.
 Stoney, Lieut. G. M., Alaskan ethnologica from, 64.
 collected Alaskan invertebrates, 124.
 rocks, 139.
 invertebrates from, 48, 118.
 outfit supplied to, 124.
 Saint Michael's ethnologica from, 64.
 sent batrachians, 93.
 insects, 113.
 Storage loft, 27.
 Stotsenberg, J. H., sent bone implements, 73.
 Streptorhynchus crenistria obtained, 129, 131.
 Struthio camelus, 82.
 Stuart, Harry, Guatemala ethnologica from, 66.
 W. E., sent salmon from Potomac, 96.
 Students and lectures, 21.
 Suartze & Whitney, Mexican ethnologica from, 66.
 Sunfishes, notes on, 158.
 Superintendent's report quoted, 27.
 Surf-fish, notes on, 158.
 Surinam reptiles obtained, 93.
 Swain, Joseph, on new Pensacola fishes, 158.
 see under D. S. Jordan, 171.
 Swan, J. G., ethnologica from, 65.
 Swash, J. C., sent Oregon ores, 146.
 Sweeney, T. W., 30.
 Sylviidae invoiced, 91.
 Syncarida, 22.
 T.
 Tampa Bay fishes obtained, 96.
 Tanner, Lieut. Com. Z. L., abstract of report by, 174.
 commanded exploring steamer, 123.
 Tasmania, mammals obtained from, 80.
 reptiles, 93.
 Taussig, Lieut. E. D., outfit supplied to, 124.
 Taxidermic department, accessions to, 30.
 Taxidermists, 30.
 exhibit of American, 36.
 space increased, 33.
 Taylor, Dr. Thomas, papers by, 24, 25.
 Fred. W., sent Paleozoic fossils, 129.
 Telegraph office opened, 28.
 Teleost embryo, axis of, 169.
 Telephone system, 29.
 Temperature in relation to heart's action, 58.
 Temperatures taken at sea, 123.
 Tennessee, discoidal stone from, 75.
 ores obtained, 146.
 Teoyaniqui (Goddess of Death), 41.
 Terabrutula obtained, 129.
 Terra-cotta collections installed, 27.
 Terrapin, experiment on heart of, 58.
 Tertiary fossils identified, 105.
 report upon, 110.
 Tetrodon spengleri, 97.
 Teuthis hepatus, 97.
 Texas coals obtained, 146.
 reptiles from G. H. Ragsdale, 93.
 Textile display at New Orleans, 36.
 exhibit arranged, 27.
 installed, 11.
 fibers from Agricultural Department, 38, 59.
 Brazil, 59.
 industries, report on, 157.
 section, 8.
 report on, 59.
 routine work in, 59.
 Textiles, additions to, 59-60.
 shown at New Orleans, 36, 38.
 to be displayed, 14.
 work on, 38.
 Thamophilus lent for study, 87.
 Thomas, Oldfield, correspondence with, 83.
 Throwing-sticks exhibited, 40.
 Mason on, 19.
 Thyridopteryx, bags of, 113.
 ephemeræformis, 26.
 remarks on, 163.
 Tiger cubs obtained, 32.
 Time service, 28.
 Tin ores obtained, 145.
 Tingis eggs, 26.
 Tischeria heliopsisella from Mexico, 113.
 Tisdell, W. P., African ethnologica from, 66.
 brought Congo ethnologica, 64.
 Todd, H. L., drawings by, 94.
 Townsend, Charles H., birds exchanged with, 86.
 collected fossils, 131.
 notes on fishes of, 170.
 on catbird on Farallones, 171.
 sea-elephant capture, 171.
 seals from, 80.
 sent reptiles, 93.
 sea-urchins, &c., 118.
 whale skulls, 101.
 Trachurops cramenophthalmus, 97.
 Trachynotus gorceensis, 97.
 Tragelaphus scripta, 31.

Traps illustrated at New Orleans, 36.
 Tres Marias Islands, fishes from, 98.
 Trichodon stelleri from Oregon, 97.
 Trimble, J. M., sent Paleozoic fossils, 129.
 Trinity College received duplicate invertebrates, 125.
 Tripoli from Nevada, 146.
 Trocadero Museum, African implements from, 67.
 Amazon River bow from, 66.
 cast of celt from, 77.
 Morocco implements from, 67.
 Polynesian bracelets from, 67.
 pottery vessels from, 66.
 sent Mexican ethnologica, 66.
 Troglodytidæ invoiced, 91.
 Trout, Dolly Varden, 159.
 True, F. W., comparative anatomist, 44.
 correspondence of, 83.
 curator, 8, 79, 99.
 lecture by, 21.
 librarian, 10.
 on department of mammals, 1883, 172.
 lecture committee, 22.
 literary work, 15.
 Loncheres armatus, 171.
 manatees and Arctic sea-cow, 172.
 military cetology, 171.
 Museum library, 1883, 172.
 Neotiber alleni, 20.
 Phocæna dalli, 172.
 porpoise fishing, 82.
 fishery, 172.
 steak, 172.
 reptiles and batrachians, 172.
 Tursiops tursio, 172.
 papers by, 23, 24, 25, 83.
 reports of, 79, 99.
 work of, 100.
 Tufas and eruptive rocks obtained, 139.
 Turdidæ invoiced, 91.
 Turner, H. L., studied photography, 21.
 H. W., collected Nevada reptiles, &c., 93.
 sent Scolopendra, 113.
 L. M., collected Arctic shells, 104.
 Labrador fishes, 97.
 Hayti tray from, 66.
 Labrador Arachnidæ from, 26.
 Madeira ethnologica from, 66.
 on Alaskan birds, 172.
 sent Labrador batrachians, 93.
 skulls and antlers, 101.
 Tursiops tursio at Cape May, 172.
 Turtles from Alabama, 93.
 shown by casts, 37.
 Tuttle, L. R., sent bags of Thyridopteryx, 113.
 Twining, J. S., sent pipe, 71.
 Tylor, Prof. E. B., exchange with, 63.
 Tylosurus caribbaeus, 97.
 Tyntlastes from Gulf of Mexico, 97.
 U.
 Uchimura, Mr., Japanese shells from, 46, 103.
 Unalaska ethnologica, 64.
 Ungulata mounted, 31.
 Unionidæ sent to New Orleans Exposition, 104.
 United States at the Fisheries Exhibition, 174.
 United States Fish Commission—
 birds collected by, 85.
 brought West Indian insects, 113.
 carp introduced by, 96.
 collected corals, 119.
 fishes, 96.
 invertebrates, 117.
 collections, 4, 98.
 Cozumel mammals from, 79.
 documents deposited, 15.
 Echini reported on, 161.
 experiments in pond culture, 96.
 explorations, 123.
 fishes, 44.
 collected for, 97.
 obtained by, 95.
 insects from, 47.
 invertebrates distributed, 126.
 obtained Cozumel birds, 89.
 dolphins, 81.
 Penæidæ, 170.
 placed salmon in Potomac, 96.

United States Fish Commission—Continued.
 reptiles from, 93.
 status of, 156.
 summer explorations, 121.
 United States fisheries discussed, 156.
 report on, 10.
 Geological Survey collected rocks, 139.
 collections, 4.
 fossils identified, 105.
 publications, 15.
 Life-Saving Service, fishes from, 97.
 National Museum, fishes collected for, 97.
 objects of, 156.
 Signal Bureau, fishes from, 97.
 terrestrial mammals from, 79.
 University of Cincinnati, European minerals from, 137.
 Upham, E. P., assistant, 8.
 Uria arctica skeleton obtained, 102.
 Ursus americanus var. cinnamomeus, 31.
 Utah, Indian utensils from, 65.
 Utica slate, fossils from, 130.
 V.
 Van Cleeef, J. S., paper by, 23.
 Van Vleck, B. H., sent corals, &c., 118.
 Vaughan, E. H., sent mound objects, 72.
 Vegetable fibers received, 59.
 Vermes from Alaska, new species of, 160.
 Verrill, Prof. A. E., duplicate invertebrates examined by, 126.
 investigations of, 106.
 mollusk paper by, 106.
 mollusks sent to, 123.
 on New England mollusca, 173.
 the marine fauna of New England, 172.
 returned marine invertebrates, 117.
 sent invertebrates, 48.
 studies of, 122.
 Vessels illustrated, development of, 36.
 Vickers, J. B., sent stone implements, 74.
 Vireolanus viridocoronatus obtained, 85.
 Visitors increased by inauguration, 26, 27.
 number of, 20, 21.
 Volcanic dust and sand in Nebraska, 160.
 note on, 160.
 Vulture, remarks on Californian, 162.
 W.
 Walcott, C. D., collected fossils, 130.
 honorary curator, 9, 49, 129.
 lecture by, 21.
 on Cambrian faunas, 173.
 Paleozoic invertebrate fossils, 173.
 Pteropoda, 173.

 recommendations of, 132.
 report of, 129.
 researches of, 132.
 writings of, 18.
 Wallace, John, exhibits of, 32.
 Wallingford Nat. Hist. Society received invertebrates, 125, 109.
 Walshia amorphella from Ioko weed, 26.
 Warbler, new Yucatan, 161.
 obtained, Brewster's, 85.
 Ward, Prof. H. A., exhibit of, 32.
 mammals exchanged with, 84.
 Lester F., honorary curator, 9, 50, 135.
 on flora of Washington, 173.
 department of fossil plants, 173.
 lecture committee, 22.
 papers by, 24, 25.
 presented plants, 50.
 report of, 135.
 studied fossil plants, 51.
 suggestions of, 50.
 Waring, F. H., sent ores, 146.

- Warner, Mrs. E. S., shells, &c., named for, 110.
 Warren, Dr. B. H., sent Florida fishes, 97.
 & Stearns sent dolphin, 42.
 Washington relics, 39.
 Watchmen report hourly, 28.
 Waterbuck obtained, 32.
 Watkins, J. E., honorary curator, 7, 8, 40.
 Watson, Dr. J. A., sent hadropterus, 98.
 Wavellite, quartz and arkansite obtained, 137.
 Weapons exhibited, 40.
 Webster, F. S., birds exchanged with, 86.
 exhibit of, 32.
 Welling, Dr. James C., lecture by, 21.
 West, A. H., sent sketch of cetacean, 83.
 Africa, implements from, 67.
 Indian birds lent for study, 87.
 seal, paper on, 83.
 Indies, insects from, 47, 113.
 mammals from, 79.
 Virginia antiquities, 72.
 Wetherby, Prof. A. G., shells from, 104.
 named for, 110.
 Whale, Atlantic right, 42.
 parasites received, 118.
 pygmy sperm, 42.
 skeletons suspended, 99.
 stranded, finback, 42.
 Whales and porpoises of North America, 157.
 White, Dr. Charles A., address by, 23.
 honorary curator, 9, 49, 133.
 on geological history of
 America, 173.
 meso-cenozoic fossils, 173.
 paper by, 24.
 report of, 133.
 writings of, 18.
 Whitefish, lake, 156.
 reared in ponds, 95.
 Whitefishes, notes on lesser, 159.
 Whitney cotton-gin model, 59.
 Eli, presented cotton-gin, 59.
 Wigglesworth, J. C., sent hermaphrodite shad, 96.
 Wilcox, Dr. C. M., sent insects, 113.
 Wilder, B. G., papers by, 25.
 Wilkes exploring expedition collections, 4.
 fishes, 96.
 Willcox, Joseph, antiquities from, 72, 73.
 Williams, Dr. J. W. R., sent ceremonial weapon, 73.
 Wilson, Col. F. W., presented ores, 146.
 Winterhalter, Lieutenant, 34.
 instructed in photog-
 raphy, 21.
 Wolf and fox scalps distinguished, 82.
 Wools, collection of, 38.
 from Mr. Bond, 59.
 received, 59.
 Worms of United States, 161.
 Worthen, Charles K., birds exchanged with, 86.
 sent rare birds, 85.
 Wortman, J. L., papers by, 24.
 Wright, K. R., papers by, 25.

 X.
 Xyrichthys, new species of, 96.

 Y.
 Yarrow, Dr. H. C., collected fossils, 131.
 honorary curator, 8, 44, 93.
 (on department of reptiles, 1883
 173.
 report of, 93.
 Yeates, C. M., sent mineral, 137.
 W. S., assistant, 9, 51.
 on accessions to minerals, 1883, 173.
 Yolk-blastopore, position of, 170.
 Young, C. A., paper by, 22.
 Yuma Indian ethnologica, 65.

 Z.
 Zacatecas ores obtained, 146.
 Zahn, Henry, sent volcanic dust, 160.
 Zeledon, J. C., Costa Rica antiquities from, 41, 77,
 78.
 on Costa Rican birds, 173.
 sent Costa Rica birds, 85.
 jaguar skin, 79.
 Zenaidura macroura eggs given away, 87.
 Ziervogel process of treating copper ores, illus-
 trations of, 143.
 Zinc ores from New Jersey, 146.
 Zoo-geography, principles of, 156.
 Zoology, division of, 8, 41.
 Zuffi ethnologica received, 64, 65.
 idols, &c., exhibited, 35.
 Zygospira recurvirostra obtained, 131.

MR. CATLIN PAINTING A MANDAN CHIEF IN 1832.

THE GEORGE CATLIN^c INDIAN^c GALLERY.

BY THOMAS DONALDSON.

INTRODUCTORY.

The collection described herein is the original Catlin Indian Gallery, and is now in the National Museum, Smithsonian Institution, Washington, D. C.

With it is also the existing portion of Indian costumes, implements of war and the chase, and the several other objects which formed a portion of the Catlin Indian Museum connected with the original gallery. It is fully described in Mr. Catlin's catalogues, from 1837 to 1845. In 1848 he published a catalogue with a changed title, and which contained additional pictures painted while he was in Europe, from sketches made in the United States. Mr. Catlin's catalogues from 1838 to 1845 had the title-page given in full on a subsequent page.

The names of Indian tribes as now known to the law and the Bureau of Indian Affairs are inserted; also full and copious descriptive text after each title and name or number from Mr. Catlin's works. At the end of each title is inserted a sketch of tribal or other history, with a note showing the present location and numbers of the tribes of Indians mentioned. Maps and illustrations are also inserted.

The data given as to other collections of Indian paintings and photographs, once or now the property of the nation, it is hoped will be useful for reference.

Some statistical matter is also given showing the several methods of dealing with the Indians by the nation, or, more plainly, the Indian policy, through the past hundred years, together with the location of tribes at periods, illustrated with maps, and the present numbers and location of all tribes and reservations to October 5, 1885. A sketch of the Canadian Indian service is also appended, through the courtesy of Lieut. Col. J. T. Gilkison.

The memoir of Mr. Catlin required a great deal of time and labor in its preparation. Surely no man who has done so much ever left so little personal data behind him; he seemed to have entirely sunk self in his work. He was careless as to this, and never in any of his publications or correspondence even gives the date of his birth, which was most difficult to ascertain. Several persons who knew Mr. Catlin, promised me-

moirs, recollections, or impressions; but only two of those who promised kept their word. One lady wrote promptly, offering matter of interest; she, as most ladies usually do, kept her promise, and supplied for many portions of the work information without which it would have been incomplete. She requested that her name be not mentioned, but no agreement was made as to the fact of her work, which is in this manner most gratefully acknowledged.

At the instance of Prof. Spencer F. Baird, I undertook and have executed this work. To him and to Francis P. Catlin, a brother of George Catlin, and others, I am under obligations for many courtesies and attentions.

HISTORY OF THE GALLERY—1829 TO 1885.

George Catlin began the work of creating a gallery of paintings of North American Indians in 1829-'30—completed in 1838.

In the introduction to his catalogues from 1837 to 1848 (see also herein) he gives an account of its origin.

The gallery and collection of objects known as "Catlin's Indian Museum" which was attached to it, is fully described, with plates, in Catlin's "North American Indians," 2 vols., London, 1842-'48 (eleven editions.) After 1848 it became known as "Catlin's Indian Collection"—many more pictures having been added to it. In this work, the American catalogue of 1837-'38 (and the English ones up and to 1848) is used. This catalogue is also printed in Catlin's "Notes of Eight Years' Travels and Residence in Europe with his North American Indian Collection," volume I, pages 248 to 507.

The London catalogue of 1840, reprinted from the American of 1837-'38, was published in London in 1839 to 1843 and printed by C. & J. Adlard, Bartholomew Close. It contains 310 numbers of Indian portraits; from Nos. 311 to 403 are landscapes; from Nos. 404 to 426, sporting scenes; and from Nos. 427 to 503, amusements and customs, and from Nos. 504 to 507 (4 numbers), the Mandan religious ceremonies, in all 507 numbers. The original Catlin gallery, as exhibited in the United States in 1838-'39, Mr. Catlin took to London in 1839-'40 and exhibited three years at Egyptian Hall, Piccadilly. Mr. Catlin had with him in Europe a series of sketches which he worked into pictures and added to his gallery, making it a Collection, as he termed it. His gallery which he took to Paris in 1845 was the original one. He worked industriously while in Paris and added to his gallery, until, when he reached London in 1848, it contained (as shown by the catalogue of "Catlin's Indian Collections, London, 6 Waterloo Place, 1848," 99 pp.), in addition, Nos. 508 to 516, portraits of nine Ojibways (Chippewas), who visited London, 1845, Nos. 517 to 530, fourteen Ioways, who visited London and Paris in 1845 and 1846, and Nos. 531 to 542, the twelve Ojibways, who visited London, Paris, and Brussels in 1845 and 1846, and also Nos. 543 to 555, pictures worked up from his sketches. These will be found in Catlin's "Notes of Travel in Europe," pages 293 to 295.

Mr. Catlin's catalogue, after his return to London in 1848, when he reopened his gallery at No. 6 Waterloo Place, contains all the above with the addition of Nos. 556 to 607, scenes of Indian life, painted in Paris and London from his sketches in the years from 1839 to 1848. They were no part of his original gallery.

In 1848 he added to his gallery a series of full-length lay figures, Nos. 608 to 625, inclusive. These were dressed in costumes which Mr. Catlin had brought from the Indian country, and which formed a portion of the objects of his museum and gallery.

The heads were modeled from the Ojibways and Ioways who visited Europe in 1845 and 1846. The lay figures and dresses were destroyed in part by fire and water in Philadelphia, as will be hereafter noted.

Mr. Catlin, in his catalogue of 1848, explains on page 51 that the full-length costumed figures and certain paintings were not in his original gallery, these figures, Nos. 608 to 625, and the portraits and other paintings from No. 507 to 607 in the catalogue, having been added to the collection since it was in Egyptian Hall in 1839 to 1844.

The gallery now described was exhibited by Mr. Catlin in New York, Philadelphia, Washington, Boston, and other cities in the years from 1837 to 1839; it was taken by Mr. Catlin to London in 1839; it was opened for view by the public February 1, 1840, in Egyptian Hall; it remained in London, and for some time in the provinces, until 1844; thence it was taken to France; it was exhibited first in Paris, at the Salle Valentino, and afterwards temporarily in the Louvre, at the request of the King. In 1848 Mr. Catlin and his collection were turned out of Paris by the revolution and went back to England. There he reopened his gallery at No. 6 Waterloo Place, London, for two years, or until 1852. In 1852, in London, Mr. Catlin was induced to enter into speculations which resulted in total financial disaster. His collection was seized to satisfy claims growing out of these speculations. Mr. Joseph Harrison, jr., of Philadelphia, a most liberal and patriotic American, being at the time in London, made liberal advances to Mr. Catlin to meet his liabilities, and as security took charge of the collection; it was shipped to Philadelphia in 1852-'53, where it was stored until the summer of 1879. In January, 1879, the attention of the writer was called to the fact of the "original" Catlin collection being in Philadelphia, the property of the Harrison estate, by John McIlvain, esq., of Baring street, Philadelphia. (This eminent taxidermist and Indian collector died in April, 1885.) Application was at once made by Mr. Donaldson for its transfer to the Smithsonian Institution to James L. Claghorn, esq. (since deceased), and to Henry Harrison, esq., also since deceased, a brother of Joseph Harrison, jr., executors of the Harrison estate. They mentioned that the collection was in a dilapidated condition, having been through two fires since its arrival in Philadelphia from Europe, and that it was stored in several places in the city. They promised their good offices with Mrs. Joseph Harrison, jr., and

thought the National Museum was the proper place for its deposit, the city of Philadelphia having declined it. May 15, 1879, Mr. Thaddeus Norris, on behalf of Mrs. Harrison, advised Prof. S. F. Baird of the gift to the nation. On the 19th of May, 1879, the collection was taken possession of by Mr. Donaldson and removed to the Smithsonian Institution. A large number of fur-robcs, dresses, and costumes were badly injured by moths, fire, and water; these were buried in the yard of the Harrison Boiler Works, Philadelphia, where the picture collection was found stored. Some four boxes of war clubs, iron and bone instruments were saved and are now in the National Museum. September 3, 1881, a second lot of the Catlin collection was discovered in a building belonging to the Harrison estate on Merrick street, Philadelphia (near Fifteenth and Market). This was found to consist of the large Crow lodge, or wigwam, described on page 50 of the catalogue (see picture No. 491 herein), poles, &c., and a great variety of clothing, masks, some pipes, old moccasins, &c., which were fastened to the original screens as placed by Mr. Catlin. Fire and water had much damaged these. With this lot was also found Mr. Catlin's sketch-book, some of his original notes of travel among the Indians, his palette, and a portion of his correspondence with his family and friends, and also the remnants of the lay figure collection. Six large cases held them, and they were forwarded to Washington. These lay figures are described in the text of the Catlin catalogue of 1848, and numbered 608 to 625, and following.

Mr. Catlin first offered his gallery to the Smithsonian Institution in 1846; 35 years afterwards it found a permanent lodgment in the same Institution after vicissitudes and misfortune hardly equaled.

The Catlin Cartoon Collection, as given in the catalogue of Mr. Catlin, dated New York, 1871, and now the property of the heirs of Mr. Catlin, consists of copies of some of the original Catlin Gallery and Collection, and the addition of a large number of North and South American Indian portraits and scenes, painted between the years 1848 and 1870, the North American section consisting of 420 numbers, the Voyage of Discovery by La Salle, of 27 numbers, or from 421 to 447, and the South American portraits, being from Nos. 448 to 603, or 155 pictures; in all, a total of 603 pictures and portraits. The major portion of the Cartoon Collection was prepared by Mr. Catlin in Brussels, Belgium, after 1852. It was brought to New York by him and exhibited in October, 1871. Later in 1871 he brought it to Washington where it was hung in the Smithsonian Institution, from 1872 to 1875. It attracted much attention, and efforts were made to have Congress purchase it, but without success. This Cartoon Collection contains no implements or objects for illustration, having no museum attached. As before noted, it is now the property and in charge of the heirs of Mr. Catlin, *i. e.*, his three daughters. A portion of it is stored in the Smithsonian Institution, and another portion is now hanging in the Museum of Natural History, Central Park, New York, all forming a most valuable and interesting series.

CATLIN'S INDIAN GALLERY AT EGYPTIAN HALL, LONDON, 1845. AN IOWAY INDIAN SPEAKING. MR. CATLIN AND THE INTERPRETER ON THE PLATFORM.

CATLIN'S INDIAN GALLERY AS EXHIBITED FROM 1837 TO 1848.

Some sixty pictures of this gallery have, however, been reproduced, generally from Mr. Catlin's sketches. The collection now in the National Museum, and herein described, is the original Catlin Indian Gallery and Museum.

THE SEVERAL CATALOGUES OF THE GALLERY AND COLLECTION.

Mr. Catlin's first American catalogue was printed in New York in 1837. The title-page was as follows :

Catalogue of Catlin's Indian Gallery of portraits, landscapes, manners and customs, costumes, &c., &c., collected during seven years' travel amongst thirty-eight different tribes, speaking different languages.—New York.—Piercy & Reed, Printers, 7 Theatre Alley.—1837.

This contained 36 pages and 494 numbers of pictures.

The Indian curiosities run from number 495 to 500, inclusive.

In 1838, after his return from Florida, he issued another catalogue with about the same title-page, containing 40 pages and numbers of 496 pictures.

The English catalogue of 1840 is the one used in this volume. It was reprinted many times in French as well, before 1848, when Mr. Catlin issued a new catalogue, the introduction of which is given herein on page 11.

The title-page of the 1840 catalogue was as follows :

A descriptive catalogue of Catlin's Indian Gallery, containing portraits, landscapes, costumes, &c., and representations of the manners and customs of the North American Indians.—Collected and printed entirely by Mr. Catlin, during seven years' travel amongst forty-eight tribes, mostly speaking different languages.—Egyptian Hall: Piccadilly, London.—Admittance, one shilling.—1840.

Mr. Catlin returned to London in 1848 and reopening his gallery at Waterloo Place, called it Catlin's Indian Collection. The title-page of the catalogue of this collection was as follows :

A Descriptive Catalogue of Catlin's Indian Collection, containing portraits, landscapes, costumes, &c., and representations of the manners and customs of the North American Indians.—Collected and painted entirely by Mr. Catlin, during eight years' travel amongst forty-eight tribes, mostly speaking different languages.—Also opinions of the press in England, France, and the United States.—London.—Published by the author, at his Indian Collection, No. 6, Waterloo Place.—1848.

This catalogue contained 607 numbers of pictures, and a catalogue of 18 numbers of lay figures, from 608 to 625.

The next catalogue issued by Mr. Catlin was the "Cartoon Catalogue," New York, 1871.

Upon Mr. Catlin's return to America in 1871, and opening his collections for exhibition at 14 Broadway, New York, he issued a new catalogue, as follows :

North and South American Indians.—Catalogue, descriptive and instructive, of Catlin's Indian Cartoons.—Portraits, types, and customs.—Six hundred paintings in oil, with 20,000 full length figures, illustrating their various games, religious ceremonies, and other customs, and 27 canvas paintings of La Salle's Discoveries.—Baker & Goodwin, Printers, Printing House Square.—1871.

This contained 99 pages, and 420 numbers of North American Indian pictures (cartoons), 27 of La Salle's discovery, and 156 South American views.

The "Bibliography of George Catlin," herein, will give in full the titles and dates of his catalogues and several works.

VIEWS OF THE INDIAN GALLERY AND MUSEUM.

Two views of Catlin's Indian Gallery and Museum are given. The first the gallery as it was in Egyptian Hall, London, in 1845, with an Iowa chief (whom Mr. Catlin had met in the western portion of the United States some years before and painted him—see pages 2 to 20, vol. 2, Catlin's Notes in Europe) speaking, Mr. Catlin also on the platform. This plate is from a sketch by Mr. Catlin.

The second view of the gallery is also by Mr. Catlin, and represents it as it originally appeared in the United States and in Europe up and to 1848. This sketch is of the gallery as it was set up in the Salle de France, Louvre, Paris, at the request of the king of France, Louis Philippe, in June, 1846 (see pages 290, 291, and 292, vol. 2, Catlin's Notes in Europe). The Crow lodge on the right is shown in picture No. 491 of this catalogue, and the lodge is now in the National Museum.

CERTIFICATES AS TO AUTHENTICITY OF HIS PAINTINGS AND OBJECTS.

Mr. Catlin was a very careful man in the matter of the authentication of his Indian portraits, landscapes, and scenes. He not only proved his portraits by the very dresses and objects seen in them, but added to these certificates from Indian agents, officers of the Army who were with him, and Indian traders, and the Fur Company's agents or interpreters.

Mr. Catlin says:

In addition to the above certificates (*general ones*), nearly every portrait has inseparably attached to its back an *individual* certificate, signed by Indian agents, officers of the Army, or other persons, who were present when the picture was painted. The form of these certificates is as follows:

No. 131.—BLACKFOOT, PE-TOH-PE-KISS (THE EAGLE-RIBS).

I hereby certify that this portrait was painted from the life, at Fort Union, mouth of Yellowstone, in the year 1832, by George Catlin, and that the Indian sat in the costume in which it is painted.

JOHN F. A. SANFORD,
United States Indian Agent.

Three *fac-similes* of certificates of portraits are here given:

In some cases Mr. Catlin obtained certificates for the objects in his museum; one such is also herein given in *fac-simile*.

No. 189 Ojibbeway.

Ka = bes = kunk.

he who travels the whole country

I hereby certify that this Portrait was painted from the life, at Fort Union Mouth of Yellow Stone.

in the year 1832, by GEO. CATLIN, and that the Indian sat in the costume in which it is painted.

K. M. Kunzu

Chippeway.

Gaw = zaw = quæ = dung.

He who halloos.

I hereby certify that this portrait was painted from life by Geo. Catlin, in my presence at the Sault De St. Marys, in the year 1806. and that the Indian sat in the costume in which it is painted.

FACSIMILE OF A CERTIFICATE TO A SCALP.

INDIAN NOMENCLATURE.

The changes from time to time in the names of the several Indian tribes are confusing. In the Report on Indian Affairs, to the Secretary of War, by the Rev. Jedidiah Morse, D. D., of New Haven, June, 1822, with maps of location of Indian tribes, and in "The Book of the Indians of North America," by Samuel G. Drake, 1832, can be found lists and tables of the principal tribes; also in some official Government reports, colonial and State, after 1620.

Mr. Schoolcraft and Mr. Catlin followed as closely as was possible the authorities. Mr. Catlin corrected many of the names, phonetically of course, as the Western Indians then had no written language. The Office of Indian Affairs at Washington in its annual reports gives a list of tribes with the names corrected and approved, by Maj. J. W. Powell, chief of the Bureau of Ethnology, and also names in the laws of the United States making annual appropriations for the Indian service.

Under the several tribal heads the name used by Mr. Catlin will be given, as well as the one used by the Office of Indian Affairs and the laws of the United States.

The sketch of tribal history, following and at the end of each title, is by William H. Jackson, of Prof. F. V. Hayden's Survey, and is published in Miscellaneous Publications, No. 9, of the United States Geological Survey of the Territories, 1877. It was carefully prepared by him and is believed to be fairly accurate.

Maj. J. W. Powell, in discussing Indian nomenclature, says:

"In the advent of the white man in America a great number of tribes were found. For a variety of reasons the nomenclature of these tribes became excessively complex. Names were greatly multiplied for each tribe and a single name was often inconsistently applied to different tribes.

"This was due to—

"(1) A great number of languages were spoken, and oftentimes the first names obtained for tribes were not the names used by themselves, but the names by which they were known to some other tribes.

"(2) The governmental organization of the Indians was not understood and the names for gentes, tribes, and confederacies were confounded.

"(3) The advancing occupancy of the country by white men changed the habitat (habitation?) of the Indians, and in their migrations from point to point (in some cases?) their names were changed."—J. W. POWELL, 1880.

INDIVIDUAL INDIAN NAMES.

It is more than probable that some of the Indians in the Catlin collection were drawn or painted by Cooke, Lewis, Neagle, Jarvis, Hardinge, King, Deas, Stanley, or Eastman, under other names. The Indian in the Catlin catalogue numbered 285, a Cherokee called Col-lee or Jol-lee, is most likely the famous Cherokee chief Oolooteka.

Indians frequently have several names, Mr. Catlin says of this:

Nothing is more embarrassing for the traveler through the Indian countries, both of North and South America, than the difficulty of obtaining the real names of Indians, owing chiefly to the singular fact that no Indian in either country will tell his name, but leaves it for occasions or for other Indians to reveal.

The Indians have generally their family names in the idiom of their tribe, and having no Christian names, they often attach to them significations which are wrongly supposed to be their interpretations. A great proportion of Indian names (like Jones, Bailey, Roberts, &c., in English) admit of no translation. In these cases the interpreters give their family names, joining to them the qualifications for which the individuals are celebrated—as, Oon-disch-ta (the salmon-spearer), Oon-disch-ta, (the tiger-killer?), as we would say, Jones (the shoemaker), Jones (the butcher), &c.; and yet another difficulty still more embarrassing, that most Indians of celebrity have a dozen or more names, which they use according to caprice or circumstances.

I recollect that when I was painting the portrait of a Comanche chief I inquired his name, which another chief, sitting by, gave me as *Ish-a-ro-yeh* (he who carries a wolf). I expressed my surprise at his getting such a name, and inquired if he had ever carried a wolf? to which he replied: "Yes, I always carry a wolf," lifting up his *medicine-bag*, made of the skin of a white wolf and lying by the side of him as he was sitting on the ground.

How curious (Indian) names, and how pleasing. Amongst the Mandans, the reputed belles, when I was there, were *Mi-neek-e-sunk-te-ca* (the mink) and *Sha-ko-ka* (mint), daughters of two of the subordinate chiefs; amongst the Riccarrees, *Pshan-shaw* (the sweet-scented grass); amongst the Minatarrees, a few miles above the Mandans, *Seet-see-be-a* (the mid-day sun); * * * amongst the Assinniboines, *Chin-cha-pee* (the fire-bug that creeps); amongst the Shawanos, *Kay-te-qua* (the female eagle); of the Ioways, *Ru-ton-ye-wee-mee* (the strutting pigeon); and among the Puncals, *Hee-la-dee* (the pure fountain), and *Mong-shong-shaw* (the bending willow); among the Pawnee Picts *Shee-de-a* (wild sage), and amongst the Kiowas *Wum-pan-to-me* (the white weasel).—Catlin, "Life Amongst the Indians."

Mr. Catlin in the same work calls attention to the variety and singularity of the names of Indian men, as shown in his catalogue: Such as "The very sweet man," No. 169; and "The grass, bush and blossom," No. 281.

INTRODUCTION TO CATALOGUE,* 1840 TO 1844.

“To the READER:

“I wish to inform the visitors to my Collection that, having some years since become fully convinced of the rapid decline and certain extinction of the numerous tribes of the North American Indians; and seeing also the vast importance and value which a full *pictorial history* of these interesting but dying people might be to future ages—I sat out alone, unaided and unadvised, resolved (if my life should be spared), by the aid of my brush and my pen, to rescue from oblivion so much of their primitive looks and customs as the industry and ardent enthusiasm of one lifetime could accomplish, and set them up in a *Gallery unique and imperishable*, for the use and benefit of future ages.

“I devoted eight years of my life exclusively to the accomplishment of my design, and that with more than expected success.

“I visited with great difficulty, and some hazard to life, forty-eight tribes (residing within the United States, British, and Mexican Territories), containing about half a million of souls. I have seen them in their own villages, have carried my canvas and colours the whole way, and painted my portraits, &c., from the life, as they now stand and are seen in the Gallery.

“The collection contains (besides an immense number of costumes and other manufactures) near six hundred paintings, 350 of which are *Portraits* of distinguished men and women of the different tribes, and 250 *other Paintings*, descriptive of *Indian Countries*, their *Villages*, *Games*, and *Customs*; containing in all above 3000 figures.

“As this immense collection has been gathered, and *every painting has been made from nature*, BY MY OWN HAND—and that too when I have been paddling my canoe, or leading my pack-horse over and through trackless wilds, at the hazard of my life—the world will surely be kind and indulgent enough to receive and estimate them, as they have been intended, as *true and fac-simile traces of individual life and historical facts*, and forgive me for their present unfinished and unstudied condition as works of art.

“GEO. CATLIN.”

*This catalogue is the one issued by Mr. Catlin in London 1840 to 1844, a copy of the one used in America 1837-9, with a few additions. This is also the one used in this volume. It was republished in France by Mr. Catlin in 1844-48. The text of the title page is given above on page 7.

KEE-O-KUK, THE WATCHFUL FOX.
Sac. No. 1, page 13.
(Plate 280, Vol. II, Catlin's Eight Years.)

CATLIN'S INDIAN GALLERY.

INDIAN PORTRAITS.

SACS AND FOXES.

SACS (SÁU-KIES).

[Sac: Laws of United States. Sac and Sauk: Indian Bureau, June, 1885.]

A tribe of Indians residing on the Upper Mississippi and Des Moines Rivers. Present number (in 1840), about 5,000. The small-pox carried off half their population a few years since, and a considerable number were destroyed in the "Black Hawk War" in 1832. This tribe shave the head, leaving only a small tuft of hair on the top, which is called the "scalplock."—G. C., 1835.

1. **Kee-o-kúk** (Keokuk) (the Watchful Fox?), the Running Fox*; present chief of the tribe. Shield on his arm and staff of office (sceptre) in his hand; necklace of grisly bear's claws, over the skin of a white wolf, on his neck.†

(Plate No. 280, page 210, vol. 2, Catlin's Eight Years.)

This man, during the Black Hawk war, kept two-thirds of the warriors of the tribe neutral, and was therefore appointed chief by General Scott, in treaty, with the consent of the nation.—G. C., 1848.

In a former epistle I mentioned the interview which I had with Kee-o-kuk, and the leading men and women of his tribe, when I painted a number of their portraits and amusements as follows:

Kee-o-kuk (the Running Fox, No. 1, above, Watchful Fox) is the present chief of the tribe, a dignified and proud man, with a good share of talent, and vanity enough to force into action all the wit and judgment he possesses in order to command the attention and respect of the world. At the close of the Black Hawk war in 1832, which had been waged with disastrous effects along the frontier, by a Sac chief of that name, *Kee-o-kuk* was acknowledged chief of the Sacs and Foxes by General Scott, who held a treaty with them at Rock Island. His appointment as chief was in consequence of the friendly position he had taken during the war, holding two-thirds of the warriors neutral, which was no doubt the cause of the sudden and successful termination of the war and the means of saving much bloodshed. Black Hawk and his two sons, as well as his principal advisers and warriors, were brought into Saint Louis in chains, and *Kee-o-kuk* appointed chief with the assent of the tribe. In his portrait I

* Mr. Catlin saw "Black Hawk" and his fellow-prisoners, at Jefferson Barracks, Saint Louis, Mo., in the fall of 1832. He met Keokuk and the Sac and Foxes first in 1834 on the Des Moines River, and again in 1836.—T. D.

The *acute accent* is used in the spelling of the Indian names merely to denote the emphasis.—G. C.
† In the Cartoon Collection, page 9, No. 15, given as "A," Keokuk, "the Running Fox," head chief of the tribe, holding his mace (symbol of authority), and his tomahawk ornamented with a scalp.—T. D.

have represented him in the costume precisely in which he was dressed when he stood for it, with his shield on his arm and his staff (insignia of office) in his left hand. There is no Indian chief on the frontier better known at this time, or more highly appreciated for his eloquence as a public speaker, than Kee-o-kuk, as he has repeatedly visited Washington and others of our Atlantic towns, and made his speeches before thousands, when he has been contending for his people's rights, in their stipulations with the United States Government, for the sale of their lands.—G. C., 1836, page 210, vol. 2, Catlin's Eight Years.

Mr. Catlin, in September, 1834, visited Keokuk and the Sacs and Foxes at or near Des Moines. (See "Itinerary for 1834.") After reaching Keokuk's village he thus describes him :

Colonel Kearney gave us a corporal's command of eight men, with horses, &c., for the journey, and we reached the village in two days' travel, about sixty miles up the Des Moines River. The whole country that we passed over was like a garden, wanting only cultivation, being mostly prairie, and we found their village beautifully situated on a large prairie, on the bank of the Des Moines River. They seemed to be well supplied with the necessities of life, and with some of its luxuries. I found Ke-o-kuck to be a chief of fine and portly figure, with a good countenance, and great dignity and grace in his manners.

General Street had some documents from Washington to read to him, which he and his chiefs listened to with great patience; after which he placed before us good brandy and good wine, and invited us to drink and to lodge with him; he then called up five of his *runners* or *criers*, communicated to them in a low, but emphatic tone, the substance of the talk from the agent, and of the letters read to him, and they started at full gallop, one of them proclaiming it through his village, and the others sent express to the other villages, comprising the whole nation. Ke-o-kuck came in with us, with about twenty of his principal men—he brought in all his costly wardrobe, that I might select for his portrait such as suited me best; but at once named (of his own accord) the one that was purely Indian. In that he paraded for several days, and in it I painted him at full length. He is a man of a great deal of pride, and makes truly a splendid appearance on his black horse. He owns the finest horse in the country, and is excessively vain of his appearance when mounted, and arrayed, himself and horse, in all their gear and trappings. He expressed a wish to see himself represented on horseback, and I painted him in that plight. He rode and nettled his prancing steed in front of my door until its sides were in a gore of blood. I succeeded to his satisfaction, and his vanity is increased, no doubt, by seeing himself immortalized in that way. After finishing him, I painted his favorite wife (the favoured one of seven), his favourite boy, and eight or ten of his principal men and women; after which, he and all his men shook hands with me, wishing me well, and leaving, as tokens of regard, the most valued article of his dress, and a beautiful string of wampum, which he took from his wife's neck.

They then departed for their village in good spirits, to prepare for their *fall hunt*.—Geo. Catlin, page 149, vol. ii, Eight Years.

Mr. Catlin saw Keokuk many times during the years from 1834 to 1838, both on the frontier and in Eastern cities. His first visit to him in 1834, as above set out, was memorable from the fact that he saw him in the midst of his people and at their home.

He was evidently much impressed with Keokuk—finding in him his ideal red man. Mr. Catlin does not note whether in his intercourse with him Keokuk spoke English. It is presumed that he did not (although he understood it fairly well), from the fact that he always in public, either in his orations or interviews with official or other persons,

spoke through an interpreter. Antoine Le Claire and Frank Labashure were the two he preferred; neither, however, possessed a sufficient elementary English education to translate Keokuk's ideas or speech with vigor or clearness. He knew this, and frequently while they were translating him (owing to his knowledge of English) he would express his dissent and compel them to correct their false translation. Antoine Le Claire, as hereinafter noted, was made rich by Keokuk and the Sac and Fox. Labashure died young.

Mr. Catlin, while on his last visit to the Sac and Foxes, observed Keokuk very carefully. The Sac and Fox nation was assembled—making a treaty in September, 1836, with Governor Dodge—at Rock Island, where he says that—

He saw the parades and forms of a savage community transferring the rights and immunities of their native soil to the insatiable grasp of pale-faced voracity.

This treaty * * * was for the purchase of a tract of land of 256,000 acres, lying in the Ioway [Iowa] River, and west of the Mississippi, a reserve which was made [or reserved] in the tract of land conveyed to the Government by treaty after the Sac war, and known as the "Black Hawk purchase." After this the Sac and Foxes removed to Kansas.

Mr. Catlin witnessed the signing of the treaty, and writes of it:

The treaty itself, in all its forms, was a scene of interest, and Kee-o-kuk [Keokuk] was the principal speaker on this occasion, being recognized as the head chief of the tribe. He is a very subtle and dignified man, and well fitted to wield the destinies of his nation.

In 1846 Colonel McKinney visited Keokuk on the Kansas River, within the present limits of Kansas, where he and his people were temporarily residing after their removal from the Des Moines River. Writing of Keokuk he says:

The entire absence of records by which the chronology of events might be ascertained renders it impossible to trace, in the order of their date, the steps by which this remarkable man rose to the chief place of his nation, and acquired a commanding and permanent influence over his people.

Keokuk is in all respects a magnificent savage. Bold, enterprising, and impulsive, he is also politic, and possesses an intimate knowledge of human nature, and a tact which enables him to bring the resources of his mind into prompt operation. His talents as a military chief and civil ruler are evident from the discipline which exists among his people.

In Stanley's catalogue (Smithsonian Institution, 1852, No. 53), pages 35, 36, 37, can be found interesting data as to Keokuk.

Mr. Stanley painted a portrait of him in May, 1846. It is No. 52 of his catalogue, but was destroyed in the Smithsonian fire of February, 1865.

In Hayden's Catalogue of Indian Photographs, page 17, can be found the following:

677. *Keokuk* (Watchful Fox). A chief of the Kiscoquah band of Sacs or Sauks, and head chief of the combined Sacs and Foxes.

This picture is copied from a daguerreotype taken in 1847, the year before Keokuk died. It was copied by A. Zeno Shindler in 1868, and is No. 158 of the Catalogue of Photographic Portraits of North American

Indians, in the gallery of the Smithsonian Institution. (No. 216, Smithsonian Miscellaneous Collections, 1867.)

It was brought to Washington by Keokuk's son—No. 6 herein—and loaned to Mr. Shindler to be copied. It is reproduced here.

Capt. J. W. Campbell, of Fort Dodge, Iowa, in March, 1886, gave the following description of the dress of Keokuk in the daguerreotype portrait of 1847:

In regard to Keokuk's decorations and head-dress. * * * The silver medallion of President James Monroe, hanging in front, was presented to him by General Winfield Scott at Rock Island (then Fort Stephenson), for his fidelity to the white man in 1832. His necklace was composed of bear claws fastened to a cape of otter skins; his shirt (the ruffle protruding from the under side of the necklace), was red and blue calico. His head-dress consisted of an Indian belt around the forehead; on top were eagle feathers painted, and attached to the scalp lock was the extreme end of a deer's tail painted with Chinese vermilion.

Captain Campbell continues:

My first recollection of his towering form and Ciceronian eloquence was at my father's trading house at *Puc-e-she-tuck* (now Keokuk), in 1831, and during the many succeeding years he was in Iowa I was often in association with him, and his features are still indelibly impressed upon my memory, and after his demise, in Franklin county, Kansas, I wrote for Mathew Park, of St. Louis, Mo. (marble works), the inscription on his tombstone, a plain marble slab, now owned by the Monumental Association in Keokuk.

General A. C. Dodge, of Iowa, August 9, 1883 (since deceased), said of Keokuk:

I knew him very well. He was naturally of a pacific disposition, though on occasions he could show a full share of personal bravery. He was regarded among the pioneers as a man of brains—the most far-sighted Sac of his time. It was a long cherished idea of Keokuk to unite the Indian tribes in a great confederation, each band having a distinctively defined territory, and all to be kept at peace by arbitration of great councils. Two things stood in the way of this: the unsteadiness of the Indians themselves for such a method of life, and the desire of the whites for the lands east of the Missouri River.

Keokuk was born at Rock River, Ill., in 1780 (A. R. Fulton?). Other authorities say in 1783. His father was half French, but his mother a full-blood Sac. This "picayune of white blood," as he remarked to Capt. William Philps in 1829, accounted for his being a shade lighter in complexion than other Sacs. He was not an hereditary chief, but reached the head of his nation by reason of prowess in battle when young, the gift of oratory, integrity, and tact. He supplanted Black Hawk in 1832-'33, who had far greater fame as a warrior. He died at the Sac and Fox agency in Kansas in April, 1848, aged either 65 or 68 years.

As an orator Keokuk held high rank with the Indians. This was known to the whites, and was one of the reasons for making him principal chief of the Sac and Foxes in 1832-'33. At one time, in 1832, Black Hawk tried to force the entire tribe of Sac and Fox into war with the whites. A majority of them along with Keokuk refused. The messengers for war were importunate, and their words began to have an effect upon Keokuk's braves. Finally they began to put on the war-

paint, and demanded that he lead them to battle. Appearing to be in sympathy with them, he arose in the council and spoke with eloquence and energy :

Braves, I am your chief. It is my duty to rule you as a father at home, and to lead you to war if you are determined to go ; but in this war there is no middle course. The United States is a great power, and unless we conquer that great nation we must perish. I will lead you instantly against the whites on one condition—that is, that we shall first put all our women and children to death, and then resolve that having crossed the Mississippi, we shall never return, but perish among the graves of our fathers rather than yield to the white man.

The argument had its force and the raid was abandoned.

Charles Deas, the artist, saw Keokuk and his band at Fort Crawford in the fall of 1840. H. T. Tuckerman, in his *Artist Life*, thus notes it :

Keokuk, the great chief and orator of the Sacs and Foxes, was at Fort Crawford holding a council with the Winnebagoes. The assemblage and their proceedings were very imposing. The Sacs were endeavoring to “cover the blood” of a young man of the other tribe who had been killed some time previously. They tendered a considerable sum of money, which was at last accepted by the opposite party. The Sacs and Foxes were living in tents allowed them from the fort in an inclosure attached to the palisades—a relative of the deceased object of the conclave, wishing to insult Keokuk, took advantage of the absence of most of the party to crawl up under the shelter of a fence in the rear of his tent where he was seated in state. The costume of the venerable chief was superb—a tiara of panther and raven skins adorning his head. The intruding Winnebago quietly lifted the canvas of the tent, and suddenly tearing this gear from the old man’s person and scattering it over the mats retreated as he came, before the sentry could arrest him. This insult to their leader produced many serio-comic scenes, and gave Deas a fine opportunity to observe the expression of Indian character. Keokuk maintained a dignified silence, but the gloomy light of his eye betokened how keenly he felt the mortification. His enraged spouse was by no means so calm. The imprecations caused an outcry which called out the officer of the day, and it was long before the storm was quelled.

He visited Washington with a delegation of his people in 1837, making a profound impression both in Washington and other cities.

Capt. F. R. West, of Des Moines, Iowa, March 19, 1886, gave to a reporter of the *Iowa State Register* some incidents relating to “Keokuk.”

In the year 1837 I was running a packet boat [canal] on the line between Pittsburgh and Philadelphia, or rather from Pittsburgh to the foot of the mountains on the west side at Johnstown. The canal line only ran this far, the rest of the route being a railroad. This was the only system of travel to the west at that time except by stage coach. Colonel Street*—or he might have been major—of the United States Army, with a retinue of soldiers and a few ladies, came to Pittsburgh in the month of August, I think it was. I only judge that it was August because of the season which was very dry and beautiful. He had with him a band of Indians, chiefs and young men, taking them to Washington. It was a number of Sacs, or Sacs and Foxes, I am not able to say which. There were thirty-nine of them, and certainly there would not have been so many of them if they were from one tribe. The chief, Keokuk [No. 1 and 1A] was among the number, I distinctly recollect. The line of boats consisted of four packets plying back and forth. They were elegant boats constructed for passenger traffic, and as they carried very many fine people from the East the captains

*General Joseph M. Street, of Virginia, born October 18, 1782, agent of the Sac and Fox Indians, died on their reservation, where he is buried (near Des Moines), May 5, 1840. By his side is buried Wapello, a chief of the Sac and Fox, who died March 15, 1842, aged 57.

were particular to keep them clean and nice. The three boats beside my own had each come into Pittsburgh and gone out again, but had refused to take the Indians on the journey East. They all were afraid the Indians would dirty the boats or injure the custom by their presence. The hotel keeper where they stopped in Pittsburgh told the officers that they could get passage when Captain West came, for he never said no to any one. So when I landed in Pittsburgh Colonel Street came on board at once and insisted on my taking the Indians East. I saw the situation they were in, and finally agreed to take them. I gave the officers cabins, of course, but would not agree to make berths for the Indians. Neither did I make any agreement as to the price to be paid. When I got through an officer brought me a blank bill which I filled out for my charges. The Colonel said for me to just double the amount of the bill; it was not enough. I was astonished when I was paid in silver coin.

When I took the Indians on board I was told to put the bedding away as they would not know how to use it, and prepare their table without tablecloth or utensils, except to contain the food. Their greed was great and everything they liked they would eat all of it, the first one that got it. When the table was first set a castor was left. One young Indian in his greed filled his mouth with mustard. He lost no time in climbing right over the table and getting outside in an effort to empty his mouth. But they had a good time. The weather was fine and they sat on deck and played some gambling game all the time, and no one of them ever refused liquor. They would pound upon their little drum and dance and whoop, and the people along the line came out and gazed in astonishment. We dared not stop at places, for the people would get aboard the boat and impede progress.

These Indians were fine looking fellows and were superbly decorated in genuine Indian style. They had feathers in their hair, and their leggings and everything about their costumes were very beautiful. One little black old Indian—he must have been a hundred years old—had a little bell fastened to his leg. He lost this on the boat and could not be made to leave the boat until it was found. We were delayed until all hands had been turned out and hunted high and low until the bell was found. The cars, which they next took, were so strange to them and made so much noise that they could hardly be kept on the train. When I came back to Pittsburgh I found another delegation of officers and Indians waiting, and I took them. These were Foxes, I think. The famous chief Poweshiek was with one of the crowds. Black Hawk and Appanoose were also of the party. I remember Appanoose, because I thought it was such a pretty name the way he himself pronounced it. In three or four weeks the first party came back. They waited at Johnstown for me, and I arrived there in the middle of the day. The Indians all rushed up to me and were glad to see me. Each one of them presented me with his picture, a small photographic likeness they had gotten. They showed their medals with which they had been presented, large silver medals with the profile of President Van Buren.

I remember Chief Keokuk. He was a large man, above the average, and a fine looking Indian. Going up through the mountains on the Conemaugh River we came to a narrow gorge where the channel was very narrow and the mountains rose on either side to an immense height. It was in the evening and the rays of the setting sun upon the mountain tops made a scene of rare beauty. Before this grandeur and awe-inspiring scene the chief Keokuk came upon the deck and gathered his followers around him. They had evidently never before seen such a sight, and they were hushed to silence as the great Indian spoke of the mountains. He performed some sort of religious ceremony, impressive and grand. It seemed to me as though he was praying. I have often thought of that wonderful man standing up in the midst of his men, and the way they sprung up around him and listened. I never before particularly admired an Indian, but when I saw that man's gestures and heard his wonderful voice, I was filled with admiration. I could tell by his gestures and his looks that there was an eloquence about it that I never expected from these wildmen.

Keokuk's love of humor was intense. While he resided in his village, near the present town of Ottumwa, on Sugar Creek, in 1838, he received a letter from Joseph Smith, the Mormon prophet, inviting the king of the Sacs and Foxes to attend a regal council to be held in his palace at Nauvoo, Ill. Keokuk accepted, and with a mounted escort of Indians, went to Nauvoo. They were received in the Temple, where the prophet made an address referring to the children of Israel and the lost tribes. He tried to convince Keokuk that the Indians were the lost tribes, and that this had been revealed to him, and that they must come into his fold. Keokuk answered—

If my brother is ordered by the Great Spirit to collect our lost tribes together and lead them into a land flowing with milk and honey, it is his duty to do so. But I wish to ask about some particulars that my brother has omitted. They are of great importance to my people. The red men are not much used to milk. They prefer streams of water, and in the country where they live there is a good supply of honey. The points we wish to inquire about are whether the new government will pay large annuities and whether there will be plenty of whisky?

The conference abruptly ended.

Keokuk had an Anglo-Saxon force of expression in coining words. One day in the fall of 1830 he was at the trading post at Iowaville, Iowa. A man named Adams had been employed by Mr. Jordan, the trader. Keokuk could not pronounce the name, Adams. He tried several times, but failed. Just then Adams, who had been chopping wood, removed his hat to wipe the perspiration from his head. His head was entirely bald. Keokuk's face lit up and he exclaimed "mus-ke-tack!" meaning "prairie-head," or a place with nothing upon it, or no growth. Adams was ever afterwards known by this name.

Keokuk was always the friend of the whites and they were his friends.

In 1832 five of Keokuk's men killed a settler named Martin, in Warren County, Illinois. Demand was made for the murderers. One of them was a nephew of Keokuk; the other four escaped. Keokuk called his men together and told them of the consequences to follow; that unless these men were forthcoming war would follow. Four of his young men rose up and volunteered to stand for the four guilty ones. They were delivered up to the whites. At the trial Keokuk was a witness. He told the court that the four young men were innocent and that the guilty men had escaped, but that the four were ready to be hanged for the real murderers, in the interest of peace. Of course they were acquitted and discharged at once.

Keokuk's consummate tact with men and his ingenuity were well displayed in his famous mourning scene for President Harrison. John Chambers, of Kentucky, a close friend of General Harrison, was appointed by him governor of Iowa to succeed Governor Lucas. The governor of a Territory at that time was also superintendent of Indian affairs for the Territory. There was great rivalry in the Sac and Fox at this time as to who should have favor with the new governor. Hard Fish, a leading chief, was Keokuk's rival. He and his band hurried to

Burlington to receive the governor. He refused to see them, but promised to visit them in their own country in a few days. Hard Fish returned much dejected. In the course of a few weeks Governor Chambers arrived at the agency on the Des Moines. Hard Fish and his band passed before the agency house with shouts and yells. Gaily dressed, they rode before his quarters and made it a festive day. The governor then received them.

Keokuk knew of the friendship between Governor Chambers and President Harrison, and also knew of President Harrison's death, so that when he was notified of the governor's readiness to receive him and his band, with tact worthy of a white man, he decked his tribe in mourning, and to the sound of the funeral drum called upon the governor. Hard Fish, his band, and the whites about the agency were astounded. They knew of no death in the tribe. Keokuk was presented to Governor Chambers (who had been an aide-de-camp on the staff of General Harrison in the war of 1812) and made him the following speech before proceeding to business and in explanation of the solemnities:

Father: We were told not long ago that our great father at Washington was dead. We had heard of him as a great war chief, who has passed much of his life among the red men, and knew their wants, and we believed we would always have friendship and justice at his hands. His death has made us very sad, and as this is our first opportunity, we thought it would be wrong if we did not use it to show that the hearts of his red children, as well as his white children, know how to mourn over their great loss, and we had to keep our father waiting while we performed that part of our mourning that we must always attend to before we leave our lodges with our dead.

Governor Chambers then shook hands with him and was much impressed with the ceremony. Keokuk, by his ingenuity, had won his heart, and held first place in the heart of the governor. Hard Fish and his band retired entirely disappointed.

In 1837 Keokuk was described as stout in person, being five feet ten inches in height and weighing 200 pounds, graceful, and commanding, with fine features and an intelligent countenance. He had great shrewdness and tact, and was especially noted for his physical power. "McKenny & Hall," vol. 2, p. 80, says of him:

Keokuk is a large and finely formed man. His manners are dignified, and his elocution, as well in conversation as in public speaking, highly energetic and animated. His flow of language and rapidity of utterance are remarkable. Yet his enunciation is so clear and distinct, that it is said not a syllable is lost. His voice is powerful and agreeable, and his countenance prepossessing. It is not often that so fine a looking man is found as this forest chieftain, or one whose deportment is so uniformly correct.

He excelled in horseback riding and also in dancing. As an orator, while speaking, his gestures were graceful, his language smooth and rapid, his wit keen, and his insight into motives prophetic. He was a born leader.

KEOKUK.
(From a daguerreotype, 1847.)

KEOKUK ON HORSEBACK.

No. 1A, page 21.

(Plate 290, Vol. II, Catlin's Eight Years.)

In early life his bravery and courage in battle placed him in the front rank of warriors.

He had an inordinate love for money, probably from associating so much with whites and seeing the value of money in daily affairs.

A very full account of his personal peculiarities may be found in The "Red Men of Iowa," pages 246, 247.

For a portrait and many interesting details of Keokuk's life, and of the Sac and Fox Indians, see "McKenny & Hall," vol. 2, pages 63 to 80; see also title "Black Hawk," pages 29 to 48, same volume.

As before stated, Keokuk died on the Sac and Fox Reservation, in now Franklin County, Kansas, to which he and his people removed in 1845. He died in April, 1848. The Saint Louis newspapers of the period stated that he died from poison administered by one of his people, who was punished for it. He was buried on the reservation near the present village of Pomona, Greenwood Township, Franklin County, Kansas.

At that time Major Fuller was the agent in charge of the reservation. Keokuk was buried in the earth, his body lying east and west, his head to the east. Over him was placed a white marble slab inscribed: "Sacred to the memory of Keokuk, a distinguished Sac chief, born at Rock Island in 1783, died April, 1848."

July 4, 1883, the city of Keokuk, Iowa, gave a celebration, at which Chief Moses Keokuk (see No. 6 of this catalogue), son of Keokuk, was present as the guest of the city. The patriotic citizens of Keokuk—named after the great chief—held a meeting, and determined to remove the body of Keokuk from Kansas to that city. A committee was appointed, application made to the Secretary of the Interior, Hon. H. M. Teller, for authority to enter upon the reservation, which was promptly granted, and two citizens of Keokuk, Judge F. C. Davis and Dr. J. M. Shaffer, proceeded to Kansas, and exhumed the remains on the 19th of October, 1883, cofined them, and returned with them to Keokuk, also bringing with them the slab from the grave.

The remains are now in charge of the city authorities waiting interment.

The Keokuk Monument Fund Association, in charge of the erection of the monument to Keokuk, have located it in Rand Park, north of that city, on a high bluff overlooking the Mississippi River. It may be seen from the three States of Iowa, Illinois, and Missouri. It is now being erected.

A bust of Keokuk in bronze stands in the Marble room of the United States Senate, in the Capitol at Washington.

(1 A).—**Keokuk on horseback.*** (See plate 290, page 210, vol. 2, Catlin's Eight Years.) This picture was not in the original Catlin Gallery.

Mr. Catlin gives the following description of Keokuk on horseback:

PLATE 290, *Kee-o-kuk* on horseback.—After I had painted the portrait (at Camp Des Moines, now Montana, Iowa) at full length, and which I have already introduced,

* The original sketch from which this picture was painted is now owned by a gentleman in Philadelphia

he had the vanity to say to me that he made a fine appearance on horseback, and that he wished me to paint him thus. So I prepared my canvas in the door of the hospital which I occupied, in the dragoon cantonment; and he flourished about for a considerable part of the day in front of me, until the picture was completed. The horse that he rode was the best animal on the frontier; a fine blooded horse, for which he gave the price of \$300, a thing that he was quite able to * * *. He made a great display on this day, and hundreds of the dragoons and officers were about him, and looking on during the operation. His horse was beautifully caparisoned, and his scalps were carried attached to the bridle-bits.—G. C., 1834-'36.

[About two years after the above was written (*i. e.*, 1837), and the portrait painted, and whilst I was giving lectures on the customs of the Indians, in the Stuyvesant Institute, in New York, Kee-o-kuk and his wife and son, with twenty more of the chiefs and warriors of his tribe, visited the city of New York on their way to Washington City, and were present one evening at my lecture, amidst an audience of 1,500 persons. During the lecture I placed a succession of portraits on my easel before the audience, and they were successively recognized by the Indians as they were shown; and at last I placed this portrait of Kee-o-kuk before them, when they all sprung up and hailed it with a piercing yell. After the noise had subsided Kee-o-kuk arose and addressed the audience in these words: "My friends, I hope you will pardon my men for making so much noise, as they were very much excited by seeing me on my favorite war-horse, which they all recognized in a moment."

I had the satisfaction then of saying to the audience that this was very gratifying to me, inasmuch as many persons had questioned the correctness of the picture of the horse; and some had said in my exhibition room, "that it was an imposition—that no Indian on the frontier rode so good a horse." This was explained to Kee-o-kuk by the interpreter, when he arose again quite indignant at the thought that any one should doubt its correctness, and assured the audience "that his men, a number of whom never had heard that the picture was painted, knew the horse the moment it was presented; and, further, he wished to know why Kee-o-kuk could not ride as good a horse as any white man?" He here received a round of applause, and the interpreter, Mr. Le Claire, rose and stated to the audience that he recognized the horse the moment it was shown, and that it was a faithful portrait of the horse that he sold to Kee-o-kuk for \$300, and that it was the finest horse on the frontier, belonging to either red or white man.—G. C.] 1838.

2. *Múk-a-tah-mish-o-káh-kaik* (Ma-ka-tai-me-she-kia-kiah), the Black Hawk;* in his war dress and paint. Strings of wampum in his ears and on his neck, and his *medicine-bag* (the skin of the black hawk) on his arm.

(Plate 283, page 211, vol. 2, Catlin's Eight Years.)

This is the man famed as the conductor of the Black Hawk war. Painted at the close of the war, while he was a prisoner at Jefferson Barracks, in 1832.

Painted by Mr. Catlin at Jefferson Barracks, near Saint Louis, Mo., where Black Hawk and others of his band were prisoners of war, in

* Black Hawk's Indian name is spelt in almost as many ways as times used by different writers. He himself signed it several ways. To the treaty of June 30, 1831, he signed it *Mucata-tullhi-egak*. Prior to this, in 1827, his name was written *Kara-zhonsept*; when surrendered by Decorie, to General Street, he called him *Mucatamish-kakaekq*; at Saint Louis, in 1832, he was called *Mack-atama-sic-ac-ac*. In 1829 his name was written *Hay-ray-tshoan-sharp*; about the time he was captured or surrendered, in 1832, his name was spelt *Mus-cata-mish-ka-kack*, and many other ways might be given. Judge James Hall, in *McKenney & Hall*, vol. 2, calls him *Ma-ka-tai-me-she-kia-kiah*. This is followed by A. R. Fulton in the "Red Men of Iowa." At all events he was thoroughly identified in English as Black Hawk.—T. D.

MUK-A-TAH-MISH-O-KÁH-KAIK, THE BLACK HAWK.

NÁH-SE-ÚS-KUK, THE WHIRLING THUNDER.
Son of Black Hawk. No. 3, page 29.
(Plate 284, Vol. II, Catlin's Eight Years.)

October, 1832. Mr. Irving saw them in 1832 at that point, and thus describes them :

From Saint Louis I went to Fort Jefferson Barracks, to see Black Hawk, the Indian warrior, and his fellow prisoners—a forlorn crew—emaciated and dejected. The redoubtable chieftain himself a meager old man upwards of seventy. He has, however, a fine head, a Roman style of face, and a prepossessing countenance.

Black Hawk, sometimes the Black Sparrow, was by birth a Sac. He was the great-grandson of a Sac called Nana-makee, or Thunder, and his father's name was Pyesa. He was born about 1767, on Rock River, in now Illinois, and was then, in 1832, about sixty-six years of age. He was not a chief by birth. At the age of fifteen he was admitted to the rank of a brave, having wounded an enemy ; afterwards he killed a brave, and took part in a war-dance. Before he was twenty his exploits against the Osages had made him famous as a warrior. He took part against the American Government in the war of 1812, and was the associate of Colonel McKee, Colonel Dixon, and Simon Girty. He was called by the British "General Black Hawk."

After peace in 1815, and the building of the fort on Rock Island in 1816, in the midst of the Sac and Fox Nation, Black Hawk, with what was known as the "British Band" of his nation, became sullen and morose. They did not relish the building of the fort and having to abandon the beautiful island.

The Sac and Fox believed that a good spirit had the care of Rock Island, and that the spirit lived in a cave in the rocks immediately under the place where the fort was built. He is said to have been often seen by the Indians, and was white, with wings resembling those of a swan, but ten times larger. They were careful to make no noise in that part of the island which he inhabited, for fear of disturbing him. He had never been seen since the building of Fort Armstrong, and is supposed to have been driven away by the din of the drums and cannon, or by the boisterous mirth of the garrison.

Mr. Catlin wrote of Black Hawk :

The Black Hawk is the man to whom I have alluded as the leader of the Black Hawk war, who was defeated by General Atkinson, in 1832 ; and held a prisoner of war, and sent through Washington and other Eastern cities, with a number of others, to be gazed at.

This man, whose name has carried a sort of terror through the country where it has been sounded, has been distinguished as a speaker or counselor rather than as a warrior ; and I believe it has been pretty generally admitted that Nah-pope and the Prophet were, in fact, instigators of the war, and either of them with much higher claims for the name of warrior than Black Hawk ever had.

When I painted this chief, he was dressed in a plain suit of buckskin, with a string of wampum in his ears and on his neck, and held in his hand his medicine-bag, which was the skin of a black hawk, from which he had taken his name, and the tail of which made him a fan, which he was almost constantly using. (Page 211, vol. 2, Eight Years.)

The Black Hawk war grew out of murders on the frontier about 1824. Then there were differences between the Sacs and Foxes and

Menominees and Sioux. Black Hawk had been arrested in 1828 for supposed complicity in attacking some boats in 1827. Then in 1832 he was set upon by some white men, while in the woods hunting, and badly beaten. He was then called the "Old Chief" of the Sacs and Foxes. Keokuk, and others of his tribe, on July 15, 1830, at Prairie du Chien, had made a treaty of sale of the Sac and Fox lands, seeing the inevitable, and had agreed to remove to lands farther west. Black Hawk had nothing to do with it, and was much offended at it. His village was at that time the Sac village, on a point of land formed by Rock River and the Mississippi, in Illinois. Black Hawk and his people refused to leave their lands, which had been sold by Keokuk, claiming that he was no party to the treaty, but were afterwards off of them for a time. In the spring of 1831 he and his people recrossed the river to the old cornfields, and took possession of their land, then occupied by whites.

The militia were called out in May, 1831, and the regulars brought from Saint Louis, and a treaty was made with Black Hawk and his band on June 30, 1831.

In the spring of 1832 hostilities were begun between Black Hawk and the whites, and the Black Hawk war followed.

The then far West became alarmed. Illinois was the center of interest. General Scott was sent with the regulars to Chicago (Fort Dearborn), and Governor Reynolds called out several companies of volunteers. The point of rendezvous was for a time at John Dixon's Ferry, who was called by the Indians Nachusa or White Head, across Rock River (now the town of Dixon, with about 4,000 inhabitants), Illinois. Here were camped, amongst other officers under command of General Atkinson, Lieut. Col. (afterwards President) Zachary Taylor, Lieut. (afterwards major and general) Robert Anderson, Lieut. (afterwards Senator) Jefferson Davis, Lieut. (afterwards major-general) David Hunter, and Private (afterwards President) Abraham Lincoln of Captain Iles's company of Illinois Mounted Rangers. Major Anderson called upon President Lincoln in April, 1861, after the evacuation of Fort Sumter. Mr. Lincoln said, "Major, do you remember of ever meeting me before?" "No, sir; I have no recollection of ever having had that pleasure." "My memory is better than yours, then," replied Mr. Lincoln. "You mustered me into the United States service as a high private of the Illinois volunteers at Dixon's Ferry in the Black Hawk war." (Chicago Historical Society's Publications, No. 10, p. 15.)

On the 27th of August, 1832, Black Hawk and the Prophet, after capture at Bad Axe, were delivered to General Street at Prairie du Chien, by two Winnebago Indians, Decorie and Chaetar, and the war was ended.

While at Prairie du Chien, along with other prisoners, in charge of Lieut. Jefferson Davis, en route to Jefferson Barracks at Saint Louis,

on August 27 and 28, 1832, Black Hawk thus addressed General Street:

My warriors fell around me. It began to look dismal. I saw my evil day at hand. The sun rose clear on us in the morning; at night it sank in a dark cloud, and looked like a ball of fire. This was the last sun that shone on Black Hawk. He is now a prisoner to the white man, but he can stand torture. He is not afraid of death. He is no coward. Black Hawk is an Indian. He has done nothing of which an Indian need be ashamed. He has fought the battles of his country against the white man, who came year after year to cheat his people and take away their lands. You know the cause of our making war. It is known to all white men. They ought to be ashamed of it. The white men despise the Indians and drive them from their homes. But the Indians are not deceitful. Indians do not steal. Black Hawk is satisfied. He will go to the world of spirits contented. He has done his duty. His father will meet and reward him. The white men do not scalp the heads, but they do worse, they poison the heart. It is not pure with them. * * *

Black Hawk and the Prophet, along with ten other warriors, were taken to Jefferson Barracks, Saint Louis, in September, 1832. They were thus described, whilst prisoners at Jefferson Barracks, where Mr. Catlin painted them in October, 1832:

We were immediately struck with admiration at the gigantic and symmetrical figures of most of these warriors, who seemed, as they reclined in native ease and gracefulness, with their half naked bodies exposed to view, rather like statues from some master hand than like beings of a race whom we had heard characterized as degenerate and debased. We extended our hands, which they rose to grasp, and to our question "How d'ye do?" they responded in the same words, accompanying them with a hearty shake. They were clad in leggings and moccasins of buckskin, and wore blankets, which were thrown around them in the manner of the Roman toga, so as to leave their right arm bare. The youngest among them were painted on their necks with a bright vermilion color, and had their faces transversely streaked with alternate red and black stripes. From their bodies and from their faces and eyebrows they pluck out the hair with the most assiduous care. They also shave or pull it out from their heads, with the exception of a tuft of about three fingers width, extending from between the forehead and crown to the back of the head. This they sometimes plait into a queue on the crown, and cut the edges of it down to an inch in length, and plaster it with vermilion, which keeps it erect and gives it the appearance of a cock's comb.

Black Hawk and his eleven warriors were taken, in 1832-'33, on a tour through the Eastern States, and to visit the President, General Jackson, at Washington, and were afterwards confined at Fortress Monroe. At Philadelphia, June 10, 1833, they were described at the hotel called Congress Hall as follows:

We found most of them sitting or lying on their beds. Black Hawk was sitting in a chair and apparently depressed in spirits. He is about sixty-five, of middling size, with a head that would excite the envy of a phrenologist—one of the finest that Heaven ever let fall on the shoulders of an Indian. The Prophet has a coarser figure, with less of intellect, but with the marks of decision and firmness. His face was painted with red and white. The son of Black Hawk [No. 3] is a noble specimen of physical beauty, a model for those who would embody the idea of strength. He was painted and his hair cut and dressed in a strange fantasy. The other chiefs had nothing in particular in their appearance to distinguish them from other natives of the forest.

Black Hawk and party visited President Jackson in the White House on April 22, 1833. He saluted President Jackson with, it is said, "I

am a man and you are another." The party, after being duly impressed with the number and resources of the whites, were released and returned to Iowa in the summer of 1833. President Jackson told Black Hawk in Baltimore, in June of that year, that he had ordered their return to their own country, because "Sheckak, your principal chief, and the rest of your people are anxious that you should return, and Keokuk has asked me to send you back. When you go back, listen to the counsels of Keokuk and the other friendly chiefs." Black Hawk and his band returned to Iowa in August, 1833, where they were received by Keokuk and the Sac and Fox Nation.

August 5, 1833, the Sac and Fox nation assembled at Fort Armstrong. Major Garland appeared for the United States, and Black Hawk was deposed and Keokuk, by authority of the President, was installed as the principal chief of the Sac and Fox Nation. Col. William Davenport was also present and addressed the Indians.

Mr. Catlin, who was present at the treaty of Rock Island, Ill., in September, 1836, between Governor Dodge and the Sacs and Foxes, at which Keokuk, Black Hawk, and the Prophet were present, describes Black Hawk as follows:

The poor dethroned monarch, old Black Hawk, was present, and looked an object of pity. With an old frock coat and brown hat on, and a cane in his hand, he stood the whole time outside of the group, and in dumb and dismal silence, with his sons by the side of him, and also his quondam aide-de-camp, Nah-pope, and the Prophet. They were not allowed to speak, nor even to sign the treaty. Nah-pope arose, however, and commenced a very earnest speech on the subject of temperance, but Governor Dodge ordered him to sit down (as being out of order), which probably saved him from a much more peremptory command from Keokuk, who was rising at that moment, with looks on his face that the Devil himself might have shrunk from. (Page 217, vol. 2, Eight Years.)

In 1837 he accompanied Keokuk to Washington, and was accorded a place of dignity.

After his return from the East with Keokuk, in 1837, Black Hawk, in the fall of that year, resided on a small stream known as Devil Creek, in Lee County, Iowa. With his wife, two sons, Nes-se-as-kuk (No. 3), and Na-som-see (Wa-saw-we-saw No. 4) and his daughter, Nam-e-qua, the handsomest of Sac maidens.

In the spring of 1838, with his family, he removed to the vicinity of the other Sac and Fox chiefs on the Des Moines River, near Iowaville, in Davis County. He had a comfortable cabin like a white man's, well furnished, and in his garden cultivated vegetables. Black Hawk never had but one wife, a very unusual thing with an Indian at that time.

On the 4th of July, 1838, Black Hawk was a guest of the citizens at Fort Madison, and upon being toasted made, through interpreters, an eloquent reply.

In stature Black Hawk was 5 feet 11 inches in his moccasins. His weight 138 pounds. So that he was tall and thin. His head was finely

shaped, with a Roman face, and a pleasant countenance. Judge James Hall describes him in 1838 as—

Old, and frail and broken in appearance. His stature is small, and his figure not striking; nor do his features indicate a high grade of intelligence.

Black Hawk was an orator of force and fluency. His eloquence is given at length, together with details of his life, in the work published by J. B. Patterson in 1834, and in "The Red Men of Iowa." He was painted many times, and his portraits can be found in several of the historical societies' rooms. Mr. Catlin made several portraits of him. His influence over his people seems to have been due to the force of his eloquence and dignity of his bearing, rather than from his executive capacity or ability as a warrior in his later years.

Black Hawk was a man of much dignity of character.

In 1831, General Gaines, at Rock River, in council with the Sac and Fox Nation, observing Black Hawk seated among the chiefs and leading men, and hearing his name mentioned frequently, he inquired, "Who is Black Hawk? Is he a chief? By what right does he appear in council?" Black Hawk arose and walked out of the council. No one spoke in reply. The next day he was in his place in the council. He was now cool, and free from passion. He arose, and speaking to General Gaines—

My Father: You inquired yesterday, Who is Black Hawk? Why does he sit among the chief men? I will tell you who I am. I am a Sauk. My father was a Sauk. I am a warrior. So was my father. Ask these young men who have followed me to battle, and they will tell you who Black Hawk is. Provoke our people to war, and you will learn who Black Hawk is!

He then sat down, and no further questions were asked.

DEATH AND BURIAL OF BLACK HAWK.

The following account of his death and burial is condensed from "The Red Men of Iowa," by A. R. Fulton, and also from an article on "The Burial of Black Hawk," in the Magazine of American History for May, 1886, by J. F. Snyder, M. D.

James H. Jordan, esq., lived in a cabin but a few rods from that of Black Hawk. He was intimate with and now owns the land upon which Black Hawk's cabin stood. It was on the north bank and about 100 feet from the Des Moines River.

Near this cabin stood two large trees—an ash and an elm—and from near their roots came a spring, known as Black Hawk's Spring. Here he would sit and look out upon the river. He maintained a gloomy silence, speaking to but few but his intimates. Black Hawk was ill fourteen days before his death. The chiefs and other principal men were absent at the time of his death, at Rock Island, receiving annuities. Mr. Jordan was with him two hours before his death—the last white man who spoke to or saw him alive, and then left to go to Rock Island. Black Hawk's wife was devoted to him, and sincerely mourned him. Some days before his death she said, "He is getting old; he must die. Monoto calls him home."

Black Hawk died from a bilious colic at noon on October 3, 1838, aged seventy-two years. He was buried on the spot designated by himself—a place where he held council with the Iowa Indians in the summer of 1837 or 1838. His funeral was at-

tended by many white men (October 4 or 5, 1838) by his family, and about fifty of his tribe. Almost all of the Sac and Fox were absent at Rock Island.—A. R. Fulton.

Captain Jordan, who, as above stated, was present at his burial, is now residing on the very spot where he died. In reply to a letter of inquiry from Mr. Snyder, he writes as follows:

“ELDON, IOWA, *July 15, 1881.*

“Black Hawk was buried on the northeast quarter of the southeast quarter of section 2, township 70, range 12, Davis County, Iowa, near the northeastern corner of the county, on the Des Moines River bottom, about 90 rods from where he lived at the time he died, on the north side of the river. I have the ground where he lived for a door-yard, it being between my house and the river. The only mound over the grave was some puncheons split out and set over his grave and then sodded over with blue-grass, making a ridge about four feet high. A flag-staff, some 20 feet high, was planted at his head, on which was a silk flag, which hung there until the wind wore it out. My house and his were only about 4 rods apart when he died. He was sick only about fourteen days. He was buried right where he sat the year before, when in council with the Iowa Indians, and was buried in a suit of military clothes, made to order and given to him when in Washington City by General Jackson, with hat, sword, and gold epaulets, &c.”

Another old settler of that neighborhood, Mr. Isaac Nelson, sent Mr. Snyder the following:

“HICKORY, IOWA, *June 24, 1881.*

“I came to Iowa in the spring of 1836, and was two or three times near Black Hawk's house, but never went in to see him. * * * He was buried in a manner on the top of the ground, but his feet were about 16 inches in the ground and his head about a foot above the surface. He had on a suit of military clothes; four nice new blankets were wrapped around him, a pillow of feathers was under his head, a plug hat was on his head, and an old-fashioned brussel stock around his neck. You may ask how I saw all of this when he was in his grave. I will try to describe the way in which he was buried, and then you will understand it. A forked post had been planted at his head and one at his feet; a ridge pole was laid in these forks, and then puncheons put over him in the shape of a roof and the earth thrown on, which made a raise of 2 or 3 feet above him. The whites had taken out the two ends so we could see through. The grave had been inclosed with pickets some 8 feet high, planted in the ground with joints broken; but these the whites had forced apart so that we could easily creep in. His feet were to the east and his head to the west. At his feet was a shaved oak post with painting on it, and at his head a pole with a nice silk flag. All the grass and weeds were kept out of the inclosure and for some distance around the outside. He had no coffin, but was laid full length on a board with four fine blankets around him.”

Pursuing the investigation further, I found, with the kind assistance of W. Clement Putnam, esq., of Davenport, in the *Annals of Iowa* (1863, p. 50, and 1864, p. 353 *et seq.*) the statements of Willard Barrows, esq., and Capt. H. B. Horn, in relation to the event under consideration. They say that the old chief's body was laid on a board which was sunk at the foot, or lower end, about 15 inches below the surface of the ground, while the other, or upper end of the board, was raised, and supported three feet above it; thus his body reclined at an angle with the horizon of some 25 or 30 degrees. He was dressed in the military uniform of a colonel of the Regular Army, said to have been presented to him by a member of President Jackson's Cabinet, with a cap on his head elaborately ornamented in Indian style with feathers. At his left side was a sword, which had been presented to him by General Jackson; and at his right side were placed two canes, one of which he had received from Hon. Henry Clay; the other was the gift of an officer of the British army. Besides these were deposited on either side other presents and trophies, highly prized by him as mementoes of his valor and greatness. About his neck were ribbons suspending three med-

als, one the gift of President Jackson, another was presented to him by ex-President John Quincy Adams, and the third by the city of Boston. The body was inclosed with boards resting on end on either side, and meeting on a ridge-pole fixed on forked posts, set in the ground at the head and feet, forming a roof with an open space below. The gables of this rude vault were closed with boards, and the whole was covered with earth, and then sodded over.

At the head was a flag-staff 35 feet high, which bore an American flag worn out by exposure, and near by was the usual hewn post, inscribed with Indian characters, representing his deeds of bravery and record as a warrior. Inclosing all was a strong circular picket fence 12 feet high.

His body remained here until July 1, 1839, when its head was carried off by a certain Dr. Turner, who then lived at Lexington, Van Buren County, Iowa. Black Hawk's widow discovered this and reported it to Mr. Jordan. In the winter of 1839 Dr. Turner came back and got the body. Captain Horn states that Dr. Turner subsequently took the skeleton to Alton, Ill., for the purpose of having the bones articulated with wire. He carried Black Hawk's head away in his saddle-bags in July of 1839. Mr. Barrows says the skeleton was sent to Warsaw or Quincy, Ill.

The sons of Black Hawk, when they became aware of this desecration of their father's grave, were very indignant, and complained of it to Governor Lucas, at that time the governor of Iowa Territory, and his excellency at once caused the bones of the great chief to be brought back to Burlington, where they were deposited in the fall of 1839, or the early spring of 1840. Shortly after, when the young Black Hawks came to take possession of the paternal osseous remains, it seems that, finding them safely stored in the governor's office, they concluded to leave them there. The skeleton was subsequently placed in the collection of the Burlington Geological and Historical Society, and there is no doubt that it was consumed in the fire that destroyed the building and all the Society's collections in 1855.

So also says A. R. Fulton, though the editor of the *Annals* (April, 1865, p. 478), J. F. Snyder, M. D., "doubts this."

Dr. J. H. Rauch, the present Secretary of the Illinois State Board of Health, was, at the time of said catastrophe, secretary of the society whose building and collections were destroyed; and on applying to him for further information, he stated that the famous skeleton, when returned to the Territorial capital by order of the executive, fell into the possession of Dr. Enos Lowe, recently deceased at Omaha, Nebr., who afterward presented it to the society; and intimated that Dr. Lowe may possibly have taken the bones with him when he removed from Burlington to Omaha.

Dr. Lowe's son, General W. W. Lowe, is still a resident of Omaha, and to him I propounded certain interrogatories, to which the following answer was received, under date of November 29, 1881:

"After the chief's death, the tribes (Sacs and Foxes) requested my father to take possession of the remains, and he did so, wiring them and keeping the skeleton in his office, where for a long time they continued to come to view it. Subsequently, with the consent of the tribe, he presented the skeleton to the Geological and Historical Society of Burlington, and the remains were destroyed by the burning of their building."—J. F. Snyder.

In 1868, A. R. Fulton visited the place where Black Hawk was buried thirty years before, and found that it had been marked by a pile of stones thrown there by James H. Jordan.

3. Náh-se-ús-kuk, the Whirling Thunder; eldest son of Black Hawk. Painted 1832.

A very handsome man. He distinguished himself in the Black Hawk war.

(Plate No. 234, page 211, vol. 2, Catlin's *Eight Years*.)

The eldest son of Black Hawk, * * * a very handsome young warrior, and one of the finest-looking Indians I ever saw. There is a strong party in the tribe that is

anxious to put this young man up, and I think it more than likely that *Keokuk* as chief may fall ere long by his hand, or by some of the tribe who are anxious to reinstate the family of Black Hawk.—G. C., page 211, vol. 2, Catlin's Eight Years.

Na-se-us-kuk (Whirling Thunder) is a fine young chief. * * After the defeat of his tribe in 1832, he was with his father taken prisoner, and paraded through the Atlantic cities. He was present one evening at a party when a young lady sang a ballad with much taste and pathos. *Na-se-us-kuk*, who was standing at a distance, listened with profound attention, and at the close of the song he took an eagle's feather from his head dress, and giving it to a bystander, said: "Take that to your mocking-bird squaw."—Hon. C. Augustus Murray, 1837.

Keokuk, however, remained chief until his death, in April, 1848, and his son, *Keokuk, jr.*, No. 6, succeeded him, and is now, in 1885, chief of the Sac and Fox in Indian Territory.

4. **Wa-sáw-me-saw**, the Roaring Thunder; youngest son of Black Hawk. Painted while a prisoner of war in 1832.

(Plate No. 231, page 210, vol. 2, Catlin's Eight Years.)

After his return from the East in the fall of 1837, Black Hawk and his family spent the winter in Lee County, residing on a small stream known as Devil Creek. His family then consisted of his wife, two sons—*Nes-se-us-kuk* (No. 3 above) and *Na-som-see* [No. 4 above].—Red Men of Iowa, page 222.

These two sons, after Black Hawk's death, probably removed with the Sac and Fox westward, to Kansas.

5. (), wife of *Kee-o-kúk* (No. 1); in a dress of civilized manufacture, ornamented with silver brooches. Painted in 1834.

(Plate No. 281, page 200, vol. 2, Catlin's Eight Years.)

This woman is the eldest of seven wives whom I saw in his lodge, and, being the mother of his favorite son, the most valued one. To her alone would he allow the distinguished honor of being painted and hung up with the chiefs.

6. **Me-sóu-wahk**, the Deer's Hair; the favorite son of *Kee-o-kúk*, and by him designated to be his successor. Painted in 1834.

(Plate No. 282, page 210, vol. 2, Catlin's Eight Years.)

Plate 281 is a portrait of the wife of *Kee-o-kuk*, and plate 282 of his favorite son, whom he intends to be his successor. These portraits are both painted, also, in the costumes precisely in which they were dressed. This woman was the favorite one (I think) of seven whom he had living (*apparently* quite comfortably and peaceably), in his wigwam, where General Street and I visited him in his village on the Des Moines River. And although she was the oldest of the "lot" she seemed to be the favorite one on this occasion—the only one that could be painted—on account, I believe, of her being the mother of his favorite son. Her dress, which was of civilized stuffs, was fashioned and ornamented by herself, and was truly a most splendid affair, the upper part of it being almost literally covered with silver brooches.—G. C., page 210, vol. 2, Catlin's Eight Years.

The wife's (No. 5) name is given in the cartoon catalogue, page 9, cartoon No. 15 A, as "*Nah-weé-re-coo* (———), a Saukie (Sac) woman, the wife of *Kee-o-kuk*; her dress of civilized manufacture, ornamented with ribbons and brass buttons."

The son (No. 6) is given in the cartoon collection, page 9; cartoon No. 13 C, "*Me-sou-wahk* (the Deer's Hair); a young boy twelve years old,

NAH-WEÉ-RE-CO.

Wife of Keokuk. Sac, No. 5, page 30.

(Plate 281, Vol. II, Catlin's Eight Years.)

ME-SÔU-WAHK, THE DEER'S HAIR.

Son of Keokuk; in 1886 the Rev. Moses Keokuk, chief of Sac and Fox.

No. 6, page 30.

(Plate 282, Vol. II, Catlin's Eight Years.)

the son of Kee-o-kuk, chief of the tribe—a small tribe residing in Iowa and Illinois in 1834.”

This son, now known as Rev. Moses Keokuk (Baptist), also known as Keokuk, jr., is now chief of the tribe located in Indian Territory, and is about sixty-four years of age. He succeeded his father as chief in 1848. He resides at the Sac and Fox Agency, in Indian Territory, on the Sac and Fox Reservation. He is a wealthy Indian, possessing large herds of cattle. His people now number (in 1885) about 450, and receive an annual annuity of \$25,231.50, or \$56.70 per capita; Keokuk, as chief, receives annually \$250 from the United States. He is a man above 6 feet, speaks but little English, and is one of the handsomest and, with the exception of Jack Dindoy, of the Shoshones, probably the handsomest Indian chief in America. His photograph and that of his son, Charles Keokuk, grandson of Keokuk, sr., are given in Hayden's Catalogue, page 17, Nos. 678, 681-2, 705, and Nos. 679 and 684. They were taken at Washington in 1868. Keokuk, jr., is a frequent visitor to Washington.

In an interview in July, 1883, Keokuk, jr., at Keokuk, Iowa, gave the following account of his family and himself:

Where were you born?

At the village of the Sac and Fox tribe, at the mouth of Fox River, just below Rock Island, in February, 1824. I am now fifty-nine years of age.

When did you remove with your parents to your present home in Kansas?

In 1845.

When did your father die?

In 1848, in April, on the south bank of the Marais des Cygnes, about 2 miles south of the town of Pomona, in Franklin County, Kansas. He was buried at the agency, 5 miles east of the place he died. A white marble slab marks his last resting place.

How many sons and daughters did he have?

There were five of us, two boys and three girls. My brother's Indian name was Naw-wah-yah-ko-see-wah, meaning The Heart of a Tree. The names of the three sisters were Waw-ko-see-quaw, The Fox Woman; Naw-waw-ke-ke, I See Them, and Au-paw-che-kaw-paw-quaw, meaning The Woman Who Will Stand Forever.

How many were living when your father, Chief Keokuk, died?

All were living when he died. I am the only one living to-day.

Is your tribe increasing or diminishing in numbers?

Diminishing. When we left the Raccoon River to go to our present home there were over 2,000 in the tribe; now there is not one-half that number. The tribe is not decreasing so rapidly now as it was ten years ago. My people live in houses, and cultivate the soil.

7. Wah-pe-kée-suck, (Wa-bo-ki-e-Shiek), White Cloud, called the Prophet; one of Black Hawk's principal warriors and advisers.

Was a prisoner of war with Black Hawk, and traveled with him through the Eastern States.

(Plate No. 285, page 211, vol. 2, Catlin's Eight Years.)

In the cartoon collection of 1871 it is given, page 9, cartoon No. 14f, Wa-pe-kee-Suck (The White Cloud, called also the Prophet), one of the warriors made prisoner with the Black Hawk. The chief and his

five warriors were painted during their imprisonment in Jefferson Barracks, with cannon balls attached to their ankles, in 1832.

The Prophet is a very distinguished man, and one of the principal and leading men of the Black Hawk party, and studying favor with the whites, as will be seen by the manner in which he was allowing his hair to grow out.—Page 211, Catlin's Eight Years.

The Prophet, or *Wa-bokies-hick* (White Cloud), is about 40 years old, and nearly 6 feet high, stout, and athletic; also called *Opee-kee-Hieck*.

He was by one side a Winnebago, and the other a Sac or Saukie. He has a large, broad face, short blunt nose, large full eyes, broad mouth, thick lips, with a full suit of hair. He wore a white cloth head-dress, which rose several inches above the top of his head, the whole exhibiting a deliberate savageness—not that he would seem to delight in honorable war, or fight, but marking him as the priest of assassination or secret murder. He had in one hand a white flag. * * * He was clothed in very white dressed deer-skins, fringed at the seams with short cuttings of the same. This description was written before any portrait or engraving was made of him. Drake's Book of the Indians, part 4, page 163.

He carries with him a huge pipe, a yard in length, with the stem ornamented with the neck feathers of a duck, and beads and ribands of various colors. To its center is attached a fan of feathers. He wears his hair long all over his head.—*Ibid*.

The Prophet was believed to have been the prime mover of the Black Hawk war of 1831-'32.

This personage (the orthography of whose name is given by some writers as Wapa-she-ka) was an important character previous to and during the Black Hawk war. His name signified "The Light," or, as otherwise defined, "White Cloud." It was supposed that he was the chief instrument in plotting the war, and in giving encouragement to Black Hawk to engage in it. Colonel Whittlesey says he was a half-breed Pottawottamie, but Wa-bo-ki-e-Shiek himself claimed to be part Winnebago and part Sac, his father belonging to one and his mother to the other of these tribes. It is certain that his opinions and advice were held in much respect both by the Winnebagos and the Sacs. He presided over a village known as the "Prophet's Village," on Rock River, about 35 miles above the mouth, as early as 1824 and up to the breaking out of hostilities. He constantly urged Black Hawk not to comply with the demand for removal west of the Mississippi. When Black Hawk's lieutenant, Neopope [No. 8 herein] went to Malden to consult his British father in regard to the right of the Indians to retain their lands on Rock River, the latter on his return stopped at the Prophet's village, where he remained during the winter.—Red Men of Iowa, page 269, 270.

Here the scheme of revolt against the Government was completed.

Wa-bo-ki-e-Shiek was captured with Black Hawk after the battle of Bad Axe, and was his companion until released at Fort Armstrong in August, 1833.

He was an orator of note. His speech to President Jackson, at Washington, in 1833, was a model of brevity and frankness.

At Norfolk, Va., June 5, 1833, after his release from Fortress Monroe, he addressed a mass of people from the balcony of the hotel:

Brothers, the Great Spirit sent us here, and now happily we are about to return to our own Mississippi and our own people. It affords us much happiness to rejoin our friends and kindred. We would shake hands with all our white friends assembled here. Should any of them go to our country, on the Mississippi, we would take

WAH-PE-KÉE-SUCK, WHITE CLOUD, THE PROPHET:
Black Hawk's adviser. Sac, No. 7, page 31.
(Plate 285, Vol. II, Catlin's Eight Years.)

WÉE-SHEET, THE SURGEON'S HEAD.
Fox, No. 18, page 36.
(Plate 286, Vol. II, Catlin's Eight Years.)

pleasure in returning their kindness to us. We will go home with peaceable dispositions towards our white brothers, and make our conduct hereafter more satisfactory to them. We bid you all farewell, as it is the last time we shall see each other.

The following account is from the "Red Men of Iowa," pages 269-272 :

The character of Wa-bo-ki-e-Shiek, as drawn by those who knew him, was not relieved by many good qualities. He was represented as the priest of assassination, entertaining strong prejudices against the whites; ready and willing to make mischief and influence the Indians to resistance against the whites regardless of what might be the result. This opinion of his character, however, is somewhat at variance with a statement made by Maj. Thomas Forsythe, who had for many years been an Indian trader, and until 1830 the agent of the Sacs and Foxes. In 1832 Major Forsythe wrote: "Many a good meal has the Prophet given to the people traveling past his village, and very many stray horses has he recovered from the Indians and restored them to their rightful owners without asking any recompense whatever."

As the Prophet of the Wabash enacted an important role among the followers of Tecumseh, which ended in disaster to their cause at Tippecanoe, so the False Prophet of Rock River doubtless exercised an influence over the superstitious minds of the savages under Black Hawk, which culminated in their defeat and overthrow at Bad Axe.

After his release in August, 1833, he sank into obscurity and removed with his tribe to Kansas, where he died about 1847.

8. Náh-pope (Ne-o-pope), the Soup; another of Black Hawk's principal advisers; and traveled with him, when he was a prisoner of war, to the Eastern cities. He desired to be painted with a white flag in his hand. Painted in 1832.

No plate of this picture is given in Catlin's Eight Years, and but little mention of it. This picture was painted at Jefferson Barracks in 1832, while Nah-pope was a prisoner with Black Hawk. In the Cartoon Catalogue, page 9, he is given as Na-pope (Soup).

Ne-A-Pope, Naopope—Naapope, &c., or both—was brother to the Prophet (see No. 7) and some years his junior; he resembles him in height and figure, though he is not so robust, and his face is more sharp; in wickedness of expression they are *par nobile fratrum*.

When Mr. Catlin, the artist, was about taking the portrait of Naa-pope, he seized the ball and chain that were fastened to his leg, and, raising them on high, exclaimed, with a look of scorn, "Make me so, and show me to the Great Father." On Mr. Catlin's refusing to paint him as he wished, he kept varying his countenance with grimaces to prevent him from catching a likeness.—Drake's Book of the Indians, book 4, page 163.

Neapope was second in command to Black Hawk in all the expeditions against the whites. (*Ibid.*, page 158.) See his statement on same page as to the beginning of the Indian war of 1831-32.

The following account is condensed from "Red Men of Iowa," pages 272, 273, 274:

Ne-o-pope.—The meaning of the name of this personage in English is Soup. Though sometimes called a chief, he was really only a Sac brave. He was recognized as a warrior of great skill and courage in Black Hawk's "British Band," in which he held the position of second in command. Before the commencement of actual hostilities against the United States, Neopope had been on a mission to the British authorities at Malden, to consult as to the rights of the Indians (in land matters). He returned bringing assurances that the Americans could not take their lands, except by purchase,

which Black Hawk and his adherents declared had never been done. It is said that Neopope directed to a great extent the movements of the band from the time they recrossed to the east side of the Mississippi until the close of the war. He made his escape at the battle of Bad Axe, but was captured and brought in by the Sioux. With Black Hawk, the Prophet, and other prisoners, he was taken to Jefferson Barracks and east. * * *

After his capture, and while on his way to Jefferson Barracks, he met General Winfield Scott at Rock Island and made a statement to him of the Indian side of the cause of the Black Hawk war—a model of concise statement. He remained with his tribe after his return from the east in 1833, and removed with it to Kansas, where he died about 1849. His fortunes followed Black Hawk's—obscurity was his fate.

9. **Ah-móu-a**, the Whale, one of Kēe-o-kūk's principal braves; holding a handsome war-club in his hand. Painted in 1834.

(Plate No. 287, page 211, vol. 2, Catlin's Eight Years.)

10. **Wa-quóth-e-qua**, the Buck's Wife, or Female Deer; the wife of Ah-móu-a. Painted in 1834.

(Plate No. 288, page 211, vol. 2, Catlin's Eight Years.)

Ah-móu-a, the Whale, and his wife, are fair specimens of this tribe (Sac). Her name is Wa-quóth-e-qua (the Buck's Wife, or Female Deer), and she was wrapped in a Mackinaw blanket, whilst he was curiously dressed, and held his war club in his hand. Page 211, vol. 2, Catlin's Eight Years.

11. **Pash-ee-pa-hó** (Pashepaho), the Little Stabbing Chief; holding his staff of office in his hand, shield and pipe.

A very venerable old man, who has been for many years the first civil chief of the Sacs and Foxes. 1834.

(Plate 289, page 211, vol. 2, Catlin's Eight Years.)

This personage, whose name signifies The Stabber, perhaps should not be rated as one of the minor chiefs, for he was at the time of the Saint Louis treaty of 1804 the head chief of the Sac tribe. He was even then well advanced in years, and as the greater portion of his career had passed before the Sacs and Foxes came into very intimate relations with the whites, but comparatively little is known of him. He was one of the five representatives of his nation who negotiated the treaty of 1804 with William Henry Harrison, and which was so bitterly complained of by Black Hawk. We have but very meager details of his deeds as a warrior, but it is very probable that he stood high among his people in that respect. It was under his leadership that the Iowas were subjugated in the great decisive battle on the Des Moines in the early part of the present century.

Soon after the establishment of Fort Madison, Pashepaho became the chief actor in a plot to attack and destroy that fort and its garrison. His plan was to gain admittance for himself and some of his warriors to the fort with arms concealed under their blankets, pretending, however, that they were desirous of holding a council. The plot was disclosed to the commandant of the garrison by a young squaw who had been on terms of intimacy with some of the officers, so that when Pashepaho and his warriors presented themselves at the gate they found it guarded with a loaded cannon, and the gunner with lighted torch in his hand ready to fire.

Subsequent to his plot against Fort Madison, Pashepaho made an attempt to gain a lodgment in Fort Armstrong at Rock Island, though in quite a different way. The year before, while some of his warriors were on a hunting excursion they fell in with

PASH-EE-PA-HÓ, THE LITTLE STABBING CHIEF.
First civil chief of the Sac and Fox, 1834. No. 11, page 34.
(Plate 289, Vol. II, Catlin's Eight Years)

a party of their enemy, the Sioux, and had taken several scalps. This was after a treaty of peace had been made between the Sioux and the Sacs and Foxes to which the United States was also a party. The Sioux therefore complained of the outrage to the authorities at Washington, and an order was issued demanding the surrender of the culprits. They were brought in and held as prisoners at Fort Armstrong, where they were provided with comfortable quarters and plenty to eat during the winter. After faring sumptuously several months at the expense of the Government, and without labor or exertion on their part, they were released on payment to the Sioux of a small amount out of the annuity due their tribe. Pashepaho, remembering how well his braves had fared, concluded that the next winter he would have an easy life in comfortable quarters, and avoid the labor of replenishing his larder with a winter supply. So he voluntarily called on the commandant at Fort Armstrong, and informed him that while on a recent hunting excursion he had yielded to temptation and had taken the scalp of a Sioux whom he had met. He confessed that he had done a very wrongful act, and wished to save the great father at Washington the trouble of sending a letter ordering his arrest; he would, therefore, surrender himself as a prisoner. His plan, however, did not succeed any better than his former plot to enter Fort Madison. The commandant, Colonel Davenport, told him he was an honorable Indian, and that his voluntary offer to surrender himself was sufficient guarantee that he would appear when sent for. Pashepaho was never called upon to answer to the self-preferred charge.

Pashepaho was exceedingly vindictive in disposition. For some fancied offense he once undertook a long journey with the avowed purpose of killing the Indian agent at Prairie du Chien. The chief Taimah, hearing of the purpose of The Stabber, hastened to the agent and revealed his design, thus probably saving the agent's life.

Pashepaho was among the chiefs present at the negotiation of the treaty of 1832, when the "Black Hawk purchase" was made. He was also present at Fort Armstrong in August, 1833, on the occasion of the liberation of Black Hawk and his companions, where, after drinking a glass of champagne, he shook hands with Major Garland and others, and then made the following speech:

"Brothers: We met this morning. I am glad to meet again. That wine is very good; I never drank any before. I have thought much of our meeting to-day; it was one that told us we were brothers—that we were Sacs. We had just returned from a buffalo hunt; we thought it was time for our brothers to be here, as our father at Saint Louis told us this was the moon. We started before the rising sun to meet you; we have met and taken our brothers by the hand in friendship. They always mistrusted our counsels, and went from the trail of the red men, where there were no hunting-grounds and friends. They returned and found the dogs howling around their wigwams, and wives looking for their husbands and children. They said we counseled like women, but they have found our counsels were good. They have been through the country of our great father. They have been to the wigwams of the white men, who received them in kindness and made glad their hearts. We thank them. Say to them that Keokuk and Pashepaho thank them. Our brother [Black Hawk] has promised to listen to the counsels of Keokuk. What he said in council to-day was like the Mississippi fog—the sun shone and the day is clear—let us forget; he did not mean it. His heart is good, but his ears have been open to bad counsels. He has taken our great father by the hand, whose words are good. He listened to them, and has closed his ears to the voice that comes across the great waters. He now knows that he ought to listen to Keokuk. He counseled with us and our young braves, who listened to his talk. We told our great father that all would be peace. He opened his dark prison and let him see the sun once more; gave him to his wife and children, who were without a lodge. I once took the great chief of the Osages prisoner. I heard the cries of his women and children; I took him out by the rising sun, and put him upon the trail to his village. 'There,' said I, 'is the trail to your village; go and tell your people that I, Pashepaho, the chief of the Sacs, sent

you.' We thank our great father; our hearts are good toward him; I will see him before I lay down in peace; may the Great Spirit be in his councils. What our brother [Black Hawk] said to-day, let us forget. I am done."

This speech shows that Pashepaho favored the peace policy of Keokuk. After this event we have been able to learn but little of him that is authentic. He became in his old age much given to intemperate habits, and it is quite likely he went down to a drunkard's grave. When very old and feeble he migrated with his people to their new reservation beyond the Missouri, and doubtless for many years his dust has mingled with the soil of Kansas.—Red Men of Iowa, pages 248-252.

12. **I-o-wáy**, the Ioway; one of Black Hawk's principal warriors; his body curiously ornamented with his "war-paint." (No plate.) 1832.

13. **Pam-a-hó**, the Swimmer; one of Black Hawk's warriors; very distinguished. (No plate.)

Pam-a-hó, or Fast-Swimming Fish, is a short, thick-set, good-natured old brave, who bears his misfortunes with a philosophy worthy of the ancients.—Drake's Book of the Indians, book 4, page 164.

14. **No-kúk-qua**, the Bear's Fat. (No plate.)

15. **Pash-ee-pa-hó**, the Little Stabbing Chief (the younger); one of Black Hawk's braves. (No plate.)

16. **Wáh-pa-ko-lás-kuk**, the Bear's Track. (No plate.)

FOXES.

[On the Des Moines River; present number (in 1840), 1,500. Joined with the Sacs.]

17. **Aih-no-wa**, the Fire; a doctor or "medicine man"; one-half of his body painted red and the other yellow.

18. **Wée-sheet**, the Sturgeon's head; one of Black Hawk's principal warriors; his body most singularly ornamented with his war paint.

This man held a spear in his hand, with which he assured me he killed four white men during the war, though I have some doubts of the fact. Painted in 1832.

(Plate No. 286, page 211, vol. 2, Catlin's Eight Years.)

19, 20, 21. Three in a group; names not known.

Dances, ceremonies, customs, &c., Sac and Fox, 1832 to 1836. See No. 439, 442, 444, 448, 450, 463-479, and 545 herein.

ALGONKIN—SACS AND FOXES.

The Sacs and Foxes, who were once two separate tribes, but with a language very similar, have, at some period not very remote, united into one, and are now an inseparable people, and go by the familiar appellation of the amalgam name of "Sacs and Foxes."

These people, as will be seen in their portraits, shave and ornament their heads like the Osages and Pawnees, of whom I have spoken heretofore.—Page 210, Catlin's Eight Years, 1834.

For a detailed sketch of the history of the Sac and Fox see "The Illinois and Indiana Indians," by Hiram W. Beckwith, Fergus Historical Series No. 27, Chicago, Ill., Fergus Printing Company, 1884, and

"The Red Men of Iowa," by A. R. Fulton, 1882. In this volume Mr. Fulton says :

Prominent amongst the aboriginal tribes of the Northwest were the united tribes known and designated in our treaties as the Sacs and Foxes. These were not the national names of these tribes, but for some reason they were the names adopted in the treaties made with them. The Sac does not so call himself, but *Saw-kie*, which signifies "the man with the red badge or emblem." Red, with them, was the favorite color in the adornment of their persons. When the *Saw-kie* mourned for his dead he covered his head with red clay, as the Hebrews, on similar occasions, sprinkled ashes upon their heads. The national or Indian name of the associate tribe, known to us as Foxes, was *Mus-quah-kie*, which means "the man with the yellow badge or emblem." The name Fox originated with the early French *voyageurs*, on account of their adroitness in stealing articles of small value. They called them *Reynors*, and the river in Wisconsin where these Indians lived, now known as Fox River, the French called "Rio Reynor." By that name it appears on the old French and Spanish maps. When the country came into possession of the English the name *Reynor* assumed the English translation of Fox. Many early English writers, however, speak of this tribe as the *Reynards*. * * *

The Foxes * * * in 1812 joined with the Iroquois in an attempt to destroy the French post at Detroit. They failed in that enterprise, were routed, and retired to a peninsula in Lake Saint Clair, where they were afterwards attacked by the French and driven out.

They next appear on Fox River, at Green Bay. Here they greatly annoyed the French traders and trappers. Again they were defeated by the French in the battle of "Buttes des Morts," or "Hill of the Dead." In this battle a large number of their warriors were slain, after which the remnant of the tribe fled to the banks of the Wisconsin. From this time the Foxes or Reynards (originally called Outagamies) were scarcely noticed in aboriginal history until within the nineteenth century.

The two tribes, Sacs and Foxes, became united about the year 1712, and removed together to the Mississippi.

Mr. W. H. Jackson, in 1877, wrote as follows:

The Sacs, Sauks, Saukies, or Osaukees, as it has been variously written—a word meaning yellow clay—and the Foxes, or Outagamies, or more properly the Musquakink (red clay), are now as one tribe. They were first discovered settled about Green Bay, Wis. (after residence on the north shore of Lake Ontario), but their possessions extended westward, so that the larger part was beyond the Mississippi. They partly subdued and admitted into their alliance the Iowas, a Dakota tribe. By 1804 they had ceded all their lands east of the Mississippi, and settled on the Des Moines River, moving subsequently to the Osage (in Kansas), and, after 1842 [in 1845], the most of these finally to the Indian Territory. In 1822 the united bands numbered 8,000, but are now (1875) reduced to a little more than 1,000, of whom 341 are still in Iowa, 430 in the Indian Territory, 98 in Nebraska, and about 200 in Kansas. The Sacs and Foxes of the Mississippi in the Indian Territory have a reservation of 483,840 acres. Unsuccessful attempts have been made lately to induce those in Kansas to join them. Those in Iowa are living on a section of land purchased by themselves (Tama County). The Sacs and Foxes of the Missouri have 4,864 acres of land in Nebraska, but it is proposed to remove them soon to the Indian Territory.

Judge James Hall, of Philadelphia, Pa., and Cincinnati, Ohio, 1793–1868, who enjoyed a long and extended personal acquaintance with them, states:

The Foxes and Sacs are remarkable for the symmetry of their form and fine personal appearance. Few of the tribes resemble them in these particulars; still fewer equal

their intrepidity. They are, physically and morally, among the most striking of their race. Their history abounds with daring and desperate adventure and romantic incidents, beyond the usual course of Indian exertion.

The State of Iowa, with considerable pride, has named many of her counties, towns, and cities after the Sacs and Foxes.

PRESENT LOCATION AND CONDITION, 1885-'86.

The Sacs and Foxes, June 30, 1885, were distributed as follows:

On Sac and Fox Reservation in Indian Territory, under Keokuk, jr., 457; on Sac and Fox Reservation in Iowa (Tama County), known as the Fox or Musquakie tribe of Indians, about 380; on Pottawatomie and Great Nemaha Agency Reservation, the Sac and Fox of Missouri, about 187; total, 924. Mohoko band of Sac and Fox, wandering in Kansas, tributary to Sac and Fox Agency, Indian Territory, 350. Almost all civilized—farmers and herders.

The agent at Sac and Fox Agency, Iowa, writes, 1884:

For honesty and truthfulness our Indians stand above the average white man with the merchants with whom they deal. They give no trouble to the State, and none whatever to the General Government, while I, as their agent and friend, cannot refrain from praising their good conduct, which is so desirable.

The agent at the same reservation, Tama City, Iowa, in his official report, dated August 10, 1885, says:

I have the honor herewith to submit my first annual report of the condition of affairs of the Sac and Fox Agency in Iowa.

Our Indians, the Sac and Fox of the Mississippi, disclaim any connection whatever with the Sac tribe, and claim most earnestly that they are Foxes only. Under certain treaties made with the Government over thirty years ago the Sac and Foxes of the Mississippi were removed from Iowa to Kansas. Their relations there not being as pleasant as desired they returned to their old home in Iowa and settled in Tama County, locating on both sides of the Iowa River some 2 miles west of Tama City. The main object that they had at this time in selecting this particular locality was the fact that the Indian cemetery where their ancestors, brothers, and children were buried is situated here. It seems to be a part of their religious faith to guard with fidelity and watch with care the spot where their numbers are buried, and during their stay with us, covering a period of over thirty years, it is a notable fact never have they allowed this sacred spot to be entirely unguarded.

Early after their arrival in Iowa they commenced purchasing lands, having certain portions of their annuities set aside for that purpose, until they are now the owners of some 1,340 acres, all lying together. This land is situated on the Iowa River bottoms, and is valuable for grazing purposes and agriculture, subject to the objection that in time of high water it overflows.

Under the head of civilization, it is proper to state that they have made but little progress, and very slow progress. Living in the rude huts of their ancestors, cooking their food from a fire made on the ground, the smoke escaping from an open roof, sleeping on bunks of boards arranged like bunks around the sides, wearing their blankets, painting their faces, and decorating their heads, are all relics of the Indian life of their fathers, and to which they cling with wonderful tenacity. On the other hand, they have adopted some of the civilized customs and habits of their white brothers, among which may be noted: They have to a great measure adopted our commercial plans and modes of doing business; driving good trades in the sales of such property as they wish to dispose of, scrupulously keeping their contracts for the payments of their debts, and knowing exactly the amount of the same. They have also adopted the use of improved agricultural implements, such as are used by the

whites, laying aside the old Indian hoes and spades, the scythe and sickle, and using instead improved cultivators and plows in cultivating their fields, mowers in cutting their grass, and horse-rakes in putting up their hay. They are to a large extent abandoning their old habit of "packing" or carrying their burdens on their ponies, and instead are using wagons for this purpose, owning now fifteen wagons, which are kept for their own use and purchased with their own money. In years past they had been in the habit of letting their ponies run at large upon their lands and the commons, but the demands of civilization with which they are surrounded have compelled them to build fences, which they have done year by year, completing some one hundred and ten rods this year, so that in fact their entire reservation is now practically under fence, making a grand and commodious pasture for their stock, which is composed exclusively of ponies or horses. In their culinary department they have also made some progress, adopting, as well as their limited facilities will permit, some of the customs of their white sisters. They make very good bread and biscuits, fair pies and cakes, and most elegant soups; have a cloth laid and dishes on their table (which is generally the ground).

In their relations with the whites they observe the Christian Sabbath, never coming to town on that day, making visits, or traveling around the country.

In habits they are a quiet, peaceful, even-tempered people, naturally averse to work and inclined to idleness; but the present year they have done fairly well at work. As a rule, however, they seem at their best visiting the neighboring towns begging, or in some shady nook about their homes smoking, chatting, and playing cards. They lack thrift, industry, and a spirit of progress. They have a well-defined religion. While not what might be strictly called orthodox, it is wide apart from paganism. They believe in the living God, and seriously and devotedly worship Him, regarding Him as the giver of all their good things, and the sure avenger of their wrongs. Their religion partakes largely of the Jewish character. Feasts are held and prayers offered before their crops are planted, and another series of prayers and thanksgiving when their crops are gathered. Blessings and invocations are said when a child is born, and beautiful prayers are offered at the grave for the safe transmission of the spirit of the dead to Heaven. Holy or consecrated tobacco is burned on certain occasions as incense, and they have something that profane eyes are never allowed to see, called "Me-sham," corresponding to the Jewish Ark of the Covenant. * * *

KON-ZAS.

[Kansas or Kaw. Laws of United States and Indian Bureau, June, 1835.]

A tribe of 1,560 souls, residing on the Konza River, 60 or 80 miles west of the Missouri. Uncivilized remains of a powerful and warlike tribe. One-half died with the smallpox a few years since. This tribe shave the head like the Osages, Sacs and Foxes.—G. C.

Mr. Catlin visited them in 1831-'32.

22. *Sho-me-kos-see*, the Wolf; one of the chiefs; his head curiously ornamented, and numerous strings of wampum on his neck.

(Plate No. 133, page 23, vol. 2, Catlin's Eight Years.)

Sho-me-cos-see, a chief of some distinction, with a bold and manly outline of head, exhibiting, like most of this tribe, an European outline of features, signally worth the notice of the inquiring world. The head of this chief was most curiously ornamented, and his neck bore a profusion of wampum strings.—George Catlin, 1831, p. 23, vol. 2, Eight Years.

23. *Jee-he-o-ho-shah*, He who cannot be thrown down; a warrior.

(No plate. Painted 1831-'32.)

24. **Wá-hón-ga-shee**, No Fool; a very great fop.

(Plate No. 132, page 23, vol. 2, Catlin's Eight Years.)

Used half the day in painting his face, preparing to sit for his picture. Painted 1831.

25. **Meach-o-shín-gaw**, Little White Bear; a spirited and distinguished brave, with a scalping-knife grasped in his hand.

(Plate No. 134, page 23, vol. 2, Catlin's Eight Years.)

26. **O-ron-gás-see**, the Bear-catcher; a celebrated warrior. 1831.

27. **Chésh-oo-hong-ha**, the Man of Good Sense; a handsome young warrior; style of his head-dress like the Grecian helmet. 1831.

(Plate No. 135, page 23, vol. 2, Catlin's Eight Years.)

28. **Hon-je-a-put-o**, a woman; wife of O-ron-gas-see. 1831.

Of Nos. 24, 25, and 27, Mr. Catlin writes:

Are portraits of distinguished Konzas (Kansas), and all furnishing striking instances of the bold and Roman outline (see No. 22) that I have just spoken of.—G. C.

In the Cartoon collection (p. 75) there are, on cartoons B, C, and D, "three distinguished warriors of the Konza (Kansas) tribe, dressed and painted for war, their heads shaved and ornamented with red crests, made of the hair of deers' tails, dyed red, and horse hair—the uniform mode of the warriors of that tribe."—G. C., 1871.

MR. CATLIN'S NOTES ON THE KANSAS INDIANS.

The Konzas (Kansas), of 1,560 souls, reside at the distance of seventy or eighty miles from this place, on the Konzas (Kansas) River, fifty miles above its union with the Missouri, from the west.

This tribe has undoubtedly sprung from the Osages, as their personal appearance, language, and traditions clearly prove. They are living adjoining to the Osages at this time, and, although a kindred people, have sometimes deadly warfare with them.—1831, George Catlin, page 23, vol. 2, Catlin's Eight Years.

The custom of shaving the head, and ornamenting it with the crest of deer's hair, belongs to this tribe, and also to the Osages, the Pawnees, the Sacs and Foxes, and Ioways, and to no other tribe that I know of, unless it be in some few instances where individuals have introduced it into their tribes, merely by way of imitation. With these tribes the custom is one uniformly adhered to by every man in the nation, excepting some few instances along the frontier, where efforts are made to imitate white men by allowing the hair to grow out.

In plate 135, No. 27, above (**Chésh-oo-hong-ha**), is a fair exhibition of this very curious custom, the hair being cut close to the head as possible, except a tuft the size of the palm of the hand, on the crown of the head, which is left 2 inches in length, and in the center of which is fastened a beautiful crest made of the hair of the deer's tail (dyed red) and horsehair, and oftentimes surmounted with the war-eagle's quill. In the center of the patch of hair, which I said was left of a couple of inches in length, is preserved a small lock, which is never cut, but cultivated to the greatest length possible, and uniformly kept in braid, and passed through a piece of curiously carved bone, which lies in the center of the crest, and spreads it out to its uniform shape, which they study with great care to preserve. Through this little braid, and outside of the bone, passes a small wooden or bone key, which holds the crest to the head. This little braid is called in these tribes the "scalp-lock," and is scrupulously preserved in this way, and offered to their enemy, if they can get it, as a trophy; which it seems in all tribes they are anxious to yield to their conquerors, in case they are killed in battle, and which it would be considered cowardly and disgraceful for a warrior to shave off, leaving nothing for his enemy to grasp for when he falls into his hands in the events of battle.

SHÓ-ME-KÓS SEE, THE WOLF.
Kansas Chief, No. 22, page 39.
(Plate 133, Vol. II, Catlin's Eight Years.)

WÁ-HÓN-GA SHEE, No FOOT.
Kansas, No. 24, page 40.
(Plate 132, Vol. II, Catlin's Eight Years.)

MEACH-O-SHÍN-GAW, LITTLE WHITE BEAR.
Kansas, No. 25, page 40.
(Plate 134, Vol. II, Catlin's Eight Years.)

CHESH-OO-HONG-HA, THE MAN OF GOOD SENSE.
Kansas, No. 27, page 40.
(Plate 135, Vol. II, Catlin's Eight Years.)

Amongst those tribes who thus shave and ornament their heads the crest is uniformly blood-red, and the upper part of the head, and generally a considerable part of the face, as red as they can possibly make it with vermilion. I found these people cutting off the hair with small scissors, which they purchase of the fur-traders; and they told me that previous to getting scissors they cut it away with their knives; and before they got knives, they were in the habit of burning it off with red hot stones, which was a very slow and painful operation.

With the exception of these few, all the other tribes in North America cultivate the hair to the greatest length they possibly can, preserving it to flow over their shoulders and backs in great profusion, and quite unwilling to spare the smallest lock of it for any consideration.—1831, George Catlin, pages 23, 24, vol. 2, Catlin's Eight Years.

DAKOTA—KANSAS, OR KAW.

The Kansas are an offshoot of the Osage, whom they resemble in many respects. In 1673 they were placed on Marquette's map as on the Missouri, above the Osages. After the cession of Louisiana a treaty was made with them by the United States. They were then on the river Kansas, at the mouth of the Saline, having been forced back from the Missouri by the Sioux, and numbered about 1,500 in 130 earthen lodges. Some of their chiefs visited Washington as early as 1820. In 1825 ceded their lands on the Missouri, retaining a reservation on the Kansas, where they were constantly subjected to attacks from the Pawnees, and on their hunts from other tribes, so that they lost rapidly in numbers. In 1846 they again ceded their lands, and a new reservation of 80,000 acres on the Neosho, in Kansas, assigned them; but this also soon becoming overrun by settlers, and as they would not cultivate it themselves, it was sold, and the proceeds invested for their benefit and for providing a new home among the Osages in Indian Territory. The tribe in 1850 numbered 1,300; in 1860, 800; and in 1875 had dwindled to 516. Under the guidance of Orthodox Friends they are now cultivating 460 acres, and have broken more than as much again. They raised, among other things, 12,000 bushels of corn. Seventy of them are regular church attendants, and 54 of their children attend school.—W. H. Jackson, 1877.

PRESENT LOCATION AND CONDITION, 1885-'86.

There were 245 Kaws, or Kansas, on Osage Agency, Indian Territory, December, 1883.

Agent Miles, September 1, 1884, reported :

The Kaws consist of 194 full bloods and 51 mixed bloods (in all, 245). The full bloods are fast passing away.

Farmers and herders.

August 20, 1885, Agent Miles reports :

The Kaws number 225, of which 173 are full and 52 are mixed bloods. The full bloods keep up their reputation for wandering about, visiting other Indians and the State for the purpose of trading ponies, smoking, and begging, whichever seems best to accomplish the end in view—that is, getting a living without physical exertion. When at home, they display a commendable energy in trying to raise something to subsist on.

The Kaws have better fields (than the Osages) and generally raise considerable corn and vegetables. They suffer from late planting and proper care; from their ponies being poor in the spring, and inattention to cultivating at the proper time. The mixed bloods are most all farming to some extent, and many of them, with the assistance of white men, have good farms and raise large crops of corn and millet.

A number of them have herds of horses, and most of them have plenty of swine. All have more or less ponies, in which they take great pride.

Gradually decreasing.

O-SÁGE, OR WA-SAW-SEE.

[Osages, great and little bands. Laws of United States and Indian Bureau,
June, 1885.]

A tribe in their primitive state, inhabiting the headwaters of the Arkansas and Neosho or Grand Rivers, 700 miles west of the Mississippi. Present number of the tribe [in 1834] 5,200, residing in three villages; wigwams built of barks and flags, or reeds. The Osages are the tallest men on the continent, the most of them being over six feet in stature, and many of them seven. This tribe shave the head, leaving a small tuft on the top, called the "scalp-lock."—G. C.

Mr. Catlin visited the Osages, near Fort Gibson, as above, in 1834, accompanying the First Regiment United States Dragoons, Colonel Henry Dodge, in their tour on the prairies.

29. *Cler-mónt*, ———; first chief of the tribe; with his war-club in his hand and his leggings fringed with scalp-locks taken from his enemies' heads. Painted in 1834.

(Plate No. 150, page 41, vol. 2, Catlin's Eight Years.)

This man is a son of the old and celebrated chief of that name, who died a few years since. Painted in 1834.

30. *Wáh-chee-te*, ———; woman and child; wife of *Cler-mónt*. Painted in 1836.

(Plate No. 151, page 41, vol. 2, Catlin's Eight Years.)

She was richly dressed in costly clothes of civilized manufacture which is almost a solitary instance amongst the Osages.

31. *Tchong-tas-sáb-bee*, the Black Dog; second chief of the Osages; with his pipe in one hand and tomahawk in the other; head shaved, and ornamented with a crest made of the deer's tail, colored red. Painted in 1834.

This is the largest man in the Osage Nation, and blind in his left eye.

(Plate No. 152, page 42, vol. 2, Catlin's Eight Years.)

Among the chiefs of the Osages, and probably the next in authority and respect in the tribe, is *Tchong-tas-sáb-bee* (the Black Dog), Plate No. 152 (No. 31), whom I painted at full length, and with his pipe in one hand and his tomahawk in the other; his head shaved, and ornamented with a beautiful crest of deer's hair, and his body wrapped in a huge Mackinaw blanket. This dignitary, who is blind in the left eye, is one of the most conspicuous characters in all this country, rendered so by his large size (standing in height and girth above all of his tribe), as well as by his extraordinary life. His height, I think, is seven feet, and his limbs full and rather fat, weighing perhaps some 250 or 300 pounds.—1836, George Catlin, page 42, vol. 2, Catlin's Eight Years.

J. M. Stanley visited the Osages in 1843. They were then living adjoining the Cherokees, and about where Mr. Catlin found them in 1834. He painted Black Dog. In his catalogue, Smithsonian Institution, 1852, Part No. 53, on page 42, is the following description of this chief:

Techong-ta-sabá, or *Black Dog* (painted 1843).—Principal chief of the Osages. A man 6 feet 6 inches in height and well proportioned, weighing some 250 pounds, and rather inclined to corpulency. He is blind of one eye. He is celebrated more for his feats in war than as a counselor; his opinions are, however, sought in all matters of importance appertaining to the welfare of his people. The name Black Dog was given to him from a circumstance which happened some years since,

CLER-MONT.

First chief of the Osage, No. 29, page 42.
(Plate 150, Vol. II, Catlin's Eight Years.)

TCHONG-TAS-SÁB-BEE, THE BLACK DOG.
Second chief and largest man of the Osage, No. 31, page 42.
(Plate 152, Vol. II, Catlin's Eight Years.)

MUN-NE-PÚS-KEE, HE WHO IS NOT AFRAID; KO-A-TÚNK-A, THE BIG CROW; NA-CÓM-EE-SHE, MAN OF THE BED.

Osage, Nos. 34, 35, 36, page 43.

(Plates 154-156, Vol. II, Catlin's Eight Years.)

when on a war expedition against the Comanches. He, with his party, were about to surprise their camp on a very dark night, when a black dog, by his continued barking, kept them at bay. After several ineffectual attempts, being repelled by the dog, Techong-ta-saba became exasperated, and fired an arrow at random, hitting him in the head and causing instant death. By this name he is familiarly known to the officers of the Army and white traders in that section of country.

In the latter part of the summer of 1843, a party of fifteen Pawnees went on a trading expedition among the Comanches: having been prosperous in their enterprise, and feeling themselves secure from the attack of enemies. On their route homeward they were induced to barter most of their guns, ammunition, and a few of their horses, of which the Comanches stood much in need. They then took their departure homeward. At the Witchata village they halted for a few days to recruit. An Osage sojourning with the Witchatas, seeing the large amount of skins in the possession of the Pawnees and learning their defenseless situation, immediately mounted his horse, proceeded homeward, and informed Black Dog of the facts. Knowing the trail the Pawnees would take on their route, he immediately started with a war party for the point they were expected to pass on the headwaters of Canadian River, where they lay in wait for them. Several days elapsed, during which time they sent out runners in every direction to give notice of the approach of the Pawnees. They were at last espied, wending their way leisurely along, unconscious of their close proximity to their deadliest enemies, their horses laden with the fruits of months of fatigue and hardship, destined for the white trader in exchange for guns, ammunition, and blankets. The Osages were in active preparation for the attack. They secreted themselves and awaited the approach of the Pawnees, when they suddenly fell upon and massacred the whole party, securing all their peltries, horses, &c. They departed for their towns in savage exultation at the death of their enemies, happy undoubtedly in the belief that they had done their people good service and enriched themselves without toil.—J. M. Stanley, 1843.

32. **Tal-lee**, ————; an Osage warrior of distinction; with his shield, bow, and quiver. Painted 1834.

(Plate No. 153, page 42, vol. 2. Catlin's Eight Years.)

Amongst the many brave and distinguished warriors of the tribe, one of the most noted and respected is **Tál-lee** (plate 153), painted at full length, with his lance in his hand, his shield on his arm, and his bow and quiver slung upon his back.

In this portrait there is a fair specimen of the Osage figure and dress, as well as of the facial outline, and shape and character of the head, and mode of dressing and ornamenting it with helmet crest, and the eagle's quill.—1834, Geo. Catlin, page 42, vol. 2, Catlin's Eight Years.

33. **Wa-ho-béck-ee**, ————; a brave; said to be the handsomest man in the nation; with a profusion of wampum on his neck, and a fan in his hand made of the eagle's tail. (No plate.)

34. **Mun-ne-pús-kee**, He who is not afraid. }
 35. **Ko-a-túnk-a**, the Big Crow. } Group.
 36. **Nah-cóm-ee-shee**, Man of the Bed. }

Three distinguished young warriors, who desired to be painted on one canvas. Painted in 1834.

(See Plates 154, 155, and 156, page 43, vol. 2, Catlin's Eight Years.)

These portraits set forth fairly the modes of dress and ornaments of the young men of the tribe, from the tops of their heads to the soles of their feet. The only dress they wear in warm weather is the breech-cloth, leggings, and moccasins of dressed skins, and garters worn immediately below the knee, ornamented profusely with beads and wampum.

These three distinguished and ambitious young men were of the best families in the Osage Nation; and, as they explained to me, having formed a peculiar attachment to each other, they desired me to paint all on one canvas, in which wish I indulged them.—Geo. Catlin, 1834.

They served as guides for the Dragoon expedition, in 1834, amongst the Comanches and others. Mr. Catlin was with them.

37. *Moi-eén-e-shee*, the Constant Walker. (No plate.) 1834.

38. *Wa-másh-ee-sheek*, He who takes away. }
 39. *Wa-chésh-uk*, War. } Group.
 40. *Mink-chésk*, ———. (No plate.) }

Three distinguished young men, full length. Painted 1836.

41. *Tcha-tó-ga*, Mad Buffalo; bow and quiver on his back.

This man was tried and convicted for the murder of two white men, under Mr. Adams's administration, and was afterwards pardoned, but is held in disgrace in his tribe since, "as one whose life has been forfeited," but, as they say, not worth taking. (No plate, 1836.)

42. *Wash-ím-pe-shee*, the Madman; a distinguished warrior; full length. (No plate.)

43. *Pa-hú-sha*, White Hair; the younger; with lance and quiver. Chief of a band, and rival of *Cler-mónt*. (No plate.) 1834.

44. *Shín-ga-wás-sa*, the Handsome Bird; a splendid-looking fellow, 6 feet 8 inches high; with war club and quiver. (No plate.) 1834.

45. *Cáh-he-ga-shín-ga*, the Little Chief; full length, with bow and quiver. (No plate.) 1834.

MR. CATLIN'S NOTES ON THE OSAGE INDIANS.

The Osages have been formerly, and until quite recently, a powerful and warlike tribe, carrying their arms fearlessly through all of these realms, and ready to cope with foes of any kind that they were liable to meet. At present the case is quite different; they have been repeatedly moved and jostled along from the headwaters of the White River, and even from the shores of the Mississippi, to where they now are; and reduced by every war and every move. The small-pox has taken its share of them at two or three different times; and the Konzas, as they are now called, having been a part of the Osages, and receded from them, impaired their strength, and have at last helped to lessen the number of their warriors, so that their decline has been very rapid, bringing them to the mere handful that now exists of them, though still preserving their valor as warriors, which they are continually showing off as bravely and as professionally as they can with the Pawnees and the Comanches, with whom they are waging incessant war, although they are the principal sufferers in those scenes which they fearlessly persist in, as if they were actually bent on their self-destruction.

The Osage, or (as they call themselves) *Wa-saw-see*, are a tribe of about 5,200 in numbers, inhabiting and hunting over the headwaters of the Arkansas, and Neosho or Grand Rivers. Their present residence is about 700 miles west of the Mississippi River; in three villages, constituted of wigwams, built of barks and flags or reeds. One of these villages is within 40 miles of this fort; another within sixty, and the third about 80 miles. Their chief place of trade is with the sutlers at this post; and there are constantly more or less of them encamped about the garrison.

The Osages may justly be said to be the tallest race of men in North America, either of red or white skins; there being very few indeed of the men, at their full growth,

who are less than 6 feet in stature, and very many of them six and a half, and others seven feet. They are at the same time well proportioned in their limbs, and good-looking; being rather narrow in the shoulders, and, like most all very tall people, a little inclined to stoop; not throwing the chest out and the head and shoulders back quite as much as the Crows and Mandans, and other tribes amongst which I have been familiar. Their movement is graceful and quick; and in war and the chase I think they are equal to any of the tribes about them.

This tribe, though living as they long have, near the borders of the civilized community, have studiously rejected everything of civilized customs; and are uniformly dressed in skins of their own dressing—strictly maintaining their primitive looks and manners, without the slightest appearance of innovations, excepting in the blankets, which have been recently admitted to their use instead of the buffalo robes, which are now getting scarce amongst them.

The Osages are one of the tribes who shave the head, as I have before described when speaking of the Pawnees and Konzas, and they decorate and paint it with great care and some considerable taste. There is a peculiarity in the heads of these people which is very striking to the eye of a traveler, and which I find is produced by artificial means in infancy. Their children, like those of all the other tribes, are carried on a board, and slung upon the mother's back. The infants are lashed to the boards, with their backs upon them, apparently in a very uncomfortable condition; and with the Osages, the head of the child bound down so tight to the board as to force in the occipital bone, and create an unnatural deficiency on the back part, and consequently more than a natural elevation of the top of the head. This custom, they told me, they practiced because "it pressed out a bold and manly appearance in front." This, I think, from observation, to be rather imaginary than real; as I cannot see that they exhibit any extraordinary development in the front; though they evidently show a striking deficiency on the back part, and also an unnatural elevation on the top of the head, which is no doubt, produced by this custom. The difference between this mode and the one practiced by the Flathead Indians beyond the Rocky Mountains consists in this, that the Flatheads press the head *between* two boards; the one pressing the frontal bone down, while the other is pressing the occipital up, producing the most frightful deformity; whilst the Osages merely press the occipital in, and that but to a moderate degree, occasioning but a slight, and in many cases almost immaterial, departure from the symmetry of nature.

These people, like all those tribes who shave the head, cut and slit the ears very much, and suspend from them great quantities of wampum and tinsel ornaments. Their necks are generally ornamented also with a profusion of wampum and beads; and as they live in a warm climate, where there is not so much necessity for warm clothing as amongst the more Northern tribes, of whom I have been heretofore speaking, their shoulders, arms, and chests are generally naked, and painted in a great variety of picturesque ways, with silver bands on the wrists, and oftentimes a profusion of rings on the fingers. They reject whisky and refuse to use it.—1834, George Catlin, pages 40, 41, 42, vol. 2, Catlin's Eight Years.

One admirable trait in their character is, however, worthy of remark, viz, their aversion to ardent spirits. Such is their abhorrence of the "fire-water," as they term it, that they cannot be induced to drink it. This may be thought strange, but it is nevertheless true. It is generally supposed that all Indians are passionately fond of it, those particularly who are brought more immediately into contact with the whites. We note this fact as an exception to the general rule.

They possess a great passion for thieving, which they gratify upon every occasion; and, like the Spartans, they deem it one of the attributes of a great man to pilfer from his neighbor or friend and avoid detection. Any thing placed in their possession they will take the best care of and defend with their lives. When called upon, it will be restored, but the next instant they will steal it, if they can do so without being detected.—J. M. Stanley, 1843.

DAKOTA—OSAGES.

The Osages were placed on the Missouri in 1673, by Marquette, who called them the Wasashe; were allies of the Illinois, and near the last of the past century had been driven down to the Arkansas. Coming in contact with the French, they became their firm allies, and joined them in many of their operations against Spanish and English and other Indians; in 1804, made peace with the Sacs and Foxes, with whom they had been at war, and settled on the Great Osage River. Their numbers were estimated then at 6,300. The usual succession of treaties ceding lands, and wars with neighboring Indians followed, reducing them very much in numbers, until the breaking out of the civil war, when 1,000 of them went south and joined the Confederacy. Treaties of 1865, 1866, and 1870 provided for the conveying of their lands in trust to the United States, and for their removal to the Indian Territory, where they have been placed under the care of the Society of Friends, and are now making rapid progress toward a self-supporting condition. They now number 3,001, of whom 323 are civilized, self-supporting mixed bloods.—W. H. Jackson, 1877.

There were 1,570 Osages at Osage Agency, Indian Territory, June 30, 1884. The agent reported:

The Osages numbered 1,570 in June, 1884, consisting of 1,215 full-bloods and 355 mixed bloods. They are steadily decreasing in numbers, and must continue to do so until they give up their old customs of religion, pleasures, and dress.

August 20, 1885, Agent L. J. Miles reports:

In compliance with office instructions, I have the honor to make my seventh annual report of this agency, situated south of the State of Kansas, west of the 96th principal meridian, and east and south of the Arkansas River, comprising an area of 1,570,196 acres, and occupied by the Osage, Kaw, and part of the Quapaw Indians. The reservation was purchased of the Cherokees by the Osages, as they claim, with the specific understanding that they should have a title to the same in "fee" from the Cherokee Nation. Ten years after the land was purchased and paid for with Osage funds, through which time they were clamoring for a deed, Congress, without the knowledge of the Osages, demanded a deed to Osage lands to be made to the United States, in trust, from the Cherokee Nation, a copy of which was sent to this office. On presenting this to the Osage council they were much disappointed, and asked that the paper be returned, and a request made for a deed such as had been promised them when the land was purchased.

The Osages numbered in June 26, 1885, 1,547, of which 1,170 were full and 377 mixed blood. The full bloods mostly cling to their blanket dress, converse in their native tongue, and are indolent in their habits, the men lounging about their lodges or houses most of the time, allowing the women to do most of the work. The mixed bloods all wear citizen's dress, speak English, and are all to some extent engaged in farming and stock-raising.

With the full-blood Osages farming is a failure, at least with the present generation, as they look upon work as degrading, and to plow and hoe only fit occupations for poor white men who have to work for a living, and they are careful to impress this idea on the minds of their children. They all manage to plant small patches of corn and vegetables, and if their duties as consistent Indians are not too pressing, with the assistance of the stronger and more energetic members of the family (the women) they manage to raise a fair crop, which they dry and otherwise prepare for winter.

They own large numbers of horses and ponies, and also plenty of swine. Steadily decreasing in numbers.

EÉ-SHAH-KÓ-NEE, THE BOW AND QUIVER.
First chief of Comanche, No. 46, page 47.
(Plate 168, Vol. II, Catlin's Eight Years.)

TA-WÁH-QUE-NAH, THE MOUNTAIN OF ROCKS.

(Plate 172, Vol. II, Catlin's Eight Years)

CA-MÁN-CHEES.

[Comanche: Laws of the United States. Comanche and Komantsu: Indian Bureau, June, 1885.]

One of the most powerful and hostile tribes in North America, inhabiting the western parts of Texas and the Mexican provinces and the southwestern part of the territory of the United States, near the Rocky Mountains; entirely wild and predatory in their habits; the most expert and effective lancers and horsemen on the continent; numbering some 25,000 or 30,000; living in skin lodges or wigwams; well mounted on wild horses; continually at war with the Mexicans, Texans, and Indian tribes of the Northwest.

Mr. Catlin visited them in 1834, with Colonel Dodge's First Regiment United States Dragoons. They were then wanderers, hunters, and warriors, with large herds of horses.

46. *E6-shah-k6-nee*, the Bow and Quiver; first chief of the tribe. Boar's tusk on his breast and rich shells in his ears.

(Painted in 1834. Plate No. 168, page 66, vol. 2, Catlin's Eight Years.)

A mild and pleasant-looking gentleman, without anything striking or peculiar in his looks; dressed in a very humble manner, with very few ornaments upon him, and his hair carelessly falling about his face and over his shoulders. * * * The only ornaments to be seen about him were a couple of beautiful shells worn in his ears and a boar's tusk attached to his neck and worn on his breast.

47. *Ta-wáh-que-nah*, the Mountain of Rocks; second chief of the tribe and largest man in the nation.

This man received the United States regiment of dragoons with great kindness at his village, which was beautifully situated at the base of a huge spur of the Rocky Mountains; he has decidedly African features, and a beard of 2 inches in length on his chin.

(Painted in 1834. Plate No. 169, page 67, vol. 2, Catlin's Eight Years.)

48. *Ish-a-r6-yeh*, He who carries a Wolf; a distinguished brave; so called from the circumstance of his carrying a *medicine-bag* made of the skin of a wolf; he holds a whip in his hand.

This man piloted the dragoons to the Camanchee village, and received a handsome rifle from Colonel Dodge for so doing.

(Painted in 1834. Plate No. 170, page 67, vol. 2, Catlin's Eight Years.)

49. *Kots-o-ko-ro-k6*, the Hair of the Bull's Neck; third-grade chief; shield on his arm and gun in his hand.

50. *Is-sa-wáh-tám-ah*, the Wolf tied with Hair; a chief, third rate; pipe in his hand.

(Painted in 1834. Plate No. 171, page 67, vol. 2, Catlin's Eight Years.)

51. *His-oo-sán-chees*, the Little Spaniard; a brave of the highest order in his tribe; armed as a warrior, with shield, bow, and quiver, lance fourteen feet long, and war-knife.

This was the first of the Camanchees who daringly left his own war-party and came to the regiment of dragoons, and spoke with our interpreter, inviting us to go to their village. A man of low stature, but of the most remarkable strength and daring courage. (See him approaching the dragoons on horseback, No. 489.)

(Painted 1834. Plate No. 172, page 68, vol. 2, Catlin's Eight Years.)

He is half Spanish, and being a half-breed, for whom they generally have the most contemptuous feelings, he has been all his life thrown into the front of battle and danger; at which posts he has signalized himself, and commanded the highest admiration and respect of the tribe for his daring and adventurous career. This is the man of whom I have before spoken, who dashed out so boldly from the war-party, and came to us with the white flag raised on the point of his lance, and of whom I have made a sketch in Plate No. 157. I have here represented him as he stood for me, with his shield on his arm, with his quiver slung, and his lance of fourteen feet in length in his right hand. This extraordinary little man, whose figure was light, seemed to be all bone and muscle, and exhibited immense power by the curve of the bones in his legs and his arms. We had many exhibitions of his extraordinary strength, as well as agility; and of his gentlemanly politeness and friendship we had as frequent evidences. As an instance of this, I will recite an occurrence which took place but a few days since, when we were moving our encampment to a more desirable ground on another side of their village. We had a deep and powerful stream to ford, when we had several men who were sick, and obliged to be carried on litters. My friend "Joe" and I came up in the rear of the regiment, where the litters with the sick were passing, and we found this little fellow up to his chin in the muddy water, wading and carrying one end of each litter on his head as they were in turn passed over. After they had all passed, this gallant little fellow beckoned to me to dismount and take a seat on his shoulders, which I declined, preferring to stick to my horse's back, which I did, as he took it by the bridle and conducted it through the shallowest ford. When I was across, I took from my belt a handsome knife and presented it to him, which seemed to please him very much.—Page 68, vol. 2, Catlin's Eight Years.

52. Háh-nee, the Beaver; a warrior of terrible aspect.

53-54. Two Camanchee girls (sisters), showing the wigwam of the chief, his dogs, and his five children.

(Painted 1834. Plate No. 165, page 64, vol. 2, Catlin's Eight Years.)

From what I have already seen of the Camanchees, I am fully convinced that they are a numerous and very powerful tribe, and quite equal in number and prowess to the accounts generally given of them.

It is entirely impossible at present to make a correct estimate of their numbers; but taking their own account of villages they point to in such numbers, south of the banks of the Red River, as well as those that lie farther west, and undoubtedly north of its banks, they must be a very numerous tribe; and I think I am able to say, from estimates that these chiefs have made me, that they number some 30,000 or 40,000—being able to show some 6,000 or 7,000 warriors, well-mounted and well-armed. This estimate I offer not as conclusive, for so little is as yet known of these people that no estimate can be implicitly relied upon other than that which in general terms pronounces them to be a very numerous and warlike tribe.—1834. Pages 68 and 69, vol. 2, Catlin's Eight Years.

MR. CATLIN'S NOTES ON THE COMANCHE INDIANS.

The Camanches are in stature rather low, and in person often approaching to corpulency.

In their movements are heavy and ungraceful, and on their feet one of the most unattractive and slovenly races I have ever seen; but the moment they mount their horses they seem at once metamorphosed, and surprise the spectator with the ease and grace of their movements. A Camanche on his feet is out of his element, and comparatively almost as awkward as a monkey on the ground without a limb or branch to cling to; but the moment he lays his hand upon his horse his face even becomes handsome, and he gracefully flies away, a different being.

FIVE CHILDREN, DOGS, AND WIGWAM OF COMANCHE CHIEF. Nos. 53, 54, page 48.
(Plate 165, Vol. II, Catlin's Eight Years.)

The Camanches are generally a very clumsy and ordinary-looking set of men when on their feet; but being fine horsemen, are equally improved in appearance as soon as they mount upon their horses' backs.

Amongst the women there were many that were exceedingly pretty in feature and in form, and also in expression, though their skins are very dark. The dress of the men * * * amongst the Camanches consists generally in leggings of dressed skins and moccasins, with a flap or breech-clout, made also of dressed skins or furs, and often very beautifully ornamented with shells, &c. Above the waist they seldom wear any drapery, owing to the warmth of the climate, which will rarely justify it; and their heads are generally uncovered with a head dress, like the northern tribes who live in a colder climate and actually require them for comfort.

The women of the Camanches * * * are always decently and comfortably clad, being covered generally with a gown or slip that reaches from the chin quite down to the ankles, made of deer or elk skins, often garnished very prettily and ornamented with long fringes of elk's teeth, which are fastened on them in rows, and more highly valued than any other ornament they can put upon them.—G. C., 1834.

J. M. Stanley, the artist, who was with them in 1844, writes (page 53):

Comanches: A powerful and warlike tribe, divided into twenty different bands. They are migratory in their habits, subsisting upon buffalo and other game, with which their country abounds.

He notes the "Hoesh band" or "Honey Eaters," Ta-wah-wee band, Penetathaka, etc.

SHOSHONE-COMANCHES.

A roving, warlike, and predatory tribe of Shoshone descent, roaming over much of the great prairie country from the Platte to Mexico. Their traditions and early history are vague, but they claim to have come from the west. They call themselves *Naini* (live people), but the Spanish called them Comanches or Camanches (*Les Serpents*), the name adopted by the Americans. Procuring horses from the Spaniards at an early day, they became expert riders, which, united with their daring and aggressiveness, made them noted and feared throughout the southwest. Engaged in long and bloody wars with the Spaniards, but were subdued by them in 1783. Were estimated about that time at 5,000 warriors. In 1816 lost heavily by small-pox. Up to 1847 were variously estimated at from 9,000 to 12,000 in all. Were at one time on a reservation in Texas, but were driven out of the State, and since then have been unrelenting enemies of the people of that State. The general government has set apart a new reservation for them in the western part of the Indian Territory [under treaty of October 21, 1867], and are gradually drawing them all onto it, though not without much trouble. They now [in 1877] number 1,570 in all, and are divided into eight bands. Have made a commencement in farming, and have been induced to send a few of their children to an industrial school.

W. Blackmore, esq., in an article on the North American Indians, thus describes the Comanche:

"These fierce, untamed savages roam over an immense region, eating the raw flesh of the buffalo, drinking its warm blood, and plundering Mexicans, Indians, and whites with judicial impartiality. Arabs and Tartars of the desert, they remove their villages (pitching their lodges in regular streets and squares) hundreds of miles at the shortest notice. The men are short and stout, with bright copper faces and long hair, which they ornament with glass beads and silver gewgaws."—W. H. Jackson, 1877.

PRESENT LOCATION AND CONDITION.

On August 31, 1885, there were 1,544 Comanches at Kiowa, Comanche, and Wichita Agency, Indian Territory, including 165 Penethteka Comanches, gradually decreasing.

The agent in 1884 wrote of them:

The Comanches (of the class called blanket Indians) have, I think, made good progress since they left the plains ten years ago. They have given up many of their savage customs, and adopted many of the ways of civilized life.

August 31, 1885, Agent P. B. Hunt reports:

I suppose it will be admitted that the Kiowas and Comanches have made greater improvement in the last five years than any other tribes of blanket Indians now in charge of the Government. When I assumed charge in 1878 they had been but a few years on the reservation and under civilizing influences. Indeed, one of these years, that of 1874, they had spent at war with the whites, and about one-half of each of the others was passed out on the plains hunting and dancing, and few of them had abandoned any of their savage customs or were endeavoring to subsist themselves by tilling the soil. Much of their time was spent in counciling, and almost weekly powwows were held with the agent in the council-room in the agency building. Some few of the Comanches had fields situated about 15 miles from the agency, but those of the Kiowas who had commenced to till the soil all worked their patches in one field, a Government field, which was situated about 3 miles from the agency. The tribes each camped in one body, and the camping place of the Kiowas was at a point about 12 miles from the agency and 15 from the field. My first effort was to break up their large camps and get them to open individual fields. Many of the chiefs, with their bands, moved off the first year and worked the fields I had plowed for them, but in the second year there was a general movement by the heads of families in selecting locations for their fields and making rails with which to inclose them. I required in all cases that an eight-rail fence should inclose the field before I would have the sod broken. This segregation continued, until to-day there are about 150 fields scattered over the reservation. They are, for Indians, reasonably well cultivated, * * * So it will be seen that the village custom of these tribes is broken up, and that they have settled down as farmers.

A series of illustrations of Comanche life and games will be found in several of the pictures within, Nos. 310 to 607 herein.

PAW-NEE PICTS (TOW-EE-AHGE).

[Pawnee: Laws of the United States. Pâni: Indian Bureau. See Wacoe and Witchita, called Pawnee Picts. Note at bottom, June, 1885, of page —.]

A wild and hostile tribe, numbering about 6,000, adjoining the Camanchees on the north. This tribe and the Camanchees are in league with each other, joining in war and in the chase.

55. Wee-tá-ra-shá-ro, ———; head chief; an old and very venerable man, 90 years of age.

This man embraced Colonel Dodge and others of the dragoon officers in council, in his village, and otherwise treated them with great kindness, theirs being the first visit ever made to them by white people.

(Painted at Camanchee village in 1834. Plate No. 174, page 73, vol. 2, Catlin's Eight Years.)

56. Sky-se-ró-ka, ———; second chief of the tribe.

A fine-looking and remarkably shrewd and intelligent man.

(Painted in 1834, as above. Plate No. 175, page 73, vol. 2, Catlin's Eight Years.)

57. Kid-á-day, ———; a brave of distinction. (No plate, 1834.)

WEE-TÁ-RA-SHÁ-RO.

Head chief Pawnee Pict. No. 53, page 50.
(Plate 174, Vol. II, Catlin's Eight Years.)

TÉETÓOT-SAH.

First chief of the Kiowas. No. 62, page 51.
(Plate 178, Vol. II, Catlin's Eight Years.)

KOTZ-A-TÓ-AH, THE SMOKED SHIELD.
Kiowa, No. 63, page 51.
(Plate 182, Vol. II, Catlin's Eight Years.)

58. Káh-kée-tsee, the Thighs. }
 59. Shé-de-ah, Wild Sage. }

Both of these women were prisoners among the Osages; they were purchased by the Indian Commissioner, Rev. Mr. Schemmerhorn, and sent home to the nation by the dragoons.

(Plates Nos. 176 and 177, page 74, vol. 2, Catlin's Eight Years.)

Amongst the women of this tribe there were many that were exceedingly pretty in feature and in form, and also in expression, though their skins are very dark. The women * * * are always decently and comfortably clad, being covered generally with a gown or slip that reaches from the chin quite down to the ankles, made of deer or elk skins, often garnished very prettily and ornamented with long fringes of elk's teeth, which are fastened on them in rows, and more highly valued than any other ornament they can put upon them.—Geo. Catlin, pages 73, 74, vol. 2, Catlin's Eight Years.

60. Ah-sho-cole, Rotten Foot; a noted warrior. 1834. (No plate.)

61. Ah-re-kañ-na-có-chee, the Mad Elk; a great warrior. 1834. (No plate.)

Jackson says, in 1877:

There are also living on the Washita a small band of affiliated Wacos and Wichitas, sometimes called Pawnee Picts, who are undoubtedly an offshoot of the Grand Pawnees.

PRESENT LOCATION AND CONDITION.

At Kiowa, Comanche, and Wichita Agency, Indian Territory, August 31, 1885: Wacos, 39; Wichitas, 199; slowly decreasing.

Agent Hunt writes, August 31, 1885:

The Wichitas have kept up a steady improvement since I have had charge of them, and I venture the assertion that they are the best Indian farmers in the Territory today.

KÍ-O-WA.

[Kiowa: Laws of United States. Kiowa: Indian Bureau, June, 1885.]

Also a wild and predatory tribe of 5,000 or 6,000, living on the west of the Pawnee Picts and Camanchees, and also in alliance with those warlike and powerful tribes. They inhabit the base of, and extend their wars and hunts through, a great extent of the Rocky Mountains; and, like the Camanchees, are expert and wonderful horsemen, roaming the entire country on the headwaters of the Red River, into and through the southern part of the Rocky Mountains.

Mr. Catlin saw them in July and August of 1834, on Dodge's campaign.

62. Téh-tóot-sah, ———, first chief.

This man treated the dragoons with great kindness in his country, and came in with us to Fort Gibson; his hair was very long, extending down as low as his knees, and put up in clubs, and ornamented with silver brooches. The manner of dressing his hair is peculiar.

(Painted 1836. Plate No. 178, page 74, vol. 2, Catlin's Eight Years.)

63. Kotz-a-tó-ah, the Smoked Shield; a distinguished warrior; full-length.

Another of the extraordinary men of this tribe, near seven feet in stature, and distinguished, not only as one of the greatest warriors, but the swiftest on foot in the nation. This man, it is said, runs down a buffalo on foot and slays it with his knife or his lance as he runs by its side.

(Painted 1834. Plate No. 182, page 75, vol. 2, Catlin's Eight Years.)

64. Bón-són-gee, New Fire; chief of a band; boar's tusk and war-whistle on his breast.

(Painted 1834. Plate No. 179, page 74, vol. 2, Catlin's Eight Years.)

65. Quáy-hám-kay, the Stone Shell; a brave, and a good specimen of the wild untutored savage.

(Painted 1834. Plate No. 180, page 75, vol. 2, Catlin's Eight Years.)

66. Túnk-aht-óh-ye, the Thunderer (boy).

67. Wun-pán-to-mee, the White Weasel (girl).

This boy and girl, who had been for several years prisoners amongst the Osages, were purchased by the Indian Commissioner; the girl was sent home to her nation by the dragoons, and the boy was killed by a ram the day before we started. They were brother and sister.

(Painted 1834. Plate No. 181, page 75, vol. 2, Catlin's Eight Years.)

In plate 181, Wun-pan-to-mee (the white weasel), a girl (No. 67), and Tunk-aht-oh-ye (the thunderer), a boy (No. 66), who are brother and sister, are two Kioways who were purchased from the Osages, to be taken to their tribe by the dragoons. The girl was taken the whole distance with us, on horseback, to the Pawnee village, and there delivered to her friends, as I have before mentioned; and the fine little boy was killed at the fur trader's house on the banks of the Verdigris, near Fort Gibson, the day after I painted his portrait, and only a few days before he was to have started with us on the march. He was a beautiful boy of nine or ten years of age, and was killed by a ram, which struck him in the abdomen, and knocking him against a fence, killed him instantly.—1836. Page 75, Catlin's Eight Years.

MR. CATLIN'S NOTES ON THE KIOWA INDIANS.

The Kioways (Kiowa?) are a much finer looking race of men than either the Comanches (Comanche?) or Pawnees; are tall and erect, with an easy and graceful gait; with long hair, cultivated oftentimes so as to reach nearly to the ground. They have generally the fine and Roman outline of head that is so frequently found at the North, and decidedly distinct from that of the Camanches (Comanche?) and Pawnee Picts. These men speak a language distinct from both of the others; in fact, the Camanches (Comanche?) and Pawnee Picts, and Kioways and Wicos (Weecos) are all so distinctly different in their languages as to appear in that respect as total strangers to each other.—*Ibid.*, page 79.

I have several times, in former parts of this [vol. 2, Catlin's Eight Years] work, spoken of the great number of different Indian languages which I have visited, and given my opinion as to the dissimilarity and distinctness of their character. And would refer the reader for further information on this subject, as well as for vocabulary of several languages, to the Appendix to vol. 2, Catlin's Eight Years, Letter B.

SHOSHONE-KIOWAS.

The Kiowas, or prairie men, are one of the tribes that compose the Shoshone family. They are a wild and roving people, occupying the country about the headwaters of the Arkansas, but also formerly ranging over all of the country between the Platte and the Rio Grande. They had the reputation of being the most rapacious, cruel, and treacherous of all the Indians on the plains, and had a great deal of influence over the Comanches and other neighboring Indians. Our first knowledge of them was through Lewis and Clarke, who found them on the Paducah. They were at war with many of the northern tribes, but carried on a large trade in horses with some other tribes. Little intercourse was had with them until 1853, when they made a treaty and agreed to go on a reservation, but soon broke it and went raiding into Texas. The citi-

zens of that State drove them out, but in revenge for the stoppage of their annuities they retaliated upon the Texans, and until recently the warfare was kept up between them. In 1869, were placed on a reservation in Indian Territory of over three and a half millions of acres with some Comanches and Apaches, but were restive and unsettled. In 1871, under their great chief Satanta, raided Texas again, but it resulted in the capture of himself and Big Tree, and their imprisonment soon after. Were afterwards pardoned by the governor of Texas, in whose custody they were, through interposition from Washington, and restored to their tribe; but this did not seem to lessen their hostility, and new disturbances arose, chiefly in consequence of raiding parties of whites from Texas, that led finally to the rearrest of Satanta and his imprisonment in Texas.—W. H. Jackson, 1877.

PRESENT LOCATION AND CONDITION.

On June 30, 1885, there were 1,152 Kiowas at Kiowa, Comanche, and Wichita Agency; Indian Territory. They have been on their reservation ten years, but are yet called blanket Indians. They are making good progress towards civilization. The agent so reports.

WEE-CO.

[Waco: Laws of the United States. Waco and Wako: Indian Bureau, June, 1885.]

A small tribe, living near to and under the protection of the Pawnee Picts, speaking an unknown language; probably the remnant of a tribe conquered and enslaved by the Pawnee Picts. [Mr. Catlin saw them in 1834.]

68. U'sh-ee-kitz, He who fights with a Feather; chief of the tribe.

This man came into Fort Gibson with the dragoons; he was famous for a custom he observed after all his speeches, of *embracing* the officers and chiefs in council. (Painted 1834. Plate No. 183, page 75, vol. 2, Catlin's Eight Years.)

His embrace at the end of his speeches was by taking all of his friends and foes, each one in his turn, closely and affectionately in his arms, with his left cheek against theirs, and thus holding them tightly for several minutes.—*Ibid.*, page 75.

PRESENT LOCATION AND CONDITION.

On June 30, 1885, there were 40 Wacoos at the Kiowa, Comanche, and Wichita Agency. They cultivate the soil, live in houses, and dress in citizen's clothes.

SIoux (DAH-CO-TA).

[Sioux: Laws of the United States. Sioux-Dakota: Indian Bureau.]

For the names of the several existing tribes of the Sioux or Dakota, 1885, see data at end of this title.

This is one of the most numerous and powerful tribes at present existing on the continent, numbering, undoubtedly, some 40,000, occupying a vast tract of country on the upper waters of the Mississippi and Missouri Rivers, and extending quite to the base of the Rocky Mountains. They live in skin lodges, and move them about the prairies, without any permanent residence. This tribe lost about 8,000 by small-pox a few years since.

This note was written after his first visit to the Sioux. He made a second to them in 1835, on the Upper Mississippi.

69. *Ha-wón-je-tah*, the One Horn; first Chief of the tribe; *Mee-ne-cow-e-gee* band, Upper Missouri; hair tied on his head in form of a turban, and filled with glue and red earth, or vermilion.

The Sioux have forty-one bands; every band has a chief, and this man was head of all; he has been recently killed by a buffalo-bull.

(Plate No. 86, pages 209, 210, vol. 1, Catlin's Eight Years.)

Painted at Fort Pierre, on the Missouri River, in 1832, after Mr. Catlin had visited the Mandans.

He told me that he took the name of One Horn (or Shell) from a simple small shell that was hanging on his neck, which descended to him from his father, and which he said he valued more than anything he possessed. His costume was made of elk-skins, beautifully dressed, and fringed with a profusion of porcupine quills and scalp locks; and his hair, which is very long and profuse, divided into two parts, and lifted up and crossed over the top of his head, with a simple tie, giving it somewhat the appearance of a Turkish turban.

* * * * *

In the chase he was foremost. He could run down a buffalo, which he often had done on his own legs, and drive his arrow to the heart. He was the fleetest in the tribe, and in the races he had run he had always taken the prize. It was proverbial in his tribe that *Ha-won-je-tah's* bow never was drawn in vain, and his wigwam was abundantly furnished with scalps that he had taken from his enemies' heads in battle.—*Ibid.*, page 211.

In the spring of 1835 Mr. Catlin made a journey to Fort Snelling and the Falls of Saint Anthony. Sketches of scenery painted on this journey along the Mississippi River will be found in the miscellaneous collection, from Nos. 311 to 611, herein.

70. *Wá-nah-de-túnk-ah*, the Big Eagle, or Black Dog; at the Falls of Saint Anthony. Chief of the *O-hah-kas-ka-toh-y-an-te*, or *Long Avenue* band.

(Painted in 1835. Plate No. 234, page 134, vol. 2, Catlin's Eight Years.)

71. *Tchán-dee*, Tobacco; second chief of the nation of the *O-gla-la* (Ogalalla, see note) band, Upper Missouri.

(Painted in 1835. Plate 92, page 222, vol. 1, Catlin's Eight Years.)

72. *Wán-ee-ton*, ———; chief of the *Sus-se-ton* (Sisseton ? see note) band, Upper Missouri; full-length, in a splendid dress; head-dress of war-eagles' quills and ermine, and painted robe.

One of the most noted and dignified, as well as graceful chiefs of the Sioux tribe. 1835. (No plate.)

Wanata, called the grand chief. * * * His dress exhibits an air of state and dignity which is often assumed by the aboriginal chiefs. * * * It consists of a long robe of the skin of the buffalo, skillfully prepared by the Indian women. * * * Figures are traced upon this material with paint, or worked into it with splinters of the quills of the porcupine, dyed with the most gaudy colors. The plumage of the bird is tastefully interwoven. * * *

Mr. Keating, in his narrative of the expedition to the source of the Saint Peter's, describes an interview with this chief, and gives an account of his person and apparel. * * *

He was dressed in the full habit of an Indian chief. We have never seen a more dignified person, or a more becoming dress. The most prominent part of his apparel was a splendid cloak or mantle of buffalo skin, dressed so as to be of a fine white color; it was decorated with small tufts of owl's feathers and others of various hues, probably a remnant of a fabric once in general use among the aborigines of our territory and still worn in the northeast and northwest parts of this continent as

WI-LÓOH-TAH-EEH-TCHÁH-TA-MÁH-NEE, THE
RED THING THAT TOUCHES IN MARCHING.
Sioux, No. 81, page 56.
(Plate 95, Vol. I, Catlin's Eight Years.)

HA-WÓN-JE-TAH, THE ONE HORN.
First chief of the tribe. Sioux, No. 69, page 54.
(Plate 86, Vol. I, Catlin's Eight Years.)

well as in the South Sea Islands. It is what was called by the first European visitors of North America the feather mantle and feather blanket. * * * A splendid necklace, formed of about sixty claws of the grizzly bear, imparted a manly character to his whole appearance. His leggins, jacket, and moccasins were in the real Dakota fashion, being made of white skins, profusely decorated with human hair! His moccasins were variegated with the plumage of several birds.

In his hair he wore nine sticks, neatly cut and smoothed, and painted with vermilion. These designated the number of gunshot wounds which he had received. They were secured by a strip of red cloth. Two plaited tresses of his hair were allowed to hang forward. His face was tastefully painted with vermilion. In his hand he bore a large fan of the feathers of the turkey. This he frequently used.

Wanata in 1812 joined the British and fought, under Colonel Dixon, at Sandusky, against the United States.

In illustration of the superstition as well as the fortitude of the Indian character "Wanata, in 1822, on the eve of a journey amongst the Chippewas, made a vow to the sun that if he should return safely he would abstain from food and drink for four days and nights, and would distribute among his people all his property of every description. Returning without accident, his first care was to celebrate the dance of the sun. * * * Deep incisions were made in the breast and arms, so as to separate the skin from the flesh, in the form of loops, through which a rope was passed, and the ends fastened to a tall vertical pole, erected for the purpose in front of his lodge. He began the horrid exercise at the commencement of his fast and continued it throughout the four days, sometimes dancing, and frequently throwing his whole weight upon the cord which was passed through his skin, and swinging to and fro in this painful position. At the conclusion he sunk exhausted, and was relieved by his friends. After the ceremony was over he distributed among his people all his property, consisting of his lodges, dogs, guns, trinkets, robes, and several fine horses; and he and his two wives, abandoning their tent with its furniture, took up their lodging in the open air."

At 45 years of age he was described as "a tall and finely formed man, more than six feet in height. His manners are dignified and reserved, and his attitudes, though studied, are graceful. He commands more influence (in 1838) than any other Indian chief on the continent. His rule over his own tribe is absolute. He has no rival or compeer. He resorts neither to presents nor to persuasion to secure obedience, but issues his peremptory mandates, which are never disputed."

The traders speak of him as one who may be trusted, because it is policy to be at peace with the whites; but they place no confidence in his friendship and have little faith in his integrity. Brave, skillful, and sagacious, he is grasping, artful, and overbearing. It is safer to secure his interest than to trust to his generosity or mercy. Along the upper Missouri he was supreme. After the Ricaree villages were burned in 1823 by Colonel Leavenworth, Wanata took up the scepter of ruler and reigned over the Ricarees and Mandans for years. His village was between the Ricaree and Mandan villages. He died, it is supposed, in 1848.—McKenney & Hall, vol. 1, pages 110 to 112.

73. *Tóh-to-wah-kón-da-pee*, the Blue Medicine, a noted "medicine-man," or doctor, at the Saint Peter's, of the *Ting-ta-to-ah* band, with his *medicine* or mystery drum and rattle in his hands, his looking-glass on his breast, his rattle of antelope's hoofs, and drum of deer-skins.

These "*medicine-men*" are conjurers as well as physicians, paying their dernier visits to the sick with their *mysteries*, endeavoring and pretending to cure by a charm. (Painted 1835. Plate No. 233, page 134, vol. 2, Catlin's Eight Years.)

{ 74. *Ah-nó-je-nahge*, He who stands on both Sides; and

{ 75. *We-chúsh-ta-dóo-ta*, the Red Man, the two most distinguished ball-players of the Sioux tribe, in their ball-play dress, with their ball-sticks in their hands.

In this beautiful and favorite game each player is adorned with an embroidered belt and a tail of beautiful quills or horse-hair; the arms, legs, and feet are always naked and curiously painted. (See two paintings of ball-plays, and further description of the game, under *Amusements*, Nos. 428, 429, 430, and the ball-sticks among the manufactures.)

(Painted in 1835. See Plates Nos. 235, 236, page 134, vol. 2, Catlin's Eight Years.)

76. **Ka-pés-ka-da**, the Shell, a brave of the *O-gla-la* band. (No plate.)
77. **Táh-zee-keh-dá-cha**, the Torn Belly, a very distinguished brave of the *Yank-ton* band, Upper Missouri. (No plate.)
78. **Wúk-mi-ser**, Corn, a warrior of distinction of the *Ne-caw-ee-gee* band. (No plate.)
79. **Chá-tee-wah-née-che**, No Heart; a very noted Indian; chief of the *Wah-ne-watch-to-nee-nah* band. (No plate.)
80. **Ee-áh-sá-pa**, the Black Rock; chief of the *Nec-caw-ee-gee* band. A very dignified chief, in a beautiful dress, full length, head-dress of eagles' quills and ermine, and horns of the buffalo; lance in his hand, and battles of his life emblazoned on his robe.
- Six feet or more in stature. (Painted 1835, plate No. 91, page 222, vol. 1, Catlin's Eight Years.)

81. **Wi-lóh-tah-eeh-tcháh-ta-máh-nee**, the Red Thing that touches in Marching; a young girl, and the daughter of *Black Rock* (No. 80) by her side; her dress of deer-skin, and ornamented with brass buttons and beads.
- (Plate 95, page 223, vol. 1, Catlin's Eight Years.)

Much esteemed for her beauty and modesty. Her hair was plaited. Her ears supported a great profusion of curious beads, and over her other dress she wore a handsomely garnished buffalo robe.—*Ibid*.

Several years after I left the Sioux country, I saw Messrs. Chardon and Piquot, two of the traders from that country, who recently had left it, and told me in Saint Louis, whilst looking at the portrait of this girl (No. 81), that while staying in Mr. Laidlaw's fort in 1840, the chief Black Rock (Ee-áh-sá-pa, No. 80), entered the room suddenly where the portrait of his daughter was hanging on the wall, and pointing to it with a heavy heart, told Mr. Laidlaw that whilst his band was out on the prairies, where they had been for several months "making meat," his daughter had died, and was there buried. "My heart is glad again," said he, "when I see her here alive; and I want the one the medicine-man made of her, which is now before me, that I can see her and talk to her. My band are all in mourning for her, and at the gate of your fort, which I have just passed, are ten horses for you, and Ee-áh-sá-pa's wigwam, which, you know, is the best one in the Sioux nation. I wish you to take down my daughter and give her to me." Mr. Laidlaw, seeing the unusually liberal price that this nobleman was willing to pay for a portrait, and the true grief that he expressed for the loss of his child, had not the heart to abuse such noble feeling, and taking the painting from the wall, placed it in his hands, telling him that it of right belonged to him, and that his horses and wigwam he must take back and keep them to mend, as far as possible, his liberal heart, which was broken by the loss of his only daughter.—Page 224, vol. 1, Catlin's Eight Years.

82. **Toh-kí-e-to**, the Stone with Horns; chief of the *Yank-ton* (see note) band, and principal orator of the nation; his body curiously tattooed.

(Painted 1832. Plate No. 93, page 222, vol. 1, Catlin's Eight Years.)

The neck and breast and shoulders of this man were curiously tattooed, by pricking in gunpowder and vermilion, which, in this extraordinary instance, was put on

EE-ÁH-SÁ-PA, THE BLACK ROCK.
Chief of a Sioux band. No. 80, page 56.
(Plate 91, Vol. I, Catlin's Eight Years)

MAH-TO-CHE-GA, THE LITTLE BEAR.

BROTHER OF MAH-TO-CHE-GA.

SHON-KA, THE DOG.

Sioux, Nos. 84, 85, page 57.
(Plate 274, Vol. II, Catlin's Eight Years.)

in such elaborate profusion as to appear at a little distance like a beautifully embroidered dress. In his hand he held a handsome pipe, the stem of which was several feet long, and all the way wound with ornamented braids of the porcupine quills; around his body was wrapped a (see plate) valued robe, made of the skin of the grizzly bear, and on his neck several strings of *wampum*, an ornament seldom seen amongst the Indians in the far West and the North.

I was much amused with the excessive vanity and egotism of this notorious man, who, whilst sitting for his picture, took occasion to have the interpreter constantly explaining to me the wonderful effects which his oratory had at different times produced on the minds of the chiefs and people of his tribe. He told me that it was a very easy thing for him to set all the women of the tribe crying, and that all the chiefs listened profoundly to his voice before they went to war, and at last summed up by saying that he was "the greatest orator in the Sioux Nation," by which he undoubtedly meant the greatest in the world!

83. *Mah-tó-rah-rísh-nee-eéh-ée-rah*, the Grisly Bear that runs without Regard; a brave of the *Onc-pah-pa* band. 1832. (No plate.)

84. *Mah-tó-che-ga*, the Little Bear; a distinguished brave. *Onc-capapa*. (See note.)

(Painted 1832. Plate No. 273, page 190, vol. 2, Catlin's Eight Years.)

85. *Shon-ka*, the Dog; chief of the *Ca-za-zhee-ta*: *Bad Arrow Points* band.

(Painted 1832. Plate No. 275, page 190, vol. 2, Catlin's Eight Years.)

86. *Táh-téck-a-da-háir*, the Steep Wind; a Brave of the *Ca-za-zhee-ta* (or *Bad Arrow Points*) band. 1822.

These three distinguished men (No. 84, 85, and 86) were all killed in a private quarrel (while I was in the country), occasioned by my painting only *one-half* of the face of the first (No. 84); ridicule followed, and resort to fire-arms, in which that side of the face which I had left out was blown off in a few moments after I had finished the portrait; and sudden and violent revenge for the offense soon laid the other two in the dust, and imminently endangered my own life. (For a full account of this strange transaction, see Catlin's Letters and Notes on North American Indians, pages 90, 91, 189, vol. 2.)

87. *Héh-háh-ra-pah*, the Elk's Head; chief of the *Ee-ta-sip-shov* band, Upper Missouri. Painted 1832. (No plate.)

88. *Máh-to-een-náh-pa*, the White Bear that goes out; chief of the *Blackfoot Sioux* band. Painted 1832. (No plate.)

89. *Tchón-su-móns-ka*, the Sand Bar; woman of the *Te-ton* band, with a beautiful head of hair; her dress almost literally covered with brass buttons, which are highly valued by the women to adorn their dresses. Painted 1832. (Plate No. 94, page 223, vol. 1, Catlin's Eight Years.)

Wife of a white man named Chardon, a Frenchman in the employ of the American Fur Company as a trader and interpreter. Very richly dressed. Her hair, which was inimitably beautiful and soft and glossy as silk, fell over her shoulders in great profusion and in beautiful waves, produced by the condition in which it is generally kept in braids giving to it, when combed out, a waving form, adding much to its native appearance, which is invariably straight and graceless.—*Ibid.*

90. *Wá-be-shaw*, the Leaf; Upper Mississippi; chief of a band; blind in one eye; a very distinguished man; since dead.

(Painted 1835. See page 132, vol. 2, Catlin's Eight Years.)

"*Wá-a-pa-shaw*," head chief of the Keoxa tribe of the Dacotah Nation. (Relation-

ship overlooked. ?) [His portrait and biography can be found on pages 53 to 55, vol. 1, McKenny & Hall.]

During the war of 1812, the British took possession of and abandoned Prairie Du Chien. It was a small village occupied by French Canadians. After the British left it the Winnebago Indians living adjacent to the post or town evinced a disposition to quarrel and plunder the town. The inhabitants, defenseless and alarmed, sent a messenger to Wá-be-shaw and claimed his protection. He was found with his band on the opposite side of the Mississippi River and a few miles above Prairie du Chien. He came down at once accompanied by one Indian and called a council for the next day with the Winnebagoes. At the council Wá-be-shaw arose, and looking at the Winnebagoes sitting silently around him, he pulled a hair from his head and held it up before them: "Winnebagoes, do you see this hair? Look at it. You threaten to massacre the white people at the Prairie. They are your friends and mine. You wish to drink their blood. Is that your purpose? Dare to lay a finger upon one of them and I will blow you from the face of the earth, as I blow," suiting the action to the word, "blow this hair with my breath where none can find it." The council broke up at once, and the Winnebagoes departed, leaving the settlers unmolested.

They knew their danger—Wá-be-shaw's words were meant.

(Condensed from M'Kenney & Hall, vol. 1, pages 54, 55.)

91. *Shón-ga-tón-ga-chésh-en-day*, the Horse-dung; chief of a band; a great conjurer and magician. 1832. (No plate.)

92. *Tah-tón-ga-mó-nee*, the Walking Buffalo; Red Wing's son. 1832. No plate.

93. *Múz-za*, the Iron; Saint Peters; a brave of distinction, and a very handsome fellow. 1832. (No plate.)

94. *Te-o-kún-ko*, the Swift. 1832. (No plate.)

An ill-visaged and ill-natured fellow, though reputed a desperate warrior.

MR. CATLIN'S NOTES ON THE SIOUX INDIANS.

Mr. Catlin's works abound with invaluable descriptions of the Sioux Indians at and about Fort Pierre.

I am now in the heart of the country belonging to the numerous tribe of Sioux or Dahcotas, and have Indian faces and Indian customs in abundance around me. This tribe is one of the most numerous in North America, and also one of the most vigorous and warlike tribes to be found, numbering some forty or fifty thousand, and able undoubtedly to muster, if the tribe could be moved simultaneously, at least eight or ten thousand warriors, well mounted and well armed. This tribe take vast numbers of the wild horses on the plains towards the Rocky Mountains, and many of them have been supplied with guns; but the greater part of them hunt with their bows and arrows and long lances, killing their game from their horses' backs while at full speed.

The name Sioux (pronounced *see-oo*), by which they are familiarly called, is one that has been given to them by the French traders, the meaning of which I never have learned; their own name being, in their language, Dah-co-ta. The personal appearance of these people is very fine and prepossessing, their persons tall and straight, and their movements elastic and graceful. Their stature is considerably above that of the Mandans and Riccarees, or Blackfeet; but about equal to that of the Crows, Assiniboins, and Minatarees, furnishing at least one-half of their warriors of 6 feet or more in height.

The great family of Sioux, who occupy so vast a tract of country, extending from the banks of the Mississippi River to the base of the Rocky Mountains, are everywhere a migratory or roaming tribe, divided into forty-two bands or families, each having a chief, who all acknowledge a superior or head chief, to whom they all are

held subordinate. This subordination, however, I should rather record as their *former* and *native* regulation, of which there exists no doubt, than an *existing* one, since the numerous innovations made amongst these people by the fur traders, as well as by the proximity of civilization along a great deal of their frontier, which soon upset and change many native regulations, and particularly those relating to their government and religion.

There is one principal and familiar division of this tribe into what are called the *Mississippi* and *Missouri* Sioux. Those bordering on the banks of the Mississippi, concentrating at Prairie du Chien and Fort Snelling, for the purposes of trade, &c., are called the Mississippi Sioux. These are somewhat advanced towards civilization, and familiar with white people, with whom they have held intercourse for many years, and are consequently excessive whisky drinkers, though constituting but a meager proportion, and at the same time, but a very unfair and imperfect sample of the great mass of this tribe who inhabit the shores of the Missouri, and fearlessly roam on the vast plains intervening between it and the Rocky Mountains, and are still living entirely in their primitive condition.

There is no tribe on the Continent, perhaps, of finer looking men than the Sioux; and few tribes who are better and more comfortably clad, and supplied with the necessities of life. There are no parts of the great plains of America which are more abundantly stocked with buffalos and wild horses, nor any people more bold in destroying the one for food and appropriating the other for their use. There has gone abroad, from the many histories which have been written of these people, an opinion which is too current in the world, that the Indian is necessarily a poor, drunken, murderous wretch; which account is certainly unjust as regards the savage, and doing less than justice to the world for whom such histories have been prepared. I have traveled several years already amongst these people, and I have not had my scalp taken, nor a blow struck me; nor had occasion to raise my hand against an Indian; nor has my property been stolen, as yet to my knowledge, to the value of a shilling; and that in a country where no man is punishable by law for the crime of stealing; still some of them steal, and murder too; and if white men did not do the same, and that in defiance of the laws of God and man, I might take satisfaction in stigmatizing the Indian character as thievish and murderous. That the Indians in their *native state* are "*drunken*," is false; for they are the only temperance people, literally speaking, that ever I saw in my travels, or ever expect to see. If the civilized world are startled at this, it is the *fact* that they must battle with, not with me; for these people manufacture no spirituous liquor themselves, and know nothing of it until it is brought into their country and tendered to them by Christians. That these people are "*naked*" is equally untrue, and as easily disproved; for I am sure that with the paintings I have made amongst the Mandans and Crows, and other tribes, and with their beautiful costumes which I have procured and shall bring home, I shall be able to establish the fact that many of these people dress, not only with clothes comfortable for any latitude, but that they also dress with some considerable taste and elegance. Nor am I quite sure that they are entitled to the name of "*poor*," who live in a boundless country of green fields, with good horses to ride; where they are all joint tenants of the soil, together; where the Great Spirit has supplied them with an abundance of food to eat—where they are all indulging in the pleasures and amusements of a lifetime of idleness and ease, with no business hours to attend to, or professions to learn—where they have no notes in bank or other debts to pay—no taxes, no tithes, no rents, nor beggars to touch and tax the sympathy of their souls at every step they go.—Mr. Catlin, 1832. Pages 208–210, vol. 1, Eight Years.

It is not improbable that some of the Sioux painted by Mr. Catlin from 1832 to 1834 were photographed and are in the Photographic Catalogue of Professor Hayden, Mis. Pub. No. 9, United States Geological Sur-

vey of the Territories, which contains more than 200 Sioux photographs, the negatives of which are now in the possession of Maj. J. W. Powell, United States geologist. These are in succession to Mr. Catlin's portraits.

From the Falls of Saint Anthony, Minnesota, in 1835, Mr. Catlin writes:

The Sioux who live in the vicinity of the Falls, and occupy all the country about here, west of the Mississippi, are a part of the great tribe on the Upper Missouri, and the same in most of their customs, yet very dissimilar in personal appearance, from the changes which civilized examples have wrought upon them. I mentioned in a former letter, that the country of the Sioux extended from the base of the Rocky Mountains to the banks of the Mississippi; and for the whole of that way, it is more or less settled by this immense tribe, bounding the east side of their country by the Mississippi River.

The Sioux in these parts, who are out of reach of the beavers and buffaloes, are poor and very meanly clad, compared to those on the Missouri, where they are in the midst of those and other wild animals, whose skins supply them with picturesque and comfortable dresses. The same deterioration also is seen in the morals and constitutions of these, as amongst all other Indians, who live along the frontiers, in the vicinity of our settlements, where whisky is sold to them, and the small-pox and other diseases are introduced to shorten their lives.

The principal bands of the Sioux that visit this place, and who live in the vicinity of it, are those known as the Black Dog's band—Red Wing's band, and Wa-be-sha's band; each band known in common parlance, by the name of its chief, as I have mentioned. The Black Dog's band reside but a few miles above Fort Snelling, on the banks of the Saint Peter's, and number some five or six hundred. The Red Wing's band are at the head of Lake Pepin, sixty miles below this place, on the west side of the river. And Wa-be-sha's band and village are some sixty or more miles below Lake Pepin, on the west side of the river, on a beautiful prairie, known (and ever will be) by the name of "Wa-be-sha's prairie." Each of these bands, and several others that live in this section of country, exhibit considerable industry in their agricultural pursuits, raising very handsome corn-fields, laying up their food, thus procured, for their subsistence during the long and tedious winters.—G. C., 1835.

DAKOTAS.

A large family of North American Indians, embracing the Assinaboins or Stone Sioux, the Dakotas proper, or, as they are called by the Algonkins, Nadowesioux, from which is derived the word Sioux; Omahas, Otoes, Osages, Poncas, Iowas, Kansas, Missourias, Minatarees, and Crows. Until quite recently they occupied the larger portion of the country bounded on the east by the great lakes, on the north by the British Possessions, on the west by the Rocky Mountains, and on the south by the Platte River. According to their traditions they came eastward from the Pacific, and encountered the Algonkins about the headwaters of the Mississippi, where the mass of them were held in check. One of the tribes of this great family, called by the Chippewas Winnebagook (men from the fetid or salt water), pushed through their enemies and secured a foothold on the shores of Lake Michigan. The Quapaws, called by their Algonkin foes the Alkansas or Arkansas, settled on the Ohio, but were ultimately driven down the river by the Illinois to the region now bearing their name. A few of the tribe retain very nearly their original hunting-grounds; the principal migrations of those who have moved having been southwestwardly, from the headwaters of the Mississippi to the Missouri.

In 1875 the Indians of this family residing within the limits of the United States numbered nearly 63,000, with about 1,000 more within the British Possessions. If the estimates of early explorers are to be relied upon, they must have lost heavily in population within the last one hundred years—intestine wars, the aggressions of the whites, and the vices of civilization reducing many once powerful tribes to demoralized remnants that are fast fading out of our knowledge by absorption into the ranks of more powerful neighbors. Almost all of the tribes of this family are settled on reservations under the direct care and support of the Government, and are fairly on the road to a civilized future. The exceptions are a few members of the wild bands of the Sioux, the Minatarees or Gros Ventres, and the Crows. At the present writing most of the first-named are at war with the United States forces, while the two latter are friendly.—W. H. Jackson, 1877.

Since settled on reservations, and at peace.

Lists of existing tribes and locations on reservations to June 30, 1885, are given herein.

DAKOTAS, OR SIOUX.

The word "Dakota" means united, confederated, or many in one, and designates the tribe from which the family takes its name. They seldom or never willingly acknowledge the title *Sioux*, first given them by the French, and now by all whites. There are many theories as to the origin of this latter name, the most acceptable of which is that it is a corruption of the word *Nadouessioux*—a general Chippewa designation for enemies—which was gradually applied by missionaries and traders, through an imperfect understanding of the language, to the tribes thus designated. Governor Ramsey, of Minnesota, thought that the word "originated upon the Upper Missouri, among the early French traders, hunters, and trappers, they deriving it, in all probability, from the name of a sub-band of *Ti-t'-wan* (Teton), Dakotas, called *Sioune*, who hunted over the plains of that river, and with whom, consequently, they came most frequently in contact.

"In Lewis and Clark's travels, in 1803, they are called the *Teton Saone*, and their villages are located on the Missouri, near Cannon-ball River.

"At least we find the term *Sioux* first used in the early maps to designate a large tribe, with various subdivisions, upon the Upper Missouri only."

Dakota traditions go back but a comparatively short time, and are vague and obscure in regard to their origin and early residence, which place it, however, in the Northwest, above the great lakes. In their progress eastward they early possessed themselves of the country about the headwaters of the Mississippi and the Red River of the North, where they remained as late as 1863, when they were in part dispossessed by the Chippewas, who were eventually the cause of their removal to the Missouri.

Up to 1860 the Dakotas were divided into two principal divisions, those east of the Missouri, who were known as the Minnesota or Mississippi Dakotas, composed of four bands, viz: The *M'dewakantons*, or those of the Village of the Spirit Lake; the *Wape-kutes*, or Leaf Shooters; the *Wah-pe-tons*, or Village in the Leaves; and the *Sissetons*, or those of the Village of the Marsh. Most of these have been long in contact with the whites, and, having disposed of the greater portion of their lands to the Government, have abandoned most of their old habits, and devote themselves to farming. Others of them, however, are restless and devoted to old prejudices, and cause much trouble to the settlers. The massacre of the whites in 1862 was inaugurated by the *M'dewakantons*, the *Wahpetons* and *Sissetons* afterwards joining them.

Along the Missouri, but living mostly on its eastern side, were the *Shanktonwans* (Yanktons), or the people of Village at the End, inhabiting originally the Sioux, *Des Moines*, and *Jacques Rivers*, and living now principally about the mouth of the *Ver-million*.

The Yanktonais, a diminutive of the preceding name, and meaning the lesser or the little people of the End Village. Lewis and Clark described them as the Yanktons of the Plains, or Big Devils, who were on the heads of the Sioux, Jacques, and Red Rivers. Their present range is on the Missouri, above the Yanktons. From one branch of this band the Assiniboines are said to have sprung.

Pabóksa, or Cut Heads, a branch of the Yanktons, and ranging above them.

The I-san-teis, or Santees, another sub-band of the Yanktons, living originally in Minnesota and Iowa, but since lately on the Missouri, near the Yanktons.

West of the Missouri, occupying the greater portion of Dakota, Wyoming, and portions of Montana and Nebraska, the general name of Tetons, or Tetonwans ("Village of the Prairie") has been given to the seven principal bands of the Dakotas inhabiting that region. Lewis and Clark placed them on their map in only two principal divisions, viz, as the "Tetans of the Burnt Woods" Brulés), and the "Tetans Saone," from which some suppose the word Sioux has been derived for the whole Dakota nation. The seven subdivisions as now recognized are the—

1. *Siha-sa-pas* or *Blackfeet*, on the Missouri in the neighborhood of the Cannon-ball River.

2. *The Si-chan-koo* or *Burnt Thighs* (Brulés, Spotted Tail's band), ranging on the Niobrara and White Rivers, from the Platte to the Cheyenne.

3. *Oncapapas*, or "those who camp by themselves," who roam over the country between the Cheyenne and Yellowstone Rivers.

4. *Minnekonjous*, "those who plant by the water," south of the Black Hills.

5. *Itá-zip-cho*, or *Sans Arcs*, "without bows," affiliating with the Oncapapas and Blackfeet, and ranging over much the same country.

6. *Ogalallas* occupy the country between Fort Laramie and the Platte, although they are now confined to a reservation in the northwestern corner of Nebraska. Have the reputation of being the most friendly disposed towards the whites of all the Tetonwans. Red Cloud, so well known as an Indian diplomat, is chief of this band.

7. *O-he-nom-pas*, or *Two Kettles*. Live principally about Fort Pierre, against whom it is said very few complaints have ever been made, they having always observed faithfully the stipulations of their treaties with the United States.—W. H. J., 1877.

In the report of the Commissioner of Indian Affairs for 1870 there are 21 sub-bands of Dakotas enumerated, numbering, in the aggregate, 53,044.

All of the Sioux, save a few stragglers, are now on reservations (June 30, 1885).

The Sioux are included under 12 agencies, 9 in Dakota, 2 in Montana, and 1 in Nebraska, at all of which, except at Fort Belknap, a beginning in Indian farming has been made, in spite of all discouragements by reason of unsuitable location and the demoralizing influences of "the hostiles."

The Ogalallas at Red Cloud Agency, who have almost entirely abandoned the chase on account of scarcity of game, depend almost entirely upon the Government for their support. Their small beginnings in cultivating the soil came to naught through the grasshoppers. The Brulés at Spotted Tail Agency have a thriving school with 75 pupils, and cultivated some lands. At the Upper Missouri agencies but little has been done beyond feeding the Indians who report to them for that purpose, their attempts at farming resulting in failures on account of the grasshopper pest. The Yanktons, Santees, Sissetons, Wahpetons, and other Sioux on the Lower Missouri and in eastern Dakota, have made more substantial progress in civilization, many of them having permanently discarded their Indian habits and dress, and live in houses, and are nearly self-supporting. The Santees, those in Nebraska especially, have entirely renounced their old form of life; have churches and Sabbath-schools, which are regularly attended. They have a monthly paper, printed in their native language, with an edition of 1,200 copies.—W. H. Jackson, 1877.

LOCATION AND NUMBERS (APPROXIMATE), JUNE 30, 1885.

DAKOTA.

Sioux at Cheyenne River Agency:	
Blackfeet Sioux	224
Sans Ares Sioux	788
Minnekonjo Sioux	1,382
Two-Kettle Sioux	750
Crow Creek and Lower Brulé Agency Sioux:	
Lower Yanktonais Sioux.....	1,098
Lower Brulé Sioux	1,424
Devil's Lake Agency Sioux:	
Sisseton Sioux, Wahpeton Sioux, and Cut Head Sioux	864
Pine Ridge Agency (Red Cloud) Sioux:	
Ogalalla Sioux	7,800
Northern Cheyenne.....	500
Rosebud Agency (Spotted Tail):	
Brulé Sioux, No. 1.....	2,102
Brulé Sioux, No. 2.....	1,493

Fort Peck Agency, Montana:	
Yanktonais Sioux	3,542
Santee Sioux	423
Ogalalla and Teton Sioux.....	205
Total	35,680

PRESENT CONDITION.

Several bands of the Sioux are semi-civilized. Some remain "blanket Indians," but few, if any, are roamers. The reports of the several agents in charge of Sioux reservations, which are published annually in the report of the Commissioner of Indian Affairs, will furnish full data. The civilizing of the Sioux is progressing fairly well. They have been in the past the terror of the West and Northwest, but are now far from the warlike savages that they were. Sioux outbreaks since 1862 and to 1876 were frequent, but are now improbable. They reside on reservations adjacent to their original country, and this has probably aided in contenting them to this system. A valuable series of photographs of the Sioux can be found in Hayden's Catalogue (pages 28-45), (fourteen tribes being represented). They are believed to be slowly decreasing.

SIOUX WARS FROM 1812 TO 1882.

For details as to Sioux wars from 1812 to 1882, see first reports of Indian Bureau, reports of Secretary of War, and "Record of Engagements with Hostile Indians within the Military Division of the Missouri, from 1868 to 1882, Lieut. General P. H. Sheridan commanding, 1882;" also see "Cheyennes," herein, Nos. 143 and 144.

PUN-CAH.

[Ponca: Laws of the United States. Ponca: Indian Bureau, June, 1885.]

A small tribe residing on the west bank of the Missouri River, 900 in number, reduced one-half by small-pox in 1824-'25. [Mr. Catlin saw them on his trip to the Mandans in 1832.—T. D.]

95. Shoo-de-gá-cha, the Smoke, chief of the tribe.

A very philosophical and dignified man.

(Painted in 1832. Plate No. 87, page 212, vol. 1, Catlin's Eight Years.)

The chief, who was wrapped in a buffalo robe, is a noble specimen of native dignity and philosophy. I conversed much with him; and from his dignified manners, as well as from the soundness of his reasoning, I became fully convinced that he deserved to be the sachem of a more numerous and prosperous tribe. He related with great coolness and frankness the poverty and distress of his nation; and, with the method of a philosopher, predicted the certain and rapid extinction of his tribe, which he had not the power to avert. Poor, noble chief, who was equal to and worthy of a greater empire! He sat upon the deck of the steamer, overlooking the little cluster of his wigwams mingled amongst the trees; and, like Caius Marius, weeping over the ruins of Carthage, shed tears as he was descanting on the poverty of his ill-fated little community, which he told me "had once been powerful and happy; that the buffaloes which the Great Spirit had given them for food, and which formerly spread all over their green prairies, had all been killed or driven out by the approach of white men, who wanted their skins; that their country was now entirely destitute of game, and even of roots for their food, as it was one continued prairie; and that his young men, penetrating the countries of their enemies for buffaloes, which they were obliged to do, were cut to pieces and destroyed in great numbers. That his people had foolishly become fond of *fire-water* (whisky), and had given away everything in their country for it; that it had destroyed many of his warriors, and soon would destroy the rest; that his tribe was too small and his warriors too few to go to war with the tribes around them; that they were met and killed by the Sioux on the north, by the Pawnees on the west, and by the Osages and Konzas on the south; and still more alarmed from the constant advance of the pale faces—their enemies from the East, with whisky and small-pox, which already had destroyed four-fifths of his tribe, and soon would impoverish, and at last destroy, the remainder of them."—*Ibid.*, page 212.

96. Hee-láh-dee, the Pure Fountain, wife of Shoo-de-gá-cha (No. 95). 1832.
(Plate No. 88, page 212, vol. 2, Catlin's Eight Years.)

I painted at full length a young and very pretty woman (Plate 88), wife of No. 96, whose name is Hee-láh-dee (the Pure Fountain). Her neck and arms were curiously tattooed, which is a very frequent mode of ornamenting the body amongst this and some other tribes, which is done by pricking into the skin gunpowder and vermilion. 1832.—*Ibid.*, page 212.

97. Hongs-háy-dee, the Great Chief, son of the chief.

This young fellow, about eighteen years of age, glowing red with vermilion, signalized himself by marrying *four wives in one day* whilst I was in his village. He took them all at once to his wigwam, where I saw them and painted one of them. This made him a great medicine.

(1832. Plate No. 90, page 213, vol. 2, Catlin's Eight Years.)

Mr. Catlin fully describes the ceremony on pages 213, 214, vol. 2, Catlin's Eight Years. (See also "Polygamy amongst the North American Indians," herein.)

I visited the wigwam of this young installed *medicine-man* several times, and saw his four modest little wives seated around the fire, where all seemed to harmonize very well, and for aught I could discover were entering very happily on the duties and pleasures of married life. I selected one of them for her portrait, and painted it (Plate 89, see No. 98, below, Mong-shong-shaw, the Bending Willow) in a very pretty dress of deer-skins, and covered with a young buffalo's robe, which was handsomely ornamented, and worn with much grace and pleasing effect.

Mr. Chouteau, of the Fur Company, and Major Sanford, the agent for the Upper Missouri Indians, were with me at this time; and both of these gentlemen, highly pleased with so ingenious and *innocent* a freak, felt disposed to be liberal, and sent them many presents from the steamer.

The ages of these young brides were probably all between twelve and fifteen years, the season of life in which most of the girls in this wild country contract marriage.—*Ibid.*, 214.

98. *Mong-shóng-sha*, the Bending Willow, one of the four wives of *Hongs-káy-dee*, (No. 97), about thirteen years old, and wrapped in a buffalo robe prettily garnished.* 1832.

MR. CATLIN'S NOTES ON THE PONCA INDIANS.

I landed at the Puncachs, a small tribe residing in one village on the west bank of the river, 300 miles below this and 1,000 from Saint Louis.

The Puncachs are all contained in seventy-five or eighty lodges, made of buffalo-skins, in the form of tents, the frames for which are poles of fifteen or twenty feet in length, with the butt ends standing on the ground and the small ends meeting at the top, forming a cone, which sheds off the rain and wind with perfect success. This small remnant of a tribe are not more than four or five hundred in number, and I should think at least two-thirds of those are women, this disparity in numbers having been produced by the continual losses which their men suffer who are penetrating the buffalo country for meat, for which they are now obliged to travel a great way (as the buffaloes have recently left their country), exposing their lives to their more numerous enemies about them.—Page 212, vol. 1, Catlin's Eight Years.

DAKOTA OR SIOUX-PONCAS.

The Poncas were originally part of the Omaha tribe, to whom they are related. Lived originally on the Red River of the North, but were driven southwestwardly across the Missouri by the Sioux, and fortified themselves on the Ponca River. United for a time with the Omahas for protection, but have generally lived apart. Were so exposed to the forays of the savage Sioux that they were almost exterminated at one time, but after the treaties of 1817 and 1825 rallied and began to increase. Were estimated then at 750, which has remained their average number ever since. In 1858 sold their lands and went on a reservation near the Yanktons in Dakota, but being too near their old foes, and not being able to raise any crops, were, under a treaty made in 1859, in 1865 removed down to the mouth of the Niobrara for a permanent home, where they now have three villages. Are still exposed to raids from the Sioux, retarding very much their progress toward a self-supporting condition. Efforts are being made to have them join their relatives, the Omahas.—W. H. Jackson, 1877.

A splendid series of photographs of Ponca Indians was made by W. H. Jackson, at Washington, November 4, 1877, some 19 in number. Measurements of each were made, including their heads. They are given on pages 123-4 of the Descriptive Catalogue of the Photographs of North American Indians. Mis. Pub. No. 9, U. S. Geol. Survey, before referred to.

PONCA INDIAN LEGAL PROCEEDINGS OF 1879.

No. 1083 is *Ma-chee-un-zhee*, or Standing Bear, who became famous afterward as the Ponca chief who in 1879 gained a most signal victory in resisting an order to return to Indian Territory.

*The Poncas in Indian Territory, 1885, by the report of their agent, still practice plural marriage, and marry at an early age. He states that an unmarried girl of fourteen to fifteen years of age is not to be found, June, 1885.

In 1877 the Indian Department insisted upon removing the Poncas to Indian Territory from Dakota without their consent. Being civilized they objected to giving up their property without being paid for it, and further objected to being placed in contact with wild Indians in Indian Territory. They were removed, however. Afterwards some 30 of them returned and settled on the Omaha Reservation in Nebraska. Standing Bear was one of these. He was arrested by order of the Interior Department, to be returned to Indian Territory. Popular sentiment was aroused, mass meetings were held in the East, denouncing this proceeding and appealing for justice to these Indians. Standing Bear applied for a writ of habeas corpus to the United States district court at Omaha, Nebr., for release from the custody of the military and the Interior Department, having been arrested and being about to be carried back to the Indian Territory.

The writ was issued by Judge Elmer S. Dundy, of the United States district court for Nebraska, and the return to it was heard at Omaha on April 30, 1879.

The Interior Department and the United States appeared by the United States district attorney, who made an argument five and a half hours long to prove that an Indian was not a man—or a person, in American law. Standing Bear appeared by Hon. J. L. Webster and Hon. A. J. Poppleton. Standing Bear testified in his own behalf, and addressed the court. The court-room was crowded with a distinguished audience of spectators. He claimed that he was a man, although God had made his skin of a different hue. The audience were aroused to a pitch of excitement by his eloquence, which resulted in cheer after cheer when he sat down.

Judge Dundy rendered his decision, in which he sustained the writ, discharging Standing Bear and the Poncas from custody, and deciding—

First. That an *Indian* is a PERSON within the meaning of the laws of the United States, and has therefore the right to sue out a writ of habeas corpus in a Federal court or before a Federal judge in all cases where he may be confined or in custody under color of authority of the United States, or where he is restrained of liberty in violation of the Constitution or laws of the United States.

Second. That General George Crook, the respondent, being the commander of the military department of the Platte, has the custody of the relators under color of authority of the United States, and in violation of the laws thereof.

Third. That no rightful authority exists for removing by force any of the relators to the Indian Territory, as the respondent has been directed to do.

Fourth. That the Indians possess the inherent right of expatriation as well as the more fortunate white race, and have the inalienable right to "*life, liberty, and the pursuit of happiness*," so long as they obey the laws and do not trespass on forbidden ground. And

Fifth. Being restrained of liberty under color of authority of the United States, and in violation of the laws thereof, the relators must be discharged from custody, and it is so ordered.

Standing Bear was shortly after discharged.

Grateful for the aid rendered him and his people, Standing Bear called upon the editor of the Omaha Herald, who had been his best friend, and also on Messrs. Webster and Poppleton, and gave each of them a present of remembrance. To the editor he gave a pair of beaded leggings; to Mr. Webster a tomahawk, and to Mr. Poppleton a war bonnet. His address to Mr. Poppleton was:

STANDING BEAR TO MR. POPPLETON.

I believe I told you in the court-room that God made me and that I was a man.

For many years we have been chased about as a dog chases a wild beast. God sent you to help me. I thank you for what you have done.

I want to get my land back. That is what I long for all the time. I wish to live there and be buried with my fathers.

When you were speaking in the court-room of course I could not understand, but I could see that you were trying very hard to release me. I think you are doing for me and my people something that never has been done before.

If I had to pay you for it, I could never get enough to do it. I have here a relic which has come down to my people through a great many generations. I do not know how old it is; it may be two or three hundred years old. I desire to present it to you for what you have done for me.

The keepsake given by the chief to Mr. Poppleton is a rare gift, being esteemed the most sacred, as it is the most venerable, object in the possession of the tribe. It resembles a wig, and was worn by the head chief at their most weighty councils. Curiosity-hunters have often sought to secure it at any price in money, but he has to one and all said that money could not buy it. Among occasions on which it has been worn was that of the first treaty—in 1817, we believe—made between the Poncas and the Government of the United States. Standing Bear, who is himself sixty years of age, stated that when he was a little boy his father told him that no one in the tribe knew how old it was, and that it had come into their possession in generations long past.

The Interior Department never attempted to interfere with the Poncas again, and Standing Bear and 170 of his people came back from Indian Territory, and are now at the Ponca Agency in Dakota. See below.

THE PONCAS.

“The Poncas are good Indians. In mental endowment, moral character, physical strength, and cleanliness of person, they are superior to any tribe I have ever met.”—Report Commissioner of Indian Affairs, 1878.

PRESENT LOCATION AND NUMBERS, JUNE 30, 1885.

Poncas or Ponca, Pawnee, and Otoe Agency, Indian Territory, 574. Occupation, farmers and herders. Gradually increasing in numbers. Poncas on the consolidated Santee, Flandreau, and Ponca Agency, in Nebraska and Dakota, number 178; total, 752.

The last are a portion of those removed to Indian Territory in 1877, of which Standing Bear was one, and who returned to Nebraska. The agent says: "They support themselves by cultivating the ground—farmers. Civilized; wear white man's clothing."

PÁW-NEES.

[Pawnee: Laws of the United States. Pawnee and Páni: Indian Bureau.]

A wild and very warlike tribe of 12,000, occupying the country watered by the river Platte, from the Missouri to the Rocky Mountains. This once very powerful tribe lost one-half of their numbers by the small-pox in 1823; they are entirely distinct from the Pawnee Picts, both in language and customs, and live 1,000 miles from them. This tribe shave the head like the Sacs and Foxes.

Mr. Catlin first visited the Pawnees on the Platte River in 1833. Afterwards he visited the Pawnee Picts and Pawnees in 1834 with Colonel Dodge's regiment of dragoons, U. S. A.

GRAND PAWNEES.

99. *Shón-ka-ki-he-ga*, the Horse Chief; head chief of the tribe, and also of the four tribes.

This chief and a number of his braves visited Washington in 1837.

(Painted in 1834. Plate No. 138, page 27, vol. 2, Catlin's Eight Years.)

100. *La-dóo-ke-a*, the Buffalo Bull; his *medicine* or *totem* (the head of a buffalo bull) painted on his face and breast, his bow and arrow in his hands.

(Painted 1833. Plate No. 140, page 27, vol. 2, Catlin's Eight Years.)

101. *Ah-sháw-wah-róoks-te*, the Medicine Horse; a brave, or soldier.

(Painted 1833. No plate.)

TAP-PÁHGE PÁWNEES.

102. *La-kée-too-wi-rá-sha*, the Little Chief; a great warrior.

(Painted 1833. No plate.)

103. *Loo-rá-wée-re-coo*, the Bird that goes to War.

(No plate. Painted 1832.)

REPUBLICAN PÁWNEES.

104. *Áh-sha-la-cóots-ah*, the Mole in the Forehead; chief of his band; a very distinguished warrior.

(Painted 1833. No plate.)

105. *Lá-shah-le-stáw-hix*, the Man Chief.

(Painted 1833. No plate.)

106. *La-wée-re-coo-re-shaw-wee*, the War Chief.

(1833. No plate.)

107. *Te-ah-ke-ra-lée-re-coo*, the Chayenne; a fine-looking fellow, with a pipe in one hand and his whip in the other.

(1833. No plate.)

SHÓN-KA-KI-HE GA, THE HORSE CHIEF.
Head Chief. Pawnee, No. 99, page 68.
(Plate 138, Vol. II, Catlin's Eight Years.)

LA-DÓO-KE-A, THE BUFFALO BULL.
Pawnee, No. 100, page 68.
(Plate 140, Vol. II, Catlin's Eight Years.)

WOLF PAWNEES.

108. *Le-sháw-loo-láh-le-hoo*, the Big Elk; chief of the band.
(1833. Plate 141, page 27, vol. 2, Catlin's Eight Years.)
109. *Lo-lóch-to-hóo-lah*, the Big Chief; a very celebrated man.
(1833. No plate.)
110. *La-wáh-he-coots-la-sháw-no*, the Brave Chief; impressions of hands painted on his breast.
(1833. No plate.)
111. *L'hár-e-tar-rúshe*, the Ill-natured Man; a great warrior.
(1833. No plate.)

MR. CATLIN'S NOTES ON THE PAWNEE INDIANS.

The Pawnees are divided into four bands, or families, designated by the names of Grand Pawnees, Tappage Pawnees, Republican Pawnees, and Wolf Pawnees.

Each of these bands has a chief at its head, which chiefs, with all the nation, acknowledge a superior chief at whose voice they all move.

They (Pawnees) live in four villages, some few miles apart, on the banks of the Platte River, having their allies, the Omahas and Ottoes, so near to them as easily to act in concert in case of invasion from any other tribe; and from the fact that half or more of them are supplied with guns and ammunition, they are able to withstand the assaults of any tribe that may come upon them.

They (Pawnees) are a very powerful and warlike nation, living on the river Platte, about one hundred miles from its junction with the Missouri (at now near ———), laying claim to, and exercising sway over, the whole country from its mouth to the base of the Rocky Mountains.

The present number of this tribe is ten or twelve thousand; about one-half the number they had in 1832, when that most appalling disease, the small-pox, was accidentally introduced amongst them by the fur traders and whisky sellers, when ten thousand (or more) of them perished in the course of a few months.—Page 27, vol. 2, Catlin's Eight Years.

Since the above was written I have had the very great pleasure of reading the notes of the honorable Charles A. Murray (who was for several months a guest amongst the Pawnees), and also of being several times a fellow-traveler with him in America; and at last a debtor to him for his signal kindness and friendship in London. Mr. Murray's account of the Pawnees, as far as he saw them, is without doubt drawn with great fidelity, and he makes them out a pretty bad set of fellows. As I have before mentioned, there is probably not another tribe on the continent that has been more abused and incensed by the system of trade and money-making than the Pawnees; and the Hon. Mr. Murray, with his companion, made his way boldly into the heart of their country without guide or interpreter, and I consider at great hazard to his life; and, from all the circumstances, I have been ready to congratulate him on getting out of their country as well as he did.

I mentioned in a former page the awful destruction of this tribe by the small-pox; a few years previous to which some one of the fur traders visited a threat upon these people, that if they did not comply with some condition 'he would let the small-pox out of a bottle and destroy the whole of them.' The pestilence has since been introduced accidentally amongst them by the traders; and the standing tradition of the tribe now is, that 'the traders opened a bottle and let it out to destroy them.' Under such circumstances, from amongst a people who have been impoverished by the system of trade, without anybody to protect him, I cannot but congratulate my honorable friend for his peaceable retreat, where others before him have been less fortunate; and regret at the same time that he could not have been my companion to some others of the remote tribes.—Note Geo. Catlin on page 25, *Ibid*.

THE PAWNEES.

There is but little definite knowledge of the early history of the Pawnees, although they are among the longest known to the whites west of the Mississippi. Marquette notes them in his map, 1673, as divided into various bands. They are supposed to be the Panimaha of La Salle's voyage in 1688. At the time of Lewis and Clarke's visit, in 1803, their principal village was on the south side of the Platte. Pike, in 1806, estimated the population of three of their villages at 6,233, with nearly 2,000 warriors, engaged in fierce combats with neighboring tribes. In 1820, three of the four bands into which they have been for a long time divided resided on the banks of the Platte and its tributaries, with a reservation on Loup Fork, on the ninety-eighth meridian. Were then estimated at about 10,000 souls, living in earth-covered lodges, and much devoted to the cultivation of the soil, but engaging regularly every season in a grand buffalo-hunt. The Delawares, in 1823, burnt the Great Pawnee village on the Republican, and these Pawnees, becoming much reduced in numbers by small-pox, soon after sold all their lands south of the Platte and removed to the reservation on Loup Fork. The means were provided, and many exertions made to place them on the high road to prosperity; but their inveterate foe, the Sioux, harassed them continually, drove them repeatedly off their reservation, and despoiled their villages. This warfare and disease soon reduced them to half their former number. In 1861 they raised a company of scouts for service against the Sioux, and a much larger force under the volunteer organization, incurring in consequence an increased hostility from their enemies, who harassed them so continuously that in 1874 the chiefs in general council determined upon removing to a new reservation in the Indian Territory, lying between the forks of the Arkansas and Cimarron, east of the ninety-seventh meridian. Their removal was almost entirely effected during the winter of 1874-'75.

The Pawnees now (in 1877) number in all 2,026, and yet retain the subdivision into bands, as follows: The Skeedee (Pawnee Mahas, or Loups), Kit-ka-hoct, or Republican Pawnees, Petahoweret, and the Chowee or Grand Pawnees. There are also living on the Washita a small band of affiliated Wacos and Wichitas, sometimes called Pawnee Picts, [see page 50 herein,] who are undoubtedly an off-shoot of the Grand Pawnees. They are under the care of the Friends; have well-organized day and industrial schools, and are well supplied with implements and means to carry forward a systematic cultivation of the soil.—W. H. Jackson, 1877.

PRESENT LOCATION AND CONDITION.

On August 15, 1884, there were 1,142 Pawnees at Ponca, Pawnee, and Otoe Agency, Indian Territory; August 20, 1885, 1,045. Many farmers and herders on allotted land.

The agent wrote in 1884:

The Pawnees now number 1,142 souls, a slight decrease since last annual report. Hereditary and constitutional diseases are slowly but surely decimating this people.

John W. Scott, agent, wrote of the Pawnees, August 20, 1885:

The Indians on all the reservations, viz., Pawnees, Otoes, Missourians, and Poncas, have pursued the peaceful and even tenor of their way, no act of violence or breach of the peace worthy of mention having occurred either among themselves or in connection with the whites. I can repeat with added confidence the statement of my former report that no white community of equal number can show a record so clear of violence or with so few offenses against person or property as these Indians. Their patience and forbearance under acts of wrong and injustice to which they are sometimes subjected by a certain class of whites, who have obtained a foothold on the surrounding territory, are really surprising.

In regard, however, to another class of offenses I cannot speak so favorably. Their morals and social habits are abominable. While they acquiesce grudgingly and under protest in the necessity of doing a certain amount of work and endeavoring to provide by civilized methods for some sort of subsistence, when it comes to the regulation of their social and domestic affairs they despise the white man and his ways. In these respects I doubt if they have advanced one iota in all the years during which they have been under the training and tutelage of the superior race. They marry and unmarried at pleasure. Their daughters are held as legitimate merchandise. Polygamy, though not universally practiced, is considered perfectly proper and excites no remark. It is, indeed, practiced to a greater extent than a superficial acquaintance would lead one to suspect. The woman as a rule accepts the situation with the apathy of the race. Occasionally, however, the first wife organizes a revolt against the interloper and succeeds in driving her out; but sometimes she is driven out herself, and compelled with her brood to find lodging and subsistence as she can. Some of these are cases of extreme hardship. So long as this condition of things continues they can make no real progress; the emancipation of the woman is one of the first steps in the civilization of any people. Moral influences and the example of the whites have utterly failed to effect any change for the better in their domestic relations. I think it is high time they were placed under the restraints of law just as other people. I can see no reason why an Indian should not be sent to the penitentiary for bigamy as well as a Mormon. One or two examples would do more to break up the miserable practice than all that teachers and missionaries can do in a generation.

Aside, however, from these and kindred matters which affect their moral rather than their physical condition, these tribes have made perceptible progress in the direction of independence and self-support. Of course it has been done under constant urging. I do not believe there is any upward tendency in the Indian nation. The very moderate advance these Indians have made in the twenty-five years or more during which they have had teachers and helpers has been made under the constant pressure of those around them; if that pressure was withdrawn they would speedily relapse into utter idleness and barbarism. But the hopeful aspect of the situation is that they respond more readily and kindly to the efforts put forth in their behalf, and they will no doubt continue to do so as their muscles become inured to labor and they acquire the skill which practice alone can give in the methods and processes of civilized industry.

The Pawnees now number 1,045, showing a steady decrease in population from year to year. The deaths largely outnumber the births, and it seems only a question of time when the tribe will become extinct.

The favorable change noticed last year in the gradual breaking up of the village system has continued during the present year. Many who had previously taken allotments, but were unable to occupy them by reason of their inability to make the needed improvements, have managed to get some breaking and fencing done, and will, as soon as they can secure some kind of dwelling, make their permanent residence on their individual farms.

The Pawnees seem to be a more sprightly and enterprising race than most of the Indians of this agency, and manifest a more genuine desire to adopt habits and customs of civilized life than any of the other tribes. This is due, in part at least, to the fact that there are among them several mixed-blood families, who possess a really respectable degree of cultivation and refinement. These have made for themselves neat and comfortable homes, and surrounded them with shade trees and orchards, some of which are already in bearing. They cultivate a variety of crops and live very much as white people. Their influence and example have done much to stimulate the more intelligent and enterprising of the full-bloods to adopt a similar course of life. On account of a partial failure of the corn crop last year many of the Pawnees were reduced to distressing straits to procure the means of subsistence. In their sorest need, however, they never turned their eyes to the flesh pots of Egypt, nor ex-

pressed a desire to return to the system of Government rations; but struggled manfully through the winter, and on the opening of spring went to work with a will to plant and cultivate another crop. I am pleased to say that their efforts have been crowned with a degree of success which will afford them abundant provision for the year.

The following figures from the statistics gathered by Mr. McKenzie, the clerk in charge, will show the aggregate results of their farming operations during the past year. They had in cultivation 971 acres, from which there were produced 1,177 bushels of wheat, 35,000 bushels of corn, 969 bushels of oats, 100 bushels of potatoes, 300 bushels of peas and beans, 5,000 melons, 3,000 pumpkins, besides a variety of vegetables too tedious to mention. They have also cut and secured 300 tons of hay. In the way of stock they own 300 head of cattle, 15 mules, 100 swine, and a large number of ponies.

O-MÁ-HAS.

[Omaha: Laws of the United States. Indian Bureau, June, 1885.]

The remains of a numerous tribe, nearly destroyed by the small-pox in 1823, now living under the protection from the Sioux of the Pawnees; their numbers, about 1,500.

On Platte River (now in Nebraska). See also Pawnees, herein.

112. Man-sha-qúí-ta, the Little Soldier; a brave.

(Painted in 1833. No plate.)

113. Ki-hó-ga-waw-shú-shee, the Brave Chief; chief of the tribe.

(Painted in 1833, plate No. 145, page 27, vol. 2, Catlin's Eight Years.)

114. Om-pah-tón-ga, the Big Elk; a famous warrior, his tomahawk in his hand, and face painted black for war.

(Painted in 1833, plate No. 146, pages 27-28, vol. 2, Catlin's Eight Years.)

An able and highly respectable man. He is the principal chief of his nation, and the most considerable man among them in point of talent and influence. He uses his power with moderation, and the white men who have visited his country all bear testimony to his uniform fair dealing, hospitality, and friendship. He is a good warrior, and has never failed to effect the objects which he has attempted, being distinguished rather by the commonsense and sagacity which secures success, than by the brilliancy of his achievements.

The Omahas have one peculiarity in their customs, which we have never noticed in the history of any other people. Neither the father-in-law nor mother-in-law are permitted to hold any direct conversation with their son-in-law. It is esteemed indelicate in these parties to look in each other's faces, or to mention the names of each other, or to have any intercourse, except through the medium of a third person. If an Omaha enters a tent in which the husband of his daughter is seated, the latter conceals his head with his robe, and takes the earliest opportunity to withdraw, while the ordinary offices of kindness and hospitality are performed through the female, who passes the pipe or the message between her father and husband.

Ongpatonga married the daughter of Mechapa, or the Horsehead. On a visit to his wife one day he entered the tent of her father, unobserved by the latter, who was engaged in playing with a favorite dog, named Arrecatt-a-waho, which, in the Pawnee language, signifies Big Elk—being synonymous with Ongpatonga (Big Elk!) in the Omaha. This name the father-in-law was unluckily repeating, without being aware of the breach of good manners he was committing, until his wife, after many ineffectual winks and signs, struck him on the back with her fist, and, in that tone of conjugal remonstrance which ladies can use when necessary, exclaimed, "You old fool! Have you no eyes to see who is present? You had better jump on his back and ride him about like a dog." The old man, in surprise, ejaculated "Wah," and ran out of the tent in confusion.—McKenny & Hall, vol. 1, pages 136, 137.

Big Elk delivered a speech to Captain Long and his expedition in 1819, in which he

OM-PAH-TÓN-GA, THE BIG ELK.
A famous Omaha warrior. No. 114, page 72.
(Plate 146, Vol. II, Catlin's Eight Years.)

asserted that no one of his nation had ever stained his hands with the blood of a white man.

He is a man of good sense and sound judgment, and is said to be unsurpassed as a public speaker. He bears an excellent reputation for probity; and is spoken of by those who know him well as one of the best men of the native tribes. He is one of the few Indians who can tell his own age with accuracy. He is sixty-six years old.—McKenny & Hall, vol. 1, pages 130, 138. 1838.

On the night of July 14, 1811, Black Buffalo, chief of the Tetons (Sioux), died at Portage des Sioux.

He was present with his band at a treaty being held with the United States authorities. The next day Black Buffalo was buried. Robert Walsh, secretary of the Commission, made a note of the oration delivered over Black Buffalo at the grave after the firing, by Om-pah-ton-ga, Big Elk (No. 114). Big Elk and his band of Omahas (Máhas) were also present. Black Buffalo was buried with the honors of war, Col. James Miller, afterwards the hero of Lundy's Lane, commanding the escort and funeral party.

Big Elk's address was as follows:

Do not grieve. Misfortunes will happen to the wisest and best of men. Death will come, and always comes out of season. It is the command of the Great Spirit, and all nations and people must obey. What is passed and cannot be prevented should not be grieved for. Be not discouraged or displeased, then, that in visiting your Fathers here [the Commissioners] you have lost your chief. A misfortune of this kind may never again befall you, but this would have attended you perhaps at your own village. Five times have I visited this land, and never returned with sorrow or pain. Misfortunes do not flourish particularly in our path. They grow everywhere, and [speaking to Governor Edwards and Colonel Miller] what a misfortune for me that I could not have died this day, instead of the chief that lies before us. The trifling loss my nation would have sustained in my death would have been doubly paid for by the honors of my burial. They would have wiped off everything like regret. Instead of being covered with a cloud of sorrow, my warriors would have felt the sunshine of joy in their hearts.

To me it would have been a most glorious occurrence. Hereafter, when I die at home (at the Omaha village on the Missouri), instead of a noble grave and a grand procession, the rolling music and the thundering cannon, with a flag waving at my head, I shall be wrapped in a robe (an old robe, perhaps), and hoisted on a slender scaffold to the whistling winds, soon to be blown down to the earth—my flesh to be devoured by the wolves, and my bones rattled on the plain by the wild beasts. [Speaking to Colonel Miller.] Chief of the soldiers: Your labors have not been in vain. Your attention shall not be forgotten. My nation shall know the respect that is paid over the dead. When I return I will echo the sound of your guns.

As an Indian orator Big Elk had few equals.

Big Elk became chief of the Omahas in 1800, succeeding Black Bird. He is said to have died in 1846.

115. Sháw-da-mon-nee, There he Goes; a brave.

(1833. No plate.)

116. Nóm-ba-mon-nee, the Double Walker; a brave.

(1833. No plate.)

Mr. Catlin visited them in 1833 and found them living on the Platte River, in what is now Nebraska, they were then with their allies the Otoes and near the Pawnees.

THE OMAHAS.

The Omahas were one of the tribes noticed by Marquette in 1673, and by Carver in 1766, who found them located on the Saint Peter's River. They were divided into two bands, the Istasunda, or Grey Eyes, and the Hongashans, and cultivated corn, melons, beans, &c. In 1802, from a tribe numbering about 3,500, they were reduced to less than a tenth of that number by small-pox, when they burned their village and became wanderers, pursued by their relentless enemy, the Sioux. Lewis and Clarke found them on the L'Eau qui Court, numbering about 600. Since 1815 many treaties have been made with them, always accompanied by a cession of lands on their part in return for annuities and farming implements. (Mr. Catlin, page 10, vol. 2, Eight Years, speaks of the site of the ancient Omaha villages, and gives details and illustrations of their method of burying their dead, also given herein.) In 1843 they returned to their village, between the Elkhorn and the Missouri, and made a peace with some of the Sioux, but their great chief, Logan Fontanelle, was killed by them not long after. Since then they have devoted themselves mainly to agriculture, and, under the fostering care of the Friends, are very much improved in their condition. In 1875 they numbered 1,005, depending entirely upon their crops for their subsistence, of which they have considerably more than enough for their own use. They have three good schools, which are largely and regularly attended. The older Indians are also abandoning their old habits and assisting in building for themselves upon forty-acre allotments of their lands.—W. H. Jackson, 1877.

MISS FLETCHER ON THE OMAHAS.

A most interesting account of the Omaha Indians can be found in an illustrated pamphlet published by Alice C. Fletcher, Washington, Judd & Detweiler, 1885. It is entitled an "Historical Sketch of the Omaha Tribe of Indians in Nebraska," 12 pages. It gives the manners, habits, and customs, of these Indians. On page 1 the following is given:

The Omahas belong to the same linguistic family as the Poncas, Osages, Kansas, Otoes, Dakotas, Mandans, Winnebagoes, and many other tribes. While some of these cognate tribes can understand each other's speech, as is the case with the Omahas, Poncas, Quapaws, and Osages, others when they meet are unable to make themselves intelligible to one another, as in the instance of an Omaha meeting a Dakota or Winnebago or Mandan. During the long period which has elapsed since these tribes were united to one another or to a parent stock, their various languages have undergone great modifications and change, so that at the present time it requires the skill of the linguistic student to discern the relationship between the people speaking these different tongues.

PRESENT LOCATION AND CONDITION.

On June 30, 1885, there were 1,167 Omahas at Omaha and Winnebago Agency, Nebraska, in the "Black Bird" country. They are farmers, and live on lands allotted in severalty.

The agent, October, 1884, writes of them:

The Omahas are a steady, sober, and industrious people, whose greatest desire is to secure permanent homes for themselves and their posterity. They are peculiarly attached to their homes. For two hundred years or more this has been their home, never leaving it except when driven away by other tribes or for the purpose of laying in their yearly supply of buffalo meat. On the summit of every bluff lie whitening in the sun the bones of their ancestors, and on these bluffs they, too, hope some day to lie with them.

WAH-RO-NÉE-SAH, THE SURROUNDER.
Chief of the tribe. Otoe, No. 117, page 75.
(Plate 144, Vol. II, Catlin's Eight Years.)

The Omahas are a determined and progressive people, and in a very hopeful condition. The allotment of lands in severalty in 1883 and 1884 to the Omahas was by authority of an act of Congress of date August 7, 1882. This work was done by Miss A. C. Fletcher, as agent of the Interior Department. The Commissioner of Indian Affairs, Hon. H. Price, in his Annual Report for 1884, says of the Omahas:

Many of the leading men of the Omaha tribe in Nebraska have for some time favored the idea that the Government give the tribe entire control of its own affairs, without the interference or expense of an agent or of agency employés. Since the sale and allotment of a part of their reservation, before referred to, this desire for independence, and their wish to do away with the expense of a regularly organized agency force, has increased. Now more than half of these Indians live in comfortable houses; every family in the tribe has land under cultivation in farms ranging from ten to one hundred acres, and the acreage of tilled land is increasing every year. They are all moderately well supplied with stock, and with wagons, plows, and other necessary farming utensils, which they know how to use and take care of; and they have good mills, shops, and school-houses, and have been very successful in farming, so that, with their yearly cash income, they feel that their future necessities are provided for. The policy I have adopted in dealing with Indians is to prepare them as soon as possible to take care of themselves by civilized pursuits, and to encourage them in self-reliance, and I therefore looked with favor on this feeling of independence amongst the Omahas, believing that it was inspired by proper motives.

Therefore, on their request, made in council, I instructed the agent of the Omahas to discharge all agency employés at the Omaha Agency on the 30th day of last September, except the school employés and one person who is to remain there to act as physician and farmer, and who will look after the interests of the Government and the Indians and keep this office informed of the progress of affairs there, and who will be retained until his services can be dispensed with. The agent was further instructed to turn over to the Omaha councilmen, in trust for the tribe, the mills, shops, dwellings, school-houses, live stock, and all public property on the Omaha Reservation, which transfer is no doubt completed by this time. While this is an experiment, it is believed that it will prove to be successful, and that the Omahas will demonstrate the wisdom of the methods now pursued by the Department looking to the ultimate civilization and independence of all the Indian tribes.

September 18, 1885, the agent reports that the above experiment has worked successfully.

OTE-TOES.

[Otoe: Laws of the United States. Otoe: Indian Bureau, 1885.]

These are also the remains of a large tribe, two-thirds of which were destroyed by small-pox in 1823. They are neighbors and friends of the Pawnees, numbering about 600.

Mr. Catlin visited them in 1833, whilst among the Pawnees. He found the Otoes living in a village on the Platte River, with their allies, the Omahas, and near the Pawnees. (See Omahas.)

117. **Wah-ro-née-sah**, the Surrounder; chief of the tribe, quite an old man; his shirt made of the skin of a grizzly bear, with the claws on.

118. **Nóu-je-ning-a**, No Heart; a distinguished brave.
(See page 27, vol. 2, Catlin's Eight Years.)

Mr. Catlin made no outline drawing of this picture. It is not in the "Cartoon collection."

119. *No-wáy-he-súg-gah*, He who Strikes Two at Once. Sketch quite unfinished; beautiful dress, trimmed with a profusion of scalp-locks and eagles' quills; pipe in his hand, and necklace of grizzly bears' claws.

(Painted in 1833. Plate No. 143, page 27, vol. 2, Catlin's Eight Years.)

120. *Ráw-no-way-wóh-krah*, the Loose Pipe-stem; a brave (full length); eagle head-dress; shirt of grizzly bear's skin.

(Painted in 1833. Plate No. 144, page 27, vol. 2, Catlin's Eight Years.)

121. *Wée-ke-rú-law*, He who Exchanges; beautiful pipe in his hand. (No plate.)

DAKOTA—OTOES.

The Otoes, calling themselves *Watochtatah*, were known to the French as early as 1673 under the name of *Otantanta*; were originally part of the *Missourias*, and, with the *Iowas*, claim to have migrated to the Missouri with the *Winnebagoes*. They have long resided on the south side of the Platte River, in mud lodges, confederated with the *Missourias*, who formed one village with them. The two tribes now number 457 souls. Removed from Nebraska in 1882 to Indian Territory. Under the care of the Friends, many are laying aside their Indian dress and habits and learning to labor. In common with many other tribes, their annuities are payable only in return for labor performed, which exercises a most beneficial effect.—W. H. Jackson, 1877.

The joint band of Otoes and *Missourias* was removed from Otoe Agency, Nebraska, and are now on Otoe Reservation in Indian Territory.

PRESENT LOCATION AND CONDITION.

On June 30, 1885, there were 274 Otoes at the Ponca, Pawnee, and Otoe Agency, Indian Territory (Otoes and *Missourias* from Otoe Agency, Nebraska, in 1882). Farmers and herders. There were 240 Otoes at Sac and Fox Agency, Indian Territory. Total, 514.

This portion of the Otoes left the Otoe Reservation in Nebraska in April, 1880, and, under Chiefs *Medicine Horse* and *Heth-ca-mone*, moved to lands in the Sac and Fox Reservation in Indian Territory, where they now are.

(See also title *Missourias*—following.)

MIS-SOU-RIES.

[*Missourias*: Laws of the United States and Indian Bureau, 1885.]

Confederated with the Otoes (see Otoes, page—), once a very numerous and powerful nation, occupying the States of Illinois and Indiana. Reduced in wars with Sacs and Foxes, and lastly by the small-pox in 1823; now merged into the Pawnee tribe. Numbers at present, 400; twenty years ago, 18,000.

Mr. Catlin visited them in 1833, whilst with the Pawnees.

122. *Háw-che-ke-súg-ga*, He who Kills the Osages; chief of the tribe; an old man; necklace of grizzly bears' claws, and a handsome carved pipe in his hand.

(Painted in 1833, plate No. 139, page 27, vol. 2, Catlin's Eight Years.)

This tribe is merged with the Otoes. They resided with them on the Otoe Reservation in Nebraska until 1882, when they removed to Indian Territory, where they now are.

HÁW-CHE-KE-SÚG-GA, HE WHO KILLS THE OSAGES.
Chief of the Missouri. No. 122, page 76.
(Plate 139, Vol. II, Catlin's Eight Years.)

DAKOTA—MISSOURIAS.

The Missouriias are a tribe of Dakota descent, living on the Missouri River, their name being one given them by the Illinois, and means the people living by the muddy water. They style themselves *Nudarcha*. Were first heard of in 1673, as the first tribe up the river which bears their name. Became allies of the French at an early day, and assisted them in some of their operations against other tribes. Were hostile to the Spanish and also opposed to the ascendancy of English influence. In 1805, when Lewis and Clarke passed through their country, they numbered only 300 in all, living in villages south of the Platte, and at war with most of the neighboring tribes. They were affiliated with the Otoes, having deserted their own villages near the mouth of the Grand some time previously in consequence of their almost entire destruction by small-pox. Mr. Catlin found them with the Otoes in the Pawnee country in 1833. The two have ever since been classed as one tribe. In 1862 the combined tribes numbered 708, and in 1876 only 454. Since their consolidation with the Otoes their history has been the same as of that tribe.—W. H. Jackson, 1877.

PRESENT LOCATION AND CONDITION.

Now with the Otoes, a confederated tribe, at Ponca, Pawnee, and Otoe agency, Indian Territory. The consolidated Otoes and Missouriias at this agency numbered, in 1884, about 2,704; Otoes, 234; Missouriias, 40. Farmers and herders. Not increasing.

Agent Scott reports of them August 20, 1885:

I have but little to say for this tribe. Indeed I feel compelled to modify somewhat even the guardedly favorable opinion I expressed of them in my last report. They promise everything and perform nothing; they are easy and good natured, but intolerably lazy and shiftless. They are still possessed of the idea that they are rich and do not need to work. They are sharp, too. They are willing to pay a blacksmith and a carpenter for the mere nothings they want done, and to do all the work in their respective lines without asking the Indians to do any part of it. But they do not want a farmer, and have made a formal demand on me to abolish the place, pretending they know enough about farming. But the real reasons are they want his salary added to their annuity, and they don't want anybody around whose business it is to try to make them work. It seems exceedingly difficult for the Otoes and Missouriias to abandon their nomadic habits. They will leave their houses, and collecting around the agency, or on some other part of the reservation, erect a village of tents, where they will stay feasting and dancing until they are driven away, only to repeat the operation again and again during the year. While the above presents, as I think, fairly the prevailing temper of the tribe, I have, nevertheless, been able to force work enough out of them to entitle them to their rations under the rule, and a few, notably the half-breeds, have shown a commendable degree of enterprise in cultivating their crops and extending their farms.

That portion of the tribe which seceded some years ago, have been living on Deep Fork, in the neighborhood of the Sac and Fox Reservations, still obstinately refuse to return to their own reservation, preferring to lead a precarious and poverty-stricken existence, depending mainly upon the bounty of other Indians for subsistence, who can ill-afford the draft upon their resources.

RÍC-CA-REES.

[Arickarees: Laws of the United States. Arickarees: Indian Bureau, June 30, 1885.
Former names: Arickaree, Ricaree, Ree.]

A small but very hostile tribe of 2,500, on the west bank of the Missouri, 1,600 miles above its junction with the Mississippi; living in one village of earth-covered lodges.

Mr. Catlin painted these people in 1832, the same season that he visited the Mandans. The four persons whom he painted he found in the Mandan villages.

123. *Stán-au-pat*, the Bloody Hand; chief of the tribe. His face painted red with vermilion, scalping-knife in his hand; wearing a beautiful dress.

(Painted in 1852. Plate No. 82, page 204, vol. 1, Catlin's Eight Years.)

124. *Kah-béck-a*, the Twin; wife of the chief (No. 123).

(Painted at Mandan village in 1832. Plate No. 81, page 204, vol. 1, Catlin's Eight Years.)

125. *Pshán-shaw*, the Sweet-scented Grass; a girl of twelve years old, daughter of the chief (No. 123), full length, in a beautiful dress of the mountain sheep-skin, neatly garnished, and robe of the young buffalo.

(Painted in 1832. Plate No. 84, page 204, vol. 1, Catlin's Eight Years.)

The inner garment, which is like a slip or frock, is entire in one piece, and beautifully ornamented with embroidery and beads, with a row of elk's teeth passing across the breast, and a robe of the young buffalo's skin, tastefully and elaborately embroidered, gracefully thrown over her shoulders, and hanging down to the ground behind her.—*Ibid.*

126. *Páh-too-cá-ra*, He who Strikes; a distinguished brave.

(Painted in 1832. Plate No. 83, pages 203-204, vol. 1, Catlin's Eight Years.)

The operation of my brush always gains me many enthusiastic friends wherever I go amongst these wild folks; and in this village I have been unusually honored, and even *afflicted*, by the friendly importunities of one of these reverencing parasites (No. 126), who (amongst various other offices of hospitality and kindness which he has been bent upon extending to me) has insisted on, and for several nights been indulged in, the honor, as he would term it, of offering his body for my pillow, which I have not had the heart to reject, and of course *he* had not lacked the vanity to boast of as an act of signal kindness and hospitality on his part towards a *great* and a *distinguished stranger*?

I have been for several days suffering somewhat with an influenza, which has induced me to leave my bed on the side of the lodge and sleep on the floor, wrapped in a buffalo robe, with my feet to the fire in the center of the room, to which place the genuine politeness of my constant and watchful friend has as regularly drawn him, where his irresistible importunities have brought me night after night to the only alternative of using his bedaubed and bear-greased body for a pillow.

Being unwilling to deny the poor fellow the satisfaction he seemed to be drawing from this singular freak, I took some pains to inquire into his character, and learned that he was a Riccaree brave, by the name of *Páh-too-cá-ra* (He who Strikes), who is here with several others of his tribe on a friendly visit (though in a hostile village), and living as they are unprotected except by the mercy of their enemies. I think it probable, therefore, that he is ingeniously endeavoring thus to ingratiate himself in my affections, and consequently to insure my guardianship and influence for his protection. Be this as it may, he is rendering me kind services, and I have in return traced him on my canvas for immortality.—Page 204, vol. 1, Catlin's Eight Years.

MR. CATLIN'S NOTES ON THE ARICKAREE INDIANS.

When Lewis and Clarke first visited these people, thirty years since, it will be found by reference to their history that the Riccarees received and treated them with great kindness and hospitality; but owing to the system of trade, and the manner in which it has been conducted in this country, they have been inflicted with real or imaginary abuses, of which they are themselves, and the fur traders, the best judges; and for which they are now harboring the most inveterate feelings towards the whole civilized race.

The Riccarees are unquestionably a part of the tribe of Pawnees, living on the Platte River, some hundreds of miles below this, inasmuch as their language is nearly or quite the same; and their personal appearance and customs as similar as could be reasonably expected amongst a people so long since separated from their parent tribe, and continually subjected to innovations from the neighboring tribes around them; amongst whom, in their erratic wanderings in search of a location, they have been jostled about in the character, alternately, of friends and of foes.—Page 204, vol. 2, Catlin's Eight Years.

PAWNEES—ARICKAREES.

The Arickarees, Riccarees, or Rees, as variously written, call themselves Sa-nish, or Tanish, meaning "the people," a common form of expression among Indians to indicate their superiority. They were originally the same people as the Pawnees of the Platte River, their language being nearly the same. That they migrated upwards along the Missouri from their friends below is established by the remains of their dirt villages, which are yet seen along that river, though at this time mostly overgrown with grass. At what time they separated from the parent stock is not correctly known, though some of their locations appear to have been of very ancient date, at least previous to the commencement of the fur trade on the Upper Missouri. At the time when the old French and Spanish traders began their dealings with the Indians of the Upper Missouri, the Arickaree village was situated a little above the mouth of Grand River, since which time they have made several removals, and are now located at Fort Clark, in a former village of the Mandans.

The cabins or huts of the Arickarees and other stationary tribes are built by planting four posts in the ground in the form of a square, the posts being forked at the top to receive transverse beams. Against the beams other timbers are inclined, the lower extremities of which describe a circle, or nearly so, the interstices being filled with small twigs, the whole thickly overlaid with willows, rushes, and grass, and plastered over with mud laid on very thick. A hole is left on the top for smoke to pass out, and another at the side for a door. The door opens a few steps distant from the main building on the surface of the ground, from which, by a gradual descent through a covered passage, the interior of the hut is reached. The door is of wood, and the aperture large enough to admit a favorite horse to the family circle, which is often done. These buildings are located within fifteen or twenty feet of each other without any regard to regularity.

They cultivate considerable land, each family separating its little farm from their neighbors' by rush fences. Corn is their principal dependence, of which they raise considerable quantities. The work is done entirely by the women, the primitive hoe being their only implement. They generally have quite a surplus, which they trade to the Dakotas and to the fur companies.

The Arickarees are quite expert in manufacturing a very serviceable kind of pottery, neatly shaped, and well adapted for cooking purposes. They are of clay, hand-wrought, but not glazed.

At the present time they number 900, and are associated with 600 Gros Ventres and 420 Mandans at the Fort Berthold Agency, on the Upper Missouri, where 13,000

square miles have been set apart for them as their reservation. They have 500 acres under cultivation, and are receiving considerable assistance from the Government in the way of improved implements. Many houses are being built, and the more progressive Indians are abandoning the old mud lodges for them.—W. H. Jackson, 1877.

PRESENT LOCATION AND CONDITION.

On June 30, 1885, there were 544 Arickarees at Fort Berthold Agency, Dakota, with Gros Ventres and Mandans.

August 18, 1885, they numbered 435. Slowly decreasing.

June 30, 1884, the agent says:

Of the three tribes here, the Arickarees I consider the most progressive.

In 1885 the agent confirms the report of 1884.

MANDANS.

[Mandan: Laws of the United States. Mandan: Indian Bureau, June 30, 1885.]

(SEE-PO'HS-KA-NU-MA'H-KA'-KEE): PEOPLE OF THE PHEASANTS; PEOPLE OF THE BANK.

A small tribe of 2,000 souls, living in two permanent villages on the Missouri, 1,800 miles above its junction with the Mississippi. Earth-covered lodges; villages fortified by strong pickets, 18 feet high, and a ditch. [*This friendly and interesting tribe all perished by the small-pox and suicide in 1837 (three years after I lived amongst them), excepting about forty, who have since been destroyed by their enemy, rendering the tribe entirely extinct, and their language lost, in the short space of a few months!* The disease was carried amongst them by the traders, which destroyed in six months, of different tribes, 25,000!]

Mr. Catlin visited them in June, July, and August, 1832. They were then living in their villages, near the present town of Mandan, Dakota. Mr. Catlin's statement, in italics, above given, is not true in fact, as he was misinformed as to the fate of the Mandans. The Mandans, after their dreadful experience with the small-pox in 1838, joined the Arickarees, with whom they have since lived. (See subsequent page for further details.) Mr. Catlin expended more time and observation with and on the Mandans than any of the several Indian tribes that he visited.

The interesting and peculiar ceremonies observed are vouched for fully, as shown herein in the memoir of Mr. Catlin.

127. Ha-na-tá-nu-maúk, the Wolf Chief; head of the tribe, in a splendid dress; head-dress of raven-quills, and two *calumets*, or pipes of peace, in his hand. (Painted in 1832. Plate No. 49, page 92, vol. 1, Catlin's Eight Years.)

This man is head-chief of the nation, and familiarly known by the name of "Chef de Loup," as the French Traders call him; a haughty, austere, and overbearing man, respected and feared by his people rather than loved. The tenure by which this man holds his office is that by which the head-chiefs of most of the tribes claim, that of inheritance. It is a general, though not an infallible, rule amongst the numerous tribes of North American Indians that the office of chief belongs to the eldest son of a chief; provided he shows himself, by his conduct, to be equally worthy of it as any other in the nation; making it hereditary on a very proper condition—in default of which requisites, or others which may happen, the office is elective.

HA-NA-TÁ-NU-MAÚK, THE WOLF CHIEF.
Head of the tribe. Mandan, No. 127, page 80.
(Plate 49, Vol. I, Catlin's Eight Years.)

MÁN-TO-TÓH-PA, THE FOUR BEARS.

Second chief. Mandan, Nos. 128, 611, page 81.
(Plate 64, Vol. I, Catlin's Eight Years.)

MAH-TÓ-HE-HA, THE OLD BEAR.
A brave, and medicine man. Mandan, No. 129, page 81.
(Plate 55, Vol. I, Catlin's Eight Years.)

The dress of this chief was one of great extravagance and some beauty; manufactured of skins, and a great number of quills of the raven forming his stylish head-dress.—*Ibid.*

128. Máh-to-tóh-pa, the Four Bears; second chief, but the favorite and popular man of the nation; costume splendid, head-dress of war-eagles' quills and ermine, extending quite to the ground, surmounted by the horns of the buffalo and skin of the magpie.

(Painted 1832. Plate No. 64, page 145, vol. 1, Catlin's Eight Years.)

The next and second chief of the tribe is Mah-to-toh-pa (the Four Bears). This extraordinary man, though second in office, is undoubtedly the first and most popular man in the nation. Free, generous, elegant, and gentlemanly in his deportment—handsome, brave, and valiant; wearing a robe on his back, with the history of his battles emblazoned on it; which would fill a book of themselves, if properly translated. This, readers, is the most extraordinary man, perhaps, who lives at this day, in the atmosphere of nature's noblemen; and I shall certainly tell you more of him anon.—Mr. Catlin, *Ibid.*

129 Mah-tó-he-ha, the Old Bear; a very distinguished brave; but here represented in the character of a *Medicine Man*, or Doctor, with his *medicine* or *mystery* pipes in his hands, and foxes' tails tied to his heels, prepared to make his last visit to his patient, to cure him, if possible, by *hocus pocus* and magic.

(Painted 1832, Plate No. 55. Page 111, vol. 1, Catlin's Eight Years.)

I had trouble brewing also the other day from another source; one of the "*medicines*" commenced howling and haranguing around my domicile, amongst the throng that was outside, proclaiming that all who were inside and being painted were fools and would soon die; and very materially affecting thereby my popularity. I, however, sent for him and called him in the next morning, when I was alone, having only the interpreter with me; telling him that I had had my eye upon him for several days, and had been so well pleased with his looks, that I had taken great pains to find out his history, which had been explained by all as one of a most extraordinary kind, and his character and standing in his tribe as worthy of my particular notice; and that I had several days since resolved that as soon as I had practiced my hand long enough upon the others, to get the stiffness out of it (after paddling my canoe so far as I had) and make it to work easily and successfully, I would begin on his portrait, which I was then prepared to commence on that day, and that I felt as if I could do him justice. He shook me by the hand, giving me the "doctor's grip," and beckoned me to sit down, which I did, and we smoked a pipe together. After this was over, he told me that "he had no inimical feelings towards me, although he had been telling the chiefs that they were all fools, and all would die who had their portraits painted—that although he had set the old women and children all crying, and even made some of the young warriors tremble, yet he had no unfriendly feelings towards me, nor any fear or dread of my art." "I know you are a good man (said he), I know you will do no harm to any one, your medicine is great and you are a great 'medicine-man.' I would like to see myself very well—and so would all of the chiefs; but they have all been many days in this medicine-house, and they all know me well, and they have not asked me to come in and be *made alive* with paints—my friend, I am glad that my people have told you who I am—my heart is glad—I will go to my wigwam and eat, and in a little while I will come, and you may go to work"; another pipe was lit and smoked, and he got up and went off. I prepared my canvas and palette, and whistled away the time until twelve o'clock, before he made his appearance; having used the whole of the fore part of the day at his toilet, arranging his dress and ornamenting his body for his picture.

At that hour then, bedaubed and streaked with paints of various colors, with bear's grease and charcoal, with medicine-pipes in his hands and foxes tails attached to his heels, entered Mah-to-he-hah (the Old Bear, Plate 55, No. 129), with a train of his

own profession, who seated themselves around him; and also a number of boys, whom it was requested should remain with him, and whom I supposed it possible might have been pupils, whom he was instructing in the mysteries of *materia medica* and *hoca poca*. He took his position in the middle of the room, waving his eagle calumets in each hand, and singing his medicine-song which he sings over his dying patient, looking me full in the face until I completed his picture, which I painted at full length. His vanity has been completely gratified in the operation; he lies for hours together, day after day, in my room, in front of his picture, gazing intensely upon it; lights my pipe for me while I am painting—shakes hands with me a dozen times on each day, and talks of me, and enlarges upon my *medicine* virtues and my talents, wherever he goes; so that this new difficulty is now removed, and instead of preaching against me, he is one of my strongest and most enthusiastic friends and aids in the country.—*Ibid.*, pages 111, 112.

130. Mah-táhp-ta-a, He who rushes through the Middle; a brave, son of the former chief, called "the Four Men." Necklace of bears' claws.

(Painted in 1832-'33. Plate No. 50, page 92, vol. 1, Catlin's Eight Years.)

131. Máh-to-tóh-pa, the Four Bears; in *undress*, being in mourning, with a few locks of his hair cut off. His hair put up in plaits or slabs, with glue and red paint, a custom of the tribe. (No plate.)

The scars on his breast, arms, and legs show that he has several times in his life submitted to the propitiatory tortures represented in four paintings, Nos. 505, 506, 507, 508.

132. Seehk-hée-da, the Mouse-colored Feather, or "White Eyebrows"; a very noted brave, with a beautiful pipe in his hand; his hair quite yellow.

This man was killed by the Sioux and scalped two years after I painted his portrait; his scalp lies on the table, No. 10.

(Plate No. 51, page 92, vol. 1, Catlin's Eight Years.)

133. Mi-néek-ee-súnk-te-ka, the Mink; a beautiful Mandan girl, in mountain-sheep skin dress, ornamented with porcupine quills, beads, and elk's teeth.

(Painted in 1832-'33. Plate No. 52, page 92, vol. 1, Catlin's Eight Years.)

134. Sha-kó-ka, Mint.

A very pretty and modest girl, twelve years of age, with *gray hair!* peculiar to the Mandans. This unaccountable peculiarity belongs to the Mandans alone, and about one in twelve, of both sexes, and of all ages, have the hair of a bright silvery gray, and exceedingly coarse and harsh, somewhat like a horse's mane. The women usually have black eyes.

(Painted in 1832-'33. Plate No. 53, pages 92, 93, vol. 1, Catlin's Eight Years.)

135. U'n-ka-hah-hón-shee-kow, the Long Finger-nails; a brave.

136. Máh-tah'p-ta-hah, the One who rushes through the Middle.

137, 138, 139, 140, 141, 142. San-ja-ka-kó-koh, the Deceiving Wolf, and five others, in a group; names not preserved.

(Plate 54, page 95, vol. 1, Catlin's Eight Years.)

Shows the manner of wearing the hair amongst the Mandans; a method still preserved. The men wore their hair "banged." In Hayden's Photographic Collection, No. 1005 is an example—Me-ra-pa-ra-pa, or Lance; a brave, who is still living. This catalogue (see page 50) contains names of 4 Mandans, Nos. 1006, 1005, 1007, and 884, taken in 1879.

MAH-TÁHP-TA-A, HE WHO RUSHES THROUGH THE MIDDLE.

Mandan, No. 130, page 82.

(Plate 50, Vol. I, Catlin's Eight Years.)

SEEHK-HÉE-DA, THE MOUSE-COLORED FEATHER.

Mandan, No. 132, page 82.

(Plate 51, Vol. I, Catlin's Eight Years.)

MI-NÉEK-EE-SÚNK-TE-KA, THE MINK.

Mandan girl. No. 133, page 82.

(Plate 52, Vol. I, Catlin's Eight Years.)

SHA-KÓ-KA, MINT.

Mandan girl, with gray hair. No. 134, page 82.

(Plate 53, Vol. I, Catlin's Eight Years.)

SAN-JA-KA-KO-KOH, THE DECEIVING WOLF; with three other braves, woman, and child.
Showing manner of wearing the hair by male and female Mandans. Nos. 137-142, page 82.
(Plate 54, Vol. I, Catlin's Eight Years.)

MR. CATLIN'S NOTES ON THE MANDAN INDIANS.

Their women are beautiful and modest, and amongst the respectable families virtue is as highly cherished and as inapproachable as in any society whatever; yet, at the same time, a chief may marry a dozen wives if he pleases, and so may a white man; and if either wishes to marry the most beautiful and modest girl in the tribe, she is valued only equal, perhaps, to two horses, a gun, with powder and ball for a year, five or six pounds of beads, a couple of gallons of whisky, and a handful of awls.

The girls of this tribe, like those of most of these northwestern tribes, marry at the age of twelve or fourteen, and some at the age of eleven years; and their beauty, from this fact, as well as from the slavish life they lead, soon after marriage vanishes. Their occupations are almost continual, and they seem to go industriously at them, as if from choice or inclination, without a murmur.

The principal occupations of the women in this village consist in procuring wood and water, in cooking, dressing robes and other skins, in drying meat and wild fruit, and raising corn (maize). The Mandans are somewhat of agriculturists, as they raise a great deal of corn and some pumpkins and squashes. This is all done by the women, who make their hoes of the shoulder-blade of the buffalo or the elk, and dig the ground over instead of plowing it, which is consequently done with a vast deal of labor. They raise a very small sort of corn, the ears of which are not longer than a man's thumb. This variety is well adapted to their climate, as it ripens sooner than other varieties, which would not mature in so cold a latitude. The green-corn season is one of great festivity with them, and one of much importance. The greater part of their crop is eaten during these festivals, and the remainder is gathered and dried on the cob, before it has ripened, and packed away in *caches* (as the French call them), holes dug in the ground some six or seven feet deep, the insides of which are somewhat in the form of a jug, and tightly closed at the top. The corn, and even dried meat and pemican, are placed in these *caches*, being packed tight around the sides with prairie grass, and effectually preserved through the severest winters.

Corn and dried meat are generally laid in in the fall, in sufficient quantities to support them through the winter. These are the principal articles of food during that long and inclement season; and in addition to them, they oftentimes have in store great quantities of dried squashes and dried *pommes blanches*, a kind of turnip which grows in great abundance in these regions, and of which I have before spoken. These are dried in great quantities, and pounded into a sort of meal, and cooked with the dried meat and corn. Great quantities also of wild fruit of different kinds are dried and laid away in store for the winter season, such as buffalo-berries, service-berries, strawberries, and wild plums.

The buffalo meat, however, is the great staple and "staff of life" in this country, and seldom, if ever, fails to afford them an abundant and wholesome means of subsistence. There are, from a fair computation, something like 250,000 Indians in these western regions, who live almost exclusively on the flesh of these animals, through every part of the year. During the summer and fall months they use the meat fresh, and cook it in a great variety of ways, by roasting, broiling, boiling, stewing, smoking, &c.; and by boiling the ribs and joints with the marrow in them, make a delicious soup, which is universally used, and in vast quantities. The Mandans, I find, have no regular or stated times for their meals, but generally eat about twice in the twenty-four hours. The pot is always boiling over the fire, and any one who is hungry (either of the household or from any part of the village) has a right to order it taken off, and to fall to eating as he pleases. Such is an unvarying custom amongst the North American Indians, and I very much doubt whether the civilized world have in their institutions any system which can properly be called more humane and charitable. Every man, woman, or child in Indian communities is allowed to enter any one's lodge, and even that of the chief of the nation, and eat when they are hungry, provided misfortune or necessity has driven them to it. Even so can the poorest and most worthless drone of the nation; if he is too lazy to hunt or to supply himself, he

can walk into any lodge and every one will share with him as long as there is anything to eat. He, however, who thus begs when he is able to hunt, pays dear for his meat, for he is stigmatized with the disgraceful epithet of a poltroon and a beggar.

The Mandans, like all other tribes, sit at their meals cross-legged, or rather with their ankles crossed in front of them, and both feet drawn close under their bodies; or, which is very often the case also, take their meals in a reclining posture, with the legs thrown out, and the body resting on one elbow and forearm, which are under them. The dishes from which they eat are invariably on the ground or floor of the lodge, and the group resting on buffalo robes or mats of various structure and manufacture.

The position in which the women sit at their meals and on other occasions is different from that of the men, and one which they take and rise from again with great ease and much grace; by merely bending the knees both together, inclining the body back and the head and shoulders quite forward, they squat entirely down to the ground, inclining both feet either to the right or to the left. In this position they always rest while eating, and it is both modest and graceful, for they seem, with apparent ease, to assume the position and rise out of it without using their hands in any way to assist them.

These women, however, although graceful and civil, and ever so beautiful or ever so hungry are not allowed to sit in the same group with the men while at their meals. So far as I have yet traveled in the Indian country, I never have seen an Indian woman eating with her husband. Men form the first group at the banquet, and women and children and dogs all come together at the next, and these gormandize and glut themselves to an enormous extent, though the men very seldom do.

The Mandans are certainly a very interesting and pleasing people in their personal appearance and manners; differing in many respects, both in looks and customs, from all other tribes which I have seen. They are not a warlike people, for they seldom, if ever, carry war into their enemies' country; but when invaded show their valor and courage to be equal to that of any people on earth. Being a small tribe and unable to contend on the wide prairies with the Sioux and other roaming tribes, who are ten times more numerous, they have very judiciously located themselves in a permanent village, which is strongly fortified, and insures their preservation. By this means they have advanced further in the arts of manufacture; have supplied their lodges more abundantly with the comforts and even luxuries of life than any Indian nation I know of. The consequence of this is, that this tribe have taken many steps ahead of other tribes in manners and refinements, if I may be allowed to apply the word refinement to Indian life; and are, therefore, familiarly and correctly denominated by the traders and others who have been amongst them, "the polite and friendly Mandans."

There is certainly great justice in the remark, and so forcibly have I been struck with the peculiar ease and elegance of these people, together with the diversity of complexions, the various colors of their hair and eyes, the singularity of their language, and their peculiar and unaccountable customs, that I am fully convinced that they have sprung from some other origin than that of the North American tribes, or that they are an amalgam of natives with some civilized race.

Here arises a question of very great interest and importance for discussion, and, after further familiarity with their character, customs, and traditions, if I forget it not, I will eventually give it further consideration. Suffice it, then, for the present, that their *personal appearance* alone, independent of their modes and customs, pronounces them at once as more or less savage.

A stranger in the Mandan village is first struck with the different shades of complexion and various colors of hair which he sees in a crowd about him, and is at once almost disposed to exclaim that "these are not Indians."

There are a great many of these people whose complexions appear as light as half-breeds; and amongst the women particularly there are many whose skins are almost

white, with the most pleasing symmetry and proportion of features; with hazel, with gray, and with blue eyes; with mildness and sweetness of expression, and excessive modesty of demeanor, which render them exceedingly pleasing and beautiful.

Why this diversity of complexion I cannot tell, nor can they themselves account for it. Their traditions, so far as I have yet learned them, afford us no information of their having had any knowledge of white men before the visit of Lewis and Clarke, made to their village thirty-three years ago. Since that time there have been but very few visits of white men to this place, and surely not enough to have changed the complexions and customs of a nation. And I recollect perfectly well that Governor Clarke told me, before I started for this place, that I would find the Mandans a strange people and half white.

The diversity in the color of hair is also equally as great as that in the complexion; for in a numerous group of these people, and more particularly amongst the females, who never take pains to change its natural color, as the men often do, there may be seen every shade and color of hair that can be seen in our own country, with the exception of red or auburn, which is not to be found.

And there is yet one more strange and unaccountable peculiarity, which can probably be seen nowhere else on earth, nor on any rational grounds accounted for, other than it is a freak or order of Nature, for which she has not seen fit to assign a reason. There are very many of both sexes and of every age, from infancy to manhood and old age, with hair of a bright silvery gray, and in some instances almost perfectly white.

This singular and eccentric appearance is much oftener seen among the women than it is with the men, for many of the latter who have it seem ashamed of it, and artfully conceal it, by filling their hair with glue and black and red earth. The women, on the other hand, seem proud of it, and display it often in an almost incredible profusion, which spreads over their shoulders and falls as low as the knee. I have ascertained, on a careful inquiry, that about one in ten or twelve of the whole tribe are what the French call "*cheveux-gris*," or grayhairs, and that this strange and unaccountable phenomenon is not the result of disease or habit, but that it is unquestionably a hereditary character which runs in families, and indicates no inequality in disposition or intellect; and by passing this hair through my hands, as I often have, I have found it uniformly to be as coarse and harsh as a horse's mane, differing materially from the hair of other colors, which, amongst the Mandans, is generally as fine and as soft as silk.

The reader will at once see, by the above facts, that there is enough upon the faces and heads of these people to stamp them peculiar, when he meets them in the heart of this almost boundless wilderness, presenting such diversities of color in the complexion and hair, when he knows, from what he has seen and what he has read, that all other primitive tribes known in America are dark copper-colored, with jet black hair.

From these few facts alone the reader will see that I am amongst a strange and interesting people, and know how to pardon me if I lead him through a maze of novelty and mysteries to the knowledge of a strange yet kind and hospitable people, whose fate, like that of all their race, is sealed; whose doom is fixed, to live just long enough to be imperfectly known, and then to fall before the fell disease or sword of civilizing devastation.

The stature of the Mandans is rather below the ordinary size of man, with beautiful symmetry of form and proportion, and wonderful suppleness and elasticity; they are pleasingly erect and graceful, both in their walk and their attitudes; and the hair of the men, which generally spreads over their backs, falling down to the hams, and sometimes to the ground, is divided into plaits or slabs of two inches in width, and filled with a profusion of glue and red earth or vermilion, at intervals of an inch or two, which becoming very hard, remains in and unchanged from year to year.

This mode of dressing the hair is curious, and gives to the Mandans the most singular appearance. The hair of the men is uniformly all laid over from the forehead back-

wards; carefully kept above and resting on the ear, and thence falling down over the back, in these flattened bunches, and painted red, extending oftentimes quite onto the calf of the leg, and sometimes in such profusion as almost to conceal the whole figure from the person walking behind them. In the portrait of San-ja-ka-ko-kah (the deceiving wolf, Plate 54; No. 137), where he is represented at full length, with several others of his family around him in a group, there will be seen a fair illustration of these and other customs of these people.

The hair of the women is also worn as long as they can possibly cultivate it, oiled very often, which preserves on it a beautiful gloss and shows its natural color. They often braid it in two large plaits, one falling down just back of the ear, on each side of the head; and on any occasion which requires them to "put on their best looks," they pass their fingers through it, drawing it out of braid, and spreading it over their shoulders. The Mandan women observe strictly the same custom, which I observed amongst the Crows and Blackfeet (and, in fact, all other tribes I have seen, without a single exception), of parting the hair on the forehead, and always keeping the crease or separation filled with vermilion or other red paint. This is one of the very few little (and apparently trivial) customs which I have found amongst the Indians without being able to assign any cause for it, other than that "they are Indians," and that this is an Indian fashion.

In mourning, like the Crows and most other tribes, the women are obliged to crop their hair all off; and the usual term of that condolence is until the hair has grown again to its former length.

When a man mourns for the death of a near relation the case is quite different; his long, valued tresses, are of much greater importance, and only a lock or two can be spared. Just enough to tell of his grief to his friends, without destroying his most valued ornament, is doing just reverence and respect to the dead.

To repeat what I have said before, the Mandans are a pleasing and friendly race of people, of whom it is proverbial amongst the traders and all who ever have known them, that their treatment of white men in their country has been friendly and kind ever since their first acquaintance with them. They have ever met and received them, on the prairie or in their villages, with hospitality and honor.

They are handsome, straight, and elegant in their forms; not tall, but quick and graceful; easy and polite in their manners, neat in their persons and beautifully clad. When I say "neat in person and beautifully clad," however, I do not intend my readers to understand that such is the case with them all, for among them and most other tribes, as with the enlightened world, there are different grades of society--those who care but little for their personal appearance, and those who take great pains to please themselves and their friends. Amongst this class of personages, such as chiefs and braves, or warriors of distinction and their families, and dandies or exquisites (a class of beings of whom I shall take due time to speak in a future letter), the strictest regard to decency and cleanliness and elegance of dress is observed; and there are few people, perhaps, who take more pains to keep their persons neat and cleanly than they do.

At the distance of half a mile or so above the village is the customary place where the women and girls resort every morning in the summer months to bathe in the river. To this spot they repair by hundreds, every morning at sunrise, where, on a beautiful beach, they can be seen running and glistening in the sun, whilst they are playing their innocent gambols and leaping into the stream. They all learn to swim well, and the poorest swimmer amongst them will dash fearlessly into the boiling and eddying current of the Missouri, and cross it with perfect ease. At the distance of a quarter of a mile back from the river extends a terrace or elevated prairie, running north from the village, and forming a kind of semicircle around this bathing-place; and on this terrace, which is some twenty or thirty feet higher than the meadow between it and the river, are stationed every morning several sentinels, with their bows and arrows in hand to guard and protect this sacred ground from the approach of boys or of men from any direction.

At a little distance below the village, also, is the place where the men and boys go to bathe and learn to swim. After this morning ablution, they return to their village, wipe their limbs dry, and use a profusion of bear's grease through their hair and over their bodies.

The art of swimming is known to all the American Indians; and perhaps no people on earth have taken more pains to learn it, nor any who turn it to better account. Pages 93-96, 121-123, vol. 1, Catlin's Eight Years. See also, Itinerary for 1832.

DAKOTA—MANDANS.

The Mandans, or Mi-ah'-ta-nees, "people on the bank," have resided on the Upper Missouri for a long time, occupying successively several different places along the river. In 1772 resided 1,500 miles above the mouth of the Missouri, in nine villages located on both sides of the river. Lewis and Clarke found them, in 1804, 100 miles farther up in only two villages, one on each side of the river. Near them were three other villages belonging to the Minnitarees and Ahnahaways.

In the year 1833 these Indians were in their most prosperous state industrious, well armed, good hunters and good warriors, in the midst of herds of buffalo mostly within sight of the village, with large cornfields, and a trading-post from which they could at all times obtain supplies, and consequently at that time they might have been considered a happy people. In their personal appearance, prior to the ravages of the small-pox, they were not surpassed by any nation in the Northwest. The men were tall and well made, with regular features and a mild expression of countenance not usually seen among Indians. The complexion, also, was a shade lighter than that of other tribes, often approaching very near to some European nations, as the Spaniards. Another peculiarity was that some of them had fair hair, and some gray or blue eyes, which are very rarely met with among other tribes. A majority of the women, particularly the young, were quite handsome, with fair complexions, and modest in their deportment. They were also noted for their virtue. This was regarded as an honorable and most valuable quality among the young women, and each year a ceremony was performed, in the presence of the whole village, at which time all the females who had preserved their virginity came forward, struck a post, and challenged the world to say aught derogatory of their character.

In these palmy days of their prosperity much time and attention was given to dress, upon which they lavished much of their wealth. They were also very fond of dances, games, races, and other manly and athletic exercises. They were also a very devotional people, having many rites and ceremonies for propitiating the Great Spirit, practicing upon themselves a self-torture but little less severe than that of Hindoo devotees.

In the spring of 1838 that dreaded scourge of the Indians, small-pox, made its appearance among the Mandans, brought among them by the employés of the fur company. All the tribes along the river suffered more or less, but none approached so near extinction as the Mandans. When the disease had abated, and when the remnant of this once powerful nation had recovered sufficiently to remove the decaying bodies from their cabins, the total number of grown men was twenty-three, of women forty, and of young persons sixty or seventy. These were all that were left of the eighteen hundred souls that composed the nation prior to the advent of that terrific disease.

The survivors took refuge with the Arickarees, who occupied one of their deserted villages, but retained their former tribal laws and customs, preserving their nationality intact, refusing any alliances with surrounding tribes. The two tribes have lived together since then upon terms of excellent friendship. They now number 420, living in dome-shaped earthen houses, like the Pawnees, which are, however, being gradually replaced by log houses.—W. H. Jackson, 1877.

In numbers 379, 392, 431, 433, 435, 440, 455, 456, 464, 476, 498, 502, 503, 504, 505, 506, and 507, herein, will be found pictures of life amongst and customs of the Mandans, with full descriptive text by Mr. Catlin.

In Hayden's Catalogue of Photographs of Indians will also be found several photographs of Mandans taken in 1874, viz, Nos. 1005, 1006, 1007, and 884.

PRESENT LOCATION AND CONDITION.

On June 30, 1884, there were 311 Mandans at Fort Berthold Agency, Dakota, and on August 18, 1885, 340. Farmers and herders.

The agent reported, August 5, 1884, that he was informed that some 200 Gros Ventres and Mandans belonging to his agency were at Fort Buford desirous of returning. How many Mandans he did not state.

Abram J. Gifford, agent, reports August 18, 1885, that 115 Gros Ventres and 70 Mandans—in all, 185—are off the reservation:

They are living about forty miles west of Fort Berthold, where they have settled in a village, supporting themselves by hunting, fishing, &c. This band of Indians, under the leadership of Crow Flies High, quite a noted Gros Ventre character, separated from the bands of Arickarees, Gros Ventres, and Mandans of this place several years ago, owing to a disagreement on the part of Crow Flies High and the present Gros Ventres chief in regard to the elevation of the former to the distinguished honor of chieftainship. Being defeated in his ends, Crow Flies High and his followers migrated to Fort Buford, 120 miles west of here, and remained there, supporting themselves till last autumn, when they were ordered away by the commanding officer at the post and settled on the Little Knife River, where they are now. They are, however, gradually coming back to Fort Berthold, prompted in so doing from the fact of seeing so many of our Indians endeavoring to secure their own subsistence by plowing and cultivating land allotted to them and which seems to create in them a strong desire to do likewise.

The total number of Mandans reported at Fort Berthold Agency and near Fort Buford in August, 1885, was 410. The agent further reports:

The conduct of the Indians on this reservation for the past year has been, indeed, remarkable. I am sure that there is not nor could there be produced a band of so many whites among whom so little crime has been committed.

SHI-ENNE.

[Cheyenne: Laws of the United States. Cheyenne: Indian Bureau, June, 1885.]

A small but very valiant tribe of 3,000, neighbors of the Sioux, on the west, between the Black Hills and the Rocky Mountains; a very tall race of men, second in stature to the Osages.

Mr. Catlin saw them in 1834. He met the subjects of these two pictures in the camp of the Sioux, at the mouth of Teton River, Upper Missouri.

143. Né-hee-ó-ee-wóo-tis; the Wolf on the Hill; chief of the tribe; a noble and fine-looking fellow. This man has been known to own one hundred horses at one time. Painted in 1834.

(Plate No. 115, page 2, vol. 2, Catlin's Eight Years.)

The chief represented in this picture was clothed in a handsome dress of deer-skins, very neatly garnished with broad bands of porcupine-quill work down the

sleeves of his shirt and his leggings, and all the way fringed with scalp locks. His hair was very profuse, and flowing over his shoulders; and in his hand he held a beautiful Sioux pipe, which had just been presented to him by Mr. McKenzie, the trader. This was one of the finest looking and most dignified men that I have met in the Indian country, and, from the account given of him by the traders, a man of honor and strictest integrity.—*Ibid.*

144. *Tis-se-w6o-na-tis*; She who Bathes her Knees; wife of the chief (No. 143); her hair in braid. Painted 1834.

(Plate No. 116, page 2, vol. 2, Catlin's Eight Years.)

The woman was comely and beautifully dressed; her dress of the mountain sheepskins tastefully ornamented with quills and beads, and her hair plaited in large braids that hung down her back.

There is no finer race of men than these in North America, and were superior in stature, excepting the Osages; scarcely a man in the tribe, full grown, who is less than six feet in height. The Shiennes are undoubtedly the richest in horses of any tribe on the continent, living in a country, as they do, where the greatest herds of wild horses are grazing on the prairies, which they catch in great numbers and vend to the Sioux, Mandans, and other tribes, as well as to the fur traders.

These people are the most desperate set of horsemen and warriors, having carried on almost unceasing wars with the Pawnees and Blackfeet time out of mind.—Page 2, vol. 2, Catlin's Eight Years.

ALGONKIN—CHEYENNES.

Dr. D. G. Brinton writes of "The Algonkin Stock" as follows:

About the period 1500-1600 those related tribes whom we now know by the name of Algonkins were at the height of their prosperity. They occupied the Atlantic coast from the Savannah River on the south to the Strait of Belle Isle on the north. The whole of Newfoundland was in their possession; in Labrador they were neighbors to the Eskimos; their northernmost branch, the Crees, dwelt along the southern shores of Hudson Bay, and followed the streams which flow into it from the west, until they met the Chipeways, closely akin to themselves, who roamed over the watershed of Lake Superior. The Blackfeet carried a remote dialect of their tongue quite to the Rocky Mountains, while the fertile prairies of Illinois and Indiana were the homes of the Miamis. The area of Ohio and Kentucky was very thinly peopled by a few of their roving bands; but east of the Alleghanies, in the valleys of the Delaware, the Potomac, and the Hudson, over the barren hills of New England and Nova Scotia, and throughout the swamps and forests of Virginia and the Carolinas, their osier cabins and palisadoed strongholds, their maize fields and workshops of stone implements were numerous located.

It is needless for my purpose to enumerate the many small tribes which made up this great group. The more prominent were the Micmacs of Nova Scotia, the Abnakis of Maine, the Pequots and Narragansets in New England, the Mohegans of the Hudson, the Lenape on the Delaware, the Nanticokes around Chesapeake Bay, the Pascataway on the Potomac, and the Powhatans and Shawnees further south, while between the Great Lakes and the Ohio River were the Ottawas, the Illinois, the Potawatomies, the Kikapoos, Piankishaws, etc.

The dialects of all these were related, and evidently at some distant day had been derived from the same primitive tongue. Which of them had preserved the ancient forms most closely it may be premature to decide positively, but the tendency of modern studies has been to assign that place to the Cree—the northernmost of all.

We cannot erect a genealogical tree of these dialects. It is not probable that they branched off, one after another, from a common stock. The ancient tribes each took their several ways from a common center, and formed nuclei for subsequent develop-

ment. We may, however, group them in such a manner as roughly to indicate their relationship. This I do below. [The numbers to the left refer to the pages of Mr. Catlin's (this) catalogue, where the tribes noted can be found.—T. D.]

Granting, as we must, some common geographical center for these many dialects, the question where this was located becomes an interesting one.

More than one attempt to answer it has been made. Mr. Lewis H. Morgan thought there was evidence to show that the valley of the Columbia River, Oregon, "was the initial point from which the Algonkin stock emigrated to the Great Lake region, and thence to the Atlantic coast."* This is in direct conflict with the evidence of language, as the Blackfoot or Satsika is the most corrupt and altered of the Algonkin dialects. Basing his argument on this evidence, Mr. Horatio Hale reaches a conclusion precisely the reverse of that of Morgan. "The course of migration of the Indian tribes," writes Mr. Hale, "has been from the Atlantic coast westward and southward. The traditions of the Algonkins seem to point to Hudson's Bay and the coast of Labrador."† This latter view is certainly that which accords best with the testimony of language and of history.

We know that both Chipeways and Crees have been steadily pressing westward since their country was first explored, driving before them the Blackfeet and Dakotas.‡

The Cree language is built upon a few simple, unchangeable radicals and elementary words, denoting being, relation, energy, etc.; it has extreme regularity of construction, a single negative, is almost wholly verbal and markedly incomparative, has its grammatical elements better defined than its neighbors, and a more constant phonetic system.§ For these and similar reasons we are justified in considering it the nearest representative we possess of the primitive Algonkin tongue, and, unless

strong grounds to the contrary are advanced, it is proper to assume that the purest dialect is found nearest the primeval home of the stock.—Daniel G. Brinton, A. M., M. D., 1885, "The Lenapé and their Legends."

Mr. Jackson says of the Algonkins:

Early in the seventeenth century the Algonkins were the largest family of North American Indians within the present limits of the United States, extending from Newfoundland to the Mississippi, and from the waters of the Ohio to Hudson's Bay and Lake Winnipeg. Northeast and northwest of them were the Eskimos and the Athabascas; the Dakotas bounded them on the west, and the Mobilian tribes, Catawbias, Natchez, &c., on the south. Within this region also dwelt the Iroquois and many detached tribes from other families. All the tribes of the Algonkins were nomadic, shifting from place to place as the fishing and hunting upon which they depended required. There has been some difficulty in properly locating the tribe from which the family has taken its name, but it is generally believed they lived on the Ottawa River, in Canada, where they were nearly exterminated by their enemies, the Iroquois. The only remnant of the tribe at this time is at the Lake of the Two Mountains.

Of the large number of tribes forming this family, many are now extinct, others so reduced and merged into neighboring tribes as to be lost, while nearly all of the rest have been removed far from their original hunting-grounds. The Lenni Lenape, from the Delaware, are now leading a civilized life far out on the great plains west of the Missouri, and with them are the Shawnees from the south and the once powerful Pottawatomies, Ottawas, and Miamis from the Ohio Valley.—W. H. J., 1877.

CHEYENNES.

This nation has received a variety of names from travelers and the neighboring tribes, as Shyennes, Shiennes, Cheyennes, Chayennes, Sharas, Shawhays, Sharshas, and by the different bands of Dakotas, Shai-en-a or Shai-é-la. With the Blackfeet, they are the most western branch of the great Algonkin family. When first known, they were living on the Chayenne or Cayenne River, a branch of the Red River of the North, but were driven west of the Mississippi by the Sioux, and about the close of the last century still farther west across the Missouri, where they were found by those enterprising travelers Lewis and Clarke in 1803. On their map attached to their report they locate them near the eastern face of the Black Hills, in the valley of the great Shyenne River, and state their number at 1,500 souls. Their first treaty with the United States was made in 1825, at the mouth of the Teton River. They were then at peace with the Dakotas, but warring against the Pawnees and others. Were then estimated, by Drake, to number 3,250.

During the time of Long's expedition to the Rocky Mountains, in 1819 and 1820, a small portion of the Cheyennes seem to have separated themselves from the rest of their nation on the Missouri, and to have associated themselves with the Arapahoes who wandered about the tributaries of the Platte and Arkansas, while those who remained affiliated with the Ogalallas, these two divisions remaining separated until the present time. Steps are now being taken, however, to bring them together on a new reservation in the Indian Territory.

Up to 1862 they were generally friendly to the white settlers, when outbreaks occurred, and then for three or four years a costly and bloody war was carried on against them, a notable feature of which was the Sand Creek or Chivington massacre, November 29, 1864. "Since that time there has been constant trouble. * * * In 1867 General Hancock burned the village of the Dog Soldiers, on Pawnee Fork, and another war began, in which General Custer defeated them at Washita, killing Black Kettle and 37 others." The northern bands have been generally at peace with the whites, resisting many overtures to join their southern brethren.—W. H. Jackson, 1877.

The Southern Cheyennes, partially under Black Kettle, and Arapahoes, along with other Indians in the military division of the Missouri,

from 1868 to 1869, were in open warfare against the whites. Generals Sheridan, Custer, Carr, and others led the troops against them. They were captured and taken to Camp Supply, Indian Territory, in the month of February, 1869. They were, however, a constant source of anxiety to the military commanders, and a portion of them held out. Finally, in March, 1875, the remainder of the Southern Cheyennes surrendered, under chief "Stone Calf," at Fort Sill, and went on their present reservation in Indian Territory, and have ever since remained there.

The Northern Cheyennes, a fierce and warlike band, were constantly on raids against the whites in the years up to 1876. In 1876 they joined Sitting Bull and the Sioux, and aided in the massacre of Custer and his men on the Rose Bud in July. In 1877 they surrendered to the United States, and were first sent to Fort Robinson, Nebraska, and finally to Indian Territory, and placed on a reservation with the Southern Arapahoes at Fort Reno, August 8, 1877. They numbered about 1,000 when they surrendered. Dissatisfied with this location the Government, in 1881 and 1883, removed them north to the Pine Ridge Agency.

September 9, 1878, about a third of the Northern Cheyennes escaped from Fort Reno, and, under the leadership of "Dull Knife," "Wild Hog," "Little Wolf," and other chiefs started north to rejoin their friends in the country where they formerly resided. The Army pursued them, a running fight ensued, resulting in killing of many soldiers and the massacre by the Indians of settlers, men and women. They were finally captured in Nebraska in October, 1878, and ordered to be returned to Indian Territory. In January, 1879, being then at Fort Robinson, Nebraska, they arose in revolt, and many of them were killed. The remainder were returned to Indian Territory.

In 1881 and 1883, under authority of an act of Congress, the Northern Cheyennes were removed to Pine Ridge Agency, Dakota, where they now reside with Red Cloud's Sioux. They lost in these raids, between 1878 and 1881, more than 500 of their tribe.

THE OUTBREAK OF 1885.

During the summer of 1885 the Cheyennes and Arapahoes became restless and rebellious. "Stone Calf" and "Flying Hawk," "Little Robe," and "Spotted Horse," chiefs, led the "dog soldiers," a band of young men, a semi-military organization, bloodthirsty and constantly in crime; squaw men (*i. e.*, white men married to squaws, and living with the Indians) also aided. Troops were hurried to Fort Reno, near the Cheyenne and Arapaho Agency, in Indian Territory, and by a strong show of force a serious outbreak prevented. The principal reason for the attempted revolt and raid was that the agent and Government desired the Indians to work, either as farmers or herders.

Lieutenant-General Sheridan assumed command in person, and the anticipated Indian war subsided.

Agent D. B. Dyer, July 22, 1885, makes an exhaustive report as to the conditions of the Cheyennes and Arapahoes. He favors their being disarmed. He gives the following interesting data in the same report:

THE CHEYENNES.

On Mondays we issue rations. At the beef corral a large concourse of Indians assembles for beef, and at the commissary for flour. When the cattle are issued they have an exciting time; the frightened and desperate animals rush madly around pursued by from one to a dozen savages, yelling, whooping, and firing their guns, reminding one of the early days when buffalo-hunting was their chief sport. When the beef is killed the voracious bucks and their families eat the raw entrails with great satisfaction. The squaws take charge of the carcass, dry the meat, and the "buck" takes the hide to the traders. Such an assembly would furnish a study for an artist—Indians, ponies, and dogs of all ages, sizes, and appearances. Nearly all wear blankets, but many have on some single garment of civilization.

These Indians are a religious people in their way, and do not seem to doubt the immortality of man. I have never opposed their "medicine-making," only so far as to try to protect those who do not longer believe in it from being compelled to attend, and this I think should be done by all means. The "dog soldiers" round up all these people and make them attend, or risk their property and lives in the attempt to resist their mandates. They live in "teepees" that one white man would feel cramped in, but dozens of Indians crowd in and enjoy the social dance, keeping time to the monotonous tom-tom by chanting and howling.

A strange sight is their "medicine-dance"—fascinating, weird scene, their bodies naked from the waist up. A number of braves enter the "medicine lodge." They gash their arms and legs, and pierce holes in their chests, pass ropes through the holes and suspend themselves from the center of the lodge until their struggling tears the flesh loose. Each one has a whistle, and keeping their eyes on the charm, they dance night and day without food or water until exhausted. These "medicines" are a record of terrible suffering, endured with indomitable heroism, which sometimes ends in death. Such evidence of devotion in the performance of duty is worthy of a better religion.

The "dog soldiers" are a sort of military organization, or fighting band, which they keep up, composed of the most daring, bloodthirsty young men of the tribe. For years past they have been very troublesome. They commit crimes constantly and demand heavy tributes for the privilege of driving through their country. Many of the Indians who commit such crimes are known to me, but I have thus far been powerless to arrest or punish them. Some of the more intelligent Indians deprecate such a state of affairs, but the restless, savage, and dishonest portion of them see only the present gain, and cannot or do not care if the money for their deviltry is paid by the Government, as in the Oburn case. To say that such a state of affairs is demoralizing in the extreme is putting the case mildly, and the Department should have checked their course soon after I made my first report, calling for five hundred troops.

Congress passed a law last winter making any offense committed by an Indian a crime, if the same would have been a crime under the United States law, when committed by a white man. This is all right, but up to the present time there has never been any power here sufficiently strong to enforce it. It is now greatly to be hoped, not only for the future good of the Indian, but for the protection of the property of others, that the law will be enforced.—D. B. Dyer, 1885.

The Rev. S. S. Haury, Menmonite missionary, July 31, 1885, at the Cheyenne Reservation, makes the following suggestion:

I cannot leave this point without making a few remarks on the matter of medicine-dances. I must repeat what I said in my report to you last year, viz: "Whilst I do

not believe that these dances ought to be prohibited by force, as they are dear and sacred to them, being a part of their religion, though barbarous and in some ways cruel it may be, I do, on the other hand, think protection should be given those who do not wish to participate in those 'medicine-dances' any longer, but would rather tend to their fields and cattle." But how can we expect that the Cheyennes will make any advance toward civilization at all as long as our Government will allow their young "braves" to be armed better than even the troops of the United States are, and to intimidate and threaten the lives of such of their own people who would like to break loose from their tribal connections and customs to enter into a better way?

PRESENT LOCATION AND CONDITION.

On June 30, 1885, there were said to be 3,905 Southern Cheyennes at Cheyenne and Arapaho Agency, Indian Territory.

The agent reports:

Are uncivilized; have the manners, ways, customs, superstitions, &c., which have been attached to their race for generations gone by. They are insolent, headstrong, domineering, and hard to restrain. They have never been whipped, and boast that they could wipe us out at any time.

On September 1, 1884, there were 500 Northern Cheyennes at Pine Ridge Agency, Dakota.

The agent writes:

These Indians remain in the non-progressive condition peculiar to them for several years past.

September 10, 1885, there were 494 Cheyennes at the same agency; steadily decreasing.

These Cheyennes were removed from the Cheyenne Reservation in Indian Territory in 1881, and Little Chief's band in 1883. They are the remnant of the Northern Cheyennes, 1,000 in number, captured in the Sitting Bull campaign of 1876-77. They were sent to Indian Territory from Northern Nebraska in 1877.

The Arapahos and Cheyennes, at the Cheyenne and Arapaho Agency, Indian Territory, in 1884, were enumerated at a total of 6,271 souls. A census taken in 1885 showed less than 3,600.

A large series of photographs of Cheyennes can be found in the Hayden Catalogue, pages 6 to 7, taken from 1862 to 1877.

FLAT HEADS OR NEZ PERCÉS.

[Nez Percé: Laws of the United States. Nez Percé, Indian Bureau, 1885.]

On the headwaters of the Columbia, west of the Rocky Mountains.

(Plate No. 207, page 108, vol. 2, Catlin's Eight Years.)

146. H'co-a-h'co-a-h'cotes-min; No Horns on his Head; a brave, a very handsome man, in a beautiful dress.
(Plate No. 208, page 108, vol. 2, Catlin's Eight Years.)

HEE-OH'KS-TE-KIN, THE RABBIT'S SKIN LEGGINS.

Nez Percé, No. 145, page 94.

(Plate 207, Vol. II, Catlin's Eight Years.)

H'CO-A-H'CO-A-H'COTES-MIN, NO HORNS ON HIS
HEAD.

Nez Percé, No. 146, page 94.

(Plate 208, Vol. II, Catlin's Eight Years.)

Mr. Catlin did not visit the Nez Percés until 1854-'55, on his second journey through the West.

Numbers 145 and 146 are young men of the Nez Percé tribe.

These two men, when I painted them, were in beautiful Sioux dresses, which had been presented to them in a talk with the Sioux, who treated them very kindly, while passing through the Sioux country. These two men were part of a delegation that came across the Rocky Mountains to Saint Louis, a few years since, to inquire for the truth of a representation which they said some white man had made among them, "that our religion was better than theirs, and that they would all be lost if they did not embrace it."

Two old and venerable men of this party died in Saint Louis, and I traveled two thousand miles, companions with these two young fellows, toward their own country, and became much pleased with their manners and dispositions.

The last mentioned of the two died near the mouth of the Yellowstone River, on his way home, with disease which he had contracted in the civilized district; and the other one I have since learned arrived safely among his friends, conveying to them the melancholy intelligence of the deaths of all the rest of his party; but assurances at the same time from General Clarke and many reverend gentlemen, that the report which they had heard was well founded; and that missionaries, good and religious men, would soon come among them to teach this religion, so that they could all understand and have the benefits of it.

When I first heard the report of the object of this extraordinary mission across the mountains, I could scarcely believe it; but, on conversing with General Clarke, on a future occasion, I was fully convinced of the fact; and I, like thousands of others, have had the satisfaction of witnessing the complete success that has crowned the bold and daring exertions of Mr. Lee and Mr. Spalding, two reverend gentlemen who have answered in a Christian manner to this unprecedented call; and with their wives have crossed the most rugged wilds and wildernesses of the Rocky Mountains, and triumphantly proved to the world that the Indians, in their native wilds, are a kind and friendly people, and susceptible of mental improvement.

I had long been of the opinion, that to insure success, the exertions of pious men should be carried into the heart of the wilderness, beyond the reach and influence of civilized vices; and I so expressed my opinion to the Rev. Mr. Spalding and his lady, in Pittsburgh, when on their way, in their first tour to that distant country. I have seen the Rev. Mr. Lee and several others of the mission, several years since the formation of their school, as well as several gentlemen who have visited their settlement, and from all I am fully convinced of the complete success of these excellent and persevering gentlemen in proving to the world the absurdity of the assertion that has often been made "that the Indian can never be civilized or Christianized." Their uninterrupted transit over such a vast and wild journey, also, with their wives on horseback, who were everywhere on their way, as well as among the tribes where they have located, treated with the utmost kindness and respect, bears strong testimony to the assertions so often made by travelers in those countries that these are, in their native state, a kind and excellent people.—G. C.

The story is that four Flathead Indians of the Nez Percé tribe in 1832, having heard from a trapper of the white man's God and of the book that told of the Great Spirit, resolved to cross to the white men and find its truth and the book. Two of these were old men, and had seen and met William Clarke, of Lewis & Clarke, on the famous expedition of exploration of the Louisiana purchase. They heard that he was in Saint Louis; so across the mountains and plains they traveled, until in May or June, 1832, they reached him. Governor Clarke was

then superintendent of Indian affairs for the Northwest. They met him and explained their mission. While in Saint Louis the two old men died. The two younger men (Nos. 145 and 146, herein), after an interview with Governor Clarke, telling their mission and its failure, started to return to the Upper Columbia on the steamer Yellowstone, the first steamboat to navigate the waters of the Yellowstone. On this boat the two Indians were fellow passengers with Mr. Catlin. (See No. 311, a view of the steamer with the Indians on the deck.) A young man, it is said, a clerk in Governor Clarke's office, was present at the last interview with the Nez Percés. After their departure this clerk mentioned the matter to persons at Pittsburgh. Mr. Catlin, on his return from the Yellowstone in 1833, was asked at Pittsburgh about this incident. He thought the story of the search for the book improbable, as the two Indians in their journey with him up the river on the steamboat had not even alluded to it (one of them died near the mouth of the river). Mr. Catlin wrote to Governor Clarke, who confirmed the story, and then in his letter (No. 48) to the Commercial Advertiser, New York, he wrote of this singular mission.

The attention attracted by the publication and the incident resulted in action by the American Board of Commissioners for Foreign Missions and of the Methodist Board of Missions.

Jason and Daniel Lee, brothers, along with other divines, were sent out to Oregon in 1835 by the Methodists, and the now famous Rev. Marcus Whitman and Dr. Samuel Parker in 1836. The journey lasted from six to eight months.

Mr. Catlin in 1836 met Rev. H. H. Spalding and wife at Pittsburgh, who were on their way to Oregon as missionaries, and, in a conversation, detailed to them the above incident and others of Indian life.

No more romantic incident than this can be found in Northwestern history—the four Nez Percé Indians traveling thousands of miles in search of the book, looking for the white man's Deity. Still the Jesuits had been missionaries among these same Indians for scores of years prior to this time. Lewis and Clarke found many of the "Black Gowns" with the Indians.

This incident was enough to excite the mind and heart of denominational devotees. Men and women were found to abandon home and friends, to suffer privations, and some at last to meet death at the hands of the savages whose condition they were trying to better.

The economic results of these early Northwestern Protestant missions beginning in 1835-'36, and the political consequences following, are most graphically detailed in "Oregon; the Struggle for Possession, by William Barrows," Boston, Houghton, Mifflin & Co., 1884, as well as the partial results of these missions and the fate of Whitman and other missionaries. Dr. Whitman and his wife and thirteen or more associates were murdered November 29, 1847. See also "History of Indian Missions on the Pacific Coast," by Rev. Myron Eells, 1882.

Rev. H. H. Spalding founded the Nez Percé mission in 1838 near Lapwai, Idaho, and spent more than thirty years in charge of it. He is buried at Lapwai.

FLATHEADS AND NEZ PERCÉ.

Mr. Catlin wrote the following in 1832 from information:

These are a very numerous people, inhabiting the shores of the Columbia River, and a vast tract of country lying to the south of it, and living in a country which is exceedingly sterile and almost entirely, in many parts, destitute of game for the subsistence of the savage; they are mostly obliged to live on roots, which they dig from the ground, and fish which they take from the streams; the consequences of which are, that they are generally poor and miserably clad, and in no respect equal to the Indians of whom I have heretofore spoken, who live on the east of the Rocky Mountains, in the ranges of the buffaloes, where they are well fed, and mostly have good horses to ride, and materials in abundance for manufacturing their beautiful and comfortable dresses.

The people generally denominated Flatheads are divided into a great many bands, and although they have undoubtedly got their name from the custom of flattening the head, yet there are but very few of those so denominated who actually practice that extraordinary custom.

The Nez Percés who inhabit the upper waters and mountainous parts of the Columbia are a part of this tribe, though they are seldom known to flatten the head like those lower down and about the mouth of the river.

See Nos. 145 and 146 for portraits of Nez Percé, and Nos. 146 and 147 for Nez Percé and Chinook. (Catlin's Eight Years, page 108, vol. 2.)

The Indians denominated Flatheads, at present at the Flathead Agency in Montana, numbering 133, are not probably the Indians Mr. Catlin referred to in 1832. In 1854-'55 he met some of this tribe and describes them, at above Fort Walla Walla, Washington Territory:

Flatheads we were now in the midst of, and for the time I had my work to do. The Klatops, the Chinooks, the Clickatats, the Walla Wallas, and the Nez Percés and Spokans constituting the principal bands of the Flathead family. I was there in the midst of them and had enough to do. Some of these flatten the head and others do not; yet all speak the Flathead language, or dialects of it. The tribe occupy the whole country about the Lower Columbia, including the island of Vancouver. The tribe is divided into something like thirty bands, speaking nearly the same language.

He continues, writing of the country in which they live, after saying that it is almost all a canoe race, "living in a country where there is little else than fish to live upon" (G. C., "Last Rambles," 1868, pages 146-148):

SAHAPTINS.

The Sahaptin family inhabit the country south of the Salish, between the Cascade and Bitter Root Mountains, reaching southward, in general terms, to the forty-fifth parallel, but very irregularly bounded by the Shoshone tribes of the California group. Of its nations, the Nez Percés, or Sahaptins proper, dwell on the Clearwater and its branches, and on the Snake about the forks. The Palouse occupy the region north of the Snake, about the mouth of the Palouse; the south banks of the Columbia and Snake, near their confluence, and the banks of the Lower Walla Walla, are occupied by the Walla Wallas. The Yakimas and Klikitats inhabit the region north of the Dalles, between the Cascade Range and the Columbia. The natives of Oregon, east of the Cascade Range, who have not usually been included in the Sahaptin family, are divided somewhat arbitrarily into the Wascoes, extending from the mountains eastward to John Day River, and the Cayuses from this river across the Blue Mountains to the Grande Ronde.—G. C.

SAHAPTINS—NEZ PERCÉS.

The Nez Percés, or the Sahaptin proper, inhabit Idaho and portions of Oregon and Washington. They style themselves Numepo, but Lewis and Clarke called them the Chopunnish. The origin of their present name is buried in obscurity. Early in the present century they were estimated to number 8,000; and in 1836, when a mission was established among them, about 4,000. In the Oregon Indian war most of the tribe remained friendly and did effective service for the whites on a number of occasions. In 1854 a treaty was made ceding part of their lands, but only a portion of the tribe recognizing it, led to a separation, one party becoming wandering hunters, while the other remained on the reservations.*

"Of the 2,800 Nez Percés now living, nearly half located on the Kamiah and Lapwai reservations in Northern Idaho, and a few others settled on lands outside the reserve, are prosperous farmers and stock-growers. The rest are 'non-treaties,' who, with other non-treaty Indians in that region, make every exertion to induce the reservation Indians to lease their farms and join them in their annual hunting and root-gathering expeditions."

Early in the summer of the present year troubles arose in regard to the occupancy of the Wallowa Valley by white settlers, it having been withdrawn in 1875 from the reservation assigned them by treaty in 1873, from a failure on their part to permanently occupy it. An Indian, belonging to a band of malcontents or non-treaties under the Chief Joseph, was killed by some settlers, when they insisted upon the removal of all the whites and the restitution of the valley to them. Upon the refusal of the Government to this demand, and further attempts to compel all the non-treaty Indians to come into the reservation at Lapwai, an outbreak occurred under the leadership of Joseph, which resulted in a number of pitched battles, with great loss of life, they were compelled to retreat, the forces under General Howard pursuing them eastwardly across the headwaters of the Snake River and through the Yellowstone National Park, where the pursuit was taken up by the forces under General Terry, resulting finally in the capture of Joseph and the remainder of his force by General Miles.—W. H. Jackson, 1877.

On the morning of September 30, 1877, Chief Joseph and his Nez Percés were met and surrounded by Col. Nelson A. Miles and his command in the valley of Snake Creek, Northern Montana. On the 4th of October, 1877, they surrendered. The length of this raid, the march of the troops, and the tact displayed by Joseph form one of the most extraordinary chapters in the long history of Indian outbreaks.

Eighty-seven warriors, 184 squaws, and 147 children were surrendered. They were sent under guard to Fort Abraham Lincoln, Dakota, thence to Fort Leavenworth, and were finally located in the Indian Territory, and eventually on the Ponca Reservation, and in 1885 returned to Idaho.

PRESENT LOCATION AND CONDITION.

On June 30, 1884, the Nez Percés at Nez Percé Agency, Lapwai, Northern Idaho, numbered 1,310. By occupation they are farmers and herders, and hold their lands in severalty.

The Nez Percés at Ponca, Pawnee, and Otoe Agency, Indian Territory, numbered 287 in June, 1884.

* All now (1885) on reservations, except "White Bird's band of hostiles" in Northern Idaho and in British America.—T. D.

FLAT HEAD WOMAN AND CHILD. SHOWING THE MANNER IN WHICH THE HEADS OF THE CHILDREN ARE FLATTENED.

Chinook, No. 148, page 99.

(Plate 210, Vol. II, Catlin's Eight Years.)

THE CHINOOK METHOD OF FLATTENING THE HEAD.

(Plate 210½, Vol. II, Catlin's Eight Years.)

This is Joseph's band, captured on Snake Creek, Montana, October 4, 1877. They were never satisfied, and asked to be returned to their homes in Northern Idaho. An earnest effort was made by many people, and after favorable reports by officials Congress, in 1884, ordered their removal. They were removed to Northern Idaho in May and June, 1885, arriving at their old home June 1, 1885.

The climate of the Indian Territory was unfavorable. Four hundred and eighteen were surrendered October 4, 1877. Two hundred and eighty-seven were reported as alive August 15, 1884. One hundred and eighteen reached Idaho June 1, 1885. Considering the natural increase, in addition to the numbers captured in 1877, the death rate was excessively large.

The agent wrote of them August 15, 1884:

The entire band, with perhaps one or two exceptions, are quiet, peaceable, and orderly people. They are unusually bright and intelligent.

Total Nēz Percé, 1885, about 1,500.

CHINOOK.

[Not known as a tribe to the laws of the United States—probably so called because of local tradition.]

On the lower parts of the Columbia, near the Pacific Ocean.

147. *Hee-doh'ge-ats*, ———; a young man, eighteen years of age. Painted in 1832. (Plate No. 209, page 110, vol. 2, Catlin's Eight Years.)

148. (————), woman and child; showing the manner in which the heads of the children are flattened. Painted in 1832.

(Plate No. 210, page 110, vol. 2, Catlin's Eight Years.)

(See Nos. 145 and 146, "Nēz Percé.")

MR. CATLIN'S NOTES ON THE CHINOOK INDIANS AND THE METHOD OF FLATTENING THEIR CHILDREN'S HEADS.

The Chinooks inhabiting the lower parts of Columbia are a small tribe, and correctly come under the name of Flat Heads, as they are almost the only people who strictly adhere to the custom of squeezing and flattening the head. Plate 209 is the portrait of a Chinook boy of fifteen or eighteen years of age, on whose head that frightful operation has never been performed, and in Plate 210 will be seen the portrait of a Chinook woman, with her child in her arms, her own head flattened, and the infant undergoing the process of flattening; which is done by placing its back on a board, or thick plank, to which it is lashed with thongs to a position from which it cannot escape, and the back of the head supported by a sort of pillow, made of moss or rabbit skins, with an inclined piece (as is seen in the drawing) resting on the forehead of the child, being every day drawn down a little tighter by means of a cord, which holds it in its place, until it at length touches the nose, thus forming a straight line from the crown of the head to the end of the nose.

The process is seemingly a very cruel one, though I doubt whether it causes much pain, as it is done in earliest infancy, whilst the bones are soft and cartilaginous, and easily pressed into this distorted shape by forcing the occipital up and the frontal down, so that the skull in top, in profile, will show a breadth of not more than an inch and a half or two inches, when in a front view it exhibits a great expansion on the sides, making it at the top nearly the width of one and a half natural heads.

By this remarkable operation the brain is singularly changed from its natural shape, but in all probability not in the least diminished or injured in its natural functions. This belief is drawn from the testimony of many credible witnesses, who have closely scrutinized them and ascertained that those who have the head flattened are in no way inferior in intellectual powers to those whose heads are in their natural shapes.

In the process of flattening the head there is often another form of crib or cradle, into which the child is placed, much in the form of a small canoe, dug out of a log of wood, with a cavity just large enough to admit the body of the child, and the head also, giving it room to expand in width, while from the head of the cradle there is a sort of lever, with an elastic spring to it that comes down on the forehead of the child, and produces the same effects as the one I have above described.

The child is wrapped in rabbits' skins and placed in this little coffin-like-looking cradle, from which it is not, in some instances, taken out for several weeks. The bandages over and about the lower limbs, and as high up as the breast, are loose, and repeatedly taken off in the same day, as the child may require cleansing; but the head and shoulders are kept strictly in the same position, and the breast given to the child by holding it up in the cradle, loosing the outer end of the lever that comes over the nose, and raising it up or turning it aside, so as to allow the child to come at the breast without moving its head.

The length of time that the infants are generally carried in these cradles is three, five, or eight weeks, until the bones are so formed as to keep their shapes and preserve this singular appearance through life.

This little cradle has a strap, which passes over the woman's forehead whilst the cradle rides on her back; and if the child dies during its subjection to this rigid mode, its cradle becomes its coffin, forming a little canoe, in which it lies floating on the water in some sacred pool, where they are often in the habit of fastening the canoes containing the dead bodies of the old and the young; or, which is often the case, elevated into the branches of trees, where their bodies are left to decay, and their bones to dry; whilst they are bandaged in many skins and curiously packed in their canoes, with paddles to propel and ladles to bail them out, and provisions to last and pipes to smoke as they are performing their "long journey after death to their contemplated hunting-grounds," which these people think is to be performed in their canoes.

In Plate 210 $\frac{1}{2}$ letter *a* is an accurate drawing of the above-mentioned cradle, perfectly exemplifying the custom described; and by the side of it (letter *b*) the drawing of a Chinook skull, giving the front and profile view of it. Letter *c* in the same plate exhibits an Indian skull in its *natural* shape, to contrast with the *artificial*.*

This mode of flattening the head is certainly one of the most unaccountable as well as unmeaning customs found amongst the North American Indians. What it could have originated in, or for what purpose, other than a mere useless fashion, it could have been invented, no human being can probably ever tell. The Indians have many curious and ridiculous fashions, which have come into existence, no doubt, by accident and are of no earthly use (like many silly fashions in enlightened society), yet they are perpetuated much longer, and that only because their ancestors practiced them in ages gone by. The greater part of Indian modes, however, and particularly those that are accompanied with much pain or trouble in their enactment, are most wonderfully adapted to the production of some good or useful results, for which the inquisitive world I am sure may forever look in vain to this stupid and useless fashion that has most unfortunately been engendered on these ignorant people, whose superstition forbids them to lay it down.

It is a curious fact, and one that should be mentioned here, that these people have not been alone in this strange custom; but that it existed and was practiced precisely the same, until recently, amongst the Choctaws and Chickasaws, who occupied a

*This once powerful nation resides in the vicinity of Astoria, Oreg. Ter. They are few in numbers and gain their subsistence by fishing.—J. M. Stanley, 1848.

STU-MICK-O-SUCKS, THE BUFFALO'S BLACK FAT.

Chief of the Blackfeet. No. 149, page 101.

(Plate 11, Vol. I, Catlin's Eight Years.)

large part of the States of Mississippi and Alabama, where they have laid their bones and hundreds of their skulls have been procured, bearing incontrovertible evidence of a similar treatment with similar results.

The Choctaws who are now living do not flatten the head; the custom, like that of the *medicine-bag* and many others which the Indians have departed from, from the assurances of white people that they were of no use and were utterly ridiculous to be followed. Whilst among the Choctaws I could learn little more from the people about such a custom than that "their old men recollected to have heard it spoken of," which is much less satisfactory evidence than inquisitive white people get by referring to the grave, which the Indian never meddles with.

BLACKFEET.

[Blackfeet: Laws of the United States. Blackfeet: Indian Bureau, 1885.]

A tribe of the Sioux or Dahkota Nation. [Algonkin? T. D.]*

A very warlike and hostile tribe of 50,000, including the *Peagans* (Piegans) *Cotonnés* and *Gros-Ventres (de Prairies)*, occupying the headwaters of the Missouri, extending a great way into the British territory on the north and into the Rocky Mountains on the west. Rather low in stature, broad-chested, square-shouldered, richly clad, and well armed, living in skin lodges; 12,000 of them destroyed by small-pox within the year 1838!

Mr. Catlin was first with the Blackfeet at Fort Union in 1832.

149. Stu-mick-o-súcks, the Buffalo's Back Fat; chief of the tribe, in a splendid costume, richly garnished with porcupine-quills, and fringed with scalp-locks. Painted in 1832.

(Plate No. 11, page 5, vol. 1, Catlin's Eight Years.)

I have this day been painting a portrait of the head chief of the Blackfeet Nation; he is a good-looking and dignified Indian, about fifty years of age, and superbly dressed (Plate 11, No. 149). Whilst sitting for his picture he has been surrounded by his own braves and warriors, and also gazed at by his enemies, the Crows and the Knisteneaux, Assinneboins and Ojibbeways; a number of distinguished personages of each of which tribes have laid all day around the sides of my room, reciting to each other the battles they have fought and pointing to the scalp-locks worn as proofs of their victories, and attached to the seams of their shirts and leggings. This is a curious scene to witness, when one sits in the midst of such inflammable and combustible materials, brought together, unarmed, for the first time in their lives, peaceably and calmly recounting over the deeds of their lives, and smoking their pipes upon it, when a few weeks or days will bring them on the plains again, where the war-cry will be raised and their deadly bows will again be drawn on each other.

The name of this dignitary of whom I have just spoken is *Stu-mick-o-súcks* (the Buffalo's Back Fat), *i. e.*, the "hump," or "fleece," the most delicious part of the buffalo's flesh. The dress, for instance, of the chief whom I have just mentioned, and whose portrait I have just painted, consists of a shirt, or tunic, made of two deer-skins finely dressed, and so placed together with the necks of the skins downwards, and the skins of the hind legs stitched together, the seams running down on each arm from the neck to the knuckles of the hand. This seam is covered with a band of two inches in width, of very beautiful embroidery of porcupine quills, and suspended from the under edge of this, from the shoulders to the hands, is a fringe of the locks of black hair which he has taken from the heads of victims slain by his own hand in battle. The leggings are made also of the same material, and down the outer side of the leg, from the hip to the feet, extends also a similar band or belt of the same width, and wrought in the same manner, with porcupine quills, and fringed with scalp-locks. These locks of hair are procured from scalps and worn as trophies.

* Mr. Catlin met both Blackfeet and Blackfoot Sioux. Hence the error.

The scalp of which I spoke is procured by cutting out a piece of the skin of the head, the size of the palm of the hand or less, containing the very center or crown of the head, the place where the hair radiates from a point, and exactly over what the phrenologists call self-esteem. This patch then is kept and dried with great care, as proof positive of the death of an enemy, and evidence of a man's claims as a warrior; and after having been formally "danced," as the saying is (*i. e.*, after it has been stuck up upon a pole or held up by an "old woman," and the warriors have danced around it for two or three weeks at intervals), it is fastened to the handle of a lance, or the end of a war-club, or divided into a great many small locks and used to fringe and ornament the victor's dress. When these dresses are seen bearing such trophies, it is of course a difficult matter to purchase them of the Indian, for they often hold them above all price. I shall hereafter take occasion to speak of the scalp-dance, describing it in all its parts, and giving a long letter at the same time on scalps and scalping, an interesting and general custom amongst all the North American Indians. (See plate and description.)

In the chief's dress, which I am describing, there are his moccasins, made also of buckskin, and ornamented in a corresponding manner. And over all, his robe, made of the skin of a young buffalo bull, with the hair remaining on; and on the inner or flesh side, beautifully garnished with porcupine quills, and the battles of his life very ingeniously, though rudely, portrayed in pictorial representations. In his hand he holds a very beautiful pipe, the stem of which is four or five feet long and two inches wide, curiously wound with braids of the porcupine quills of various colors, and the bowl of the pipe ingeniously carved by himself from a piece of red steatite of an interesting character, and which they all tell me is procured somewhere between this place and the Falls of St. Anthony, on the headwaters of the Mississippi.

This curious stone has many peculiar qualities, and has, undoubtedly, but one origin in this country, and perhaps in the world. It is found but in the hands of the savage, and every tribe, and nearly every individual in the tribe has his pipe made of it. I consider this stone a subject of great interest and curiosity to the world; and I shall most assuredly make it a point, during my Indian rambles, to visit the place from whence it is brought. I have already got a number of most remarkable traditions and stories relating to the "sacred quarry," of pilgrimages performed there to procure the stone, and of curious transactions that have taken place on that ground. It seems, from all I can learn, that all the tribes in these regions, and also of the Mississippi and the Lakes, have been in the habit of going to that place, and meeting their enemies there, whom they are obliged to treat as friends, under an injunction of the Great Spirit.

So, then, is this sachem (the Buffalo's Back Fat) dressed; and in a very similar manner, and almost the same, is each of the others named, *viz*, 151, 152, 153, 154, 155, following Blackfeet, and all are armed with bow and quiver, lance and shield.—G. C., 1832.

150. Eeh-nfs-kim, the Crystal Stone, wife of the chief. (No. 149.)

(Plate No. 13, page 30, vol. 1, Catlin's Eight Years.)

Her countenance is rather pleasing, which is an uncommon thing amongst the Blackfeet. Her dress is made of skins, and being the youngest of a bevy of six or eight, and the last one taken under his guardianship, was smiled upon with great satisfaction, whilst he exempted her from the drudgeries of the camp, and keeping her continually in the halo of his own person, watched and guarded her as the apple of his eye.—G. C., 1832.

150½. (), boy. [No number in book or catalogue.]

(Plate No. 12, page 30, vol. 1, Catlin's Eight Years.)

The grandson, also, of this sachem (No. 149), a boy of six years of age, and too young as yet to have acquired a name, has stood forth like a tried warrior; and I

PEH-TÓ-PE-KISS, THE EAGLE'S RIBS.

Chief. Blackfeet, No. 152, page 103.

(Plate 14, Vol. I, Catlin's Eight Years.)

have painted him at full length, with his bow and quiver slung, and his robe made of a raccoon-skin.

The history of this child is somewhat curious and interesting; his father is dead, and in the case of the death of the chief, of whom I have spoken, he becomes hereditary chief of the tribe.

This boy has been twice stolen away by the Crows by ingenious stratagems, and twice recaptured by the Blackfeet at considerable sacrifice of life, and at present he is lodged with Mr. McKenzie for safe-keeping and protection, until he shall arrive at the proper age to take the office to which he is to succeed and able to protect himself.—G. C., 1832.

151. In-ne-ô-cose, the Buffalo's child; a warrior, full length, with *medicine-bag* of otter-skin. (No plate.)

152. Peh-tô-pe-kiss, the Eagle's Ribs; chief of the "*Blood Band*," full length, in splendid dress; head-dress of horns of the buffalo and ermines' tails; lance in his hand and two *medicine-bags*. (See, also, No. 160. Painted in 1832.)

(Plate No. 14, page 32, vol. 1, Catlin's Eight Years.)

This man is one of the extraordinary men of the Blackfeet tribe, though not a chief; he stands here in the fort, and deliberately boasts of eight scalps, which he says he has taken from the heads of trappers and traders with his own hands. His dress is really superb, almost literally covered with scalp-locks of savages and white people. I have painted him at full length, with a head-dress made entirely of ermine skin and horns of the buffalo.

153. Mix-ke-mote-skin-na, the Iron Horn; warrior; in a splendid dress, with his *medicine-bag* in his hand.

(Plate No. 16, page 34, vol. 1, Catlin's Eight Years.)

154. Peh-no-máh-kan, He who Runs down Hill. (No plate.)

155. Ah'-kay-ee-píx-en, the Woman who Strikes Many; full length; dress of mountain-sheep skin; her robe of the young buffalo hide.

(Plate No. 17, page 34, vol. 1, Catlin's Eight Years.)

156. Méh-tóom, the Hill. (No plate.)

157. Tcha-dés-sa-ko-máh-pee, the Bear's Child, with war-club. (No plate.)

158. Wún-nes-tou, the White Buffalo; a *medicine-man* or *doctor*, with his *medicine* or *mystery* shield. Painted in 1832.

(Plate No. 15, page 34, vol. 1, Catlin's Eight Years.)

I have also transferred to my canvas the "looks and very resemblance" of an aged chief, who combines with his high office the envied title of mystery or medicine man—i. e., doctor, magician, prophet, soothsayer, jongleur, and high priest, all combined in one person, who necessarily is looked upon as the oracle of the nation. On his left arm he presents his mystery-drum, or tambour, in which are concealed the hidden and sacred mysteries of his healing art.—G. C., 1832.

159. Tcha-aés-ka-ding, ———, boy, four years old, wearing his robe made of the skin of a raccoon; this boy is grandson of the chief, and is expected to be his successor. Painted in 1832.

160. Peh-tô-pe-kiss, the Eagle's Ribs; chief of the Blood band; splendid dress. (See No. 152.) Painted in 1832. (No plate.)

This man boasted to me that he had killed eight white men (trappers) in his country; he said that they had repeatedly told the traders that they should not catch the beaver in their country, and if they continued to do it they would kill them.

Of the Blackfeet whom I mentioned, * * * and whose portraits are now standing in my room, there is another of whom I must say a few words—Peh-t6-pe-kiss, the Eagle's Ribs (No. 152 also). This man is one of the extraordinary men of the Blackfoot tribe; though not a chief, he stands here in the fort and deliberately boasts of eight scalps, which he says he has taken from the heads of trappers and traders with his own hand. His dress is really superb, almost literally covered with scalp-locks of savage and civil.

I have painted him at full length, with a head-dress made entirely of ermine skins and horns of the buffalo. This custom of wearing horns beautifully polished and surmounting the head-dress is a very curious one, being worn only by the bravest of the brave; by the most extraordinary men in the nation. Of their importance and meaning I shall say more in a future epistle. When he stood for his picture he also held a lance and two "medicine bags" in his hand.—G. C., *ibid*.

161. () ———, a *medicine-man*, or *doctor*, performing his *medicines* or *mysteries* over a dying man, with the skin of a yellow bear and other curious articles of dress thrown over him, with his mystery rattle and mystery spear, which, he supposes, possess a supernatural power in the art of healing and curing the sick. Painted in 1832. (See "Medicine-man" and his functions, herein.)

(Plate No. 19, page 40, vol. 1, Catlin's Eight Years.)

ALGONKIN—BLACKFEET.

(See Dacota Sioux, herein.)

A splendid series of photographs, Nos. 252 to 259, inclusive, and No. 920, of Blackfeet Sioux, is noted in Hayden's Catalogue, page 39.

MR. CATLIN'S NOTES ON THE BLACKFEET INDIANS.

There is no tribe, perhaps, on the continent who dress more comfortably and more gaudily than the Blackfeet, unless it be the tribe of Crows. There is no great difference, however, in the costliness or elegance of their costumes, nor in the materials of which they are formed, though there is a distinctive mode in each tribe of stitching or ornamenting with the porcupine quills, which constitute one of the principal ornaments to all their fine dresses, and which can be easily recognized by any one a little familiar with their modes as belonging to such or such a tribe.

The Blackfeet are, perhaps, one of the most, if not entirely the most, numerous and warlike tribes on the continent. They occupy the whole of the country about the sources of the Missouri from this place to the Rocky Mountains, and their numbers, from the best computations, are something like forty or fifty thousand—they are (like all other tribes whose numbers are sufficiently large to give them boldness) warlike and ferocious, *i. e.*, they are predatory, are roaming fearlessly about the country, even into and through every part of the Rocky Mountains, and carrying war amongst their enemies, who are, of course, every tribe who inhabit the country about them.

The women in all these upper and western tribes are decently dressed, and many of them with great beauty and taste; their dresses are all of deer or goat skins, extending from their chins quite down to the feet; these dresses are in many instances trimmed with ermine, and ornamented with porcupine quills and beads with exceeding ingenuity. The Crow and Blackfeet women, like all others I ever saw in any Indian tribe, divide the hair on the forehead, and paint the separation or crease with vermilion or red earth. For what purpose this little, but universal, custom is observed, I never have been able to learn.

The men amongst the Blackfeet tribe, have a fashion equally simple, and probably

AN INDIAN MEDICINE MAN.

Blackfeet, No. 161, pages 101, 392.

(Plate 19, Vol. I, Catlin's Eight Years.)

of as little meaning, which seems strictly to be adhered to by every man in the tribe; they separate the hair in two places on the forehead, leaving a lock between the two, of an inch or two in width, which is carefully straightened down on to the bridge of the nose, and there cut square off. It is more than probable that this is done for the purpose of distinction; that they may thereby be free from the epithet of effeminacy, which might otherwise attach to them.

These two tribes, whom I have spoken of connectedly, speak two distinct and entirely dissimilar languages; and the language of each is different, and radically so, from that of all other tribes about them. As these people are always at war, and have been, time out of mind, they do not intermarry or hold converse with each other, by which any knowledge of each other's language could be acquired. It would be the work of a man's life-time to collect the languages of all the different tribes which I am visiting; and I shall, from necessity, leave this subject chiefly for others, who have the time to devote to them, to explain them to the world. I have, however, procured a brief vocabulary of their words and sentences in these tribes, and shall continue to do so amongst the tribes I shall visit, which will answer as a specimen or sample in each, and which, in the sequel to these letters (if they should ever be published), will probably be arranged.

The Blackfeet Sioux are, perhaps, the most powerful tribe of Indians on the continent, and being sensible of their strength, have stubbornly resisted the traders in their country, who have been gradually forming an acquaintance with them, and endeavoring to establish a permanent and profitable system of trade. Their country abounds in beaver and buffalo, and most of the fur-bearing animals of North America; and the American Fur Company, with an unconquerable spirit of trade and enterprise, has pushed its establishments into their country; and the numerous parties of trappers are tracing up their streams and rivers, rapidly destroying the beavers which dwell in them. The Blackfeet have repeatedly informed the traders of the company, that if their men persisted in trapping beavers in their country, they should kill them whenever they met them. They have executed their threats in many instances, and the company lose some fifteen or twenty men annually, who fall by the hands of these people, in defense of what they deem their property and their rights. Trinkets and whisky, however, will soon spread their charms amongst these, as they have amongst other tribes, and white man's voracity will sweep the prairies and the streams of their wealth, to the Rocky Mountains and the Pacific Ocean; leaving the Indians to inhabit, and at last to starve upon, a dreary and solitary waste.

The Blackfeet, therefore, having been less traded with, and less seen by white people than most of the other tribes, are more imperfectly understood; and it yet remains a question to be solved—whether there are twenty, or forty or fifty thousand of them, for no one, as yet, can correctly estimate their real strength. From all I can learn, however, which is the best information that can be got from the traders, there are not far from 40,000 Indians (altogether), who range under the general denomination of Blackfeet.

From our slight and imperfect knowledge of them, and other tribes occupying the country about the sources of the Missouri, there is no doubt in my mind, that we are in the habit of bringing more Indians into the computation than are entitled justly to the appellation of "Blackfeet."

Such, for instance, are the "Gros Ventres de Prairie" and Cotonnés,* neither of which speak the Blackfeet language, but hunt, and eat, and fight, and intermarry with the Blackfeet, living, therefore, in a state of confederacy and friendship with them, but speaking their own language and practicing their own customs.

The Blackfeet proper are divided into four bands or families, as follows: The "Pe-a-gans," of 500 lodges; the "Blackfeet" band, of 450 lodges; the "Blood" band,

* The Blackfeet with whom Mr. Catlin came in contact and of whom he heard probably included the entire Sioux Nation in their estimates.—T. D.

of 450 lodges; and the "Small Robes," of 250 lodges. These four bands constituting about 1,650 lodges, averaging ten to the lodge, amount to about 16,500 souls.

There are then of the other tribes above-mentioned (and whom we, perhaps, incorrectly denominate Blackfeet), Gros Ventres des Prairies, 430 lodges, with language entirely distinct; Circees, of 220 lodges, and Cotonnés, of 250 lodges, with language also distinct from either. Several years since writing the above, I held a conversation with Major Pilcher (a strictly correct and honorable man, who was then the agent for these people, who has lived amongst them, and is at this time superintendent of Indian affairs at Saint Louis), who informed me, much to my surprise, that the Blackfeet were not far from 60,000 in numbers, including all the confederacy of which I have just spoken.

There is in this region a rich and interesting field for the linguist or the antiquarian, and stubborn facts, I think, if they could be well procured, that would do away with the idea which many learned gentlemen entertain, that the Indian languages of North America can all be traced to two or three.—G. C.

PRESENT LOCATION AND CONDITION.

The Blackfeet are now on a reservation (since 1866). (See also titles Sioux, Dakota, and Crow, herein, for further details.)

They are on a reservation in the vicinity of their original roaming ground, and near British Columbia.

Their history since Mr. Catlin's visit in 1832 is embraced substantially in that of the Sioux tribes generally, and the Crows and Flatheads. They were in the past wild Indians of the plains. Their progress in civilized ways can be found at length in the report of the agent at the Blackfeet Agency, Montana, and in the annual reports of the Commissioner of Indian Affairs.

Mr. Catlin undoubtedly was led into an erroneous statement in relation to the numbers of the Blackfeet and Blackfeet Sioux. The Blackfeet Sioux have no connection with the Blackfeet proper—one is a Dakota tribe, the other of Algonkin stock; but in Mr. Catlin's time, roaming over nearly the same territory, a distinction was difficult to make.

Blackfeet at Blackfeet Agency, Montana, with Blood and Piegan, 2,300, June, 1885; believed to be slowly decreasing; still blanket Indians.

The number of Blackfeet proper at Blackfeet Agency, Montana, is uncertain, as they are included with the Blood and Piegans in the official reports.

CROWS (BEL-ANT-SE-A).

[Crows: Laws of the United States. Crows: Indian Bureau, June, 1885.]

A tribe of 7,000, on the headwaters of the Yellowstone River, extending their hunts and their wars into the Rocky Mountains, inveterate enemies of the Blackfeet; tall, fine-limbed men, graceful and gentlemanly in deportment, and the most richly and tastefully clad of any Indians on the continent. Skin lodges, many of which are tastefully ornamented and painted like the one standing in the room.

(See No. 491, herein.)

Mr. Catlin met the Crows at Fort Union in 1832, and again on the Snake River plains in 1854-'55.

162. *Cháh-ee-chópes*, the Four Wolves; a chief, a fine-looking fellow, his hair reaching to the ground; his *medicine* (mystery) *bag* of the skin of the ermine. Painted in 1832.

(Plate No. 24, page 50, vol. 1, Catlin's Eight Years.)

This man was in mourning, having some of his locks cut off, six feet in stature, and whose natural hair sweeps the grass as he walks. He is beautifully clad, and carries himself with the most graceful and manly mien. He is in mourning for a brother, and, according to their custom, has cut off a number of locks of his long hair, which is as much as a man can well spare of so valued an ornament, which he has been for the greater part of his life cultivating; whilst a woman who mourns for a husband or child is obliged to crop her hair short to her head, and so remain till it grows out again, ceasing gradually to mourn as her hair approaches to its former length. —G. C.

163. *Eé-hée-a-duck-cée--a*, He who ties his Hair Before; a man of six feet stature, whose natural hair drags on the ground as he walks. Painted in 1832.

(Plate No. 78, page 193, vol. 1, Catlin's Eight Years.)

164. *Pa-rís-ka-róo-pa*, the Two Crows; chief of a band; his hair sweeps the ground; his head-dress made of the eagle's skin entire; he holds in his hand his lance and two *medicine bags*, the one of his own instituting, the other taken from his enemy, whom he had killed in battle. Painted in 1832.

(Plate No. 77, page 193, vol. 1, Catlin's Eight Years.)

165. *Hó-ra-tó-a*, ———; a brave wrapped in his robe, and his hair reaching to the ground; his spear in his hand and bow and quiver slung. Painted in 1836. (No plate.)

166. *Oó-je-en-á-he-a*, the Woman who lives in the Bear's Den; her hair cut off, she being in mourning. Painted in 1836.

(Plate No. 25, page 50, vol. 1, Catlin's Eight Years.)

The extraordinary length of hair amongst the Crows is confined to the men alone; for the women, though all of them with glossy and beautiful hair and a great profusion of it, are unable to cultivate it to so great a length, or else they are not allowed to compete with their lords in a fashion so ornamental, and on which they pride themselves, and are obliged in many cases to cut it short off.

The fashion of long hair amongst the men prevails throughout all the Western and Northwestern tribes, after passing the Sacs and Foxes; and the Pawnees of the Platte, who, with two or three other tribes only, are in the habit of shaving nearly the whole head.

The present chief of the Crows is called "Long Hair," and has received his name as well as his office from the circumstance of having the longest hair of any man in the nation. (Not painted.)

Messrs. Sublette and Campbell told me they had lived in his hospitable lodge for months together, and assured me that they had measured his hair by a correct means, and found it to be ten feet and seven inches in length, closely inspecting every part of it at the same time, and satisfying themselves that it was the natural growth.

On ordinary occasions it is wound with a broad leather strap from his head to its extreme end, and then folded up into a budget, or block, of some ten or twelve inches in length and of some pounds weight, which, when he walks, is carried under his arm or placed in his bosom, within the folds of his robe; but on any great parade or similar occasion his pride is to unfold it, oil it with bear's grease, and let it drag behind him, some three or four feet of it spread out upon the grass, and black and shining like the raven's wing.

It is a common custom amongst most of these upper tribes to splice or add on several lengths of hair by fastening them with glue, probably for the purpose of imitat-

ing the Crows, upon whom alone nature has bestowed this conspicuous and signal ornament.

The Crow women are not handsome. * * * They are like all other Indian women, the slaves of their husbands, being obliged to perform all the domestic duties and drudgeries of the tribe, and not allowed to join in their religious rites or ceremonies, nor in the dance or other amusements.

167. *Duhk-pits-o-6-see*, the Red Bear. Painted in 1832.

(Plate No. 26, page 50, vol. 1, Catlin's Eight Years.)

168. *Pa-ris-ka-ro6-pa*, the Two Crows (the younger), called the "Philosopher." Painted in 1832.

(Plate No. 27, page 50, vol. 1, Catlin's Eight Years.)

A young man distinguished as an orator and wise man, though the character of his face and head would almost appear like a deformity.

I have also painted *Pa-ris-ka-ro6-pa* (two Crows) the younger (plate 27, No. 168), one of the most extraordinary men in the Crow nation; not only for his looks, from the form of his head, which seems to be distortion itself—and curtailed of all its fair proportions; but from his extraordinary sagacity as a counselor and orator, even at an early stage of his life.

There is something very uncommon in this outline, and sets forth the striking peculiarity of the Crow tribe, though rather in an exaggerated form. The semi-lunar outline of the Crow head, with an exceedingly low and retreating forehead, is certainly a very peculiar and striking characteristic; and though not so strongly marked in most of the tribe as in the present instance, is sufficient for their detection whenever they are met.—G. C.

169. *Bi-éets-ee-cure*, the Very Sweet Man. Painted in 1832. (No plate.)

Mr. Catlin in 1855 again met the Crows in Salmon River Valley, west of the Rocky Mountains (at Florence, Idaho Territory), and found this man *Bi-éets-ee-cure* alive and with the tribe. In his "Last Rambles," pages 152 to 159, Mr. Catlin writes of his second meeting with the Crows.

MR. CATLIN'S NOTES ON THE CROW INDIANS IN SALMON RIVER VALLEY, 1854-'55.

After a five days' march (from Walla Walla), their course being to the right, and through the Snake River Valley, we were obliged to part company, and Cæsar and I, with an Indian guide, took to the left, hugging as near as we could the ragged and frightful, and all but impassable, southern bank of the Salmon River, until at length, after many days of deep repentance, we entered the more calm and beautiful meadows and prairies of the Salmon River Valley.

Our ride (or rather walk, for we had to walk and climb most of the way, leading our horses) was one which I deeply regretted from day to day, but which I never have regretted since it was finished. The eighth day opened to our view one of the most verdant and beautiful valleys in the world; and on the tenth a distant smoke was observed, and under it the skin-tents, which I at once recognized as of a Crow village.

I was again amongst my old friends, the Crows! men whose beautiful forms and native, gentlemanly grace had not been deformed by squatting in canoes, nor eyes bridled by scowling on the glistening sun reflected on the water, or heads squeezed into wedges, or lips stretched around blocks of wood.

As soon as we were dismounted, and in the midst of the crowd around us, I was struck more forcibly than ever with the monstrous and pitiable deformities of man

which the peculiar necessities of life often drive him to, as seen amongst the squatted, paddling tribes of the Amazon, Vancouver, and the Columbia coast and river.

It was a pleasure that I cannot describe to find myself again amongst mankind as Nature made them, the Crows, whom I had long since thought I had seen for the last time.

The Crows (as they are called by their neighbors), *Belantsea*, of whom I gave some account in the first volume of this work, are probably the most unbroken, unchanged part of the original stock of North American Man. Their numbers, at the time when I was amongst them, in 1832, were about 7,000, living on the headwaters of the Yellowstone River and in the Rocky Mountains.

From their traditions, which are very distinct, they formerly occupied the whole range of the Rocky Mountains and the beautiful valleys on each side, from the sources of the Saskatchewan in the north, and as far south (their traditions say) as the mountains continue: that would be to the straits of Panama.

They say that their people were a great nation before the Flood, and that a few who reached the summits of the mountains were saved when all the tribes of the valleys were destroyed by the waters.

That they were the most ancient American stock, and the unique, original American type, I believe; and that they were the original Toltecs and Aztecs, who, history and traditions tell us, poured down from the mountains of the northwest, founding the cities of Mexico, Palenque, and Uxmal.

My portraits of Crows, made in my first series of voyages, in 1832 (Nos. 162 to 170), and exhibited in London, from their striking resemblance to those on the sculptured stones of Mexico and Yucatan, excited suggestions to that effect by many of my friends; and the first of these, and the most enthusiastic, my untiring and faithful friend, Captain Shippard, an indefatigable reader amongst the ancient archives of the British Museum; and of my friend the Baron de Humboldt, who told me also that the subject was one of profound interest to science, and well worthy of my further study.

These reiterated suggestions, added to my own intelligence, have kept alive, for many years, my anxiety on that subject, and undoubtedly were the uncombatible arguments which determined me, when hearing, at the Dalles, of a band of Crows encamped in the Salmon River Valley, west of the Rocky Mountains, to "make shift" (*conte qui conte*), and with Cæsar, to throw myself amongst them.

I have said that "we were there," and whatever I found amongst them in customs and contour and traditions, as well as amongst other tribes that I visited in more southern latitudes, between them and the Straits of Panama, tending to establish the belief above advanced, that they were the Toltecs and Aztecs of Mexico and Yucatan, will be noticed in a subsequent part of this work.

The Crow village that we were in, consisting of some forty or fifty skin tents, had crossed the mountains on to the headwaters of Salmon River, to take and dry salmon, there being no salmon on the east side of the Rocky Mountains.

The chief of the band, a sub chief, called the "*Yellow Mocasin*," was a very intelligent man, and gave me a clear, and, no doubt, a true account of the recent history of the tribe, as he had received it from his father and grandfather. According to this, the Crows were originally confined to the mountains and their valleys, from which their enemies of the plains could never dislodge them; but that since horses have made their appearance in the plains, a great portion of their people have descended into the prairies, where they have been cut to pieces by the Sioux, the Blackfeet, and other tribes, and their former great strength destroyed.

I was received with great kindness by these people, and told by the chief that I should be welcome, and that his young men should watch and guard my horses. The incidents here, enough in themselves for a small book, must be passed over, for there are yet many adventures ahead of us.

One thing, however, cannot be passed by. Whilst seated in the chief's lodge,

where there were some six or eight men besides the chief, and endeavoring, as the necessary preliminary in all first interviews with Indians, to make the object of my visit distinctly known, I opened the portfolio of cartoon portraits, which all were examining with great interest and astonishment, and on turning up the fifth or sixth portrait, one of the party gave a sudden piercing yelp, and sprang upon his feet and commenced dancing in the most violent jumps and starts, and vociferating, "*Bi-ects-e-cure! Bi-ects-e-cure!*" (the name of the young man) whose portrait I had painted at the mouth of the Yellowstone twenty years before, and was now holding up.

The portrait was recognized by all, and on their feet, and darting out of the wigwam, were three or four of the party, and through the village to where the women were drying fish, on the bank of the river, and back, re-entered the chief's wigwam, and with them, out of breath, and walking as if he was coming to the gallows, entered *Bi-ects-e-cure* (the Very Sweet Man).

I instantly recognized him, and rising up, he took about half a minute to look me full in the eyes, without moving a muscle or winking, when he exclaimed "*how! how!*" (yes, yes), and shook me heartily by the hand. I took up his portrait, and showing it to him, got the interpreter to say to him that I had "kept his face clean!"

The reader can more easily and more correctly imagine the pleasurable excitement, and the curious remarks amongst the party at this singular occurrence, than I can explain them; for, not knowing their language, I was ignorant of much that passed myself.

"One thing, I'm *sua*, Massa Catlin," suddenly exclaimed Cæsar, who had not before opened his broad mouth, "I quite *sua* dat ar man knows you, massa."

All eyes were now turned for a moment upon Cæsar, who was sitting a little back, and evidently looked upon by most of the party as some great chief until the interpreter explained that he was my servant.

During this interlude, and which required some little exchange of feelings and recollections between the "*very sweet man*" and myself, I had shut the portfolio, to begin again where we left off; and proceeding again with the portraits, after showing them several of their enemies, the Sioux and Blackfeet, *Ba-da-ah-chon-du* (the Jumper), one of the chiefs of the Crows, whose portrait also was painted at Yellowstone twenty years before, turned up. All recognized him, and *Bi-ects-e-cure* told them that he saw me when I was painting that picture twenty years before.

Through the interpreter I told them that more than a hundred thousand white people had seen the chief's face, and, as they could see, there was not a scratch upon it. The chief then arose upon his feet, and making signs for me to rise, embraced me in his arms, and each one of the party saluted me in the same affectionate manner.

See *Ba-da-ah-chon-du* (the Jumper, No. 170). His head-dress of war-eagles' quills—his robe the skin of a buffalo, with his battles painted on it, his lance in his hand, his shield and quiver slung on his back, his tobacco-sack suspended from his belt, and his leggings fringed with scalp-locks.

In conversation which I had with *Bi-ects-e-cure*, he informed me that the chief *Ba-da-ah-chon-du*, whose portrait we had just seen, was dead—that he died soon after I painted his portrait, and many of his friends and relations believed that the painting of the portrait was the cause of his death; "But," said he, "I told them they were very foolish—that I had no fears when mine was painted, and here I am alive after so many years."

I told them that no man of good sense could see any way in which the painting could do them an injury, and that amongst the white people we all had our portraits made, and it did us no harm. They all gave their assent in a "How, how, how!" and the next day I slipped off the "skin," as they called it, of two or three of them; and, amongst them, and the first, that of the young chief whose hospitality I was enjoying. (Plate No. 14.)

I painted him at his toilet, as he was letting down his long hair and oiling it with bear's grease, which his wife was pouring into his hand from a skin bottle; and she,

poor woman, from a custom of the country, not to compete with her husband in a feature so ornamental, was obliged to have her hair cropped close to her head.—George Catlin, 1854-'55.

170. *Ba-da-ah-chón-du*, He who Jumps over Every One; on a wild horse, with war-eagle head-dress on his horse's and his own head; with shield, bow, quiver, and lance; his long hair floating in the wind. Painted in 1832.

(Plate No. 76, page 192, vol. 1, Catlin's Eight Years.)

MR. CATLIN'S NOTES ON THE CROW INDIANS, 1832.

Mr. Catlin, writing from the Minataree village, Upper Missouri, in 1832, referring to the Crows and their appearance and horsemanship, says:

There are at this time some distinguished guests, besides *myself*, in the lodge of the Black Moccasin—two chiefs or leaders of a party of Crows, who arrived here a few days since, on a visit to their ancient friends and relatives. The consequence has been that feasting and carousing have been the "order of the day" here for some time; and I have luckily been a welcome participator in their entertainments. A distinguished chief of the Minatarees, with several others in company, has been for some months past on a visit to the Crows and returned, attended by some remarkably fine-looking fellows, all mounted on fine horses. I have said something of these fine specimens of the human race heretofore; and as I have been fastening more of them to the canvas within the few days past, I must use this occasion to add what follows:

I think I have said that no part of the human race could present a more picturesque and thrilling appearance on horseback than a party of Crows, rigged out in all their plumes and trappings—galloping about and yelping, in what they call a war parade, *i. e.*, in a sort of tournament or sham fight, passing rapidly through the evolutions of battle, and vaunting forth the wonderful character of their military exploits. This is an amusement of which they are excessively fond, and great preparations are invariably made for these occasional shows.

No tribe of Indians on the continent are better able to produce a pleasing and thrilling effect in these scenes, nor any more vain, and consequently better prepared to draw pleasure and satisfaction from them, than the Crows. They may be justly said to be the most beautifully clad of all the Indians in these regions, and, bringing from the base of the Rocky Mountains a fine and spirited breed of the wild horses, have been able to create a great sensation amongst the Minatarees, who have been paying them all attention and all honors for some days past.

From amongst these showy fellows who have been entertaining us and pleasing themselves with their extraordinary feats of horsemanship I have selected one of the most conspicuous, and transferred him and his horse, with arms and trappings, as faithfully as I could to the canvas, for the information of the world, who will learn vastly more from lines and colors than they could from oral or written delineations.

I have painted him as he sat for me, balanced on his leaping wild horse (plate 76, No. 170), with his shield and quiver slung on his back, and his long lance, decorated with the eagle's quills, trailed in his right hand. His shirt and his leggings and moccasins were of the mountain-goat skins, beautifully dressed, and their seams everywhere fringed with a profusion of scalp-locks taken from the heads of his enemies slain in battle. His long hair, which reached almost to the ground whilst he was standing on his feet, was now lifted in the air, and floating in black waves over the hips of his leaping charger. On his head and over his shining black locks he wore a magnificent crest or head-dress made of the quills of the war-eagle and ermine skins; and on his horse's head also was another of equal beauty and precisely the same in pattern and material. Added to these ornaments there were yet many others which contributed to his picturesque appearance, and amongst them a beautiful netting of

various colors that completely covered and almost obscured the horse's head and neck, and extended over its back and its hips, terminating in a most extravagant and magnificent crupper, embossed and fringed with rows of beautiful shells and porcupine quills of various colors.

With all these picturesque ornaments and trappings upon and about him, with a noble figure and the bold stamp of a wild *gentleman* on his face, added to the rage and spirit of his wild horse, in time with whose leaps he issued his startling (though smothered) yelps, as he gracefully leaned to an fro, leaving his plumes and his plumage, his long locks and his fringes, to float in the wind, he galloped about, and felt exceeding pleasure in displaying the extraordinary skill which a lifetime of practice and experiment had furnished him in the beautiful art of riding and managing his horse, as well as in displaying to advantage his weapons and ornaments of dress, by giving them the grace of motion as they were brandished in the air and floating in the wind. (Catlin's Eight Years, pages 191, 192.)

They are really as handsome and well formed a set of men as can be seen in any part of the world. There is a sort of ease and grace added to their dignity of manner which gives them the air of gentlemen at once. I observed the other day that most of them were over six feet high, and very many of them have cultivated their natural hair to such an almost incredible length that it sweeps the ground as they walk.

The Crows and Blackfeet, who are here together (Fort Union, 1832), are enemies of the most deadly kind while out on the plains, but here they sit and smoke quietly together, yet with a studied and dignified reserve.

The Crows, who live on the headwaters of the Yellowstone and extend from this neighborhood also to the base of the Rocky Mountains, are similar in the above respects to the Blackfeet, roaming about a great part of the year, and seeking their enemies wherever they can find them.

They are a much smaller tribe than the Blackfeet, with whom they are always at war. Mr. McKenzie has repeatedly told me, within the last four weeks, while in conversation relative to the Crows, that they were friendly and honorable in their dealings with the whites, and that he considered them the finest Indians of his acquaintance.—G. C., 1832.

The Crows, nevertheless, in 1885, continue to have the reputation of being the fondest of horse flesh, the property of others, of any Indians on the plains.

Mr. Catlin continues:

I have conversed often and much with Messrs. Sublette and Campbell, two gentlemen of the highest respectability, who have traded with the Crows for several years, and they tell me they are one of the most honorable, honest, and high-minded races of people on earth; and with Mr. Tullock, also, a man of the strictest veracity, who is now here with a party of them; and he says they never steal, have a high sense of honor, and, being fearless and proud, are quick to punish or retaliate.

The prevailing opinion amongst the Indian tribes of to-day in the West is, however, quite different as to the early Crows.

DAKOTA OR SIOUX—CROWS.

The Crows, or, as they call themselves, *Absaroka*, meaning "something or anything that flies," when first known occupied the Lower Yellowstone and the valleys of the Big Horn and Tongue Rivers, but roamed over much of the surrounding country, carrying their incursions even to the plains of Snake River and to the valley of the Green. Were originally one with the Minatarees, or Gros Ventres, but separated from them, and were afterward driven from their territory by the Ogalallas and Cheyennes, settling finally about the head of the Yellowstone, dispossessing in their turn the Blackfeet and Flatheads. Are divided into three bands, with a dialect peculiar to each,

viz, the Kikatsa or Crows proper, the Abnahaways, and the Allakaweah, numbering in all, as estimated in 1820, 3,250 souls. Obtaining horses at an early day, they became great marauders. Irving writes of them in "Astoria": "They are in fact notorious marauders and horse-stealers, crossing and recrossing the mountains (the Big Horn), robbing on one side and conveying their spoils to the other." Hence, we are told, is derived their name, given them on account of their unsettled and predatory habits, winging their flight, like the crows, from one side of the mountains to the other, and making free booty of everything that lies in their way. In 1851, joined in a treaty with the United States giving a right of way for roads to be built through their country. [In 1880 this was consummated.] In 1868 a treaty was made, and an attempt made to place all the Crows on one reservation, but without success until 1875, when they were located on the Crow Reservation, in Montana. They have been much exposed to incursions from some parties of Sioux at their new agency on the Rosebud as well as at their former one on the Yellowstone. The Indians, full of war and revenge, have no thought to bestow upon farming or other peaceful employment, especially as the best farming lands of the reservation are most exposed to these hostile incursions. Six families, however, have been induced to tend small farms, and have succeeded well. A mile and a half of ditch, sufficient to irrigate several hundred acres, has been dug, and it is hoped that another season will see at least a beginning made toward the civilization of these 4,000 wild but always loyal Crows.—W. H. Jackson, 1877.

PRESENT LOCATION AND CONDITION.

The Crows are divided by local usage into the Mountain and River Crows.

The River Crows were for a long time divided, a portion of them being at or near Fort Belknap Agency and many roamed. They are now, however, all on the Crow reservation, as given below.

In June, 1885, the Crows, at Crow Agency, Montana, numbered 3,226. By occupation they are farmers and herders.

They were removed from the western portion of their reservation in 1883 to the valleys of the Big and Little Big Horn Rivers. Many hold their lands in severalty. The reports of the agents in charge for ten years past (see Report of Commissioner of Indian Affairs since 1875) contain much information as to the habits and life of the Crows, and show them to be a superior Indian.

The Crows are believed to own more than 15,000 horses.

THE CROW INDIANS IN 1885.

Henry J. Armstrong, agent of the Crows for many years, in his last report, dated September 20, 1885, writes:

Although I have been much perplexed, annoyed, and discouraged many times by what seemed the shiftlessness of the Crows, yet I must say, in closing my term of office, that they have shown as good a disposition to do what was right as we could expect from any savage people. Of course they do not farm like white men, but it would be unfair to expect a people who for so long a time as they have any traditions have lived happily by the chase, and who still prefer that life, to work as well as white men. I can say that the Crows—take the good and bad together—are a good-hearted people. I know very well that many white men passing through the Indian country ridicule the idea that the Indians will ever do any real work, but I think such men expect more than they have a right to, and that they are unjust. We have

seen that white men who have lived all their lives in a farming community, but who have never put their hands to the plow, are very awkward when, a little late in life, they turn their attention to farming. How then could we expect the Indians to change their life in a day, so to speak; and especially in a country that is not a farming country because it needs irrigation? It is true that some of the Indians might have done better—they should have done better even with the little assistance I have been able to give them with my limited force of employés—but when we come to survey the whole work for a twelve-month or for the past two years we are compelled to admit that they have done well. * * *

I believe the time has arrived when there should be a decided change in the management of the Indians. I believe the Government ought never to make another treaty or agreement with any Indian tribe, but that it ought to go ahead and do what is right and best for the Indians, regardless of whether the Indians are pleased or not. They are but grown-up children, and are incompetent to enter into an agreement or to keep the agreement after they have made it. They do not know what is best for them, and are sure in most instances to want their matters arranged in a way that is not best for their future, even though it may please them at the time. There is not much hope for the Indians until the Government has determined that it will do what is right without consulting the Indians any further than to explain to them carefully what it is going to do for their good, why it is done, and what it expects them to do. After the experience of a lifetime, I give it as my candid opinion that our Government has never had a plan of managing the Indians that was worthy to be called a policy, from the fact that it has never attempted to govern them. What little control it has exercised over them has been done by coaxing, persuading, and bribing them with presents to be good, or at least not to be too bad. We have the spectacle of a great and powerful Government paying tribute to these petty little tribes. In some respects it has been too kind to the Indians. In other cases it has done them great wrongs. But the greatest of all wrongs has been in forever breaking them up and removing them to the wilderness after they had made a start to live rightly, as it has done with nearly every tribe, and in some instances two or three times.

We have an example of this at the present time in the case of the Indians at the Great Nemaha Agency, in Kansas. The Government has been laboring with those Indians for many years, and expended thousands of dollars upon them, until it has brought them up to a condition where they are self-supporting, and each family has a home, although the land is held in common. The only thing in the world the Government needs to do for them is to secure to each Indian his allotment of land, making it inalienable; pay them for the balance of their reservation and throw it open for settlement; bring the Indians into competition with white labor, and make them subject to the laws of the country. But instead of doing this, as any individual would who desired to do right, it is about to remove that tribe to the Indian Territory, contrary to the wishes of at least one-half the Indians—the best half—locating them alongside the wild Indians in the Territory; and in doing this it will set them back many years. Did anybody ever hear of anything more unjust or more ridiculous for a powerful Government to do with a weak people whom it called its wards?

Heretofore in patenting lands to Indians the Government has made the great mistake of not making the homesteads inalienable. It would be better to maintain reservations of limited size for the Indians *forever* than to give them lands in severalty without providing that they should be inalienable. This is the only protection the so-called civilized tribes require at the hands of the Government, and is the chief protection needed by the wild tribes.

In general there are but two things the Government should do for the Indians—all Indians. The first is to secure to each and every Indian in the United States a homestead immediately (even though all might not take possession at once), and in such a way that he cannot dispose of it and it cannot be taken for debt. The second is to throw open for settlement every square mile of Indian country not needed to provide homesteads for Indians, expending the money that would fairly be due them for such.

EH-TOH'K-PAH-SHE-PÉE-SHAH, THE BLACK MOCCASIN.

Aged chief of the Gros Ventres. No. 171, page 115.

(Plate 72, Vol. I, Catlin's Eight Years.)

lands in making necessary permanent improvements, in helping the Indians to establish themselves upon their homesteads, and in the purchase of stock for them. All other questions concerning the management of the affairs of the Indians are details, I think, more or less important when considered by themselves, but very much inferior to the two things mentioned."

GROS-VENTRES.

[Gros-Ventres: Laws of the United States. Gros-Ventres: Indian Bureau, June, 1885.]

MIN-A-TAR-REES (PEOPLE OF THE WILLOWS).

A small tribe, near neighbors and friends of the Mandans, speaking the Crow language, and probably have, at a former period, strayed away from them; numbering about 1,100.

Mr. Catlin was with the Gros-Ventres in 1832. Following Lewis & Clark, he called them Minatarees. Pages 185 to 190, vol. 1, Catlin's Eight Years.

171. *Eh-toh'k-pah-she-pée-shah*, the Black Moccasin; chief; over a hundred years old, sits in his lodge, smoking a handsome pipe, his arms and ornaments hanging on a post by the side of his bed. Since dead. Painted in 1832.
(Plate No. 72, page 186, vol. 1, Catlin's Eight Years.)

The chief sachem of this tribe is a very ancient and patriarchal looking man, by the name of *Eh-toh'k-pah-shee-pee-shah* (the Black Moccasin), and counts, undoubtedly, more than a hundred *snows*. I have been for some days an inmate of his hospitable lodge, where he sits tottering with age, and silently reigns sole monarch of his little community around him, who are continually dropping in to cheer his sinking energies and render him their homage. His voice and his sight are nearly gone; but the gestures of his hand are yet energetic and youthful, and freely speak the language of his kind heart.

I have been treated in the kindest manner by this old chief; and have painted his portrait (Plate 72, No. 171) as he was seated on the floor of his wigwam, smoking his pipe, whilst he was recounting over to me some of the extraordinary feats of his life, with a beautiful Crow robe wrapped around him, and his hair wound up in a conical form upon his head, and fastened with a small wooden pin, to keep it in its place.

This man has many distinct recollections of Lewis and Clarke, who were the first explorers of this country, and who crossed the Rocky Mountains thirty years ago. It will be seen by reference to their very interesting history of their tour that they were treated with great kindness by this man; and that they in consequence constituted him chief of the tribe, with the consent of his people, and he has remained their chief ever since. He inquired very earnestly for "Red Hair" and "Long Knife" (as he had ever since termed Lewis and Clarke), from the fact that one had red hair (an unexampled thing in his country), and the other wore a broad sword which gained for him the appellation of "Long Knife."

I have told him that "Long Knife" has been many years dead, and that "Red Hair" is yet living in Saint Louis, and no doubt would be glad to hear of him; at which he seemed much pleased, and has signified to me that he will make me bearer of some peculiar dispatches to him.*—G. C.

172. *E'e-a-chín-che-a*, the Red Thunder; the son of the Black Moccasin (No. 171), represented in the costume of a warrior. Painted in 1832.
(Plate No. 73, page 187, vol. 1, Catlin's Eight Years.)

*About a year after writing the above, and whilst I was in Saint Louis, I had the pleasure of presenting the compliments of this old veteran to General Clarke; and also of showing to him the portrait, which he instantly recognized amongst hundreds of others, saying that "they had considered the Black Moccasin quite an old man when they appointed him chief thirty-two years ago."—G. C.

I have also painted (No. 172, *Ée-a-chín-che-a*, Red Thunder) at full length, in his war dress, with his bow in his hand, his quiver slung, and his shield upon his arm.

In this plight, *sans* head-dress, *sans* robe, and *sans* everything that might be a useless incumbrance—with the body chiefly naked, and profusely bedaubed with red and black paint, so as to form an almost perfect disguise—the Indian warriors invariably sally forth to war, save the chief, who always plumes himself, and leads on his little band, tendering himself to his enemies a conspicuous mark, with all his ornaments and trophies upon him, that his enemies, if they get him, may get a prize worth the fighting for.—G. C.

173. *Pa-ris-róo-pa*, the Two Crows; with a handsome shirt, ornamented with ermine, and necklace of grisly bears' claws. This man is now the head chief of the tribe. Painted in 1832. (Two plates.)

174. (), —————; woman, the wife of the Two Crows. Painted in 1832.

175. *Seet-sé-be-a*, the Mid-day Sun; a pretty girl, in mountain-sheep skin dress and fan of the eagle's tail in her hand. Painted in 1832.
(Plate No. 74, page 188, vol. 1, Catlin's Eight Years.)

From the very numerous groups of these women, that have from day to day constantly pressed upon me, overlooking the operations of my brush, I have been unable to get more than one who would consent to have her portrait painted, owing to some fear or dread of harm that might eventually ensue in consequence, or from a natural coyness or timidity, which is surpassing all description amongst these wild tribes when in presence of strangers.

The one whom I have painted (Plate 74) is a descendant from the old chief, and though not the most beautiful, is yet a fair sample of them, and dressed in a beautiful costume of the mountain-sheep skin, handsomely garnished with porcupine quills and beads. This girl was almost *compelled* to stand for her picture by her relatives, who urged her on, whilst she modestly declined, offering as her excuse that "she was not pretty enough, and that her picture would be laughed at." This was either ignorance or excessive art on her part, for she was certainly more than comely, and the beauty of her name, *Seet-sé-be-a* (the Mid-day Sun) is quite enough to make up for a deficiency, if there were any, in the beauty of her face.—G. C.

ALGONKIN—GROS-VENTRES (MINATA-REES).

(See Sioux, Dakotas, and Algonkin, herein.)

This tribe originally lived with the Crows, but separated from them.

MR. CATLIN'S NOTES ON THE GROS VENTRES INDIANS.

The Minatarees (people of the willows) are a small tribe of about one thousand five hundred souls, residing in three villages of earth-covered lodges, on the banks of Knife River, a small stream, so-called, meandering through a beautiful and extensive prairie, and uniting its waters with the Missouri (now near Mandan, Dakota).

This small community is undoubtedly a part of the tribe of Crows, of whom I have already spoken, living at the base of the Rocky Mountains, who have at some remote period, either in their war or hunting excursions, been run off by their enemy, and their retreat having been prevented, have thrown themselves upon the hospitality of the Mandans, to whom they have looked for protection, and under whose wing they are now living in a sort of confederacy, ready to intermarry and also to join, as they often have done, in the common defense of their country.

In language and personal appearance, as well as in many of their customs, they are types of the Crows; yet having adopted and so long lived under its influence, the system of the Mandans, they are much like them in many respects, and continually

assimilating to the modes of their patrons and protectors. Amongst their vague and various traditions they have evidently some disjointed authority for the manner in which they came here, but no account of the time. They say, that they came poor—without wigwams or horses—were nearly all women, as their warriors had been killed off in their flight; that the Mandans would not take them into their village, nor let them come nearer than where they are now living, and there assisted them to build their villages. From these circumstances their wigwams have been constructed exactly in the same manner as those of the Mandans which I have already described, and entirely distinct from any custom to be seen in the Crow tribe.

Notwithstanding the long familiarity in which they have lived with the Mandans, and the complete adoption of most of their customs, yet it is almost an unaccountable fact that there is scarcely a man in the tribe who can speak half a dozen words of the Mandan language, although, on the other hand, the Mandans are most of them able to converse in the Minataree tongue, leaving us to conclude either that the Minatarees are a very inert and stupid people or that the Mandan language (which is most probably the case), being different from any other language in the country, is an exceedingly difficult one to learn.

The Minatarees, as I have before said, are a bold, daring, and warlike tribe, quite different in these respects from their neighbors the Mandans, carrying war continually in their enemies' country, thereby exposing their lives and diminishing the number of their warriors to that degree that I find two or three women to a man through the tribe.

The name by which these people are generally called (*Gros Ventres*) is one given them by the French traders, and has probably been applied to them with some degree of propriety or fitness, as contradistinguished from the Mandans, amongst whom these traders were living; and who are a small race of Indians, being generally at or below the average stature of man, whilst the Minatarees are tall and heavily built. There is no tribe in the western wilds, perhaps, who are better entitled to the style of warlike than the Minatarees, for they, unlike the Mandans, are continually carrying war into their enemies' country, oftentimes drawing the poor Mandans into unnecessary broils, and suffering so much themselves in their desperate war executions that I find the proportion of women to the number of men as two or three to one through the tribe.

PRESENT LOCATION AND CONDITION.

See, also, titles "*Sioux and Blackfeet*" herein, as the general history of the *Gros Ventres* is similar to and identified with them. They were made reservation Indians after 1866.

In June, 1884, the *Gros Ventres* at Fort Berthold Agency, Dakota, numbered 397; on August 18, 1885, 435. They are on both sides of the Missouri River, living with the Mandans and *Arickarees*.

A band of 200 *Gros Ventres* and Mandans are also reported as being near Fort Buford.

The *Gros Ventres* at Fort Belknap Agency, Montana, August, 1884, numbered 1,150; August 5, 1885, 852.

This reservation is along and adjacent to the line of British Columbia.

They are blanket Indians, and are slowly decreasing. Total in 1884, 1,547; total in 1885, 1,287.

CREES (KNIS-TE-NEU).

A small tribe of 3,000, in Her Majesty's dominions, neighbors of the *Blackfeet*, and always at war with them; desperate warriors; small and light in stature. Half of them have recently died of the small-pox since I was amongst them.

Mr. Catlin was with them in 1832—they were encamped at Fort Union, along with the Blackfeet and Crows—in June, July, and August. A tribe of British Columbia (June, 1885.)

176. Eeh-tow-wées-ka-zeet, He Who has Eyes behind Him, called Bro-cas-sie or Bros-casse—the Broken Arm; one of the foremost braves of the tribe, in a handsome dress.

This man visited Washington with the Indian agent, Major Sanford, a few years since. Painted in 1832.

(Plate No. 30, page 57, vol. 1, Catlin's Eight Years.)

177. Tsee-móunt, a Great Wonder; woman carrying her infant in her robe. Painted in 1832.

(Plate No. 33, page 57, vol. 1, Catlin's Eight Years.)

Showing fairly the fashion of cutting and ornamenting the dresses of the females of this tribe.—G. C.

178. Tow-ée-ka-wet, —————; woman. Wife of No. 176.

(Plate No. 31, page 57, vol. 1, Catlin's Eight Years.)

ALGONKIN—CREE.

MR. CATLIN'S NOTES ON THE CREE INDIANS.

The Knisteneaux, or Crees, as they are more familiarly called in this country, are a very numerous tribe, extending from this place as high north as the shores of Lake Winnipeg; and even much further in a northwesterly direction, towards, and even through, a great part of the Rocky Mountains.

I have before said of these, that they were about 3,000 in numbers; by that I meant but a small part of this extensive tribe, who are in the habit of visiting the American Fur Company's establishment, at this place, to do their trading; and who themselves scarcely know anything of the great extent of country over which this numerous and scattered family range. Their customs may properly be said to be primitive, as no inroads of civilized habits have been as yet successfully made amongst them. Like the other tribes in these regions, they dress in skins, and gain their food and conduct their wars in a very similar manner. They are a very daring and most adventurous tribe, roaming vast distances over the prairies and carrying war into their enemies' country. With the numerous tribe of Blackfeet they are always waging an uncompromising warfare, and though fewer in numbers and less in stature, they have shown themselves equal in sinew and not less successful in mortal combat.—G. C., 1832.

A roaming tribe of British Columbia. (See Dr. D. G. Brinton's note on the Crees herein, title Algonkin, pages 89, 90.)

AS-SIN-NE-BOINS (STONEBOILERS).

[Assinaboines: Laws of the United States. Assinaboines: Indian Bureau, June, 1885.]

A tribe of 8,000, occupying the country from the mouth of the Yellowstone River to Lake Winnipeg, in Her British Majesty's dominions, speaking the Sioux or Dakota language, ranging about, like them, in skin lodges, and no doubt a severed band of that great nation. Four thousand of these people destroyed by the small pox in 1838, since I was amongst them.

Mr. Catlin met the Assinaboines in 1832, on the Yellowstone, at and near Fort Union.

179. Wi-jún-jon, the Pigeon's-egg Head; one of the most distinguished young warrior's of the tribe.

He was taken to Washington in 1832, by Major Sanford, the Indian agent; after he went home he was condemned as a liar, and killed, in consequence of the incredible stories which he told of the whites. (See him on his way to, and returning from, Washington, No. 475.) Painted in 1832.

(Plate No. 28, page 56, vol. 1, Catlin's Eight Years.)

I have painted the portrait of a very distinguished young man, and son of the chief (plate 28, No. 179). His dress is a very handsome one, and in every respect answers well to the descriptions I have given.

I have just had the satisfaction of seeing this traveled gentleman (Wi-jún-jon) meet his tribe, his wife, and his little children, after an absence of a year or more on his journey of 6,000 miles to Washington City and back again, in company with Major Sanford, the Indian agent, where he has been spending the winter amongst the fashionables in the polished circles of civilized society. And I can assure you, readers, that his entrée amongst his own people, in the dress and with the airs of a civilized beau, was one of no ordinary occurrence, and produced no common sensation amongst the red-visaged Assiniboinis, or in the minds of those who were travelers, and but spectators to the scene.

On his way home from Saint Louis to this place, a distance of 2,000 miles, I traveled with this gentleman, on the steamer Yellowstone, and saw him step ashore on a beautiful prairie where several thousand of his people were encamped, with a complete suit *en militaire*, a colonel's uniform of blue, presented to him by the President of the United States, with a beaver hat and feather, with epaulettes of gold—with sash and belt, and broadsword, with high-heeled boots—with a keg of whisky under his arm, and a blue umbrella in his hand. In this plight and metamorphose he took his position on the bank, amongst his friends—his wife and other relations, not one of whom exhibited, for a half-hour or more, the least symptoms of recognition, although they knew well who was before them. He also gazed upon them—upon his wife and parents, and little children, who were about, as if they were foreign to him, and he had not a feeling or thought to interchange with them. Thus the mutual gazings upon and from this would-be stranger lasted for fully half an hour, when a gradual, but cold and exceedingly formal recognition began to take place, and an acquaintance ensued, which ultimately and smoothly resolved itself, without the least apparent emotion, into its former state, and the mutual kindred intercourse seemed to flow on exactly where it had been broken off, as if it had been but for a moment, and nothing had transpired in the interim to check or change its character or expression.

Such is one of the stoic instances of a custom which belongs to all the North American Indians, forming one of the most striking features in their character; valued, cherished, and practiced, like many of their strange notions, for reasons which are difficult to be learned or understood, and which probably will never be justly appreciated by others than themselves.

This man, at this time, is creating a wonderful sensation amongst his tribe, who are daily and nightly gathered in gaping and listless crowds around him, whilst he is descanting upon what he has seen in the fashionable world; and which to them is unintelligible and beyond their comprehension; for which I find they are already setting him down as a liar and impostor.

What may be the final results of his travels and initiation into the fashionable world, and to what disasters his incredible narrations may yet subject the poor fellow in this strange land, time only will develop.

He is now in disgrace, and spurned by the leading men of the tribe, and rather to be pitied than envied, for the advantages which one might have supposed would have flown from his fashionable tour. More of this curious occurrence and of this extraordinary man I will surely give in the future.—G. C.

(See No. 474, herein.)

180. Chin-cha-pee, the Fire-Bug that Creeps; wife of Wi-jún-jon (No. 179); her face painted red, and in her hand a stick, used by the women in those regions for digging the "pomme blanche," or prairie turnip. Painted in 1832. (Plate No. 29, page 56, vol. 1, Catlin's Eight Years.)

Plate 29, No. 180, is the portrait of Wi-jún-jon's wife, Chin-cha-pee (the Fire-Bug that Creeps), a fine-looking squaw, in a handsome dress of the mountain-sheep skin, holding in her hand a stick curiously carved, with which every woman in this country is supplied, for the purpose of digging up the "pomme blanche," or prairie turnip (*camus*), which is found in great quantities in these northern prairies, and furnishes the Indians with an abundant and nourishing food. The women collect these turnips by striking the end of the stick into the ground and prying them out; after which they are dried and preserved in their wigwams for use during the season.—G. C.

181. (————), woman and child, in beautiful skin dresses. Painted in 1832. (Plate No. 34, page 57, vol. 1, Catlin's Eight Years.)

The women of this tribe are often comely, and sometimes pretty. In plate 34 will be seen a fair illustration of the dresses of the women and children, which are usually made of the skins of the mountain goat and ornamented with porcupine quills and rows of elk teeth.—G. C.

MR. CATLIN'S NOTES ON THE ASSINNABOINE INDIANS.

The Assinneboins of seven thousand * * * occupy a vast extent of country in a northeastern direction from this, extending also into the British possessions as high north as Lake Winnipeg and trading principally with the British company—in British America.

The Assinneboins are a part of the Dohcotas (Dakotas) or Sioux, undoubtedly, for their personal appearance as well as their language is very similar.

The Assinnaboins, somewhat like the Crows, cultivate their hair to a very great length, in many instances reaching down nearly to the ground; but in most instances of this kind I find the great length is produced by splicing* or adding on several lengths, which are fastened very ingeniously by means of glue, and the joints obscured by a sort of paste of red earth and glue, with which the hair is at intervals of every two or three inches filled, and divided into locks and slabs of an inch or so in breadth, and falling straight down over the back to the heels.

At what time, or in what manner, these two parts of a nation got strayed away from each other is a mystery; yet such cases have often occurred, of which I shall say more in future. Large parties who are straying off in pursuit of game, or in the occupation of war, are oftentimes intercepted by their enemy; and, being prevented from returning, are run off to a distant region, where they take up their residence and establish themselves as a nation.

THE ORIGIN OF THE NAME ASSINEBOIN.

There is a very curious custom amongst the Assinneboins, from which they have taken their name—a name given them by their neighbors, from a singular mode they have of boiling their meat, which is done in the following manner: When they kill meat a hole is dug in the ground about the size of a common pot, and a piece of the raw hide of the animal, as taken from the back, is put over the hole and then pressed down with the hands close around the sides and filled with water. The meat to be boiled is then put in this hole or pot of water; and in a fire, which is built near by, several large stones are heated to a red heat, which are successively dipped and held in the water until the meat is boiled; from which singular and peculiar custom the Ojibbeways have given them the appellation of Assinneboins or stone-boilers.

* The Chinese men also splice their hair and wear it to the ground.—T. D.

This custom is a very awkward and tedious one, and used only as an ingenious means of boiling their meat by a tribe which was too rude and ignorant to construct a kettle or pot.

The traders have recently supplied these people with pots; and even long before that the Mandans had instructed them in the secret of manufacturing very good and serviceable earthen pots, which together have entirely done away the custom excepting at public festivals, where they seem, like all others of the human family, to take pleasure in cherishing and perpetuating their ancient customs.

The Assiniboinas, or stone-boilers, are a fine and noble looking race of Indians, bearing, both in their looks and customs, a striking resemblance to the Dakotas, or Sioux, from whom they have undoubtedly sprung. The men are tall and graceful in their movements, and wear their pictured robes of the buffalo hide with great skill and pleasing effect. They are good hunters, and tolerably supplied with horses; and living in a country abounding with buffaloes, are well supplied with the necessities of Indian life, and may be said to live well. Their games and amusements are many, of which the most valued one is the ball-play; and in addition to which they have the game of the moccasin, horse-racing, and dancing, some one of which they seem to be almost continually practicing, and of all of which I shall hereafter give the reader (as well as of many others of their amusements) a minute account.—G. C.

THE ASSINABOINES.

(See Dakotas, herein.)

The Assiniboinas, or Stone Indians—the Dakotas proper—were called by the Algonkins Nudowesioux.

(See No. 453, herein, for pipe dance.)

The Assinaboinas made treaties with the United States after 1855, and up to July, 1880. They were forced to quit farming and to locate on the reservations in Northern Montana after 1875 by reason of the building of railroads, disappearance of game, and the incoming of settlers. This tribe roamed along with the Blackfeet and Piegiens to north of the Yellowstone, and affiliated with the Crees from British America. The boundary line between the United States and the Dominion of Canada was not clearly defined until after 1874, and up to within a year or two past there has been a free zone below that line. The surrender of Sitting Bull's Sioux, the almost destruction of a portion of the Piegiens by Col. E. M. Baker in 1870, and the evident intention of the Government to use force to compel them to stop roaming had this effect. The agents at both agencies, Fort Peck, and Fort Belknap, Montana, make extremely favorable reports as to these Indians.

PRESENT LOCATION AND CONDITION.

In June, 1884, the Assinaboinas at Fort Peck Agency, Montana, numbered 1,195, and at Fort Belknap Agency, Montana, 1,000; total, 2,195.

August 15, 1885, the Assinaboinas at Fort Peck Agency, Montana, numbered 1,072; at Fort Belknap, August 5, 1885, 700; total, 1,772. Decreasing in numbers. They are blanket Indians. Most of them are roamers and herders, though some few are devoted to agriculture. They

are addicted to dances, and insist upon them. The Sun dance, an exceedingly barbarous one, common to the Sioux and other northwestern tribes, is their preference. It has been suppressed at most agencies.

CHIP-PE-WAYS (OJIBBEWAYS).

[Chippewas: Laws of the United States. Chippewas: Indian Bureau, June, 1885.]

A very numerous tribe, of some 15,000 or 20,000, inhabiting a vast tract of country on the southern shores of Lake Superior, Lake of the Woods, and the Athabasca, extending a great way into the British territory; residing in skin and bark lodges.

Mr. Catlin met some of them on the Yellowstone at Fort Union in 1832, and visited them on the Upper Mississippi, at and near Fort Snelling and at the Falls of Saint Anthony in 1835, and again at Sault de St. Marie in 1836.

182. Sha-có-pay, the Six; chief of the Ojibbeways living north of the mouth of the Yellowstone River; in a rich dress, with his battles emblazoned on it. Painted in 1832.

(Plate No. 35, page 58, vol. 1, Catlin's Eight Years.)

The chief of that part of the Ojibbeway tribe who inhabit these northern regions (plate No. 35, No. 182), and whose name is Sha-có-pay (the Six), is a man of large size, with dignity of manner and pride and vanity just about in proportion to his bulk. He sat for his portrait in a most beautiful dress fringed with scalp-locks in profusion which he had snatched in his early life from his enemies' heads and now wears as proud trophies and proofs of what his arm has accomplished in battles with his enemies. His shirt of buckskin is beautifully embroidered and painted in curious hieroglyphics with the history of his battles and the charts of his life.—G. C.

183. Kay-a-gís-gis, ———; a beautiful young woman pulling her hair out of braid. Painted in 1832.

184. Háh-je-day-ah-shee, the Meeting Birds; a brave, with his war-club in his hand. (No plate.) Painted in 1835.

185. Kay-ée-qua-da-kúm-ee-gísh-kum, He who tries the Ground with his Foot. Painted at Sault de Sainte Marie in 1836. (No plate.)

186. Jú-ah-kís-gaw, ———; woman, with her child in a cradle or "crib." Painted in 1834.

(Plate No. 245, page 139, vol. 2, Catlin's Eight Years.)

The portrait of a Chippeway woman, *Ju-ah-kis-gaw*, with her child in its crib or cradle. In a former letter I gave a minute account of the Sioux cradle, and here the reader sees the very similar mode amongst the Chippeway; and as in all instances that can be found, the *ni-ahkust-ahig* (or umbilicus) hanging before the child's face for its supernatural protector.

This woman's dress was mostly made of civilized manufactures, but curiously decorated and ornamented according to Indian taste.—G. C.

187. Cáh-be múb-bee (*Ka-be mub-be*). He who sits everywhere; a brave. Painted in 1834.

(Plate No. 242, page 139, vol. 2, Catlin's Eight Years.)

Of the portraits of chiefs and others I have painted amongst the Chippeways at this place, two distinguished young men will be seen in plates 241, 242, Nos. 186 and

SHA-CÓ-PAY, THE SIX.

Chief of the Chippewas, No. 182, page 122.
(Plate 35, Vol. I, Catlin's Eight Years.)

187. The first by the name of *Ka-bes-kunk* (No. 189), he who travels everywhere; the other, *Ka-be-mub-be* (No. 187), he who sits everywhere; both painted at full length, in full dress, and just as they were adorned and equipped, even to a quill and a trinket.—G. C. *Ibid*.

188. *O-tá-wah*, the Ottaway; a distinguished warrior. Painted in 1832.
(Plate No. 244, page 179, vol. 2, Catlin's Eight Years.)

189. *Ka-bés-hunk*, He who travels everywhere; a desperate warrior; his war-club in his left hand and a handsome pipe in his right; strikes with his left hand; eight quills in his head stand for eight scalps he had taken from the heads of the Sioux, his enemies. Painted in 1832.

(Plate No. 241, page 139, vol. 2, Catlin's Eight Years.)

The first of these two young men (No. 189, *Ka-bes-kunk*) is, no doubt, one of the most remarkable of his age to be found in the tribe. Whilst he was standing for his portrait, which was in one of the officer's quarters in the fort, where there were some ten or fifteen of his enemies, the Sioux, seated on the floor around the room; he told me to take particular pains in representing eight quills which were arranged in his head-dress, which he said stood for so many Sioux scalps that he had taken with his left hand, in which he was grasping his war-club, with which hand he told me he was in the habit of making all his blows.—G. C.

190. *Ohj-ká-tchee-kum*, He who walks on the sea. Painted in 1835. (No plate.)

191. *Gitch-ee-gáw-ga-osh*, the point that remains forever; a very old and respectable chief. (Since dead.) Painted in 1836.

(Plate No. 269, page 162, vol. 2, Catlin's Eight Years.)

192. *Gaw-záw-que-dung*, He who halloos. Civilized. (No plate.) Painted at Sault de Sainte Marie in 1836.

193. *O'n-daig*, the Crow; a beau or dandy in full array, called by the Ojibbeways, *sha-wiz-zee-shah-go-tay-a*, a harmless man. Painted in 1835.

(Plate No. 268, page 162, vol. 2, Catlin's Eight Years.)

194. *I-an-be-w'ah-dick*, the Male Carabou; a brave, with a war-club in his hand. (No plate.) Painted at Sault de Sainte Marie in 1836.

195. (), ———; woman. Painted in 1836.

MR. CATLIN'S NOTES ON THE CHIPPEWA INDIANS.

As the Sioux own and occupy all the country on the west bank of the river in this vicinity, so do the Chippeways claim all lying east, from the mouth of the Chippeway River, at the outlet of Lake Pepin, to the source of the Mississippi; and within the month past, there have been 1,000 or more of them encamped here, on business with the Indian agent and Sioux, with whom they have recently had some difficulty. These two hostile foes, who have, time out of mind, been continually at war, are now encamped here, on different sides of the fort; and all difficulties having been arranged by their agent, in whose presence they have been making their speeches, for these two weeks past, have been indulging in every sort of their amusements, uniting in their dances, ball-plays, and other games; and feasting and smoking together, only to raise the war-cry and the tomahawk again, when they get upon their hunting grounds.—G. C., Fort Snelling, 1835.

(For a series of paintings of Chippewa games and customs see Nos. 314–334, 434, 451, 452, 465, herein.)

Mr. Catlin painted them during this visit. The text accompanying them is full and interesting.

ALGONKIN—CHIPPEWAS.

Migrating from the East late in the sixteenth or early in the seventeenth century, the Chippewas, or Ojibwas, settled first about the Falls of Saint Mary, from which point they pushed still farther westward, and eventually compelled the Dakotas to relinquish their ancient hunting grounds about the headwaters of the Mississippi and of the Red River of the North. Were first known to the French about 1640, who called them *Sauteux*, from the place of their residence about Sault Sainte Marie, a name still applied to them by the Canadian French. They were then living in scattered bands on the banks of Lake Superior and Lake Huron, and at war with the Foxes, Iroquois, and Dakotas, becoming thereby much reduced in numbers. Were firm allies of the French in all of their operations against the English, and took a prominent part in Pontiac's uprising. During the revolutionary war they were hostile to the colonists, but made a treaty of peace with them at its close. They again sided with the English in the war of 1812, but joined in a general pacification with a number of other tribes in 1816. Like other tribes, they gradually ceded their lands to the Government, receiving in return annuities and goods, until in 1851 all but a few bands, retaining but moderate reservations, had removed west of the Mississippi.

The Chippewas, now numbering 19,606 (1877), formerly ranged over Michigan, Wisconsin, and Minnesota, and with common interests, and acknowledging more or less the leadership of one controlling mind, formed a homogeneous and powerful nation; a formidable foe to the Sioux, with whom they waged incessant warfare, which was checked only by the removal of the Minnesota Sioux to Dakota after the outbreak of 1863.

The collecting of the Chippewas upon thirteen reservations, scattered over the above-named States, under five different agencies, has so modified the *esprit du corps* of the tribe that, though speaking the same language and holding the same traditions and customs, the bands located in different sections of the country have few interests and no property in common, and little influence or intercourse with each other. The agency has taken the place of the nation, and is in turn developing the individual man, who, owning house, stock, and farm, has learned to look solely to his own exertions for support. No tribe by unswerving loyalty deserves more of the Government, or is making, under favorable conditions, more gratifying progress; 9,850 of the tribe live in houses, 9,345 are engaged in agriculture and other civilized occupations, and 13,202 wear citizen's dress. Fifty-seven per cent. of their subsistence is obtained by their own labor, mainly in farming; for the rest, they depend on game and fish, especially the latter, of which they readily obtain large quantities.

The Chippewas are extensively intermarried with the Ottawas, and are thrifty and worthy citizens of the United States, as are also those of Saginaw and of Keewenaw Bay in Michigan. The Bad River, Red Cliff, Red Lake, and Mississippi bands are likewise making rapid progress in civilization. Of those which have made but little or no progress are the Leech Lake, White Earth, Mille Lac, and other scattered bands in remote and inaccessible regions of Minnesota and Wisconsin, the older chiefs resolutely opposing any attempt on the part of the younger men to begin a civilized life. — W. H. Jackson, 1877.

For statistics and details as to the progress and civilization of the Chippewas see Annual Reports of the Commissioners of Indian Affairs for the years since and including 1877 and to 1885.

The reports of the Indian Commission and of the several Indian agents in charge of the Chippewas can also be found in the same reports.

NOT-TO-WAY, THE THINKER.
Iroquois chief. No. 196, page 125.
(Plate 206, Vol. II, Catlin's Eight Years.)

Present location and numbers, June, 1884, 1885.

Name of tribe and location.	In 1884.	In 1885.
Chippewa (Munsee) at Pottawatomie and Great Nemaha Agency, Kansas	66	72
Chippewa at Mackinac Agency, Michigan		
Chippewa of Saginaw, Swan Creek, and Black River	2,500	2,500
Chippewa of Lake Superior	1,000	1,000
Ottawa and Chippewa	6,000	6,000
Chippewa at White Earth Agency, Minnesota:		
Mississippi Chippewa	948	922
Otter Tail Pillager Chippewa	601	596
Pembina Chippewa	214	218
Red Lake Chippewa	1,069	1,069
Pillager Chippewa, Leech Lake	1,479	1,169
Mississippi Chippewa	82	
Mississippi Chippewa, at Mille Lac	894	942
Chippewa at La Pointe Agency, Wisconsin:		
Red Bluff	214	220

Lac Court d'Oreille	1,041	1,100
Fond du Lac	403	400
Grand Portage	258	298
Boise Fort	665	698
Lac du Flambeau	511	434
Total	18,445	

Almost all civilized Indians; many of them citizens of the United States. Slightly decreasing.

In 1885 United States commissioners visited the Chippewas and prevailed upon them to consent to a reduction of some of their reservations and to lands in severalty.

I-RO-QUOIS.

[Not now known officially to laws of United States or Indian Bureau.]

A small remnant of a tribe who were once very numerous and warlike, inhabiting the northern part of New York; only a few scattered individuals now living, who are merged in the neighboring tribes.

196. Nót-to-way, a chief; a temperate and excellent man, with a beautiful head-dress on. Painted in 1831.

(Plate No. 206, pages 106, 107, vol. 2, Catlin's Eight Years.)

Nót-o-way, the Thinker, was an excellent man, and was handsomely dressed for his picture. I had much conversation with him, and became very much attached to him. He seemed to be quite ignorant of the early history of his tribe, as well as of the position and condition of its few scattered remnants, who are yet in existence. He told me, however, that he had always learned that the Iroquois had conquered nearly all the world; but the Great Spirit being offended at the great slaughters by his favorite people, resolved to punish them; and he sent a dreadful disease amongst them that carried the most of them off, and all the rest that could be found were killed by their enemies; that though he was an Iroquois, which he was proud to acknowledge to me, as I was to "make him live after he was dead," he wished it to be generally thought that he was a Chippeway, that he might live as long as the Great Spirit had wished it when he made him.—G. C.

197. Chée-ah-ká-tchee, wife of Nót-to-way (No. 196).

(See page 106, vol. 2, Catlin's Eight Years.)

Mr. Catlin made no outline drawing of this picture, and does not mention it in the text descriptive of her husband's picture, viz, No. 196.

In the Cartoon Collection it is given as "No. 3, A-Tchee-a-ka-chee, ———, an Iroquois woman, curiously wrapped in her blanket." (See page 6, Catalogue Cartoon Collection.)

MR. CATLIN'S NOTES ON THE IROQUOIS.

One of the most numerous and powerful tribes that ever existed in the northern regions of our country, and now one of the most completely annihilated. * * * The few remnants of them have long since merged into other tribes.—G. C.

(See title Iroquois, in Dr. D. G. Brinton's "The Lenâpé and their Legends," 1885, also title "Six Nations," page 178, herein.)

The whole of the Six Nations have been by some writers denominated Iroquois. How correct this may be I am not quite able to say; one thing is certain, that is, that the Iroquois tribe did not all belong to that confederacy, their original country was on the shores of the Saint Lawrence; and, although one branch of their nation, the Mohawks, formed a part, and the most effective, portion of that compact, yet the other members of it spoke different languages; and a great part of the Iroquois moved their settlements further north and east, instead of joining in the continual wars carried on by the Six Nations. It is of this part of the tribe that I am speaking when I mention them as nearly extinct; and it is from this branch of the family that I got the portrait which I have introduced above.—Page 106, vol. 2, Catlin's Eight Years.

ÓT-TA-WAS.

[Ottawa: Laws of the United States. Ottawa: Indian Bureau, June, 1885.]

A subdued and half-civilized tribe of 5,500, speaking the Ojibbeway language, on the eastern shore of Lake Michigan. Agricultural and dissipated.

198. Shin-gós-se-moon, the Big Sail; a chief, blind in one eye.

The effects of whisky and civilization are plainly discernible in this instance.

Mr. Catlin saw Big Sail in 1831, while he was visiting near Niagara Falls. This person belonged to the Chippewas of Upper Canada.

ALGONKIN—OTTAWAS.

When first discovered by the early French explorers were residing on the north-west shore of the peninsula of Michigan. After the defeat of the Hurons in 1649, they fled before the Iroquois to beyond the Mississippi, but were soon compelled to retrace their steps by the Dakotas, and finally settled at Mackinaw, where they joined the French in many of their operations and in their contest for Canada. At its close, Pontiac, head chief of the Detroit Ottawas, organized a great conspiracy for the destruction of the English, which was only partially successful. During the Revolution were with the English, and also in the war of 1812. At the close of the war of 1812 a long series of treaties followed, until, in 1833, those in Michigan ceded their lands and removed south of the Missouri River. In 1836 those in Ohio sold their lands and removed to the Indian Territory and prospered, becoming citizens of the United States in 1867. In 1870 made another move to a new reservation of 25,000 acres near the Shawnees, where they are now living, reduced to 140 (1871). A large number of Ottawas are now living on the shore of Lake Superior, so intermarried and confederated with the Chippewas that there is no attempt at any distinction between them, the two combined numbering over 6,000. In Canada there are about 1,000 more, all self-supporting.—W. H. Jackson, 1877.

(See also Chippewa.)

PRESENT LOCATION AND NUMBERS.

Ottawas at Quapaw Agency, Indian Territory, 122 in 1884; in August, 1885, 117; dress in citizen's clothes; civilized.

Ottawas with Chippewas, at Mackinac Agency, Michigan, in 1884, 6,000; in 1885, the same. Intermarried, and impossible to give estimate of either tribe. Farmers, fishermen, and lumbermen; civilized; lands being allotted.

Agent W. M. Ridpath, at the Quapaw Agency, in charge of the Ottawas, reports, August 26, 1885:

The Indians are all civilized and competent to earn a livelihood for themselves. Most of them speak the English language fluently, and their communities in point of intelligence compare favorably with settlements of whites in the neighboring States.

WIN-NE-BÁ-GOES.

[Winnebagoes: Laws of United States. Winnebágoe: Indian Bureau, June, 1885.]

A very fierce and war-like tribe, on the western shores of Lake Michigan, greatly reduced of late years by repeated attacks of the small-pox and the dissipated vices of civilized neighbors; number at this time, 4,400.

Mr. Catlin saw the Winnebagoes first in 1831; afterwards he was with them at Prairie du Chien, Wisconsin, then spelled Ouisconsin, in 1836. Mrs. Catlin was with him at this time.

199, 200, 201, 202, 203, 204, 205, 206. Du-cór-rea (Decorie); chief of the tribe, and his family; a group of eight. Painted in 1831. (No plate.)

This name is given many ways: By George Gale as "De Carry," "De Kaury" in the Wisconsin Historical Collections, and Mr. Catlin, "Du-cor rea." The United States officials, however, knew him as Decorie. He was head chief of the Winnebagoes, and delivered Black Hawk and the Prophet to General Street at Prairie du Chien, August 27, 1832. Chaetar, also a Winnebago, was with him. This act ended the Black Hawk war of 1832.

From Fort Winnebago, 1831.

There was old Dey-kau-ray, the most noble, dignified, and venerable of his own, or indeed of any other, tribe. His fine Roman countenance, rendered still more striking by his bald head, with one solitary tuft of long silvery hair neatly tied and falling back on his shoulders; his perfectly neat, appropriate dress, almost without ornament, and his courteous demeanor, never laid aside under any circumstances, all combined to give him the highest place in the consideration of all who knew him. It will hereafter be seen that his traits of character were not less grand and striking than were his personal appearance and deportment.—Mrs. J. H. Kinzie, "Wau-Bun," page 89.

Mr. Kinzie, the agent at a conference with the Winnebago chiefs in 1831, in the matter of sending their children to a school in Kentucky, was thus addressed by Dey-Kau-Ray on education:

Father, the Great Spirit made the white man and the Indian. He did not make them alike. He gave the white man a heart to love peace and the arts of a quiet

life. He taught him to live in towns, to build houses, to make books, to learn all things that would make him happy and prosperous in the way of life appointed him. To the red man the Great Spirit gave a different character. He gave him a love of the woods, of a free life, of hunting and fishing, of making war with his enemies, and taking scalps. The white man does not live like the Indian; it is not his nature; neither does the Indian love to live like the white man. The Great Spirit did not make him so.

Father, we do not wish to do anything contrary to the will of the Great Spirit. If he had made us with white skins and characters like the white men, then we would send our children to this school to be taught like the white children.

We think that if the Great Spirit had wished us to be like the whites he would have made us so; as he has not seen fit to do so, we believe he would be displeased with us to try and make ourselves different from what he thought good. I have nothing more to say. This is what we think. If we change our minds we will let you know.—*Ibid.*, pp. 119, 120.

In the winter of 1832-'33 food was scarce at Fort Winnebago, and the Indians suffered severely. Mrs. Kinzie writes of this:

The noble old Dey-kau-ray came one day from the Barribault to apprise us of the state of his village. More than forty of his people, he said, had now been for many days without food, save bark and roots. My husband accompanied him to the commanding officer to tell his story, and ascertain if any amount of food could be obtained from that quarter. The result was the promise of a small allowance of flour, sufficient to alleviate the cravings of his own family.

When this was explained to the chief he turned away.

"No," he said, "if his people could not be relieved, he and his family would starve with them," and he refused for those nearest and dearest to him the proffered succor until all could share alike.—"Wau-Bun," p. 484.

Decorie died in 1834, and was buried near Fort Winnebago.

207. **Wah-chee-háhs-ka**, the Man who puts all out of Doors, called the "Boxer"; the largest man of the Winnebagoes; war-club in his hand, and rattle-snake skins on his arms. Painted in 1835.

Wah-chee-hahs-ka is a distinguished man of the Winnebago tribe. He died of the small-pox the next summer after this portrait was painted. Whilst the small-pox was raging so bad at the Prairie, he took the disease, and in a rage plunged into the river, and swam across to the island, where he dragged his body out upon the beach, and there he died, and his bones were picked by dogs, without any friend to give him burial.

(Plate No. 255, page 146, vol. 2, Catlin's Eight Years, viz, in 1836.)

208. **Won-de-tów-a**, the Wonder. Painted in 1835.

(No plate.)

209. **Náw-káw**, Wood; formerly the head chief, with his war-club on his arm. Dead. Painted in 1836.

(Plate No. 254, page 146, vol. 2, Catlin's Eight Years.)

In plate 254, No. 209, will be seen the portrait of an old chief, who died a few years since, and who was for many years the head chief of the tribe, by the name of Naw-kaw (wood). This man has been much distinguished in his time for his eloquence, and he desired me to paint him in the attitude of an orator, addressing his people.—G. C., 1838.

From Fort Winnebago:

There were Naw-kaw, or Kar-ray-mau-nee, "the Walking Rain," now principal chief of the nation (Winnebagoes), a stalwart Indian with a broad, pleasant countenance,

NÁW-KÁW, Wood.

Winnebago, No. 209, page 128.

(Plate 254, Vol. II, Catlin's Eight Years.)

the great peculiarity of which was an immense under lip, hanging nearly to his chin.—Mrs. John H. Kinzie, "Wau-Bun," p. 89.

The whole tribe (Winnebagoes) were fairly carried by Tecumthe (Tecumseh?) and his brother, the Prophet, and gave hearty support to all the nefarious schemes of these agitators. Naw-Kaw (No. 209), the principal chief of the nation, and Hoo-tshoop-Kaw, of lesser note, were two of Tecumthe's personal attendants, and followed him in all his extended missions of proselytism among the nations of the Mississippi Valley. In the war of 1812 these two Winnebagoes were members of the sacred band that guarded Tecumthe's person; they were near him when he fell with mortal wounds at the battle of the Thames, October 5, 1813, and assisted in bearing his dead body from the field to a place of secure interment.*—Hiram W. Beckwith, the "Illinois and Indiana Indians," Fergus' Historical Series, No. 27, Chicago, Ill., 1884.

Again, Mr. Atwater, in his history of Ohio, says in this connection, while at Prairie du Chien in 1829, Naw-Caw (Kaw) (Wood) and Hoo-tshoop-Kaw (Four legs) were with him, "and that from statements of these constant companions of Tecumthe during nearly twenty years of his life, we proceed to state that Tecumthe lay with his warriors in a thick underbrush on the left of the American army at the battle of the Thames, October 5, 1813; that these Indians were at no period of the battle out of their thick underbrush; that Naw-Caw (Kaw) saw no officer between them and the American army; that Tecumthe fell [at] the very first fire of the Kentucky dragoons, pierced by thirty bullets, and was carried four or five miles into the thick woods, and there buried by the warriors, who told the story of his fate. This account was repeated to me three several times word for word, and neither of the relators ever knew the fictions to which Tecumthe's death has given rise."

For an interesting account of the death of Tecumseh from an interview with Noonday, an Ottawa chief, who was at the battle of the Thames when Tecumseh was killed, reciting that Richard M. Johnson, of Kentucky, killed him, see *The Century* for June, 1885. The interview was taken in 1835 by D. B. Cook, of Niles, Mich.

210. Káw-kaw-ne-chóo-a, ———; a brave. Painted in 1836.

(Plate No. 256, page 146, Catlin's Eight Years.)

211. Wa-kon-chásh-kaw, He who comes on the Thunder. Painted in 1836.

(No plate.)

212. Naw-naw-páy-ee, the Soldier.

213. Wah-kón-ze-kaw, the Snake. Painted in 1836.

(Plate No. 257, page 146, vol. 2, Catlin's Eight Years.)

Fair specimens of the tribe, who are generally a rather short and thick-set, square-shouldered set of men, of great strength and of decided character, brave and desperate in war.—G. C.

See also Wa-kawn, The Snake.—McKenny & Hall, page 175, vol. 2, with portrait.

* At the treaty of Prairie du Chien, concluded August 1, 1829, at which the Winnebagoes ceded their lands in Illinois and Wisconsin to the United States, Caleb Atwater, esq., one of the United States Commissioners there, met Naw-Kaw, who, he says, "complained to me that, in all of our accounts of Tecumthe (Tecumseh), we had only said of him that, 'Winnebago who always accompanies Tecumthe without calling the Winnebago by his name, Naw-Kaw-Casomaine.'"—*Atwater's Tour to Prairie du Chien*.

214. *Span-e-o-née-kaw*, the Spaniard.

215. *Hoo-w'a-ne-kaw*, the Little Elk.

Hoo-wau-nee-kah, "the Little Elk," was another of the distinguished men of the tribe (Winnebagoes). He had likewise been at Washington (one of a delegation of sixteen Winnebagoes, who had accompanied their agent, and Major Forsythe—or the Chipewa, as he was called—on a visit to President Jackson, at Washington, in 1830). Henry Clay, when he visited them, after looking carefully at the countenances and bearing of all of the members of the deputation, had indicated him (*Hoo-wau-nee-kah*, or Little Elk) as the one possessing the greatest talent, and he was greatly pleased when informed that he was the principal orator of the nation and decidedly superior in abilities to any other individual of the tribe.—Mrs. John H. Kinzie, "*Wau-Bun*," p. 91.

216. *No-ak-chóo-she-kaw*, He who breaks the Bushes.

217. *Naugh-háigh-hee-kaw*, He who moistens the Wood.

All distinguished men of the tribe. All painted in 1836.

DAKOTA—SIOUX—WINNEBAGOES.

MR. CATLIN'S NOTES ON THE WINNEBAGOE INDIANS.

Prairie du Chien is the concentrating place of the Winnebagoes and Menomones, who inhabit the waters of the Wisconsin and Fox Rivers, and the chief part of the country lying east of the Mississippi and west of Green Bay.

The Winnebagoes are the remnant of a once powerful and war-like tribe, but are now left in a country where they have neither beasts or men to war with, and are in a most miserable and impoverished condition. The numbers of this tribe do not exceed four thousand, and the most of them have sold even their guns and ammunition for whisky. Like the Sioux and Menomones that come in to this post, they have several times suffered severely with the small-pox, which has, in fact, destroyed the greater proportion of them.—G. C., 1836, from *Prarie du Chien*.

THE WINNEBAGOES.

The Winnebagoes are a branch of the great Dakota family, calling themselves *O-tchun-gu-rah*, and by the Sioux, *Hotanke*, or the Big-voiced people; by the Chipeways, *Winnebagonk*—whence their common English name—a word meaning men from the fetid waters. The French knew them as *Les Puans* (the Stinkers), supposed to have been given them in consequence of the great quantity of decaying and putrid fish in their camps when first visited by white men. With some others they formed the van of the eastward migration of the Dakotas, penetrating apparently some distance, but were forced back to Green Bay. This was some time previous to 1670, as the map of the French Jesuit missionaries, dated 1671, styles Green Bay the "*Bayo des Puans*," and the map accompanying Marquette's journal, dated 1681, notes a village of the "*Puans*" as near the north end of Winnebago Lake on the west side.*

They were then numerous and powerful, holding in check the neighboring Algonkin tribes, but soon after an alliance of tribes attacked and very nearly exterminated them. Became firm friends of the French until the Revolution, when they joined the English; made peace with the colonists afterward, but sided with the English again in 1812. In 1820 they numbered about 4,500, and were living in five villages on Winne-

*Alexander Ramsey.

bago Lake and fourteen on Rock River. By a treaty in 1829 (1825) and 1832 they ceded all their lands south of the Wisconsin and Fox Rivers, for a reservation on the Mississippi, above the Upper Iowa, but here they became unsettled, wasteful, and scattered. In 1846 they surrendered this reservation for another above the Saint Peter's. This proved unfit, and they became badly demoralized, losing many of their number by disease, but were kept on it by force. In 1853 they were removed to Crow River, and in 1856 to Blue Earth, Minnesota, where they were just getting a start in civilized pursuits when the Sioux war broke out, and the people of Minnesota demanded their removal. Thus again they were put on the march, and this time landed at Crow Creek, on the Missouri, near Fort Randall—a place so utterly unfit that the troops could not retain them on it. Out of 2,000 when taken there, only 1,200 reached the Omaha reserve, to which place they had fled for protection. They were then assigned a new reservation on the Omaha lands, and placed under the care of the Friends, and since then have prospered. At the time of their removal, in 1863, from Minnesota, many of the tribe who had taken up farms remained, receiving their share of the tribal funds. There were also last year 860 in Wisconsin, of whom 204 have lately joined those in Nebraska, swelling their numbers to 1,667. Nearly all of these now dress in civilized attire, and many of them have taken farms, their lands being divided into 40-acre allotments for the purpose, upon which they are building neat and comfortable cottages. There is an industrial and three day schools on the reserve, which are attended by one-sixth of their whole number. Their chiefs are now elected annually by the tribe, who in turn appoints a force of twelve policemen from the Indians to preserve order.—W. H. Jackson, 1877.

For an exhaustive article on the Winnebagoes see "The Illinois and Indiana Indians," by Hiram W. Beckwith. (Fergus' Historical Series, No. 27, Chicago, Ill., 1884. Also see No. 10 of the same series.)

PRESENT LOCATION AND NUMBERS.

Winnebagoes at Winnebago and Omaha Agency, Nebraska, in 1884, in the Black Bird country, 1,206; in 1885, 1,214. They occupy the northern portion of the reservation and the Omahas the southern part.

George W. Wilkinson, agent, September 5, 1884, writes of them:

The Winnebagoes are in many respects as different from the Omahas as a Gypsy from a German. They seem to be by nature and practice a wandering and nomadic people. Some of them are continually on the move, and embrace in their travels all the country from Minnesota to Kansas. They are always active, energetic, and industrious, quick-witted, full of expedients in case of emergency or accident, and sharp at a bargain. Many of them are good farmers and occupy their farms at all seasons. Others occupy their farms during crop season, and then put their children in school and take the remainder of their family to the timber for the winter, where they engage in chopping and logging until seed time comes again. They fully understand the value of their labor, and drive close bargains with their employers. They, as a tribe, prefer to be day laborers rather than farmers. Seed time and harvest are too far apart for them, and they prefer the quicker returns of the laborer, even at the expense of the greater profit.

Agent Wilkinson reports, September 18, 1885:

The Winnebagoes are bright and lively people, capable of much good or great harm. Most of them have taken allotments of land on their reservation, and are living in houses and cultivating their farms. They took their lands fourteen years ago, and the frequent changes by death, migration, &c., make it necessary that their land should be reallocated and the surplus sold to actual settlers.

Small reservations are preferable in every way for the Indians. It tends to break up that demoralizing habit, roaming, and brings them in more direct contact with white people, which is of itself a civilizing influence. If every Indian family had a thrifty white family within half a mile of them the daily object-lessons would solve the Indian problem quicker than all the theoretic plans of all those philanthropists who worship the Indian at a distance.

The Winnebagoes have a Government school in healthy condition and capable of doing great good. About fifty scholars attend, and they are as teachable and tractable as white children. The scholars cultivated 45 acres of corn and 10 acres of vegetables, and the work was done well. The most valuable part of the education of Indian children is not obtained from books. The Winnebagoes are in a hopeful condition, and if they would cease visiting and receiving visitors they would advance rapidly.

They now desire their lands allotted in severalty.

ME-NOM-O-NIES.

[Menomonees: Laws of the United States. Menomonese: Indian Bureau, June, 1885.]

Like the Winnebagoes, mostly destroyed by whisky and small-pox, and now numbering about 3,500, and in a miserable state of dependence; on the western side of Lake Michigan.

Mr. Catlin saw them first at Green Bay, in 1831, and also during 1836, at Prairie du Chien, Wis.

218. *Mah-kée-mee-teuv*, the Grizzly Bear; chief of the nation, and chief of a delegation to Washington City in 1829 (since dead); handsome pipe in his hand, and wampum on his neck. Painted in 1835.

(Plate No. 258, page 167, vol. 2, Catlin's Eight Years.)

219. *Mee-chéet-e-neuh*, the Wounded Bear's Shoulder; wife of the chief (No. 218). Painted in 1836.

(Plate No. 259, page 147, vol. 2, Catlin's Eight Years.)

Of this tribe I have painted quite a number of their leading characters, and at the head of them all *Mah-kée-me-teuv* (the Grizzly Bear, Plate 258, No. 218), with a handsome pipe in his hand, and by the side of him his wife *Me-chéet-e-neuh* (the Wounded Bear's Shoulder, Plate 259, No. 219). Both of these have died since their portraits were painted. This dignified chief led a delegation of fifteen of his people to Washington city some years since, and there commanded great respect for his eloquence and dignity of deportment.—G. C.

220. *Chee-me-náh-na-quet*, the Great Cloud; son of the chief (No. 218), a great rascal. Painted in 1836.

(Plate No. 260, page 147, vol. 2, Catlin's Eight Years.)

In Plate 260, No. 220, is the portrait of *Chee-me-na-na-quet* (the Great Cloud), son of the chief—an ill-natured and insolent fellow, who has since been killed for some of his murderous deeds.

221. *Ko-mán-i-kin-o-haw*, the Little Whale; a brave, with his *medicine wand*, his looking-glass, and scissors.

222. *Sha-wá-no*, the South; a noted warrior.

223. *Másh-kee-wet*, the Thought; a great beau or dandy.

224. *Pak-shee-náu-shaw*, ———; a warrior. All painted in 1835.

(No plates.)

MAH-KÉE-MEE-TEUV, THE GRIZZLY BEAR.
Chief of the Menomones. No. 218, page 132.
(Plate 258, Vol. II, Catlin's Eight Years.)

MEE-CHœT-E-NEUH, THE WOUNDED BEAR'S
SHOULDER.
Wife of No. 218. No. 219, page 132.
(Plate 259, Vol. II, Catlin's Eight Years.)

ON-SÁW-KIE, THE SAC, with prayer stick in hand
Pottawatomie. No. 237, page 134.
(Plate 237, Vol. II, Catlin's Eight Years.)

NA-PÓW-SA, THE BEAR TRAVELING IN THE NIGHT.
Pottawatomie chief. No. 238, page 134.
(Plate 190, Vol. II, Catlin's Eight Years.)

225. *Tcha-káuks-o-ko-máugh*, the Great Chief (boy). Painted in 1836.
(Plate No. 261, page 147, vol. 2, Catlin's Eight Years.)
226. *Aú-nah-kwet-to-hau-páy-o*, the One sitting in the Clouds; a fine boy.
227. *Aúh-ka-nah-paw-wáh*, Earth Standing; an old and very valiant warrior.
228. *Ko-mán-i-kin*, the Big Wave, called the "Philosopher"; a very old and distinguished chief.
229. *O-ho-pah-sha*, the Small Whoop; a hard-visaged warrior, of most remarkable distinction.
230. *Ah-yaw-ne-tah-cár-ron*, —————; a warrior.
231. *Au-wáh-shew-kew*, the Female Bear; wife of the above (No. 230).
All painted in 1836. (No plates.)
232. *Coc-coo-coo*, the Owl; a very old and emaciated chief; sits smoking a handsome pipe. Painted in 1830.

(Plate No. 262, page 147, vol. 2, Catlin's Eight Years.)

In Plate 262, No. 232, is *Coo-coo-coo* (the Owl), a very aged and emaciated chief, whom I painted at Green Bay, in Fort Howard. He had been a distinguished man, but now in his dotage, being more than a hundred years old—and a great pet of the surgeon and officers of the post.—G. C.

233. *Wáh-chees*, —————; a brave. Painted in 1836.
234. *Chésh-ko-tong*, He who sings the War-Song. Painted in 1836.
- 235, 236. Two in a group, names not known; one with his war-club, and the other with his lute at his mouth. Painted in 1836.

(Plate No. 263, page 148, vol. 2, Catlin's Eight Years.)

Two Menominee youths at full length, in beautiful dresses, whose names I did not get—one with his war-club in his hand, and the other blowing on his "courting flute," which I have before described.—G. C.

ALGONKIN—MENOMONEES.

MR. CATLIN'S NOTES ON THE MENOMONEE INDIANS.

Like the Winnebagoes, the Menomonees are the remnant of a much more numerous and independent tribe, but have been reduced and enervated by the use of whisky and the ravages of the small-pox, and number at this time something like 3,000, living chiefly on the banks of Fox River and the western shore of Green Bay. They visit Prairie du Chien, where their annuities are paid them; and they indulge in the *bane*, like the tribes that I have mentioned. This tribe, living out of the reach of buffaloes, cover themselves with blankets instead of robes, and wear a profusion of beads and wampum and other trinkets.—G. C.

THE MENOMONEES.

Were known to the French as early as 1640, and were then living on the Menominee River, emptying into Green Bay, Wisconsin. Their name is that of the wild rice upon which they largely depend for their subsistence. This is one of the few tribes in the United States who have never been removed from their old home, and are still residing on the same spot where they were first known. Served with the French against the Foxes in 1712, and against the English up to 1763, participating in Braddock's defeat, battles of Fort William Henry and the Plains of Abraham. Were allies of the English during the Revolution, and also in the second war with Great Britain. In 1831 commenced ceding their lands to the Government for money payments, until they were finally located, in 1854, in their present reservation in Shawano County, Wisconsin, consisting of 231,680 acres of very poor land (but with pine forests of value). They are declining rapidly in numbers. In 1822 were estimated at 3,900;

the present count makes them 1,522 (1877). Are now living in a civilized way, with a large proportion of their children attending school regularly. Their main dependence is upon the lumber trade, cutting during the last winter over 5,000,000 feet of logs, netting them \$4 per M.—W. H. Jackson, 1877.

PRESENT LOCATION AND NUMBERS.

Menomonees at Green Bay Agency, Wisconsin. Reside on their reservation in Shawano County. In 1884, numbered 1,400; August 1, 1885, 1,308; slowly decreasing. Lumbermen and farmers; civilized; own vast pine timber forests, valued at \$2,000,000.

POT-O-WÁT-O-MIE.

[Pottawatomie: Laws of the United States—Pottawatamie and Pottawatomie: Indian Bureau, 1885.]

Once a numerous tribe, now numbering about 2,700, reduced by small-pox and whisky—recently removed from the State of Indiana to the western shores of the Missouri; semi-civilized.

Mr. Catlin was with them whilst visiting the Kickapoos, in Illinois, in 1831, the year before they removed west of the Mississippi.

237. On-sáw-kie, the Sac; in the act of praying; his prayer written in characters on a maple stick. Painted in 1831.

(Plate No. 189, page 100, vol. 2, Catlin's Eight Years.)

238. Na-pów-sa, the Bear Travelling in the Night; one of the most influential chiefs of the tribe. Painted in 1831.

(Plate No. 190, page 100, vol. 2, Catlin's Eight Years.)

239. Kée-se, —————; a woman. Painted in 1831.

(No plate.)

ALGONKIN—POT-A-WAT-O-MIES.

MR. CATLIN'S NOTES ON THE POTTAWATOMIE INDIANS.

The remains of a tribe who were once very numerous and warlike, but reduced by whisky and small-pox to their present number, which is not more than twenty-seven hundred. This tribe may be said to be semi-civilized, inasmuch as they have so long lived in contiguity with white people, with whom their blood is considerably mixed, and whose modes and whose manners they have in many respects copied. From a similarity of language, as well as of customs and personal appearance, there is no doubt that they have formerly been a part of the great tribe of Chippeways or Ot-tawas, living neighbors and adjoining to them, on the north. This tribe live within the State of Michigan, and there own a rich and very valuable tract of land; which, like the Kickapoos, they are selling out to the Government, and about to remove to the west bank of the Missouri, where a part of the tribe have already gone and settled, in the vicinity of Fort Leavenworth. Of this tribe I have painted the portraits of On-saw-kie, No. 237, in the attitude of prayer, and Na-pow-sa (the Bear Travelling in the Night), No. 238, one of the principal chiefs of the tribe. These people have for some time lived neighbors to, and somewhat under the influence of the Kickapoos; and very many of the tribe have become zealous disciples of the Kickapoo prophet, using his prayers most devoutly, and in the manner that I have already described and as seen in Nos. 237, 238.—G. C.

In the writings left by early French authors, the word Pottawatomies was spelled, as is the case with the names of other tribes, to suit the arbitrary tastes of the various authors.

THE POTTAWOTOMIES.

Early in 1600 the Pottawatomies were occupying the lower peninsula of Michigan in scattered bands, whence they were finally driven westward by the Iroquois and settled about Green Bay. The French acquired much influence over them, whom they joined in their wars with the Iroquois. Joined Pontiac in his uprising in 1763. Hostile to colonists during the Revolution, but made a peace in 1795, joining the English again, however, in 1812. New treaties followed in August 29, 1821, and after, by which their lands were almost entirely conveyed away, until in 1838 a reserve was allotted them on the Missouri, to which 800 were removed. The whole tribe then numbered about 4,000, some bands of which had made considerable progress in civilization, while a part, called the Pottawatomies of the Prairie, were roving and pagan. Those in Kansas made rapid progress in civilization. In 1867, 1,400 out of 2,180 elected to become citizens and taken their lands in severalty; the others held to their tribal organization, but disintegration set in and many became wanderers, some even going to Mexico. A portion of them left their reservation in Kansas during the war of the rebellion and, with some Kickapoos, went to Mexico. They returned in 1882 and are at the Sac and Fox Agency, Indian Territory. It is difficult at the present time to estimate their whole number, owing to their scattered condition. There are only 450 in the Indian Territory under the care of the Indian Bureau, and in Michigan 60. The others are citizens or roaming in Mexico.—W. H. Jackson, 1877.

PRESENT LOCATION AND NUMBERS.

Pottawatomies at Sac and Fox Agency, Indian Territory, August 11, 1884, 500; August 10, 1885, 550; self-sustaining, farmers and stock-raisers; adjoin the Seminoles.

Pottawatomies at Pottawatomie and Great Nemaha Agency, Kansas, September 10, 1884, 432; August 20, 1885, 430; they have 77,357 acres of land; cattle, swine, and pony raisers, and farmers (limited). Some of them are considered rich men.

Pottawatomies of Huron, at Mackinac Agency, Michigan, 77 in 1884; August, 1885, 72.

Pottawatomies residing in Wisconsin and Iowa, 280 in 1884, and in 1885, 280; in all 357. Many Pottawatomies have become citizens of the United States. Total in 1884, 1,239; in 1885, 1,337.

H. C. Linn, the agent of the Pottawatomies of Great Nemaha, writes, September, 1884:

RELIGIOUS DANCES.

There has been introduced into the Pottawatomie tribe in the past year a system of worship which consists principally of dancing and exulting, though, like all semi-civilized nations, clouded in superstition. Apart from the superstition and consumption of time spent in those dances the moral tendency is very good, as the teaching is in accordance with the Ten Commandments. They object to sacrament by the use of intoxicating drink and denounce gambling and horse-racing. This religion was introduced by the Chippewas of Wisconsin.

I. W. Patrick, then agent, reports, August 20, 1885:

These Indians are chaste, cleanly, and industrious, and would be a valuable acquisition to the Prairie Band if it were not for their intense devotion to a religious dance started among the northern Indians some years since. This dance was introduced to the Prairie Band about two years ago by the Absentee Pottawatomies and Winnebagoes, and has spread throughout the tribes in the agency. They seem to have adopted the religion as a means of expressing their belief in the justice and mercy of the Great Spirit, and of their devotion to him, and are so earnest in their convictions as to its affording them eternal happiness, that I have thought it impolitic, so far, to interfere with it any further than to advise as few meetings as possible, and to discountenance it in my intercourse with the individuals practicing the religion. It is not an unmixed evil, as under its teaching drunkenness and gambling have been reduced 75 per cent., and a departure from virtue on the part of its members meets with the severest condemnation. As some tenets of revealed religion are embraced in its doctrines, I do not consider it a backward step for the Indians who have not heretofore professed belief in any Christian religion, and believe its worst features are summed up in the loss of time it occasions and the fanatical train of thought involved in the constant contemplation of the subject.

At the Nemaha Agency are also the "Mexican Kickapoos," numbering 376. This tribe is composed of the Kickapoos and Pottawatomies who left their reservation in Kansas during the war of the rebellion and went to Mexico. They were a warlike band, plying their calling along the border. What portion of this band is Pottawatomie is not known.

The agent writes of them, August, 1884 :

They are the most crafty Indians in this agency, and are very shrewd traders.

For notes on the Pottawatomie Indians see Beckwith's "Historic Notes on the Northwest" and the "Illinois and Indiana Indians," by H. W. Beckwith. (Fergus' Historical Series No. 27, Chicago, 1884, and also No. 10 of the same series.

KICK-A-POO.

[Kickapoo: Laws of the United States. Kickapoo: Indian Bureau, 1885.]

On the frontier settlements; semi-civilized; number about 600; greatly reduced by small-pox and whisky.

Mr. Catlin visited them in 1831 on their reservation in Illinois, on the western shore of Lake Michigan, from whence they removed.

240. *Kee-án-ne-kuk*, the Foremost Man, called the "*Prophet*." Chief of the tribe, in the attitude of prayer. Painted in 1831.

(Plate No. 185, page 100, vol. 2, Catlin's Eight Years.)

This very shrewd fellow engraved on a maple stick, in characters, a prayer which was taught him by a Methodist missionary, and by introducing it into the hands of every one of his tribe, who are enjoined to read it over every morning and evening as service, has acquired great celebrity and respect in his tribe, as well as a good store of their worldly goods, as he manufactures them all and gets well paid for them.

The present chief of this tribe, whose name is *Kee-an-ne-kuk* (the foremost man, plate 185, No. 240), usually called the *Shawnee Prophet*, is a very shrewd and talented man. When he sat for his portrait he took his attitude as seen in the picture, which was that of prayer. And I soon learned that he was a very devoted Christian, regularly holding meetings in his tribe on the Sabbath, preaching to them and exhorting them

to a belief in the Christian religion, and to an abandonment of the fatal habit of whisky-drinking, which he strenuously represented as the bane that was to destroy them all if they did not entirely cease to use it. I went on the Sabbath to hear this eloquent man preach, when he had his people assembled in the woods, and although I could not understand his language, I was surprised and pleased with the natural ease and emphasis and gesticulation, which carried their own evidence of the eloquence of his sermon. •

I was singularly struck with the noble efforts of this champion of the mere remnant of a poisoned race, so strenuously laboring to rescue the remainder of his people from the deadly bane that has been brought among them by enlightened Christians. How far the efforts of this zealous man have succeeded in Christianizing I cannot tell, but it is quite certain that his exemplary and constant endeavors have completely abolished the practice of drinking whisky in his tribe, which alone is a very praiseworthy achievement, and the first and indispensable step towards all other improvements. I was some time amongst these people, and was exceedingly pleased, and surprised also, to witness their sobriety and their peaceable conduct, not having seen an instance of drunkenness or seen or heard of any use made of spirituous liquors whilst I was amongst the tribe.

It was told to me in the tribe by the traders (though I am afraid to vouch for the whole truth of it), that while a Methodist preacher was soliciting him for permission to preach in his village, the Prophet refused him the privilege, but secretly took him aside and supported him until he learned from him his creed and his system of teaching it to others, when he discharged him and commenced preaching amongst his people himself, pretending to have had an interview with some superhuman mission or inspired personage, ingeniously resolving that if there was any honor or emolument or influence to be gained by the promulgation of it, he might as well have it as another person; and with this view he commenced preaching and instituted a prayer, which he ingeniously carved on a maple stick of an inch and a half in breadth, in characters somewhat resembling Chinese letters. These sticks, with the prayers on them, he has introduced into every family of the tribe and into the hands of every individual, and as he has necessarily the manufacturing of them all, he sells them at his own price, and has thus added lucre to fame, and in two essential and effective ways augmented his influence in his tribe. Every man, woman, and child in the tribe, so far as I saw them, were in the habit of saying their prayer from this stick when going to bed at night, and also when rising in the morning, which was invariably done by placing the forefinger of the right hand under the upper character until they repeat a sentence or two which it suggests to them, and then slipping it under the next, and the next, and so on, to the bottom of the stick, which altogether required about ten minutes, as it was sung over in a sort of a chant to the end.

Many people have called all this an ingenious piece of hypocrisy on the part of the Prophet, and whether it be so or not I cannot decide; yet one thing I can vouch to be true, that whether his motives and his life be as pure as he pretends or not, his example has done much toward correcting the habits of his people, and has effectually turned their attention from the destructive habits of dissipation and vice to temperance and industry in the pursuits of agriculture and the arts. The world may still be unwilling to allow him much credit for this, but I am ready to award him a great deal who can by his influence thus far arrest the miseries of dissipation and the horrid deformities of vice in the descending prospects of a nation who have so long had, and still have, the white-skin teachers of vices and dissipation amongst them.

241. Ah-tón-we-tuck, the Cock Turkey; repeating his prayer from the stick in his hand, described above. Painted in 1831.

(Plate No. 186, page 100, vol. 2, Catlin's Eight Years.)

Plate 186, No. 241, is another Kickapoo of some distinction, and a disciple of the Prophet, in the attitude of prayer also, which he is reading off from characters cut upon a stick that he holds in his hands.

242. Ma-shée-na, the Elk's Horns; a sub-chief, in the act of prayer, as above described.

243. Ke-chím-quá, the Big Bear; wampum on his neck, and red flag in his hand, the symbol of war or "blood."

244. A'h-tee-wát-o-mee, ———; woman, with wampum and silver brooches in profusion on her neck.

245. Shee-náh-wee, ———.

All painted in 1831. (No plates.)

ALGONKIN—KICKAPOOS.

MR. CATLIN'S NOTES ON THE KICKAPOO INDIANS.

At present but a small tribe, numbering six or eight hundred, the remnant of a once numerous and warlike tribe. They are residing within the State of Illinois, near the south end of Lake Michigan, and living in a poor and miserable condition, although they have one of the finest countries in the world. They have been reduced in numbers by whisky and small-pox, and the game being destroyed in their country, and having little industry to work, they are exceedingly poor and dependent. In fact, there is very little inducement for them to build houses and cultivate their farms, for they own so large and so fine a tract of country, which is now completely surrounded by civilized settlements, that they know, from experience, they will soon be obliged to sell out their country for a trifle and move to the West. This system of moving has already commenced with them, and a considerable party have located on a tract of land offered to them on the west bank of the Missouri River, a little north of Fort Leavenworth.*

The Kickapoos have long lived in alliance with the Sacs and Foxes, and speak a language so similar that they seem almost to be of one family.

PRESENT LOCATION AND NUMBERS.

Kickapoos at Pottawatomie and Great Nemaha Reservation, in Brown County, Kansas, in 1884, 243; August 20, 1885, 235. Cattle and horse raisers and farmers.

Kickapoo, Mexican (mixed band, with Pottawatomie), at Sac and Fox Agency, Indian Territory, in 1884, 326; August, 1885, 346.

Agent J. A. Taylor writes of them August 11, 1884:

MEXICAN KICKAPOOS.

The Mexican Kickapoos now on their reservation number 326 souls, and are located on a reservation set apart for them by executive order dated August 15, 1883, which is bounded as follows: By the Deep Fork Canadian River on the north, the Sac and Fox lands on the east, the North Fork Canadian River on the south, and by the Indian meridian on the west, containing about 290 square miles.

The Mexican Kickapoo tribe of Indians is composed of the Kickapoos and Pottawatomies who left their reservation in Kansas during the late civil war and went to Mexico, from which fact their name. Their experiences have been varied. They are the most crafty Indians in this agency, and are very shrewd traders.

* Since the above was written the whole of this tribe have been removed beyond the Missouri, having sold out their lands in the State of Illinois to the Government.—G. C.

KEE-AN-NE-KUK, THE FOREMOST MAN.
The Prophet. Kickapoo, No. 240, page 136.
(Plate 185, Vol. II, Catlin's Eight Years.)

AH-TÓN-WE-TUCK, THE COCK TURKEY.
Kickapoo, No. 241, page 137.
(Plate 186, Vol. II, Catlin's Eight Years.)

KEE-MÓN-SAW, THE LITTLE CHIEF.
Kaskaskia, No. 246, page 139.
(Plate 191, Vol. II, Catlin's Eight Years.)

WAH-PE-SÈH-SEE.
An aged Kaskaskia woman. No. 247, page 139.
(Plate 192, Vol. II, Catlin's Eight Years.)

These are wild Indians.

For an interesting history of the Kickapoo Indians see No. 27, Fergus' Historical Series, Chicago, 1884.

KAS-KAS-KIA.

[Kaskaskia: Laws of the United States. Kaskaskia: Indian Bureau, June, 1885.]

Once famed, numerous, and warlike, on the frontier, but now reduced to a few individuals by small-pox and whisky.

Mr. Catlin saw them at Fort Leavenworth in 1832-'33.

246. *Kee-món-saw*, the Little Chief; Chief; semi-civilized. Painted in 1832-'33.
(Plate No. 191, Page 100, Vol. 2, Catlin's Eight Years.)

247. *Wah-pe-séh-see*, ———; a very aged woman, mother of the above. Painted in 1831.

(Plate No. 192, Page 100, Vol. 2, Catlin's Eight Years.)

Of this tribe I painted *Kee-mon-saw* (the Little Chief), half-civilized, and, I should think, half-breed (Plate 191), and *Wah-pe-seh-see* (Plate 192), a very aged woman, mother of the same. This young man is chief of the tribe, and I was told by one of the traders that his mother and his son were his only subjects! Whether this be true or not I cannot positively say, though I can assert with safety that there are but few of them left, and that those, like all of the last of tribes, will soon die of dissipation or broken hearts.—G. C.

ALGONKIN—KAS-KAS-KI-AS.

MR. CATLIN'S NOTES ON THE KAS-KAS-KIA INDIANS.

This is the name of a tribe that formerly occupied, and of course owned, a vast tract of country lying on the east of the Mississippi, and between its banks and the Ohio, and now forming a considerable portion of the great and populous State of Illinois. History furnishes us a full and extraordinary account of the once warlike character and number of this tribe, and also of the disastrous career that they have led from their first acquaintance with civilized neighbors, whose rapacious avarice in grasping for their fine lands, with the banes of whiskey and small-pox, added to the unexampled cruelty of neighboring hostile tribes, who have struck at them in the days of their adversity, and helped to erase them from existence.

Perhaps there has been no other tribe on the continent of equal power with the Kas-kas-ki-as that have so suddenly sank down to complete annihilation and disappeared. The remnant of this tribe have long since merged into the tribe of Peorias of Illinois, and it is doubtful whether one dozen of them are now existing. With the very few remnants of this tribe will die in a few years a beautiful language, entirely distinct from all others about it, unless some enthusiastic person may preserve it from the lips of those few who are yet able to speak it.—G. C.

PRESENT LOCATION AND NUMBERS.

Kaskaskias, confederated with the Peorias, Piankeshaws, and Weas, at the Quapaw Agency, Indian Territory, August, 1884, and in 1885. All civilized, and with schools. In 1884 the Miamis about 60, and the other four 140; total, about 200. In 1885, August, Miamis 57, the other four 149; total, in 1885, 206.

The Kaskaskias as a tribe are extinct, and not one individual of that tribe of pure blood is now living.

WÉE-AH.

[Weas: Laws of the United States. Weas and Wea: Indian Bureau, June, 1885.]

Remnant of a tribe on the frontier; semi-civilized; reduced by whisky and disease; present number 200.

Mr. Catlin saw them in 1832-'33 with the Peorias and Kaskaskias.

248. Go-to-ków-páh-ah, He who Stands by Himself; a brave of distinction, with his hatchet in his hand. Painted in 1832-'33.

(Plate No. 187, page 99, vol. 2, Catlin's Eight Years.)

249. Wah-pón-jee-a, the Swan; a warrior; fine-looking fellow, with an European countenance. Painted in 1832-'33.

(Plate No. 188, page 99, vol. 2, Catlin's Eight Years.)

250. Wáh-pe-say, the White. Painted in 1832-'33.

NOTES ON THE WEE-AH INDIANS.

These are also the remnant of a once powerful tribe, and reduced by the same causes to the number of two hundred. This tribe formerly lived in the State of Indiana, and have been moved with the Piankeshaws to a position forty or fifty miles south of Fort Leavenworth.—G. C.

Weeahs, once a powerful tribe, but now reduced to the small number of two hundred warriors. They formerly resided in Indiana, and are at present located with the Piankeshaws, about forty miles south of Fort Leavenworth, on the Missouri.—J. M. Stanley, 1843.

Mr. Stanley visited and painted some of them in 1843.

PRESENT LOCATION AND NUMBERS.

Weas, confederated with the Algonkins, Peorias, Kaskaskias, and Piankeshaws, at Quapaw Agency, Indian Territory; all told in 1885, about 206. All civilized.

(See Kaskaskias, herein.)

The Weas as a tribe are extinct, and not one individual of pure Weas blood is now living.

PE-O-RI-A.

[Peoria: Laws of the United States. Peoria: Indian Bureau, 1885.]

Also a small remnant of a tribe on the frontier, reduced by the same causes as above; present number about 200.

Mr. Catlin was with the Peorias in 1832-'33, at or near Fort Leavenworth.

251. Pah-me-ców-ee-tah, the Man who Tracks; a chief; remarkably fine head. Painted in 1832-'33.

(Plate No. 193, page 101, vol. 2, Catlin's Eight Years.)

This man would never drink whisky.

252. Wap-sha-ka-náh, —————; a brave.

253. Kee-mo-rá-nia, No English; a beau; his face curiously painted, and looking-glass in his hand. Painted in 1832-'33.

(Plate No. 194, page 101, vol. 2, Catlin's Eight Years.)

WAH-PÓN-JEE-A, THE SWAN.

Wea, No. 249, page 140.

(Plate 188, Vol. II, Catlin's Eight Years.)

PAH-MEE-CÓW-EE-TAH, THE MAN WHO TRACKS
A CHIEF.

Peoria, No. 251, page 140.

(Plate 193, Vol. II, Catlin's Eight Years.)

KEE-MO-RÁ-NIA, NO ENGLISH.

Peoria, No. 253, page 140.

(Plate 194, Vol. II, Catlin's Eight Years.)

NI-A-CÓ-MO, TO FIX WITH THE FOOT.
Piankeshaw Brave. No. 254, page 141.
(Plate 196, Vol. II, Catlin's Eight Years)

MEN-SÓN-SE-AII, THE LEFT HAND.
Piankeshaw Brave. No. 255, page 141.
(Plate No. 195, Vol. II, Catlin's Eight Years.)

Of this tribe I painted the portrait of *Pah-me-cow-e-tah* (the Man who Tracks), and *Kee-mo-ra-ni-a* (No English). These are said to be the most influential men in the tribe, and both are very curiously and well dressed in articles of civilized manufacture.—G. C.

ALGONKIN—PE-O-RI-AS.

The name of another tribe, inhabiting a part of the State of Illinois, and, like the above tribes, viz, Miamis, Piankeshaws, and Weas, but a remnant and civilized (or *cicatrized* to speak more correctly). This tribe number about two hundred, and are, like most of the other remnants of tribes on the frontiers, under contract to move to the west of the Missouri.—G. C.

Mr. Catlin saw them with the Piankeshaw and other tribes in 1832-'33.

PRESENT LOCATION AND NUMBERS.

Peorias, with confederated Piankeshaws, Weas, Miamis, and Kaskaskias, at Quapaw Agency, Indian Territory; in all (1885), about 206. Civilized.

(See Kaskaskia, page 139, herein.)

Tribe extinct. No Peoria of pure blood (probably) now living.

PI-AN-KE-SHAW.

[Piankeshaws; Laws of the United States. Piankasha: Indian Bureau, 1885.]
A frontier tribe, reduced, as above; present number 170.

Mr. Catlin was with the Piankeshaws in 1832-'33.

254. *Ni-a-co-mo*, to Fix with the Foot; a brave. Painted in 1832-'33.
(Plate No. 196, page 101, vol. 2, Catlin's Eight Years.)

255. *Men-són-se-ah*, the Left Hand; a fierce-looking warrior, with a stone hatchet in his hand. Painted in 1832-'33.
(Plate No. 195, page 101, vol. 2, Catlin's Eight Years.)

Ni-a-co-mo, a brave of distinction, and *Men-són-se-ah*, a fierce-looking and very distinguished warrior, with a stone hatchet in his hand, are fair specimens of this reduced and enfeebled tribe, which do not number more than 170 persons at this time.—G. C.

ALGONKIN.

MR. CATLIN'S NOTES ON THE PIANKESHAW INDIANS.

The remnant of another tribe, of the States of Illinois and Indiana, who have also recently sold out their country to the Government, and are under contract to move to the west of the Missouri, in the vicinity of Fort Leavenworth.—G. C.

PRESENT LOCATION AND CONDITION.

Pi-an-ke-shaws, with confederated Weas, Peorias, and Kaskaskias, at Quapaw Agency, Indian Territory; in all (1885), about 206. Civilized.

Tribe extinct. No Piankeshaw of pure blood (probably) now living.

For interesting notes on the Kaskaskias, Weas, Peorias, and Piankeshaws, see "Aborigines of Ohio Valley," by William Henry Harrison, in Fergus' Historical Series, No. 26, and the "Illinois and Indiana Indians." No. 27 of the same series.

I-O-WAY.

[Iowa: Laws of the United States. Iowa: Indian Bureau, June, 1885.]

A small tribe on the frontier, reduced by small-pox and their enemies; living on the Missouri; number about 1,400. Uncivilized, fine-looking men. Mr. Catlin was first with them in 1832.

256. Notch-ee-níng-a, No Heart, called "White Cloud"; chief of the tribe; necklace of grizzly bears' claws, and shield, bow and arrows in his hand. Painted in 1832.

(Plate No. 129, page 22, vol. 2, Catlin's Eight Years.)

Notch-e-níng-a (No Heart); chief of the tribe; called also the White Cloud; a celebrated warrior, carrying his shield and lance, and his necklace made of the claws of the grizzly bear.

(Cartoon Collection, page 5, No. 2, A.)

The present chief of this tribe is Notch-ee-níng-a (the White Cloud, Plate 129), the son of a very distinguished chief of the same name, who died recently, after gaining the love of his tribe and the respect of all the civilized world who knew him.

The son of White Cloud, who is now chief, and whose portrait I have just named, was tastefully dressed with a buffalo robe wrapped around him, with a necklace of grizzly bears' claws on his neck; with shield, bow, and quiver on, and a profusion of wampum strings on his neck.—G. C.

257. Pah-ta-cóo-chee, the Shooting Cedar; a brave, with war club on his arm. Painted 1832. (See No. 260.)

(Plate No. 131, page 23, vol. 2, Catlin's Eight Years.)

Pah-tá-coo-chee, the Shooting Cedar (No. 257), and Wos-com-mun, the Busy Man (No. 260, below), are also distinguished warriors of the tribe; tastefully dressed and equipped, the one with his war club on his arm, the other with bow and arrows in his hand. Both wore around their waists beautiful buffalo robes, and both had turbans made of varicolored cotton shawls purchased of the fur traders. Around their necks were necklaces of the bear's claws and a profusion of beads and wampum. They each wore profusely strung with beads, and their naked shoulders curiously streaked and daubed with red paint.—G. C.

258. No-o-mún-nee, He who Walks in the Rain; warrior, with his pipe and tobacco-pouch in his hand. Painted in 1832.

This man was in Paris and London with Mr. Catlin in 1845 and 1846.

259. W'y-ee-yogh, the Man of Sense; a brave, with a handsome pipe in his hand, and bears' claw necklace on his neck. Painted in 1832.

(Plate No. 130, page 22, vol. 2, Catlin's Eight Years.)

Wy-ee-yogh (the Man of Sense, Plate 130) is another of this tribe, much distinguished for his bravery and early warlike achievements. His head was dressed with a broad silver band passing around it, and decked out with the crest of horse-hair.—G. C.

260. Wos-cóm-mun, the Busy Man; a brave. (See No. 257.) Painted in 1832.

(Plate No. 132, page 23, vol. 2, Catlin's Eight Years.)

262. Mún-ne-o-ye, ———; woman. Painted in 1832.

THE IOWAS.

While Mr. Catlin was in London exhibiting his gallery, in 1844, a party of fourteen Iowa Indians arrived. They came under permit from J. M. Porter, Secretary of War, and the Indian Bureau, and in charge

NOTCH-EE-NÍNG-A, NO HEART; called White Cloud.
Chief of the tribe. Iowa, No. 256, page 142.
(Plate 129, Vol. II, Catlin's Eight Years.)

PAH-TA-CÓO-CHEE, THE SHOOTING CEDAR.
Iowa, No. 257, page 142.
(Plate 131, Vol. II, Catlin's Eight Years.)

NO-O-MÚN-NEE, HE WHO WALKS IN THE RAIN.
Iowa, No. 258, page 142.
(Plate 130, Vol. II, Catlin's Eight Years.)

W'Y-EE-YOGH, THE MAN OF SENSE.
Iowa, No. 259, page 142.
(Plate 132, Vol. II, Catlin's Eight Years.)

of G. H. C. Melody, with Jeffrey Doraway, a mulatto, as interpreter. They were exhibited in connection with Mr. Catlin's gallery in England and also in France, in 1844, 1845, and 1846. A small catalogue was prepared, of 28 pages, giving the manners and customs of the Ioways.

Mr. Catlin saw them immediately upon their arrival in London, and found "White Cloud" (No. 256), Neu-mon-ya (No. 258), and Wash-ka-mon-ya (No. 260), old acquaintances, whom he had painted in the Iowa village, on the Missouri, in 1832.

When they saw him they rose to their feet and saluted him: "How, how, how," Chip-pe-ho-la, "Medicine Paint," the name he was always known by amongst the Indians on the plains, from 1830 to 1838.

Mr. Catlin wrote the descriptive catalogue. As it contains much of interest relative to the Iowas it is given below in full:

THE FOURTEEN IOWAY INDIANS.

CHIEFS.

No. 1. Mew-hu-she-kaw, White Cloud; first chief of the nation. (See No. 256).

No. 2. Neu-mon-ya, Walking Rain; third chief. (See No. 258.)

No. 3. Se-non-ty-yah, Blister Feet; great medicine man.

WARRIORS AND BRAVES.

No. 4. Wash-ka-mon-ya, Fast Dancer. (See No. 260.)

No. 5. No-ho-mun-ya, One who gives no attention.

No. 6. Shon-ta-yi-ga, Little Wolf.

No. 7. Wa-tan-ye, One always foremost.

No. 8. Wa-ta-we-bu-ka-na, Commanding General; the son of Walking Rain, 10 years old.

No. 9. Jeffrey Doraway, the interpreter.

SQUAWS.

No. 10. Ruton-ye-we-ma, Strutting Pigeon; White Cloud's wife.

No. 11. Ruton-we-me, Pigeon on the Wing.

No. 12. Oke-we-me, Female Bear that walks on the back of another.

No. 13. Kocn-za-ya-me, Female War Eagle Sailing.

No. 14. Ta-pa-ta-me, Sophia, wisdom; White Cloud's daughter.

No. 15. Corsair, A papoose.

MR. CATLIN'S NOTES ON THE IOWAYS AND THEIR MODES, 1844.

The Ioway is at present a small tribe of 2,000, or thereabouts, living on the banks of the Missouri River, seven or eight hundred miles above its junction with the Mississippi, in the territory of the United States. This tribe lost two-thirds of its numbers a few years since by the ravages of the small-pox; and the remainder of them are now living under the authority of Mew-hu-she-kaw (the White Cloud), the hereditary chief, and son of a famous chief of that name who died a few years since. (See No. 256.)

This young man, only 32 years of age, has, by several humane and noble acts since he inherited the office, proved himself well worthy of it, and has thereby gained the love of all his tribe, and also the admiration of the President of the United States, who has granted him the unusual permission to make the journey to Europe, and to select such a party as he chose to bring with him; and he, having chosen them according to merit, as warriors, has brought the aristocracy of the tribe.

The stature of this man is about 5 feet 10 inches, and he may generally be recognized in the group by his beautiful head-dress of war—eagles' quills—necklace of grizzly bears' claws, and the skin of a white wolf hanging down over his back. His features are Roman, with a benignant expression, but rather embarrassed, from a defect in one of his eyes.

Neu-mon-ya (the Walking Rain, and third chief of the tribe) is more easily discovered in the group from his stature, being the tallest man of the party, and nearly six feet and a half in height. This chief, who is 54 years of age, is much more distinguished as a warrior than White Cloud, and, undoubtedly, one of the most remarkable and celebrated men of the nation. (See No. 258.)

Se-non-ty-yah (Blister Feet), of 5 feet 11 inches in height, and near 60 years of age. The medicine (mystery) man of the party is a man of great consequence in the tribe, inasmuch as he pays his visits to the sick as their physician, and at the same time deals in (or professes to deal in) mysteries and charms of various sorts.

These personages are found in every tribe, and so much control have they over the superstitious minds of their people that their influence and power in the tribe often transcend that of the chief. In all councils of war and peace they have a seat by the chiefs, and are as regularly consulted by the chiefs as soothsayers were consulted in ancient days, and equal deference and respect are paid to their advice or opinions, rendering them *oracles* of the tribe in which they live.

The word medicine is one that has, somehow, grown into general use along the Canadian and United States frontiers, synonymous with mystery, and all the physicians in Indian tribes dealing in (or professing to deal in) mysteries of various kinds are denominated (in the phrase of the country) medicine men. Such a person is sure to accompany a party on a visit to a foreign country, or on a war or hunting excursion, as physician and surgeon to the party, and also as soothsayer, astrologer, conjurer (*jongleur*), and caterer for everything that needs be procured through the supernatural aids of incantation and *hocus-pocus*.

A good illustration of this was given by this magician while on their voyage to this country a few weeks since when near the land off the English coast; the packet ship on which the Indians were passengers was becalmed for several days, much to the annoyance of the Indians and numerous other passengers, when it was decided by the Indian chief that they must call upon the medicine man to try the efficacy of his magical powers in the endeavor to raise a wind. For this purpose he very gradually went to work with all due ceremony, according to the modes of the country, and after the usual ceremony of a mystery feast and various invocations to the spirit of the wind and the ocean both were conciliated by the sacrifice of many plugs of tobacco thrown into the sea; and in a little time the wind began to blow, the sails were filled, and the vessel soon wafted into port to the amusement of the passengers, and much to the gratification of the Indians who all believed and ever will that the vessel was set in motion by the potency of the doctor's mysterious and supernatural powers.

The (medicine) bag (talismanic charm) of this man is suspended from his neck by a rope made of sweet-scented grass, and consists of two small bags about the size of a filbert nut, the sacred contents of which are superstitiously sealed from the eyes of the world; and in a group with these a human finger, shrivelled and dried, taken from the hand of some victim who has fallen by his weapons in battle.

GEORGE THE THIRD MEDAL.—Suspended from the neck of this man also is a large silver medal with the portrait of George the Third in relief upon it. This he received

from his father, and also the following curious document, which he has carefully preserved with it, forming a material part of its history :

“ Frederick Haldimand, captain-general and governor-in-chief of the provinces of Quebec, &c., general and commander-in-chief of His Majesty’s forces in said province and frontiers, &c., &c., to Le Voleur, grand chief of the Zaïvovois.

“ In consideration of the fidelity, zeal, and attachment testified by Le Voleur, Grand Chief of the Zaïvovois, to the King’s Government, and by virtue of the power and authority in me vested, I do hereby confirm the said Le Voleur, Grand Chief of the Zaïvovois aforesaid, having bestowed upon him the Great Medal, willing all and singular the Indians, inhabitants thereof, to obey him as Grand Chief, and all officers and others in His Majesty’s service to treat him accordingly.

“ Given under my hand and seal at arms, at Montreal, this seventeenth day of August, 1778, in the 18th year of the reign of our Sovereign Lord George the Third, by the Grace of God of Great Britain, France, and Ireland, King, Defender of the Faith, &c.

“ FREDK. HALDIMAND,

“ By his Excellency’s command,

“ E. FOY.”

The above document and medal, like many other proofs to be met, clearly show that many of the warriors of this tribe were employed in the British service, in the Canadas, during the Revolutionary war, although they live some hundreds of miles from the Canadian frontier.

Of the warriors, *Shon-ta-yi-ga* (the Little Wolf), and *No-ho-munn-ya* (called Roman Nose), are probably the most distinguished, and well entitled to the friendship of all good people from the humane and noble act mentioned in the following documents, and which transpired but a short time before they left their homes, by which they saved the lives of ten unarmed and unprotected enemies :

“ Know all men by these presents, that *Shon-ti-yi-ga* (or the Little Wolf), an Iowa brave, is well entitled to be called a brave, from the fact of his having been engaged in many expeditions against the enemies of his tribe ; in all such excursions he has, I am informed, universally behaved bravely. But especially is he entitled to the love and confidence of all men, whether white or red, on account of his humanity and daring conduct in arresting from the cruel nation of which he is a member a party of Omahaws. On last Sabbath day he saved from the tomahawk and scalping-knife ten unoffending Omahaws ; one of the party was decoyed out of sight and murdered ; the other ten, consisting of the well known and much loved chiefs Big Elk, Big Eyes, and Wascamonia, one squaw, and six young men. This party was on a visit of friendship, by special invitation from the Ioways. When they arrived within ten miles of this post they were seen and conversed with by the son-in-law of *Neumon-ya*, a chief of the Ioways, who undertook to bring the tobacco and sticks to the Ioway chiefs, as is a custom of Indians when on a begging expedition. This young man proved treacherous, and failed to deliver his message to his chiefs, and gave information of the approach of the Omahaws to a man who was preparing to go on a war party. He and two-thirds of the nation started out to murder their visitors, and were only prevented by the timely assistance and interference of the Little Wolf, or *Shon-ta-yi-ga*, and one other Ioway, whose name is the Roman Nose.

“ This man (the Little Wolf) interfered, as he says, and doubtless he tells the truth, because he considered it treacherous and cowardly to strike a brother after having invited them to visit their nation. Such treachery is rare, indeed, among the wildest of North American Indians, and never occurred with the Ioways before. I met him and Jeffrey, the Ioway interpreter, together with two other Ioways, guarding the Big Elk and his party on to my agency in a short time after this took place.

“ I cannot close this communication without expressing my sincere thanks to the

Little Wolf and his comrade for their good conduct; and I most respectfully beg leave to recommend them to the kind attention of their great father, the President of the United States, and all gentlemen to whom this paper may be shown.

“W. P. RICHARDSON,

“Indian Sub-Agent.

“GREAT NEMAHAW SUB-AGENCY,

“October 23, 1843.”

“OFFICE OF INDIAN AFFAIRS,

“Saint Louis, Mo., April 10, 1844.

“SIR: Permit me to introduce to you the bearer, No-ho-mun-ya (Roman Nose), an Ioway brave. Roman Nose, in company with Shon-ta-yi-ga, or Little Wolf, in October last defended and rescued from impending death by a party of his own nation ten Omaha Indians, consisting of four respected chiefs, braves, and squaws, under circumstances highly flattering to their bravery and humanity.

“I would recommend that a medal be presented to No-ho-mun-ya (Roman Nose) as a testimonial of his meritorious conduct on the occasion referred to. Medals from the Government are highly esteemed by the Indians, and if bravery and humanity are merits in the Indian, then I think Roman Nose richly merits one. His character in every respect is good.

“A notice by the Government of meritorious acts by the Indians has a happy tendency in making a favorable impression in reference to the act that may be the cause of the notice.

“I have presented Little Wolf with a medal that was in the office. On receiving it he very delicately replied, that he deserved no credit for what he had done—that he had only done his duty, but was gratified that his conduct had merited the approbation of his nation and his father.

“I have the honor to be, very respectfully, sir, your obedient servant,

“W. H. HARVEY,

“Superintendent Indian Affairs.

“To His Excellency JOHN TYLER,

“President of the United States, Washington City.”

“I concur with Mr. Harvey in thinking this Indian Chief entitled for his bravery and humanity to a medal.

“J. TYLER,

“President United States, Washington City.

“JUNE 8, 1844.”

“Medal delivered accordingly to Mr. Geo. H. C. Melody for the chief.

“T. HARTLEY CRAWFORD.

“JUNE 8, 1844.”

Wa-ta-we-bu-ka-na, a boy ten years old, easily known in the group from his size, and the remarkably pretty effect he produces in the dance, and ball-play. This boy, of beautiful Egyptian style, is the son of Neu-mon-ya (the Walking Rain), and furnishes an excellent illustration of the early drilling in the dance and other amusements that Indian boys are compelled to go through, forming a material part of their education, preparing them for war and the chase.

Women.—Of the four women (squaws) of the party, three are married, and the fourth one an unmarried girl of fifteen years. Two of these women have their little children (papposes) with them, one two years old, and the other an infant in the cradle, forming one of the most pleasing features of the exhibition.

These four women, dressed much alike, are clad in dresses of deer and elk skins, most curiously and elaborately garnished, and ornamented with porcupine-quill work

and beads from their own country; and also, at times, in dresses in part made of red and blue cloths of civilized manufacture, purchased and manufactured by them since they left their homes, in a rude and curious, though very gaudy and effective, taste.

Ruton-ye-we-ma (the Strutting Pigeon) is the wife of the chief, White Cloud. She is the best looking of the women, and has her little child—a girl—playing around her. This child, though more than two years old, is yet nurtured at the breast, and is by no means a singular case, for, in many instances, the Indian mother gives the breast to her child to the age of three, and, in some cases, to the age of four years.

Okee-we-me (the wife of the Little Wolf) is the mother of the infant pappoose, called Corsair. This child is but a little more than three months old, and slung in the cradle on the mother's back, according to the general custom practiced by all the American tribes, and furnishes one of the most interesting illustrations in the group. All tribes in America practice the same mode of carrying their infant children for several months from their birth upon a flat board resting upon the mother's back, as she walks or rides, suspended by a broad strap passing over her forehead, or across her breast. By this mode of carrying their children, the mothers, who have to perform all the slavish duties of the camp, having the free use of their hands and arms, are enabled to work most of the time, and, in fact, exercise and labor nearly as well as if the child were not attached to their persons. These cradles are often, as in the present instance, most elaborately embroidered with porcupine quills, and loaded with little trinkets hanging within the child's reach, that it may amuse itself with them as it rides, with its face looking from that of its mother, while she is at work, so as not to draw upon her valuable time.

This rigid and seemingly cruel mode of lashing the child with its back to a straight board seems to be one peculiarly adapted to Indian life, and I believe promotes straight limbs, sound lungs, and long life.

PERSONAL APPEARANCE.—The Ioways, occupying a middle latitude in America, seem to exhibit about a medium or average of complexion, stature, &c., of the North American tribes, the average stature not much differing from that of the inhabitants of Great Britain, yet in muscular development and strength much inferior. This, however, is probably the result of habit, as these people have little use for the exertion of their muscles, other than in the chase and war, which are very different from the laborious occupations of civilized life. The hunters' life, however, on horseback and on foot, and their violent dances, occupying much of their lives, give great strength to the muscles of the leg, enabling them generally to perform feats which it would be exceedingly difficult for civilized men to perform.

The Ioways, like three other tribes in America, observe a mode of dressing the head, which renders their appearance peculiarly pleasing and effective. They shave the hair from the whole head, except a small patch left on the top of the head, called the *scalp-lock*, to which they attach a beautiful red crest, made of the hair of the deer's tail, dyed red, and horse hair; and rising out of this crest, which has much the appearance of a Grecian helmet, the war eagle's quill completing the head-dress of their warriors.

That part of the head which is shaved is generally rouged to an extravagant degree, and they boast of the mode of shaving their heads to the part that is desired for the scalp, saying that they point out to their enemies who may kill them in battle where to cut with the scalping-knife, "that they may not lose time in hunting out the scalp."

ORNAMENTS.—Red, black, green, and white paints are the chief and gaudy ornaments to the persons of all American Indians, and none, perhaps, use them more abundantly than the Ioways do. These are put on in the morning, and generally arranged according to the modes they are to go through, or the society they are to mingle with, during the day, and are all carefully washed away at night.

WITH THE MEN.—Of the durable and picturesque, the *necklaces* made of the claws of the grizzly bear, *scalp-locks* on the seams of their dresses, the *war eagle's quills*,

ermine skins, medals, wampum, &c., are the most valued; and of these, next to the scalp-locks, the most precious, because most difficult to procure, the claws of that most ferocious and dangerous animal, the grizzly bear, which, like the scalp-locks, are worn as trophies—as proofs that the wearer has vanquished so formidable an enemy.

WITH THE WOMEN.—Who never deal with scalps or grizzly bears, silver and tinsel ornaments for the ears, brooches, wristbands, wampum, and elk's teeth, are the valued ornaments.

The wampum, which is worn in profuse strings around the necks of each of the women, of a pleasing and graceful effect, is manufactured by their own hands, from fresh-water shells, and valued, from the great labor required to produce it, above all other ornaments about their persons.

MODES OF LIFE.—This, like most of the other tribes, when they are found in their primitive wildness, live by the chase, following the herds of buffalo and other animals of the prairies, killing them from the backs of their running horses with lances and arrows. Leading wild and hunter lives, and roaming over the undefined boundaries of their enemies' hunting-grounds, they keep alive ancient feuds, which embroil them in almost constant warfare with the tribes around them. This system, with the other yet more destructive, that of supplying them with rum and whisky, teaching them dissipation and its concomitant vices, with the introduction of the small-pox, has recently reduced this brave and warlike tribe from ten or fifteen thousand to their present number of two thousand or less.

RELIGION.—The Ioways, like all the tribes I have visited in America, are decidedly religious, distinctly believing in the existence of a Supreme Being—a great (or good) and an evil spirit, and also in a future existence beyond the grave. Their modes of worshipping the Great Spirit are superstitious, but sincere—by severe modes of penance and sacrifices of various kinds. They have no knowledge of the Christian religion except what has been recently taught them by the missionary efforts being made among them, and, I am glad to learn, with the most pleasing and successful results.

WEAPONS, &c.—The weapons used in this tribe, and of which these people have brought many, are very similar to those used in most of the uncivilized tribes of North America, consisting of the bow and arrows, the lance and the javelin, war-clubs, knives, &c., and with these, as a protection in battle, a leathern shield, made of the hide of the buffalo bull, sufficiently thick and hard to arrest an arrow or to turn the blade of a lance.

MUSICAL INSTRUMENTS.—All American Indians are poor in these, the principal of which, and the “heel-inspiring” one, is the drum or tambour. This is rudely but ingeniously made by straining a piece of raw hide over a hoop or over the head of a sort of keg, generally made by excavating away the inner part of a log of wood, leaving a thin rim around its sides. In the bottom of this they always have a quantity of water, which sends out a remarkably rich and liquid tone. Besides this they use several kinds of rattles and whistles, some of which are for mystery purposes, and others merely for the pleasing and exciting effects they produce in their dances.

ENCAMPMENT.—The houses, or *wigwams*, of these people are tents made of a number of buffalo hides sewed together and raised very neatly upon some twenty or thirty pine poles, of twenty or twenty-five feet in height, crossing each other near the top and forming at the apex an aperture, through which the smoke escapes and the light is admitted to light the interior. These are ornamented with numerous rude devices, with red and black or blue paint, and form in the group a most wild and curious yet pleasing effect.

This party have brought with them, and will erect them in their encampment; four of such, brought with all their poles, and all their equipments, and their appearance with their wild inmates are forming a novel and striking effect in the heart of the civilized world. Those tribes who dwell in these skin lodges are in the habit

of moving their encampments several times in the course of the summer, following the ranges of the herds of buffalos to make their hunting successful, and whenever they halt upon a ground for the establishment of their village, the doctor, or mystery man, regularly, and in due form, walks on to the ground, and having designated the spot for each wigwam, invokes the favor and protection of the Great Spirit by throwing tobacco on to the ground designated for each wigwam; after which the women appear upon the ground, and in a few moments, with "masterly hands," raise them up and furnish their interiors and light the fires, whilst the men sit upon the ground in a circle, deliberately smoking their pipes.

This ceremony will be observed on each day of the encampment, and also at evening, the *striking* of their tents by lowering them down and packing them up, which is equally done by the women, whilst their lords are taking another smoke of the pipe.

AMUSEMENTS.—All Indian tribes in America practice numerous amusements, and in many instances become exceedingly expert. The lifetimes of idleness and leisure which they all lead invite them to many and almost constant games for amusement and wholesome exercise, which they require. The Ioways have come prepared with all the implements and qualifications for many of these. And in the exhibitions which they have been, and are making, they are giving with proper and native effect the following list:

THE WELCOME DANCE.—This peculiar dance is given to a stranger, or strangers, whom they have decided to welcome in their village, and out of respect to the person or persons to whom they are expressing this welcome, the musicians and all the spectators rise upon their feet while it is being danced.

The song is at first a lament for some friend, or friends, who are dead or gone away, and ends in a gay and lively and cheerful step, whilst they are announcing that the friend to whom they are addressing it is received into the place which has been left.

WAR DANCE.—The war dance, which is one of the most exciting and spirited modes of the American Indians, is danced by the warriors before starting on a war excursion, and as often after they have returned, making their boasts how they are going to slay their enemies in battle, or how they have met them and taken their scalps, to be carried through the dance by their women and children, &c. It is a long and tiresome dance if given entire, and is divided into the number of parts named and described below.

Eh-ROS-KA (THE WARRIOR'S DANCE).—This exciting part of the war dance is generally given after a party have returned from war as a boast, and oftentimes, when not at war, is given as an amusement merely.

The song in this dance seems to be addressed to the body of an enemy from its name, Eh-Ros-Ka, meaning the body, the tribe, or war party, rather than an individual, although the beginning of the song is addressed to an individual chief or warrior of the enemies party thus:

O-ta-pa!

Why run you from us when you
Are the most powerful?
But it was not you,

O-ta-pa!

It was your body that run,
It was your body, O-ta-pa!
It was your body that run.

WA-SISSICA (THE WAR SONG) is sung for the last part of this dance, and the movement in the dance is quickened, beginning with the ejaculation—

How-a! How-a!

O ta-pa!

I am proud of being at home!
I am proud, O-ta-pa! I am proud
I am at home—my enemy run
I am proud, I am proud, O-ta-pa!

Such is near the interpretation of this song; and, like this, the various parts of the war dance are accompanied with boasts and threats upon an enemy to whom the songs are usually addressed.

THE APPROACHING DANCE.—The approaching dance is also a spirited part of the war dance, in which the dancers are, by their gestures, exhibiting the mode of advancing upon an enemy, by hunting out and following up the track, discovering the enemy, and preparing for the attack, &c., and the song for this dance runs thus:

O-ta-pa!

I am creeping on your track,
Keep on your guard, O-ta-pa!
Or I will hop on your back,
I will hop on you, I will hop on you.
Stand back, my friends, I see them,
The enemies are here, I see them!
They are in a good place,
Don't move, I see them!
&c., &c., &c.

HA-KON-E-CRASE (THE EAGLE DANCE).—The eagle dance, as they call it, the “soaring eagle,” is one of the most pleasing of their dances, and forms a part of the war dance. The war eagle of their country conquers every variety of the eagle species in those regions; and esteeming the bird for its valor, they highly value its quills for pluming their heads and parts of their dresses; and a part, therefore, of the war dance must needs be given in compliment to this noble bird.

In this beautiful dance each dancer imagines himself a soaring eagle, and as they dance forward from behind the musicians they take the positions of the eagles, heading against the wind, and looking down, preparing to make a swoop on their prey below them; the wind seems too strong for them, and they fall back, and repeatedly advance forward, imitating the chattering of that bird, with the whistles carried in their hands, whilst they sing—

It's me—I am a war eagle!
The wind is strong, but I am an eagle!
I am not ashamed—no, I am not;
The twisting eagle's quill is on my head.
I see my enemy below me!
I am an eagle, a war eagle!
&c., &c., &c.

THE CALUMET DANCE.—The Calumet, or Pipe of Peace, dance is given at the conclusion of a treaty of peace, after smoking through its sacred stem, by the dancers holding the calumet in the left hand, and a *sheshequoi*, or rattle, in the other.

The calumet is a sacred pipe, and its stem is ornamented with war eagle's quills.

This dance is also often given in compliment to a warrior or brave, and is looked upon as the highest compliment they can pay to his courage and bravery, and on such occasions it is expected he will make some handsome presents. By this dance also they initiate friends into the relationship of brothers or sisters, by adoption.

To commence this dance the pipes and rattles are handed to the dancers by the greatest warrior present, who makes his boast as he gives them, and the one on whom the honor is conferred has the right to boast of it all his life.

THE SCALP DANCE.—This barbarous and exciting scene is the Indian mode of celebrating a victory, and is given fifteen nights in succession, when a war party returns from battle, having taken scalps from the heads of their enemies. Taking the scalp is practiced by all the American tribes, and by them all very much in the same way, by cutting off a patch of the skin from a victim's head when killed in battle; and this piece of skin, with the hair on it, is the scalp, which is taken and preserved solely for a trophy, as the proof positive that its possessor has killed an enemy in battle, and this because they have no books of history or public records to refer to for the account of the battles of military men. The scalp dance is generally danced by torch-light,

at a late hour in the night, and in all tribes the women take a conspicuous part in it, by dancing in the circle with the men, holding up the scalps just brought from battle, attached to the top of a pole, or the handle of a lance.

A scalp, to be a genuine one, must have been taken from the head of an *enemy*, and that enemy *dead*. The living are sometimes scalped, but whenever it occurs it is on a field of battle, amongst the wounded, and supposed to be dead, who sometimes survive, but with the signal disgrace of having lost a patch of the skin and hair from the top of their heads.

BUFFALO DANCE.—This and all the other tribes living within the country abounding in buffalos are in the habit of giving the buffalo dance preparatory to starting out upon a buffalo hunt. For each animal that these people hunt they believe there is some invisible spirit presiding over their peculiar destinies, and before they have any faith in their hunt for them that spirit must needs be consulted in a song and entertained with a dance. For this curious scene nearly every man in an Indian village keeps hanging in his wigwam a mask of the buffalo's head and horns, which he places on his head when he joins in this amusing masquerade, imagining himself looking like a buffalo.

BEAR DANCE.—In preparing to hunt the black bear for its delicious food, or to contend with the ferocious and dangerous grizzly bear, a similar appeal is made to the Bear Spirit, and with similar results, *i. e.*, all hands having strictly attended to this necessary and important form, start off upon their hunt, quite certain of success, which in any other event they could scarcely have counted on.

In this grotesque and amusing mode, each dancer imitates with his hands, alternately, the habits of the bear when running, and when sitting up upon its feet, its paws suspended from its breast.

BALL-PLAY DANCE.—Previous to commencing on the exciting and important game of ball, as the goods of all playing are more or less at stake, each party must needs invoke the aid of supernatural influence to their respective sides; and for this purpose they give a very pretty dance, in which, as in the Scalp-Dance, the women take a part, giving neat and curious effect to the scene. In most of the tribes this dance is given at intervals of every half-hour or so, during the night previous to the play, preparing the minds and bodies of the players for this exciting scene, upon which they enter in the morning with empty stomachs and decide before they leave the ground to eat.

BALL-PLAY.—This is, undoubtedly, the favorite and most manly and exciting game of the North American Indians, and often played by three or four hundred on a side, who venture their horses, robes, weapons, and even the very clothes upon their backs, upon the issue of the game. For this beautiful game two byes, or goals, are established, at three or four hundred yards from each other, by erecting two poles in the ground for each, four or five feet apart, between which it is the strife of either party to force the ball (it having been thrown up at a point half-way between) by catching it in a little hoop, or racket, at the end of a stick, three feet in length, held in both hands as they run, throwing the ball an immense distance when they get it in the stick. This game is always played over an extensive prairie or meadow, and the confusion and laughable scrambles for the ball when it is falling, and often sought for by two or three hundred, gathered to a focus, are curious and amusing beyond the reach of any description or painting.

ING-KEE-KO-KEE (GAME OF THE MOCCASIN).

“Take care of yourself—shoot well, or you lose,
You warned me, but see! I have defeated you!
I am one of the Great Spirit's children!
Wa-konda I am! I am Wa-konda!”

This song is sung in this curious and most exciting, as well as fascinating, game, which is played by two, or four, or six—seated on the ground in a circle, with three or four moccasins lying on the ground, when one lifts each moccasin in turn, and suddenly

darts his right hand under each, dropping a little stone, the size of a hazelnut, under one of the moccasins, leaving his adversary to hit upon one or the other, and to take the counter and the chance if he chooses the one under which the stone is dropped. This is, perhaps, one of the silliest-looking games to the spectator, but it all goes to music, and in perfect time, and often for hours together without intermission, and forms one of the principal gambling games of these gambling people.

KON-THO-GRA (GAME OF THE PLATTER).—This is the fascinating game of the women, and exclusively their own, played with a number of little blocks of wood the size of a half-crown piece, marked with certain points for counting the game, to be decided by throws, as they are shaken in a bowl and turned out on a sort of pillow. The bets are made after the bowl is turned, and decided by the number of points and colors turned.

WAR SONG.—War songs are numerous in each tribe, and always consist of vaunts and self-eulogiums, undervaluing their enemies, and taunting them with threats and reminiscences of victories gained over them, &c. And, besides these, each tribe has one war-song which is purely national and patriotic, as much so as “God Save the Queen” or “Yankee Doodle.”

WAR-WHOOP.—The frightful war-whoop is sounded at the instant when Indians are rushing into battle, as the signal of attack, and thus gets its terror from association, rather than from anything so terrifying in the sound or yell itself. The war-whoop is a shrill-sounded note, on a high key, given out with a gradual swell, and shaken by a rapid vibration of the four fingers of the right hand over the mouth. This note is not allowed to be given in the Indian countries unless in battle, or in the war or other dances, where they are privileged to give it, as it will be sounded in various parts of the war-dance.

DEATH SONG.—The death song is strictly national, belonging to every tribe, and is sung by any one in the tribe resolved or condemned to die. It is generally sung during the night previous to an execution, by the criminal, or by a suicide, and repeated to the last moment of his existence. It has generally a most doleful effect, having as one has in that country a knowledge of the certainty of death decreed by a council, or by a suicide. In this song, which is always addressed to the Great Spirit, there is an offer back to the Great Spirit of the soul, which “entered in at the breast and is now going out at the toe.”

WOLF SONG.—This amusing song, which I believe to be peculiar to the Ioways, seems to come strictly under the province of the medicine or mystery man. I will venture to say that this ingenious adaptation will excite a smile, if not some degree of real amusement, as well as applause, whenever it is fairly heard and understood by an English audience. The occasion that calls for this song in the Ioway country is when a party of young men who are preparing to start on a war excursion against their enemy (after having fatigued the whole village for several days with the war-dance, making their boasts how they are going to slay their enemies, &c.) have retired to rest at a late hour in the night, to start the next morning at break of day on their intended expedition. In the dead of that night, and after the vaunting war party have got into a sound sleep, the serenading party to sing this song, made up of a number of young fellows who care at that time much less about taking scalps than they do for a little good fun, appear back of the wigwams of these “men of war,” and commence serenading them with this curious song which they have ingeniously taken from the howling of a gang of wolves, and so admirably adapted it to music as to form it into a most amusing duet, quartet, or whatever it may be better termed; and with this song, with its barking and howling chorus, they are sure to annoy the party until they get up, light the fire, get out their tobacco and other little luxuries they may have prepared for their excursion, which they will smoke and partake with them until daylight, if they last so long, when they will take leave of their morning friends who are for the “death,” thanking them for their liberality and kindness in starting,

wishing them a good night's sleep (when night comes again), and a successful campaign against their enemies.

Besides the above list of songs, there is the Medicine Song, the Burial Song, the Farewell Song, and yet several others, all of which, with the numerous games, &c., above mentioned, the Ioways are giving in their exhibitions, in due place, but not (of necessity), as the reader will easily understand, entire on any one day or evening.—George Catlin.

DAKOTA SIOUX—IOWAS.

A tribe of Indians of Dakota stock, inhabiting originally the interior of the State of the same name. Marquette, in 1673, placed them on his map as the Pa-houtet. Some of the neighboring Algonkins called them Iowas—a name originally applied to a river, and said to mean “the beautiful land,” and others Mascoutin or Prairie Nadouessi. In their own tongue their name is Pahucha, meaning “Dusty Nose.” They were famous as great pedestrians, being able to walk twenty-five or thirty leagues a day, and the names of many of their chiefs show that they prided themselves on their walking.

In 1700 they were on the Mankato, and constantly roaming with the Western Algonkins. Early in the present century they numbered about 1,500, and were involved in wars with the Osages, Omahas, and the Sioux, losing heavily. Later they became much decimated through the ravages of the small-pox and other diseases.

First treaty was made with them in 1815. In 1836 the tribe, numbering 992, were removed to the west bank of the Missouri, and from this time rapidly declined in numbers, many of them becoming vagrants in other tribes, and others killed themselves by intemperance. By 1846 had decreased to 700. In 1861 the tribe, now reduced to 305, ceded all their lands except 16,000 acres, which they subsequently, in 1869, shared with some of the Sacs and Foxes, their old friends.

Since the tribe has been placed under the charge of the Society of Friends in Indian Territory they have improved somewhat, so that at the present time (1875), although reduced to 219 souls, they are all living in good houses on their fertile reservation in Southern Nebraska [removed to Indian Territory], and are raising much more than is needed for their own consumption. They have good schools, at which nearly one-fourth of the tribe attend, and nearly one-half of the whole number can read. They stand in the front rank of civilized Indian tribes.—W. H. Jackson, 1877.

MR. CATLIN'S NOTES ON THE IOWA INDIANS, 1832.

The Iowas are a small tribe, of about fourteen hundred persons, living in a snug little village within a few miles of the eastern bank of the Missouri River, a few miles above this place (Fort Leavenworth, Kansas).

The Iowas may be said to be the farthest departed from primitive modes [of any of the tribes then about Fort Leavenworth], as they are depending chiefly on their cornfields for subsistence; though their appearance, both in their dwellings and personal looks, dress, modes, &c., is that of the primitive Indian.—G. C., 1832.

PRESENT LOCATION AND NUMBERS.

Iowas at Pottawatomie and Great Nemaha Agency, Kansas, June, 1884, 143; August 20, 1885, 138: Iowas at Sac and Fox Agency, Indian Territory, 88; total in 1884. 231; in 1885, 226. Civilized mechanics, farmers, and herders.

SEN-E-CAS.

[Seneca: Laws of the United States. Seneca: Indian Bureau, 1885.]

Near Lake Erie, State of New York, 1,200, semi-civilized and agricultural. One of the tribes composing the great compact called the "Six Nations."

Mr. Catlin visited them and Red Jacket in 1829-'30.

263. Red Jacket (Sa-go-ye-wat-ha*) head chief of the tribe; full length, life size, standing on the "Table Rock," Niagara Falls; painted in 1829.

(Plate No. 205, pages 104-106, vol. 2, Catlin's Eight Years.)

This man was chief for many years, and so remained until his death, in 1830. Perhaps no Indian sachem has ever lived on our frontier whose name and history are better known, or whose talents have been more generally admitted, than those of Red Jacket; he was, as a savage, very great in council.

His name, Red Jacket, came from his wearing a richly embroidered scarlet jacket or coat given to him by a British officer.

MR. CATLIN'S NOTES ON RED JACKET.

The Senecas are the most numerous remnant of this compact, the League of Iroquois, and have at their head an aged and very distinguished chief, familiarly known throughout the United States by the name of *Red Jacket*. I painted his portrait from the life, in the costume in which he is represented, and indulged him also in the wish he expressed, that he might be seen standing on the Table Rock, at the Falls of Niagara, about which place he thought his spirit would linger after he was dead.

The fame, as well as the face, of Red Jacket is generally familiar to the citizens of the United States and the Canadas; and for the information of those who have not known him, I will briefly say that he has been for many years the head chief of the scattered remnants of that once powerful compact, the Six Nations, a part of whom reside on their reservations in the vicinity of the Senecas, amounting perhaps, in all, to about 4,000, and owning some 200,000 acres of fine lands. Of this confederacy, the Mohawks and Cayugas chiefly emigrated to Canada some fifty years ago, leaving the Senecas, the Tuscaroras, Oneidas, and Onondagas in the State of New York, on fine tracts of lands, completely surrounded with white population, who by industry and enterprise are making the Indian lands too valuable to be long in their possession, who will no doubt be induced to sell out to the Government, or, in other words, to exchange them for lands west of the Mississippi, where it is the avowed intention of the Government to remove all the border tribes.†

Red Jacket has been reputed one of the greatest orators of his day, and no doubt more distinguished for his eloquence and his influence in council than as a warrior, in which character I think history has not said much of him. This may be owing, in a great measure, to the fact that the wars of his nation were chiefly fought before his fighting days, and that the greater part of his life and his talents have been spent with his tribe during its downfall; where, instead of the horrors of Indian wars, they have had a more fatal and destructive enemy to encounter in the insidious encroachments of pale faces, which he has been for many years exerting his eloquence and all his talents to resist. Poor old chief—not all the eloquence of Cicero and Demosthenes

* Red Jacket's Indian name or title should be pronounced Sa-gò-ye-wàt-hă—ă as in fate, ũ as in far; strongly accented on the second and fourth syllables.

† Since the above was written the Senecas and all the other remnants of the Six Nations residing in the State of New York have agreed, in treaties with the United States, to remove to tracts of country assigned them west of the Mississippi, 1,200 miles from their reservation in the State of New York.—G. C.

RED JACKET (SA-GO-YE-WAT-HA).
Head Chief of the Senecas. No. 263, page 154.
(Plate 205, Vol. II, Catlin's Eight Years.)

would be able to avert the calamity that awaits his declining nation—to resist the despoiling hand of mercenary white man, that opens and spreads liberally, but to entrap the unwary and ignorant within its withering grasp.

This talented old man has for many years past strenuously remonstrated both to the governor of New York and the President of the United States against the encroachments of white people, whom he represented as using every endeavor to wrest from them their lands—to destroy their game, introducing vices of a horrible character, and unknown to his people by nature, and most vehemently of all has he continually remonstrated against the preaching of missionaries in his tribe, alleging that the “black coats” (as he calls the clergymen) did more mischief than good in his tribe, by creating doubts and dissensions amongst his people, which are destructive of his peace and dangerous to the success and even existence of his tribe. * * * [See also Iroquois, p. 125, herein.]

RED JACKET'S OFFICIAL NAME AND RANK.

When Red Jacket was elevated by election as a chief his name *Otetiani*, “Always Ready” (original name), was taken from him, and *Sagoyewatha*, “Keeper Awake,” given him in allusion to his powers of eloquence. See Mr. Horatio Hale's views as to this in Transactions of Buffalo Historical Society, Buffalo, N. Y., vol. 3, 1884; also a letter from General Ely S. Parker, of date February 17, 1885, in same volume. (Printed herein, under the title “Iroquois,” page 180.)

HIS BIRTH AND DEATH.

Red Jacket was born at Old Castle, near the foot of Seneca Lake, N. Y., in 1752. He died on the Seneca Reserve, near Buffalo, N. Y., January 20, 1830, the year after Mr. Catlin saw him.

Mr. Catlin's details as to Red Jacket's love of “fire-water” and his abuse of it are here omitted.

HIS PERSONAL APPEARANCE.

Red Jacket in 1820 was described as being then apparently sixty years old:

He was dressed with much taste in the Indian costume throughout, but had not a savage look. His form was erect and not large, and his face noble. He wore a blue dress, the upper garment cut after the fashion of a hunting shirt, with blue leggings, very neat moccasins, a *red jacket*, and a girdle of red about his waist. His eye was fine, his forehead lofty and capacious, and his bearing calm and dignified. * * *

The medal* which Red Jacket wore he prized above all price. It was a personal present made in 1792 from General Washington. He was never known to be without it. He had studied and comprehended the character of Washington, and placed upon this gift a value corresponding with his exalted opinion of the donor.—McKenny & Hall, vol. 1, pages 11 and 13.

An intelligent gentleman, who knew this chief intimately in peace and war for more than thirty years, speaks of him in the following terms:

Red Jacket was a *perfect Indian* in every respect—in costume, in his contempt for the dress of the white men, in his hatred and opposition to the missionaries, and in

*A copy of this is now in the National Museum.

his attachment to, and veneration for, the ancient customs and traditions of his tribe. He had a contempt for the English language and disdained to use any other than his own. He was the finest specimen of the Indian character I ever knew, and sustained it with more dignity than any other chief. He was the second in authority in his tribe; as an orator he was unequalled by any Indian I ever saw. His language was beautiful and figurative, as the Indian language always is, and delivered with the greatest ease and fluency. His gesticulation was easy, graceful, and natural. His voice was distinct and clear, and he always spoke with great animation. His memory was very strong. I have acted as interpreter to most of his speeches, to which no translation could do adequate justice.—McKenny and Hall, vol. 1, pages 5 and 6.

A REMINISCENCE OF RED JACKET.

Rev. Edmund B. Tuttle, chaplain, U. S. A., relates the following, in 1878:

The first Indian chief I had ever seen in my native town (Auburn, N. Y.) was Red Jacket. * * * Red jacket was a noble specimen of his race, and having suffered many wrongs from his white neighbors, would never use the English tongue, but always spoke to the whites through an interpreter. He visited our town one day (in 1824?) and was invited to dine at a hotel. Roast beef, turkey, chicken, and venison were served up at table. Opposite sat a white man who used some mustard on his beef and then pushed it over to the Indians (Red Jacket was one of them) who had never seen any before. Being an imitative animal, Red Jacket took a good half-teaspoonful with a piece of meat into his mouth, but said nothing as the tears came into his eyes. The other took a little of it, and then asked what made him cry. "Well," said he (Red Jacket), "I was thinking of an old Indian who died the other day." Then he asked the other Indian who had just eaten the mustard and meat, why he cried also. "I was sorry (crying) you didn't die when your friend did."

RED JACKET'S RELIGIOUS VIEWS.

In the summer of 1805, a number of the principal chiefs and warriors of the six nations, principally Senecas, assembled at Buffalo Creek, in the State of New York, at the particular request of the Rev. Mr. Crane, a missionary from the State of Massachusetts. The missionary was furnished with an interpreter, and accompanied by the United States agent of Indian affairs. The agent opened the council and the Rev. Crane followed.

The Indians consulted for a couple of hours after Mr. Crane had finished his address, asking them to permit the Boston Society to send missionaries to the Indians. They selected Red Jacket to make the reply for them. After an eloquent opening Red Jacket gave the following statement of the—

RELIGIOUS VIEWS OF THE SIX NATIONS.

We also have a religion which was given to our forefathers, and has been handed down to us, their children. We worship in that way. It teaches us to be thankful for all the favors we receive; to love each other, and to be united. We never quarrel about religion.

The Great Spirit has made us all, but he has made a difference between his white and red children. He has given us different complexions and different customs. To

you he has given the arts. To these he has not opened our eyes. We know these things to be true, since He has made so great a difference between us in other things, why may we not conclude that he has given us a different religion, according to our understanding. The Great Spirit does right; He knows what is best for his children; we are satisfied.

We are told that you have been preaching to the white people in this place. These people are our neighbors; we are acquainted with them; we will wait a little while and see what effect your preaching has upon them. If we find it does them good, makes them honest and less disposed to cheat Indians, we will then consider again of what you have said.

Brother, you have now heard our answer to your talk, and this is all we have to say at present. As we are going to part, we will come and take you by the hand, and hope the Great Spirit will protect you on your journey, and return you safe to your friends.

As the Indians began to approach the missionary he rose hastily from his seat and replied that "he could not take them by the hand, that there was no fellowship between the religion of God and the works of the devil!"

This being interpreted to the Indians, they smiled, and retired in a peaceful manner.

At a council afterwards, in answer to another proposal to establish a mission among his people, Red Jacket replied:

Your talk is fair and good; but I propose this: Go, try your hand in the town of Buffalo for one year. They need missionaries—if you can do what you say. If in that time you shall have done them any good, and made them any better, then we will let you come among our people.

REASONS FOR HIS OPPOSITION TO MISSIONARIES.

Judge James Hall writes of a gentleman's interview with Red Jacket:

In a private conversation with Red Jacket, Colonel Chapin, and myself, in 1824, I asked him why he was so much opposed to the establishment of missionaries among his people. * * * Because they do us no good. If they are not useful to the white people why do they not keep them at home; they are surely bad enough to need the labor of every one who can make them better. These men know we do not understand their religion; we cannot read their book. They tell us different stories about what it contains, and we believe they make the book to talk to suit themselves. If we had no money, no land, and no country to be cheated out of, these black coats would not trouble themselves about our good hereafter. The Great Spirit will not punish us for what we do not know. He will do justice to his red children. These black coats talk to the Great Spirit and ask for light, that we may see as they do, when they are blind themselves, and quarrel about the light which guides them. These things we do not understand, and the light they give us makes the straight and plain path trod by our fathers dark and dreary. These black coats tell us to work and raise corn; they do nothing themselves, and would starve to death if somebody did not feed them. All they do is to pray to the Great Spirit; but that will not make corn or potatoes grow. If it will, why do they beg from us and from the white people?

The red men knew nothing of trouble until it came from the white man. As soon as they crossed the great waters they wanted our country, and in return have always been ready to teach us how to quarrel about their religion.—McKenny & Hall, vol. 1, page 6.

DEATH OF RED JACKET.

January 20, 1830.

The following account of his death is from Miss Johnson's "Iroquois, or Bright Side of Indian Character," 1855, page 198:

The wife and daughter were the only ones to whom he spoke parting words or gave a parting blessing, but as his last hour drew nigh his family all gathered around him, and mournful it was to think that the children were not his own (his were all sleeping in the little churchyard where he was soon to be laid); they were his step-children, the children of his beloved wife.

So there were none around his dying bed but step-children. These he had always loved and cherished, and they loved and honored him, for this their mother had taught them. The wife sat by his pillow and rested her hand upon his head. At his feet stood the two sons [Henry and Daniel Two Guns].

RED JACKET'S BURIAL PLACE, 1830 TO 1878.*

About 4 miles from the city of Buffalo, on what was the Buffalo Creek Reservation, may be found the old Indian burial-ground. This little spot, consecrated as the last resting place of many of the chiefs and headmen of the Senecas, occupied the site of an ancient Indian fort. In 1842 the line of the intrenchments could be distinctly traced, especially on the west and south. A little to the north of the principal entrance was the grave of the celebrated chief Red Jacket, so long the faithful friend and protector of his people against encroachments of the whites, and still, as we might imagine, the watchful sentinel, solemnly guarding this little spot, where so many of his chosen friends recline around him, from the desecrating touch of the race whom he had so much reason to fear and hate.

No stones marked the graves of these primitive nobles, but while the tribe still resided on the Buffalo Creek Reservation the graves of Red Jacket, Young King, Little Billy, Destroy Town, Twenty Canoes, Two Guns, Captain Pollard, John Snow, Old Whitechief, and others were pointed out to the curious traveler.—Mrs. Asher Wright.

For portrait and biography of Red Jacket, see page 1, vol. 1, McKenney & Hall.

Red Jacket is therein noted as having been born in 1756, at Old Castle, on Seneca Lake, Ontario County, New York.

His name is given as "Sa-go-you-wat-ha," or the "Keeper Awake." He is costumed in a blue coat, as painted by Charles B. King at Washington, in 1818.

Also see "The Life and Times of Red Jacket, or Sa-go-ye-wat-ha, being the sequel to the History of the Six Nations, by Col. William L. Stone, 1841."

HOW RED JACKET'S REMAINS WERE LOST AND RECOVERED.

William C. Bryant, esq., of Buffalo, answering a letter of inquiry from General Ely S. Parker, of New York City, of May 8, 1884, gives the following valuable information as to the loss and recovery of Red Jacket's remains:

* Henry Placide, the eminent comedian, some thirty-five years ago, or in 1849, caused a marble slab, with a brief and suitable inscription, to be placed at the head of Red Jacket's grave. Relic hunters and other vandals mutilated and chipped it away in a pitiless manner. What they left of it is now (1885) deposited in the rooms of the Buffalo Historical Society, at Buffalo, N. Y.—T. D.

BUFFALO, *June 25, 1884.*

General ELY S. PARKER:

DEAR SIR: In 1852 Red Jacket's remains reposed in the old mission cemetery, at East Buffalo, surrounded by those of Young King, Captain Pollard, Destroy-Town, Little Billy, Mary Jemison, and others renowned in the later history of the Senecas. His grave was marked by a marble slab, erected by the eminent comedian Henry Placide, but which had been chipped away to half of its original proportion by relic hunters and other vandals. The cemetery was the pasture ground for vagrant cattle, and was in a scandalous state of dilapidation and neglect. The legal title to the grounds was and still is in the possession of the Ogden Land Company, although at the time of the last treaty the Indians were led to believe that the cemetery and church grounds were excluded from its operation. At the time mentioned (1852) George Copway, the well-known Ojibwa lecturer, delivered two or more lectures in Buffalo, in the course of which he called attention to Red Jacket's neglected grave, and agitated the subject of the removal of his dust to a more secure place and the erection of a suitable monument. A prominent business man, the late Wheeler Hotchkiss, who lived adjoining the cemetery, became deeply interested in the project, and he, together with Copway, assisted by an undertaker named Farwell, exhumed the remains and placed them in a new coffin, which was deposited with the bones in the cellar of Hotchkiss's residence.

There were a few Senecas still living on the Buffalo Creek Reservation, among them Moses Stevenson, Thomas Jemison, Daniel Two Guns, and others. They discovered that the old chief's grave had been violated almost simultaneously with its accomplishment. Stevenson, Two Guns, and a party of excited sympathizers among the whites, hastily gathered together and repaired to Hotchkiss's residence, where they demanded that the remains should be given up to them. The request was complied with, and the bones were taken to Cattaraugus and placed in the custody of Ruth Stevenson, the favorite step-daughter of Red Jacket, and a most worthy woman. Ruth was the wife of James Stevenson, brother of Moses. Their father was a contemporary of Red Jacket and a distinguished chief. She was a sister of Daniel Two Guns. Her father, a renowned warrior and chief, fell at the battle of Chippewa, an ally of the United States.

When the demand was made by the excited multitude Hotchkiss manifested considerable perturbation at the menacing attitude of the crowd. He turned to Farwell and, indicating the place of deposit of the remains, requested that Farwell should descend into the cellar and bring up the coffin or box, which, by the way, was made of red cedar and about 4 feet in length.

Ruth preserved the remains in her cabin for some years and finally buried them, but resolutely concealed from every living person any knowledge of the place of sepulture. Her husband was then dead and she was a childless, lone widow. As she became advanced in years it grew to be a source of anxiety to her what disposition should finally be made of these sacred relics. She consulted the Rev. Asher Wright and his wife on the subject, and concluded at length to deliver them over to the Buffalo Historical Society [on October 2, 1879], which, with the approval of the Seneca council, had undertaken to provide a permanent resting place for the bones of the old chief and his compatriots.

I do not believe that there is any ground for doubting the identity of the remains, and I think Hotchkiss and his confederates should be acquitted of any intention to do wrong. It was an impulsive and ill-advised act on their part. The few articles buried with the body were found intact. The skull is in excellent preservation and is unmistakably that of Red Jacket. Eminent surgeons, who have examined it and compared it with the best portraits of Red Jacket, attest to its genuineness.*

* When the remains of Red Jacket were removed from the box in which they had been deposited, October 2, 1879, in the vault of the Western Savings Bank, Buffalo, on October 8, 1884, and placed in a coffin, there was found a quantity of plaster of Paris, a portion of that used by a phrenologist in 1834 in the unsuccessful attempt to take a cast.—T. D.

The Rev. Asher Wright was a faithful missionary among the Senecas for nearly half a century.

There was no opportunity afforded Hotchkiss and his companions to fraudulently substitute another skeleton, had they been so disposed. I knew Hotchkiss well and have his written statement of the facts. Farwell, who still lives, and is a very reputable man, says that when the remains were surrendered to the Indians the skull had (as it has now) clinging to it in places a thin crust of plaster of Paris, showing that an attempt had been made to take a cast of it, which probably was arrested by the irruption of Two Guns and his band.

I have dictated the foregoing, because on reperusal of your esteemed letter I discovered I had not met the question which was in your mind when you wrote Mr. Marshall, and I greatly fear that I have wearied you by reciting details with which you were already familiar.

The old mission cemetery, I grieve to say, has been invaded by white foreigners, who are burying their dead there with a stolid indifference to every sentiment of justice or humanity.

Yours, very respectfully,

WILLIAM C. BRYANT.

(Transactions Buffalo Historical Society, vol. 3, 1885.)

REINTERMENT OF RED JACKET.

October 9, 1884, Red Jacket's remains were interred in Forest Lawn Cemetery, Buffalo, N. Y., along with those of fourteen other Senecas, with imposing ceremonies, under the auspices of the Buffalo Historical Society. A monument is to be erected, a plan of which is given, together with details as to the reinterment ceremonies, in a volume, entitled "Red Jacket, transactions of the Buffalo Historical Society, volume III, containing an account of the ceremonies observed and the addresses delivered on the occasion of the reinterment of Red Jacket and his compatriots, in Forest Lawn Cemetery, Buffalo, October 9, 1884; also historical papers, relating to the Iroquois, contributed by Horatio Hale, esq., General Ely S. Parker, and others. One volume, octavo, 130 pages, illustrated, 1885."

The Buffalo Historical Society, of Buffalo, N. Y., began the agitation of the question of the reinterment of the remains of Red Jacket about 1863; a series of meetings were held through twenty years, which finally culminated, on October 9, 1884, in the reinterment of the remains of Red Jacket, with five known and nine unknown Senecas, in Forest Lawn Cemetery, Buffalo, N. Y. Delegations of the several tribes of the Six Nations were present, and addresses were made in the Indian tongue by several chiefs and headmen. The ceremonies were held on Wednesday and Thursday, October 8 and 9. Addresses were also delivered by William C. Bryant, esq., and Hon. George W. Clinton, and others.

At the conclusion of Mr. Bryant's address at the grave, Chief John Buck, the hereditary "keeper of the wampum belts," arose, holding in his hand a belt of wampum kept by the nation for over two hundred years. The other Indians (in all about fifty representatives of the Six

Nations) also arose. Chief Buck then sang in long, low, mournful tones the following chant in the Onondaga language :

Now listen, ye who established the Great League,*
 Now it has become old—
 Now there is nothing but wilderness,
 Ye are in your graves who established it—
 Ye have taken it with you, and have placed it under you.
 And there is nothing left but a desert.
 There you have taken your intellects with you.
 What ye established ye have taken with you.
 Ye have placed under your heads what ye established—
 The Great League.

Then the other chiefs joined in the chorus as follows, which is also given in the Indian tongue :

Haih-haih!	Woe! Woe!
Jig-atk-on-tek!	Hearken ye!
Ni-yon-Kha!	We are diminished!
Haih-haih!	Woe! Woe!
Te-jos-ka-wa-yen-ton.	The clear land has become a thicket.
Haih-haih!	Woe! Woe!
Ska-hen-ta-hen-yon.	The clear places are deserted.
Haih!	Woe!
Sha-tyher-artā—	They are in their graves—
Hot-yi-wis-ah-on-gwe—	They who established it—
Haih!	Woe!
Ka-yan-een-go-ha.	The Great League.
Ne-ti-ken-en-ho-nen	Yet they declared,
Ne-ne Ken-yoi-wat-at-ye—	It should endure—
Ka-yan-een-go-ha.	The Great League.
Haih!	Woe!
Wa-hai-wak-ay-on-nhe-ha.	Their work has grown old.
Haih!	Woe!
Net-ho-wat-yon-gwen-ten-the.	Thus we are become miserable.

When they finished, some thirty representatives of the Six Nations marched down from the stand in Indian file, and ranged themselves by the sides of the caskets.

Chief Buck, who had been chosen to deliver the address of condolence, spoke in Onondaga for a few minutes, the other chiefs listening with bowed heads. The chant was again repeated. Many of the audience were moved to tears at the strange sight and melancholy sounds.

Chief John Jacket, a Seneca sachem, followed the lowering of the remains by a speech in Seneca, which was replied to by Chief Buck in the Onondaga tongue, and a benediction was pronounced by the Rev. Albert Anthony, a Delaware, from the Grand River Agency. This closed the exercises at the grave.

In the evening commemorative exercises were held at Music Hall.

* The League of the Iroquois or Five Nations. Consult Morgan: Hale's "Book of Rites," a most admirable work: Parkman, &c.

THE FIVE KNOWN INDIAN CHIEFS (SENECAS) RE-ENTOMED WITH RED JACKET AT BUFFALO, N. Y., OCTOBER 9, 1884.

THE YOUNG KING.

Young King, or Gui-en-gwàh-toh, was born at or near the site of the present village of Canandaigua about the year 1760. He was probably the nephew, on his mother's side, of the Seneca sachem popularly known as Old Smoke, or Old King—renowned in our earlier annals—to whose title Gui-en-gwàh-toh, "The Bearer of the Smoking Brand," or, more literally, "The Smoke Has Disappeared," he succeeded. This titular dignity, which invested him with the right to kindle and extinguish the council fire of his nation—always the most numerous and powerful in the Iroquois confederacy—bestowed upon him and his uncle, Old King, a delusive prestige and rank which led the whites to speak of them as royal personages.

Young King was a man of lofty stature and herculean mold, and of great force of character, though not endowed with the rare intellectual qualities which rendered his uncle the most influential Seneca chieftain of his period.

The leader of the Indians at the so-called massacre of Wyoming, history alleges, was a Seneca chief known to the natives by the name of Gui-en-gwàh-toh. Careful investigators affirm that Old King was too aged and Young King too juvenile to have taken part in that lamentable tragedy. It is certain, however, that there was never more than a few weeks' interregnum between the death of an Indian chief and the appointment of his successor, and Seneca tradition is silent as to any intervening bearer of the council brand, although, indeed, there may have been one. Colonel Proctor, who was delegated by President Washington in 1791 to treat with the Indians, visited the Senecas at Buffalo Creek in the spring of that year. The Young King was then apparently the leading man of his nation, or second only to the great war chief, Cornplanter. He seemed to be largely under the influence of Colonel Butler and the British. Proctor says that "Young King was fully regimented as a colonel; red, faced with blue, as belonging to some royal regiment, and equipped with a pair of the best epaulets, so that," he adds, "from his after conduct it may not appear extraordinary when the King has thrown in his opposition to my errand, he being paid so well for his influence over the Indian nations as to carry his favorite point in question."* Red Jacket is mentioned by Colonel Proctor as the "young prince of the *Turtle* tribe," and allusion is made to his engaging countenance and remarkable gifts of oratory. It is natural to infer that Young King was the senior of Red Jacket, and old enough to have followed his patron, Colonel Butler, to the bloody field of Wyoming. Captain Pollard, a noted Seneca chief, affirmed that Young King led the Indians on that occasion.† Indian youths of comparatively tender years, often enrolled themselves in the ranks of a war party and won an enviable name for their enterprise and valor.

Young King during the war of 1812 espoused the cause of the United States against the British, and in one engagement was seriously wounded.

In his earlier days he was addicted to intemperance, but on his conversion to Christianity he became a zealous advocate of temperance, as well as the leading promoter of education and progress in his tribe. During his more reckless days, in a brawl—where the testimony shows he was not the aggressor—he lost an arm and suffered other mutilation, and yet to the last his gigantic figure and commanding features wore the grandeur of a desolated and battered Colossus.

"He was the first man who built a rod of fence on the Buffalo Reservation, where the missionaries first resided; and often in the cold winter days would be seen on Saturday crossing the creek in his little canoe, to see if the church were supplied with fuel for the Sabbath, and if it were not, with his one hand wielded the ax and

* History of Buffalo and the Senecas, vol. 1, page 423, Appendix.

† American Historical Record, vol. 1, page 116.

chopped the little pile, which he also carried to the door to be sure that it was ready for the morning service, saying that he came so late into the vineyard, he must work diligently in order to accomplish anything before he was called away."* His manners were peculiarly suave and refined. His hospitality and benevolence were proverbial. He died in 1835 and was buried at East Buffalo in the old mission cemetery.

CAPTAIN OR COLONEL POLLARD.

Captain Pollard Ga-on-do-wau-na (Big Tree), a Seneca sachem of the first class, was a contemporary of Red Jacket, and only second to him as an orator. In moral attributes he was the superior of Red Jacket, being literally a man without guile, and distinguished for his benevolence and wisdom. In youth he was an ambitious warrior, and made himself conspicuous in the many forays against the border settlements by the British and Indians during the Revolutionary war. He participated in the affair at Wyoming. He was one of the earliest fruits of missionary labors at Buffalo Creek, and after his conversion to Christianity always spoke with abhorrence and deep contrition of the events of his warrior days, and he afterwards led a blameless and beneficent life.

Pollard was a half-breed, his father being an English Indian trader, whose headquarters appear to have been at Fort Niagara, and his mother a Seneca woman. The celebrated Catharine Montour (Queen Catharine) became his step-mother and bore to his father three sons, all of whom were renowned in the border warfare of those troublous times.

Pollard was formally selected by the Indians as their leader, or war captain, at the commencement of the war of 1812, and was an able and valiant ally of our forces during the entire struggle. He was a man of commanding presence, of dignified and benevolent aspect, showing but little traces of his Indian lineage. He died at an advanced age on the 10th day of April, 1841, and was buried in the old mission cemetery. He left no descendants. His wife, Catharine, who survived him several years, was buried by his side, together with the last of his family, a little granddaughter. The three sleep together in the new Indian burial lot at Forest Lawn. Ketcham ("Buffalo and the Senecas"), who knew him personally, says that "after the death of Farmer's Brother the most considerable of the chiefs of the Senecas was Captain Pollard, or Kaoundowana."

Colonel Stone ("Life and Times of Red Jacket," page 373) says: "Captain Pollard, or Ka-oun-do-wa-no, is yet living (1841), a venerable looking old man, with a finely developed head, which would form a noble subject of study for Dr. Combe."

LITTLE BILLY.

Little Billy, Jish-ge-ge, or Katy-did (an insect), is always mentioned in contemporary records as "*The War Chief*." He died at the Seneca village, Buffalo Creek, December 28, 1834, a very aged man. There is a tradition extant which asserts that he was one of the Indian guides who accompanied the youthful Washington on his memorable mission to Fort Duquesne during the old French and Indian war.† The few aged Senecas who remember him affirm that he was a man of marked integrity and of irreproachable habits. Only the most meager materials for his biography remain, although his name is appended to many treaties and occurs in the "Life and Times of Red Jacket" and other writings relating to the Indians. The same remark is equally applicable to the two chiefs next mentioned.

DESTROY-TOWN.

Destroy-Town, Go-non-da-gie, "He destroys the town" (more accurately, O-shah-go-non-da-gie), was a leading councilor in his nation, a brave warrior, a man noted

* Miss Johnson's "Iroquois," page 218. See also Letchworth's "History of the Pratt Family."

† Washington, in his narrative of that expedition, mentions a Seneca chief named *Jes-ka-ka-ke*, evidently another form of spelling Little Billy's Indian name.

for the soundness of his judgment, his love of truth, his probity, and his bravery as a warrior. Destroy-Town bore the same name that the Iroquois bestowed on General Washington, who, in consequence of his generosity toward this conquered and despairing people, at the close of the Revolutionary war, was enshrined in their affections and revered not less than William Penn, the just pale-face.

TALL PETER.

Tall Peter, Ha-no-ja-cya, according to the orthography of published treaties and other documents, was also a compeer of the great Seneca orator. His Indian name should be written Wa-o-no-jah-gah, and signified *he has swallowed a tooth*. In middle age he became a Christian, and thereafter led a useful and exemplary life. The few aged Indians who remember him speak of him with respect and affection. He was one of their leading chiefs. I have been able to glean only these few particulars concerning him.

He was a man of gigantic stature, fully 7 feet high, and died and was buried at the mission cemetery some fifty years ago (in Erie, 1834), aged probably about seventy years.

THE NINE UNKNOWN BRAVES BEFORE DESCRIBED.

Near the center of the old mission cemetery, and opposite the main entrance, was a cluster of graves in which were buried Red Jacket and his brother chiefs. The pride and valor and wisdom of the nation, before it became spiritless and moribund, slumbered there. There were no monuments, not even a head-stone, to mark the respective resting places of these aboriginal lords—only a venerable walnut tree, which stretched out its sheltering arms and spread its canopy of foliage over the hallowed spot. Humphrey Tolliver,* an aged runaway slave from Virginia, with his white wife and mulatto children, occupied a cottage and cultivated a few acres of garden land bordering the cemetery grounds. He had lived there many years—when Red Jacket was in his glory and the leader of his people. He continued to reside there long after the last loitering Seneca turned his back upon the ancient seat of his tribe, never more to return. Thereafter Tolliver became the self-appointed sexton of the old graveyard when the crowd of white emigrants surged in to fill the places of the departed Senecas, and he buried the pale-faced dead in the holy ground which had been consecrated as the place of sepulture of the red men. Never could he be induced, however, to consent that the sacred area about the walnut tree should be profaned by the spade of the grave-digger. He would shake his gray head and say, “The big men of the Senecas were buried there.” He knew them well, those silent, composed, and mysterious men, in strange, picturesque garb, and speaking an incomprehensible language. He died a few years since at a very advanced age, and a new custodian of the Indian cemetery—a white man who lacked sensibility and was superior to the weakness of superstition—succeeded to the humble office.

Besides the remains we have been successful in identifying, there reposed in this little area the ashes of Two Guns, Twenty Canoes, John Snow, White Chief, and several other chieftains, all of whom are numbered among the nine undistinguished dead reinterred with Red Jacket in Forest Lawn Cemetery, Buffalo, N. Y., October 9, 1884.—Transactions of the Buffalo Historical Society, vol. 3, 1884.

RED JACKET'S COMPANIONS.

EXHUMING THE REMAINS OF RED JACKET'S FRIENDS IN 1884.

The committee on selection of Indian chiefs for interment made several visits to the old mission cemetery, of which mention has been made, accompanied by the venerable missionary, Mrs. Wright, and by aged Indians who had been long familiar with

*A Virginian; spelled Taliafero.

the locality, some of them related to Red Jacket by ties of blood or marriage. The leading men of the Senecas, before the removal of the tribe from the Buffalo Creek Reservation, lay in graves excavated in a small elevated area, at or near the center of the cemetery. The earth there is a dry loam. The graves were two or more feet deeper than it is the practice now to dig them. They uniformly faced the rising sun. Notwithstanding this sacred spot is the property of the Indians, consecrated to the repose of their dead and those of their faithful missionaries, it has been invaded by the whites, who have buried their deceased friends there in considerable numbers. It was found necessary to tunnel under many of these surreptitious graves in order to rescue the red proprietors who slumbered beneath the strange intruders. About forty graves in all were opened, and all the work was done under the supervision of Henry D. Farwell, esq., the undertaker. Few, if any, articles were found with the remains, save an occasional pipe and the decayed fragments of blankets, broadcloth tunics, silken sashes and turbans, and beaded leggins and moccasins. Exception should be made in the instance of a very young child, whose little head was enwrapped in a voluminous silk handkerchief. In a silken knot close to its ear was a tiny, neatly carved rattle of bone, and on its breast, above the little folded hands, was a small and pretty porcelain drinking cup. But seven of the skeletons could be positively identified, namely, those of Young King, Destroy-Town, Captain Pollard, his wife and his granddaughter, Tall Peter, and Little Billy, the war chief. Nine others, doubtless the remains of warriors famous in their day, were exhumed, buried with them at Forest Lawn, and will be designated as "the undistinguished dead."—Transactions Buffalo, N. Y., Historical Society, vol. 3, 1884.

RED JACKET.

General Ely S. Parker (*Donehogawa*, Open Door), a Seneca, and sachem of the Six Nations, at Buffalo, October 8, 1884, thus spoke of Red Jacket:

It was during the troublous times of the American Revolution that Red Jacket's name first appears. He is mentioned as a messenger, or bearer of dispatches, or runner for the British. He subsequently appears at the treaty of peace, and at all treaties and councils of importance his name is always prominent. He was a devoted lover of his people, and he labored hard for the recognition and restoration to his people of their ancient rights, but in which he was unsuccessful. His political creed did not embrace that peculiar doctrine, now so strongly believed in, that "to the victors belong the spoils." He did not know that the Sullivan campaign had taken from his people all the vested rights which God had given them, and when, subsequently, he was made to understand that a pre-emptive title hung over the homes of his people he was amazed at the audacity of the white man's law which permitted and sanctioned the sale and transfer by one person to another of rights never owned and of properties never seen. From the bottom of my heart I believe that Red Jacket was a true Indian and a most thorough pagan. He used all the powers of his eloquence in opposition to the introduction of civilization and Christianity among his people. In this, as in many other things, he signally failed. So persistent and tenacious was he in his hostility to the white man and his ways and methods that one of his last requests is said to have been that white men should not dig his grave, and that white men should not bury him. But how forcibly now comes to us the verity and strength of the saying that "man proposes, but God disposes." Red Jacket had proposed that his remains should lie buried and undisturbed in the burial place of his fathers. Very soon after his death his people removed from their old lands to other homes. Red Jacket's grave remained unprotected, and ere long was desecrated. Then God put it into the hearts of these good men of the Buffalo Historical Society to take charge of his remains, give him a decent burial in a white man's graveyard, and over his grave to erect a monument which should tell his

story to all future generations. We have this day witnessed and participated in the culmination of their labors. Red Jacket has been honorably reburied with solemn and ancient rites, and may his remains rest there in peace until time shall be no more. While a silent spectator of the ceremonies to-day, the words of the blessed Saviour forcibly presented themselves to my mind, "the foxes have holes and the birds of the air have nests, but the Son of Man hath not where to lay His head." I applied this saying to the Indian race. They have been buffeted from pillar to post. They once owned much, but now have hardly anything they can call their own. While living they are not let alone—when dead they are not left unmolested.

General Parker then exhibited the Red Jacket medal, presented by order of General Washington, President, in 1792. It is of silver, oval in shape, 7 inches long by 5 inches broad. The general had dressed it in black and white wampum; the black indicating mourning and the white peace and gladness.

It was remarked that "the production of this medal was important, because stories, like that about Red Jacket's bones, have for some time been current to the effect that this medal was being exhibited out West years ago. Like Red Jacket's bones, however, it has been carefully preserved, and there is no doubt whatever of its identity."

A copy of the Red Jacket medal in silver is now in the National Museum.

COUNCIL OF THE SIX NATIONS AT BUFFALO, OCTOBER 8, 1884.

At the meeting and council held at the rooms of the Historical Society at Buffalo, N. Y., October 8, 1884 (the first since the conclusion of the Revolutionary war), to make arrangements for the reinterment of Red Jacket and the fifteen other Senecas, General Ely S. Parker, of New York, one of the fifty sachems of the allied Six Nations, made an address. It was especially interesting and affecting to the Indians present, and was interpreted in their dialect by his brother, Chief Nicholas H. Parker. A council was afterwards organized to make final preparations for the reinterment ceremonies. At a few minutes before 4 o'clock the interpreter announced that the bearers selected for Red Jacket's casket were Chiefs Levi Jonathan, an Onondaga; Benjamin Carpenter, a Cayuga; Henry Clinch, an Oneida; John Fraser, a Mohawk; Moses Hill, a Tuscarora, and Andrew Snow, a Seneca. To bear the remains of Destroy-Town were Chiefs John Buck, an Onondaga; Joseph Porter, an Oneida; Thomas Isaac, a Tuscarora, and Peter Powless, a Mohawk. Chiefs David Hill and John Hill, Senecas; Robert David, a Cayuga; the Rev. Zachariah Jemison, a Seneca, were selected to carry the casket of Young King. Chiefs Thomas Lay, Silver Smith, William Jones, and John Jacket, all Senecas, were chosen to bear Little Billy's remains; and Chief Nicholas Parker, a Seneca; John Mountpleasant, a Tuscarora; Thomas David and Thomas Jemison, Cayugas, to carry the bones of Tall Peter. A choir was also selected, and Chief John Buck, from Grand River, Canada, the hereditary custodian of the wampum belts of the Six Nations, was

selected to deliver the address of condolence. The speakers for Music Hall ceremonies for the evening were announced as David Hill, a Seneca; Peter Powless, a Mohawk; John Buck, an Onondaga, and Henry Clinch, an Oneida.

"The casket of Red Jacket was then opened for the last time, and the Indians present viewed the remains, and the council broke up.

"When this council was proposed the Canadian Iroquois at first refused to unite with their estranged brothers residing in New York, but after conference they yielded."

RED JACKET.

Remarks of Ex-Judge George W. Clinton, of Albany, N. Y., at reinterment of Red Jacket, at Buffalo, N. Y., October 9, 1884:

I shall say little touching Red Jacket. His life has been written with an approach to fullness; and he has this day been spoken of with just appreciation, and with an eloquence I cannot hope to reach. The written remnants of his speeches which have come down to us hardly justify his fame as an orator; but their topics and matter shorn, by translation, as they are, of fancy and of all the graces of delivery, corroborate the assertion of the judicious white men who heard him that he was, beyond compare, the most eloquent of all Indian orators. In 1811 De Witt Clinton mentioned him as "an extraordinary orator who had arisen among the Senecas and attained the first distinctions by his eloquence." If he had been as brave as Farmer's Brother he would have been a giant indeed; with the wisdom of his great rival, the Cornplanter, he might have made his nation happy and secure in the paths of industry and peace. But he had no military talent; and, though he loved his nation and was intensely devoted to what he deemed its interests, he utterly mistook the paths that would have led it upward. Washington, in his speech of March, 1792, to the delegates of the Five Nations, assured them that he desired a firm and lasting peace, and that they should "partake of all the comforts of this earth which can be derived from civilized life, enriched by the possession of industry, virtue, and knowledge," and that he trusted that "such judicious measures would then be concerted, to secure to them and their children these invaluable objects, as would afford them cause for rejoicing while they lived." Red Jacket, in his response said: "We believe that the Great Spirit let this island drop down from above. We also believe in His superintendency of the whole island. It is He who gives peace and prosperity, and He also sends evil. But prosperity has been yours. American brothers! all the good which springs out of this island you enjoy. We, therefore, wish that we, and our children and our children's children, may partake with you in that enjoyment." And yet he inveterately opposed all measures, whether secular or holy, that could make them prosperous and happy.

His person was noble, his demeanor dignified, and the intonations of his voice and the graces of his gesture and delivery gave impressiveness to his matter. Albert H. Tracy, who saw him in council only after age and intemperance had enfeebled his powers, applied to him these lines of Milton:

"Deep on his front engraven,
Deliberation sat and public care,
And princely counsel in his face yet shone,
Majestic, though in ruins."

[*Paradise Lost*, ii, 300.

Two somewhat varying accounts are given of his dying directions for his burial. In both the substantial injunction is that he should be interred among his people, and in conformity with their customs. The account approved by Mr. Furniss and adopted by Mr. Conover is beautiful, and so accordant with the character of the man

that I must quote it. When upon his death-bed, in parting with his Christian wife, he said: "When I am dead it will be noised about through all the world. They will hear of it across the waters and say, 'Red Jacket, the great orator, is dead.' * * * Clothe me in my simplest dress, put on my leggins and my moccasins, and hang around my neck the cross I have worn so long and let it lie upon my bosom, then bury me among my people. * * * Your minister says the dead will rise. Perhaps they will. If they do, I wish to rise with my old comrades. I do not wish to rise with pale-faces. I wish to be surrounded by red men." His last wishes have been consulted. The bones of the mighty orator have been rescued from neglect and impending degradation and re-entombed, with mournful ceremonies, by his own people, and he now lies among his old comrades, awaiting the resurrection.

Mr. William Clement Bryant, at the same ceremony at Buffalo, N. Y., October 9, 1884, said:

The remnant of the Senecas, through the humane intervention, were permitted to return to the United States at the end of the war of the Revolution, and rake the embers from their devastated hearths, but they returned as vassals, and no longer a sovereign nation.

Red Jacket returned with them. He was young when the war commenced. We can easily conjure up the figure of the youthful warrior from the shreds of tradition which have come down to us—an Indian Apollo, graceful, alert, quick-witted, fleet of foot, the favorite messenger of British officers to convey intelligence from one military post to another, and who bestowed upon him the traditional scarlet tunic, and caused him to be christened *Otetiani*, or "Always Ready." He acquired no distinction as a warrior during the Revolutionary struggle, for he was born an orator, and, while morally brave, lacked the stolid insensibility to suffering and slaughter which characterized their war captains. We can imagine him, at the end of the war, grown older, wiser in experience and reflection, more ambitious and crafty, with greater confidence in his rich, natural gifts of logic, persuasion, and invective, and attaining, by virtue of these attributes, the chief place of power and influence in his nation—alas! a peeled and broken nation. The repose, however, so essential to the recuperation of this wasted people was denied them. Every breeze wafted to the ears of the Indian hunter the ring of the white man's ax and the crash of falling trees. The restless feet of the pale-faces were on their track, first a slender stream of traders and adventurers, many of them seeking the far woodland solitudes as a shelter from outraged and pursuing justice; then a tide of immigrants ever waxing in volume until the Seneca territory was islanded by a sea of covetous, hungry pale-faces.

Red Jacket was no longer the petted though humble *Otetiani*, but the *Sagoyewaiha* of his tribe; the "keeper-awake" of a broken, war-wasted people fast lapsing into that comatose state which only by a little precedes dissolution. He loved his people, who were still the proprietors of a magnificent domain. He yearned over them as a hunted lion over its whelps. The efforts of the "gamblers," as he aptly termed the land speculators, and the companies endowed with incomprehensible rights of pre-emption, to dispossess the ancient lords of the soil, lashed his soul into fury. He hated the enemies of his people with fierce and unrelenting hatred, and he consecrated the remaining years of his life to the work of baffling their mercenary schemes. Inconceivably difficult was the task. He could neither read nor speak English, nor any other language spoken by the whites, and yet his speeches in council, mutilated fragments of which still remain, disclose an acute and lofty intellect, a vigorous understanding, a marvelous memory, an imagination and wit electric and phenomenal. His logic was as keen as a Damascus blade; he was a master of satire and invective; he thoroughly understood the windings and intricacies of what we term human nature. His denunciation had the terrible vehemence of the thunderbolt, and anon his oratory would be as grateful and caressing as the zephyrs of midsummer. Replying to Mr. Ogden, the head of the great Ogden Land Company, he exclaimed with in-

effable scorn, "Did I not tell you the last time we met that whilst Red Jacket lived you would get no more land of the Indians? How, then, while you see him alive and strong," striking his hand violently on his breast, "do you think to make him a liar?"

Often the fierceness of his temper, the righteous indignation that swelled his bosom, impelled him to hurl defiance at his foes, and to use language the possible consequences of which caused the more timid and abject of his followers to tremble with apprehension. But Red Jacket would retract not a single word, although a majority of the chiefs would sometimes secretly deprecate the severity of his utterances. Again, on other occasions, sorely beset and almost despairing, he would essay to melt the hearts of the pitiless pursuers of his people, and give utterance to such touching words as these: "We first knew you a feeble plant which wanted a little earth whereon to grow. We gave it to you—and afterward, when we could have trod you under our feet, we watered and protected you, and now you have grown to be a mighty tree, whose top reaches the clouds, and whose branches overspread the whole land; whilst we, who were then the tall pine of the forest, have become the feeble plant, and need your protection."

Again, assuming the pleading tones of a suppliant, he said, "When you first came here you clung around our knee, and called us *father*. We took you by the hand and called you *brothers*. You have grown greater than we, so that we no longer can reach up to your hand. But we wish to cling around your knee and be called *your children*."

Anon, pointing to some crippled warriors of the war of 1812, among the Indian portion of his auditors, and, blazing with indignation, he exclaimed: * * * "It was not our quarrel. We knew not that you were right. We asked not. We cared not. It is enough for us that you were our brothers. We fought and bled for you. And now [pointing to some Indians who had been wounded in the contest], dare you pretend that our father, the President, while he sees our blood running yet fresh from the wounds received while fighting his battles, has sent you with a message to persuade us to relinquish the poor remains of our once boundless possessions—to sell the birthplace of our children and the graves of our fathers? No! Sooner than believe that he gave you this message, we will believe that you have stolen your commission, and are a cheat and a liar!"

In debate Red Jacket proved himself the peer of the most adroit and able men with whom he was confronted. He had the provisions of every treaty between the Iroquois and the whites by heart. On a certain occasion, in a council at which Governor Tompkins was present, a dispute arose as to the terms of a certain treaty. "You have forgotten," said the agent; "we have it written down on paper." "The paper then tells a lie," rejoined Red Jacket. "I have it written down here," he added, placing his hand with great dignity upon his brow. "This is the book the Great Spirit has given the Indian; it does not lie!" A reference was made to the treaty in question, when, to the astonishment of all present, the document confirmed every word the unlettered statesman had uttered. He was a man of resolute, indomitable will. He never acknowledged a defeat until every means of defense was exhausted. In his demeanor toward the whites he was dignified and generally reserved. He had an innate refinement and grace of manner that stamped him the true gentleman, because with him these virtues were inborn and not simulated or acquired. He would interrupt the mirthful conversation of his Indian companions by assuring their white host that the unintelligible talk and laughter to which he listened had no relevancy to their kind entertainer or their surroundings.

At the outset Red Jacket was disposed to welcome civilization and Christianity among his people, but he was not slow to observe that proximity to the whites inevitably tended toward the demoralization of the Senecas; that to preserve them from contamination they must be isolated from the influence of the superior race, all of whom, good and bad, he indiscriminately classed as Christians. He was bitterly opposed by the missionaries and their converts. He could not always rely upon his constituency, torn as they were by dissensions, broken-spirited, careless of the future,

impatient at any interruption of present gratification, and incapable of discerning, as he did, the terrible, inexorable destiny toward which they were slowly advancing.

In this unequal and pitiable struggle to preserve the inheritance and nationality of his people, his troubled and unhappy career drew slowly to its close. The keen and subtle intellect, that resolute soul which, David-like, unpanoplied, without arms or armor, save the simple ones that nature gave, dared encounter the Goliaths of the young republic, were dimmed and chilled at last. Advancing years and unfortunate excesses had accomplished their legitimate work.* The end to that clouded and melancholy career was fast approaching. But until the close, when death was imminent, he had no concern or thought which did not affect his people. He visited them from cabin to cabin, repeating his warnings and injunctions, the lessons of a life devoted to their interests, and bade them a last and affectionate farewell. He died calmly, like a philosopher, in the arms of the noble Christian woman who has made this society the custodian of his sacred relics. He was a phenomenon, a genius, with all the frailties and all the fascination which that word implies—in natural powers equal to any of the civilized race.

Granted that he was vain; granted that he sometimes dissembled like one of our modern statesmen; granted that toward the close of his unhappy life he partook too often of that Circean cup which has proved the bane of so many men of genius of every race, we cannot change our estimate of his greatness; he remains still the consummate orator, the resolute, unselfish patriot, the forest statesman centuries in advance of his race; the central figure in that little group of aboriginal heroes which stands out in lurid relief on the canvas of American history.

He has been fitly called "The last of the Senecas."

RED JACKET (FROM ALOFT).

BY WALT WHITMAN.

(Impromptu, on Buffalo City's commemoration of, and monument to, the old Iroquois orator, October 9, 1884.)

Upon this scene, this show,
Yielded to-day by fashion, learning, wealth,
(Nor in caprice alone—some grains of deepest meaning,
Haply, aloft (who knows?), from distant sky-clouds' blended shapes,
As some old tree, or rock, or cliff, thrill'd with its soul, earth direct—a towering human form,
Produced of Nature's sun, stars,
In hunting-shirt of film, arm'd with the rifle, a half-ironical smile curving its phantom lips,
Like one of Ossian's ghosts looks down.

CAMDEN, N. J., October 9, 1884.

ANECDOTE OF RED JACKET, PERSONAL APPEARANCE AND DRESS.

October 27, 1878.—Spent most of the day in the cabin and on the grounds of Ruth Stevenson, which latter were the site of one of the villages belonging to the extinct Kah-kwahs or Neutrals, and are rich in relics of that lost people. Ruth said that her step-father, Red Jacket, scarcely ever smiled, although far from being a morose man. His forehead was bald; back from the middle of the crown the hair was thick and long, reaching down below his shoulders. This he invariably wore in the form of a single braid. It was Ruth's office to braid the old man's locks every morning. Formerly they took their meals squatted on the floor, and, when the weather was warm, on the grass under the trees. They were often surprised at such times by white visitors.

*My friend Hon. Lewis F. Allen criticises this expression, claiming that, while Red Jacket drank deeply at times, it was only occasional and never when public affairs demanded his attention, that the opprobrious word drunkard could not justly be applied to him. Consult Stone's *Life of Red Jacket*; also publications Buffalo Historical Society, vol. 1, p. 351 (Hon. Orlando Allen).

Once when they were dining in this primitive fashion, her mother looked up and exclaimed, in Seneca, "See, two carriages are approaching, filled with white people!" At the same time she arose to withdraw from their too curious gaze. Red Jacket replied, "Stay, do not go. The white people are obliged to eat as well as we. There is no cause for shame or fear." The mother, however, insisted on retiring. The strangers, among whom were several ladies, alighted from the carriage, came up and saluted Red Jacket, who, although attired simply in his blouse and moccasins, arose with great dignity, bowed, and shook hands with each, and with the grace of a courtier.

A few days afterward Red Jacket walked to the village of Buffalo, and at sundown his wife and the children descried him in the near distance bearing on his back a large cherry dining-table, which he soon placed before his wife, saying, "Now, mother, we can eat like white folks." After this all their meals were spread on this table, which Ruth still keeps and which she exhibited to me.

Red Jacket, she said, was quite fair, lighter in complexion than most Indians. Her mother would sometimes playfully taunt him with being half-white, saying he was of too light a hue for a pure Indian. This invariably caused him to exhibit a mild irritation.

Red Jacket would say that he was the last of his family, having survived all his children, his brothers and sisters. Nevertheless, after his death a considerable number of Indians participated in the ten days' funeral feast customary among the Iroquois when a leading chief dies, and claimed a share in the distribution of his effects.

He had no ornaments, save the Washington medal, but the medal and his wardrobe were claimed by members of his clan who are accounted relatives among the Iroquois. The late chief, Jemmy Johnson, was heir to the medal presented to the old chief by General Washington; by him it was transmitted to General Ely S. Parker, the present owner of this precious relic. The cross, set with precious stones, and which history affirms Red Jacket desired to be buried with him, Ruth had never seen, and it is probably apocryphal.

His forehead was high and expansive; it retreated but little, if at all.—B. Extract from a diary.

A GLIMPSE OF RED JACKET'S FAMILY AND TRIBESMEN IN 1794, AT THE COUNCIL AT CANANDAIGUA.*

Fifth day, October 30, 1794.—After dinner, John Parish and myself rode to view the Farmer's Brother encampment, which contained about 500 Indians. They are located by the side of a brook, in the woods; having built about seventy or eighty huts, by far the most commodious and ingeniously made of any that I have seen. The principal materials are bark and boughs of trees, so nicely put together as to keep the family dry and warm. The women as well as the men appeared to be mostly employed. In this camp there are a large number of pretty children, who, in all the activity and buoyancy of health, were diverting themselves according to their fancy. The vast number of deer they have killed since coming here, which they cut up and hang round their huts, inside and out, to dry, together with the rations of beef which they draw daily, give the appearance of plenty to supply the few wants to which they are subjected.†

The ease and cheerfulness of every countenance, and the delightfulness of the afternoon, which these inhabitants of the woods seemed to enjoy with a relish far superior to those who are pent up in crowded and populous cities, all combined to make this the most pleasant visit I have yet made to the Indians, and induced me to believe *that before they became acquainted with white people, and were infected with their vices, they*

*Diary of William Savary, Friends' Library, vol. 1, pages 370-382.

†On another page of this journal Mr. Savary says they sometimes killed more than a hundred deer in a day.

must have been as happy a people as any in the world. In returning to our quarters we passed by the Indian council, where Red Jacket was displaying his oratory to his brother chiefs, on the subject of Colonel Pickering's proposals.

On another page Mr. Savary says of the orator :

Red Jacket visited us with his wife and five children, whom he had brought to see us. They were exceedingly well clad, in their manner, and the best behaved and prettiest Indian children I have ever met with.

Rev. Dr. Breckenridge had an interview with Red Jacket and his brother chiefs at the residence of General Porter at North Buffalo in 1821. He says: "Red Jacket was dressed with much taste in the Indian costume throughout. He wore a blue dress, the upper garment cut after the fashion of a hunting-shirt, with blue leggins, very neat moccasins, a red jacket, and a girdle of red about his waist. I have seldom seen a more dignified or noble-looking body of men than the entire group."—*Stone's Life of Red Jacket*, page 400.

RED JACKET'S DISAPPOINTED AMBITION, AND AS TO ARISTOCRACY IN INDIAN TRIBES.

[From Transactions Buffalo Historical Society, vol. 3, 1885.]

The following exceedingly interesting letter from General Parker was in response to a letter of inquiry addressed to him, and which grew out of a remark of his, when in Buffalo in October, 1883, in attendance at the obsequies, to the effect that Red Jacket's greatest disappointment was in not attaining to a place among the fifty Great League sachems :

NEW YORK, November 26, 1884.

WILLIAM C. BRYANT, Esq.,

Buffalo, N. Y. :

DEAR SIR: * * * I will now, however, respond as briefly as I can to your queries respecting Red Jacket. You say you "have always been led to believe that Red Jacket did not belong to any of the noble or aristocratic families in which the title or distinction was hereditary." Also, "was his mother of noble birth," &c. Let me disabuse your mind of one matter in the outset. Such a thing as aristocracy, nobility, class caste, or social grades was unknown among the Iroquois. A political superiority was, perhaps, given by the founders of the league to the Mohawks, Onondagas, and Senecas, who were styled "brothers," and were addressed as "fathers" by the Oneidas and Cayugas, who also were "brothers" and yet "children." Nor were the Turtle, Bear, and Wolf clans invested with the first attribute of nobility or aristocracy because they were also the elder brothers and cousins to the other clans. I am of the opinion that no purer and truer democracy, or a more perfect equality of social and political rights, ever existed among any people than prevailed among the Iroquois at the time of their discovery by the whites. Often at that time and since persons attained positions of prominence and power by their superior intellectual abilities or their extraordinary prowess and success on the war-path. (Conspicuous examples of this fact are Joseph Brandt and Red Jacket.) Successes of this kind, however, brought only temporary and ephemeral distinction to him, his family, his relations, his clan, and, perhaps, reflected some honor on his tribe. But this accidental or fatuitous distinction was not transmissible as a rightful or hereditary one, and was retained only so long as the intellectual superiority, military prowess, or personal bravery could be maintained by the person or family.

When declining years broke one's intellectual and physical powers some younger person immediately dropped in to fill the gap, and the old warrior or councilor fell away into obscurity. Thus it is easily seen how the hand of power and distinction

could be constantly shifted from one person or family to another, and could never remain settled longer than he or they were able to uphold the qualities entitling them to the supremacy. The founders of the league may or may not have considered this question in the organization they made. They perfected a confederacy of tribes, officered by forty-eight hereditary sachems or peace men and two hereditary military sachems or chieftains. They ignored the individuality of persons (except Tododaho) and families and brought the several tribes into the closest relationship by the establishment of common clans or totemships, to whom was confided the hereditability of the league officers. It was a purely accidental circumstance that some of the clans in some of the tribes were not endowed with sachemships and that others got more than one. But because some of the clans got more than one sachem, and that a family in that clan was temporarily intrusted with the care of it, the clan or family were not in consequence thereof ennobled or made aristocratic. Bear in mind this fact, a sachemship belongs to a clan and is the property of no one family. Honorary distinctions are only assumed by the tribes of clans from the fact that the league makers gave them the rank of the elder or younger, and the family government and gradation of kinship was introduced to bring the same more readily to their comprehension, understanding, and remembrance.

This idea of Indian social grades with titles is all a vain and foolish fancy of the early imaginative writers, who were educated to believe in such things; and the idea is retained, used, and still disseminated by our modern susceptibles who love and adore rank and quality, and who give and place them where none is claimed. I do not deny that *royaner* in the Mohawk means lord or master, but the same word, when applied to terrestrial or political subjects, only means councilor. The Seneca word is *hoyarna*, councilor—*hoyarnagowar*, great councilor. These names are applied to the league officers only, and the term "great" was added to designate them more conspicuously and distinguish them from a great body of lesser men who had forced themselves into the deliberations of the league councilors. The term *hāsānowaneh* (great name) is given to this last great body of men, a body now known as chiefs. They were never provided for and, as I believe, were never contemplated by the league originators, but they subsequently came to the surface, as I have hereinbefore set forth, and forced a recognition of their existence upon the "great councilors," and, on account of their following and ability, were provided with seats at the council board.

Red Jacket was one of these "chiefs." He was supremely and exclusively intellectual. He was a walking encyclopedia of the affairs of the Iroquois. His logical powers were nearly incontrovertible, at least to the untutored Indian generally. In his day, and to the times I am referring, the "Great Councilor's" word was his bond; it was of more weight and consequence than the word of a chief. Red Jacket knew this well, and, while he could not be made a league officer, he used every means which his wisdom and cunning could devise to make himself appear not only the foremost man of his tribe but of the league. He was ever the chosen spokesman of the matrons of tribes. He was spokesman of visiting delegations of Indians to the seat of Government, whether State or Federal. In the signing of treaties, though unsuccessfully opposing them in open council, he would secretly intrigue for a blank space at or near the head of the list of signers, with a view, as the Indians asserted, of pointing to it as evidence that he was among its early advocates, and also that he was among the first and leading men of his tribe. He was even charged with being double-faced and sometimes speaking with a forked tongue. These and many other traits, both good and bad, which he possessed worked against him in the minds of his people, and interposed an insurmountable bar to his becoming a league officer.

After the war of 1812, whenever Red Jacket visited the Tonawanda Reservation, he made my father's house his principal home, on account of his tribal relationship to my mother, who was of the Wolf clan. My father and his brother Samuel were both intelligent men, and knew and understood the Indians well, and were also fairly versed in Indian politics. During my early youth I have heard them discuss

with other Indians the matters above referred to, and, while they always agreed as to the main facts, they generally differed only as to the underlying motives and intentions of Red Jacket in his various schemes.

White men visiting Indians for information usually ask specific questions, to which direct and monosyllabic answers are generally given. Seldom will an Indian go beyond a direct answer and give a general or extended reply; hence, I am not surprised that you had never heard anything respecting my statement, for as such a thing has never occurred to you, you have never thought to ask concerning it. The fact, however, remains the same, and I do not consider it derogatory of or a belittling of Red Jacket's general character. Men of mind are nearly always courageous and ambitious. Red Jacket was not an exception.

You suggest the performance on my part of an act which is simply impossible. The words sachem, sagamore, chief, king, prince, cazique, queen, princess, &c., have been promiscuously and interchangeably used by every writer on Indians ever since their discovery. I have seen three of the above terms used in one article with reference to one and the same person, showing great looseness and want of discrimination in the writer. Yourself, let me say, mentions John Mt. Pleasant as "the principal hereditary sachem of the Tuscaroras." Now, my classification of Iroquois officers would be to rank the fifty original councilors as sachems, because they are the highest officers of the league. I would not use the term sagamore, because its use is almost wholly New England, and has been applied promiscuously to heads of bands, large and small, and sometimes to mere heads of families. To use other terms, such as king, prince, or princess (see King Philip, King Powhattan, and Princess Pocahontas), is preposterous and presumptuous, considering the total absence among these people of the paraphernalia, belongings, and dignity of royalty. My classification is: League officers, fifty in numbers, "*sachems*;" all others "*chiefs*." The Tuscaroras, for certain reasons, were not admitted to a perfect equality in the league. They were not granted sachemships. Hence, Mt. Pleasant is not a sachem, only a chief. His talent and character might, indeed, constitute him the head chief of his tribe, but I doubt if his successor in name would take the same rank or exercise the same influence over the tribe that he does. Besides, the sachems alone can exercise a general authority in the league, while the chiefs' authority is confined to their respective tribes or bands. To invent a new name now for our fifty league officers would produce endless confusion in papers and books relating to them and their affairs. The task is too herculean to undertake.

Pardon me for having been so prolix. I may also have failed to make myself understood, for I have been compelled for want of time to leave out a great deal of explanatory matter. But you are such a good Indianologist that I feel certain of your ability to comprehend me.

I am, with respect, your obedient servant,

ELY S. PARKER.

264. (), Deep Lake; an old chief. Painted in 1830. (No plate.)
 265. (), Round Island; warrior, half-blood. Painted in 1830. (No plate.)
 A very handsome fellow.
 266. (), Hard Hickory; a very ferocious looking, but a mild and amiable man. Painted in 1829.
 (Plate No. 204, page 104, vol. 2, Catlin's Eight Years.)
 (See description below.)
 267. (), Good Hunter; a warrior. Painted in 1829.
 (See Plate No. 203, page 104, vol. 2, Catlin's Eight Years.)

Of this picture, and of No. 204, Hard Hickory, Mr. Catlin, page 104, volume 2, Catlin's Eight Years, writes:

Good Hunter (Plates Nos. 203, 267) and Hard Hickory (Plates Nos. 209, 266) are fair specimens of the warriors of this tribe, or rather hunters; or, perhaps, still more cor-

rectly speaking, *farmers*, for the Senecas have had no battles to fight lately, and very little game to kill, except squirrels and pheasants, and their hands are turned to the plow, having become, most of them, tolerable farmers.—G. C., 1829.

268. (), — String; a warrior, renowned. Painted in 1829. (No plate.)

269. (), Seneca Steele; a great libertine. Hatchet in his hand. Painted in 1829. (No plate.)

MR. W. C. BRYANT'S NOTES ON THE SENECA, 1884.

They (the Senecas) met our pioneer fathers in amity, and divided with them their slender store of corn and venison. They freely shed their blood for us on this frontier in the second war for independence. They are now nearly all wasted away, and the once proud and warlike Senecas will soon be classed with the tribes and races of men that were, but shall be no more.*

At the period of the breaking out of hostilities in the Revolutionary war (1775) the Senecas had reached the highest state of tranquility and happiness which a savage race can be permitted to attain. The bulk of their population dwelt in the valley of the Genesee (New York State) and on the shores of the contiguous lakes—a region of marvelous beauty and fertility. The Genesee country has been aptly termed the paradise of the red men. The Indian's appreciation of its transcendent loveliness is embodied in the imperishable name which he bestowed upon it, Gennisheyo, "the shining or beautiful valley."

Their history, and that of their kindred and confederate tribes (composing the Iroquois or Six Nations) is inextricably interwoven with our earlier annals. They constituted the most gifted and powerful member of the American aboriginal family. For generations they formed an impregnable barrier against the restless, daring, and ambitious designs of the French. Their fidelity and valor largely determined the destinies of the continent.

The outbreak of the revolution (1775) did not alone check the new impulse among the Senecas toward progress; it was the signal for the downfall of the whole Iroquois confederacy. The Senecas, denying their ancient traditions, had wisely resolved upon a position of neutrality at the beginning of the contest. Partly by artifice, partly by fervent appeals to that covenant chain which had so long bound them to the British, they were induced so give their allegiance reluctantly to the latter. They had no concern in the quarrel, and the issue, if unfavorable to Britain, involved irretrievable disaster to her humble allies. The long and bloody war, the desolating campaign of Sullivan, signalized by the merciless destruction of their dwellings, orchards, crops, domestic animals, and all their wealth, save the blackened soil; the winter of unexampled rigor that followed, and which rendered recourse to the chase, as a means of subsistence impossible, was fatal to the Seneca Nation. The Mohawks and the bulk of the other confederate tribes, save the friendly Oneidas and the Senecas, followed the British flag to Canada.

MR. CATLIN'S NOTES ON THE SENECA INDIANS.

One thousand two hundred in number, at present, living on their reserve near Buffalo, and within a few miles of Niagara Falls, in the State of New York. This tribe formerly lived on the banks of the Seneca and Cayuga lakes; but, like all the other tribes who have stood in the way of the "march of civilization," have repeatedly bargained away their country, and removed to the West, which easily accounts for the origin of the familiar phrase that is used amongst them, that "they are going to the setting sun."

* There are very few Senecas of the full blood now living—perhaps less than a score. The white blood predominates in the veins of the majority of the "Nation."—W. C. B.

There are now no better people to be found than the Seneca Indians; none that I know of that are by nature more talented and ingenious, nor any that would be found to be better neighbors if the arts and abuses of white men and whisky could be kept away from them. * * *

This tribe, when first known to the civilized world, contained some eight or ten thousand, and from their position in the center of the State of New York, held an important place in its history. The Senecas were one of the most numerous and effective tribes constituting the compact called the "Six Nations."

MR. JACKSON'S NOTES ON THE SENECA.

One of the five (afterwards six) Iroquois Nations in Western New York, comprising originally the Sinnekas, as the Dutch call them (hence the word Senecas), Onondagas, Mohawks, Cayugas, and Oneidas. When first known to the French, were living on the south side of Lake Ontario, and engaged in a fierce war with their Algonkin neighbors. By conquest several other tribes became incorporated with them. Missions were established among them by the French as early as 1657. In 1763 the Senecas alone, of the Six Nations, joined in Pontiac's league to extirpate the English. During the Revolution sided with the English, but made a peace in 1784, and during the second war remained loyal. Early in the century part of the tribe settled in Ohio, afterward removing to the Indian Territory in 1877, where they now are to the number of 240 [in 1885, 225]. The New York Senecas still occupy the Allegany, Cattaraugus, and Tonawanda Reserve of 66,000 acres, where they all live in good houses [in 1885, about 2,180 in number] and have large, well-cultivated farms, and are in every way a civilized and well-regulated class of people—W. H. Jackson, 1877.

(See also title Iroquois, pages 125, 178, herein.)

LOCATION AND NUMBER.

Senecas: At Quapaw Agency, Indian Territory, in 1884, 225; in 1885, 239; at Allegany Reserve, New York, in 1884, 793; in 1885, 856; at Cattaraugus Reserve, New York, in 1884, 1,310; in 1885, 1,303; Cornplanter Reserve, New York, in 1884, 800. In all, in 1884, 2,408; in 1885, 2,398.

The Senecas in New York State are civilized, and those at Quapaw Agency fairly so. They are farmers and herders. They are all annuity Indians; some few of them are of pure Seneca blood.

O-NEI-DA.

[Oneida: Laws of the United States. Oneida: Indian Bureau, June, 1885.]

Remnant of a tribe, State of New York, one of the Six Nations; present number, 600.

Mr. Catlin visited them in 1829-'30.

270. (), Bread; the chief, half-blood, civilized.

A fine looking and an excellent man. Painted in 1830.

(Plate No. 201, page 103, vol. 2, Catlin's Eight Years.)

The remnant of a numerous tribe that have been destroyed by wars with the whites—by whisky and small-pox, numbering at present but five or six hundred, and living in the most miserable poverty, on their reserve in the State of New York, near

Utica and the banks of the Mohawk River. This tribe was one of the confederacy called the Six Nations, and much distinguished in the early history of New York. The present chief is known by the name of *Bread* (Plate No. 201). He is a shrewd and talented man, well educated, speaking good English; is handsome, and a polite and gentlemanly man in his deportment.

(Also see Senecas and Iroquois, pages 154, 178, herein.)

LOCATION AND NUMBER.

Oneidas at Green Bay Agency, Wisconsin, 1884, 1,500; in August, 1885, 1,595. They hold their lands in common.

Agent D. P. Andrews writes September 1, 1884:

The Oneidas reside upon their reserve near Green Bay, in Brown County, Wisconsin. They are comparatively self-sustaining, and receive only \$1,000 per annum from the Government under treaty stipulations, besides being furnished six day-school teachers without cost to the tribe. Referring to the report of the Commissioner of Indian Affairs for the year 1865, it will be seen that the Oneidas then numbered by the then last census 1,064, while in December last the annuity pay-roll shows that the tribe numbers 1,623, an increase of 564, or nearly one-third of the present number of the tribe. Farming is the principal avocation of these people and the present season they are blessed with a bountiful harvest.

THE LANGUAGE SPOKEN.

A mistake has clearly been made in the earlier reports of this tribe as to their speaking the English language, for at this time it will be found that nearly the whole of the tribe speak the Oneida dialect at home and when conversing with each other, and their children are reared to hear scarcely any other spoken language, except when at school, which renders their school progress slow with this double burden.

Oneidas at Oneida Reserve, New York, in 1884, 172; in August, 1885, 170; Oneidas at Onondaga Reserve, New York, in 1884, 70; in August, 1885, 73, and a few in Canada, all civilized, and all annuity or self-supporting Indians. Total in United States in 1884, 1,742; in 1885, 1,838.

TUS-KA-RÓ-RA.

[Tuscaroras: Laws of the United States. . Tuscaroras: Indian Bureau, June, 1885.]

New York, remnant of a numerous tribe, one of the confederacy of the Six Nations; present number 500; semi-civilized.

Mr. Catlin visited them in 1829-'30.

271. *Cú-sick*, ———; son of Cusick, the chief. Civilized and Christianized.

This man is a Baptist preacher, and quite an eloquent man, and is a very talented man. He was educated for the pulpit. Painted in 1830.

(Plate No. 202, page 104, vol. 2, Catlin's Eight Years.)

CUSICK AS AN ARTIST.

"There is, or was, an Indian artist, self taught, who, in a rude but most graphic drawing, exhibited upon canvass the events of a treaty

between the white men and an Indian tribe. The scene was laid at the moment of settling the terms of a compact after the proposals of our Government had been weighed, and well-nigh rejected by the Indians. The two prominent figures in the front ground were an Indian chief, attired in his peculiar costume, standing in a hesitating posture, with a hand half extended toward a scroll hanging partly unrolled from the hand of the other figure. The latter was an American officer in full dress, offering with one hand the unsigned treaty to the reluctant savage, while with the other he presents a musket and bayonet to his breast. This picture was exhibited some years ago near Lewistown, New York, as the production of a man of the Tuscarora tribe, named Cusick. It was an effecting appeal from the Indians to the white man, for although, in point of fact, the Indians have never been compelled by direct force to part with their lands, yet we have triumphed over them by our superior power and intelligence, and there is a moral truth in the picture, which represents the savage as yielding from fear that which his judgment and attachments would have withheld."—McKenney & Hall, vol. 1, page 2.

MR. CATLIN'S NOTES ON THE TUSCARORAS INDIANS.

Another of the tribes in the confederacy of the Six Nations, once numerous, but reduced at present to the number of 500. This little tribe are living on their reserve, a fine tract of land, near Buffalo, in the State of New York, and surrounded by civilized settlements, many of them are good farmers, raising abundant and fine crops.

LOCATION AND NUMBERS.

Tuscaroras, on Cattaraugus Reserve, New, York, in 1884, 4; Tuscaroras, on Tuscaroras Reserve, New York, in 1884, 419; in 1885, 414, and some in Canada. In all, in 1884, 423; in 1885, 414.

IROQUOIS—THE SIX NATIONS.

First called the "Five," and afterwards the "Six" Nations, living now in New York and Canada. In 1650 they numbered 25,000. The confederation of the Six Nations had an established system of government. Each tribe had its own law-making assembly. A congress of representatives of all of the Six Nations met and enacted laws for the regulation of affairs of the confederacy. Unanimous consent was requisite to pass a law in this congress.

The Five Nations were the Senecas, Mohawks, Oneidas, Onondagas, and Cayugas. After 1712 the Tuscaroras became members of the league, and it became known as the Six Nations. The Hurons and Wyandots belong to the same linguistic group. (See "League of the Iroquois," by Lewis H. Morgan, 1851, and "Colden's History of the Five Nations.")

The Iroquois were the most powerful and highest developed of any of the North American Indians. They lived in towns or villages, and were agriculturists. They were a warlike people. Many of their leaders were men of rare courage, judgment, and eloquence. Brant was a

Mohawk, Red Jacket a Seneca. In the war of the Revolution, 1776–1783, the Iroquois were on the English side, and against the colonists. In 1779 General Sullivan, an American colonial commander, gave them a dreadful defeat, and about extinguished the power of the confederation.

MIGRATION TO CANADA.

Near the close of the Revolutionary war a large portion of the Six Nations went to Canada; about 2,000 of the Mohawks now reside on a reservation given them by the British Government for their military services in aid of the Crown in the war of the Revolution on Grand River, in Ontario, Canada. Brant lived there until his death. The town of Brant, Canada, where a monument was raised to him in 1883, was named after him. With them are some Tuscaroras and others of the Six Nations; all of them are civilized.

August 27, 1885, the Six Nations at Brantford, Canada, at the Grand River superintendency, in charge of Col. J. T. Gilkison, numbered 3,442, a decrease of 6 during the year; but within twenty-two years past they have increased more than 500.

PRESENT LOCATION AND CONDITION OF THE SIX NATIONS IN THE UNITED STATES.

Name of tribe and location.	1884.	1885.
Senecas:		
At Quapaw Agency, Indian Territory.....	225	239
Allegany Reserve, New York.....	793	856
Cattaraugus Reserve, New York.....	1,310	1,303
Complanter Reserve, New York.....	80
In all.....	2,408	2,398

In all.....	423	419
Total.....	5,049	5,110

The map of Indian reservations in 1885, herein, will show the locations of reserves and tribes.

NAMES AMONG THE IROQUOIS.

Little consequence is attached to personal names among the Iroquois. Such names are clan property, but liable to be superseded by newly invented ones.

NEW YORK, *February 17, 1885.*

WM. C. BRYANT, Esq., *Buffalo, N. Y. :*

* * * * *

DEAR SIR: I agree with Mr. Hale most emphatically that "time inevitably brings" great changes in languages. The Iroquois is not now spoken as it once was. Many words have become obsolete and new ones have been introduced. Nor is there any doubt that many proper names have become disused. Onas, the name of "Penn," is no longer used, and I have never found a Seneca in my day who could tell me anything about Onas. Yet the fact is beyond question that William Penn was called Onas, and that the name signified a *quill*. All Iroquois names are clan names, and those given to and which appertain exclusively to children were never regarded as of much consequence. Children's names and adults' names were not necessarily continuous from generation to generation. Old ones were dropped and new ones adopted at any time. Dreams were sometimes at the bottom of changes, sometimes they were bestowed for friendship's sake, and sometimes it was a personal whim or fancy. I will not assert it as a fact, but I will say that I do not believe the name Otetiani has ever been borne by any other Iroquois since Red Jacket's youth, so little consequence is attached to names by the Indians. The only Iroquois names to which a perpetuity is attached are those of the fifty sachems or league officers, and these only because they are so nominated in the organic law of the league, which our fathers taught us were immutable and unchangeable. To make myself more clearly understood, but with no intention of egoism, I will cite my own case. From my earliest recollection, and up to the day I was promoted and installed as one of the fifty sachems, I bore the name Häsānoandü. That name was then shed or cast off, and as completely forgotten by the Indians as if it had never been, and I have never heard that it has ever been deemed worthy to be bestowed upon any other young Indian.

* * * * *

Your obedient servant,

DONEHOGAWA, or ELY S. PARKER.

ORIGIN OF THE NAMES OR TITLES OF THE FIFTY ORIGINAL IROQUOIS SACHEMSHIPS.

Whoever has read Mr. Morgan's "League of the Iroquois" must naturally have been struck with the whimsical names which the founders of the confederacy bestowed on the fifty hereditary sachemships, such as (interpreted into English) "War-club-on-the-ground," "At-the-great-river," "Falling-day," "Dragging-his-horns," "Hanging-up-rattles," "A-man-with-the-headache," "On-the-watch," "Wearing-a-batchet-in-his-belt," &c. The explanation is very simple. During my childhood I often heard the tradition concerning this matter from the lips of aged Indians who were the repositories of the legends and lore, handed down from father to son, for countless generations among my tribe.

After the scheme of a confederacy of the different Iroquois tribes, or "nations," had been perfected by Hiawatha and his partisans, and the reluctant assent of the redoubtable Onondaga chief Todadaho (Atotarho) been obtained, the fifty hereditary sachems who were to administer the affairs of the new Indian empire were selected from the different nations. The number was not equally apportioned among the tribes. For instance, to the Onondagas were assigned fourteen sachemships, while the Senecas had only eight; but as unanimity was a requisite of every decision of this forest senate, it mattered little. A wise old chief from the more eastern tribes, possibly Hiawatha himself, was chosen and instructed to journey westward and ap-

prise the several nominees to the great office of league-sachem of their selection. He was also invested with the prerogative of inventing and conferring the permanent titles of these sachemships. He wisely resolved that, instead of leaving it to his fancy or invention, he would let chance, or what we call providence, suggest and determine the name, and he proceeded on the westward trail to fulfil his mission. When he came to the wigwam of a family thus to be honored he gave the elected head of the household a sachem name or title, which was to be hereditary and last as long as the league should endure, and which was suggested by his appearance, his occupation at the moment of encountering him, his condition and natural surroundings at the time. For instance, calling at the lodge of one of the Mohawk nominees, the messenger surprised the former in the act of hanging up on the ceiling of the wigwam the fawn-hoof rattle-bracelets which warriors wore on their ankles in the war-dance. He was henceforth invested with a title which, translated into English, signifies "Hanging up rattles." His successor in office to-day wears the same name. Another upon whom he called, impressed him by his lofty intellectual forehead, and "High Forehead" became his title. Another, a Seneca, was surprised in the act of mending his moccasins and exasperated at the accidental breaking of his bone needle; the title of his office became "The Needle Breaker."

The foregoing explanation is ingenious and probably true. I have heard that the titles of barons and other nobles in the old country had their origin in just such trivial circumstances.*

Alas! so much has perished of the unwritten traditions of my people, and so much is being enshrouded in the thickening darkness of a night which will know no morning.—Mrs. Caroline Mt. Pleasant (Ge-goh-sa-sah, Wild Cat) in Transactions Buffalo Historical Society, vol. 3, 1885.

SIX NATIONS IN CANADA.

The following data in relation to the Six-Nation tribes now in Canada, together with an account of the centennial celebration of their arrival in Canada, is inserted because recent and interesting and as containing much new matter:

MOHAWK CENTENNIAL AT TYENDINAGA, ON THE BAY OF QUINTÉ, CANADA, SEPTEMBER 4, 1884.

[From the Deseronto Tribune.]

The Mohawk Indians celebrated the hundredth anniversary of their landing on the Tyendinaga Reserve (from the United States) on Thursday, September 4, 1884. The place selected for the demonstration was the beautiful grove adjoining Christ church; and certainly no more charming locality could be selected for the purpose, the grove which overlooks the bay being one of the finest in this part of the district. There was a very large attendance of visitors from all parts of the adjoining country, all of whom appeared to enjoy the day's proceedings, which proved highly interesting and eminently successful. The Indians of the reserve were out in force, several being dressed in the costumes worn by the nation in ye olden time. On the grounds there could be seen an old wigwam, on which there was, in large figures, 1784, and near by a handsome white tent with 1884.

After devotional exercise and prayers, which were read by Rev. Rural Dean Baker, Mr. Solomon Loft, chairman, called on Chief Sampson Green, the first speaker, who, in full costume, came to the front and extended a welcome, on behalf of the Mohawk Nation, to all visitors. He said it was customary for his forefathers, when they assembled for council, to commence their proceedings by smoking the pipe of peace.

* *I. e.*, *Honi soit qui mal y pense*; Count Von Gellhorn (of the screeching horn), &c.

He would, therefore, in accordance with this old usage, ask the distinguished visitors on the platform to join him in smoking the pipe of peace. The pipe was accordingly lighted by the chairman, and each present took a puff as a token of their amicable intentions. The chief then proceeded to explain the reasons why the Mohawks happened to be now on the reserve, and went back to the earliest treaties of England with his nation—treaties which had been faithfully observed by both parties. Prior to the American Revolution the Mohawks had dwelt in the valley of the Mohawk River, New York, where they occupied a large territory, having fine farms and prosperous villages. When the colonists rebelled, 1775, the Indians remembered their treaty and remained loyal, and with a small minority of colonists stood to their colors (*i. e.*, the Crown). When the independence of the colonies was acknowledged the question came up whether they would remain, or go to Canada and commence life again. The Six Nations remained true to King George, gave up homes, fields, and everything beside, and came to Canada, being led by the great Tyendinaga (Thayendaneja) and John Deseronto. They crossed the Saint Lawrence and came to Lachine, near Montreal, where they remained seven years. With the U. E. Loyalists they were informed that grants of land would be given them in lieu of what they had lost, and in any place they should choose. They proceeded west to Catarqui, where it was agreed around a council fire to dispatch the chiefs to explore and select a proper place. Captain Brant went up the lakes to Grand River, near Brantford, and Chief Deseronto came up the Bay of Quinté to Tyendinaga. They returned and reported, and it was decided that the nation should divide, and accordingly fifteen families came up the bay and landed at a spot near what is now known as McCullough's Dock, in May, 1784. The rest of the nation passed up the lake and settled at Grand River. To these fifteen families, whose landing they were celebrating, George III, in a deed dated April, 1783, granted the Tyendinaga Reserve. They had prospered fairly, had two churches, one of which had cost \$7,000, the other \$4,000, and had four school-houses for the instruction of their children. The fifteen families who had landed had increased to a community of over one thousand souls. He thanked his audience for joining in their celebration, and that there was no enmity now between white and red men. * * * The chief took his seat amid loud applause, the choir singing "Rule, Britannia."

Rev. J. C. Ash, of Shannonville, * * * said that it was exceedingly appropriate to sing "Rule, Britannia," for the Indians had never been enslaved. The past history of the Mohawk Nation, he stated, afforded an illustration of the unswerving loyalty which had never been surpassed, if indeed ever equaled. They had given up their magnificent territories and had come to Canada in order to be under the old flag. Britain had always protected and remained true to the aboriginal tribes, and always evinced a parental regard for the aboriginal people who come under her dominion. When he came to Canada, thirteen years ago, it was said that the Indian races were doomed to extinction, but the remarks of their chief, showing that they had grown from fifteen families to 1,000 people, contradicted such an assertion. Under the benign influences of religion and the absence of the cursed fire-water they were certain to prosper and enjoy greater blessings to come. * * *

Rev. R. H. Harris, of Brighton, spoke, referring the principle of loyalty which actuated the Mohawks, said that the Mohawk Nation had left a mark, broad and deep, on the history of the country.

John White, esq., M. P., on coming to the front, was loudly cheered. He referred to the fact that there were 100,000 Indians in the Northwest (Canada), and that these were ever ready to yield obedience to the British flag. * * * He had been cordially welcomed on his recent visit to the West, because he came from the home of the great Mohawk Nation. Referring to the fact that the Indians had, as tenants, many white men who acknowledged that their landlords were good fellows. One thousand mounted police could not keep the peace in the Northwest were it not for the respect paid by the Indians to the British flag. * * *

Dr. Oronhyatekha, a Mohawk, said that after so much eloquence from clergymen and members of Parliament, they would not consent to listen to a common Indian. Still he was proud of being a Mohawk, as they were the best people on the face of the earth, and that for the following reasons: Every Mohawk who was left alive had left the other side after the war; but not so the whites—some of them remained. He then gave a humorous account of the origin of the Indians, which accounted for the superiority of the red men. It was asserted that Indians made women do all the work and treated them as inferior creatures; but this was incorrect, as they knew to their cost. They did just as they pleased, and as a matter of fact the chieftainship in Indian tribes descends by the woman, and woman controls the education of the children. Sir John Macdonald, as Mr. White had stated, had reason to be a friend to the Indians, as he had got the idea of confederation from the confederacy of the Six Nations. Again, philologists had shown that language is the index of character. Indians cannot swear except in English, and, further still, they had never drunk whisky until the advent of the whites. This was the result of bad company. He prayed the white men to keep liquor from the Indian. He wanted the members of Parliament present to tell of the class of people they had met, and to work in order that the Indians might get the right of the franchise.

Rev. S. Forneri, of Adolphustown, was the next speaker. * * * The Indians were, he proceeded to say, in the first rank of U. E. Loyalists, as, according to Rev. Dr. Stuart, they had landed on Quinté fourteen days before their white brethren. * * * The idea of a confederation was suggested to the United States by the Six Nations, and we had got the idea from our neighbors. * * *

He thought we all should continue to sink or swim with England. * * * We should rather remain satisfied with British connection. The Mohawks did not wish to sever their connection with Britain, and if closer connection were made, as some supposed, the Mohawk Nation would have a representative, as in 1860 they had elected the Prince of Wales a chieftain. * * *

Rev. E. H. M. Baker, rural dean, expressed the pleasure it afforded him, as the clergyman who had the Indians as his spiritual charge, of welcoming so many visitors. He had come from the United States, but he was born a British subject. He said that they were that day by a curious coincident celebrating three great events; first, it was the tercentenary of the handing over by the Six Nations of the Ohio Valley to the British authorities; secondly, it was the bicentenary of the conversion of the Mohawks to Christianity, and thirdly, their landing in 1784. The Mohawks had come from the United States because they foresaw it would be for their good, and he then graphically described the encroachment of the whites on the Indians in that country. He said that he discerned in the near future two political movements, viz, the passage of a prohibitory law, which would be a boon to the Indians, and the other, the enfranchisement of the Indians. When these two measures were secured there was sure to follow prosperity for the Indian population of Canada.

Rev. G. A. Anderson, of Penetanguishene, dealt with the religious history of the Mohawks. Rev. Dr. Moore had been sent out by Queen Anne to the Mohawk Valley. He was succeeded by Rev. Mr. Andrews in 1710, who brought the communion service which was there to be seen beside him on the stand. He had erected a chapel, the money being furnished by the Queen's bounty. Mr. Barclay was the next clergyman, and he in time was followed by the well-known Dr. John Stuart, who came with them to Canada and erected a chapel of large oak timber, the remains of which could be seen a few years ago. The Mohawks when they came brought a little captive white girl, who refused to part from the Indians even at the solicitation of her friends. Her name was Christina Smart and she died in 1881, aged one hundred and eleven years, and she was the great grandmother of their honored chief, Sampson Green. The reserve previous to their arrival had been occupied by the Ojibways, and many old relics of that tribe had been turned up during recent years. He hoped the

nation would continue to prosper and that God's blessing would descend upon their children's children.

Rev. T. G. Porter, of Shannonville, had no doubt that the trials and sacrifices which they had passed through as a people in their early history were the direct means of preserving their existence as a nation at this day and they should be thankful for the fact. They now enjoyed the protection of the British flag, whereas if they had remained in the United States, they would have been compelled to leave their homes and move farther on, as had been the case with the tribes in that country.

After an eloquent speech in Mohawk by the chairman and an address in English by Chief Green, thanking all for their kindness in attending, and the ladies who assisted in preparing refreshments, cheers were given for the Queen, Sir John Macdonald, Lady Macdonald and others. "God save the Queen" was sung with great effect, and the meeting came to a close.

SIX NATIONS AND MOHAWK CENTENNIAL ON THE GRAND RIVER RESERVE, NEAR BRANTFORD, ONTARIO, OCTOBER 24, 1884.

[From the Brantford Evening Telegram.]

Friday was the closing day of the seventeenth agricultural exhibition of the Six Nations Indians at Brantford.

* * * * *

On the whole the exhibition was a very good one, and reflected much credit upon the Indians of the reserve, and the president and directors of the society.

One hundred years ago the ancestors of the inhabitants of the reserve received, at the hands of Sir Frederick Haldimand, the royal charter, granting to them, as a reward for their fidelity to the British Crown during the American Revolution, the land which their descendants still hold. In commemoration of this event a celebration was held yesterday to which the lieutenant-governor of the province, Senator Plumb, and other prominent gentlemen, together with a number of Indian chiefs, were invited. At elevated points on the show grounds flag-staffs were erected, from which floated the British ensign, for the honor of which the Mohawks and confederate tribes had sacrificed so much, and a speaker's stand was provided for the accommodation of the distinguished visitors." * * Two Indian bands were in attendance and saluted the visitors with several musical selections. Upon the platform in the council house were seated Hon. J. Burr Plumb, William Patterson, M. P., Superintendent Gilkison, ex-Mayor Henry, Dr. William T. Harris and Chiefs Henry Clinch and Alexander Smith, the first named acting as chairman and the latter as interpreter. To the right of the stand were seated Chiefs Elias Johnson, of the Lewiston Reserve, La Forte, of Onondaga Castle Reserve, near Syracuse, N. Y., Jacob Hill, of Green Bay, Wis., and Powless, Fraser, Thomas, Doxtater, Hill, Key, Buck, Porter, Jonathan, and Wage, of the Six Nations Reserve, and Rev. Bearfoot, of Point Edward.

Superintendent Gilkison said that the occasion they had met to celebrate was one memorable in the history of the Six Nations Indians and it was with pleasure that he acted as chairman. He spoke of the fidelity of the Six Nations to England's King in a time of great need, and reviewed the granting of the Brant Reserve to them as a slight compensation for the losses sustained by them, and the hardships to which they were subjected during the struggle. In this connection Mr. Gilkison read a copy of the decree, signed by Sir Frederick Haldimand, by which a tract of land 6 miles deep, on both sides of the Grand River, extending from its mouth to the source, was ceded to the Mohawks and allied tribes. The speaker then alluded to the great strides which the Indians had made toward civilization, as shown in their churches, schools, and in the agricultural exhibition which has just been concluded.

William Patterson, M. P., then referred to the great advancement the country had made, and said that inhabitants of Brant County, and especially the city of Brantford, were under deep obligations to the Indians for the lands which had been pro-

cured from them. The Government had always dealt honorably with the Indians, and the speaker expressed a hope that this policy would always be pursued in the future. For years the white men and the Indians had dwelt in harmony, side by side, without murmurings, much less revolt, on the part of the latter, which he hoped would continue in the future.

Senator Plumb, of Canada, was next introduced. He began his eloquent and interesting address by stating that he felt highly honored and pleased by the invitation to attend the exhibition, and take part in the celebration with those whom the Government were bound to protect and cherish in every way in their power. He then referred to the formation of the league of the "Long House," by which the several tribes composing the Six Nations were bound together and became an invincible power upon the continent. The immense territories acquired by them, and the many nations which they conquered, with no other weapons but those formed of shell and stone, were recounted by Mr. Plumb in graphic language. In the middle of the seventeenth century the Six Nations had reached the summit of their power. The Dutch settlers had entered into friendly relations with them, and this was continued by the English. With them the Mohawks formed a covenant chain, which had never been broken, but remained untarnished still. The Six Nations were the highest type of Indians ever known upon the continent, and the speaker hoped that their nationality would never be merged into that of the whites. The hatchet was buried, and he hoped that they would be as successful in peace as they had been in war. It was with great sorrow that they abandoned their beautiful lands in the center of New York, but they remained true to the cause of Britain's King and sacrificed all to keep their promise as expressed by the covenant chain formed in previous years. The gratitude of the King to them for their aid was shown by the liberal grant of land which had been made to them. After having passed through a period of war and semi-civilization, they were rapidly reaching a complete civilization, as evinced by their schools and agricultural exhibition, which latter would compare favorably with many of the local fairs held by their white brethren. Education was now the first necessity, and every one should take advantage of the school privileges held out to him. A great improvement had been made, but there was still room for more, and the speaker hoped that they would continue until they had reached a complete civilization.

HON. HORATIO SEYMOUR'S NOTES ON THE IROQUOIS INDIANS, 1884.

Hon. Horatio Seymour, of Utica, N. Y., August 9, 1884, in answer to Hon. James Sheldon, of Buffalo, requesting his presence, wrote of the Iroquois as follows:

I am gratified by your invitation to visit Buffalo to take part in the historical celebration in October, but I dare not accept it.

I am glad it is to be held, for it will excite an interest in events which have been neglected in the past. I may be able to contribute in some degree to its success by sending to your society a book, published by Hugh Gaines in 1757, in relation to the controversy between Great Britain and France, with regard to their claims in North America. Incidentally, it throws light upon the influence and power of the Six Nations. I think the book is rare, as I know but another copy, which is in the State library, at Albany.

I will also send to you a map made by the British ordnance department about 1720, which, among other things, lays down or defines the bounds of the conquests of the Iroquois. The southern line runs through the center of the colony of North Carolina, westward to the Mississippi River; thence, along that river and the course of the Illinois, to the southern end of Lake Michigan; thence, through the center of that lake, to a point in Canada north of the great lakes; thence eastward to the Atlantic. The book and this map show that the claim of the English to the territory west of Rome,

in this State, was based on the assertion that the Iroquois had become their subjects, and had brought with them their jurisdiction over the country they had conquered. I do not think it is generally understood that this was the basis of the British claim to the Northwest. The French did not deny the statement with regard to the conquest and power of the Iroquois, but they said, in answer to the claim that those Indians had become subjected to the British Crown, that no Englishman would dare to tell them that they were subjects, for if they did so they would peril their lives.

I have a number of old documents which might be of use to those who will take part in your celebration. I will send the book and map to you by express. * * *

I trust the day has come when the people of New York will look up and make a record of facts bearing upon its history.

MR. CATLIN'S NOTES ON THE IROQUOIS.

The Six Nations was a confederacy formed by six tribes, who joined in a league as an effective mode of gaining strength and preserving themselves by combined efforts which would be sufficiently strong to withstand the assaults of neighboring tribes or to resist the incursions of white people in their country. This confederacy consisted of the Senecas, Oneidas, Onondagas, Cayugas, Mohawks, and Tuscaroras; * * * they held their sway in the country, carrying victory and consequently terror and dismay wherever they warred. Their war-parties were fearlessly sent into Connecticut and Massachusetts, to Virginia, and even to the Carolinas, and victory everywhere crowned their efforts. Their combined strength, however, in all its might, poor fellows, was not enough to withstand the siege of their insidious foes—a destroying flood that has risen and advanced, like a flood-tide upon them and covered their country, has broken up their stronghold, has driven them from land to land, and in their retreat has drowned most of them in its waves.—G. C., 1829.

W. C. BRYANT'S NOTES ON THE IROQUOIS INDIANS.

The Iroquois aimed at universal sovereignty, and one of the conditions of peace imposed by the haughty victors was total abstinence from war.* Acknowledged masters of the continent, the energies which had found exercise in war would naturally have turned to pursuits more consonant with peace. The process of transformation would have required centuries. But think of the long ages which witnessed the evolution of the modern Englishman from the painted savage whom Cæsar met in Britain.

Oratory was not alone a natural gift, but an art, among the Iroquois. It enjoined painful study, unremitting practice, and sedulous observation of the style and methods of the best masters. Red Jacket [see No. 263] did not rely upon his native powers alone, but cultivated the art with the same assiduity that characterized the great Athenian orator. The Iroquois, as their earliest English historian observed, cultivated an attic or classic elegance of speech which entranced every ear among their red auditory.

Their language was flexible and sonorous, the sense largely depending upon inflection, copious in vowel sounds, abounding in metaphor; affording constant opportunity for the ingenious combination and construction of words to image delicate and varying shades of thought, and to express vehement manifestation of passion: admitting of greater and more sudden variations of pitch than is permissible in English oratory, and encouraging pantomimic gesture for greater force and effect. In other words, it was not a cold, artificial, mechanical medium for the expression of thought and emotion, or the concealment of either, but was constructed, as we may fancy, much as was the tuneful tongue spoken by our first parents, who stood in even closer relations to nature.

* The name by which their constitution or organic law was known among them was *Kayanerenh, Kowa*, the great peace.—Hale's *Book of Rites*, page 33.

That great incentive to eloquence, patriotism, was not lacking to these Ciceros of the wilds. No nation of which we have a record was dominated in a larger degree by this lofty sentiment. They were proud of their history and their achievements, devotedly attached to their institutions, and enthusiastic at the mention of the long line of chieftains and sages who, from the era of Hi-a-wa-tha had assisted in erecting this grand Indian empire. The time will come when the institutions, polity, eloquence, and achievements of this remarkable people will be themes of study for the youth in our schools of learning. The unvarying courtesy, sobriety, and dignity of their convocations led one of their learned Jesuit historians to liken them to the Roman senate.—W. C. Bryant, Oct. 9, 1884.

EX-JUDGE G. W. CLINTON ON THE IROQUOIS, BUFFALO, OCT. 9, 1884.

The histories of the several nations of the great confederacy before, and, indeed, long after their league was formed through the influence of Hayenwatha (Hiawatha), is very far from clear; and their history from their first contact with the whites, so far as we have it written, is full of doubts, and gaps, and contradictions. Tradition, however, helped by belts or pictures, dies out, especially in unlettered tribes constantly imperiled by migration and by war, and is apt to be degraded into fable and lapse into folk-lore. The disposition of the Indian to withhold his traditions from the white man, or to deliver them to him falsely, or with a biblical covering, has died out. Certainly we cannot believe that it exists in the least degree in the noble representatives of each and every tribe of the Six Nations, and in the representative of the famous Lenape, who have this day cheered and gratified the society and the public with their presence and co-operation. They will, I doubt not, willingly and zealously aid the society in recovering whatever now remains unknown to it of their traditions and history, and in detecting falsehood and bringing truth to light. Of course, the so-called tradition of the Senecas that the original people of their nation sprung from the crest of Ge-nun-de-wan-gah, the Great Hill at the head of the Canandaigua Lake, is not a myth, for it covers no meaning and shadows forth no fact in their history. Like all other such stories, it was an invention of some Indian mother, handed down for the entertainment of the children, and never gained credit in the nation.

The better theory is that God created a primal couple and endowed the race with the same power with which he endowed, though in a less degree, the horse, the dog, the cat, the ox, the fowls, and other animals, which he designed to be the servants and familiars of mankind—the power of varying and adapting himself to climate and to circumstances, as he moved on in his migrations, to conquer and to occupy the whole habitable world. I know not that any nation of the Aquanuschioni has any tradition or fixed belief of its origin, or when and whence it reached America, or of its migrations. We must remember that without letters history is impossible. Belts, picture writings, and mounds of earth and stone are all perishable, and traditions dependent on them for endurance must in a few years or ages fade away and perish. We must remember, too, that the Iroquois could count but very little, if any, beyond their fingers; and, of course, they had no era to date from and no record of the years and centuries. Hence their history, prior to its interblending with that of the whites, is, in the main, dark and confused. It is most likely that they and all the peoples of our hemisphere derived their origin from Asia. The traditions of the Lenape, as recorded by Heckewelder, may be true—the tradition that they and the Iroquois or Mengwes came from far west, crossed the Mississippi together, expelled the Mound Builders east of it, and so eventually won their ancient seats. But one fact seems clear, and that is that the Five Nations, though so near in blood and almost identical in language, in customs, and in spirit, were but fitfully at peace, and waged bloody and demoralizing wars with each other until Hiawatha, than whom the human race has never produced a wiser statesman, in some uncertain time, but probably in about 1460, induced them to form their confederacy, and so laid, broad and deep, the foundations of all their greatness. Their union gave them a strength which defied all invaders. When as-

sailed they were as compact and indomitable as the Macedonian phalanx. They conquered very widely and made far distant nations their tributaries. They united policy with power, and replenished their members when thinned by war by adopting the fittest of their captives. They were the Romans of this continent—Romans of a stone age. If they had had iron and letters they would have conquered North America, and advanced in mechanic arts and all the sciences, perhaps repelled the intruding white man and carried peaceful commerce or revengeful war across the broad Atlantic. And when they had run through the common course of all the ancient nations and fallen through luxury and sin, they would have left the world the records of a history as full of moving incidents and heroic acts as that of Greece or Rome. But, while this great but savage confederacy was in the dawn of its glory and advancement, the white man came, and the Iroquois were no longer the Ongwe Honwee of the land. The white man gave them arms and clothing for their furs and tendered them letters and religion; but they also brought them rum, won lands from them by fraud or force, made them dependents, and kept them occupied in war. Ah me! it was cruel in Great Britain and France to foster their red children's appetite for war. Their protection was such "as vultures give to lambs, covering them and devouring them."

I recall with pride the fact that at the outbreak of the Revolution and of the war of 1812, efforts of this State and of the Confederate States were employed to bind the red men to neutrality. But, alas! they were armed and incited to war by Great Britain; and yet Great Britain, when she recognized our independence, forgot her Indian allies within our boundaries and made no provision for their safety. Red Jacket said "When you Americans and the King made peace, he did not mention us and showed us no compassion, notwithstanding all he had said to us and all we had suffered. This has been the occasion of great sorrow and loss to us, the Five Nations. When you and he settled the peace between you two great nations he never asked us for a delegation to attend to our interests." So, in the long state of bitter feeling between our country and Great Britain, during her retention of our frontier posts, she egged the Indians on to war with us, in the hope of their making the Ohio a part of our northern boundary. Then, and long before that time, some of the Indian tribes realized that, to their own great loss and danger, Great Britain, in her selfish policy, was bribing them to fight battles not their own. Heckewelder was right in his high estimate of the shrewdness and eloquence of the speech of Captain Pipe, the Delaware, in December, 1801, to the British commandant at Detroit, at whose instance he had made war against the Long Knives. He told him expressly that the whites had got up a war among themselves and ought themselves to wage it; that the British had compelled their red children to take up the hatchet and join in a war for which they had no cause or inclination, and intimidated his conviction that the British would make peace and throw their then useless tools aside.

But to return to the Iroquois. In their early and palmy state they command our admiration, even as they now, when fallen so far below it, command our sympathy and love. They were, indeed, fierce and cruel, but not more so than the fathers and progenitors of the European nations were even after they had attained iron and had letters. Recall the rude, barbarian hordes who created primal Greece and Rome; think of the death of Regulus by Carthaginian hands; of the swarms from the Scandinavian hive that peopled Gaul and revived all Europe; of man's inhumanity to man in all times and all nations; and can we render judgment of peculiar condemnation against the Iroquois because they warred by ambush and surprise, scalped those who fell beneath their hatchet, and tortured their prisoners? In the white man's wars against them he, too, not infrequently tore the scalp from the head of his red enemy and tucked it under his belt. In August, 1778, when Charles Smith, a troublesome emissary of the enemy, was shot by a party of riflemen belonging to the force of Col. William Butler, in command at Schoharie, they brought in his scalp and it was sent to General Stark, the then commandant at Albany. (Clinton Papers, 1639 and 1650.) We did not wholly humanize the Indians who were our friends in the war of the Revolution. The Oneidas and Tuscaroras, in September, 1778, in giving to Major Coch-

ran, then commanding at Fort Schuyler, an account of their descent upon Butternuts and Unadilla, delivered to him some prisoners and declared that they did not take scalps. But when, in November, 1781, Major Ross's command had been defeated by Colonel Willett, near Johnstown, and was fleeing with desperate haste into the wilderness, an Oneida slew the infamous Walter Butler, at a ford of the West Canada Creek, and scalped him. You will remember, too, that at the council of 1790, at Tioga Point, when Thomas Morris was adopted by the Senecas, under Red Jacket's original name of Otetiani, or Always Ready, a foolish Oneida, as he struck the post during the ceremonies of the initiation, boasted of the number of scalps his nation had taken in the war of the Revolution, and so provoked the Senecas to boast of the number of scalps of the Oneidas they had taken, and to call them cowards. (Stone's Life of Red Jacket, pages 41-44.)

But it behooves us to remember that the Iroquois were hired to war against us and hounded on to the perpetration of those atrocities by white men; and that, apart from war, to which they were too often impelled, as were the warlike nations of antiquity, by mere ambition and the lust of fame, they were generous and humane. Their councils were models of decorous and dignified debate. Their policy was far seeing and tended to the assertion of wide-stretching peace. They planted colonies and, while their blows were terrible and they exacted tribute from the conquered, war ceased with conquest, and the light tribute guaranteed protection.

Of their eloquence I have said something, but I must add that Logan, the Mingo, chief, whose celebrated speech was declared by Jefferson to be unexcelled by anything in the orations of Demosthenes or Cicero, or of any European orator, was a Cayuga, though he lived apart from his nation. But transcendent eloquence was the common property of the Five Nations. What a masterly, nervous, and cutting speech was that of the Onondaga chief, whom La Hontan calls the Grangula, to M. de la Barre, at the Bay of Famine, in August, 1684! How proud and defiant was his declaration, as the mouthpiece of the Five Nations, and especially of the Senecas, to the French governor who came complaining of the Senecas and threatening war! "We have conducted the English to our lakes in order to trade with the Outawas and the Hurons, just as the Algonquins conducted the French to our five cantons, in order to carry on a commerce which the English claimed as their right. We are born freemen, and have no dependence either upon the Onontio or the Corlaer. We have power to go where we please, to conduct whom we will to the places we resort to, and to buy and sell where we think fit. If your allies are your slaves or children you may treat them as such, and rob them of the liberty of entertaining any nation but your own."* What pathos there is in the memorial of Cornplanter, Halftown, and Bigtree, of December 2, 1790, addressed to Washington, and complaining of the purchases of Phelps and Livingston as fraudulent: "Father, you have said that we are in your hand, and that by closing it you can crush us. Are you determined to crush us? If you are, tell usso that those of our nation who have become your children, and have determined to die so, may know what to do. In this case one chief has said he would ask you to put him out of pain. Another, who will not think of dying by the hand of his father or of his brother, has said he will retire to the Chautauqua, eat of the fatal root, and sleep with his fathers in peace. Before you determine on a measure so unjust, look up to God, who made us as well as you!" (Clinton MSS., 6,077.) How grand, how touching! And yet, O Senecas! you have permitted the names of these two chiefs, so worthy of remembrance, to perish.

* The Grangula who delivered this speech was, most probably, the Hotrehonati, or Hateonati, of de la Barre (IX Col. Doc., 243, 236), whose speech as recorded in de la Barre's return of his proceedings to his sovereign (IX Col. Doc., 237) is very different from the one recorded by La Hontan, and was made up, I think, to save the mortification of the French commandant and gratify his King. Mr. Bryant informs me that Grangula was a title applied to a great chief and, consequently, Dr. C. Callagan (IX Col. Doc., 243) was mistaken in his assertion that it was merely the Latinization by La Hontan of *Grande Gueule*, the name given by the French to *Outreouati*.

The Iroquois appreciated the worth of woman and gave her a high place in their counsels. In 1789, at Albany, Good Peter, in his speech for the Cayugas and Senecas to the governor and the commissioners of Indian affairs, said: "Our ancestors considered it a great transgression to reject the counsel of their women, particularly of the governesses. Our ancestors considered them mistresses of the soil. Our ancestors said, 'Who bring us forth? Who cultivate our lands? Who kindle our fires and boil our pots but the women. * * * The women say, let not the traditions of the fathers with respect to women be disregarded; let them not be despised; God is their maker.' * * * The female governesses beg leave to speak with that freedom allowable to women and agreeable to the spirit of our ancestors. They exhort the great chief to put forth his strength and preserve their peace, for they are the life of the nation." And when the Senecas at Big Tree, in 1797, refused to negotiate with Thomas Morris, and Red Jacket, with undue haste, had declared the council fire covered up, the women and the warriors interposed and consummated a treaty. Its women are, indeed, the life of every aggregation of mankind, and the true gauge of the worth and dignity of every tribe and nation of the earth is the standing and influence of its women. Maltreatment and contempt may degrade their women; women grow pure and loving through reasonable reverence, and so strengthen and elevate the men.

In general, the men of the Five Nations were, and still are, noble in person, and the young men especially were and are classical in form and feature. Hence it was that when West, the great American painter, first saw the Apollo Belvidere he exclaimed: "How like a young Mohawk warrior!" I can readily accept the tradition that their women, like the women of all peoples, by far excelled the men in grace and beauty, because in the present I perceive its truth. Certainly, a young Iroquois maiden of uncontaminated blood, just entered upon womanhood, unworn by harsh and unbefitting labor, pure as unclouded heaven, and with the words of her nation dropping from her tongue like the low tinklings of a harp, is beautiful exceedingly.

Very many of the Iroquois, women as well as men, had exhibited intellectual power and broad philanthropy, but, if legends be true, the name of none of them was held in reverence by all the Indians as was that of Tamanund. But all aboriginal America, in my humble judgment, does not furnish to us a name so worthy of undying reverence as that of Hiawatha, the statesman and lover of peace, who framed the League of the Five Nations, secured its adoption and started the confederacy on its glorious career.

But I must cease my vain attempts to paint these nations as they were in the olden time, and turn abruptly to the present. We are your brothers, O Iroquois, and it is in sorrow and not in exultation, and solely with a hope of arousing you to righteous and effectual effort to regain the prosperity of the past, that I ask you to look your present condition and prospects in the face. And now, Iroquois brothers of Canada, I beg you to take notice that this statement and all the remarks that may follow it are addressed to the Iroquois within this State. You are under a different government, and I am glad in the belief that your condition is much happier than theirs. But you and they are one, and we Americans are brothers and friends of both.

The Iroquois can no longer arrogate to themselves the title of Ongwe Honwee. In 1811 De Witt Clinton wrote thus: "The Six Nations have lost their high character and standing. * * * Their old men who witnessed the former glory and prosperity of their country, and who have heard from the mouths of their ancestors the heroic achievements of their countrymen, weep like infants when they speak of the fallen condition of the nation. They, however, derive some consolation from a prophecy of ancient origin and universal currency among them, that the man of America will, at some future time, regain his ancient ascendancy and expel the man of Europe from this western hemisphere." At this day such a hope is futile. Even the Seneca has lost, I trust, his insane appetite for war. The man of Europe covers the continent.

The man of America is represented by tribes and nations, feeble of themselves and relying for protection upon the man of Europe. At the outset of the war of the Revolution the Mohawks retired to Canada, and the eastern door of the Long House was broken down forever. After the close of that war the main body of the Cayugas also went to Canada. The Onondagas have been reduced to a feeble remnant. The western door is gone. The Long House has been swept away, and there is naught left of it but some poor, dispersed, decaying fragments. The broken bands that are left within the State are bereft of all that the Long House covered, save some petty reservations. The population of the State in 1794 was about 340,000, and that of the United States was about 4,000,000. The population of New York four years ago was 5,000,000, and that of the United States was 50,000,000. In 1794, when the treaty of Canandaigua was being considered, you spoke of the council of thirteen fires, and that council is now one of thirty-eight fires, and eight more are being built. There is no possibility of retrieving the power of the Six Nations by war. Never, in the hereafter, can they or any of them wage an independent war on their own account. If they go to war at all—which may the good God forbid!—it must be as auxiliaries of the great powers that shelter them. The contracted reservations yield little or no game. You must till the ground and engage in mechanical employments. Some white men are continually seeking to prey upon you, and others are constant in your defense. You have friends and protectors in great numbers and of great apparent power; but, alas! you are dwindling, and it would seem that some of your nations must ere long vanish in the mass of white men or become utterly extinct.

I am very glad to believe that the State of New York and the United States have always been and are friends of the Iroquois. Brothers of the Seneca Nation! have you forgotten how, in or about 1784, when you had been persuaded to "execute a deed for your whole country * * * and had sold the burial places of your fathers, and the bones and ashes of your ancestors, and had not reserved land sufficient to lay down your head or kindle a fire upon," the State of New York interposed, in vindication of its just dignity, and gave you complete relief? Did not De Witt Clinton, the then governor of the State, write thus to you in 1820: "Brothers! this State will protect you in the full enjoyment of your property. We are strong and will shield you from oppression. The Great Spirit looks down on the conduct of mankind and will punish us if we permit the remnant of the Indian nations which is with us to be injured. We feel for you, brothers, and we shall watch over your interests. We know that in the future state we shall be called upon to answer for our conduct to our fellow creatures." The State has always felt her solemn responsibility and that promise so given for her. The report of the joint committee of Four Yearly Meetings of the Friends certified thus in 1847: "The uniform justice and compassion of New York toward the Six Nations who were located on its territory presents, in retrospect, one of the most pleasant scenes on the pages of our history." It has exerted its power to protect you in the possession of your lands and to keep out intruders; to incite you to advances in knowledge and to the practices of industry; it gave you a charter, under which, as a distinct people, you exercise all the powers of self-government consistent with your condition. The Society of Friends have been your constant advisers and benefactors. All Christian men and all wise and conscientious men who have been or are your neighbors, have been and are anxious for your happiness and safety. Surely you have not forgotten Thomas C. Love and Thomas A. Osborne, your warm and judicious friends; nor the Rev. Asher Wright, who resided with you so long and worked so zealously for your salvation. But, notwithstanding all this active friendship and strong protection, the nation has been almost continually harassed, and has not made advances that hold forth reasonable assurance of future progress. Who can effectually protect you and your possessions from sordid and rapacious white men? The laws and denunciations of the State and nation are as ineffectual as is the brute thunder to deter a pack of wolves from tearing down a deer at bay. Nothing but a just sense of your own worth and dignity as men, and

the grace of the Christian's God, can shield you from the temptations which, when triumphant, sink us below the level of the beasts that perish.

Brothers! The plain and simple truth is this: All this sympathy and friendship, and all the aid and protection our governments can give you, must be as ineffectual to save you as is a zephyr to uproot a sturdy oak, if you do not rouse yourselves to a sense of your own worth as men and your dignity as Iroquois, and resolve to protect yourselves. True friendship must say to you, "Awake! Arise! or be forever fallen!"

Brothers! Ask yourselves whether you retain your ancestral reverence for woman, a reverence without which you cannot rise. Your territory is very small, your numbers inconsiderable. What hope can there be of doing great actions and winning fame on so contracted a theater? Can any one of you, however gifted by nature, stay in and devote himself to his little country and win glory in art or arms or expanded usefulness? If ambitious, must he not, like Donehogawa, your chief sachem, leave you and his petty country in order to do such deeds as gave him high honor and high distinction? That honor and distinction which make him a man of mark in the United States tends to prove that the Senecas are not degenerate nor wanting in native power.

Brothers! May I not truly conclude that your lack of ambition and despondency spring wholly from your position as a people cooped up and confined in an alien and powerful nation of widely different institutions, and the sense that upon that nation you are dependent; that you lie in the hollow of its hand; that it can close it and crush you in an instant, while you cannot have the least effect upon it or its fortunes. The high spirit of the men whose remains you have this day placed safely in old mother earth would have revolted at such a state of things. They would have sought escape from it; and the only escape from it that I can perceive is citizenship. Your lineage is illustrious, and if, as I believe, you have inherited its intellect and courage, you will arouse yourselves, cast despondency aside, and repel the wolves that threaten your existence; you will seek advancement in knowledge, cherish purity of morals and belief, and so prove yourselves worthy of and win American citizenship. Your country will then be bounded by the great oceans and nearly cover a continent. You will have an almost limitless field for the exercise of intellect and the exhibition of science, and have fit and abundant fields for the display of your hereditary eloquence. Can you doubt that Hiaŵatha, or Ototarho, or Joseph Brant, or Red Jacket, or Logan, or Cornplanter, or Farmer's Brother would have played a grand part in such a field? There is not a living thing, from the lordly buffalo to the smallest fly—not a beast, a bird, a fish, a reptile, an insect, or a worm that does not show forethought and take pains to secure the safety and the comfort of its offspring; yea, some of the most timid draw courage from love and die in their defense. You are invoked, not merely to take care of your own interests, but also to secure happiness and honor to your children and your children's children forever. In attaining the dignity of American citizenship you need not make any substantial sacrifice. You may, and, I think, ought, to retain your organization as Senecas and hold fast to your lands, and be true to the old League of the Iroquois, at least as a band of social union. I read, indeed, that the confederation is broken, and that the league has perished. If that be true, still there is every reason that the remnants of the Six Nations should be reunited by the strong bond of their ancient common glory and a sense of the closeness of their brotherhood, and remain Aquanuschioni forever. I am glad to find that the Onondagas and the Mohawks keep the compact made when the league was formed. Atotarho, the representative of the old emperor of the Five Nations, wears not the grim visage and bears not the matted crown of threatening snakes that Cusick gave him, but brings with him peace to all and brotherly enjoyment; Hiaŵatha, too, honors this assembly with his presence, and perpetuates also the honored name of David Thomas.

And now, brothers of the Iroquois, I must express a wish which lies close to my heart. I wish that every unpublished and recoverable fact of your grand and eventful history should be recovered and given to the world. You have no truer friend than

he who is the Gazing-at-the-Fire of your Senecas and the Bright Sky of your Mohawks, and there is not in Buffalo nor, I believe, anywhere a man who would be so zealous in searching for the hidden facts of your history, and so competent to arrange and annotate and give them to the world; and my heart's desire is that you should encourage him to the undertaking and give him your countenance and aid.

I am an old and weary man, and very few, if any of you, will ever see my face again, and I shrink from the pain of parting. But I cannot say farewell without again declaring that this final disposition by us of the mortal remains of Sagoyewatha and his comrades, sanctioned and participated in, not only by all the Senecas and by all the other Iroquois, is a solemn recognition of our common brotherhood. These remains now rest in close companionship, and near and around them repose those of Love, Tracy, Fillmore, Hall, good Doctor Shelton, and many others of their white admirers and friends, so that when the Redeemer shall come in glory and the last trump sounds, and the earth and the sea shall give up their dead, those white men and those red men may assume their spiritual bodies and rise together, hymning their gratitude to God and enter heaven in company. Farewell!—Ex-Judge Geo. W. Clinton.

General Ely S. Parker, at Buffalo, October 8, 1884, gave the following sketch of the Iroquois:

Much has been said and written of the Iroquois people. All agree that they once owned and occupied the whole country now constituting the State of New York. They reached from the Hudson on the east to the lakes on the west, and claimed much conquered territory.

I desire only to direct attention to one phase of their character, which, in my judgment, has never been brought out with sufficient force and clearness, and that is, their fidelity to their obligations and the tenacity with which they held to their allegiance when once it was placed. More than two hundred and fifty years ago, when the Iroquois were in the zenith of their power and glory, the French made the mistake of assisting the northern Indians with whom the Iroquois were at war. They never forgot or forgave the French for the aid they gave their Indian enemies, and the French were never afterward able to gain their friendship. About the same time the Holland Dutch came up the Hudson, and though, perhaps, they were no wiser than their French neighbors they certainly pursued a wiser policy by securing the friendship of the Iroquois. The Indians remained true to their allegiance until the Dutch were superseded by the English, when they also transferred their allegiance to the new comers. They remained steadfast to the faith they had given, and assisted the English people to put down the rebellion of the American colonies against the mother government. The colonies succeeded in gaining their independence and establishing a government of their liking, but in the treaty of peace which followed the English entirely ignored and forgot their Indian allies, leaving them to shift for themselves. A portion of the Iroquois under Captain Brant followed the fortunes of the English into Canada, where they have since been well cared for by the provincial and home governments. Those who remained in the United States continued to struggle for their homes and the integrity of what they considered their ancient and just rights. The aid, however, which they had given against the cause of the American Revolution had been so strong as to leave an intense burning hostility to them in the minds of the American people, and to allay this feeling and to settle for all time the question of rights as between the Indians and the whites, General Washington was compelled to order an expedition into the Indian country of New York to break the Indian power. This expedition was under command of General Sullivan. The Indians left to themselves and bereft of British aid made Sullivan's success an easy one. He drove them from their homes, destroyed and burned their villages, cut down their corn-fields and orchards, leaving the poor Indian homeless, houseless, and destitute. We have been told this evening that the "Long House" of the Iroquois had been

broken. It was, indeed, truly broken by Sullivan's invasion. It was so completely broken that never again will the "Long House" be reconstructed.

At the end of the Revolutionary war (1783) the Indians sued for peace. They were now at the mercy of General Washington and the American people. A peace was granted them, and small homes allowed in the vast domains they once claimed as absolutely and wholly theirs by the highest title known among men, viz, by the gift of God. The mercy of the American people granted them the right to occupy and cultivate certain lands until some one stronger wanted them. They hold their homes to-day by no other title than that of occupancy, although some Indian bands have bought and paid for the lands they reside upon the same as you, my friends, have bought and paid for the farms you live upon. The Indian mind has never to this day been able to comprehend how it is that he has been compelled to buy and pay for that which has descended to him from time immemorial, and which his ancestors had taught him was the gift of the Great Spirit to him and his posterity forever. It was an anomaly in civilized law far beyond his reasoning powers.

In the treaty of peace concluded after Sullivan's campaign the remnants of the Iroquois transferred their allegiance to the United States, and to that allegiance they have remained firm and true to this day. They stood side by side with you in the last war with Great Britain, in the defense of this frontier, and fought battles under the leadership of the able and gallant General Scott. Again, the sons of the Iroquois marched shoulder to shoulder with you, your fathers, your husbands, and your sons in the last great rebellion of the South, and used, with you, their best endeavors to maintain the inviolability and integrity of the American Constitution, to preserve unsullied the purity of the American flag, and to wipe out forever from every foot of American soil the curse of human slavery. Such, in brief, has been their fidelity to their allegiance.

RECENT COUNCILS OF THE SIX NATIONS.

The council of the sachems, chiefs and warriors of the Six Nations, held at the rooms of the Buffalo Historical Society, on the 8th of October, 1884, at the ceremonies of reinterment of Red Jacket, was the first general council of the united Iroquois which has been held since the conclusion of the Revolutionary war and the consequent disruption of the league.—W. C. Bryant.

(See No. 263, Red Jacket, herein.)

After the return of the Six Nations Indians to Canada from Buffalo in October, 1884, they met in council, and passed the following amongst other resolutions:

Extracts from the minutes.

THE SIX NATIONS IN COUNCIL;
Brantford, Ontario (Canada), October 14, 1884.

Present, the visiting superintendent, interpreter, and twenty-nine chiefs.

The chiefs having deliberated upon and discussed the report of their delegates attending the recent ceremonies in the city of Buffalo, the speaker of the council arose and, addressing the superintendent, said:

On the arrival of their delegates in Buffalo, on Wednesday last, they had the honor of being received by a deputation of gentlemen, conducted to carriages, and conveyed to a hotel, where they were entertained in the most hospitable manner, made to feel at home among friends, not as strangers. They were requested on the same day to meet their brethren resident in the State of New York, when, being assembled, they were invited to consult and arrange for Indian ceremonies attending the reinterment of the remains of Red Jacket and his warriors upon the following day.

The delegates were astonished and gratified with the grand and imposing procession and other proceedings, and felt proud in being chosen to assist on so solemn and memorable occasion. This council acknowledge the honor conferred upon the illustrious dead of their race, and feel the red man has received a recognition hitherto unsurpassed, if not unprecedented, which will not be forgotten, but be a lasting record in the hearts of the Indians and in succeeding generations.

INDIAN DELEGATES AT RED JACKET'S OBSEQUIES.

The following is a correct list of the Indian delegates of the Six Nations to the Red Jacket obsequies, Buffalo, October 9, 1884, residing in the United States and Canada:

- WILLIAM JONES—*Tho-na-so-wah*. Big Sand. Seneca.
 JOHN JACKET—*Sho-gyo-a-ja-ach*. Holding up our Earth. Grandson of Red Jacket. Seneca.
 MARY A. J. JONES—*Je-on-do-oh*. It has put the Tree again into the Water. Seneca.
 ABBY JACKET—*Oh-no-syo-dyno*. It has Thrown Away the House. Granddaughter of Red Jacket. Seneca.
 SARAH W. JACKET—*O-ge-jo-dyno*. It has Thrown Away the Corn Tassel. Seneca.
 IRENE JONES—*Gaw-yah-was*. It Sifts the Skies. Seneca.
 WILLIAM NEPHEW—*So-no-jo-wah*. The Nephew. Seneca. Grandson of Governor Blacksnake, alias The Nephew.
 IRENE A. JONES—*Ga-on-ye-was*. It Sifts the Skies. Seneca. Daughter of Mrs. Irene Jones.
 REV. Z. L. JIMESON—*Ska-oh-ya-dih*. Beyond the Sky. Seneca.
 ANDREW SNOW—*Tow-sen-e-doh*. Seneca.
 CHARLES JONES. Youngest son of Capt. Horatio Jones, the famous captive. Genesee, N. Y.
 CHESTER C. LAY—*Ho-do-au-joah*. Bearing the Earth. United States interpreter, Seneca Nation.
 General ELY S. PARKER—*Do-ne-ho-ga-wa*. Open Door. One of the leading sachems of the League of the Iroquois.
 Mrs. E. S. PARKER.
 WILLIE RED JACKET JONES—*Sho-gyo-a-ja-ach*. Holding up our Earth. Seneca.
 ISAAC T. PARKER—*Da-jis-sta-ga-na*. Seneca.
 JOHN MT. PLEASANT—*Dah-gah-yah-dent*. Falling Woods. Tuscarora.
 Mrs. J. MT. PLEASANT—*Ge-goh-sa-seh*. Wild Cat. Seneca.
 Mrs. MARY J. PIERCE. Widow of the late Maris B. Pierce, a chief of the Seneca Nation. Seneca.
 MOSES STEVENSON—*Au-o-wah-nay*. Broad Path. Seneca.

Canadian delegation.

- BENJAMIN CARPENTER—*Des-ka-he*. More than Eleven. Cayuga.
 JOHN FRASIER—*Astaw-en-ser-on-ha*. Rattler. Mohawk.
 JOSEPH PORTER—*Oron-ya-de-ka*. Burning Sky. Oneida.
 HENRY CLENCH—*Kan-oq-wa-ya*. Corn Cob. Oneida.
 LEVI JONATHAN—*Kad-ar-gua-ji*. Well Bruised. Onondaga.
 PETER POWLESS—*Sa-de-ka-ri-wa-de*. Two Stories Alike. Mohawk.
 MOSES HILL—*Fyo-gwa-wa-ken*. Holding Company. Tuscarora.
 JOHN BUCK—*Sha-na-wa-de*. Beyond the Swamp. Onondaga.
 JAMES JAMISON—*De-yo-no-do-gen*. Between Two Mountains. Cayuga.
 JOHN HILL. Seneca.
 ROBERT DAVID—*Sakoyewatha*. Keeper Awake. Cayuga.

JOSIAH HILL—*Sa-ko-ka-ryes*. Cannibal. Tuscarora. Nanticokes, now mixed with Tuscaroras.

REV. ALBERT ANTHONY—*She-quack-nind*. The Lone Pine. Delaware. Missionary to Six Nations. A Delaware chief.

MISS JESSIE OSBORNE—*Sa-pa-na*. The Lily. Mohawk, and great granddaughter of Captain Brant, Mohawk.

MISS EVA H. JOHNSON—*Ka-ra-wa-na*. Drifting Canoe. Miss E. PAULINE JOHNSON—*Ken-yen-neen-tha*. The Snow Drift. Daughters of the late chief, George H. M. Johnson. Residence, Chiefswood, Tuscarora, Canada. Mohawk.

J. T. GILKISON, Brantford, Ontario. Superintendent and commissioner of the Six Nations Indians, Brantford, Canada.

For historical information relating to the Iroquois and Six Nations, see "The Life and Times of Red Jacket—Sago-ye-wat-ha, being the sequel to the History of the Six Nations," by Col. William L. Stone, 1841, and the "League of the Hode-no-san-nec, or Iroquois," by Lewis A. Morgan, Rochester, 1851.

MO-HEE-CON-NEU, OR "MO-HE-GAN," THE GOOD CANOE-MEN.

[Stockbridge: Laws of the United States. Stockbridge: Indian Bureau, June, 1885.]

Numbers 400 or 500; formerly of Massachusetts; a band of the famous tribe of Pequots; now semi-civilized.

Mr. Catlin was with these Indians in 1830 at New Stockbridge and Brotherton, in Western New York. They were subsequently removed to Wisconsin. (See below.)

272. Ee-tow-o-kaum, Both Sides of the River; chief of the tribe, with a psalm-book in one hand and a cane in the other. Christianized. Painted in 1831.

(Plate No. 199, page 102, vol. 2, Catlin's Eight Years.)

The chief of this tribe, *Ee-tow-o-kaum* (Both Sides of the River, No. 272), is a very shrewd and intelligent man, and a professed, and I think sincere Christian.

273. Waun-naw-con, The Dish (John W. Quinney); missionary preacher. Civilized. Painted in 1830.

(Plate No. 200, page 102, vol. 2, Catlin's Eight Years.)

Waun-naw-con (The Dish), John W. Quinney, in civilized dress, is a civilized Indian, well educated, speaking good English, is a Baptist missionary preacher, and a very plausible and eloquent speaker.

MR. CATLIN'S NOTES ON THE MO-HE-CON-NEUH, OR MOHEGAN INDIANS.

There are 400 of this once powerful and still famous tribe residing near Green Bay, on a rich tract of land given to them by the Government, in the Territory of Wisconsin, near Winnebago Lake, on which they are living very comfortably, having brought with them from their former country, in the State of Massachusetts, a knowledge of agriculture, which they had there effectually learned and practiced. [Written in 1848.]

This tribe are the remains and all that are left of the once powerful and celebrated tribe of Pequots of Massachusetts. History tells us that in their wars and dissensions with the whites a considerable portion of the tribe moved off under the com-

mand of a rival chief, and established a separate tribe or band, and took the name of Mo-hec-con-neuhs, which they have preserved until the present day; the rest of the tribe having long since been extinct.—G. C.

ALGONKIN—PEQUODS.

(SEE ALGONKINS.)

Of the five principal nations of New England in 1674, the Pequods or Mohegans, the two being considered as one, were tribes of considerable influence and strength of numbers, claiming authority over all the Indians of the Connecticut Valley. Jonathan Edwards states that the language of the Stockbridge of Muhhekanew (Mohegan) was spoken throughout New England. Nearly every tribe had a different dialect, but the language was radically the same. Elliot's translation of the Bible is in a particular dialect of this language. The Stockbridges, so named from the place of their residence, were originally a part of the Housatonic tribe of Massachusetts, to whom the legislature of that State granted a section of land in 1736. They were subsequently removed to New Stockbridge and Brotherton, in Western New York, many other tribes of New England and also of New York joining them. They had good lands and fine farms, and were rapidly becoming worthy of citizenship, when, in 1857, they were removed to a reservation near Green Bay, Wisconsin; where they now remain, on which their agent reported no white man could obtain a comfortable livelihood by farming. They have been divided for some time into two bands, known as the "citizen" and "Indian" factions, the former having lived off from the reservation for the past twelve years. In 1875 one hundred and thirty-four of the "citizens" received their per capita share of the tribal property, and became private citizens of the United States. The tribe has one hundred and eighteen members remaining.—W. H. Jackson, 1877.

Nos. 1050, 1049, and 1065 of Hayden's Catalogue are fine specimens of Stockbridge and Brothertons.

PRESENT LOCATION AND NUMBER, JUNE 30, 1885.

Stockbridges at Green Bay Agency, Wisconsin, September, 1884, 136; August 1, 1885, 133. All civilized, and speak the English language.

Of the Stockbridges, Agent Andrews writes as follows, in September, 1884:

There is but a remnant of this tribe remaining, numbering only 136, several divisions of the tribe having been made, and a part each time becoming citizens. Under the existing laws of the State of Wisconsin nearly all the male portion of this tribe over twenty-one years of age are qualified electors, and I am unable to see any reason why the whole tribe should not become citizens and their tribal relations abandoned, and they brought under the influence and control of the laws of the State, but leaving their lands held in trust by the Government and exempt from taxation for a limited period; and I am inclined to the opinion that such a course would have a beneficial effect upon the morals of the members of this tribe and greatly improve their present condition.

DEL-A-WARES.

[Delawares: Laws of the United States. Delawares: Indian Bureau, June, 1885.]

Remains of a bold, daring, and numerous tribe, formerly of the States of Pennsylvania and Delaware, and the terror of all the eastern tribes. Gradually wasted away by wars, removals, small-pox, and whisky; now living on the western borders of Missouri, and number only 824; lost by small-pox at different times, 10,000.

Mr. Catlin saw the Delawares on their reservation on the Kaw, now Kansas, River, in 1831-'32.

274. Bó-d-a-sin ———; the chief; a distinguished man. (No plate.)

275. Ni-có-man, the Answer; the second chief, with bow and arrows in his hand. Painted in 1831-'32.

(Plate No. 197, page 102, vol. 2, Catlin's Eight Years.)

276. Non-on-dá-gon, ———; a chief, with a ring in his nose. Painted in 1831-'32. (Plate No. 198, page 102, vol. 2, Catlin's Eight Years.)

Non-on-dá-gon, with a silver ring in his nose, is another of the chiefs of distinction, whose history I admired very much, and whom, from his gentlemanly attentions to me, I became much attached to. In both of these instances (Nos. 275, 276) their dresses were principally of stuffs of civilized manufacture, and their heads were bound with vari-colored handkerchiefs or shawls, which were tastefully put on like a Turkish turban.—G. C.

MR. CATLIN'S NOTES ON THE DELAWARE INDIANS.

The very sound of this name [Delawares] has carried terror wherever it has been heard in the Indian wilderness; and it has traveled and been known, as well as the people, over a very great part of the continent. This tribe originally occupied a great part of the eastern border of Pennsylvania, and great part of the States of New Jersey and Delaware. No other tribe on the continent has been so much moved and jostled about by civilized invasions; and none have retreated so far, or fought their way so desperately, as they have honorably and bravely contended for every foot of the ground they have passed over. From the banks of the Delaware to the lovely Susquehanna, and *my native valley*, and to the base of and over the Alleghany Mountains, to the Ohio River, to the Illinois and the Mississippi, and at last to the west of the Missouri, they have been moved by treaties after treaties with the Government, who have now assigned to the mere handful of them that are left a tract of land, as has been done a dozen times before, in *fee simple, forever!* In every move the poor fellows have made they have been thrust against their wills from the graves of their fathers and their children, and planted, as they now are, on the borders of new enemies, where their first occupation has been to take up their weapons in self-defense, and fight for the ground they have been planted on. There is no tribe, perhaps, amongst which greater and more continued exertions have been made for their conversion to Christianity—and that ever since the zealous efforts of the Moravian missionaries, who first began with them—nor any amongst whom those pious and zealous efforts have been squandered more in vain, which has, probably, been owing to the bad faith with which they have so often and so continually been treated by white people, which has excited prejudices that have stood in the way of their mental improvement.

This scattered and reduced tribe, which once contained some 10,000 or 15,000, numbers at this time but 800; and the greater part of them have been, for the fifty or sixty years past, residing in Ohio and Indiana. In these States their reservations became surrounded by white people, whom they dislike for neighbors, and their lands too valuable for Indians, and the certain consequence has been that they have sold out and taken lands west of the Mississippi, onto which they have moved, and on which it is, and always will be, almost impossible to find them, owing to their desperate disposition for roaming about, indulging in the chase and in wars with their enemies.

The wild frontier on which they are now placed affords them so fine an opportunity to indulge both of these propensities, that they will be continually wandering in little and desperate parties over the vast buffalo plains, and exposed to their enemies, till at last the new country, which is given to them in "*fee simple, forever,*" and which is destitute of game, will be deserted, and they, like the most of the removed remnants of tribes, will be destroyed, and the faith of the Government well preserved, which has offered *this* as their *last move*, and these lands as *theirs in fee simple, forever.*

NON-ON-DÁ-GON.

Delaware chief. No. 276, page 198.
(Plate 198, Vol. II, Catlin's Eight Years.)

NICÓ-MAN, THE ANSWER.

Delaware, No. 275, page 198.
(Plate 197, Vol. II, Catlin's Eight Years)

LAY-LÁW-SHE-KAW, HE WHO GOES UP THE RIVER.

An aged Shawnee chief. No. 277, page 200.
(Plate 211, Vol. II, Catlin's Eight Years.)

TEN-SQUAT-A-WAY, THE OPEN DOOR.

Brother of Tecumseh. No. 279, page 201.
(Plate 214, Vol. II, Catlin's Eight Years.)

In my travels on the Upper Missouri and in the Rocky Mountains I learned, to my utter astonishment, that little parties of these adventurous myrmidons, of only six or eight in numbers, had visited those remote tribes, at two thousand miles distance, and in several instances, after having cajoled a whole tribe—having been feasted in their villages, having solemnized the articles of everlasting peace with them, and received many presents at their hands, and taken affectionate leave—have brought away six or eight scalps with them, and, nevertheless, braved their way and defended themselves as they retreated in safety out of their enemies' country and through the regions of other hostile tribes, where they managed to receive the same honors and come off with similar trophies.

Amongst this tribe there are some renowned chiefs, whose lives, if correctly written, would be matter of the most extraordinary kind for the reading world, and of which it may be in my power at some future time to give a more detailed account.—G. C.

ALGONKIN—DELAWARES.

When first discovered by the whites the Delawares were living on the banks of the Delaware in detached bands under separate sachems, and called themselves Renappi—a collective term for men—or, as it is now written, Lenni Lenâpe. In 1616 the Dutch began trading with them, maintaining friendly relations most of the time, and buying so much of their land that they had to move inland for game and furs. William Penn and his followers succeeding, kept up the trade and bought large tracts of land, but the Indians claimed to have been defrauded, and showed a reluctance to move. They then numbered about 6,000. With the assistance of the Indians of the Six Nations the authorities compelled the Delawares to retire. At the beginning of the Revolution there were none east of the Alleghanies. By treaty in 1789 lands were reserved to them between the Miami and Cuyahoga and on the Muskingum, in Ohio. They were called by the Indians of the Northwest Territory *Elanab'ah*, or people from the sunrise. In 1818 the Delawares ceded all their lands to the Government and removed to White River, Missouri, to the number of 1,800, leaving a small number in Ohio. Another change followed eleven years after (1829), when 1,000 settled by treaty on the Kansas and Missouri Rivers, the rest going south to Red River.

During the late rebellion they furnished 170 soldiers out of an able-bodied male population of 201 to the Union cause; in 1866 sold their land to the railroad which ran across it, and buying land of the Cherokees, settled where the main body now resides, merging with the Cherokees, small bands being scattered about among the Wichitas and Kiowas.

In 1866, by a special treaty, they received and divided the funds held for their benefit, took lands in severalty, and ceased to be regarded as a tribe. They have given up their Indian ways and live in comfortable houses. Many of them are efficient farmers and good citizens. They are becoming so incorporated with other tribes that there has been no late enumeration made of them as a whole.—W. H. Jackson, 1877.

For an exhaustive history of the Delaware Indians, see "The Lenâpé and their legends, with a complete text and symbols of the *Walam Olum*—a new translation, and an inquiry into its authenticity, by Daniel G. Brinton, A. M., M. D.," etc. Philadelphia, 1885.

DELAWARES IN CANADA, JUNE, 1885.

A few Delawares, 130 in all, living near the remnant of the Six Nations, now reside on the Grand River Reserve, in Canada, near Brantford, Ontario. At the reinterment of the remains of Red Jacket, at Buffalo, N. Y., October 9, 1884, Rev. Albert Anthony (Lone Pine) and

three chiefs from Canada were present. In an interview they gave the following data as to the Delawares:

Our people [the Delawares] call themselves L'enäpe, meaning men, or the real or true men. We often speak of ourselves as the *Wa-pa-nachki*, or people of the morning,* in allusion to our supposed eastern origin. Our traditions affirm that at the period of the discovery of America our nation resided on the island of New York (Manhattan?). We called that island *Man-ä-hä-touh*, the place where timber is procured for bows and arrows. The word is compounded of *N'man-hum-in*, I gather, and *tan-ning*, at the place. At the lower end of the island was a grove of hickory trees of peculiar strength and toughness. Our fathers held this timber in high esteem as material for constructing bows, war clubs, &c.

When we were driven back by the whites our nation became divided into two bands, one was termed *Minsi*, the great stone, the other was called *We-naw-mien*, down the river, they being located farther down the stream than our settlement.

We called the Susquehanna *A-theth-qua-nee*, the roily river. The Monongahela was called *Me-kman-nau-wing-geh-lau*, many landslides.

When we lived on the banks of that river, say as late as one hundred and thirty years ago, a herd of bisons used annually to come down the western bank of the river. We called this animal *Ah-pa-quah-checoë*, wild cow. The Alleghany Mountains were called by us *Al-lick-e-wa-ny*, he is leaving us and may never return. Reference is made, I suppose, to departing hunters or warriors who were about to enter the passes of those rugged mountains.

There are about 130 of our people residing on the Grand River Reserve; the residue are scattered over the continent.—Transactions of the Buffalo (N. Y.) Historical Society, "Red Jacket," vol. 3, pages 102, 103, 1885.

PRESENT LOCATION AND NUMBER IN THE UNITED STATES.

Delawares at Kiowa, Comanche, and Wichita Agency, Indian Territory, June, 1884, 74; August 31, 1885, 71. Slowly decreasing. Civilized. Farmers and herders.

Delawares, near the Cherokees, one of the five civilized tribes in Indian Territory, supposed to be about 1,000. Civilized. Farmers and herders. Joined the Cherokees in 1866; tribal relations abandoned.

(See Hayden's Portraits; and also title Cherokee, herein.)

SHA-WÁ-NO (SHAW-NEE).

[Shawnee: Laws of the United States. Shawnee and Shawano: Indian Bureau, June, 1885.]

Remains of a numerous tribe, formerly inhabiting part of Pennsylvania, afterwards Ohio, and recently removed west of the Mississippi River. Number at present about 1,200; lost one-half by small-pox at different times. Semi-civilized; intemperate.

Mr. Catlin visited them in 1831, on the Kon-zas (Kansas) River.

277. *Lay-law-she-kaw*, He who Goes up the River; a very aged man, chief of the tribe; his ears slit and elongated by wearing weights in them, according to the custom of the tribe, and his hair whitened with age. Painted in 1831.

(Plate No. 211, page 116, vol. 2, Catlin's Eight Years.)

A very aged but extraordinary man, with a fine and intelligent head, and his ears slit and stretched down to his shoulders, a custom highly valued in this tribe,

* The Senecas called the Delawares *Dyo-hens-govola*; literally, from whence the morning springs.

which is done by severing the rim of the ear with a knife, and stretching it down by wearing heavy weights attached to it at times, to elongate it as much as possible, making a large orifice, through which, on parades, &c., they often pass a bunch of arrows or quills and wear them as ornaments. In this instance (which was not an unusual one) the rims of the ears were so extended that they touched the shoulders, making a ring through which the whole hand could easily be passed.

- 278.* **Ká-te-quaw**, The Female Eagle; a fine-looking girl, daughter of the above chief. (See No. 277, *Lay-láw-she-kaw*.)
(See Plate No. 212, page 117, vol. 2, Catlin's Eight Years.)

Of this picture Mr. Catlin writes:

The daughter of this old chief (*La-láw-she-kaw*, No. 277), *Ka-te-quaw* (The Female Eagle), was an agreeable girl of fifteen years of age, and much thought of by the tribe.

279. **Ten-squát-a-way**, The Open Door; called the "Shawnee Prophet," brother of Tecumseh; blind in one eye, holding his *medicine* or mystery fire in one hand, and his "*sacred string of beans*" in the other, a great *mystery-man*.
(Plate No. 214, page 117, vol. 2, Catlin's Eight Years.)

Ten-squa-ta-way (The Open Door), called the *Shawnee Prophet*, is perhaps one of the most remarkable men who has flourished on these frontiers for some time past. This man is brother of the famous Tecumseh, and quite equal in his *medicines* or mysteries to what his brother was in arms; he was blind in his left eye, and in his right hand he was holding his *medicine fire* and his *sacred string of beans* in the other. With these mysteries he made his way through most of the northwestern tribes, enlisting warriors wherever he went to assist Tecumseh in effecting his great scheme of forming a confederacy of all the Indians on the frontier to drive back the whites and defend the Indians' rights, which he told them could never in any other way be protected. His plan was certainly a correct one, if not a very great one, and his brother, the Prophet, exercised his astonishing influence in raising men for him to fight his battles and carry out his plans. For this purpose he started upon an embassy to the various tribes on the Upper Missouri, nearly all of which he visited with astonishing success; exhibiting his mystery fire, and using his sacred string of beans, which every young man who was willing to go to war was to touch, thereby taking the solemn oath to start when called upon, and not to turn back.

In this most surprising manner this ingenious man entered the villages of most of his inveterate enemies, and of others who never had heard of the name of his tribe, and maneuvered in so successful a way as to make his medicines a safe passport for him to all of their villages; and also the means of enlisting in the different tribes some eight or ten thousand warriors, who had solemnly sworn to return with him on his way back, and to assist in the wars that Tecumseh was to wage against the whites on the frontier. I found, on my visit to the Sioux, to the Puncabs, to the Riccarees, and the Mandans, that he had been there, and even to the Blackfeet; and everywhere told them of the potency of his mysteries, and assured them that if they allowed the fire to go out in their wigwams, it would prove fatal to them in every case. He carried with him into every wigwam that he visited the image of a dead person of the size of life, which was made ingeniously of some light material, and always kept concealed under bandages of thin white muslin cloths and not to be opened; of this he made great mystery, and got his recruits to swear by touching a sacred string of white beans, which he had attached to its neck or some other way secreted about it. In this way, by his extraordinary cunning, he had carried terror into the country as far as he went, and had actually enlisted some eight or ten thousand men, who were sworn to follow him home; and in a few days would have

* Lost or destroyed.

been on their way with him, had not a couple of his political enemies in his own tribe followed on his track, even to those remote tribes, and defeated his plans by pronouncing him an imposter and all of his forms and plans an imposition upon them, which they would be fools to listen to. In this manner this great recruiting officer was defeated in his plans for raising an army of men to fight his brother's battles; and to save his life he discharged his medicines as suddenly as possible, and secretly traveled his way home, over those vast regions, to his own tribe, where the death of Tecumseh and the opposition of enemies killed all his splendid prospects and doomed him to live the rest of his days in silence and a sort of disgrace, like all men in Indian communities who pretend to *great medicine*, in any way, and fail, as they all think such failure an evidence of the displeasure of the Great Spirit, who always judges right.

This, no doubt, has been a very shrewd and influential man, but circumstances have destroyed him, as they have many other great men before him; and he now lives respected, but silent and melancholy in his tribe. I conversed with him a great deal about his brother Tecumseh, of whom he spoke frankly, and seemingly with great pleasure; but of himself and his own great schemes he would say nothing. He told me that Tecumseh's plans were to embody all the Indian tribes in a grand confederacy, from the province of Mexico to the Great Lakes, to unite their forces in an army that would be able to meet and drive back the white people, who were continually advancing on the Indian tribes and forcing them from their lands towards the Rocky Mountains; that Tecumseh was a great general, and that nothing but his premature death defeated his grand plan.

Ten-squat-a-way (Open Door), the Prophet, brother of Tecumthe, [see portrait.—McKenny & Hall, vol. 1, page 38,] one of three brothers born at a birth at Old Chillicothe (Ohio), in 1775.

His name, The Open Door, was intended to represent him as the way, or door, which had opened for the deliverance of the red people from the incoming whites. His town on the Wabash (Indiana) was known as the "Prophets' town." He was an emissary of evil in the interest of Tecumthe and ———.

The Prophet possessed neither the talents nor the frankness of his brother. As a speaker he was fluent, smooth, and plausible, and was pronounced by Governor Harrison the most graceful and accomplished orator he had seen amongst the Indians; but he was sensual, cruel, weak, and timid. He never spoke when Tecumthe was present. At the council at Vincennes, in 1810, The Prophet stood quietly unmoved while his brother Tecumthe objected to a former land treaty, saying, "What, sell a country; why not sell the air, the clouds, and the great sea, as well as the earth? Did not the Great Spirit make them all for the use of his children?"

The Prophet was an extensive polygamist, having an unusual number of wives, whom he forced to work for him. His history is inseparable from that of his brother Tecumthe, up and to the death of the latter at the battle of the Thames in 1812. After the death of Tecumthe The Prophet dropped to the dignity of an ordinary Indian, and quietly passed away.

280.* *Pah-te-coo-saw*, The Straight Man; semi-civilized.

(See Plate No. 213, page 117, vol. 2, Catlin's Eight Years.)

Of this picture Mr. Catlin writes:

Pah-te-coo-saw, The Straight Man (Plate No. 214), a warrior of this tribe, has distinguished himself by his exploits; and when he sat for his picture had painted his face in a very curious manner with black and red paint.

281. *Lay-lóo-ah-pee-ái-shee-kaw*, Grass, Bush, and Blossom; half civil, and more than half drunk. Painted 1831. (No plate.)

Besides the personages whom I have above mentioned, I painted the portraits of several others of note in the tribe, and amongst them *Lay-loo-ah-pe-ai-shee-kaw* (Grass,

Bush, and Blossom), whom I introduce in this place, rather from the very handy and poetical name than from any great personal distinction known to have been acquired by him.

232. *C6o-po-saw-quay-te*, Woman (the indescribable). (No plate.)

This portrait is not mentioned in Catlin's *Eight Years*—no outline drawing made by Mr. Catlin, and not noted in the catalogue of the Cartoon Collection.

MR. CATLINS NOTES ON THE SHAWNEE INDIANS.

The history of this once powerful tribe is so closely and necessarily connected with that of the United States and the Revolutionary war that it is generally pretty well understood. This tribe formerly inhabited great parts of the States of Pennsylvania, New Jersey, and (for the last sixty years) a part of the States of Ohio and Indiana, to which they had removed; and now a considerable portion of them, a tract of country several hundred miles west of the Mississippi, which has been conveyed to them by Government in exchange for their lands in Ohio, from which it is expected the remainder of the tribe will soon move. It has been said that this tribe came formerly from Florida, but I do not believe it. The mere fact that there is found in East Florida a river by the name of *Su-wa-nee*, which bears some resemblance to *Shawa-no*, seems, as far as I can learn, to be the principal evidence that has been adduced for the fact. They have evidently been known, and that within the scope of our authenticated history, on the Atlantic coast—on the Delaware and Chesapeake Bays—and after that have fought their way against every sort of trespass and abuse, against the bayonet and disease, through the States of Pennsylvania, Delaware, Ohio, Indiana, Illinois, and Missouri, to their present location near the Kon-zas River, at least fifteen hundred miles from their native country.

This tribe and the Delawares, of whom I have spoken, were neighbors on the Atlantic coast, and alternately allies and enemies, have retrograded and retreated together, have fought their enemies united, and fought each other, until their remnants that have outlived their nation's calamities have now settled as neighbors together in the western wilds, where, it is probable, the sweeping hand of death will soon relieve *them* from further necessity of warring or moving, and the *Government* from the necessity or policy of proposing to them a yet more distant home. In their long and disastrous pilgrimage, both of these tribes laid claim to and alternately occupied the beautiful and renowned valley of Wy-ô-ming; and after strewing the Susquehanna's lovely banks with their bones and their tumuli, they both yielded at last to the dire necessity which follows all civilized intercourse with natives, and fled to the Allegheny, and at last to the banks of the Ohio, where necessity soon came again, and again, and again, until the great *Guardian of all red children* placed them where they now are.

There are of this tribe remaining about 1,200, some few of whom are agriculturists, and industrious and temperate and religious people, but the greater proportion of them are miserably poor and dependent, having scarcely the ambition to labor or to hunt, and a passion for whisky-drinking that sinks them into the most abject poverty, as they will give the last thing they possess for a drink of it.

There is not a tribe on the continent whose history is more interesting than that of the Shawanos, nor any one that has produced more extraordinary men.

The great Tecumseh, whose name and history I can but barely allude to at this time, was the chief of this tribe, and perhaps the most extraordinary Indian of his age.

"The Shawanos," like most of the other remnants of tribes, in whose countries the game has been destroyed, and by the use of whisky have been reduced to poverty and absolute want, have become, to a certain degree, agriculturists; raising corn and

beans, potatoes, hogs, horses, &c., so as to be enabled, if they could possess anywhere on earth, a country which they could have a certainty of holding in perpetuity, as their own, to plant and raise their own crops and necessities of life from the ground.

The Government have effected with these people, as with most of the other dispersed tribes, an arrangement by which they are to remove west of the Mississippi, to lands assigned them, on which they are solemnly promised a home *forever*, the uncertain definition of which important word time and circumstances alone will determine.—G. C.

ALGONKIN—SHAWNEE.

The Shawnees or Shawanoes are an erratic tribe of Algonkin stock, supposed to have been one primarily with the Kickapoos. Were first discovered in Wisconsin, but moved eastwardly, and, coming in contact with the Iroquois south of Lake Erie, were driven to the banks of the Cumberland. Some passed thence into South Carolina and Florida, and, by the early part of the eighteenth century, had spread into Pennsylvania and New York. At the close of the Spanish and English war those in Florida emigrated and joined the northern bands, and, again coming into contact with the Iroquois, were driven westward into Ohio. Joined in Pontiac's uprising in 1763, and rallied under the English flag during the Revolution. In 1795 the main body of the tribe were on the Scioto, but some had already crossed the Mississippi and others south. Those in Missouri ceded their lands to the Government in 1825, and those in Ohio in 1831, for new homes in the Indian Territory. In 1854 the main body in the Indian Territory disbanded their tribal organization and divided their lands in severalty.

The *Eastern Shawnees* are those who emigrated direct from Ohio to the Indian Territory, where they now are. They number 97, and are successful agriculturists.

The *Absentee Shawnees* are those who, thirty-five years since, seceded from the main portion of the tribe in Kansas and located in the northern part of the Indian Territory, where they have received no aid from Government, but are now in a highly prosperous condition. They number 563 at the present time.—W. H. Jackson, 1877.

(See also "An Inquiry into the Identity and History of the Shawnee Indians," C. C. Royce, Magazine of Western History, May, 1885.)

PRESENT LOCATION AND NUMBER.

Eastern Shawnees, at Quawpaw Agency, Indian Territory, in June, 1884, 71; August, 1885, 69. Decreasing. Civilized. Farmers.

Agent W. H. Robb writes, August 31, 1884:

These people are for the most part intelligent, well behaved, desiring to improve and have their children grow up better than they themselves have been; they are all well advanced in civilization.

Absentee Shawnees at Sac and Fox Agency, Indian Territory, in August, 1884, 720; in August, 1885, 710. Decreasing.

Isaac A. Taylor, agent, writes, August 31, 1884:

The Absentee Shawnees are living on the same reservation with the Pottawatomies, with the exception of those who left some years ago and settled on the reservations now occupied by the Iowas and Mexican Kickapoos, where they have opened up small farms and are doing moderately well. There are about 720 Absentee Shawnees under the charge of this agency, who are entitled to homes on the 30-mile-square tract of land, as described, upon which the Pottawatomies are now living. They take their name from the fact of having separated from the Shawnee tribe of Indians long

years ago, and never rejoining them. It is a strong desire with them to live alone; consequently the opposition to allotting on the same reservation with the Pottawatomies, urging that they had settled on these lands long before the Pottawatomies, and that the land by right is theirs.

These people are engaged in raising hogs, ponies, and cattle, and are the most extensive agriculturists in this agency. Besides their gardening they will average about 8 acres of corn to the family.

Some Shawnees reside with the Cherokees in Indian Territory. Number not given.

CHEROKEES.

[Cherokee: Laws of the United States. Cherokee: Indian Bureau, June, 1885.]

Formerly of the State of Georgia, recently removed west of the Mississippi to the headwaters of the Arkansas. This tribe are mostly civilized and agriculturists; number, 22,900.

Mr. Catlin was with the Cherokees, near Fort Gibson, in 1836.

283. John Ross, a civilized and well educated man; head chief of the nation.

Painted in 1836.

(See Plate No. 215, page 119, vol. 2, Catlin's Eight Years.)

Of this picture and man, Mr. Catlin writes:

John Ross, a civilized and highly educated and accomplished gentleman, who is the head chief of the tribe.

This man, like most of the chiefs, as well as a very great proportion of the Cherokee population, has a mixture of white and red blood in his veins.

The Cherokees amount in all to about 22,000, 16,000 of whom are yet living in Georgia, under the Government of their chief, John Ross, whose name I have before mentioned. With this excellent man, who has been for many years devotedly opposed to the treaty stipulations for moving from their country, I have been familiarly acquainted; and, notwithstanding the bitter invective and animadversions that have been by his political enemies heaped upon him, I feel authorized, and bound to testify to the unassuming and gentlemanly urbanity of his manners, as well as to the rigid temperance of his habits, and the purity of his language, in which I never knew him to transgress for a moment, in public or private interviews.—G. C.

Shortly after Mr. Catlin wrote the above the remainder of the Cherokees were removed to beyond the Mississippi River.

In the movement for the civilization and adoption of an independent government among the Cherokees, John Ross, Elias Boudinot, John Ridge, and other Cherokees were pioneers from 1820 to 1848.

The most prominent man of this movement was John Ross, a Cherokee of the mixed blood. * * * [See portrait, page 176, vol. 3, McKenney & Hall.]

We must speak of him in general terms as the leader of his people in their exodus from the land of their nativity to a new country, and from the savage state to that of civilization. Through the whole of this interesting and exciting movement he has been an efficient actor, and, of some of the most important events the prime mover. He has no fame as a warrior, nor do we know that he has ever been in the field. His talents are those of the civilian. Plain and unassuming in his appearance, of calm and quiet deportment, he is a man of great sagacity and of untiring energy. Assiduous in the pursuit of his objects, he has spent many of his winters at Washington, where he was well known to all the leading statesmen and to the philanthropists

who concern themselves about the affairs of the neglected aborigines, while the remainder of his time had been actively employed among his own people. So far as we can judge of his character by his acts, we believe him to be an able man, who has done good service for his people.—McKenney & Hall, vol. 3, page 176.

Mr. Ross was born in Georgia, about 1790, and died at Washington City, August 1, 1866. He was a man of pronounced and marked executive ability, and was the leader of the "Ross party," amongst the Cherokees.

This picture is not in the cartoon collection.

284. Tuck-ee, called "Dutch," first war chief of the Cherokees; a fine looking fellow with a turbaned head. Painted in 1836.

(See Plate No. 218, pages 121, 122, vol. 2, Catlin's Eight Years.)

Of this picture and person Mr. Catlin writes :

Besides the Cherokees in Georgia, and those that I have spoken of in the neighborhood of Fort Gibson, there is another band or family of the same tribe, of several hundreds, living on the banks of the Canadian River, a hundred or more miles south-west of Fort Gibson, under the government of a distinguished chief by the name of *Tuck-ee*, familiarly called by the white people "*Dutch*." This is one of the most extraordinary men that lives on the frontiers at the present day, both for his remarkable history and for his fine and manly figure and character of face.

This man was in the employment of the Government as a guide and hunter for a regiment of dragoons, on their expedition to the Camanchees, where I had him for a constant companion for several months, and opportunities in abundance for studying his true character and of witnessing his wonderful exploits in the different varieties of the chase. The history of this man's life has been very curious and surprising; and I sincerely hope that some one, with more leisure and more talent than myself, will take it up and do it justice. I promise that the life of this man furnishes the best materials for a popular tale that are now to be procured on the western frontier.

He is familiarly known, and much of his life, to all the officers who have been stationed at Fort Gibson or at any of the posts in that region of the country.

Some twenty years or more since, becoming fatigued and incensed with civilized encroachments that were continually making on the borders of the Cherokee country in Georgia, where he then resided, and probably foreseeing the disastrous results they were to lead to, he beat up for volunteers to emigrate to the West, where he had designed to go and colonize in a wild country beyond the reach and contamination of civilized innovations, and succeeded in getting several hundred men, women, and children, whom he led over the banks of the Mississippi, and settled upon the headwaters of the White River, where they lived until the appearance of white faces, which began to peep through the forests at them, when they made another move of six hundred miles, to the banks of the Canadian, where they now reside, and where by the system of desperate warfare which he has carried on against the Osages and the Camanchees, he has successfully cleared away from a large tract of fine country all the enemies that could contend for it, and now holds it, with his little band of myrmidons, as their own undisputed soil, where they are living comfortably by raising from the soil fine crops of corn and potatoes and other necessities of life; whilst they indulge, whenever they please, in the pleasures of the chase amongst the herds of buffaloes, or in the natural propensity for ornamenting their dresses and their war clubs with the scalp lock of their enemies.—G. C.

In the Cartoon Catalogue, page 23, cartoon No. 71 *b*, this picture is noted as "*Tuck-ee* (called Dutch), chief of a band, one of the most celebrated of the frontier Indians of the United States."

JOHN ROSS.

Head chief of Cherokees. No. 283, page 205.
(Plate 215, Vol. II, Catlin's Eight Years.)

TÛCH-EE, DUTCH.

First war chief of the Cherokees. No. 284, page 206.
(Plate 218, Vol. II, Catlin's Eight Years.)

AH-HEE-TE-WAH-CHEE.

Cherokee woman. No. 287, page 208.
(Plate 220, Vol. II, Catlin's Eight Years.)

Tahchee—Cherokee word for Dutch. Born at Turkeytown, on the Coosa River, now Alabama, about 1790.

He was five feet eleven inches in height, of admirable proportions, flexible and graceful in his movements, and possessed great muscular power and activity, while his countenance expressed a coolness, courage, and decision which accord well with his distinguished reputation as a warrior.

The treaty made by the United States with the Cherokees in the year 1828 gave great dissatisfaction to many of that tribe, and was so offensive to Dutch that he determined to abandon the country. He removed to Red River, and thence, after three years, to Bowler settlement, in Texas. Here he became so violent a partisan in the Indian wars that Colonel Arbuckle, the commander of the American forces, offered a reward of \$500 for his capture.

Intelligence of this was carried to Dutch, who received it with contempt. To show his daring, he set out toward the fort, reaching a trading-house on the river Neosho, wherein were some friendly Osage Indians. Just alongside of the fort he attacked the Indians, and killed and scalped one. With his rifle in one hand and the scalp in the other, he escaped by jumping down a precipice, amidst a shower of balls. He escaped to Red River.

Shortly after this the offer of reward for him was withdrawn by Colonel Arbuckle, and Dutch became a friend of the whites. He was a great hunter and guide, and was employed by the United States authorities in this capacity for years.

He built a home on the Canadian River, where he had large herds of cattle and horses.

He was a man of sound character, and one to be relied upon. As a warrior none stood higher amongst the Indians. He was engaged in more than thirty battles with the Osage and other Indians, and killed with his own hands twenty-six of his adversaries. He died about 1843.

285. C61-lee (Jol-lee?), chief of a band of the Cherokees. (Since dead.) Painted in 1836.

(Plate No. 217, page 119, vol. 2, Catlin's Eight Years.)

Six or seven thousand of the tribe (Cherokees) have several years since removed to the Arkansas, under the guidance and control of an aged and dignified chief by the name of *Jol-lee*.

This man, like most of the chiefs, as well as a very great proportion of the Cherokee population, has a mixture of white and red blood in his veins, of which, in this instance, the first seems decidedly to predominate.—G. C.

286. Téh-ke-neh-kee, The Black Coat, a chief also of considerable standing. Painted in 1836. (No plate.)

Another chief, and second to this, amongst this portion of the Cherokees, by the name of Teh-ke-neh-kee (The Black Coat), I have also painted and placed in my collection.—G. C.

287.* *Ah-hee-te-wàh-chee*, a very pretty woman, in civilized dress, her hair falling over her shoulders. Painted in 1836.

(See Plate No. 216, page 119, vol. 2, Catlin's Eight Years.)

Mr. Catlin's observations on this picture will be found on page 119, vol. 2 of his *Eight Years*—a mere incidental mention.

A series of Cherokee portraits are given in the *Hayden Catalogue*, Nos. 66 to 72, page 103.

MR. CATLIN'S NOTES ON THE CHEROKEE INDIANS.

The Cherokees living in the vicinity of and about Fort Gibson, on the Arkansas, and seven hundred miles west of the Mississippi River, are a third part or more of the once very numerous and powerful tribe who inhabited and still inhabit a considerable part of the State of Georgia, and under a treaty made with the United States Government have been removed to those regions, where they are settled on a fine tract of country; and having advanced somewhat in the arts and agriculture before they started, are now found to be mostly living well, cultivating their fields of corn and other crops, which they raise with great success.

Under a serious difficulty existing between these people (who by former solemn treaties with the United States Government were acknowledged a free and independent nation, with powers to make and enforce their own laws) and the State of Georgia, which could not admit such a government within her sovereignty, it was thought most expedient by the Government of the United States to propose to them, for the fourth or fifth time, to enter into treaty stipulations again to move, and by so doing to settle the difficult question with the State of Georgia, and at the same time to place them in peaceable possession of a large tract of fine country, where they would forever be free from the continual trespasses and abuses which it was supposed they would be subjected to if they were to remain in the State of Georgia, under the present difficulties and the highly excited feelings which were then existing in the minds of many people along their borders.

I have traveled pretty generally through the several different locations of this interesting tribe, both in the western and eastern divisions, and have found them, as well as the Choctaws and Creeks, their neighbors, very far advanced in the arts, affording to the world the most satisfactory evidences that are to be found in America of the fact that the Indian was not made to shun and evade good example, and necessarily to live and die a brute, as many speculating men would needs record them and treat them, until they are robbed and trampled into the dust; that no living evidences might give the lie to their theories, or draw the cloak from their cruel and horrible iniquities.

As I have repeatedly said to my readers, in the course of my former epistles, that the greater part of my time would be devoted to the condition and customs of the tribes that might be found in their primitive state, they will feel disposed to pardon me for barely introducing the Cherokees and several others of these very interesting tribes, and leaving them and their customs and histories (which are of themselves enough for volumes) to the reader, who is, perhaps, nearly as familiar as I am myself with the full and fair accounts of these people, who have had their historians and biographers.

The history of the Cherokees and other numerous remnants of tribes, who are the exhabitants of the finest and most valued portions of the United States, is a subject of great interest and importance, and has already been woven into the most valued histories of the country, as well as forming material parts of the archives of the Government, which is my excuse for barely introducing the reader to them, and beckoning him off again to the native and untrodden wilds, to teach him something new and unrecorded. Yet I leave the subject as I left the people (to whom I became attached,

* Lost or destroyed.

for their kindness and friendship), with a heavy heart, wishing them success and the blessing of the Great Spirit, who alone can avert the *doom* that would almost seem to be fixed for their unfortunate race.

At this time the most strenuous endeavors are making on the part of the Government and the State of Georgia for the completion of an arrangement for the removal of the whole of this tribe, as well as of the Choctaws and Seminoles; and I have not a doubt of their final success, which seems, from all former experience, to attend every project of the kind made by the Government to their red children.*—G. C.

IROQUOIS—CHEROKEES.

When first discovered the Cherokees were occupying the mountainous country about the headwaters of the Tennessee River and portions of Georgia and South Carolina, up to 1830. They form a family by themselves, supposed, however, to be somewhat remotely connected with the great Iroquois family. They call themselves in their language Tsaraghee. According to their traditions they came to this country before the Creeks, dispossessing a people of whom there is no record. Before and during the Revolution they were friendly to and aided the English. A treaty of peace was made with them by which they acknowledged the sovereignty of the United States November 23, 1785, and were confirmed in the possession of their lands, occupying a considerable portion of Tennessee and parts of North Carolina, Georgia, Alabama, and Mississippi. Commenced migrating to the trans-Mississippi country as early as 1790, consequent upon the encroachments of civilization, and in 1818 3,000 more emigrated. As frequent cessions of their lands had reduced their territory to less than 8,000 square miles in extent, and also in consequence of the hostility of the Georgians, they were all removed in 1838 to their present reservation in the Indian Territory, excepting about 1,000, who remained in North Carolina. At the opening of the war of the rebellion they had progressed to a high degree of prosperity, but suffered great injury from both parties ravaging their country, and also in the emancipation of their slaves. Nearly all the Cherokees at first joined the Confederacy but after the fight at Pea Ridge, 9,000, under Colonel Downing, with a majority of the nation, abandoned the Southern cause and joined the Union forces; 6,500 adhered to the Confederacy to the end. At the time of their removal west the Cherokees numbered about 27,000. In 1867 they were reduced to 13,566, but since then have increased, so that they now number about 18,000. There are about 1,700 yet in North Carolina, in a prosperous condition, owning about 70,000 acres of land.

The reservation in the Indian Territory comprises about 5,000,000 acres, only one-third of it capable of cultivation, and of which they are now working some 90,000 acres. Their crops for 1875 aggregated 630,000 bushels corn, 70,000 bushels wheat, 35,000 bushels oats, 50,000 tons hay, 500,000 feet of lumber, &c. They have 63 schools, attended by nearly 2,000 children, that are supported by a fund of \$1,580,000 held by the United States. Under their present constitution they are governed by a national committee and council elected for two years. The executive, or chief, is elected for four years.

The following portraits show the effects of the civilizing influences they have been living under, and also the extensive admixture of white blood among them by intermarriage.—W. H. Jackson, 1877.

PRESENT LOCATION AND NUMBERS, 1885-1886

Cherokees (Eastern) in North Carolina, Georgia, and Tennessee, 3,000; civilized farmers.

* Since writing the above the Government have succeeded in removing the remainder of the Cherokees beyond the Mississippi, where they have taken up their residence alongside of their old friends, who emigrated several years since under *Jol-lee*, as I have before mentioned. In the few years past the Government has also succeeded in stipulating with, and removing west of the Mississippi, nearly every remnant of tribes spoken of in this and the last two letters.—G. C., 1838.

The North Carolina Cherokee Agency is at Nantahalalah, N. C.

Cherokees at Union Agency, Indian Territory, one of the five civilized tribes, 22,000; civilized.

The agent writes, August 29, 1884, "The number of full-blood Indians is decreasing."

(See also title, "The Five Civilized Tribes," page 221, herein.)

MUS-KÓ-GEE (CREEK).

[Creek: Laws of the United States. Creek: Indian Bureau, June, 1885.]

Recently removed from Georgia and Alabama to the Arkansas, 700 miles west of the Mississippi. Present number, 21,000; semi-civilized and agricultural.

Mr. Catlin visited them near Fort Gibson in 1836.

288. Steeh-tcha-kó-me-co, The Great King, called "Ben Perryman;" one of the chiefs of the tribe. Painted in 1836.

(Plate No. 219, page 122, vol. 2, Catlin's Eight Years.)

289. Hól-te-mál-te-téz-te-néek-ee, ———, "Sam Perryman;" brother of the chief above, and a jolly, companionable man. Painted in 1836.

(Plate No. 220, page 122, vol. 2, Catlin's Eight years.)

In Plates 219 (No. 288) and 220 (No. 289) I have given the portraits of two distinguished men, and I believe both chiefs. The first by the name of *Stee-cha-co-me-co* (The Great King), familiarly called "Ben Perryman;" and the other, *Hol-te-mal-te-tez-te-nechk-ee* (———), called "Sam Perryman." These two men are brothers, and are fair specimens of the tribe, who are mostly clad in calicoes and other cloths of civilized manufacture, tasseled and fringed off by themselves in the most fantastic way, and sometimes with much true and picturesque taste. They use a vast many beads and other trinkets to hang upon their necks and ornament their moccasins and beautiful belts.—G. C.

Perryman is the name of the Creek chief in 1885.

290. Wat-ál-le-go, ———; a brave.

291. Hose-put-o-káw-gee, ———; a brave.

292. Tchow-ee-pút-o-kaw, ———; woman.

293. Tel-maz-há-za, ———; a warrior of great distinction.

All painted in 1836; but no plates.

Series of Creek photographs are noted in Hayden's Catalogue, pages 95, 96, from Nos. 97 to 108.

(See also title, "The Five Civilized Tribes," page 221, herein.)

MR. CATLIN'S NOTES ON THE CREEK (OR MUS-KO-GEE) INDIANS.

Have, until quite recently, occupied an immense tract of country in the States of Mississippi and Alabama; but by a similar arrangement (and for a similar purpose) with the Government have exchanged their possessions there for a country adjoining to the Cherokees, on the south side of the Arkansas, to which they have already all removed, and on which, like the Cherokees, they are laying out fine farms and building good houses, in which they live, in many instances surrounded by immense fields of corn and wheat. There is scarcely a finer country on earth than that now owned by the Creeks; and in North America, certainly no Indian tribe more advanced in the

STEEH-TCHA-KÓ-ME-CO, THE GREAT KING, OR
BEN PERRYMAN.

(Plate 222, Vol. II, Catlin's Eight Years.)

arts and agriculture than they are. It is no uncommon thing to see a Creek with twenty or thirty slaves at work on his plantation, having brought them from a slave-holding country, from which, in their long journey and exposure to white man's ingenuity, I venture to say that most of them got rid of one-half of them whilst on their long and disastrous crusade.

The Creeks, as well as the Cherokees and Choctaws, have good schools and churches established amongst them, conducted by excellent and pious men, from whose example they are drawing great and lasting benefits.—G. C.

THE CREEK INDIANS.*

The Creeks are known in their own language as the Muskokee or Muskogee, and occupied originally the greater part of Georgia, Alabama, and Florida. Their traditions say that they emigrated from the Northwest until they reached Florida, when they fell back to the country between the headwaters of the Alabama and Savannah Rivers. As this was full of small rivers and creeks, it was called by the early settlers the Creek Country, hence the name of the Creek Indians, who, when first known to the whites, were living there. Those remaining in Florida were called the Seminoles, or Isti-semole (wild men). The nation became a confederacy of tribes, speaking other languages, modifying somewhat the original Muskogee, but who, nevertheless, numbered seven-eighths of their whole number. Before a dominant power was established in the South they were courted by the Spanish, French, and English, and were about equally divided in their allegiance to these nations, but the final success of the English brought them entirely under their influence. "They took an active part in the war of the Revolution against the Americans, and continued their hostilities till the treaty concluded at Philadelphia in 1795. They then remained at peace eighteen years; but at the beginning of the last war with Great Britain a considerable portion of the nation, excited, it is said, by Tecumseh, and probably receiving encouragement from other sources, took arms without the slightest provocation, and at first committed great ravages in the vicinity of their western frontier. They received a severe chastisement, and the decisive victories of General Jackson at that time, and some years later over the Seminoles, who had renewed the war, have not only secured a permanent peace with the Southern Indians, but, together with the progress of the settlements, have placed them all under the absolute control of the United States. The Creeks and Seminoles, after some struggles among themselves, have ceded the whole of their territory and accepted in exchange other lands beyond the Mississippi."—Gallatin.

Twenty-four thousand five hundred and ninety-four were removed west of the Mississippi, only 744 remaining on their old hunting-grounds. At the breaking out of the civil war the Western Creeks numbered less than 15,000. The tribe divided and engaged in pitch battles against each other, the Unionists suffering badly, many fleeing to Kansas. They were brought together again after the war, and in 1872 numbered 13,000, on a reservation of over 3,000,000 acres in the Indian Territory.

By the report of the Commissioner of Indian Affairs for 1876, they were numbered at 14,000, including 3,000 mixed-bloods, and all wearing citizens' dress and living in good houses. They have 36 school buildings, with an attendance of about 750 pupils. Over \$24,000 was expended upon their education. There are 20 churches on the reserve, with a membership among the Creeks of over 3,000. They rank among the first of civilized tribes.—W. H. Jackson, 1877.

PRESENT LOCATION AND NUMBER.

Creeks at Union Agency, Indian Territory, August 31, 1885, 14,000. Civilized. Farmers and herders. The agent writes:

One of the five civilized tribes; the number of full-blood Indians is decreasing.

*See "A Migration Legend of the Creek Indians", with a linguistic, historic, and ethnographic introduction, by Albert S. Gatschet. No. 4. "Brinton's Library of Aboriginal American Literature," edited by D. G. Brinton, M. D., etc. Phil., 1884.

CHOC-TAW.

[Choctaw: Laws of the United States. Choctaws and Ch'ah'ta: Indian Bureau, June, 1885.]

Recently removed by Government from the States of Georgia and Alabama to the Arkansas, seven hundred miles west of the Mississippi. Present number [in 1836], 15,000. Semi-civilized.

Mr. Catlin was with the Choctaws near Fort Gibson in 1836. They were on a large tract of rich land south of the Arkansas and the Canadian Rivers. They were living adjoining the Creeks and the Cherokees, now Indian Territory.

294. *M6-sho-la-túb-bee*, He who Puts Out and Kills; first chief of the tribe. Painted in 1836.

(Plate No. 221, page 123, vol. 2, Catlin's Eight Years.)

A gentlemanly-looking man (died recently of small-pox).

A very interesting account of this man and his family can be found in two pamphlets, viz:

A thrilling sketch of the life of the distinguished chief *Okah Tubbee*, *alias* William Chubbee, son of the head chief *Mosholeh Tubbee*, of the Choctaw Nation of Indians, by Rev. L. L. Allen, 12mo., pp. 43: N. Y., 1843; and

A sketch of the life of *Okah Tubbee*, *alias* William Chubbee, son of the head chief *Mosholeh Tubbee*, of the Choctaw Nation of Indians, by Laah Ceilmanatoi Elaah-Tubbee, his wife. 12mo., cover 2 l., pp. 84: Springfield, Mass. Printed for *Okah Tubbee*, by H. S. Taylor, 1848.

295. *Kút-tee-o-túb-bee*, How Did He Kill? A noted brave. Painted in 1836.

296. *Há-tchoo-túc-knee*, The Snapping Turtle; Peter P. Pitchlynn, half-bred and well educated man. Painted in 1836.

(Plate No. 222, page 123, vol. 2, Catlin's Eight Years.)

The portrait of a distinguished and very gentlemanly man, who has been well educated and who gave me much curious and valuable information of the history and traditions of his tribe. Familiarly called by the whites, Peter P. Pitchlynn.

297. ———, woman; hair in braid; remarkable expression.

298. *Tul-lock-chísh-ko*, He who Drinks the Juice of the Stone.

299. *Tul-lock-chísh-ko*, He who Drinks the Juice of the Stone. Full length, in the dress and attitude of a ball-player, with ball-sticks in his hand, and a tail, made of white horse-hair, attached to his belt. Painted in 1836.

(Plate No. 223, page 125, vol. 2, Catlin's Eight Years.)

Mr. Catlin witnessed a game of ball by the Choctaws in 1836. (See description hereafter in "Games.")

The mode in which these sticks (for playing ball) are constructed and used will be seen in the portrait of *Tul-lock-chísh-ko* (He who Drinks the Juice of the Stone), the most distinguished ball-player of the Choctaw Nation (No. 299), represented in his ball-play dress, with his ball-sticks in his hands.

In every ball-play of these people it is a rule of the play that no man shall wear moccasins on his feet, or any other dress than his breech-cloth around his waist, with a beautiful bead belt, and a "tail," made of white horse-hair or quills, and a "mane" on the neck, of horse-hair, dyed of various colors.—G. C.

A series of photographs of Choctaws may be found in Hayden's Catalogue, page 98, 13 numbers.

TUL-LOCK-CHÍSH-KO, HE WHO DRINKS THE JUICE OF THE STONE.

Choctaw Ball Player in full dress. No. 299, page 212.
(Plate 223, Vol. II, Catlin's Eight Years.)

MR. CATLIN'S NOTES ON THE CHOCTAW INDIANS.

CHOCTAWS AND CHICKASAWS, FORMERLY ADDICTED TO FLATTENING THE HEADS OF CHILDREN.

With No. 197 Mr. Catlin notices the fact that some few years before 1832 the Choctaws and Chickasaws flattened heads in the same manner as the Nez Percé or Upper Columbia Indians. He comments on it, after speaking of the fact (see No. 197) that the Choctaws then and now living did not, and do not, flatten their heads.

The distance of the Choctaws from the country of the Chinooks is certainly between two thousand and three thousand miles; and there being no intervening tribes practicing the same custom, and no probability that any two tribes in a state of nature would ever hit upon so peculiar an absurdity, we come, whether willingly or not, to the conclusion that these tribes must, at some former period, have lived neighbors to each other or have been parts of the same family, which time and circumstances have gradually removed to such a very great distance from each other. Nor does this, in my opinion (as many suppose), furnish any very strong evidence in support of the theory that the different tribes have all sprung from one stock, but carries a strong argument to the other side by furnishing proof of the very great tenacity these people have for their peculiar customs, many of which are certainly not general, but often carried from one end of the continent to the other, or from ocean to ocean, by bands or sections of tribes, which often get "run off" by their enemies in wars, or in hunting, as I have before described, thus to emigrate to a vast distance is not so unaccountable a thing, but almost the *inevitable result* of a tribe that have got set in motion, all the way amongst deadly foes, in whose countries it would be fatal to stop.

I am obliged, therefore, to believe that either the Chinooks emigrated from the Atlantic, or that the Choctaws came from the west side of the Rocky Mountains, and I regret exceedingly that I have not been able as yet to compare the languages of these two tribes, in which I should expect to find some decided resemblance. They might, however, have been near neighbors, and practicing a copied custom where there was no resemblance in their language.

Whilst among the Choctaws I wrote down from the lips of one of their chiefs the following tradition, which seems strongly to favor the supposition that they came from a great distance in the west, and probably from beyond the Rocky Mountains:

Tradition.—"The Choctaws a great many winters ago commenced moving from the country where they then lived, which was a great distance to the west of the great river and the mountains of snow, and they were a great many years on their way. A great medicine-man led them the whole way, by going before with a red pole, which he stuck in the ground every night where they encamped. This pole was every morning found leaning to the east, and he told them that they must continue to travel to the east until the pole would stand upright in their encampment, and that there the Great Spirit had directed that they should live. At a place which they named *Nah-ne-wa-ye* (the sloping hill) the pole stood straight up, where they pitched their encampment, which was one mile square, with the men encamped on the outside and the women and children in the center, which remains the center of the old Choctaw Nation."

The following traditions, relating to the Choctaws, were told Mr. Catlin in 1836, at Fort Gibson, by Peter P. Pitchlynn, a very intelligent and influential man in the tribe (see No. 296):

The Deluge.—"Our people have always had a tradition of the Deluge, which happened in this way: There was total darkness for a great time over the whole of the earth; the Choctaw doctors or mystery-men looked out for daylight for a long time, until at last they despaired of ever seeing it, and the whole nation were very unhappy. At last a light was discovered in the north, and there was great rejoicing,

until it was found to be great mountains of water rolling on, which destroyed them all except a few families, who had expected it and built a great raft, on which they were saved."

Future state.—"Our people all believe that the spirit lives in a future state; that it has a great distance to travel after death towards the west; that it has to cross a dreadful, deep, and rapid stream, which is hemmed in on both sides by high and rugged hills; over this stream, from hill to hill, there lies a long and slippery pine log, with the bark peeled off, over which the dead have to pass to the delightful hunting-grounds. On the other side of the stream there are six persons of the good hunting-grounds, with rocks in their hands, which they throw at them all when they are on the middle of the log. The good walk on safely to the good hunting-grounds, where there is one continual day; where the trees are always green; where the sky has no clouds; where there are continual fine and cooling breezes; where there is one continual scene of feasting, dancing, and rejoicing; where there is no pain or trouble, and people never grow old, but forever live young and enjoy the youthful pleasures.

"The wicked see the stones coming, and try to dodge, by which they fall from the log, and go down thousands of feet to the water, which is dashing over the rocks, and is stinking with dead fish and animals, where they are carried around and brought continually back to the same place in whirlpools; where the trees are all dead, and the waters full of toads and lizards and snakes; where the dead are always hungry, and have nothing to eat, are always sick, and never die; where the sun never shines, and where the wicked are continually climbing up by thousands on the sides of a high rock, from which they can overlook the beautiful country of the good hunting-grounds, the place of the happy, but never can reach it."

Origin of the Craw-fish band.—"Our people have amongst them a band which is called the *Craw-fish band*. They formerly, but at a very remote period, lived under ground, and used to come out of the mud; they were a species of craw-fish, and they went on their hands and feet, and lived in a large cave, deep under ground, where there was no light for several miles. They spoke no language at all, nor could they understand any. The entrance to their cave was through the mud, and they used to run down through that and into their cave, and thus the Choctaws were for a long time unable to molest them. The Choctaws used to lay in wait for them to come out into the sun, where they would try to talk to them and cultivate an acquaintance.

"One day a parcel of them were run upon so suddenly by the Choctaws that they had no time to go through the mud into their cave, but were driven into it by another entrance which they had through the rocks. The Choctaws then tried a long time to smoke them out, and at last succeeded. They treated them kindly, taught them the Choctaw language, taught them to walk on two legs, made them cut off their toe nails, and pluck the hair from their bodies, after which they adopted them into their nation, and the remainder of them are living under ground to this day."

MUSKOGEE—CHOCTAWS.

The Choctaws, or Chahtas, at the time of De Soto's visit in 1540, were living south of the Chickasaws and west of the Creeks. Unlike the surrounding tribes, they were peaceably disposed, and a nation of farmers, and much farther advanced in civilization than any of their neighbors. Coming in contact with the French, Spanish, English, and Americans, they have never been at war with any of them. Commenced moving west of the Mississippi in 1801, and by 1830 had exchanged all their lands for other in the Indian Territory. By 1861 had advanced far in civilization, numbering with the Chickasaws 25,000 with 5,000 slaves. In the civil war they joined first the South and then the North, losing a great deal in property and a reduction to 17,000 of their population. They now number 16,000, of whom two-thirds are of mixed blood. Are governed by a written constitution, elect their chief every four years, have a council consisting of forty members, and a judiciary, and trial by jury.—W. H. Jackson, 1877.

MICK-ENO-PÁH.

First chief of the Seminoles. No. 300, page 215.
(Plate 305, Vol. II, Catlin's Eight Years.)

PRESENT LOCATION AND NUMBER.

Choctaws at Union Agency, Indian Territory, August 31, 1885, 18,000. All civilized. Farmers and traders. One of the five civilized tribes. See also title "The Five Civilized Tribes," page 221, herein.

SEM-I-NÓ-LEE (RUNAWAY); 3,000.

[Seminole: Laws of the United States. Seminole: Indian Bureau, June, 1885.]

Occupying the peninsula of Florida; semi-civilized, partly agricultural. The Government has succeeded in removing about one-half of them to the Arkansas, during the last four years, at the expense of \$32,000,000, the lives of twenty-eight or thirty officers and six hundred soldiers.

Mr. Catlin was with them at Fort Moultrie, South Carolina, December, 1837, and January, 1838.

300. Mick-e-no-páh, ———; first chief of the tribe; full length, sitting cross-legged. Painted in 1837.

(Plate No. 305, page 221, vol. 2; Catlin's Eight Years.)

This man owned one hundred negroes when the war broke out, and was raising large and valuable crops of corn and cotton.

Mick-e-no-páh (No. 300) is the head chief of the tribe, and a very lusty and dignified man. He took great pleasure in being present every day in my room whilst I was painting the others, but positively refused to be painted until he found that a bottle of whisky and another of wine, which I kept on my mantel-piece, by permission of my kind friend Captain Morrison, were only to deal out their occasional kindnesses to those who sat for their portraits, when he at length agreed to be painted "if I could make a fair likeness of his legs," which he had very tastefully dressed in a handsome pair of red leggins, and upon which I at once began (as he sat cross-legged), by painting them on the lower part of the canvass, leaving room for his body and head above; all of which, through the irresistible influence of a few kindnesses from my bottle of wine, I soon fastened to the canvass, where they will firmly stand, I trust, for some hundreds of years.—G. C.

JUDGE JAMES HALL'S NOTES ON MICANOPY.

Micanopy (head chief), with portrait, McKenney & Hall, vol. 2, page 188, by inheritance the principal chief, or head man, of all of the bands of Seminoles; by some writers called king, and by others called governor; a very black man; his grandfather, King Payne, married a Yemassee woman, his slave.

He commanded in the defeat and massacre of Major Dade's command, December 28, 1835, near the crossing of the Big and Little Outhlacoochee River, Florida, where, out of a force of more than 100, 3 only survived.

MR. M. M. COHEN'S NOTES ON MICANOPY.

Mr. Cohen, in his "Notice of Florida," gives the following description of Micanopy:

The governor is of low, stout, and gross stature, and what is called loggy in his movements; his face is bloated and carbuncled; eyes heavy and dull, and with a mind like his person. Colonel Gadsden told me, at Payne's Landing [that], after

having *double* rations he complained of *starving*. He reminds me of the heroes of the Trojan war, who would eat up a whole lamb, or half a calf. He owns a hundred negroes, and a large stock of cattle and horses. The "top governor" has two wives; one a very pretty squaw, and the other a half-breed negress. She is the ugliest of all women, and recalls the image of Bombie of the Frizzled Head in Paulding's Koning's works.

301. Os-ce-o-lá, The Black Drink; a warrior of very great distinction.

Painted only five days before his death, while he was a prisoner of war at Fort Moultrie. This remarkable man, though not a chief, took the lead in the war, and was evidently (at the time he was captured) followed by the chiefs, and looked upon as the *master-spirit* of the war. (See No. 308.)

302. Ee-mat-lá, King Philip; an old man, second chief. Like Osceola, he died while a prisoner, a few weeks after I painted him. Painted in 1837.

(Plate No. 300, page 220, vol. 2, Catlin's Eight Years.)

Mr. Catlin speaks of him as one who had "been a man of great notoriety and distinction in his time, but was now too old for further war-like enterprise."

303. Ye-hów-lo-gee, The Cloud; a chief who distinguished himself in the war. Painted in 1837.

(Plate No. 299, page 220, vol. 2, Catlin's Eight Years.)

A very good-natured, jolly man, growing fat in his imprisonment, where he gets enough to eat.—G. C.

304. Co-ee-há-jo, ———; a chief, very conspicuous in the present war. Painted in 1837.

(Plate No. 301, page 220, vol. 2, Catlin's Eight Years.)

305. Láh-shee, The Licker; a half-breed warrior, called "Creek Billy." Painted in 1837.

(Plate No. 302, page 221, vol. 2, Catlin's Eight Years.)

A distinguished brave of the tribe, and a very handsome fellow.

306. How-ee-dá-hee, ———; a Seminolee woman. (No plate.)

307. () ———; a Seminolee woman. Painted in 1837.

(Plate No. 304, page 221, vol. 2, Catlin's Eight Years.)

307½. Os-ce-o-la Nick-a-no-chee, a Seminolee boy. Painted in 1840.

(Plate No. 303, page 221, vol. 2, Catlin's Eight Years.)

This remarkably fine boy, by the name of *Os-ce-o-la Nick-a-no-chee*, has recently been brought from America to London, by Dr. Welch, an Englishman, who has been for several years residing in Florida. The boy, it seems, was captured by the United States troops at the age of six years; but how my friend the doctor got possession of him, and leave to bring him away, I never have heard. He is acting a very praiseworthy part, however, by the paternal fondness he evinces for the child, and fairly proves this by the very great pains he is taking with his education. The doctor has published recently a very neat volume, containing the boy's history, and also a much fuller account of *Os-ce-o-la* and incidents of the Florida war, to which I would refer the reader—G. Catlin in England, 1842, page 221, vol. 2, Eight Years.

EE-MAT-LÁ, KING PHILLIP.

Second chief of the Seminoles. No. 302, page 216.

(Plate 300, Vol. II, Catlin's Eight Years.)

OS-CE-O-LA NICK-A-NO-CHEE.

A Seminole boy, No. 307 A, page 216.
(Plate 303, Vol. II, Catlin's Eight Years.)

OS-CE-O-LÁ, THE BLACK DRINK.

Seminole, No. 308, pages 216, 219.

(Plate 298, Vol. II, Catlin's Eight Years.)

308. *Os-ce-o-lá*, The Black Drink. Full length, with his rifle in his hand, calico dress, and trinkets, exactly as he was dressed and stood to be painted five days before his death. Painted in 1838.

(Plate No. 298, page 219, vol. 2, Catlin's Eight Years.)

Born on the Talapoosa River in the Creek Nation in the years between 1800 and 1806; died at Fort Moultrie, S. C. (where he is buried), January 30, 1838.

MR. CATLIN'S NOTES ON OSCEOLA AT FORT MOULTRIE, S. C.

The prisoners who are held here, to the number of 250, men, women, and children, have been captured during the recent part of this warfare, and amongst them the distinguished personages whom I named a few moments since; of these, the most conspicuous at this time is *Os-ce-o-la*, commonly called Powell, as he is generally supposed to be a half-breed, the son of a white man (by that name) and a Creek woman.

I have painted him precisely in the costume in which he stood for his picture, even to a string and a trinket. He wore three ostrich feathers in his head, and a turban made of a varicolored cotton shawl—and his dress was chiefly of calicoes, with a handsome bead sash or belt around his waist, and his rifle in his hand.

This young man is, no doubt, an extraordinary character, as he has been for some years reputed, and doubtless looked upon by the Seminoles as the master spirit and leader of the tribe, although he is not a chief. From his boyhood he had led an energetic and desperate sort of life, which had secured for him a conspicuous position in society; and when the desperate circumstances of war were agitating his country he at once took a conspicuous and decided part; and in some way, whether he deserved it or not, acquired an influence and a name that soon sounded to the remotest parts of the United States and amongst the Indian tribes to the Rocky Mountains.

This gallant fellow, who was, undoubtedly, *captured* a few months since, with several of his chiefs and warriors, was at first brought in to Fort Mellon, in Florida, and afterwards sent to this place for safe-keeping, where he is grieving with a broken spirit, and ready to die, cursing white men, no doubt, to the end of his breath.

The surgeon of the post, Dr. Weedon, who has charge of him, and has been with him ever since he was taken prisoner, has told me from day to day that he will not live many weeks; and I have my doubts whether he will, from the rapid decline I have observed in his face and in his flesh since I arrived here.

During the time that I have been here I have occupied a large room in the officers' quarters, by the politeness of Captain Morrison, who has command of the post and charge of the prisoners; and on every evening, after painting all day at their portraits, I have had *Os-ce-o-la*, *Mick-e-no-pa*, *Cloud*, *Co-a-had-jo*, *King Philip*, and others in my room until a late hour at night, where they have taken great pains to give me an account of the war and the mode in which they were captured, of which they complain bitterly.

I am fully convinced, from all that I have seen and learned from the lips of *Osceola* and from the chiefs who are around him, that he is a most extraordinary man, and one entitled to a better fate.

In stature he is about at mediocrity, with an elastic and graceful movement; in his face he is good-looking, with rather an effeminate smile, but of so peculiar a character that the world may be ransacked over without finding another just like it. In his manners and all his movements in company he is polite and gentlemanly, though all his conversation is entirely in his own tongue; and his general appearance and actions those of a full-blood and wild Indian.

Since I finished my portrait of *Os-ce-o-la*, and since writing the first part of this letter, he has been extremely sick, and lies so yet, with an alarming attack of quinsy, or putrid sore throat, which will probably end his career in a few days. Two or three times the surgeon has sent for the officers of the garrison and myself to come and see

him *dying*. We were with him the night before last till the middle of the night, every moment expecting his death, but he has improved during the last twenty-four hours, and there is some slight prospect of his recovery. The steamer starts to-morrow morning for New York, and I must use the opportunity, so I shall from necessity leave the subject of Os-ce-o-la and Seminoles for future consideration. Adieu.

Mr. Catlin left Fort Moultrie for the North January 29, 1838.

JUDGE JAMES HALL'S NOTES ON OSCEOLA.

Powell: Osceola, Oceola, Asseola, Osiniola, and Assini Yahola, but Asseola is his true name. It is derived from Asse, "the black drink," and Ola, "a water-fall."

We have, in another place, mentioned a peculiar custom of the Creeks, who, previous to entering into council, assemble in groups and drink freely of the decoction of a certain herb of their country, which operates as an emetic, and whose effect they imagine is to purify and invigorate both the mind and body, so as to prepare them for the business of thought and debate. This beverage, when taken warm and in large quantities, is called the "black drink," from its color; and among the several names applied to it to express its quality or effects are those of Asse, Assinola, and Assini Yahola.

The name Asseola when freely translated signifies the plentiful drinker of the black drink, or one who imbibes this fluid in torrents. * * *

The paternal grandfather of Asseola was a Scotchman, who married a Creek woman; his father, therefore, was a half-breed, but his mother was a Creek of the pure blood.

He was born on the Tallapoosa River in the Creek Nation, somewhere between the years 1800 and 1806, and must have been between thirty and thirty-five years of age at the time of his death. His European descent is said to have been distinctly indicated in his complexion and eyes, which were lighter than those of his people, as well as in his features and expression of his countenance. * * *

MR. M. M. COHEN'S NOTES ON OSCEOLA.

In his "Notices of Florida and the Campaigns," Mr. Cohen says:

When conversing on topics agreeable to him his countenance manifests more the disposition of the white than of the red man. There is great vivacity in the play of his features, and when excited his face is lighted up as by a thousand fires of passion, animation, and energy. His nose is Grecian at the base, and would be perfectly Phidean but that it becomes slightly arched. There are indomitable firmness and withering scorn in the expression of his mouth, though the lips are tremulous from intense emotions, which seem ever boiling up within him. About his brow care and thought and toil have traced their channels, anticipating on a youthful face the work of time.

He was the best runner, hunter, ball-player, and athlete of his tribe.

He was not a chief, and up to about 1832 had no followers. The subject of the removal of the Seminoles from Florida to west of the Mississippi River, and become a constituent part of the Creek Nation, as provided by the treaty at Payne's Landing. Asseola opposed this and the removal, and became rebellious. He became rude to General Thompson, the agent, and by his order Colonel Fanning arrested and confined him. As he went to the guard-house he exclaimed, "The sun," pointing to its position, "is so high. I shall remember the hour. The agent has his day. I will have mine." He appeared contrite, and was soon released. In November, 1835, the Seminole war began. On December 28, 1835, Asseola and a party murdered General Thompson, the agent, at Fort King. In 1837 Asseola was captured by or surrendered to General Jesup. The prisoners captured along with Asseola were immediately transferred to Charleston, S. C., where they were confined upon Sullivan's Island until arrangements were made for their removal to their new homes. While a prisoner Asseola was an object of much curiosity. His fame was widely extended. He was not only considered as

the hero of the war, but had been extravagantly praised in the newspapers for brilliant and noble qualities, which probably existed only in the imaginations of the writers. He was visited by many persons, and amongst others by several artists, who took likenesses of him, one of the finest of which is that taken for the War Department. (See page 200.)

Asseola had two wives, both of whom were young and pretty, and one of them was particularly attractive in her personal appearance. They lived together in perfect harmony, having one table in common—to use our own phraseology—or, to speak more in accordance with the fact, sitting around the same kettle, but occupying separate lodges. They accompanied him in his confinement, and during his illness watched and nursed him with great solicitude and tenderness.—Condensed from McKenney & Hall, vol. 2, pages 199-215.

MANNER OF OSCEOLA'S DEATH.

In a note on page 221, vol. 2, Catlin's Eight Years, Mr. Catlin gives an interesting account of Osceola's death :

From accounts which left Fort Moultrie a few days after I returned home, it seems that this ill-fated warrior died a prisoner the next morning after I left him, and the following very interesting account of his last moments was furnished me by Dr. Weedon, the surgeon, who was by him, with the officers of the garrison, at Osceola's request :

"About half an hour before he died he seemed to be sensible that he was dying; and although he could not speak, he signified by signs that he wished me to send for the chiefs and for the officers of the post, whom I called in. He made signs to his wives (of whom he had two, and also two fine little children by his side) to go and bring his full dress which he wore in time of war, which, having been brought in, he rose up in his bed, which was on the floor, and put on his shirt, his leggins, and moccasins, girded on his war-belt, his bullet-pouch, and powder-horn, and laid his knife by the side of him on the floor. He then called for his red paint, and his looking-glass, which was held before him, when he deliberately painted one-half of his face, his neck and his throat, his wrists, the backs of his hands, and the handle of his knife red with vermilion, a custom practiced when the irrevocable oath of war and destruction is taken. His knife he then placed in its sheath under his belt, and he carefully arranged his turban on his head and his three ostrich plumes that he was in the habit of wearing in it. Being thus prepared in full dress, he laid down a few minutes to recover strength sufficient, when he rose up as before, and with most benignant and pleasing smiles, extended his hand to me and to all of the officers and chiefs that were around him and shook hands with us all in dead silence, and also with his wives and his little children. He made a signal for them to lower him down upon his bed, which was done, and he then slowly drew from his war-belt his scalping-knife, which he firmly grasped in his right hand, laying it across the other on his breast, and in a moment smiled away his last breath without a struggle or a groan."

MR. CATLIN'S NOTES ON THE SEMINOLE AND EUCHEE INDIANS.

FORT MOULTRIE, SOUTH CAROLINA,
December, 1837, and January, 1838.

Since the date of my last letter I have been a wanderer, as usual, and am now at least two thousand miles from the place where it was dated. At this place are held two hundred and fifty of the Seminoles and Eucheas, prisoners of war, who are to be kept here awhile longer, and transferred to the country assigned them, seven hundred miles west of the Mississippi, and fourteen hundred from this. The famous *Os-ee-o-la* is amongst the prisoners; and also *Mick-e-no-pah*, the head chief of the tribe, and *Cloud*, *King Phillip*, and several others of the distinguished men of the

nation, who have celebrated themselves in the war that is now waging with the United States Government.

There is scarcely any need of my undertaking in an epistle of this kind to give a full account of this tribe, of their early history, of their former or present location, or of their present condition, and the disastrous war they are now waging with the United States Government, who have held an invading army in their country for four or five years, endeavoring to dispossess them and compel them to remove to the West, in compliance with treaty stipulations. These are subjects generally understood already (being matters of history), and I leave them to the hands of those who will do them more complete justice than I could think of doing at this time with the little space that I could allow them, in the confident hope that justice may be meted out to them, at least by the historian, if it should not be by their great Guardian, who takes it upon herself, as with all the tribes, affectionately to *call* them her "*red children*."

For those who know nothing of the Seminoles it may be proper for me here just to remark that they are a tribe of three or four thousand, occupying the peninsula of Florida and speaking the language of the Creeks, of whom I have heretofore spoken, and who were once a part of the same tribe.

The word Seminolee is a Creek word, signifying runaways, a name which was given to a part of the Creek Nation who emigrated in a body to a country farther south, where they have lived to the present day, and continually extended their dominions by overrunning the once numerous tribes that occupied the southern extremity of the Florida Cape, called the Euchees, whom they have at last nearly annihilated and taken the mere remnant of them in as a part of their tribe. With this tribe the Government have been engaged in deadly and disastrous warfare for four or five years, endeavoring to remove them from their lands in compliance with a treaty stipulation, which the Government claims to have been justly made and which the Seminoles aver was not. Many millions of money and some hundreds of lives of officers and men have already been expended in the attempt to dislodge them, and much more will doubtless be yet spent before they can be removed from their almost impenetrable swamps and hiding places, to which they can for years to come retreat, and from which they will be enabled, and no doubt disposed, in their exasperated state, to make continual sallies upon the unsuspecting and defenseless inhabitants of the country, carrying their relentless feelings to be reeked in cruel vengeance on the unoffending and innocent.

MUSKOGEE—SEMINOLES.

At the close of the Seminole war, "Coo-coo-chee," or "Wild Cat," one of the most distinguished of their chiefs and warriors, gives this view of the white man's policy toward his tribe :

I was once a boy. Then I saw the white man afar off. I hunted in these woods, first with a bow and arrow, then with a rifle. I saw the white man, and was told he was my enemy. *I could not shoot him as I would a wolf or a bear ! Yet like these he came upon me.* Horses, cattle, and fields he took from me. He said he was my friend. He abused our women and children, and told us to go from the land. Still he gave us his hand in friendship. We took it. Whilst taking it he had a snake in the other. His tongue was forked. He lied, and stung us. I asked but for a small piece of these lands—enough to plant and to live upon—far south, a spot where I could lay the ashes of my kindred, and even this has not been granted to me. *I feel the irons in my heart.*

THE SEMINOLES.

The Isti-Semole (wild men) who inhabit the peninsula of Florida (1836) are pure Muskogees, who have gradually detached themselves from the confederacy, but were still considered members of it till the United States treated with them as with an

independent nation. The name of Seminoles was given to them on account of their being principally hunters and attending but little to farming.

They were very hostile to the Americans up to the cession of Florida in 1819, but a treaty was finally made with them in 1823. Other treaties followed looking to their removal westward, in attempting to carry out which a war ensued, lasting from 1835 until 1842. Nearly 2,000 had then been removed, leaving about 300 in Florida and 145 of these, under Billy Bowlegs, joined the western band in the Indian Territory in 1858. Had much trouble in getting settled upon a reservation, locating finally upon a tract of 200,000 acres bought of the Creeks in Indian Territory about 1842, where they now number 2,553—a prosperous and civilized tribe.—W. H. Jackson, 1877.

PRESENT LOCATION AND NUMBER.

Seminole at Union Agency, Indian Territory, August 31, 1885, 3,000. Civilized. Farmers and herders, slightly increasing in numbers.

EU-CHEE.

[With Seminoles. No tribal existence, June, 1885.]

Remnant of a powerful tribe who once occupied the southern part of the peninsula of Florida; were overrun by the Creeks and Seminoles, the remnant of them merging into the Seminolee tribe, and living with them now as a part of their nation. Present number, 150.

Mr. Catlin saw them with the Seminoles while prisoners at Fort Moultrie, South Carolina, in December, 1837, and January, 1838.

309. Etch-ée-fiz-e-co, The Deer without a Heart, called "*Euchee Jack*"; a chief of considerable renown.

310. Chee-a-ex-e-co, ———; quite a modest and pretty girl, daughter of the above chief.

PRESENT LOCATION AND NUMBER.

They have no tribal existence; joined the Seminoles in 1842; now in Indian Territory.

THE FIVE CIVILIZED TRIBES.

THE CHEROKEES, CREEKS, CHOCTAWS, SEMINOLES (CHICKSAWS), AND EUCHEES. (NOS. 283 TO 310.)

The five civilized tribes above enumerated are now located in Indian Territory. The report of Agent Robert L. Owen, at Muskogee, Union Agency, Indian Territory, for the year ending August 31, 1885, is almost given herein in full.

For the history of the Indian Territory, together with map of its lands, see "Public Domain," 3d edition, 1884, Ex. Doc. 47, part 2, 46th Congress, 3d session, by Thomas Donaldson.

For the condition, history, and laws of the Indians in the Indian Territory, see Report of the Committee on Indian Affairs, United States Senate, Report 1278, 49th Congress, 1st session, parts 1, 2, and 3, June 4, 1886.

REPORT OF AGENT OWEN FOR 1885 AS TO THE FIVE CIVILIZED TRIBES IN INDIAN TERRITORY—THEIR HISTORY, LAWS, AND PRESENT CONDITION.

UNION AGENCY, MUSKOGEE, INDIAN TERRITORY,

August 31, 1885.

The jurisdiction of this agency extends over the Choctaws, Cherokees, Creeks, Chickasaws, and Seminoles, commonly called the "five civilized tribes." Their territory lies in the eastern portion of the Indian Territory, extending from Kansas to Texas, and lying adjacent and on the west of Southwest Missouri and Arkansas.

POPULATION.

Cherokees (native), adopted whites, Delawares, Shawnees, and freedmen	about..	22,000
Choctaws (native), adopted whites, and freedmen	do.....	18,000
Chickasaws, natives	do.....	6,000
Muscogees, or Creeks	do.....	14,000
Seminole	do.....	3,000
The whites, lawfully in the country as licensed traders, railroad and Government employes, and their families, probably number		3,000
The number of farm laborers and workmen and their families, under permit of Indian authorities, is probably		17,000
There are probably of emigrants, visitors, and pleasure-seekers, some		1,500
There are of claimants to citizenship denied by Indian people, probably		5,000
And about three or four thousand willful intruders; making a total population of over		90,000

GOVERNMENT.

The different nations composing this agency have regular constitutional governments. Their constitutions are based on that of the United States, *mutatis mutandis*. A sketch of the constitution of the Cherokees, their laws, and institutions, is given as illustrative of the others:

The constitution of the Cherokee Nation declares, first, the boundary of its lands; second, "that the lands of the Cherokee Nation shall remain common property, but the improvements made thereon and in possession of the citizens of the nation are the exclusive and indefeasible property of the citizens respectively who made or may rightfully be in possession of them." No citizen shall dispose of such farms to United States citizens, and after two years' abandonment the farms form part of the public domain, and may be settled and taken possession of by other citizens. The property of a deceased citizen is disposed of by his will, properly recorded, or, in absence of a will, by laws regulating inheritance. The laws make provision for administrators and executors of wills, &c., the district courts having full probate jurisdiction.

The power of the Cherokee government is divided into three distinct departments, the legislative, executive, and judicial, and no person or persons belonging to one of these departments shall exercise any of the powers properly belonging to either of the others, except in the cases expressly directed or permitted in the constitution. The legislative power, called the national council, consists of a senate and house of representatives, called the council. The national council exercises the usual functions of State legislatures. The supreme executive power is vested in "the principal chief of the Cherokee Nation," who has about the same authority as a governor of a State, exercising the veto power, pardoning prerogative, &c. He is elected by *viva voce* vote of the majority of the people and serves for four years. There is the treasurer and assistant treasurer, the national auditor, nine sheriffs, one for each political district, many deputy sheriffs, one district clerk for each of the nine political districts, also deputy clerks and solicitors or prosecuting attorneys for each district. The principal chief has four executive secretaries, whose salaries average about \$1,250 each per

annum, and his office is thoroughly well organized. He has also an advisory board, called the executive council.

The judiciary is composed of nine district courts, three circuit courts, and one supreme court, the latter being a court of appeals. A motion to abate or dismiss a suit, or demurrer overruled in the circuit court, may be appealed to the supreme court. Cases involving the death penalty are in the original and exclusive jurisdiction of the supreme court. In these courts may be sued out writs of attachment, garnishment, ejectment, &c., under the provisions of the Cherokee statute.

In the Cherokee Nation the wife may hold property in her own name, and not subject to the will of her husband, and *vice versa*. The constitution further provides against *ex post facto* laws, that those accused shall have fair trial by jury, and all citizens shall be secure in their persons, houses, papers, and possessions from unreasonable seizures and searches, and no warrant to search any place or to seize any person or things shall issue without describing them as nearly as may be, nor without good cause, supported by oath or affirmation; that "no person who denies the being of a God, or a future state of reward and punishment, shall hold any office in the civil department of this nation." Freedom of worship is guaranteed forever. No person shall, for the same offense, be twice put in jeopardy of life or limb. The trial by jury to remain inviolate, and section 9, article 11, of the constitution declares as follows:

Religion, morality, and knowledge being necessary to good government, the preservation of liberty and the happiness of mankind, schools and the means of education shall forever be encouraged in this nation.

THE SCHOOL SYSTEM

of the Cherokee Nation is quite complete. The board of education, composed of three persons of liberal literary attainments, moral and temperate, appointed by the principal chief and confirmed by the senate, has entire charge of the schools, with power to adopt rules and regulations not inconsistent with the laws for its own government, and for the government of the male and female seminaries, orphan asylum, and primary schools; to prescribe and enforce a series of uniform text-books, &c., and they have accordingly adopted and enforced complete rules and regulations. Teachers must have proper certificate of examining board before they can be appointed, and, as a class, they average about as well as the teachers of adjacent States. In 1880, December 10, the national council apportioned the primary schools according to the population at that time, as follows:

District.	Number of children.	Number of schools.
Cooweescoowee.....	874	16
Delaware.....	806	15
Saline.....	384	7
Going Snake.....	735	13
Flint.....	420	8
Tablequah.....	757	14
Illinois.....	595	11
Sequoyah.....	372	7
Canadian.....	461	9
Total.....	6,204	100

The enrollment last year was over 4,000, or about 70 per cent., and the average attendance was about 2,600, or about 42 per cent. of the total school population of 1880, when the census was taken. This average is very high, considering that the children have to walk from a quarter to 4 miles to attend school, and is partly due, probably, to the fact that the law of the Cherokees in paying teachers stimulates the attendance, as the salary is fixed at \$30 per month for an average of 15 pupils or under, and \$1 extra per month for each when the average rises above 15 till it reaches 25, when \$50 per month is paid, the maximum salary for primary schools.

The Cherokee Orphan Asylum, where the nation furnishes everything—medical attendance, clothing, &c.—is a splendid and commodious building with a large farm attached. It can care for about 175 children, and does average about 150. Its course of study is from the merest elements to a high-school course of a medium order. It had last year at its June commencement a very nice display from the kindergarten department, introduced some two years ago, to the great advantage of the younger children, the small full-bloods taking hold of its lessons with great aptitude, and with much more spirit than they do with the ordinary school branches.

The male and female seminaries near Tahlequah have excellent large brick buildings, with first-rate high-school course of study, with good faculties, are beautifully situated, and in a flourishing condition. They average about 125 pupils each. The nation in each supports absolutely 50 boarders, and furnishes board, lodging, fuel, lights, washing, text-books, and instructions, for \$5 per month, in national scrip. I have directed catalogues of these schools to be sent you, and desire to submit them as a part of this report, as they will give a better idea of the actual advancement of these people than many words of general comment.

The Cherokees have a national jail of sandstone rock, three stories high, under the charge of the high sheriff and his guard. It is surrounded by a close board fence about 10 feet high, and has a very well-built gallows in the inclosure, which is not the worse for wear, as the authorities incline to be very merciful. There are over 20 prisoners, who are required to work and who wear the zebra suit. There is also a national blind asylum, at which are kept and cared for the blind and infirm, and also a few demented persons. This building is of brick, four stories high, and must have cost \$15,000.

The outline of the Cherokees illustrates the general condition and tendency of the five civilized tribes.

SCHOOLS.

Muscogee or Creek Nation :	National schools.
Eufala district.....	9
Wewoka district	5
Deep Fork district.....	4
Okmulgee district.....	
Arkansas district.....	6
Coweta district	1

All these must average at least 20 children.

Baptist University, near Muscogee.

Howell Institute, in Muscogee.

Kane School, near Muscogee.

Tallahassee Mission School.

Wealaka Mission School.

Levering Mission School.

Asbury Mission School.

New York Mission School.

Choctaw Nation have three large academies and many primary schools and missions, of whose names and locations, &c., I have no data at all adequate at present.

Chickasaw Nation has four large academies, a number of primary schools and mission schools, of which I have no adequate data at present.

Cherokee Nation :

Three high schools, as stated.

One hundred primary schools, as stated.

The Worcester Academy, Vinita.

The Baptist Mission, Tahlequah.

The Presbyterian Mission, Tahlequah.

The Moravian Mission, Oaks.

The Presbyterian Mission, Childer's Prairie.

Episcopal School, Prairie City.

Others of which I have no adequate data.

A large per cent. of the teachers are natives, and the schools are taught in English, though in full-blood settlements the teachers generally speak both languages, a very necessary accomplishment in teaching to those who speak only the Indian language.

CITIZENSHIP.

The citizens of the nation are composed of many classes and grades. The Cherokee Nation will illustrate the other nations. Her citizens are full-blood Cherokees; half-blood Cherokees to one sixty-fourth Cherokees and —— white stock; Cherokee crossed on Creek, on Choctaw, on Chickasaw, &c., and on the African stock; adopted citizens of the Cherokee Nation—full-blood Shawnees, full-blood Delawares, full-blood Creeks, full-blood white men, full-blood African, and the same stock variously blended with Cherokees and with other races, including Creeks, Choctaws, Osages, Chickasaws. The much larger part of the nation is of the Cherokee blood, about 8,000 full-blood and 8,000 mixed-blood Cherokees, and about 5,000 of the other races mentioned.

The other nations are not mixed so much with other races as the Cherokees, but resemble it in degree.

There is a large class of citizens of these nations needing attention badly at the hands of the Government—those claiming to be citizens of the Indian nations but denied by the nations. This class is not subject to United States law, because they submit affidavits that they are Indians. The Indian courts refuse to take cognizance of them, because they declare them to be citizens of the United States who are pretending fraudulently to be Indians in order to use and enjoy Indian land, timber, grass, &c., without paying tax. I have been informed that affidavits were manufactured by some of these over names as widely known as those of John Smith and George Washington, either as forgeries of these names or by parties claiming those names, and subsequently not to be found. Some of these claims are undoubtedly fraudulent and others are just and deserving of respect.

This class, however, is a serious annoyance to all parties, as they are amenable to no law, and when they complain to the agent for civil redress against an Indian citizen there is no method but to suggest compromises, arbitration, and gracefully evade all responsibility, as in view of the treaties it would seem unwarranted and arbitrary in the agent to sit as a judge in a civil case between two parties the Government views as Indian citizens, and where the treaty confers exclusive jurisdiction to local courts. Where civil cases arise between an Indian and United States citizen, and the United States citizen refuses to keep his contracts, he may be put across the line, where he may be subject to the civil law; but if the Indian is at fault the white man is advised that he has no right to make a contract with the Indian citizen, and if he does so, does it at his risk. This seems to be a serious chasm in the operation of law. Moreover, an Indian may go into the States and get large credits, bring the merchandise into the country, and then pay or not, as he chooses. When United States citizens have married Indians, they, at least, it seems to me, ought not to be allowed such dishonorable privilege. Civil jurisdiction ought to be placed somewhere, that all parties might at least have the privilege of being heard. This privilege of refusing to pay honest debts brings discredit on the Indian country, and seriously retards and interferes with a healthy intercourse, which, of all causes, would operate most strongly to the development of its people.

The most important matter to these nations, however, is the settlement of the cases of disputed citizenship, as they are not only a fruitful source of trouble, but are increasing in a manner alarming to the Indian people. Active and continuous effort should be made to decide as speedily as possible upon some plan, acceptable to the Government and the Indian nations, to definitely determine the rights of cases now

on hand and those hereafter to arise. The evils of a large class of people among the Indian people amenable to no law cannot be overestimated.

The intruders may be classed into those innocently coming into the country, not knowing that it is unlawful; those fraudulently pretending to be of Indian blood; those persistently and willfully defying and evading the authorities simply for the privilege of living in the Indian country; escaped criminals and felons from the States seeking refuge here. Along the border the intruders steal timber and coal and use the Indian grass without compunction.

Since taking charge of this agency I have suggested a plan, and am putting it in operation, of deputizing several members of the Indian police force for each nation to make the intruder question their special business, making a descriptive list of intruders, and acting under direction of this office strictly, but paid a special salary by the nations for whom they work.

The salary paid by the Government of \$8 per month is not enough to support them and their families while riding constantly on this service over a wide scope of country. It would not pay the expenses of a single week. The danger and labor must be paid for or else the men cannot be obtained. This plan is practical and will enable an element to be controlled which has not been controlled heretofore, and which has been a source of many serious difficulties and crimes.

CRIMES.

Crimes in the nations are diminishing steadily, owing largely to the efficient manner in which the court at Fort Smith, Ark. (the Federal district court for the western district of Arkansas), is conducted. There they capture, try, convict, and sentence the criminal "with neatness and dispatch." It is dreaded by the criminal class and admired by law-abiding citizens.

The efficiency of the Indian courts in punishing crime among their own citizens is gradually improving, but is as yet by no means perfect. The criminal jurisdiction of the courts, however, reaches all classes except that favored man, the disputed claimant for Indian citizenship, who may kill or be killed by Indians without any court exercising jurisdiction.

AGENT'S JURISDICTION.

The United States agent is kept busy trying to determine who are intruders, of the great number reported to the agency as such; then putting them out the limits of the agency; and, lastly, keeping them out with a United States Indian police force, paid \$8 a month, out of which each man must furnish his own horse, saddle, and bridle, pay his own expenses, and care for his family in a luxurious manner, if he chooses to do so. The United States is available for this purpose, but it is like using a sledge-hammer to fan away the flies with—strong enough to crush the fly, but not nicely adjusted to the business.

Where men are charged with evading their just obligations by coming into or staying in the Indian Territory, he is required to put them and their effects across the line, where they may be subject to civil law. He also decides very many civil disputes arising between United States citizens alone, and between United States citizens and Indians, acting as arbitrator, and generally supervises the intercourse with the Indians agreeably to law and the regulations of the Indian Department. It is his duty further to prevent crime and assist in the arrest and delivery of criminals, to supervise the intercourse of Indians with each other, to pay out per capita where it may be due from the Government to the Indians in the limits of the agency, and conduct such investigations as may be referred to him by the honorable Secretary of the Interior Department.

POLICE.

The Indian police consists of 40 privates and 3 officers, who are located at different points throughout the limits of the agency, so as to make the force as efficient as pos-

sible. Were the area equally divided it would give 712 square miles to each as his circuit. This police force, despite its inadequate salary, has been of incalculable service in impressing upon the lawless the idea that the eye of the Government is on them, in preventing crime and bringing criminals to justice, recovering stolen property, &c. If their salaries could be increased it would be a wise economy in increasing and maintaining its efficiency.

MATERIAL GROWTH.

The growth of the Indian people in material wealth has been rapid during the last few years, and while during the year just closed the losses have been heavy in cattle by comparison with other years, the crops have been reasonably good, large areas of new land have been put in cultivation, and it is only a matter of few years when the people will be a wealthy and strong community. The half-breed particularly is intelligent and progressive, surrounding himself with the comforts and refinements of life, and using all means at his control to acquire and enjoy the advantages of accumulated wealth. Leaving out his idea as to what is good for the Indian, he differs but little from his Kansas or Texas cousin. There are enormous quantities of hay put up on the prairies, and this, with the extensive grazing and great extension of farms, argues that a few seasons will remove the envious growl of the "boomer" that the Indian is not using the land.

INDIAN PORTRAITS.

[Nos. 1 to 310; pages 1 to 227 herein.]

CERTIFICATES.

[See page 8 herein for fac-similes.]

Mr. Catlin in almost every case appended to his portraits a certificate in aid of its authenticity, such as the following:

I hereby certify that the persons whose signatures are affixed to the certificates used below by Mr. Catlin are officers in the service of the United States, as herein set forth, and that their opinions of the accuracy of the likenesses and correctness of the views, &c., exhibited by him in his "Indian Gallery" are entitled to full credit.

J. R. POINSETT,
Secretary of War, Washington.

With regard to the gentlemen whose names are affixed to certificates below I am fully warranted in saying that no individuals have had better opportunities of acquiring a knowledge of the persons, habits, costumes, and sports of the Indian tribes, or possess stronger claims upon the public confidence in the statements they make respecting the correctness of delineations, &c., of Mr. Catlin's "Indian Gallery;" and I may add my own testimony with regard to many of those Indians whom I have seen, and whose likenesses are in the collection and sketched with fidelity and correctness.

C. A. HARRIS,
Commissioner of Indian Affairs, Washington.

I have seen Mr. Catlin's collection of portraits of Indians, many of which were familiar to me, and painted in my presence; and, as far as they have included Indians of my acquaintance, the *likenesses* are easily recognized, bearing the most striking resemblance to the originals, as well as faithful representations of their costumes.

W. CLARK,

Superintendent of Indian Affairs, Saint Louis.

I have examined Mr. Catlin's collection of the Upper Missouri Indians to the Rocky Mountains, all of which I am acquainted with, and indeed most of them were painted when I was present, and I do not hesitate to pronounce them correct likenesses and readily to be recognized. And I consider the *costumes*, as painted by him, to be the *only correct representations* I have ever seen.

JOHN F. A. SANFORD,

*U. S. Indian Agent for Mandans, Rickarees, Minatarees,
Crows, Knisteneaux, Assiniboinis, Blackfeet, &c.*

Having examined Mr. Catlin's collection of portraits of Indians of the Missouri and Rocky Mountains, I have no hesitation in pronouncing them, so far as I am acquainted with the individuals, to be the best I have ever seen, both as regards the expression of countenance and the exact and complete manner in which the costume has been painted by him.

J. L. BEAN,

S. Agent for Indian Affairs.

I have been for many years past in familiar acquaintance with the Indian tribes of the Upper Missouri and the Rocky Mountains, and also with the landscape and other scenes represented in Mr. Catlin's collection, and it gives me great pleasure to assure the world that, on looking them over, I found the likenesses of my old friends easily to be recognized, and his sketches of manners and customs to be portrayed with singular truth and correctness.

J. PILCHER,

Agent for Upper Missouri Indians.

It gives me great pleasure in being enabled to add my name to the list of those who have spontaneously expressed their approbation of Mr. Catlin's collection of Indian paintings. His collection of materials places it in his power to throw much light on the Indian character; and his portraits, so far as I have seen them, are drawn with great fidelity as to character and likeness.

H. SCHOOLCRAFT,

Indian Agent for Wisconsin Territory.

Having lived and dealt with the Blackfeet Indians for five years past, I was enabled to recognize *every one* of the portraits of those people, and of the Crows also, which Mr. Catlin has in his collection, from the faithful likenesses they bore to the originals.

J. E. BRAZEAU.

Having spent sixteen years in the continual acquaintance with the Indians of the several tribes of the Missouri represented in Mr. Catlin's Gallery of Indian Paintings, I was enabled to judge of the correctness of the likenesses, and I *instantly recognized every one of them*, when I looked over them, from the striking resemblance they bore to the originals; so also of the landscapes on the Missouri.

HONORE PICOTTE.

The portraits in the possession of Mr. Catlin of Pawnee Picts, Kioways, Camanches, Wecos, and Osages were painted by him *from life*, when on a tour to their country with the United States Dragoons. The *likenesses* are good, very easily to be recognized, and the *costumes* faithfully represented.

HENRY DODGE,
Colonel of Dragoons.
R. H. MASON,
Major of Dragoons.
D. HUNTER,
Captain of Dragoons.
D. PERKINS,
Captain of Dragoons.
M. DUNCAN,
Captain of Dragoons.
T. B. WHEELOCK,
Lieutenant of Dragoons.

We have seen Mr. Catlin's portraits of Indians east of the Rocky Mountains, many of which are familiar to us; the likenesses are easily recognized, bearing a strong resemblance to the originals, as well as a faithful representation of their costumes.

J. DOUGHERTY,
Indian Agent.
J. GANTT.

NOVEMBER 27, 1837.

We hereby certify that the portraits of the Grand Pawnees, Republican Pawnees, Pawnee Loups, Tappage Pawnees, Otoes, Omahaws, and Missouries, which are in Mr. Catlin's Indian Gallery, were painted from life by Mr. George Catlin, and that the individuals sat to him in the costumes precisely in which they are painted.

J. DOUGHERTY,
Indian Agent for Pawnees, Omahaws, and Otoes.
J. GANTT.

NEW YORK, 1837.

I have seen Mr. Catlin's collection of Indian portraits, many of which were familiar to me, and painted in my presence at their own villages. I have spent the greater part of my life amongst the tribes and individuals he has represented, and I do not hesitate to pronounce them correct likenesses, and easily recognized; also his sketches of their *manners and customs*, I think, are excellent; and the *landscape views* on the Missouri and Mississippi are correct representations.

K. MCKENZIE,
Of the American Fur Company, Mouth of Yellowstone.

We hereby certify that the portraits of Seminoles and Euchees, named in this catalogue, were painted by George Catlin, from the life, at Fort Moultrie; that the Indians sat or stood in the costumes precisely in which they are painted, and that the likenesses are remarkably good.

P. MORRISON,

Captain, Fourth Infantry.

J. S. HATHAWAY,

Second Lieutenant, First Artillery.

H. WHARTON,

Second Lieutenant, Sixth Infantry.

F. WEEDON,

Assistant Surgeon.

FORT MOULTRIE, *January 26, 1838.*

LANDSCAPES, SPORTING SCENES, MANNERS AND CUSTOMS.

[Pages 31-47 Catlin's Catalogues from 1838-1843; pages 33-51 Catlin's Catalogue of 1848.]

LANDSCAPES.

Nos. 311 to 403.

311. Saint Louis (from the river below, in 1832 and in 1836), a town on the Mississippi, with 25,000 inhabitants.* (No plate.)

The steamboat *Yellowstone* in the river, starting on her voyage up the Missouri and to the Yellowstone, in May, 1832. On the deck can be seen the Indians who were passengers and other travelers. As a specimen of inland water craft the *Yellowstone* is a novel one.

Mr. Catlin was first in Saint Louis in 1829, and from that period until 1838 was frequently there. It was in fact the depot for him for outfitting for his Indian travels, and to it he forwarded his Indian collections and paintings.

Saint Louis had been for more than thirty years prior to Mr. Catlin's visiting it the headquarters for western fur traders, trappers, and hunters. Choteau, Berthold, Manuel Lisa, and other Indian traders had made it famous. William Clark, of Lewis and Clark, exploration fame, had been a resident since 1808, and the Indian service, of which he was superintendent in 1829, made Saint Louis its depot. The army for the West and Northwest had its main post here, and the contractors for its supplies usually forwarded them by river for Saint Louis, either by the Missouri or Mississippi and their tributaries.

In 1832 Mr. Catlin writes of Saint Louis, on his return from the Upper Missouri, in a canoe with Batiste and Bogard, a 2,000-mile journey:

When we landed at the wharf my luggage was all taken out and removed to my hotel, and when I returned a few hours afterwards to look for my little boat, to which I had contracted a peculiar attachment (although I had left it in special charge of a person at work on the wharf), some *mystery* or *medicine* operation had relieved me from any further anxiety or trouble about it—it had gone and never returned, although it had safely passed the countries of mysteries, and had often laid weeks and months at the villages of red men, with no laws to guard it, and where it had also

*In 1880 Saint Louis had a population of 350,518.

often been taken out of the water by *mystery-men* and carried up the bank and turned against my wigwam, and by them again safely carried to the river's edge and put afloat upon the water when I was ready to take a seat in it.

Saint Louis, which is fourteen hundred miles west of New York, is a flourishing town of 15,000 inhabitants, and destined to be the great emporium of the West—the greatest inland town in America. Its location is on the western bank of the Mississippi River, twenty miles below the mouth of the Missouri, and fourteen hundred above the entrance of the Mississippi into the Gulf of Mexico.

This is the great depot of all the fur-trading companies to the Upper Missouri and Rocky Mountains and their starting place; and also for the Santa Fé and other trading companies who reach the Mexican borders overland, to trade for silver bullion from the extensive mines of that rich country.

I have also made it *my* starting point and place of deposit, to which I send from different quarters my packages of paintings and Indian articles, minerals, fossils, &c., as I collect them in various regions, here to be stored till my return, and where, on my *last return*, if I ever make it, I shall hustle them all together and remove them to the East.

To this place I had transmitted by steamer and other conveyance about twenty boxes and packages at different times, as my note-book showed, and I have, on looking them up and enumerating them, been lucky enough to recover and recognize about fifteen of the twenty, which is a pretty fair proportion for this wild and desperate country, and the very *conscientious hands* they often are doomed to pass through.—Pages 29, 30, vol. 2, Catlin's Eight Years.

Mr. Catlin, in "Life Amongst the Indians," 1861 (pages 169–172), writes :

The day before we reached Saint Louis [voyage down the Mississippi, 1836], being fatigued with paddling nine hundred miles, and having a strong wind against us, we hailed a steamer descending the river, and with ourselves had our little canoe and its contents lifted on board. I related to the captain my former misfortune in losing my canoe at Saint Louis, and told him I should take more care of this. He laughed at me heartily and said, "You have been very unlucky, but you shall at least be sure of one."

We arrived at Saint Louis too late in the evening to remove my canoe, and in the morning I was saved the trouble; and with it, on this occasion, had departed forever a large package which I had left in the cabin, with my name on it, containing several very beautiful articles of Indian costumes, pipes, &c. For the loss of these things on his vessel I remonstrated with the captain, and severely so, for the parcel taken from the cabin of his steamer with my name on it. For this he laughed me in the face again and said, "Why, don't you know, sir, that if you leave a box or a parcel in any steamboat on the Missouri or the Mississippi, with George Catlin marked on it, it is known at once by all the world to be filled with Indian curiosities, and that you will never see it again unless it goes ashore with you?"

This accounted for the losses I had met with on former occasions of boxes and parcels sent by steamers and other boats, from various remote places in the Indian countries to Saint Louis, containing one-third at least of all the Indian manufactures I ever procured, after I had purchased them at exorbitant prices; and oftentimes the poor Indians had stored them and carried them over rivers, and transported them over long distances in safety for me. What a comment is this upon the glorious advantages of civilization!

312. Beautiful Prairie Bluffs, view on Upper Mississippi, everywhere covered with a green turf. Painted in 1832.

(See Plate No. 119, vol. 2, Voyage down the Missouri, Catlin's Eight Years.)

313. *Bad Axe*, battle ground where Black Hawk was defeated by General Atkinson above Prairie du Chien; Indians making defense and swimming the river in 1832. Painted in 1832. (No plate.)

There is no more beautiful prairie country in the world than that which is to be seen in this vicinity. In looking back from this bluff, towards the west, there is, to an almost boundless extent, one of the most beautiful scenes imaginable. The surface of the country is gracefully and slightly undulating, like the swells of the retiring ocean after a heavy storm, and everywhere covered with a beautiful green turf and with occasional patches and clusters of trees. The soil in this region is also rich, and capable of making one of the most beautiful and productive countries in the world.

Ba'tiste and Bogard used their rifles to some effect during the day that we loitered here, and also gathered great quantities of delicious grapes. From this lovely spot we embarked the next morning, and glided through constantly changing scenes of beauty, until we landed our canoe at the base of a beautiful series of grass-covered bluffs, which, like thousands and thousands of others on the banks of this river, are designated by no name that I know of.

My canoe was landed at noon, at the base of these picturesque hills, and there rested till the next morning. As soon as we were ashore, I scrambled to their summits, took my easel and canvas and brushes to the top of the bluff, and painted two views from the same spot [No. 312] the one looking up and the other down the river. The reader, by imagining these hills to be five or six hundred feet high, and every foot of them, as far as they can be discovered in distance, covered with a vivid green turf, whilst the sun is gilding one side and throwing a cool shadow on the other, will be enabled to form something like an adequate idea of the shores of the Missouri. From this enchanting spot there was nothing to arrest the eye from ranging over its waters for the distance of twenty or thirty miles, where it quietly glides between its barriers, formed of thousands of green and gracefully sloping hills, with its rich and alluvial meadows and woodlands, and its hundred islands, covered with stately cottonwoods. In these two views the reader has a fair account of the general character of the Upper Missouri, and by turning back to Plate No. 39, vol. 1, No. 390, which I have already described, he will at once see the process by which this wonderful formation has been produced. In that plate will be seen the manner in which the rains are wearing down the clay bluffs, cutting gullies or sluices behind them, and leaving them at last to stand out in relief, in these rounded and graceful forms, until in time they get seeded over, and nourish a growth of green grass on their sides, which forms a turf and protects their surface, preserving them for centuries, in the forms that are here seen. The tops of the highest of these bluffs rise nearly up to the summit level of the prairies, which is found as soon as one travels a mile or so from the river, amongst these picturesque groups, and comes out at their top; from whence the country goes off to the East and the West, with an almost perfectly level surface.

These two views were taken about thirty miles above the village of the Punchas, and five miles above "the Tower," the name given by the travelers through the country to a high and remarkable clay bluff, rising to the height of some hundreds of feet from the water, and having in distance the castellated appearance of a fortification.

My canoe was not unmoored from the shores of this lovely spot for two days, except for the purpose of crossing the river, which I several times did, to ascend and examine the hills on the opposite side. I had Ba'tiste and Bogard with me on the tops of these green-carpeted bluffs, and tried in vain to make them see the beauty of scenes that were about us. They dropped asleep, and I strolled and contemplated alone, clambering "*up one hill*" and sliding or running "*down another*," with no other living being in sight, save now and then a bristling wolf, which, from my approach, was reluctantly retreating from his shady lair, or sneaking behind me and smelling on my track.

—Pages 8, 9, vol. 2, Catlin's *Eight Years*.

314. Chippewas (Sioux) gathering wild rice. Scene near the source of the Saint Peter's (Minnesota); shelling their rice into their bark canoes, by bending it over and whipping it with sticks. Painted in 1836.

(Plate No. 278, page 268, vol. 2, Catlin's Eight Years.)

Plate No. 278 is a party of Sioux, in bark canoes (purchased of the Chippewas), gathering the wild rice, which grows in immense fields around the shores of the rivers and lakes of these northern regions, and used by the Indians as an useful article of food. The mode of gathering it is curious, and, as seen in the drawing, one woman paddles the canoe, whilst another, with a stick in each hand, bends the rice over the canoe with one, and strikes it with the other, which shells it into the canoe, which is constantly moving along until it is filled.—G. C.

315. Beautiful Prairie Bluffs. View near "Prairie la Crosse," above Prairie du Chien, Upper Mississippi. Painted in 1836.

(No plate.)

316. Cap au 'lail (Garlic Cape), a bold and picturesque promontory on Upper Mississippi. Painted in 1836.

(Plate No. 250, page 144, vol. 2, Catlin's Eight Years.)

Another also beautiful scene.—G. C.

(See No. 319.)

317. Picturesque Bluffs, above Prairie du Chien, Upper Mississippi. Painted in 1836. (No plate.)

318. Pike's Tent, the highest bluff on the river, Upper Mississippi. Painted in 1836.

(Plate No. 249, page 143, vol. 2, Catlin's Eight Years.)

Named for Lieutenant Pike, afterwards General Z. B. Pike.

On our way after we had left the beautiful shores of Lake Pepin, we passed the magnificent bluff called Pike's Tent, and undoubtedly the highest eminence on the river, running up in the form of a tent, from which circumstance and that of its having been first ascended by Lieutenant Pike, it has taken the name of Pike's Tent, which it will doubtless forever retain.

The corporal and I ran our little craft to the base of this stupendous pyramid, and spent half a day about its sides and its pinnacle, admiring the lovely and almost boundless landscape that lies beneath it.

To the top of this grass-covered mound I would advise every traveler in the country, who has the leisure to do it, and sinew enough in his leg, to stroll awhile, and enjoy what it may be difficult for him to see elsewhere.—G. C.

319. View of Cornice Rocks and Pike's Tent, distant seven hundred and fifty miles above Saint Louis, on Upper Mississippi. Painted in 1836.

(Plate No. 316, page 144, vol. 2, Catlin's Eight Years.)

Cap au 'lail (Garlic Cape), about twenty miles above Prairie du Chien, is another beautiful scene, and the Cornice Rocks, on the west bank, where my little bark rested two days, till the corporal and I had taken bass from every nook and eddy about them where our hooks could be dipped. To the lover of fine fish, and fine sport in fishing, I would recommend an encampment for a few days on this picturesque ledge, where his appetite and his passion will soon be gratified.—G. C.

320. Lover's Leap, on Lake Pepin, Upper Mississippi; a rock five hundred feet high, where an Indian girl threw herself off a few years since to avoid marrying the man to whom she was to be given by her father. Painted in 1836.

(Plate No. 248, page 143, vol. 2, Catlin's Eight Years.)

Along the shores of this beautiful lake (Lake Pepin, an expansion of the Upper Mississippi River of four or five miles in width and twenty-five miles in length) we

[Corporal Allen and Mr. Catlin] lingered for several days, and our canoe was hauled a hundred times upon the pebbly beach, where we spent hours and days, robbing it of its precious gems, which are thrown up by the waves.

We found many rich agates, carnelians, jaspers, and porphyries. The agates are many of them peculiarly beautiful, most of them water-waved, their colors brilliant and beautifully striated. Point aux Sables has been considered the most productive part of the lake for these gems; but owing to the frequent landings of the steamboats and other craft on that point, the best specimens of them have been picked up, and the traveler will now be best remunerated for his trouble by tracing the shore around into some of its coves, or on some of its points less frequented by the footsteps of man.

The *Lover's Leap* is a bold and projecting rock, of six or seven hundred feet elevation on the east side of the lake, from the summit of which, it is said, a beautiful Indian girl, the daughter of a chief, threw herself off in presence of her tribe, some fifty years ago, and dashed herself to pieces, to avoid being married to a man whom her father had decided to be her husband, and whom she would not marry.—G. C.

321. Falls of Saint Anthony, nine hundred miles above Saint Louis; perpendicular fall, eighteen feet; Upper Mississippi. Painted in 1835.

(Plate No. 230, page 131, vol. 2, Catlin's Eight Years.)

Site of the city of Minneapolis in 1880, with 32,000 people.

Mr. Catlin made several visits to the Falls of Saint Anthony, first in 1835 and again in 1836. He met the Sioux here in 1835 and 1836.

The Falls of Saint Anthony, which are nine hundred miles above Saint Louis, are the natural curiosity of this country, and nine miles above the mouth of Saint Peter's, from whence I am at this time writing.

The Falls of Saint Anthony are about nine miles above this fort [Fort Snelling] and the junction of the two rivers; and, although a picturesque and spirited scene, is but a pygmy in size to Niagara and other cataracts in our country—the actual perpendicular fall being but eighteen feet, though of half a mile or so in extent, which is the width of the river, with brisk and leaping rapids above and below, giving life and spirit to the scene.—G. C.

322. Madame Ferrebault's Prairie, from the river above; the author and his companion descending the river in a bark canoe, above Prairie du Chien, Upper Mississippi; beautiful grass-covered bluffs. Painted in 1836.

(No plate.)

323. Little Falls, near the Falls of Saint Anthony, on a small stream. Painted in 1835.

324. La Montaigne que tremps dans l'Eau, Upper Mississippi, above Prairie du Chien. Painted in 1835.

325. Cassville, below Prairie du Chien, Upper Mississippi; a small village just commenced in 1835. Painted in 1835. [Now in Grant County, Wisconsin; population, 1880, 551; 32 miles above Dubuque, Iowa.]

326. Dubuque, a town in the lead-mining country. Painted in 1835.

On his voyage up the Mississippi River in 1835 Mr. Catlin writes:

A visit of a few days to Dubuque will be worth the while of every traveler; and for the speculator and man of enterprise it affords the finest field now open in our country. It is a small town of two hundred houses, built entirely within the last two years, on one of the most delightful sites on the river and in the heart of the richest and most productive parts of the mining region; having this advantage over most other mining countries, that immediately over the richest (and, in fact, all) of the lead mines; the land on the surface produces the finest corn, and all other vege-

tables that may be put into it. This is certainly the richest section of country on the continent, and those who live a few years to witness the result will be ready to sanction my assertion that it is to be the *mint of our country*.—G. C.

(See also No. 330.)

In 1880 a city of Iowa with 18,434 population.

327. Galena, a small town on the Upper Mississippi. Painted in 1835.

Now in Joe Daviess County, Illinois. In 1880 had a population of 7,019.

328. Rock Island (viz, Fort Armstrong—established in 1819, abandoned May 4, 1836), United States garrison, Upper Mississippi. Painted in 1835.

In 1880 a city in Illinois with about 16,000 population.

329. Beautiful Prairie Bluffs, on the Upper Mississippi. Painted in 1835.

(Plate No. 228, page 130, vol. 2, Catlin's Eight Years.)

To give an idea of the character of the scenes which I have * * * described along the stately shores of the Upper Mississippi, I have here inserted a river view taken about one hundred miles below this place [Falls of Saint Anthony].—G. C.

330. Dubuque's Grave, on the Upper Mississippi. Painted in 1835. (See also 326.)

(Plate No. 229, page 130, vol. 2, Catlin's Eight Years.)

Dubuque was the first miner in the lead mines under the Spanish grant. He built his own sepulcher, and raised a cross over it on a beautiful bluff, overlooking the river, forty years ago, where it now stands.

Dubuque's Grave is a place of great notoriety on this river, in consequence of its having been the residence and mining place of the first lead-mining pioneer of these regions, by the name of Dubuque, who held his title under a grant from the Mexican Government (I think), and settled by the side of this huge bluff, on the pinnacle of which he erected the tomb to receive his own body, and placed over it a cross with his own inscription on it. After his death his body was placed within the tomb, at his request, lying in state (and uncovered except with his winding-sheet), upon a large flat stone, where it was exposed to the view, as his bones now are, to the gaze, of every traveler who takes the pains to ascend this beautiful, grassy, and lily-covered mound to the top, and peep through the gratings of two little windows, which have admitted the eyes, but stopped the sacrilegious *hands*, of thousands who have taken a walk to it.

At the foot of this bluff there is now an extensive smelting furnace, where vast quantities of lead are melted from the ores which are dug out of the hills in all directions about it.—G. C.

On Mr. Catlin's return from his voyage to the Upper Mississippi in the fall of 1835, he visited the lead mines, and thus describes them:

I hauled my canoe out of the water at Dubuque, where I found my wife, again in the society of kind and hospitable friends, and found myself amply repaid for a couple of weeks' time spent in the examination of the extensive lead mines, walking and creeping through caverns, some eighty or one hundred feet below the earth's surface, decked in nature's pure livery of stalactites and spar, with walls and sometimes ceilings of glistening massive lead, and I hold yet (and ever shall), in my mind, without loss of a fraction of feature or expression, the image of one of my companions, and the scene that at one time was about him. His name is Jeffries; we were in Lockwood's Cave; my wife and another lady were behind, and he advancing before me, *his* ribs, more elastic than mine, gave him entrance through a crevice into a chamber yet unexplored; he dared the pool, for there was one of icy water, and translucent as the air itself.

We stood luckless spectators, to gaze and envy, while he advanced. The lighted flambeau in his hand brought the splendid furniture of this tessellated palace into view; the surface of the jostled pool laved his sides as he advanced, and the rich stalagmites that grew up from the bottom reflected a golden light through the water, while the walls and ceiling were hung with stalactites which glittered like diamonds.

In this wise he stood in silent gaze, in awe and admiration of the hidden works of nature; his figure, as high as the surface of the water, was magnified into a giant, and his head and shoulders not unfit for a cyclop; in fact, he was a perfect figure of Vulcan. The water in which he stood was a lake of liquid fire. He held a huge hammer in his right hand, and a flaming thunderbolt in his left, which he had just forged for Jupiter. There was but one thing wanting, it was the "sound of the hammer," which was soon given in peals upon the beautiful pendants of stalactite and spar, which sent back and through the cavern the hollow tones of thunder.—G. C., pages 148, 149, vol. 2, Catlin's Eight Years.

Julien Dubuque (called by the Indians "Little Night") was born in France in 1764, and removed to Canada when a boy.

He was of an adventurous spirit, and with two companions, in 1782, came to the United States and settled at Prairie du Chien, now Wisconsin, in 1783. He and his two friends also built a trading village at Prairie du Chien in 1783 as a rival to the post. The site of this village is now within the limits of the present city of Prairie du Chien. He afterwards built a trading-post near the present town of McGregor, Iowa.

He lived at Prairie du Chien for several years and traded amongst the Indians. "At this place, September 22, 1788, the chiefs of the Fox Indians, who lived in a village near the present city of Dubuque, on the west side of the Mississippi River," by a signed agreement conveyed to him a tract of land at the Spanish mines, 740 miles above Saint Louis, on the Mississippi River. The conveyance was for occupation and working the mines within the tract conveyed. This was the first conveyance of title to lands by Indians to a white man within the boundaries of the present State of Iowa, and on the grant Dubuque made the first white man's settlement in Iowa.

In 1794 he applied for and received a confirmation of his Indian grant from Baron de Carondelet, the Spanish governor. It contained a condition that he should not trade with the Indians—only mine—without the written consent of Don Andrew Todd, a merchant and Indian-trader, to whom Carondelet referred Dubuque's petition. Dubuque mined his lead mines, and the product was used by the Indians and whites of the West for many years. Several of the pipes in the original Catlin collection were ornamented with bands of lead from his mine. He married a Fox woman, Potosa, and became a man of influence with the Indians of the Mississippi country. He was a man of character and was respected by all who came in contact with him. He died March 24, 1810, at his mines, and was buried on the bluff, as shown by Mr. Catlin's picture, No. 330. Catfish Creek, a small stream, here empties into the Mississippi.

The grave was originally surrounded by a wall of limestone.

Over his vault, a leaden-doored one, was a cedar cross carrying an inscription in French, "Julien Dubuque, miner of the mines of Spain; died March 24, 1810; aged 45 and a half years." This remained until about 1853, when some vandal tore it down along with the vault. The city of Dubuque, with a population of 18,434 in 1880, is now his best monument.

331. River Bluffs, magnificent view, Upper Mississippi. Painted in 1835.

332. Fort Snelling, at the mouth of Saint Peter's. United States garrison, six miles below the Falls of Saint Anthony, Upper Mississippi. Established in 1822. First called Fort St. Anthony; name changed to Snelling January 7, 1825. Painted in 1835.

(Plate No. 321, page 131, vol. 2, Catlin's Eight Years.)

At this place [mouth of Saint Peter's, on the Mississippi], on the point of land between the Mississippi and the Saint Peter's Rivers, the United States Government have erected a strong fort, which has taken the name of Fort Snelling, from the name of a distinguished and most excellent officer who superintended the building of it. The site of this fort is one of the most judicious that could have been selected in the country, both for health and defense; and being on an elevation of one hundred feet or more above the water, has an exceedingly bold and picturesque effect.

This fort is generally occupied by a regiment of men placed here to keep the peace amongst the Sioux and Chippeways, who occupy the country about it, and also for the purpose of protecting the citizens on the frontier.—G. C.

(See also No. 321.)

It is a fact to be regretted that no comprehensive publication exists giving the trading or military posts of the country west of the Mississippi River. A vast field of history and romance lies before the person who will undertake its preparation. Forts Union, Pierre, Kearney, Laramie, Leavenworth, and Gibson are names which call up interesting figures of the past. Many persons can be found who were in the military or Indian service in the West forty years ago and some fifty. How much data of interest could be obtained for such a romantic, historical episode as the settlement and capture of California, or what interest would cluster in its groupings around Suter's Fort, near where gold was discovered?

A "List of Military Forts, Arsenals, Camps, Barracks," &c., about one thousand in number, from 1744–1779 to 1879, can be found, with much statistical and historical matter in the way of text, pages 122 to 162 of the title, in the "Complete Regular Army Register of the United States: for One Hundred Years (1779 to 1879), T. H. S. Hamersly, Washington, D. C., 1880." No attempt is made, however, to give any local history of them, or derivation of names, or by whom established, &c.

The "The Annual Army Register," published at Washington by the War Department, gives a list of existing military posts, arsenals, camps, and barracks.

A series of photographic and water-color views of many United States military posts, including Forts Bridger, Fetterman, Kearney, Laramie, D. A. Russell, Fred. Steele, Sedgwick, Sanders, Phil. Kearney, Reno, C. F. Smith, Abraham Lincoln, Buford, Trumbull, Gaston, Delaware,

Macinac, and many others may be found in the Museum of the Military Service Institution, at Governor's Island, New York Harbor. In histories of States or cities wherein forts, posts, or barracks are situated can generally be found views of them.

A series of paintings showing the principal forts on the Atlantic coast of the United States by Colonel Eastman, executed prior to 1865, can now be found hanging in the room of the House Committee on Military Affairs in the Capitol at Washington. A distinction must be kept in mind, however, between forts or posts established by or belonging to individuals or corporations, or fur trading companies, and those established by governmental authority.

333. Prairie du Chien, five hundred miles above Saint Louis, Upper Mississippi, United States garrison. Painted in 1836.

(Plate No. 233, page 144, vol. 2, Catlin's Eight Years.)

In 1880 a city of Wisconsin, with a population of 2,777.

Prairie du Chien has been one of the earliest and principal trading posts of the fur company, and they now have a large establishment at that place; but doing far less business than formerly, owing to the great mortality of the Indians in its vicinity, and the destruction of the game, which has almost entirely disappeared in these regions. The prairie is a beautiful elevation above the river, of several miles in length, and a mile or so in width, with a most picturesque range of grassy bluffs encompassing it in the rear. The Government have erected there a substantial fort, in which are generally stationed three or four companies of men, for the purpose (as at the Fall of Saint Anthony) of keeping the peace amongst the hostile tribes, and also of protecting the frontier inhabitants from the attacks of excited savages. There are on the prairie some forty or fifty families, mostly French or half-breeds, whose lives have been chiefly spent in the arduous and hazardous occupations of trappers, and traders, and voyageurs, which has well qualified them for the modes of dealing with Indians, where they have settled down and stand ready to compete with one another for their shares of annuities, &c., which are dealt out to the different tribes who concentrate at that place, and are easily drawn from the poor Indians' hands by whisky and useless gewgaws.

The consequence of this system is, that there is about that place almost one continual scene of wretchedness, and drunkenness, and disease amongst the Indians who come there to trade and to receive their annuities, that disgusts and sickens the heart of every stranger that extends his travels to it.

When I was there Wa-ba-sha's band of the Sioux came there, and remained several weeks to get their annuities, which, when they received them, fell (as they always will do) far short of paying off the account, which the traders take good care to have standing against them for goods furnished them on a year's credit. However, whether they pay off or not, they can always get whisky enough for a grand carouse and a brawl, which lasts for a week or two, and almost sure to terminate the lives of some of their numbers.

Prairie du Chien is the concentrating place of the Winnebagoes and Menomonies who inhabit the waters of the Ouisconsin (Wisconsin?) and Fox Rivers, and the chief part of the country lying east of the Mississippi and west of Green Bay.—G. C.

334. Chippewa village and dog feast, at the Falls of Saint Anthony; lodges built with birch bark; Upper Mississippi. Painted in 1835.

(Plate No. 238, page 138, vol. 2, Catlin's Eight Years.)

The encampment of the Chippewas, to which I have been a daily visitor, was built in the manner seen in Plate No. 238 (No. 334); their wigwams made of birch bark, covering the frame work, which was of slight poles stuck in the ground and bent over at the top, was to give a roof-like shape to the lodge, best calculated to ward off rain and winds.

Through this curious scene I was strolling a few days since with my wife, and I observed the Indian women gathering around her anxious to shake hands with her and show her their children, of which she took especial notice; and they literally filled her hands and her arms with *muk-kuks* of maple sugar, which they manufacture and had brought in great quantities for sale.—G. C.

335. Sioux village, Lake Calhoun, near Fort Snelling; lodges built with poles. Painted in 1835.

336. Coteau des Prairies, headwaters of the Saint Peter's; my companion, Mr. Wood,* Indian guide, and myself, encamping at sunset, cooking by our fire made of buffalo chips.

Mr. Catlin visited the Red Pipestone quarries in 1836. (See Itinerary for 1836.) He went east from Saint Louis in 1835, leaving his family at his father's, and thence he went to Buffalo, across the lake to the Falls of Saint Anthony, and then on horseback to the Red Pipestone quarry, now in Pipestone County, Minnesota.

Mr. Catlin was the first white man permitted by the Indians to visit the Coteau des Prairies. It has since been visited by many travelers and described, but the Indian has departed.

337. Pipestone Quarry, on the Coteau des Prairies, three hundred miles northwest from the Falls of Saint Anthony, on the divide between the Saint Peter's and Missouri. Painted in 1836.

(Plate No. 270, page 164, vol. 2, Catlin's Eight Years.)

The place where the Indians get the stone for all their red pipes, the mineral, *red steatite*,† variety differing from any other known locality; wall of solid, compact quartz, gray and rose color, highly polished as if vitrified; the wall is two miles in length and thirty feet high, with a beautiful cascade leaping from its top into a basin. On the prairie, at the base of the wall, the pipeclay (*steatite*) is dug up at two and three feet depth. There are seen five immense granite bowlders, under which there are two squaws, according to their tradition, who eternally dwell there—the guardian spirits of the place—and must be consulted before the pipestone can be dug up.

The position of the pipestone quarry is in a direction nearly west from the Fall of Saint Anthony, at a distance of three hundred miles, on the summit of the dividing ridge between the Saint Peter's and the Missouri Rivers, being about equidistant from either. This dividing ridge is denominated by the French the *Côteau des Prairies*, and the pipestone quarry is situated near its southern extremity, and consequently not exactly on its highest elevation, as its general course is north and south, and its southern extremity terminates in a gradual slope.

Our approach to it was from the east, and the ascent, for the distance of fifty miles, over a continued succession of slopes and terraces, almost imperceptibly rising one above another, that seemed to lift us to a great height. The singular character of this majestic mound continues on the west side, in its descent toward the Missouri.

* Mr. Catlin was accompanied by an Englishman, Mr. Robert Serrell Wood.

† The red pipestone of the North American Indians is now called "Catlinite," after Mr. Catlin, so named by Dr. Jackson, of Boston. For a comprehensive and exhaustive paper on Catlinite, its antiquity as a material for tobacco pipes, see *American Naturalist*, July, 1883, by Edwin A. Barber, esq., of Philadelphia. This paper contains much descriptive text relative to the Coteau and the country adjacent.

Catlinite is now found at several points in Dakota, Minnesota, and Wisconsin, notably at Flandreau and Sioux Falls, Dakota; Blue Earth River and Sauk County, Iowa; Pipestone, Cottonwood, Watonwan, and Nicollet Counties, Minnesota, and in Barron County, Wisconsin. The color ranges from deep red to an ash-colored variety.

"Say, hast thou seen the calumet of pink or purple bright,

A pipe-bowl in the council, a hatchet in the fight?"—[HIAWATHA—H. W. Longfellow.

RED PIPE STONE QUARRY ON THE COTEAU DES PRAIRIES (MINNESOTA). No. 337, page 240.

(Plate 270, Vol. II, Catlin's Eight Years.)

There is not a tree or bush to be seen from the highest summit of the ridge, though the eye may range east and west almost to a boundless extent, over a surface covered with a short grass, that is green at one's feet and about him, but changing to blue in distance, like nothing but the blue and vastness of the ocean.

The whole surface of this immense tract of country is hard and smooth, almost without stone or gravel, and coated with a green turf of grass of three or four inches only in height. Over this the wheels of a carriage would run as easily, for hundreds of miles, as they could on a macadamized road, and its graceful gradations would in all parts admit of a horse to gallop with ease to himself and his rider.

The full extent and true character of these vast prairies are but imperfectly understood by the world yet, who will agree with me that they are a subject truly sublime, for contemplation when I assure them that "a coach and four" might be driven with ease (with the exception of rivers and ravines, which are in many places impassable), over unceasing fields of green, from the Fall of Saint Anthony to Lord Selkirk's establishment on the Red River, at the north; from that to the mouth of Yellowstone on the Missouri, thence to the Platte, to the Arkansas and Red Rivers of the south, and through Texas to the Gulf of Mexico, a distance of more than three thousand miles.—G. C.

JOURNEY TO RED PIPESTONE QUARRY.

From the Fall of Saint Anthony, my delightful companion (Mr. Wood, whom I have before mentioned) and myself, with our Indian guide, whose name was O-kup-see, tracing the beautiful shores of the Saint Peter's River, about eighty miles; crossing it at a place called "*Traverse des Sioux*," and recrossing it at another point about thirty miles above the mouth of "*Terre Bleue*," from whence we steered in a direction a little north of west for the "*Côteau des Prairies*," leaving the Saint Peter's River, and crossing one of the most beautiful prairie countries in the world, for the distance of one hundred and twenty or one hundred and thirty miles, which brought us to the base of the Côteau, where we were joined by our kind and esteemed companion Monsieur La Fromboisé, as I have before related. This tract of country as well as that along the Saint Peter's River, is mostly covered with the richest soil, and furnishes an abundance of good water, which flows from a thousand living springs. For many miles we had the Côteau in view in the distance before us, which looked like a blue cloud settling down in the horizon; and we were scarcely sensible of the fact when we had arrived at its base, from the graceful and almost imperceptible swells with which it commences its elevation above the country around it. Over these swells or terraces gently rising one above the other, we traveled for the distance of forty or fifty miles, when we at length reached the summit; and from the base of this mound to its top, a distance of forty or fifty miles, there was not a tree or bush to be seen in any direction, and the ground everywhere was covered with a green turf of grass, about five or six inches high; and we were assured by our Indian guide that it descended to the west, towards the Missouri with a similar inclination and for an equal distance, divested of everything save the grass that grows and the animals that walk upon it.

On the very top of this mound or ridge we found the far-famed quarry or fountain of the red pipe, which is truly an anomaly in nature. The principal and most striking feature of this place, is a perpendicular wall of close-grained compact quartz, of twenty-five and thirty feet in elevation, running nearly north and south with its face to the west, exhibiting a front of nearly two miles in length, when it disappears at both ends by running under the prairie, which becomes there a little more elevated, and probably covers it for many miles, both to the north and the south. The depression of the brow of the ridge at this place has been caused by the wash of a little stream, produced by several springs on the top, a little back from the wall, which has gradually carried away the superincumbent earth and having bared the

wall for the distance of two miles, is now left to glide for some distance over a perfectly level surface of quartz rock, and then to leap from the top of the wall into a deep basin below, and from thence seek its course to the Missouri, forming the extreme source of a noted and powerful tributary, called the "Big Sioux."

This beautiful wall is horizontal, and stratified in several distinct layers of light gray, and rose or flesh-colored quartz; and for most of the way, both on the front of the wall and for acres of its horizontal surface, highly polished or glazed as if by ignition.

At the base of this wall there is a level prairie of half a mile in width, running parallel to it, in any and all parts of which the Indians procure the red stone for their pipes, by digging through the soil and several slaty layers of the red stone, to the depth of four or five feet.* From the very numerous marks of ancient and modern diggings or excavations it would appear that this place has been for many centuries resorted to for the red stone; and from the great number of graves and remains of ancient fortifications in its vicinity, it would seem, as well from their actual traditions, that the Indian tribes have long held this place in high superstitious estimation; and also that it has been the resort of different tribes, who have made their regular pilgrimages here to renew their pipes.

The red pipestone, I consider, will take its place amongst minerals as an interesting subject of itself; and the "Côteau des Prairies" will become hereafter an important theme for geologists; not only from the fact that this is the only known locality of that mineral, but from other phenomena relating to it. The single fact of such a table of quartz, in horizontal strata, resting on this elevated plateau, is of itself (in my opinion) a very interesting subject for investigation; and one which calls upon the scientific world for a correct theory with regard to the time when, and the manner in which, this formation was produced. That it is of a secondary character, and of a sedimentary deposit, seems evident; and that it has withstood the force of the diluvial current, while the great valley of the Missouri, from this very wall of rocks to the Rocky Mountains, has been excavated, and its débris carried to the ocean, there is also not a shadow of doubt; which opinion I confidently advance on the authority of the following remarkable facts:

At the base of the wall, and within a few rods of it, and on the very ground where the Indians dig for the red stone, rests a group of five stupendous bowlders of gneiss, leaning against each other; the smallest of which is twelve or fifteen feet, and the largest twenty-five feet in diameter, altogether weighing, unquestionably, several hundred tons. These blocks are composed chiefly of feldspar and mica, of an exceedingly coarse grain (the feldspar often occurring in crystals of an inch in diameter). The surface of these bowlders is in every part covered with a gray moss, which gives them an extremely ancient and venerable appearance, and their sides and angles are rounded by attrition to the shape and character of most other erratic stones, which are found throughout the country. It is under these blocks that the two holes, or ovens, are seen, in which, according to the Indian superstition, the two old women, the guardian spirits of the place, reside; of whom I have before spoken.

That these five immense blocks, of precisely the same character, and differing materially from all other specimens of bowlders, which I have seen in the great valleys of the Mississippi and Missouri, should have been hurled some hundreds of miles from their native bed, and lodged in so singular a group on this elevated ridge, is truly matter of surprise for the scientific world, as well as for the poor Indian, whose superstitious veneration of them is such that not a spear of grass is broken or bent by his feet within three or four rods of them, where he stops, and in humble supplication, by throwing plugs of tobacco to them, solicits permission to dig and carry away the

* From the very many excavations recently and anciently made, I could discover that these layers varied very much in their thickness in different parts; and that in some places they were overlaid with four or five feet of rock similar to, and in fact a part of, the lower stratum of the wall.

red stone for his pipes. The surface of these bowlders are in every part entire and unscratched by anything, wearing the moss everywhere unbroken, except where I applied the hammer to obtain some small specimens, which I shall bring away with me.

The fact alone that these blocks differ in character from all other specimens which I have seen in my travels amongst the thousands of bowlders which are strewed over the great valley of the Missouri and Mississippi, from the Yellowstone almost to the Gulf of Mexico, raises in my mind an unanswerable question as regards the location of their native bed and the means by which they have reached their isolated position; like five brothers, leaning against and supporting each other, without the existence of another bowlder within many miles of them. There are thousands and tens of thousands of bowlders scattered over the prairies at the base of the Côteau on either side, and so throughout the valley of the Saint Peter's and Mississippi, which are also subjects of very great interest and importance to science, inasmuch as they present to the world a vast variety of characters; and each one, though strayed away from its original position, bears incontestible proof of the character of its native bed. The tract of country lying between the Saint Peter's River and the Côteau, over which we passed, presents innumerable specimens of this kind; and near the base of the Côteau they are strewed over the prairie in countless numbers presenting an almost incredible variety of rich and beautiful colors, and undoubtedly traceable (if they can be traced) to separate and distinct beds.

Amongst these beautiful groups it was sometimes a very easy matter to sit on my horse and count within my sight some twenty or thirty different varieties of quartz and granite, in rounded bowlders, of every hue and color, from snow white to intense red, and yellow, and blue, and almost to a jet black; each one well characterized and evidently from a distinct quarry. With the beautiful hues and almost endless characters of these blocks I became completely surprised and charmed, and I resolved to procure specimens of every variety, which I did with success by dismounting from my horse and breaking small bits from them with my hammer, until I had something like a hundred different varieties containing all the tints and colors of a painter's palette. These I at length threw away, as I had on several former occasions other minerals and fossils which I had collected and lugged along from day to day, and sometimes from week to week.

Whether these varieties of quartz and granite can all be traced to their native beds, or whether they all have origins at this time exposed above the earth's surface, are equally matters of much doubt in my mind. I believe that the geologist may take the different varieties, which he may gather at the base of the Côteau in one hour, and travel the continent of North America all over without being enabled to put them all in place; coming at last to the unavoidable conclusion that numerous chains or beds of primitive rocks have reared their heads on this continent, the summits of which have been swept away by the force of diluvial currents, and their fragments jostled together and strewed about, like foreigners in a strange land, over the great valleys of the Mississippi and Missouri, where they will ever remain and be gazed upon by the traveler as the only remaining evidence of their native beds which have again submerged or been covered with diluvial deposits.

There seems not to be, either on the Côteau or in the great valleys on either side, so far as I have traveled, any slaty or other formation exposed above the surface on which grooves or scratches can be seen to establish the direction of the diluvial currents in those regions; yet I think the fact is pretty clearly established by the general shapes of the valleys and the courses of the mountain ridges which wall them in on their sides.

The Côteau des Prairies is the dividing ridge between the Saint Peter's and Missouri Rivers; its southern termination or slope is about in the latitude of the Fall of Saint Anthony, and it stands equidistant between the two rivers; its general course being two or three degrees west of north for the distance of two or three hundred miles,

when it gradually slopes again to the north, throwing out from its base the headwaters and tributaries of the Saint Peter's on the east; the Red River and other streams which empty into Hudson Bay on the north, La Riviere Jaque and several other tributaries to the Missouri on the west, and the Red Cedar, the Iowa, and the Des Moines on the south.

This wonderful feature, which is several hundred miles in length, and varying from fifty to a hundred in width is, perhaps, the noblest mound of its kind in the world. It gradually and gracefully rises on each side, by swell after swell, without tree, or bush, or rock (save what are to be seen in the vicinity of pipestone quarry), and everywhere covered with green grass, affording the traveler, from its highest elevations, the most unbounded and sublime views of—nothing at all—save the blue and boundless ocean of prairie that lie beneath and all around him, vanishing into azure in the distance without a speck or spot to break their softness.

The direction of this ridge I consider pretty clearly establishes the course of the diluvial current in this region, and the erratic stones, which are distributed along its base, I attribute to an origin several hundred miles northwest from the Côteau. I have not myself traced the Côteau to its highest points, nor to its northern extremity; but it has been a subject on which I have closely questioned a number of traders who have traversed every mile of it with their carts, and from thence to Lake Winnepeg on the north, who uniformly tell me that there is no range of primitive rocks to be crossed in traveling the whole distance, which is one connected and continuous prairie.

The top and sides of the Côteau are everywhere strewn over the surface with granitic sand and pebbles, which, together with the fact of the five boulders resting at the pipestone quarry, show clearly that every part of the ridge has been subject to the action of these currents, which could not have run counter to it without having disfigured or deranged its beautiful symmetry.

The glazed or polished surface of the quartz rocks at the pipestone quarry I consider a very interesting subject, and one which will excite hereafter a variety of theories as to the manner in which it has been produced and the causes which have led to such singular results. The quartz is of a close grain, and exceedingly hard, eliciting the most brilliant spark from steel; and in most places, where exposed to the sun and the air, has a high polish on its surface entirely beyond any results which could have been produced by diluvial action, being perfectly glazed as if by ignition. I was not sufficiently particular in my examinations to ascertain whether any parts of the surface of these rocks under the ground, and not exposed to the action of the air, were thus affected, which would afford an important argument in forming a correct theory with regard to it; and it may also be a fact of similar importance that this polish does not extend over the whole wall or area; but is distributed over it in parts and sections, often disappearing suddenly, and reappearing again, even where the character and exposure of the rock is the same and unbroken. In general, the parts and points most projecting and exposed, bear the highest polish, which would naturally be the case whether it was produced by ignition or by the action of the air and sun. It would seem almost an impossibility that the air passing these projections for a series of centuries could have produced so high a polish on so hard a substance; and it seems equally unaccountable that this effect could have been produced in the other way, in the total absence of all igneous matter.

I have broken off specimens and brought them home, which certainly bear as high a polish and luster on the surface as a piece of melted glass; and then as these rocks have undoubtedly been formed where they now lie, it must be admitted that this strange effect on their surface has been produced either by the action of the air and sun, or by igneous influence; and if by the latter course, there is no other conclusion we can come to than that these results are volcanic; that this wall has once formed the side of a crater and that the pipestone, lying in horizontal strata, is formed of the lava which has issued from it. I am strongly inclined to believe, however, that the former supposition is the correct one; and that the pipestone, which differs from

all known specimens of lava, is a new variety of *steatite*, and will be found to be a subject of great interest, and one worthy of a careful analysis.*

DETAINED BY SIOUX AT TRADING-POST.

On our way to this place (red pipestone quarry) my English companion and myself were arrested by a rascally band of the Sioux and held in *durance vile* for having dared to approach the sacred fountain of the pipe. While we had halted at the trading-hut of Le Blanc, at a place called *Traverse des Sioux*, on the Saint Peter's River and about one hundred and fifty miles from the red pipe, a murky cloud of dark-visaged warriors and braves commenced gathering around the house, closing and cramming all its avenues, when one began his agitated and insulting harangue to us, announcing to us in the preamble that we were prisoners, and could not go ahead. About twenty of them spoke in turn, and we were doomed to sit nearly the whole afternoon, without being allowed to speak a word in our behalf, until they had all got through. We were compelled to keep our seats like culprits and hold our tongues till all had brandished their fists in our faces, and vented all the threats and invective which could flow from Indian malice, grounded on the presumption that we had come to trespass on their dearest privilege—their religion.

There was some allowance to be made and some excuse, surely, for the rashness of these poor fellows, and we felt disposed to pity, rather than resent, though their unpardonable stubbornness excited us almost to desperation. Their superstition was sensibly touched, for we were persisting in the most peremptory terms in the determination to visit this their greatest medicine (mystery) place; where, it seems, they had often resolved no white man should ever be allowed to go. They took us to be "officers sent by Government to see what this place was worth," &c. As "this red stone was a part of their flesh," it would be sacrilegious for white man to touch or take it away—"a hole would be made in their flesh, and the blood could never be made to stop running." My companion and myself were in a fix, one that demanded the use of every energy we had about us. Astounded at so unexpected a rebuff, and more than ever excited to go ahead and see what was to be seen at this strange place, in this emergency we mutually agreed to go forward, even if it should be at the hazard of our lives. We heard all they had to say and then made our own speeches, and at length had our horses brought, which we mounted, and rode off without further molestation; and having arrived upon this interesting ground, have found it quite equal in interest and beauty to our sanguine expectations, abundantly repaying us for all our trouble in traveling to it.

Mr. Catlin subsequently details the speeches made by the Sioux at the time of his detention on his way to the red pipestone quarry:

* In Silliman's American Journal of Science, vol. xxvii, p. 394, will be seen the following analysis of this mineral, made by Dr. Jackson, of Boston, one of our best mineralogists and chemists, to whom I sent some specimens for the purpose, and who pronounced it "*a new mineral compound, not steatite; is harder than gypsum, and softer than carbonate of lime.*"

Chemical analysis of the red pipestone brought by George Catlin from the Côteau des Prairies in 1836:

Water.....	8.4
Silicia.....	48.2
Alumina.....	28.2
Magnesia.....	6.0
Carbonate of lime.....	2.6
Peroxide of iron.....	5.0
Oxide of manganese.....	0.6
	99.0
Loss (probably magnesia).....	1.0
	100.0

Te-o-kun-hko (the Swift Man) first rose and said :

"My friends, I am not a chief, but the son of a chief. I am the son of my father, he is a chief, and when he is gone away it is my duty to speak for him ; he is not here ; but what I say is the talk of his mouth. We have been told that you are going to the pipestone quarry. We come now to ask for what purpose you are going, and what business you have to go there." ("How! how!" vociferated all of them, thereby approving what was said, giving assent by the word "how," which is their word for yes.)

"Brothers, I am a brave, but not a chief. My arrow stands in the top of the leaping-rock ; all can see it, and all know that *Te-o-kun-hko's* foot has been there. (How! how!)

"Brothers, we look at you and we see that you are *Che-mo-ke-mon* captains (white men officers) ; we know that you have been sent by your Government to see what that place is worth, and we think that the white people want to buy it, (How! how!)

"Brothers, we have seen always that the white people, when they see anything in our country that they want, send officers to value it, and then, if they can't buy it they will get it some other way. (How! how!)

"Brothers, I speak strong ; my heart is strong, and I speak fast ; this red pipe was given to the red men by the Great Spirit ; it is a part of our flesh, and therefore is great medicine. (How! how!)

"Brothers, we know that the whites are like a great cloud that rises in the east, and will cover the whole country. We know that they will have all our lands, but if ever they get our red pipe quarry they will have to pay very dear for it. (How! how! how!)

"Brothers, we know that no white man has ever been to the pipestone quarry, and our chiefs have often decided in council that no white man shall ever go to it. (How! how!)

"Brothers, you have heard what I have to say, and you can go no farther, but you must turn about and go back. (How! how! how!)

"Brothers, you see that the sweat runs from my face, for I am troubled."

Then I commenced to reply in the following manner :

"My friends, I am sorry that you have mistaken us so much and the object of our visit to your country. We are not officers ; we are not sent by any one ; we are two poor men traveling to see the Sioux and shake hands with them, and examine what is curious or interesting in their country. This man who is with me is my friend ; he is a *Sa-ga-nosh* (an Englishman). (How! how! how!)"

(All rising and shaking hands with him, and a number of them taking out and showing British medals which were carried in their bosoms.)

"We have heard that the red pipe quarry was a great curiosity, and we have started to go to it, and we will not be stopped." (Here I was interrupted by a grim and black-visaged fellow, who shook his long shaggy locks as he rose, with his sullen eyes fixed in direct hatred on me, and his fist brandished within an inch of my face.)

"Pale faces, you cannot speak till we have all done ; you are our prisoners ; our young men (our soldiers) are about the house, and you must listen to what we have to say. What has been said to you is true ; you must go back. (How! how!)

"We heard the word *Sa-ga-nosh*, and it makes our hearts glad ; we shook hands with our brother. His father is our father ; he is our Great Father ; he lives across the big lake ; his son is here, and we are glad ; we wear our Great Father, the *Sag-a-nosh*, on our bosoms, and we keep his face bright ;* we shake hands ; but no white man has been to the red pipe and none shall go. (How!)

* Many and strong are the recollections of the Sioux and other tribes of their alliance with the British in the last and revolutionary wars, of which I have met many curious instances, one of which was correctly reported in the London Globe, from my lectures, and I here insert it, viz, in 1840.

"*Indian knowledge of English affairs.*—Mr. Catlin, in one of his lectures on the manners and customs of the North American Indians, during the last week, related a very curious occurrence, which excited

"You see (holding a red pipe to the side of his naked arm) that this pipe is a part of our flesh. The red men are a part of the red stone. (How! how!)

"If the white men take away a piece of the red pipestone, it is a hole made in our flesh, and the blood will always run. We cannot stop the blood from running. (How! how!)

"The Great Spirit has told us that the red stone is only to be used for pipes, and through them we are to smoke to him. (How!)

"Why do the white men want to get there? You have no good object in view; we know you have none, and the sooner you go back the better. (How! how!)"

Muz-za (the Iron) spoke next:

"My friends, we do not wish to harm you; you have heard the words of our chief men, and you now see that you must go back. (How! how!)

"*Tehan-dee-pah-sha-kah-free* (the red pipestone) was given to us by the Great Spirit, and no one need ask the price of it, for it is medicine. (How! how!)

"My friends, I believe what you have told us; I think your intentions are good, but our chiefs have always told us that no white man was allowed to go there—and you cannot go. (How! how!)"

Another. "My friends, you see I am a young man; you see on my war club two scalps from my enemies' heads; my hands have been dipped in blood, but I am a good man. I am a friend to the whites, to the traders; and they are your friends. I bring them three thousand muskrat skins every year, which I catch in my own traps. (How! how!)

a great deal of surprise and some considerable mirth amongst his highly respectable and numerous audience. Whilst speaking of the great and war-like tribe of Sioux or Dahcotas, of forty or fifty thousand, he stated that many of this tribe, as well as of several others, although living entirely in the territory of the United States, and several hundred miles south of Her Majesty's possessions, were found cherishing a lasting friendship for the English, whom they denominate Saganosh. And in very many instances they are to be seen wearing about their necks large silver medals with the portrait of George III in bold relief upon them. These medals were given to them as badges of merit during the last war with the United States, when these warriors were employed in the British service.

"The lecturer said that whenever the word Saganosh was used it seemed to rouse them at once; that on several occasions when Englishmen had been in his company as fellow-travelers they had marked attentions paid to them by these Indians as Saganoshes. And on one occasion, in one of his last rambles in that country, where he had painted several portraits in a small village of Dahcotas, the chief of the band positively refused to sit; alleging as his objection that the pale faces, who were not to be trusted, might do some injury to his portrait, and his health or his life might be affected by it. The painter, as he was about to saddle his horse for his departure, told the Indian that he was a Saganosh, and was going across the Big Salt Lake, and was very sorry that he could not carry the picture of so distinguished a man. At this intelligence the Indian advanced, and after a hearty grip of the hand, very carefully and deliberately withdrew from his bosom, and next to his naked breast, a large silver medal, and turning his face to the painter, pronounced with great vehemence and emphasis the word Sag-a-nosh! The artist, supposing that he had thus gained his point with the Indian sagamore, was making preparation to proceed with his work, when the Indian still firmly denied him the privilege—holding up the face of His Majesty (which had got a superlative brightness by having been worn for years against his naked breast), he made this singular and significant speech: 'When you cross the Big Salt Lake tell my Great Father that you saw his face, and it was bright!' To this the painter replied, 'I can never see your Great Father, he is dead!' The poor Indian recoiled in silence, and returned his medal to his bosom, entered his wigwam, a few paces distant, where he seated himself amidst his family around his fire, and deliberately lighting his pipe, passed it around in silence.

"When it was smoked out he told them the news he had heard, and in a few moments returned to the traveler again, who was preparing with his party to mount their horses, and inquired whether the Saganoshes had no chief. The artist replied in the affirmative, saying that the present chief of the Saganoshes is a young and very beautiful woman. The sagamore expressed great surprise and some incredulity at this unaccountable information; and being fully assured by the companions of the artist that his assertion was true, the Indian returned again quite hastily to his wigwam, called his own and neighboring families into his presence, lit and smoked another pipe, and then communicated the intelligence to them, to their great surprise and amusement; after which he walked out to the party about to start off, and advancing to the painter (or great medicine as they called him), with a sarcastic smile on his face, in due form, and with much grace and effect, he carefully withdrew again from his bosom the polished silver medal, and turning the face to the painter said, 'Tell my Great Mother that you saw our Great Father, and that we keep his face bright!'"

"We love to go to the pipestone and get a piece for our pipes, but we ask the Great Spirit first. If the white men go to it, they will take it out, and not fill up the holes again, and the Great Spirit will be offended. (How! how! how!)"

Another. "My friends, listen to me! what I am to say will be the truth. (How!)"

"I brought a large piece of the pipestone and gave it to a white man to make a pipe; he was our trader, and I wished him to have a good pipe. The next time I went to his store I was unhappy when I saw that stone made into a dish! (Eugh!)"

"This is the way the white men would use the red pipestone if they could get it. Such conduct would offend the Great Spirit, and make a red man's heart sick. (How! how!)"

"Brothers, we do not wish to harm you. If you turn about and go back you will be well, both you and your horses; you cannot go forward. (How! how!)"

"We know that if you go to the pipestone the Great Spirit looks upon you; the white people do not think of that. (How! how!) I have no more to say."

These and a dozen other speeches to the same effect having been pronounced, I replied in the following manner:

"My friends, you have entirely mistaken us; we are no officers, nor are we sent by any one. The white men do not want the red pipe; it is not worth their carrying home so far if you were to give it all to them. Another thing, they don't use pipes; they don't know how to smoke them. (How! how!)"

"My friends, I think as you do, that the Great Spirit has given that place to the red men for their pipes. (How! how! how!)"

"I give you great credit for the course you are taking to preserve and protect it; and I will do as much as any man to keep white men from taking it away from you. (How! how!)"

"But we have started to go and see it; and we cannot think of being stopped."

Another rose (interrupting me):

"White men, your words are very smooth; you have some object in view or you would not be so determined to go; you have no good design, and the quicker you turn back the better. There is no use of talking any more about it; if you think best to go, try it; that's all I have to say. (How! how!)"

During this scene the son of Monsieur Le Blanc was standing by, and seeing this man threatening me so hard by putting his fist near my face, he several times stepped up to him, and told him to stand back at a respectful distance, or that he would knock him down. After their speaking was done I made a few remarks, stating that we should go ahead; which we did the next morning, by saddling our horses and riding off through the midst of them, as I have before described.

Le Blanc told us that these were the most disorderly and treacherous part of the Sioux Nation; that they had repeatedly threatened his life, and that he expected they would take it. He advised us to go back as they ordered, but we heeded not his advice.

On our way we were notified at several of their villages which we passed that we must go back, but we proceeded on.—G. C.

MR. CATLIN'S MUSINGS AT THE QUARRY.

Thus far have I strolled, within the space of a few weeks, for the purpose of reaching classic ground.

Be not amazed if I have sought, in this distant realm, the Indian muse, for here she dwells and here she must be invoked, nor be offended if my narratives from this moment should savor of poetry or appear like romance.

If I can catch the inspiration I may sing (or yell) a few epistles from this famed ground before I leave it; or at least I will prose a few of its leading characteristics and mysterious legends. This place is great, not in history, for there is none of it, but in traditions and stories, of which this Western world is full and rich.

"Here (according to their traditions) happened the mysterious birth of the red

pipe, which has blown its fumes of peace and war to the remotest corners of the continent, which has visited every warrior and passed through its reddened stem the irrevocable oath of war and desolation. And here, also, the peace-breathing calumet was born and fringed with the eagle's quills, which has shed its thrilling fumes over the land and soothed the fury of the relentless savage.

"The Great Spirit at an ancient period here called the Indian nations together, and standing on the precipice of the red pipestone rock, broke from its wall a piece, and made a huge pipe by turning it in his hand, which he smoked over them, and to the north, the south, the east, and the west, and told them that this stone was red—that it was their flesh—that they must use it for their pipes of peace—that it belonged to them all, and that the war-club and scalping-knife must not be raised on its ground. At the last whiff of his pipe his head went into a great cloud, and the whole surface of the rock for several miles was melted and glazed; two great ovens were opened beneath and two women (guardian spirits of the place) entered them in a blaze of fire; and they are heard there yet (*Tso-mec-cos-tee* and *Tso-me-cos-te-won-dee*), answering to the invocations of the high priests or medicine men, who consult them when they are visitors to this sacred place."

Near this spot, also, on a high mound, is the "Thunder's Nest" (*Nid-du-Tonnere*), where "a very small bird sits upon her eggs during fair weather and the skies are rent with bolts of thunder at the approach of a storm, which is occasioned by the hatching of her brood!

"This bird is eternal and incapable of reproducing her own species; she has often been seen by the medicine men, and is about as large as the end of the little finger! Her mate is a serpent, whose fiery tongue destroys the young ones as soon as they are hatched, and the fiery noise darts through the skies."

Such are a few of the stories of this famed land, which of itself, in its beauty and loveliness, without the aid of traditionary fame, would be appropriately denominated a paradise. Whether it has been an Indian Eden or not, or whether the thunderbolts of an Indian Jupiter are actually forged here, it is nevertheless a place renowned in Indian heraldry and tradition, which I hope I may be able to fathom and chronicle, as explanatory of many of my anecdotes and traditionary superstitions of Indian history which I have given and am giving to the world.

With my excellent companion I am encamped on and writing from the very rock where "the Great Spirit stood when he consecrated the pipe of peace by molding it from the rock and smoking it over the congregated nations that were assembled about him."

Lifted up on this stately mound, whose top is fanned with air as light to breathe as nitrous gas, and bivouacked on its very ridge (where nought on earth is seen in distance save the thousand treeless, bushless, weedless hills of grass and vivid green, which all around me vanish into an infinity of blue and azure), stretched on our bears' skins, my fellow-traveler, Mr. Wood, and myself, have laid and contemplated the splendid orrery of the heavens. With sad delight that shook me with a terror have I watched the swollen sun shoving down, too fast for time, upon the mystic horizon, whose line was lost, except as it was marked in blue across his blood-red disk. Thus have we laid night after night (two congenial spirits who could draw pleasure from sublime contemplation) and descanted on our own insignificance; we have closely drawn our buffalo robes about, talked of the ills of life, of friends we had lost, of projects that had failed, and of the painful steps we had to retrace to reach our own dear native lands again. We have sighed in the melancholy of twilight, when the busy winds were breathing their last, the chill of sable night was hovering around us, and naught of noise was heard but the silvery tones of the howling wolf and the subterraneous whistle of the busy gophers that were plowing and vaulting the earth beneath us. Thus have we seen wheeled down in the west the glories of day, and at the next moment, in the east, beheld her silver majesty jutting up above the horizon, with splendor in her face that seemed again to fill the world with joy

and gladness. We have seen here, too, in all its sublimity, the blackening thunder-storm, the lightning's glare, and stood amidst the jarring thunderbolts that tore and broke in awful rage about us as they rolled over the smooth surface, with naught but empty air to vent their vengeance on. There is a sublime grandeur in these scenes as they are presented here which must be seen and felt to be understood. There is a majesty in the very ground that we tread upon that inspires with awe and reverence, and he must have the soul of a brute who could gallop his horse for a whole day over swells and terraces of green that rise continually ahead and tantalize (where hills peep o'er hills and alps on alps arise), without feeling his bosom swell with awe and admiration, and himself as well as his thoughts lifted up in sublimity when he rises the last terrace and sweeps his eye over the widespread blue and pictured infinity that lies around and beneath him.*

Man feels here, and startles at the thrilling sensation, the force of illimitable freedom. His body and his mind both seem to have entered a new element; the former as free as the very wind it inhales, and the other as expanded and infinite as the boundless imagery that is spread in distance around him. Such is (and is feebly told) the Côteau du Prairie. The rock on which I sit to write is the summit of a precipice thirty feet high, extending two miles in length, and much of the way polished as if a liquid glazing had been poured over its surface. Not far from us, in the solid rock, are the deep impressed "footsteps of the Great Spirit (in the form of a track of a large bird), where he formerly stood when the blood of the buffaloes that he was devouring ran into the rocks and turned them red." At a few yards from us leaps a beautiful little stream, from the top of the precipice, into a deep basin below. Here, amid rocks of the loveliest hues, but wildest contour, is seen the poor Indian performing ablution; and at a little distance beyond on the plain, at the base of five huge granite bowlders, he is humbly propitiating the guardian spirits of the place by sacrifices of tobacco, entreating for permission to take away a small piece of the red stone for a pipe.

Farther along, and over an extended plain, are seen, like gopher hills, their excavations, ancient and recent, and on the surface of the rocks, various marks and their sculptured hieroglyphics—their wakons, totems, and medicines—subjects numerous and interesting for the antiquary or the merely curious. Graves, mounds, and ancient fortifications that lie in sight—the pyramid or leaping rock, and its legends; together with traditions, novel and numerous, and a description graphical and geological, of this strange place, have all been subjects that have passed rapidly through my contemplation, and will be given in future epistles.

INDIAN TRADITIONS OF THE "CÔTEAU DES PRAIRIES," OR RED PIPE-STONE QUARRIES.

I had long ago heard many curious descriptions of this spot given by the Indians, and had contracted the most impatient desire to visit it.† It will be seen by some of the traditions inserted in this letter, from my notes taken on the Upper Missouri

* The reader and traveler who may have this book with him should follow the Côteau a few miles to the north of the quarry for the highest elevation and greatest sublimity of view.—G. C.

† I have, in former epistles, several times spoken of the red pipes of the Indians, which are found in almost every tribe of Indians on the continent, and in every instance have, I venture to say, been brought from the Côteau des Prairies, inasmuch as no tribe of Indians that I have yet visited have ever apprised me of any other source than this; and the stone from which they are all manufactured is of the same character exactly, and different from any known mineral compound ever yet discovered in any part of Europe or other parts of the American continent. This may be thought a broad assertion, yet it is one I have ventured to make (and one I should have no motive for making except for the purpose of eliciting information, if there be any, on a subject so curious and so exceedingly interesting). In my Indian museum there can always be seen a great many beautiful specimens of this mineral, selected on the spot by myself, embracing all of its numerous varieties, and I challenge the world to produce anything like it, except it be from the same locality. In a following letter will be found a further account of it, and its chemical analysis.—G. C.

four years since, that those tribes have visited this place freely in former times; and that it has once been held and owned in common, as neutral ground, amongst the different tribes who met here to renew their pipes, under some superstition, which staid the tomahawk of natural foes, always raised in deadly hate and vengeance in other places. It will be seen also that within a few years past (and that, probably, by the instigation of the whites, who have told them that by keeping off other tribes, and manufacturing the pipes themselves, and trading them to adjoining nations, they can acquire much influence and wealth) the Sioux have laid entire claim to this quarry; and as it is in the center of their country, and they are more powerful than any other tribes, they are able successfully to prevent any access to it.

That this place should have been visited for centuries past by all the neighboring tribes, who have hidden the war-club as they approached it, and staid the cruelties of the scalping-knife, under the fear of the vengeance of the Great Spirit, who overlooks it, will not seem strange or unnatural when their religion or superstitions are known.

That such has been the custom there is not a shadow of doubt, and that even so recently as to have been witnessed by hundreds and thousands of Indians of different tribes, now living, and from many of whom I have personally drawn the information, some of which will be set forth in the following traditions; and as an additional (and still more conclusive) evidence of the above position, here are to be seen (and will continue to be seen for ages to come) the totems and arms of the different tribes, who have visited this place for ages past, deeply engraved on the quartz rocks where they are to be recognized in a moment (and not to be denied) by the passing traveler, who has been among these tribes, and acquired even but a partial knowledge of them and their respective modes.*

The thousands of inscriptions and paintings on the rocks at this place, as well as the ancient diggings for the pipestone, will afford amusement for the world who will visit it, without furnishing the least data, I should think, of the time at which these excavations commenced, or of the period at which the Sioux assumed the exclusive right to it.

Among the many traditions which I have drawn personally from the different tribes, and which go to support the opinion above advanced, is the following, which was related to me by a distinguished Knisteneaux, on the Upper Missouri, four years since, on occasion of presenting to me a handsome red stone pipe. After telling me that he had been to this place, and after describing it in all its features, he proceeded to say:

"That in the time of a great freshet, which took place many centuries ago, and destroyed all the nations of the earth, all the tribes of the red men assembled on the Côteau des Prairies to get out of the way of the waters. After they had all gathered here from all parts, the water continued to rise, until at length it covered them all in a mass, and their flesh was converted into red pipestone. Therefore it has always been considered neutral ground—it belonged to all tribes alike, and all were allowed to get it and smoke it together.

"While they were all drowning in a mass, a young woman, *K-wap-tah-w* (a virgin), caught hold of the foot of a very large bird that was flying over, and was carried to the top of a high cliff, not far off, that was above the water. Here she had twins, and their father was the war-eagle and her children have since peopled the earth.

"The pipestone, which is the flesh of their ancestors, is smoked by them as the symbol of peace, and the eagle's quill decorates the head of the brave."

* I am aware that this interesting fact may be opposed by subsequent travelers, who will find nobody but the Sioux upon this ground, who now claim exclusive right to it; and for the satisfaction of those who doubt, I refer them to Lewis and Clark's tour, thirty-three years since, before the influence of traders had deranged the system and truth of things in these regions. I have often conversed with General Clarke, of Saint Louis, on this subject, and he told me explicitly, and authorized me to say it to the world, that every tribe on the Missouri told him they had been to this place, and that the Great Spirit kept the peace amongst his red children on that ground, where they had smoked with their enemies.—G. C.

Tradition of the Sioux.—"Before the creation of man, the Great Spirit (whose tracks are yet to be seen on the stones, at the red pipe, in the form of the tracks of a large bird) used to slay the buffaloes and eat them on the ledge of the red rocks, on the top of the Côteau des Prairies, and their blood, running on to the rocks, turned them red. One day when a large snake had crawled into the nest of the bird to eat his eggs, one of the eggs hatched out in a clap of thunder, and the Great Spirit catching hold of a piece of the pipestone to throw at the snake, molded it into a man. This man's feet grew fast in the ground where he stood for many ages, like a great tree, and therefore he grew very old; he was older than a hundred men at the present day; and at last another tree grew up by the side of him, when a large snake ate them both off at the roots, and they wandered off together; from these have sprung all the people that now inhabit the earth."

The above tradition I found amongst the Upper Missouri Sioux, but which, when I related to that part of the great tribe of Sioux who inhabit the Upper Mississippi, they seemed to know nothing about it. The reason for this may have been, perhaps, as is often the case, owing to the fraud or excessive ignorance of the interpreter, on whom we are often entirely dependent in this country; or it is more probably owing to the very vague and numerous fables which may often be found, cherished, and told by different bands or families in the same tribe, and relative to the same event.

I shall, in the future, give you traditions of this kind, which will be found to be very strange and amusing; establishing the fact at the same time that theories respecting their origin, creation of the world, &c., are by no means uniform throughout the different tribes, nor even through an individual tribe; and that very many of these theories are but the vagaries, or the ingenious system of their medicine or mystery men, conjured up and taught to their own respective parts of a tribe for the purpose of gaining an extraordinary influence over the minds and actions of the remainder of the tribe, whose superstitious minds, under the supernatural control and dread of these self-made magicians, are held in a state of mysterious vassalage.

Amongst the Sioux of the Mississippi, and who live in the region of the red pipestone quarry, I found the following and not less strange tradition on the same subject: "Many ages after the red men were made, when all the different tribes were at war, the Great Spirit sent runners and called them all together at the 'red pipe.' He stood on the top of the rocks, and the red people were assembled in infinite numbers on the plains below. He took out of the rock a piece of the red stone, and made a large pipe, and smoked it over them all; told them that it was part of their flesh; that though they were at war, they must meet at this place as friends; that it belonged to them all; that they must make their calumets from it, and smoke them to him whenever they wished to appease him or get his good-will. The smoke from his big pipe rolled over them all, and he disappeared in its cloud; at the last whiff of his pipe a blaze of fire rolled over the rocks, and melted their surface; at that moment two squaws went in a blaze of fire under the two medicine rocks, where they remain to this day, and must be consulted and propitiated whenever the pipestone is to be taken away."

The following speech of a Mandan, which was made to me in the Mandan village four years since, after I had painted his picture, I have copied from my note-book as corroborative of the same facts:

"My brother, you have made my picture, and I like it much. My friends tell me they can see the eyes move, and it must be very good—it must be partly alive. I am glad it is done—though many of my people are afraid. I am a young man, but my heart is strong. I have jumped on to the medicine-rock—I have placed my arrow on it, and no Mandan can take it away.* The red stone is slippery, but my foot was

* The medicine (or leaping) rock is a part of the precipice which has become severed from the main part, standing about seven or eight feet from the wall, just equal in height, and about seven feet in diameter.

It stands like an immense column of thirty-five feet high, and highly polished on its top and sides. It

true—it did not slip. My brother, this pipe which I give to you I brought from a high mountain; it is toward the rising sun—many were the pipes that we brought from there, and we brought them away in peace. We left our totems or marks on the rocks—we cut them deep in the stones, and they are there now. The Great Spirit told all nations to meet there in peace, and all nations hid the war-club and the tomahawk. The *Dah-co-tahs*, who are our enemies, are very strong—they have taken up the tomahawk, and the blood of our warriors has run on the rocks. My friend, we want to visit our medicines; our pipes are old and worn out. My friend, I wish you to speak to our Great Father about this.”

The chief of the Punchas, on the Upper Missouri, also made the following allusion to this place, in a speech which he made to me on the occasion of presenting me a very handsome pipe, about four years since:

“My friend, this pipe, which I wish you to accept, was dug from the ground, and cut and polished as you now see it by my hands. I wish you to keep it, and when you smoke through it, recollect that this red stone is a part of our flesh. This is one of the last things we can ever give away. Our enemies, the Sioux, have raised the red flag of blood over the pipestone quarry, and our medicines there are trodden under foot by them. The Sioux are many, and we cannot go to the mountain of the red pipe. We have seen all nations smoking together at that place, but, my brother, it is not so now.”*

Such are a few of the stories relating to this curious place, and many others might be given which I have procured, though they amount to nearly the same thing, with equal contradictions and equal absurdities.—G. C.

338. Sault de Sainte Marie; Indians catching whitefish, in the rapids at the outlet of Lake Superior, by dipping their scoop-nets. Painted in 1836.

(Plate No. 266, page 162, vol. 2, Catlin's Eight Years.)

I mentioned that the Chippeways living in the vicinity of the Sault live entirely on fish; and it is almost literally true also that the French and English and Americans who reside about there live on fish, which are caught in the greatest abundance in the rapids at that place, and are, perhaps, one of the greatest luxuries of the world. The whitefish, which is in appearance much like a salmon, though smaller, is the luxury I am speaking of, and is caught in immense quantities by the scoop-nets of the Indians and Frenchmen amongst the foaming and dashing waters of the

requires a daring effort to leap on to its top from the main wall and back again, and many a heart has sighed for the honor of the feat without daring to make the attempt. Some few have tried it with success, and left their arrows standing in its crevice, several of which are seen there at this time; others have leapt the chasm and fallen from the slippery surface on which they could not hold, and suffered instant death upon the craggy rocks below. Every youngman in the nation is ambitious to perform this feat; and those who have successfully done it are allowed to boast of it all their lives. In the sketch already exhibited there will be seen a view of the “leaping rock”; and in the middle of the picture a mound, of a conical form, of ten feet high, which was erected over the body of a distinguished young man who was killed by making this daring effort about two years before I was there, and whose sad fate was related to me by a Sioux chief, who was father of the young man, and was visiting the red pipestone quarry, with thirty others of his tribe, when we were there, and cried over the grave, as he related the story to Mr. Wood and myself, of his son's death.

*On my return from the pipestone quarry one of the old chiefs of the Sacs, on seeing some specimens of the stone which I brought with me from that place, observed as follows:

“My friend, when I was young I used to go with our young men to the mountain of the red pipe, and dig out pieces for our pipes. We do not go now; and our red pipes, as you see, are few. The *Dah-co-tahs* have spilled the blood of red men on that place, and the Great Spirit is offended. The white traders have told them to draw their bows upon us when we go there; they have offered us many of the pipes for sale, but we do not want to smoke them, for we know that the Great Spirit is offended. My mark is on the rocks in many places, but I shall never see them again. They lie where the Great Spirit sees them, for his eye is over that place. He sees everything that is there.”

Ke-o-kuck, chief of the Sacs and Foxes, when I asked him whether he had ever been there, replied:

“No; I have never seen it. It is in our enemies' country. I wish it was in ours. I would sell it to the whites for a great many boxes of money.”—G. C.

rapids, where it gains strength and flavor not to be found in the same fish in any other place. This unequalled fishery has long been one of vast importance to the immense numbers of Indians who have always assembled about it, but of late it has been found by money-making men to be too valuable a spot for the exclusive occupancy of the savage, like hundreds of others, and has at last been filled up with adventurers, who have dipped their nets till the poor Indian is styled an intruder, and his timid bark is seen dodging about in the coves for a scanty subsistence, whilst he scans and envies the insatiable white man filling his barrels and boats and sending them to market to be converted into money.—G. C.

339. Sault de Sainte Marie, from the Canadian shore, Lake Superior, showing the United States garrison in the distance. Painted in 1836.

(Plate No. 265, page 161, vol. 2, Catlin's Eight Years.)

At the Sault de Sainte Marie, on Lake Superior, I saw a considerable number of Chippeways living entirely on fish, which they catch with great ease at that place.

I need not detain the reader a moment with a description of Sainte Marie, or of the inimitable summer's paradise which can always be seen at Mackinaw, and which, like the other, has been a hundred times described. I shall probably have the chance of seeing about three thousand Chippeways at the latter place on my return home, who are to receive their annuities at that time through the hands of Mr. Schoolcraft, their agent.—G. C.

340. View on the Saint Peter's River, twenty miles above Fort Snelling. Painted in 1836, on return from Côteau des Prairies.

341. View on the Saint Peter's; Sioux Indians pursuing a stag in their canoes. Painted in 1836, on return from Côteau des Prairies.

342. Salt meadows, on the Upper Missouri, and great herds of buffalo; incrustations of salt, which looks like snow. Salt water flows over the prairie in the spring, and, evaporating during the summer, leaves the ground covered with muriate as white as snow. Painted in 1832. (No plate.)

While on an overland journey from the steamer *Yellowstone*, in May, 1832, where she was lying on a sand-bar in the Missouri River, to Laidlaw's Fort (old Fort Pierre), Dakota, I saw near the Bijou Hills (hills named after a hunter of that name), an immense saline or salt meadow, as they are termed in this country, which turned us out of our path, and compelled us to travel several miles out of our way to get by it; we came suddenly upon a great depression of the prairie, which extended for several miles, and as we stood upon its green banks, which were gracefully sloping down, we could overlook some hundreds of acres of the prairie which were covered with an incrustation of salt that appeared the same as if the ground was everywhere covered with snow.

These scenes, I am told, are frequently to be met with in these regions, and certainly present the most singular and startling effect by the sudden and unexpected contrast between their snow-white appearance and the green fields that hem them in on all sides. Through each of these meadows there is a meandering small stream which arises from salt springs, throwing out in the spring of the year great quantities of water, which flood over these meadows to the depth of three or four feet; and during the heat of summer, being exposed to the rays of the sun, entirely evaporates, leaving the incrustation of muriate on the surface to the depth of one or two inches. These places are the constant resort of buffaloes, which congregate in thousands about them, to lick up the salt; and on approaching the banks of this place we stood amazed at the almost incredible number of these animals, which were in sight on the opposite banks, at a distance of a mile or two from us, where they were lying in countless

numbers on the level prairie above, and stretching down by hundreds to lick at the salt, forming in distance large masses of black most pleasingly to contrast with the snow-white and the vivid green which I have before mentioned.—Page 219, vol. 1, Catlin's Eight Years.

343. Pawnee village in Texas, at the base of a spur of the Rocky Mountains; lodges thatched with prairie grass. Painted in 1834, while with First United States Dragoons.

(Plate No. 173, page 70, vol. 2, Catlin's Eight Years.)

The original sketch was drawn and text written by Joseph Chadwick, a companion of Mr. Catlin in this journey. Mr. Catlin was ill, and remained at the Comanche village.

We were four days traveling over a beautiful country, most of the way prairie, and generally along near the base of a stupendous range of mountains of reddish granite, in many places piled up to an immense height without tree or shrubbery on them, looking as if they had actually dropped from the clouds in such a confused mass, and all lay where they had fallen. Such we found the mountains inclosing the Pawnee village, on the bank of Red River, about ninety miles from the Camanchee town. The dragoon regiment was drawn up within half a mile or so of this village, and encamped in a square, where we remained three days. We found here a very numerous village, containing some five or six hundred wigwags, all made of long prairie grass, thatched over poles, which are fastened in the ground and bent in at the top, giving to them, in distance, the appearance of straw bee-hives.

To our very great surprise, we have found these people cultivating quite extensive fields of corn (maize), pumpkins, melons, beans, and squashes; so, with these aids and an abundant supply of buffalo meat, they may be said to be living very well.

The next day after our arrival here Colonel Dodge opened a council with the chiefs, in the chiefs' lodge, where he had the most of his officers around him. He first explained to them the friendly views with which he came to see them, and of the wish of our Government to establish a lasting peace with them, which they seemed at once to appreciate and highly to estimate.

The head chief of the tribe is a very old man, and he several times replied to Colonel Dodge in a very eloquent manner, assuring him of the friendly feelings of his chiefs and warriors towards the pale faces in the direction from whence we came.

After Colonel Dodge had explained, in general terms, the objects of our visit, he told them that he should expect from them some account of the foul murder of Judge Martin and his family on the False Washita,* which had been perpetrated but a few weeks before, and which the Camanchees had told us was done by the Pawnee Piets. The colonel told them, also, that he learned from the Camanchees that they had the little boy, the son of the murdered gentleman, in their possession, and that he should expect them to deliver him up as an indispensable condition of the friendly arrangement that was now making. They positively denied the fact and all knowledge of it, firmly assuring us that they knew nothing of the murder or of the boy. The demand was repeatedly made and as often denied, until at length a negro man was discovered, who was living with the Pawnees, who spoke good English, and, coming into the council-house, gave information that such a boy had recently been brought into their village, and was now a prisoner amongst them. This excited great surprise and indignation in the council, and Colonel Dodge then informed the chiefs that the council would rest here, and certainly nothing further of a peaceable nature would transpire until the boy was brought in. In this alarming dilemma all remained in gloomy silence for awhile, when Colonel Dodge further informed the chiefs that, as an evidence of his friendly intentions towards them, he had, on starting, purchased at a very great price, from their enemies, the Osages, two Pawnee (and one Kiowa) girls,

* See, as to this murder, "Itinerary for 1834," herein.—T. D.

which had been held by them for some years as prisoners, and which he had brought the whole way home, and had here ready to be delivered to their friends and relations, but whom he certainly would never show until the little boy was produced. He also made another demand, which was for the restoration of a United States ranger, by the name of Abbé, who had been captured by them during the summer before. They acknowledged the seizure of this man, and all solemnly declared that he had been taken by a party of the Camanchees over whom they had no control, and carried beyond the Red River, into the Mexican provinces, where he was put to death. They held a long consultation about the boy, and seeing their plans defeated by the evidence of the negro, and also being convinced of the friendly disposition of the colonel by bringing home their prisoners from the Osages, they sent out and had the boy brought in from the middle of a corn-field, where he had been secreted. He is a smart and very intelligent boy of nine years of age, and when he came in he was entirely naked, as they keep their own boys at that age. There was great excitement in the council when the little fellow was brought in, and as he passed amongst them he looked around and exclaimed, with some surprise, "What! are there white men here?" To which Colonel Dodge replied, and asked his name; and he promptly answered, "My name is Matthew Wright Martin." He was then received into Colonel Dodge's arms, and an order was immediately given for the Pawnee and Kiowa girls to be brought forward. They were in a few minutes brought into the council-house, when they were at once recognized by their friends and relatives, who embraced them with the most extravagant expressions of joy and satisfaction. The heart of the venerable old chief was melted at this evidence of white man's friendship, and he rose upon his feet, and taking Colonel Dodge in his arms, and placing his left cheek against the left cheek of the colonel, held him for some minutes without saying a word, whilst tears were flowing from his eyes. He then embraced each officer in turn in the same silent and affectionate manner, which form took half an hour or more before it was completed.*

From this moment the council, which before had been a very grave and uncertain one, took a pleasing and friendly turn. And this excellent old man ordered the women to supply the dragoons with something to eat, as they were hungry.

The little encampment, which heretofore was in a woful condition, having eaten up their last rations twelve hours before, were now gladdened by the approach of a number of women, who brought their "back-loads" of dried buffalo meat and green corn and threw it down amongst them. This seemed almost like a providential deliverance, for the country between here and the Camanchees was entirely destitute of game, and our last provisions were consumed.

The council thus proceeded successfully and pleasantly for several days, whilst the warriors of the Kiowas and Wicos, two adjoining and friendly tribes, living farther to the west, were arriving; and also a great many from other bands of the Camanchees, who had heard of our arrival, until two thousand or more of these wild and fearless-looking fellows were assembled, and all, from their horses' backs, with weapons in hand, were looking into our pitiful little encampment of two hundred men, all in a state of dependence and almost literal starvation; and at the same time nearly one-half the number too sick to have made a successful resistance if we were to have been attacked.

The command returned to this village [the great Comanche] after an absence of fifteen days, in a fatigued and destitute condition, with scarcely anything to eat, or chance of getting anything here; in consequence of which Colonel Dodge almost instantly ordered preparations to be made for a move to the head of the Canadian River, a distance of one hundred or more miles, where the Indians represented to us there

* The little boy of whom I have spoken was brought in, the whole distance to Fort Gibson, in the arms of the dragoons, who took turns in carrying him; and after the command arrived there he was transmitted to the Red River by an officer, who had the enviable satisfaction of delivering him into the arms of his disconsolate and half-distracted mother.

GREAT COMANCHE VILLAGE, TEXAS, IN 1834.

Women dressing skins. No. 346, page 257.

(Plate 164, Vol. II, Catlin's Eight Years.)

would be found immense herds of buffaloes; a place where we could get enough to eat, and, by lying by awhile, could restore the sick, who are now occupying a great number of litters.—Pages 70–72, vol. 2, Catlin's Eight Years.

344. View on the Canadian, in Texas. Painted in 1834, while with the First United States Dragoons. (No plate.)

345. View of the junction of Red River with the False Washita, in Texas. Painted in 1834, while with the First United States Dragoons. (No plate.)

346. Camanche (Comanche) village, in Texas, showing a spur of the Rocky Mountains in the distance; lodges made of buffalo-skins; women dressing robes and drying meat. Painted in 1834, while with the First United States Dragoons.

(Plate No. 164, page 64, vol. 2, Catlin's Eight Years).

The village of the Camanchees, by the side of which we are encamped, is composed of six or eight hundred skin-covered lodges, made of poles and buffalo-skins, in the manner precisely as those of the Sioux and other Missouri tribes, of whom I have heretofore given some account. This village, with its thousands of wild inmates, with horses and dogs, and wild sports and domestic occupations, presents a most curious scene, and the manners and looks of the people a rich subject for the brush and the pen.

In the view I have made of it (No. 346) but a small portion of the village is shown, which is as well as to show the whole of it; inasmuch as the wigwams as well as the customs are the same in every part of it. In the foreground is seen the wigwam of the chief; and in various parts crotches and poles, on which the women are drying meat, and *graining* buffalo robes.

These people, living in a country where buffaloes are abundant, make their wigwams more easily of their skins than of anything else; and with them find greater facilities of moving about, as circumstances often require, when they drag them upon the poles attached to their horses, and erect them again with little trouble in their new residence.—G. C.

347. View on the Wisconsin; Winnebagoes shooting ducks in bark canoe. Painted in 1836. (No plate.) (See also No. 314.)

348. Lac du Cygne (Swan Lake), near the Côteau des Prairies. A famous place, where myriads of white swans lay their eggs and hatch their young. Painted in 1836.

(Plate No. 276, page 207, vol. 2, Catlin's Eight Years.)

After having glutted our curiosity at the fountain of the red pipe, our horses brought us to the base of the Côteau, and then over the extended plain that lies between that and the Traverse des Sioux, on the Saint Peter's with about five days' travel.

In this distance we passed some of the loveliest prairie country in the world, and I made a number of sketches. *Laque du Cygne*, Swan Lake, was a peculiar and lovely scene, extending for many miles, and filled with innumerable small islands covered with a profusion of rich forest trees.—G. C.

349. Beautiful savanna, in the pine woods of Florida. One of thousands of small lakes which have been gradually filled in with vegetation. Painted in the spring of 1836.

(Plate No. 147, page 34, vol. 2, Catlin's Eight Years.)

FROM PENSACOLA, WEST FLORIDA.—From my long silence of late you will no doubt have deemed me out of the civilized, and, perhaps, out of the whole world.

I have, to be sure, been a great deal of the time out of the limits of one and, at times, nearly out of the other. Yet I am living, and hold in my possession a number

of epistles which passing events had dictated, but which I neglected to transmit at the proper season. In my headlong transit through the Southern tribes of Indians I have "popped out" of the woods upon this glowing land, and I cannot forego the pleasure of letting you into a few of the secrets of this delightful place.

"*Flos, floris,*" &c., everybody knows the meaning of; and Florida, in Spanish, is a country of flowers. *Perdido* is perdition, and *Rio Perdido*, River of Perdition. Looking down its perpendicular banks into its black water, its depth would seem to be endless, and the doom of the unwary to be gloomy in the extreme. Step not accidentally or willfully over its fatal brink, and nature's opposite extreme is spread about you. You are literally in the land of the "cypress and myrtle," where the evergreen live-oak and lofty magnolia dress the forest in a perpetual mantle of green.

The sudden transition from the ice-bound regions of the North to this mild climate, in the midst of winter, is one of peculiar pleasure. At a half-way of the distance one's cloak is thrown aside, and arrived on the ever-verdant borders of Florida, the bosom is opened and bared to the soft breeze from the ocean's wave and the congenial warmth of a summer's sun.

Such is the face of nature here in the rude month of February. Green peas are served on the table; other garden vegetables in great perfection, and garden flowers, as well as wild, giving their full and sweetest perfume to the winds.

I looked into the deep and bottomless *Perdido*, and beheld about it the thousand charms which nature has spread to allure the unwary traveler to its brink. It was not enough to entangle him in a web of sweets upon its borders, but nature seems to have used an art to draw him to its bottom, by the voluptuous buds which blossom under its black waters, and whose vivid colors are softened and enriched the deeper they are seen below its surface. The sweetest of wild flowers enamel the shores and spangle the dark-green tapestry which hangs over its bosom; the stately magnolia towers fearlessly over its black waters, and sheds (with the myrtle and jessamine) the richest perfume over this chilling pool of death.

How exquisitely pure and sweet are the delicate tendrils which nature has hung over these scenes of melancholy and gloom; and how strong, also, has she fixed in man's breast the passion to possess and enjoy them. I could have hung by the tree tops over that fatal stream, or blindly staggered over its thorny brink to have culled the sweets which are found only in its bosom; but the poisonous fang, I was told, was continually aimed at my heel, and I left the sweetened atmosphere of its dark and gloomy, yet enameled shores.

Florida is, in a great degree, a dark and sterile wilderness, yet with spots of beauty and of loveliness, with charms that cannot be forgotten. Her swamps and everglades, the dens of alligators and lurking places of the desperate savage, gloom the thoughts of the wary traveler, whose mind is cheered and lit to admiration when, in the solitary pine woods where he hears naught but the echoing notes of the sand-hill cranes or the howling wolf, he suddenly breaks out into the open savannahs teeming with their myriads of wild flowers and palmettos (No. 349); or where the winding path through which he is wending his lonely way suddenly brings him out upon the beach, where the rolling sea has thrown up her thousands of hills and mounds of sand as white as the drifted snow, over which her green waves are lashing and sliding back again to her deep green and agitated bosom.

This sketch (Plate 148) was made on Santa Rosa Island, within a few miles of Pensacola, a favorite spot for tea (and other convivial) parties, which are often held here.

The hills of sand are as purely white as snow, and fifty or sixty feet in height, and supporting on their tops and in their sides clusters of magnolia bushes, of myrtle, of palmetto, and heather, all of which are evergreens, forming the most vivid contrast with the snow-white sand in which they are growing. On the beach a family of Seminole Indians are encamped, catching and drying redfish, their chief article of food.

I have traversed the snow-white shores of Pensacola's beautiful bay, and I said to myself, "Is it possible that nature has done so much in vain, or will the wisdom of man lead him to add to such works the embellishments of art, and thus convert to his own use and enjoyment the greatest luxuries of life?" As a traveling stranger through the place, I said, "Yes; it must be so." Nature has here formed the finest harbor in the world; and the dashing waves of the ocean have thrown around its shores the purest barriers of sand, as white as the drifted snow. Unlike all other Southern ports, it is surrounded by living fountains of the purest water, and its shores continually fanned by the refreshing breathings of the sea. To a Northern man the winters in this place appear like a continual spring time; and the intensity of a summer's sun is cooled into comfort and luxury by the ever-cheering sea-breeze.

This is the only place I have found in the Southern country to which Northern people can repair with safety in the summer season; and I know not of a place in the world where they can go with better guarantees of good health, and a reasonable share of the luxuries of life. The town of Pensacola is beautifully situated on the shore of the bay, and contains at present about fifteen hundred inhabitants, most of them Spanish creoles. They live an easy and idle life, without any energy further than for the mere means of living. The bay abounds in the greatest variety of fish, which are easily taken, and the finest quality of oysters are found in profusion, even alongside of the wharves.

Government having fixed upon this harbor as the great naval depot for all the Southern coast, the consequence will be that a vast sum of public money will always be put into circulation in this place; and the officers of the Navy, together with the officers of the Army stationed in the three forts built and now building at this place, will constitute the most polished and desirable society in our country.

Mr. Catlin here gives in detail the plan for a railroad from Pensacola to Columbus, Ga., with the opinions of Captain Chase, and Lieutenant Bowman, of the Army, as to its feasibility.

Of the few remnants of Indians remaining in this part of the country, I have little to say at present that could interest you. The sum total that can be learned or seen of them (like all others that are half-civilized) is that they are to be pitied.

Mr. Catlin proposed going to East Florida, but the Seminole war prevented this. So instead he went up the Mississippi and Missouri, and made his trip across the plains in 1834.

353. Camanchee (Comanche) village, and dragoons approaching it, showing the hospitable manner in which they were received by the Camanchees. Camanchee warriors all riding out and forming in a line, with a white flag, to receive the dragoons. Painted in 1834.

(Plate No. 163, page 61, vol. 2, Catlin's Eight Years.)

The following description of No. 353 was written by Mr. Catlin in 1834. He was then on the tour with Col. Dodge, First U. S. Dragoons. In the itinerary for 1834, herein, a description of this journey will be found in detail.

After many hard and tedious days of travel, we were at last told by our Camanchee guides that we were near their village, and having led us to the top of a gently-

rising elevation on the prairie, they pointed to their village at several miles' distance, in the midst of one of the most enchanting valleys that human eyes ever looked upon. The general course of the valley is from northwest to southeast, of several miles in width, with a magnificent range of mountains rising in distance beyond; it being, without doubt, a huge "spur" of the Rocky Mountains, composed entirely of a reddish granite or gneiss corresponding with the other links of this stupendous chain. In the midst of this lovely valley we could just discern, amongst the scattering shrubbery that lined the banks of the water-courses, the tops of the Camanchee wigwams and the smoke curling above them. The valley for a mile distant about the village seemed speckled with horses and mules that were grazing in it. The chiefs of the war party requested the regiment to halt until they could ride in and inform their people who were coming. We then dismounted for an hour or so, when we could see them busily running and catching their horses, and at length several hundred of their braves and warriors came out at full speed to welcome us, and forming in a line in front of us, as we were again mounted, presented a formidable and pleasing appearance. As they wheeled their horses, they very rapidly formed in a line, and "dressed" like well-disciplined cavalry. The regiment was drawn up in three columns with a line formed in front, by Colonel Dodge and his staff, in which rank my friend Chadwick and I were also paraded; when we had a fine view of the whole maneuver, which was picturesque and thrilling in the extreme.

In the center of our advance was stationed a white flag, and the Indians answered to it with one which they sent forward and planted by the side of it.*

The two lines were thus drawn up face to face, within twenty or thirty yards of each other, as inveterate foes that never had met; and to the everlasting credit of the Camanchees, whom the world has always looked upon as murderous and hostile, they all came out in this manner, with their heads uncovered, and without a weapon of any kind, to meet a war party bristling with arms, and trespassing to the middle of their country. They had every reason to look upon us as their natural enemy, as they have been in the habit of estimating all pale faces; and yet, instead of arms or defenses, or even of frowns, they galloped out and looked us in our faces without an expression of fear or dismay, and evidently with expressions of joy and impatient pleasure to shake us by the hand on the bare assertion of Colonel Dodge, which had been made to the chiefs, that "we came to see them on a friendly visit."

After we had sat and gazed at each other in this way for some half an hour or so, the head chief of the band came galloping up to Colonel Dodge, and having shaken him by the hand, he passed on to the other officers in turn, and then rode alongside of the different columns, shaking hands with every dragoon in the regiment. He was followed in this by his principal chiefs and braves, which altogether took up nearly an hour longer, when the Indians retreated slowly towards their village, escorting us to the banks of a fine clear stream and a good spring of fresh water half a mile from their village, which they designated as a suitable place for our encampment, and we were soon bivouacked.

354. White sand bluffs, on Santa Rosa Island; and Seminoles drying fish, near Pensacola, on the Gulf of Florida. Painted in 1834. (See No. 349 for description.)

(Plate No. 148, page 34, vol. 2, Catlin's Eight Years.)

* It is a fact which I deem to be worth noting here, that amongst all Indian tribes that I have yet visited in their primitive, as well as improved, state, the *white flag* is used as a flag of truce, as it is in the civilized parts of the world, and held to be sacred and inviolable. The chief going to war always carries it in some form or other, generally of a piece of white skin or bark rolled on a small stick, and carried under his dress or otherwise, and also a red flag; either to be unfurled when occasion requires, the *white flag* as a truce and the *red* one for battle, or, as they say, "for blood."—G. C.

355. View of the "Stone Man Medicine," Côteau des Prairies; a human figure, of some rods in length, made on the top of a high bluff by laying flat stones on the grass; a great mystery or medicine place of the Sioux. Painted in 1836. (See Nos. 336 and 337.)

356. Fort Winnebago, on the head of Fox River; a United States outpost. Painted in 1835. (No plate.)

Fort Winnebago, United States post. On the right bank of the Fox River, directly opposite the portage between this river and the Wisconsin River. Established October 7, 1828; abandoned September 10, 1845.

357. Fort Howard, Green Bay; a United States outpost. Painted in 1835. (No plate.)

Fort Howard, (Wis.), United States post. On the northwest bank of the Fox River, one mile from the point at which it empties into Green Bay. Established in 1817; abandoned June 8, 1852.

358. Fort Gibson, Arkansas; a United States outpost, seven hundred miles west of the Mississippi River. Painted in 1834. (No plate.)

Fort Gibson, United States post, Indian Territory; on the left bank of the Neosho or Grand River; two and a half miles from its confluence with the Arkansas River. Established in April, 1824. In 1863 it was also known as Fort Blunt. From this place, then in Cherokee County, Arkansas, now a town in Indian Territory, Mr. Catlin started with the military expedition, under Colonel Dodge, in 1834,* to the Comanches and Pawnees. He came from New Orleans by river to Fort Gibson in the spring of 1834.

Here we are at present fixed. Fort Gibson is the extreme southwestern outpost on the United States frontier, beautifully situated on the banks of the river, in the midst of an extensive and lovely prairie, and is at present occupied by the Seventh Regiment of United States Infantry, heretofore under the command of General Arbuckle, one of the oldest officers on the frontier, and the original builder of the post.

Nearly two months have elapsed since I arrived at this post, on my way up the river from the Mississippi, to join the regiment of dragoons on their campaign into the country of the Comanches and Pawnee Picts, during which time I have been industriously at work with my brush and my pen, recording the looks and the deeds of the Osages, who inhabit the country on the north and the west of this.

The day before yesterday (June 10) the regiment of dragoons and the Seventh Regiment of Infantry, stationed here, were reviewed by General Leavenworth, who has lately arrived at this post, superseding General Arbuckle in the command.

Both regiments were drawn up in battle array, in fatigue dress, and passed through a number of the maneuvers of battle, of charge and repulse, &c., presenting a novel and thrilling scene in the prairie to the thousands of Indians and others who had assembled to witness the display. The proud and manly deportment of these young men reminds one forcibly of a regiment of independent volunteers, and the horses have a most beautiful appearance from the arrangement of colors. Each company of horses has been selected of one color entirely. There is a company of bays, a company of blacks, one of whites, one of sorrels, one of grays, and one of cream color, &c., which render the companies distinct, and the effect exceedingly pleasing.—Pages 36, 37, vol. 2, Catlin's Eight Years.

359. The Short Tower, Wisconsin. Painted in 1835. (No plate.)

* The expedition under command of Colonel Dodge left Fort Gibson for the Indian country June 19, 1834.

360. Passing the Grand Chute, with bark canoe, Fox River. Painted in 1835.
(No plate.)

361. View of Mackinaw, Lake Michigan, a United States outpost. Painted in 1835.
(Plate No. 264, page 161, vol. 2, Catlin's Eight Years.)

Mr. Catlin was frequently at Mackinaw in 1834 and to 1836.

362. View in the Cross Timbers, where General Leavenworth died, on the Mexican borders. Painted in 1834. (No plate.)

Since writing the above an express has arrived from the encampment which we left at the mouth of False Washita with the melancholy tidings of the death of General Leavenworth, Lieutenant McClure, and ten or fifteen of the men left at that place. This has cast a gloom over our little encampment here, and seems to be received as a fatal foreboding by those who are sick with the same disease; and many of them, poor fellows, with scarce a hope left now for their recovery.

It seems that the general had moved on our trail a few days after we left the Washita, to the "Cross Timbers," a distance of fifty or sixty miles, where his disease at last terminated his existence; and I am inclined to think, as I before mentioned, in consequence of the injury he sustained in a fall from his horse when running a buffalo calf. My reason for believing this is, that I rode and ate with him every day after the hour of his fall; and from that moment I was quite sure that I saw a different expression in his face from that which he naturally wore; and when riding by the side of him two or three days after his fall, I observed to him, "General, you have a very bad cough." "Yes," he replied, "I have killed myself in running that devilish calf; and it was a very lucky thing, Catlin, that you painted the portrait of me before we started, for it is all that my dear wife will ever see of me."—G. C., June, 1834.

363. View on Lower Missouri; alluvial banks falling in, with their huge cotton-woods, forming raft and snags, six hundred miles above Saint Louis. Painted in 1832. (No plate.)

364. View on Upper Missouri; the "Blackbird's grave," where "Blackbird," chief of the Omahas, was buried on his favorite war horse, which was alive; eleven hundred miles above Saint Louis. Painted in 1832.
(Plate No. 117, page 5, vol. 2, Catlin's Eight Years.)

* General Henry Leavenworth was native of Connecticut, born December 10, 1783. He was a lawyer by profession. He was appointed from New York, captain, Twenty-fifth Infantry 25th April, 1812; transferred to Twentieth Infantry 17th May, 1815; major Ninth Infantry 15th August, 1813; lieutenant-colonel Fifth Infantry 10th February, 1818; transferred to Sixth Infantry 1st October, 1821; colonel Third Infantry 16th December, 1825; died 21st July, 1834.

Brevet rank.—Brevet lieutenant-colonel 15th July, 1814, for distinguished service at the battle of Chippewa; brevet colonel 25th July, 1814, for distinguished service at Niagara Falls; brevet brigadier-general 25th July, 1824, for ten years' faithful service in one grade. He commanded an expedition against the Aricksee Indians on the Upper Missouri, in 1822-'23. He saw much service on the frontier against the Indians. Fort Leavenworth (when in Kansas) was founded by him, and the city of Leavenworth, Kans., named for him. He established several other posts on the frontier. Mr. Catlin was attached to his staff in 1834, in a volunteer capacity. General Leavenworth died at Camp Smith, not far from Cross Timbers, Indian Territory, with bilious fever. He was a man universally beloved by those in his command, both for his unassuming manners and for the mildness and clemency of his disposition. At the time of his death he was in command of the left wing, Western Department. His remains were removed to New York City, where they now lie.

He was described in April, 1834, as a "plain-looking old gentleman, tall, yet graceful, though stooping under the weight of perhaps three-score winters; affable and unassuming in the society of his brother officers; mild and compassionate toward those under his command, combining most happily the dignity of the commander with the moderation and humanity of the Christian, and the modest and urbane deportment of the scholar and the gentleman. All love him, for all have access to him; and none that know him can help but love him." A son, Jesse H. Leavenworth, graduated at West Point, July 1, 1830; was in the Fourth United States Infantry; served in the Sac and Fox war in the Second Infantry; resigned, 1836; was colonel of Second Colorado Infantry (Union) in the war of the rebellion.—T. D.

BLACKBIRD'S GRAVE, MISSOURI RIVER.

The Omaha Chief Blackbird buried on his live war-horse.

No. 364, page 262.

(Plate 117, Vol. II, Catlin's Eight Years.)

But a few miles from "Floyd's Bluff" we landed our canoe and spent a day in the vicinity of the "Blackbird's grave." This is a celebrated point on the Missouri, and a sort of telegraphic place, which all the travelers in these realms, both white and red, are in the habit of visiting; the one to pay respect to the bones of one of their distinguished leaders, and the other to indulge their eyes on the lovely landscape that spreads out to an almost illimitable extent in every direction about it. This elevated bluff, which may be distinguished for several leagues in distance (No. 364), has received the name of the "Blackbird's grave," from the fact, that a famous chief of the O-ma-haws, by the name of the Blackbird, was buried on its top at his own peculiar request, over whose grave a cedar post was erected by his tribe some thirty years ago, which is still standing. The O-ma-haw village was about sixty miles above this place, and this very noted chief, who had been on a visit to Washington City, in company with the Indian agent, died of the small-pox, near this spot, on his return home. And, whilst dying, enjoined on his warriors who were about him this singular request (which was literally complied with): He requested them to take his body down the river to this his favorite haunt, and on the pinnacle of this towering bluff to bury him on the back of his favorite war horse, which was to be buried alive, under him, from whence he could see, as he said, "the Frenchmen passing up and down the river in their boats." He owned, amongst many horses, a noble white steed that was led to the top of the grass-covered hill, and with great pomp and ceremony, in the presence of the whole nation, and several of the fur traders and the Indian agent, he was placed astride of his horse's back, with his bow in his hand, and his shield and quiver slung; with his pipe and his medicine bag; with his supply of dried meat, and his tobacco-pouch replenished to last him through his journey to the "beautiful hunting grounds of the shades of his fathers;" with his flint and steel, and his tinder, to light his pipe by the way. The scalps that he had taken from his enemies' heads could be trophies for nobody else, and were hung to the bridle of his horse—he was in full dress and fully equipped; and on his head waved, to the last moment, his beautiful head-dress of the war-eagle's plumes. In this plight, and the last funeral honors having been performed by the medicine men, every warrior of his band painted the palm and fingers of his right hand with vermilion, which was stamped and perfectly impressed on the milk-white sides of his devoted horse.

This all done, turfs were brought and placed around the feet and legs of the horse, and gradually laid up to its sides, and at last over the back and head of the unsuspecting animal, and, last of all, over the head and even the eagle plumes of his valiant rider, where all together have smoldered and remained undisturbed to the present day.

This mound, which is covered with green turf and spotted with wild flowers, with its cedar post in its center, can easily be seen at the distance of fifteen miles, by the *voyageur*, and forms for him a familiar and useful landmark.

Whilst visiting this mound in company with Major Sanford, on our way up the river, I discovered in a hole made in the mound, by a "ground hog" or other animal, the skull of a horse, and by a little pains also came at the skull of the chief, which I carried to the river side, and secreted till my return in my canoe, when I took it in, and brought with me to this place, where I now have it, with others which I have collected on my route.*

There have been some very surprising tales told of this man, which will render him famous in history, whether they be truth or matters of fiction. Of the many, one of the most current is, that he gained his celebrity and authority by the most diabolical series of murders in his own tribe; by administering arsenic (with which he had been supplied by the fur traders) to such of his enemies as he wished to get rid of, and even to others in his tribe whom he was willing to sacrifice, merely to establish his superhuman powers and the most servile dread of the tribe, from

*See skull of Blackbird now in the National Museum. —T. D.

the certainty with which his victims fell around him precisely at the times he saw fit to predict their death. It has been said that he administered this potent drug, and to them unknown medicine, to many of his friends as well as to foes; and by such an inhuman and unparalleled depravity succeeded in exercising the most despotic and absolute authority in his tribe until the time of his death.

This story may be true and it may not. I cannot contradict it, and I am sure the world will forgive me if I say I cannot believe it. If it be true, two things are also true; the one, not much to the credit of the Indian character, and the other, to the everlasting infamy of the fur traders. If it be true, it furnishes an instance of Indian depravity that I never have elsewhere heard of in my travels, and carries the most conclusive proof of the incredible enormity of white men's dealings in this country, who, for some sinister purpose, must have introduced the poisonous drug into the country, and taught the poor chief how to use it, whilst they were silent accessories to the murders he was committing. This story is said to have been told by the fur traders, and although I have not always the highest confidence in their justice to the Indian, yet I cannot, for the honor of my own species, believe them to be so depraved and so wicked, nor so weak, as to reveal such iniquities of this chief, if they were true, which must directly implicate themselves as accessories to his most willful and unprovoked murders.

Such he has been heralded, however, to future ages, as murderer—like hundreds and thousands of others as “horse thieves,” as “drunkards,” as “rogues of the first order,” &c.—by the historian who catches but a glaring story (and perhaps fabrication) of their lives, and has no time nor disposition to inquire into and record their long and brilliant list of virtues, which must be lost in the shade of infamy for want of a historian.

I have learned much of this noble chieftain, and at a proper time shall recount the modes of his civil and military life; how he exposed his life and shed his blood in rescuing the victims to horrid torture, and abolished that savage custom in his tribe; how he led on and headed his brave warriors against the Sacs and Foxes, and saved the butchery of his women and children; how he received the Indian agent, and entertained him in his hospitable wigwam in his village; and how he conducted and acquitted himself on his embassy to the civilized world.

So much I will take pains to say of a man whom I never saw, because other historians have taken equal pains just to mention his name, and a solitary (and doubtful) act of his life, as they have said of hundreds of others, for the purpose of consigning him to infamy.

How much more kind would it have been for the historian, who never saw him, to have enumerated with this, other characteristic actions of his life for the verdict of the world; or to have allowed, in charity, his bones and his name to have slept in silence, instead of calling them up from the grave to thrust a dagger through them and throw them back again.

Book-making now-a-days is done for money-making, and he who takes the Indian for his theme, and cannot go and see him, finds a poverty in his matter that naturally begets error by grasping at every little tale that is brought or fabricated by their enemies. Such books are standards, because they are made for white men's reading only, and herald the character of a people who never can disprove them. They answer the purpose for which they are written, and the poor Indian, who has no redress, stands stigmatized and branded as a murderous wretch and beast.

If the system of book-making and newspaper printing were in operation in the Indian country awhile to herald the iniquities and horrible barbarities of white men in these Western regions, which now are sure to be overlooked, I venture to say that chapters would soon be printed which would sicken the reader to his heart, and set up the Indian a fair and tolerable man.—Pages 5 and 7, vol. 2, Catlin's Eight Years.

In Irving's *Astoria* is a short sketch of some of the romantic deeds of *Wa-shinga-sah-ba*, or Blackbird :

His dominant spirit and his love for the white man were evinced in his latest breath with which he designated his place of sepulture. It was to be on a hill or promontory upward of four hundred feet in height, overlooking a great extent of the Missouri, from which he had been accustomed to watch for the barks of the white men. The Missouri washes the base of the promontory, and after winding and doubling in many links and mazes in the plains below, returns to within nine hundred yards of its starting place, so that for thirty miles, navigating with sail and oar, the voyager finds himself continually near to this singular promontory, as if spell-bound.

It was the dying command of the Blackbird that his tomb should be upon the summit of this hill, in which he should be interred, seated on his favorite horse, that he might overlook his ancient domain and behold the barks of the white men as they came up the river to trade with his people.

The river has now changed its course (in 1885), running far to the eastward, leaving at the foot of the hill a lake in the old bed of the river. The mound which was raised over the chief and his horse is now nearly obliterated, "yet the hill of the Blackbird continues an object of veneration to the wandering savage and a landmark to the voyager of the Missouri.

Mr. Catlin, in 1840, in writing of the habit of rifling Indian graves (which he himself sometimes indulged in), says:

I thought of the heroic Osceola, who was captured when he was disarmed and bearing a white flag in his hand; who died a prisoner of war, and whose head was a few months afterwards offered for sale in the city of New York.

JUDGE JAMES HALL'S NOTES ON BLACKBIRD.

Blackbird (*Wa-shinga-sah-ba*) was the predecessor of Big Elk, (No. 114) (*Ongpatonga*), as chief of the Omahas :

"Blackbird" was an able man and a great warrior, but was a monster in cruelty and despotism. Having learned the deadly quality of arsenic from the traders, he procured a quantity of that drug, which he secretly used to effect his dreadful purposes. He caused it to be believed among his people that if he prophesied the death of an individual the person so doomed would immediately die; and he artfully removed by poison every one who offended him or thwarted his measures. The Omahas were entirely ignorant of the means by which this horrible result was produced, but they saw the effect, and knew from mournful experience that the displeasure of the chief was the forerunner of death; and their superstitious minds easily adopted the belief that he possessed a power which enabled him to will the destruction of his enemies. He acquired a despotic sway over the minds of his people, which he exercised in the most tyrannical manner; and so great was their fear for him, that even when he became superannuated and so corpulent as to be unable to walk they carried him about, watched over him when he slept, and awoke him, when necessary, by tickling his nose with a straw, for fear of disturbing him too abruptly. One chief, the Little Bow, whom he attempted ineffectually to poison, had the sagacity to discover the deception, and the independence to resist the influence of the imposter, but being unable to cope with so powerful an oppressor, he withdrew with a small band of warriors, and remained separated from the nation until the decease of the Blackbird, which occurred in the year 1800.—McKenney & Hall, vol. 1, p. 138.

365. View on Upper Missouri; "Blackbird's grave," a back view; prairies enameled with wild flowers. (No plate.) (See No. 364.)

366. View on Upper Missouri; "brick kilns," volcanic remains, clay bluffs, two hundred feet, supporting large masses of red pumice, nineteen hundred miles above Saint Louis. Painted in 1832. (See Itinerary for 1832.)

(Plates Nos. 37 and 38, page 69, vol. 1, Catlin's Eight Years.)

367. View on Upper Missouri; foot war-party on the march; beautiful prairie; spies and scouts in advance. Painted in 1832. (No plate.)

368. View on Upper Missouri; Prairie Bluffs at sunrising, near mouth of Yellowstone. Painted in 1832. (No plate.)

369. View on Upper Missouri; mouth of the Platte; its junction with the Missouri, nine hundred miles above Saint Louis.

(Plate No. 124, page 12, vol. 2, Catlin's Eight Years.)

Now Plattsmouth, Nebraska. Population about 3,500.

The mouth of the Platte is a beautiful scene, and no doubt will be the site of a large and flourishing town soon after Indian titles shall have been extinguished to the lands in these regions, which will be done within a very few years. The Platte is a long and powerful stream, pouring in from the Rocky Mountains, and joining with the Missouri at this place.—G. C.

370. View on Upper Missouri; magnificent clay bluffs, eighteen hundred miles above Saint Louis; stupendous domes and ramparts, resembling some ancient ruins; streak of coal near the water's edge; and my little canoe, with myself and two men (Bogard and Bâtiste) descending the river. Painted in 1832.

371. View on Upper Missouri; Cabane's trading-house; fur company's establishment; nine hundred and thirty miles above Saint Louis, showing a great avalanche of the bluffs. Painted in 1832.

372. View on Upper Missouri; view in the Grand Détour, nineteen hundred miles above Saint Louis. Magnificent clay bluffs, with red pumicestone resting on their tops, and a party of Indians approaching buffalo. Painted in 1832.

(Plate No. 39, page 75, vol. 1, Catlin's Eight Years.)

373. View on Upper Missouri; beautiful grassy bluffs, one hundred and ten miles above Saint Louis. Painted in 1832.

374. View on Upper Missouri; prairie meadows burning, and a party of Indians running from it in grass eight or ten feet high. Painted in 1833.

(Plate No. 127, page 17, vol. 2, Catlin's Eight Years.)

These scenes are terrific and hazardous in the extreme when the wind is blowing a gale.

375. View on Upper Missouri; prairie bluffs burning.

(Plate No. 128, page 17, vol. 2, Catlin's Eight Years.)

MR. CATLIN'S DESCRIPTION OF BURNING PRAIRIES.

The prairies burning form some of the most beautiful scenes that are to be witnessed in this country, and also some of the most sublime. Every acre of these vast prairies (being covered for hundreds and hundreds of miles, with a crop of grass, which dies and dries in the fall) burns over during the fall or early in the spring, leaving the ground of a black and doleful color.

There are many modes by which the fire is communicated to them, both by white men and by Indians—*per accident*; and yet many more where it is voluntarily done for the purpose of getting a fresh crop of grass, for the grazing of their horses, and also for easier traveling during the next summer, when there will be no old grass to

lie upon the prairies, entangling the feet of man and horse, as they are passing over them.

Over the elevated lands and prairie bluffs, where the grass is thin and short, the fire slowly creeps with a feeble flame, which one can easily step over (Plate 127); where the wild animals often rest in their lairs until the flames almost burn their noses, when they will reluctantly rise, and leap over it, and trot off amongst the cinders, where the fire has passed and left the ground as black as jet. These scenes at night become indescribably beautiful, when their flames are seen at many miles distance, creeping over the sides and tops of the bluffs, appearing to be sparkling and brilliant chains of liquid fire (the hills being lost to the view), hanging suspended in graceful festoons from the skies.

But there is yet another character of burning prairies (Plate 128), that requires another letter, and a different pen to describe—the war, or hell of fires! where the grass is seven or eight feet high, as is often the case for many miles together, on the Missouri bottoms; and the flames are driven forward by the hurricanes, which often sweep over the vast prairies of this denuded country. There are many of these meadows on the Missouri, the Platte, and the Arkansas, of many miles in breadth, which are perfectly level, with a waving grass, so high that we are obliged to stand erect in our stirrups in order to look over its waving tops, as we are riding through it. The fire in these, before such a wind, travels at an immense and frightful rate, and often destroys, on their fleetest horses, parties of Indians, who are so unlucky as to be overtaken by it; not that it travels as fast as a horse at full speed, but that the high grass is filled with wild pea-vines and other impediments, which render it necessary for the rider to guide his horse in the zig-zag paths of the deer and buffaloes, retarding his progress, until he is overtaken by the dense column of smoke that is swept before the fire—alarming the horse, which stops and stands terrified and immutable, till the burning grass which is wafted in the wind, falls about him, kindling up in a moment a thousand new fires, which are instantly wrapped in the swelling flood of smoke that is moving on like a black thunder-cloud, rolling on the earth, with its lightning's glare, and its thunder rumbling as it goes. * * *

When Ba'tiste, and Bogard, and I, and Patrick Raymond (who like Bogard had been a free trapper in the Rocky Mountains), and *Pah-me-o-ne-gua* (the Red Thunder), our guide back from a neighboring village, were jogging along on the summit of an elevated bluff, overlooking an immense valley of high grass, through which we were about to lay our course. * * *

"Well, then, you say you have seen the prairies on fire?" "Yes." "You have seen the fire on the mountains, and beheld it feebly creeping over the grassy hills of the north, where the toad and the timid snail were pacing from its approach—all this you have seen, and who has not? But who has seen the vivid lightnings and heard the roaring thunder of the rolling conflagration which sweeps over the deep-pled prairies of the West? Who has dashed, on his wild horse, through an ocean of grass, with the raging tempest at his back, rolling over the land its swelling waves of liquid fire?" "What!" "Ay, even so. Ask the red savage of the wilds what is awful and sublime—ask him where the Great Spirit has mixed up all the elements of death, and if he does not blow them over the land in a storm of fire? Ask him what foe he has met, that regarded not his frightening yells, or his sinewy bow? Ask these lords of the land, who vauntingly challenge the thunder and lightning of Heaven, whether there is not one foe that travels over their land, too swift for their feet and too mighty for their strength, at whose approach their stout hearts sicken and their strong-armed courage withers to nothing? Ask him again (if he is sullen, and his eyes set in their sockets). 'Hush!—sh!—sh!' he will tell you, with a soul too proud to confess, his head sunk on his breast, and his hand over his mouth), 'That's medicine!' * * *"

I said to my comrades, as we were about to descend from the towering bluff into the prairie, "We will take that buffalo trail, where the traveling herds have slashed

down the high grass, and, making for that blue point, rising, as you can just discern, above this ocean of grass, a good day's work will bring us over this vast meadow before sunset." We entered the trail, and slowly progressed on our way, being obliged to follow the winding paths of the buffaloes, for the grass was higher than the backs of our horses. Soon after we entered, my Indian guide dismounted slowly from his horse, and lying prostrate on the ground, with his face in the dirt, he cried, and was talking to the spirits of the brave. "For," said he, "over this beautiful plain dwells the Spirit of Fire! he rides in yonder cloud; his face blackens with rage at the sound, of the trampling hoofs; the fire-bow is in his hand; he draws it across the path of the Indian, and quicker than lightning, a thousand flames rise to destroy him; such is the talk of my fathers, and the ground is whitened with their bones. It was here," he continued, "that the brave son of Wah-chee-ton, and the strong-armed warriors of his band, just twelve moons since, licked the fire from the blazing wand of that great magician. Their pointed spears were drawn upon the backs of the treacherous Sioux, whose swifter-flying horses led them, in vain, to the midst of this valley of death. A circular cloud sprang up from the prairie around them; it was raised, and their doom was fixed by the Spirit of Fire! It was on this vast plain of fire-grass that waves over our heads, that the swift foot of Mah-to-ga was laid. It is here, also, that the fleet-bounding wild horse mingles his bones with the red man; and the eagle's wing is melted as he darts over its surface. Friends, it is the season of fire; and I fear, from the smell of the wind, that the spirit is awake!"

Pah-me-o-ne-qua said no more, but mounted his wild horse, and waving his hand, his red shoulders were seen rapidly vanishing as he glided through the thick mazes of waving grass. We were on his trail, and busily traced him until the midday sun had brought us to the ground, with our refreshments spread before us. He partook of them not, but stood like a statue, while his black eyes, in sullen silence, swept the horizon round; and then, with a deep-drawn sigh, he gracefully sunk to the earth, and laid with his face to the ground. Our buffalo tongues and pemmican and marrow-fat were spread before us, and we were in the full enjoyment of these dainties of the Western world, when, quicker than the frightened elk, our Indian friend sprang upon his feet. His eyes skimmed again slowly over the prairie's surface, and he laid himself as before on the ground.

"Red Thunder seems sullen to-day," said Bogard. "He startles at every rush of the wind, and scowls at the whole world that is about him."

"There's a rare chap for you—a fellow who would shake his fist at Heaven, when he is at home; and here in a grass-patch, must make his fire-medicine for a circumstance that he could easily leave at a shake of his horse's heels."

"Not sae sure o' that, my hooney, though we'll not be making too lightly of the matter, nor either be frightened at the mon's strange octions. But, Bogard, I'll tell ye in a 'ord (and that's enough), there's something more than odds in all this medicine. If this mon's a fool, he was born out of his own country, that's all—and if the divil iver gits him, he must take him cowl, for he is too swift and too wide-awake to be taken alive—you understand that, I suppose? But to come to the plain matter—supposin' that the Fire Spirit (and I go for somewhat of witchcraft), I say supposin' that this Fire Spirit should jist impty his pipe on t'other side of this prairie, and strike up a bit of a blaze in this high grass, and send it packing across in this direction, before sich a death of a wind as this is! By the bull barley, I'll bet you'd be after making medicine, and taking a bit of it, too, to get rid of the racket."

"Yes, but you see, Patrick——"

"Neever mind that (not wishin' to distarb you); and suppose the blowin' wind was coming fast ahead, jist blowin' about our ears a world of smoke and chokin' us to dith, and we were dancin' about a Varginny reel among these little paths, where the divil would we be by the time we got to that bluff, for it's now fool of a distance? Givin' you time to spake, I would say a word more (askin' your pardon); I know by the expression of your face, mon, you neever have seen the world on fire yet, and

therefore, you know nothin' at all of a hurly-burly of this kind, did ye? Did ye iver see (and I jist want to know), did ye iver see the fire in high grass, runnin' with a strong wind, about five mile and a half, and thin hear it strike into a slash of dry cane brake, I would jist ax you that? By thuneder, you niver have, for your eyes would jist stick out of your head at the thought of it. Did ye iver look way into the backside of Mr. Maelzel's Moscow and see the flashin' flames arunnin' up; and then hear the poppin' of the militia fire jist afterwards? Then you have jist a touch of it! ye're jist beginnin'. Ye may talk about fires, but this is sich a baste of a fire! Ask Jack Sanford, he's a chop that can tall you all about it. Not wishin' to distarb you, I would say a word more, and that is this: If I were advisin', I would say that we are gettin' too far into this imbustible meadow, for the grass is dry and the wind is too strong to make a light matter of at this season of the year; an' now I'll jist tell ye how McKenzie and I were sarved in this very place about two years ago; and he's a worldly chop, and niver aslape, my word for that—hollo, what's that!"

Red Thunder was on his feet!—his long arm was stretched over the grass, and his blazing eye-balls starting from their sockets! "White man," said he, "see ye that small cloud lifting itself from the prairie? He rises! The hoofs of our horses have waked him! The Fire Spirit is awake; this wind is from his nostrils, and his face is this way!" No more; but his swift horse darted under him, and he gracefully slid over the waving grass as it was bent by the wind. Our viands were left, and we were swift on his trail. The extraordinary leaps of his wild horse occasionally raised his red shoulders to view, and he sank again in the waving billows of grass. The tremulous wind was hurrying by us fast, and on it was borne the agitated wing of the soaring eagle. His neck was stretched for the towering bluff, and the thrilling screams of his voice told the secret that was behind him. Our horses were swift, and we struggled hard, yet hope was feeble, for the bluff was yet blue, and nature nearly exhausted. The sunshine was dying, and a cool shadow advancing over the plain. Not daring to look back, we strained every nerve. The roar of a distant cataract seemed gradually advancing on us, the winds increased, the howling tempest was maddening behind us, and the swift-winged beetle and heath-hens instinctively drew their straight lines over our heads. The fleet-bounding antelope passed us also, and the still swifter long-legged hare, who leaves but a shadow as he flies. Here was no time for thought, but I recollect the heavens were overcast, the distant thunder was heard, the lightning's glare was reddening the scene, and the smell that came on the winds struck terror to my soul. * * * The piercing yell of my savage guide at this moment came back upon the winds, his robe was seen waving in the air, and his foaming horse leaping up the towering bluff.

Our breath and our sinews in this last struggle for life were just enough to bring us to its summit. We had risen from a sea of fire! "Great God!" I exclaimed, "how sublime to gaze into that valley, where the elements of nature are so strangely convulsed!" Ask not the poet or painter how it looked, for they can tell you not; but ask the naked savage, and watch the electric twinge of his manly nerves and muscles as he pronounces the lengthened "hush—sh—" his hand on his mouth, and his glaring eye-balls looking you to the very soul.

I beheld beneath me an immense cloud of black smoke, which extended from one extremity of this vast plain to the other, and seemed majestically to roll over its surface in a bed of liquid fire; and above this mighty desolation, as it rolled along, the whitened smoke, pale with terror, was streaming and rising up in magnificent cliffs to heaven.

I stood secure, but tremblingly, and heard the maddening wind, which hurled this monster o'er the land; I heard the roaring thunder, and saw its thousand lightnings flash; and then I saw behind the black and smoking desolation of this storm of fire.

376. View on Upper Missouri; "Floyd's grave," where Lewis and Clarke buried Sergeant Floyd thirty-three years since; a cedar post and sign over the grave.

(Plates Nos. 117 and 118, page 4, vol. 2, Catlin's Eight Years.)

"Floyd's grave" is a name given to one of the most lovely and imposing mounds or bluffs on the Missouri River, about twelve hundred miles above Saint Louis, from the melancholy fate of Sergeant Floyd, who was of Lewis and Clarke's expedition in 1806; who died on the way, and whose body was taken to this beautiful hill and buried in its top, where now stands a cedar post bearing the initials of his name.

I landed my canoe in front of this grass-covered mound, and, all hands being fatigued, we encamped a couple of days at its base. I several times ascended it and sat upon his grave, overgrown with grass and the most delicate wild flowers, where I sat and contemplated the solitude and stillness of this tenanted mound, and beheld from its top the windings infinite of the Missouri and its thousand hills and domes of green, vanishing into blue in distance, when naught but the soft-breathing winds were heard to break the stillness and quietude of the scene; where not the chirping of bird or sound of cricket, nor soaring eagle's scream were interposed 'tween God and man; nor aught to check man's whole surrender of his soul to his Creator. I could not hunt upon this ground, but I roamed from hill-top to hill-top and culled wild flowers, and looked into the valley below me, both up the river and down, and contemplated the thousand hills and dales that are now carpeted with green, streaked as they will be with the plow and yellow with the harvest sheaf; spotted with lowing kine, with houses and fences and groups of hamlets and villas, and these lovely hill-tops ringing with the giddy din and maze or secret earnest whispers of love-sick swains; of pristine simplicity of and virtue; wholesome and well-earned contentment and abundance, and again, of wealth and refinement, of idleness and luxury; of vice and its deformities; of fire and sword, and the vengeance of offended Heaven, wreaked in retributive destruction, and peace and quiet and loveliness, and silence, dwelling again over and through these scenes and blending them into futurity.

Many such scenes there are and thousands on the Missouri shores. My canoe has been stopped and I have clambered up their grassy and flower-decked sides, and sighed all alone, as I have carefully traced and fastened them in colors on my canvas.

This voyage in my little canoe, amid the thousand islands and grass-covered bluffs that stud the shores of this mighty river, afforded me infinite pleasure, mingled with pains and privations which I never shall wish to forget. Gliding along from day to day and tiring our eyes on the varying landscapes that were continually opening to our view, my merry *voyageurs* were continually chanting their cheerful boat songs, and "every now and then," taking up their unerring rifles to bring down the stately elks or antelopes which were often gazing at us from the shores of the river.—G. C.

THE DEATH OF SERGEANT FLOYD.

The next morning (August 20, 1804), * * * we had the misfortune to lose one of our sergeants, Charles Floyd. He was yesterday seized with a bilious colic, and all our care and attention were ineffectual to relieve him. A little before his death he said to Captain Clarke, "I am going to leave you!" His strength failed him as he added, "I want you to write me a letter!" But he died with a composure which justified the high opinion we had formed of his firmness and good conduct. He was buried on the top of the bluff with the honors due to a brave soldier, and the place of his interment marked by a cedar post, on which his name and the day of his death were inscribed. About a mile beyond this place, to which we gave his name, is a small river, about thirty yards wide, on the north, which we called Floyd's River, where we encamped.—Lewis and Clarke's Expedition, pages 75-76, vol. 1.

DISTANT VIEW OF THE LOWER OR PRINCIPAL MANDAN VILLAGE ON THE
MISSOURI RIVER IN 1832.

No. 379, pages 271, 447.

BELLE-VUE, ON THE MISSOURI RIVER, NINE MILES FROM PLATTSMOUTH, NEBRASKA.

Indian agency of Major Dougherty No. 381, page 273.
(Plate 122, Vol. II, Catlin's Eight Years.)

H. M. Brackenridge, in his journal of a voyage up the River Missouri, in 1811, writes (pages 92 and 93) of Floyd's grave:

About a mile below our encampment we passed Floyd's Bluff—and river—fourteen miles from the Mahas (Omaha) village. Sergeant Floyd was of the party of Lewis and Clarke. The place of his interment is marked by a wooden cross, which may be seen by navigators at a considerable distance. The grave occupies a beautiful rising ground, now covered with grass and wild flowers. The pretty little river, which bears his name, is neatly fringed with willow and shrubbery. * * * It is several years since he was buried here. No one has disturbed the cross which marks the grave. Even the Indians who pass venerate the place, and often leave a present or offering near it.

Mr. Catlin saw it twenty-two years after Mr. Brackenridge.

378. View on Upper Missouri; "The Tower," eleven hundred miles above Saint Louis. Painted in 1832. (No plate.)

A name given by the travelers through the country to a high and remarkable clay bluff, rising to the height of some hundreds of feet from the water, and having, in distance, the castellated appearance of a fortification.—G. C.

379. View on Upper Missouri; distant view of the Mandan village, eighteen hundred miles above Saint Louis. Painted in 1832.

(Plate No. 45, vol. 1, Catlin's Eight Years.)

380. View on Upper Missouri; picturesque clay bluff, seventeen hundred miles above Saint Louis.

MANDAN VILLAGE, UPPER MISSOURI.

I said that I was here in the midst of a strange people, which is literally true; and I find myself surrounded by subjects and scenes worthy the pens of Irving or Cooper, of the pencils of Raphael or Hogarth; rich in legends and romances, which would require no aid of the imagination for a book or a picture.

The Mandans (or *See-pohs-kah-nu-mah-kah-kee*, "people of the pheasants," as they call themselves) are perhaps one of the most ancient tribes of Indians in our country. Their origin, like that of all the other tribes, is, from necessity, involved in mystery and obscurity. Their traditions and peculiarities I shall casually recite in this or future epistles, which, when understood, will at once, I think, denominate them a peculiar and distinct race. They take great pride in relating their traditions, with regard to their origin, contending that they were the *first* people created on earth. Their existence in these regions has not been from a very ancient period; and, from what I could learn of their traditions, they have, at a former period, been a very numerous and powerful nation; but by the continual wars which have existed between them and their neighbors they have been reduced to their present numbers.

This tribe is at present located on the west bank of the Missouri, about eighteen hundred miles above Saint Louis, and two hundred below the mouth of Yellowstone River. They have two villages only, which are about two miles distant from each other, and number in all (as near as I can learn) about two thousand souls. Their present villages are beautifully located, and judiciously also for defense against the assaults of their enemies. The site of the lower (or principal) town in particular (Plate 45) is one of the most beautiful and pleasing that can be seen in the world, and even more beautiful than imagination could ever create. In the very midst of an extensive valley (embraced within a thousand graceful swells and parapets or

mounds of interminable green, changing to blue, as they vanish in distance) is built the city, or principal town, of the Mandans. On an extensive plain (which is covered with a green turf, as well as the hills and dales, as far as the eye can possibly range, without tree or bush to be seen) are to be seen rising from the ground, and towards the heavens, domes (not "of gold," but) of dirt, and the thousand spears (not "spires") and scalp-poles, &c., of the semi-subterraneous village of the hospitable and gentlemanly Mandans.

These people formerly (and within the recollection of many of their oldest men, lived fifteen or twenty miles farther down the river, in ten contiguous villages, the marks or ruins of which are yet plainly to be seen. At that period it is evident, as well from the number of lodges which their villages contained as from their traditions, that their numbers were much greater than at the present day.

There are other, and very interesting, traditions and historical facts relative to a still prior location and condition of these people, of which I shall speak more fully on a future occasion. From these, when they are promulged, I think there may be a pretty fair deduction drawn that they formerly occupied the lower part of the Missouri, and even the Ohio and Muskingum, and have gradually made their way up the Missouri to where they now are.

There are many remains on the river below this place (and, in fact, to be seen nearly as low down as Saint Louis) which show clearly the peculiar construction of Mandan lodges, and consequently carry a strong proof of the above position. While descending the river, however, which I shall commence in a few weeks, in a canoe, this will be a subject of interest, and I shall give it close examination.

The ground on which the Mandan village is at present built was admirably selected for defense, being on a bank forty or fifty feet above the bed of the river. The greater part of this bank is nearly perpendicular, and of solid rock. The river, suddenly changing its course to a right angle, protects two sides of the village, which is built upon this promontory or angle. They have, therefore, but one side to protect, which is effectually done by a strong piquet, and a ditch inside of it, of three or four feet in depth. The piquet is composed of timbers of a foot or more in diameter and eighteen feet high, set firmly in the ground at sufficient distances from each other to admit of guns and other missiles to be fired between them. The ditch (unlike that of civilized modes of fortification) is inside of the piquet, in which their warriors screen their bodies from the view and weapons of their enemies whilst they are reloading and discharging their weapons through the piquets.

The Mandans are undoubtedly secure in their villages from the attacks of any Indian nation, and have nothing to fear, except when they meet their enemy on the prairie. Their village has a most novel appearance to the eye of a stranger; their lodges are closely grouped together, leaving but just room enough for walking and riding between them, and appear from without to be built entirely of dirt. But one is surprised when he enters them to see the neatness, comfort, and spacious dimensions of these earth-covered dwellings. They all have a circular form, and are from forty to sixty feet in diameter. Their foundations are prepared by digging some two feet in the ground, and forming the floor of earth by leveling the requisite size for the lodge. These floors or foundations are all perfectly circular, and varying in size in proportion to the number of inmates, or of the quality or standing of the families which are to occupy them. The superstructure is then produced by arranging, inside of this circular excavation, firmly fixed in the ground and resting against the bank, a barrier or wall of timbers, some eight or nine inches in diameter, of equal height (about six feet) placed on end, and resting against each other, supported by a formidable embankment of earth raised against them outside; then, resting upon the tops of these timbers or piles, are others of equal size and equal in numbers, of twenty or twenty-five feet in length, resting firmly against each other, and sending their upper or smaller ends towards the center and top of the lodge, rising at angle of forty-five degrees to the apex or sky-light, which is about three or four feet in

diameter, answering as a chimney and a sky-light at the same time. The roof of the lodge being thus formed, is supported by beams passing around the inner part of the lodge about the middle of these poles or timbers, and themselves upheld by four or five large posts passing down to the floor of the lodge. On the top of and over the poles forming the roof is placed a complete mat of willow boughs, of half a foot or more in thickness, which protects the timbers from the dampness of the earth, with which the lodge is covered from bottom to top to the depth of two or three feet; and then with a hard or tough clay, which is impervious to water, and which with long use becomes quite hard, and a lounging place for the whole family in pleasant weather; for sage, for wooing lovers, for dogs and all; an airing place, a look-out, a place for gossip and mirth, a seat for the solitary gaze and meditations of the stern warrior, who sits and contemplates the peaceful mirth and happiness that is breathed beneath him, fruits of his hard-fought battles on fields of desperate combat with bristling red men.—G. C.

381. View on Upper Missouri; Belle Vue; Indian agency of Major Dougherty, eight hundred and seventy miles above Saint Louis. Painted in 1832.

(Plate No. 122, page 12, vol. 2, Catlin's Eight Years.)

Belle Vue (No. 381) is a lovely scene on the west bank of the river, about nine miles above the mouth of the Platte, and is the agency of Major Dougherty, one of the oldest and most effective agents on our frontiers. This spot is, as I said, lovely in itself, but doubly so to the eye of the weather-beaten *voyageur* from the sources of the Missouri, who steers his canoe in to the shore, as I did, and soon finds himself a welcome guest at the comfortable board of the major, with a table again to eat from, and that (not groaning, but) standing under the comfortable weight of meat and vegetable luxuries, products of the labor of cultivating man. It was a pleasure to see again, in this great wilderness, a civilized habitation, and still more pleasant to find it surrounded with corn-fields, and potatoes, with numerous fruit trees bending under the weight of their fruit; with pigs and poultry and kine; and, what was best of all, to see the kind and benevolent face that never looked anything but welcome to the half-starved guests who throw themselves upon him from the North, from the South, the East, or the West.

At this place I was in the country of the Pawnees, a numerous tribe, whose villages are on the Platte River, and of whom I shall say more anon. Major Dougherty has been for many years the agent for this hostile tribe; and by his familiar knowledge of the Indian character, and his strict honesty and integrity, he has been able to effect a friendly intercourse with them, and also to attract the applause and highest confidence of the world, as well as of the authorities who sent him there.

382. View on Upper Missouri; beautiful clay bluffs, nineteen hundred miles above Saint Louis. Painted in 1832.

383. View on Upper Missouri; Minataree village, earth-covered lodges, on Knife River, eighteen hundred and ten miles above Saint Louis. Bâstiste, Bogard, and myself ferried across the river by an Indian woman in a skin canoe, and Indians bathing in the stream. Painted in July, 1832.

(Plate No. 70, page 186, vol. 1, Catlin's Eight Years.)

I am now writing in the village of the *Minatarees*, which is also located on the west bank of the Missouri River (now near Mandan, Dak.), and only eight miles above the Mandans.

This is a view of the principal village. The *Minatarees* resided in these villages (in 1832) of earth-covered lodges, on Knife River.

The principal village of the *Minatarees*, which is built upon the bank of the Knife River (Plate 70, No. 383), contains forty or fifty earth-covered wigwams, from forty to fifty feet in diameter, and, being elevated, overlooks the other two which are on

lower ground and almost lost amidst their numerous corn-fields and other profuse vegetation which cover the earth with their luxuriant growth.

The scenery along the banks of this little river, from village to village, is quite peculiar and curious, rendered extremely so by the continual wild and garrulous groups of men, women, and children who are wending their way along its winding shores, or dashing and plunging through its blue waves, enjoying the luxury of swimming, of which both sexes seem to be passionately fond. Others are paddling about in their tub-like canoes, made of the skins of buffaloes.—G. C.

384. View on Upper Missouri; Fort Pierre, mouth of Teton River, fur company's trading-post, twelve hundred miles above Saint Louis, with six hundred lodges of Sioux Indians encamped about it in skin lodges. Painted in 1832.

(Plate No. 85, page 208, vol. 1, Catlin's Eight Years.)

(See Itinerary, 1832.)

385. View on Upper Missouri; Nishnabottana bluffs, ten hundred and seventy miles above Saint Louis. Painted in 1832.

386. View on Upper Missouri; Riccaree village, with earth-covered lodges, sixteen hundred miles above Saint Louis. Painted in 1832.

(Plate No. 80, page 204, vol. 1, Catlin's Eight Years.)

The Riccaree village was on the west bank of the Missouri River, near the present town of Bennett, Dak.

Plate 80 (No. 386) gives a view of the Riccaree village, which is beautifully situated on the west bank of the river, two hundred miles below the Mandans, and built very much in the same manner, being constituted of one hundred and fifty earth-covered lodges, which are in part surrounded by an imperfect and open barrier of pickets set firmly in the ground, and ten or twelve feet in height.

This village is built upon an open prairie, and the gracefully undulating hills that rise in the distance behind are everywhere covered with a verdant green turf, without a tree or a bush anywhere to be seen. This view was taken from the deck of the steamer when I was on my way up the river; and probably it was well that I took it then, for so hostile and deadly are the feelings of these people toward the pale faces at this time that it may be deemed most prudent for me to pass them on my way down the river without stopping to make them a visit. They certainly are harboring the most resentful feelings at this time toward the traders and others passing on the river, and no doubt there is great danger of the lives of any white men who unluckily fall into their hands. They have recently sworn death and destruction to every white man who comes in their way, and there is no doubt that they are ready to execute their threats.—G. C.

387. View on Upper Missouri; south side of Buffalo Island, showing the beautiful buffalo bush, with its blue leaves, and bending down with fruit. Painted in 1832.

388. View on Upper Missouri; mouth of Yellowstone; fur company's fort (Fort Union), their principal post, two thousand miles above Saint Louis, and a large party of Knisteneux encamped upon it. Painted in June, 1832.

(Plate No. 3, page 14, vol. 2, Catlin's Eight Years.)

Fort Union, a trading post of the American Fur Company, was built in 1829 (July). It was the first fort built on the Missouri River above the mouth of the Yellowstone. It was on the north bank of the river (see Plate No. 3, page 14, vol. 1, Catlin's Eight Years, and No. 388 of this collection; also see sketch, reproduced herein), five miles below

the present Fort Buford, Mont. This fort was the rallying place for trade and annuities for the Upper Missouri and Yellowstone Indians. It was built by K. McKenzie. It burned down in 1831 and was rebuilt in the same year. This new fort was two hundred and fifty feet square, built of stone, and was inside a stockade. It remained intact (although abandoned by the American Fur Company) until 1868, when it was torn down by order of the commanding officer at Fort Buford (five miles below). Fort Buford was built in 1866.

The fort in which I am residing was built by Mr. McKenzie, who now occupies it. It is the largest and best-built establishment of the kind on the river, being the great or principal headquarters and depot of the fur company's business in this region. A vast stock of goods is kept on hand at this place, and at certain times of the year the numerous outposts concentrate here with the returns of their season's trade, and refit out with a fresh supply of goods to trade with the Indians.

The site for the fort is well selected, being a beautiful prairie on the bank near the junction of the Missouri with the Yellowstone Rivers, and its inmates and its stores well protected from Indian assaults.

Mr. McKenzie is a kind-hearted and high-minded Scotchman, and seems to have charge of all the fur company's business in this region, and from this to the Rocky Mountains. He lives in good and comfortable style, inside of the fort, which contains some eight or ten log-houses and stores, and has generally forty or fifty men and one hundred and fifty horses about him.

He has, with the same spirit of liberality and politeness with which Monsieur Pierre Chouteau treated me on my passage up the river, pronounced me welcome at his table, which groans under the luxuries of the country—with buffalo meat and tongues, with beavers' tails, and marrow-fat; but *sans* coffee, *sans* bread and butter. Good cheer and good living we get at it, however, and good wine also; for a bottle of madeira and one of excellent port are set in a pail of ice every day and exhausted at dinner.

At the hospitable board of this gentleman I found also another, who forms a happy companion for mine host; and whose intellectual and polished society has added not a little to my pleasure and amusement since I arrived here.

The gentleman of whom I am speaking is an Englishman, by the name of Hamilton, of the most pleasing and entertaining conversation, whose mind seems to be a complete store-house of ancient and modern literature and art, and whose free and familiar acquaintance with the manners and men of his country gives him the stamp of a gentleman who has had the curiosity to bring the embellishments of the enlightened world to contrast with the rude and the wild of these remote regions.

We three *bon vivants* form the group about the dinner table, of which I have before spoken, and crack our jokes and fun over the bottles of port and madeira which I have named, and a considerable part of which this gentleman has brought with great and precious care from his own country.

This post is the general rendezvous of a great number of Indian tribes in these regions, who are continually concentrating here for the purpose of trade, sometimes coming, the whole tribe together, in a mass.—G. C.

(See Mr. Catlin's Itinerary for 1832, herein, for a description of the several tribes about Fort Union.)

Mr. Catlin reached Fort Union June 25, 1832, in the steamer Yellowstone. He thus describes the fort:

The American Fur Company have erected here, for their protection against the savages, a very substantial fort, about three hundred feet square, with bastions armed with ordnance (Plate 3, No. 388); and our approach to it under the continued roar

of cannon for half an hour, and the shrill yells of the half-affrighted savages who lined the shores, presented a scene of the most thrilling and picturesque appearance.

(See also outline by Mr. Catlin of Fort Union from the river opposite.)

389. View on Upper Missouri; the Iron bluff, twelve hundred miles above Saint Louis; a beautiful subject for a landscape. Painted in 1832.

390. View on Upper Missouri; view in the Big Bend, nineteen hundred miles above Saint Louis; showing the manner in which the conical bluffs on that river are formed; table-lands in distance, rising several hundred feet above the summit level of the prairie. Painted in 1832.

391. View on Upper Missouri; view in the Big Bend; magnificent clay bluffs, with high table-land in the distance. Painted in 1832.

392. View on Upper Missouri; back view of the Mandan village, showing their mode of depositing their dead, on scaffolds, enveloped in skins, and of preserving and feeding the skulls; eighteen hundred miles above Saint Louis; women feeding the skulls of their relatives with dishes of meat. Painted in 1832.

(Plate No. 48, page 89, vol. 1, Catlin's Eight Years; see also No. 502.)

These people never bury the dead, but place the bodies on slight scaffolds, just above the reach of human hands and out of the way of wolves and dogs, and they are there left to molder and decay. This cemetery, or place of deposit for the dead, is just back of the village, on a level prairie (Plate 48), and with all its appearances, history, forms, ceremonies, &c., is one of the strangest and most interesting objects to be described in the vicinity of this peculiar race.

Whenever a person dies in the Mandan village, and the customary honors and condolence are paid to his remains, and the body dressed in its best attire, painted, oiled, feasted, and supplied with bow and quiver, shield, pipe and tobacco, knife, flint, and steel, and provisions enough to last him a few days on the journey which he is to perform, a fresh buffalo's skin, just taken from the animal's back, is wrapped around the body, and tightly bound and wound with thongs of raw-hide from head to foot. Then other robes are soaked in water till they are quite soft and elastic, which are also bandaged around the body in the same manner and tied fast with thongs, which are wound with great care and exactness, so as to exclude the action of the air from all parts of the body.

There is then a separate scaffold erected for it, constructed of four upright posts, a little higher than human hands can reach, and on the tops of these are small poles passing around from one post to the others, across which a number of willow rods just strong enough to support the body, which is laid upon them on its back, with its feet carefully presented toward the rising sun.

There are a great number of these bodies resting exactly in a similar way, excepting in some instances where a chief or medicine man may be seen with a few yards of scarlet or blue cloth spread over his remains as a mark of public respect and esteem. Some hundreds of these bodies may be seen reposing in this manner in this curious place, which the Indians call "the village of the dead," and the traveler who visits this country to study and learn will not only be struck with the novel appearance of the scene, but if he will give attention to the respect and devotions that are paid to this sacred place he will draw many a moral deduction that will last him through life. He will learn, at least, that filial, conjugal, and paternal affection are not necessarily the results of civilization, but that the Great Spirit has given them to man in his

native state, and that the spices and improvements of the enlightened world have never refined upon them.

There is not a day in the year in which one may not see in this place evidences of this fact that will wring tears from his eyes and kindle in his bosom a spark of respect and sympathy for the poor Indian, if he never felt it before. Fathers, mothers, wives, and children may be seen lying under these scaffolds, prostrated upon the ground, with their faces in the dirt, howling forth incessantly the most piteous and heart-broken cries and lamentations for the misfortunes of their kindred, tearing their hair, cutting their flesh with their knives, and doing other penance to appease the spirits of the dead, whose misfortunes they attribute to some sin or omission of their own, for which they sometimes inflict the most excruciating self-torture.

When the scaffolds on which the bodies rest decay and fall to the ground, the nearest relations, having buried the rest of the bones, take the skulls, which are perfectly bleached and purified, and place them in circles of a hundred or more on the prairie—placed at equal distances apart (some eight or nine inches from each other), with the faces all looking to the center—where they are religiously protected and preserved in their precise positions from year to year as objects of religious and affectionate veneration. (Plate 48, No. 392.)

There are several of these “Golgothas” or circles of twenty or thirty feet in diameter, and in the center of each ring or circle is a little mound of three feet high, on which uniformly rest two buffalo skulls (a male and female), and in the center of the little mound is erected a “medicine pole,” about twenty feet high, supporting many curious articles of mystery and superstition, which they suppose have the power of guarding and protecting this sacred arrangement. Here, then, to this strange place do these people again resort to evince their further affections for the dead; not in groans and lamentations, however, for several years have cured the anguish, but fond affections and endearments are here renewed, and conversations are here held and cherished with the dead.

Each one of these skulls is placed upon a bunch of wild sage, which has been pulled and placed under it. The wife knows (by some mark or resemblance) the skull of her husband or her child, which lies in this group, and there seldom passes a day that she does not visit it with a dish of the best cooked food that her wigwam affords, which she sets before the skull at night and returns for the dish in the morning. As soon as it is discovered that the sage on which the skull rests is beginning to decay the woman cuts a fresh bunch, and places the skull carefully upon it, removing that which was under it.

Independent of the above-named duties which draw the women to this spot they visit it from inclination, and linger upon it to hold converse and company with the dead. There is scarcely an hour in a pleasant day but more or less of these women may be seen sitting or lying by the skull of their child or husband, talking to it in the most pleasant and endearing language that they can use (as they were wont to do in former days), and seemingly getting an answer back. It is not unfrequently the case that the woman brings her needle-work with her, spending the greater part of the day sitting by the side of the skull of her child, chatting incessantly with it while she is embroidering or garnishing a pair of moccasins, and perhaps, overcome with fatigue, falls asleep, with her arms encircled around it, forgetting herself for hours, after which she gathers up her things and returns to the village.

There is something exceedingly interesting and impressive in these scenes, which are so strikingly dissimilar, and yet within a few rods of each other. The one is the place where they pour forth the frantic anguish of their souls, and afterwards pay their visits to the other to jest and gossip with the dead.

The great variety of shapes and characters exhibited in these groups of crania render them a very interesting study for the craniologist and phrenologist, but I apprehend that it would be a matter of great difficulty (if not of impossibility) to procure them at this time for the use and benefit of the scientific world.—G. C.

393. View on Upper Missouri; Prairie bluffs, eleven hundred miles above Saint Louis. Painted in 1832.

394. View on Upper Missouri; The Three Domes, fifteen mile above Mandans. A singular group of clay bluffs, like immense domes, with sky-lights. Painted in 1832.

(Plate No. 44, page 78, vol. 1, Catlin's Eight Years.)

395. View on Upper Missouri; the Square Hills, twelve hundred miles above Saint Louis. Painted in 1832.

(Plate No. 123, page 11, vol. 2, Catlin's Eight Years.)

A hundred miles above this I passed a curious feature, called the "Square Hills." I landed my canoe, and went ashore, and to their tops, to examine them. Though they appeared to be near the river, I found it half a day's journey to travel to and from them, they being several miles from the river. On ascending them I found them to be two or three hundred feet high, and rising on their sides at an angle of forty-five degrees, and on their tops, in some places, for half a mile in length, perfectly level, with a green turf, and corresponding exactly with the tabular hills before spoken of above the Mandans. I therein said that I should visit these hills on my way down the river, and I am fully convinced, from close examination, that they are a part of the same original superstratum which I therein described, though seven or eight hundred miles separated from them. They agree exactly in character and also in the materials of which they are composed, and I believe that some unaccountable gorge of waters has swept away the intervening earth, leaving these solitary and isolated, though incontrovertible, evidences that the summit level of all this great valley has at one time been where the level surface of these hills now is, two or three hundred feet above what is now generally denominated the summit level.—G. C.

396. View on Upper Missouri; river bluffs and white wolves in the foreground. Painted in 1832. (No plate.)

397. View on Upper Missouri; beautiful prairie bluffs, above the Puncabs, ten hundred and fifty miles above Saint Louis. Painted in 1832.

398. View on Upper Missouri; look from Floyd's grave, thirteen hundred miles above Saint Louis.

399. View on Upper Missouri; river bluffs, thirteen hundred and twenty miles above Saint Louis. Painted in 1832.

400. View on Upper Missouri; buffalo herds crossing the river. Batiste, Bogard, and I passing them in our bark canoe, with some danger to our lives. A buffalo scene in their running season. Painted in 1832.

(Plate No. 126, page 13, vol. 2, Catlin's Eight Years.)

In one instance, near the mouth of White River, we met the most immense herd crossing the Missouri River, and from an imprudence got our boat into imminent danger amongst them, from which we were highly delighted to make our escape. It was in the midst of the "running season," and we had heard the "roaring" (as it is called) of the herd when we were several miles from them. When we came in sight, we were actually terrified at the immense numbers that were streaming down the green hills on one side of the river and galloping up and over the bluffs on the other. The river was filled, and in parts blackened, with their heads and horns, as they were swimming about, following up their objects, and making desperate battle whilst they were swimming.

I deemed it imprudent for our canoe to be dodging amongst them, and ran it ashore for a few hours, where we laid waiting for the opportunity of seeing the river clear;

(Plate 126, Vol. II, Catlin's Eight Years.)

but we waited in vain. Their numbers, however, got somewhat diminished at last, and we pushed off, and successfully made our way amongst them. From the immense numbers that had passed the river at that place, they had torn down the prairie bank of fifteen feet in height so as to form a sort of road or landing place, where they all in succession clambered up. Many in their turmoil had been wafted below this landing, and, unable to regain it against the swiftness of the current, had fastened themselves along in crowds, hugging close to the high bank under which they were standing. As we were drifting by these, and supposing ourselves out of danger, I drew up my rifle and shot one of them in the head, which tumbled into the water and brought with him a hundred others, which plunged in, and in a moment were swimming about our canoe, and placing it in great danger (Plate 126). No attack was made upon us, and in the confusion the poor beasts knew not, perhaps, the enemy that was amongst them; but we were liable to be sunk by them, as they were furiously hooking and climbing on to each other. I rose in my canoe, and by my gestures and hallooing kept them from coming in contact with us until we were out of their reach.

This was one of the instances that I formerly spoke of, where thousands and tens of thousands of these animals congregate in the running season, and move about from east to west, or wherever accident or circumstances may lead them. In this grand crusade no one can know the numbers that may have made the ford within a few days, nor in their blind fury in such scenes may feeble man be much respected.

During the remainder of that day we paddled onward and passed many of their carcasses floating on the current or lodged on the heads of islands and sand-bars. And in the vicinity of, and not far below, the grand turmoil we passed several that were mired in the quicksand near the shores; some were standing fast and half immersed, whilst others were nearly out of sight and gasping for the last breath; others were standing with all legs fast and one-half of their bodies above the water and their heads sunk under it, where they had evidently remained several days; and flocks of ravens and crows were covering their backs and picking the flesh from their dead bodies.—G. C., pages 13 and 14, vol. 2, Catlin's Eight Years.

MR. CATLIN'S NOTES ON THE BUFFALO AND BUFFALO HUNTING.

The buffalo herds, which graze in almost countless numbers on these beautiful prairies, afford them an abundance of meat; and so much is it preferred to all other that the deer, the elk, and the antelope sport upon the prairies in herds in the greatest security, as the Indians seldom kill them unless they want their skins for a dress. The buffalo (or, more correctly speaking, bison) is a noble animal, that roams over the vast prairies, from the borders of Mexico on the south to Hudson Bay on the north. Their size is somewhat above that of our common bullock, and their flesh of a delicious flavor, resembling and equaling that of fat beef. Their flesh, which is easily procured, furnishes the savages of these vast regions the means of a wholesome and good subsistence, and they live almost exclusively upon it, converting the skins,

horns, hoofs, and bones to the construction of dresses, shields, bows, &c.—Page 24, vol. 1, Catlin's Eight Years.

The mode in which these Indians kill this noble animal is spirited and thrilling in the extreme, and I must in a future epistle give you a minute account of it. I have almost daily accompanied parties of Indians to see the fun, and have often shared in it myself; but much oftener ran my horse by their sides to see how the thing was done; to study the modes and expressions of these splendid scenes, which I am industriously putting upon the canvas.

They are all (or nearly so) killed with arrows and the lance, while at full speed, and the reader may easily imagine that these scenes afford the most spirited and picturesque views of the sporting kind that can possibly be seen.—G. C.

Mr. Catlin's letter number thirty-one is written from the mouth of Teton River, Upper Missouri, dated July, 1832, and gives interesting remarks on buffaloes and buffalo hunting:

In former letters I have given some account of the bisons (or, as they are more familiarly denominated in this country buffaloes) which inhabit these regions in numerous herds, and of which I must say yet a little more.

These noble animals of the ox species, and which have been so well described in our books on natural history, are a subject of curious interest and great importance in this vast wilderness; rendered peculiarly so at this time, like the history of the poor savage, and from the same consideration, that they are rapidly wasting away at the approach of civilized man, and like him and his character, in a very few years, to live only in books or on canvas.

The word buffalo is undoubtedly most incorrectly applied to these animals, and I can scarcely tell why they have been so called, for they bear just about as much resemblance to the Eastern buffalo as they do to a zebra or to a common ox. How nearly they may approach to the bison of Europe, which I never have had an opportunity to see, and which, I am inclined to think, is now nearly extinct, I am unable to say; yet, if I were to judge from the numerous engravings I have seen of those animals, and descriptions I have read of them, I should be inclined to think there was yet a wide difference between the bison of the American prairies and those in the north of Europe and Asia. The American bison (or as I shall hereafter call it buffalo) is the largest of the ruminating animals that is now living in America, and seems to have been spread over the plains of this vast country by the Great Spirit for the use and subsistence of the red men, who live almost exclusively on their flesh and clothe themselves with their skins. The reader, by referring back to Plates 7, No. 404, and 8, No. 405, in the beginning of this work, will see faithful traces of the male and female of this huge animal, in their proud and free state of nature, grazing on the plains of the country to which they appropriately belong. Their color is a dark brown, but changing very much as the season varies from warm to cold, their hair or fur, from its great length in the winter and spring, and exposure to the weather, turning quite light, and almost to a jet black when the winter coat is shed off and a new growth is shooting out.

The buffalo bull often grows to the enormous weight of 2,000 pounds, and shakes a long and shaggy black mane that falls in great profusion and confusion over his head and shoulders, and oftentimes falling down quite to the ground. The horns are short, but very large, and have but one turn, *i. e.*, they are a simple arch, without the least approach to a spiral form, like those of the common ox, or of the goat species.

The female is much smaller than the male, and always distinguishable by the peculiar shape of the horns, which are much smaller and more crooked, turning their points more in towards the center of the forehead.

One of the most remarkable characteristics of the buffalo is the peculiar formation and expression of the eye, the ball of which is very large and white and the iris jet black. The lids of the eyes seem always to be strained quite open, and the ball roll-

ing forward and down, so that a considerable part of the iris is hidden behind the lower lid, while the pure white of the eye-ball glares out over it in an arch in the shape of a moon at the end of its first quarter.

These animals are, truly speaking, gregarious, but not migratory. They graze in immense and almost incredible numbers at times, and roam about and over vast tracts of country, from east to west and from west to east, as often as from north to south, which has often been supposed they naturally and habitually did to accommodate themselves to the temperature of the climate in the different latitudes. The limits within which they are found in America are from the thirtieth to the fifty-fifth degrees of north latitude, and their extent from east to west, which is from the border of our extreme western frontier limits to the western verge of the Rocky Mountains, is defined by quite different causes than those which the degrees of temperature have prescribed to them on the north and the south. Within these twenty-five degrees of latitude the buffaloes seem to flourish and get their living, without the necessity of evading the rigor of the climate, for which nature seems most wisely to have prepared them by the greater or less profusion of fur with which she has clothed them.

It is very evident that as high north as Lake Winnepeg, seven or eight hundred miles north of this, the buffalo subsists itself through the severest winters, getting its food chiefly by browsing amongst the timber, and by pawing through the snow for a bite at the grass, which in those regions is frozen up very suddenly in the beginning of winter, with all its juices in it, and consequently furnishes very nutritious and efficient food, and often, if not generally, supporting the animal in better flesh during these difficult seasons of their lives than they are found to be in in the thirtieth degree of latitude, upon the borders of Mexico, where the severity of winter is not known, but during a long and tedious autumn the herbage, under the influence of a burning sun, is gradually dried away to a mere husk, and its nutriment gone, leaving these poor creatures, even in the dead of winter, to bask in the warmth of a genial sun without the benefit of a green or juicy thing to bite at.

The place from which I am now writing may be said to be the very heart or nucleus of the buffalo country, about equidistant between the two extremes, and, of course, the most congenial temperature for them to flourish in. The finest animals that graze on the prairies are to be found in this latitude, and I am sure I never could send from a better source some further account of the death and destruction that is dealt among these noble animals and hurrying on their final extinction.

The Sioux are a bold and desperate set of horsemen, and great hunters, and in the heart of their country is one of the most extensive assortments of goods, of whisky, and other salable commodities, as well as a party of the most indefatigable men, who are constantly calling for every robe that can be stripped from these animals' backs.

These are the causes which lead so directly to their rapid destruction, and which open to the view of the traveler so freshly, so vividly, and so familiarly, the scenes of archery, of lancing, and of death-dealing that belong peculiarly to this wild and shorn country.*—Pages 247–249, vol. 1, Catlin's Eight Years.

A BUFFALO HUNT NEAR FORT GIBSON, ARKANSAS, IN 1834.

Mr. Catlin (pages 49 to 51, vol. 2, Eight Years) describes a buffalo hunt, with officers of the First Dragoons, in 1839 :

In my last letter I gave a brief account of a buffalo chase where General Leavenworth and Colonel Dodge took parts, and met with pleasing success. The next day, while on the march, and a mile or so in advance of the regiment, and two days before

* The buffaloes are very blind animals, and owing, probably in a great measure, to the profuse locks that hang over their eyes, they run chiefly by the nose, and follow in the tracks of each other, seemingly heedless of what is about them, and, of course, easily disposed to rush in a mass, and the whole tribe or gang pass in the tracks of those that have first led the way.—G. C.

we reached this place, General Leavenworth, Colonel Dodge, Lieutenant Wheelock, and myself were jogging along, and all in turn complaining of the lameness of our bones from the chase on the former day, when the general, who had long ago had his surfeit of pleasure of this kind on the Upper Missouri, remonstrated against further indulgence in the following manner: "Well, colonel, this running for buffaloes is bad business for us; we are getting too old, and should leave such amusements to the young men; I have had enough of this fun in my life, and I am determined not to hazard my limbs or weary my horse any more with it; it is the height of folly for us, but will do well enough for boys." Colonel Dodge assented at once to his resolves, and approved them; whilst I, who had tried it in every form (and, I had thought, to my heart's content), on the Upper Missouri, joined my assent to the folly of our destroying our horses, which had a long journey to perform, and agreed that I would join no more in the buffalo chase, however near and inviting they might come to me.

In the midst of this conversation and these mutual declarations (or rather just at the end of them), as we were jogging along in Indian file, and General Leavenworth taking the lead, and just rising to the top of a little hill over which it seems he had had an instant peep, he dropped himself suddenly upon the side of his horse and wheeled back, and rapidly informed us, with an agitated whisper, and an exceeding game contraction of the eye, that a snug little band of buffaloes were quietly grazing just over the knoll in a beautiful meadow for running, and that if I would take to the left and Lieutenant Wheelock to the right, and let him and the colonel dash right into the midst of them, we could play the devil with them. One-half at least of this was said after he had got upon his feet and taken off his portmanteau and valise, in which we had all followed suit, and were mounting for the start, and I am almost sure nothing else was said, and if it had been I should not have heard it, for I was too far off, and too rapidly dashing over the waving grass, and too eagerly gazing and plying the whip to hear or to see anything but the trampling hoofs and the blackened throng, and the darting steeds, and the flashing of guns, until I had crossed the beautiful lawn; and the limb of a tree, as my horse was darting into the timber, had crossed my horse's back and had scraped me into the grass, from which I soon raised my head and all was silent, and all out of sight save the dragoon regiment, which I could see in the distance creeping along on the top of a high hill. I found my legs under me in a few moments and put them in their accustomed positions, none of which would, for some time, answer the usual purpose; but I at last got them to work and brought "Charley" out of the bushes, where he had "brought up," in the top of a fallen tree, without damage.

No buffalo was harmed in this furious assault, nor horse nor rider. Colonel Dodge and Lieutenant Wheelock had joined the regiment, and General Leavenworth joined me, with too much game expression yet in his eye to allow him more time than to say, "I'll have that calf before I quit," and away he sailed, "up hill and down dale," in pursuit of a fine calf that had been hidden on the ground during the chase and was now making its way over the prairies in pursuit of the herd. I rode to the top of a little hill to witness the success of the general's second effort, and after he had come close upon the little affrighted animal it dodged about in such a manner as evidently to baffle his skill and perplex his horse, which at last fell in a hole and both were instantly out of my sight. I ran my horse with all possible speed to the spot, and found him on his hands and knees endeavoring to get up. I dismounted and raised him on to his feet, when I asked him if he was hurt, to which he replied, "No; but I might have been," when he instantly fainted and I laid him on the grass. I had left my canteen with my portmanteau, and had nothing to administer to him, nor was there water near us. I took my lancet from my pocket and was tying his arm to open a vein, when he recovered and objected to the operation, assuring me that he was not in the least injured. I caught his horse and soon got him mounted again, when we rode on together, and after two or three hours were enabled to join the regiment.

From that hour to the present I think I have seen a decided change in the general's face; he has looked pale and feeble, and been continually troubled with a violent cough. I have rode by the side of him from day to day, and he several times told me that he was fearful he was badly hurt. He looks very feeble now, and I very much fear the result of the fever that has set in upon him.

404. Buffalo bull; grazing on the prairie in his native state.

(Plate No. 7, page 24, vol. 1, Catlin's Eight Years.)

The buffalo bull is one of the most formidable and frightful looking animals in the world when excited to resistance; his long shaggy mane hangs in great profusion over his neck and shoulders, and often extends quite down to the ground.—G. C.

405. Buffalo cow; grazing on the prairie in her native state.

(Plate No. 8, page 24, vol. 1, Catlin's Eight Years.)

The cow is less in stature, and less ferocious, though not much less wild and frightful in her appearance.—G. C.

405a. Monsieur Chardon and the bison; Mr. Catlin in chase.

(Plate No. 9, page 25, vol. 1, Catlin's Eight Years.)

Mr. Catlin describes a buffalo hunt on the Yellowstone, June, 1832, near Fort Union, Dakota, as follows:

At present I will give a little sketch of a bit of fun I joined in yesterday with Mr. McKenzie and a number of his men without the company or aid of Indians.

I mentioned the other day that McKenzie's table from day to day groans under the weight of buffalo tongues and beavers' tails, and other luxuries of this western land. He has within his fort a spacious ice-house, in which he preserves his meat fresh for any length of time required; and sometimes, when his larder runs low, he starts out, rallying some five or six of his best hunters (not to hunt, but to "go for meat"). He leads the party, mounted on his favorite buffalo horse (*i. e.*, the horse amongst his whole group which is best trained to run the buffalo), trailing a light and short gun in his hand, such a one as he can most easily reload whilst his horse is at full speed.

Such was the condition of the ice-house yesterday morning, which caused these self-catering gentlemen to cast their eyes with a wishful look over the prairies; and such was the plight in which our host took the lead, and I, and then Monsieur Chardon, and Bâstiste Défonde, and Tullock (who is a trader amongst the Crows, and is here at this time with a large party of that tribe), and there were several others whose names I do not know.

As we were mounted and ready to start, McKenzie called up some four or five of his men and told them to follow immediately on our trail, with as many one-horse carts, which they were to harness up, to bring home the meat. "Ferry them across the river in the scow," said he, "and following our trail through the bottom, you will find us on the plain yonder, between the Yellowstone and the Missouri Rivers, with meat enough to load you home. My watch on yonder bluff has just told us by his signals that there are cattle a plenty on that spot, and we are going there as fast as possible." We all crossed the river, and galloped away a couple of miles or so, when we mounted the bluff; and to be sure, as was said, there was in full view of us a fine herd of some four or five hundred buffaloes, perfectly at rest, and in their own estimation (probably) perfectly secure. Some were grazing, and others were lying down and sleeping; we advanced within a mile or so of them in full view, and came to a halt. Monsieur Chardon "tossed the feather" (a custom always observed to try the course of the wind), and we commenced "stripping" as it is termed (*i. e.*, every man strips himself and his horse of every extraneous and unnecessary appendage of dress, &c., that might be an incumbrance in running); hats are laid off, and coats and bullet pouches: sleeves are rolled up, a handkerchief tied tightly around the head and another around

the waist; cartridges are prepared and placed in the waistcoat pocket, or a half dozen bullets "throwed into the mouth," &c., all of which takes up some ten or fifteen minutes, and is not, in appearance or in effect, unlike a council of war. Our leader lays the whole plan of the chase, and preliminaries all fixed, guns charged and ramrods in our hands, we mount and start for the onset. The horses are all trained for this business, and seem to enter into it with as much enthusiasm, and with as restless a spirit as the riders themselves. While "stripping" and mounting they exhibit the most restless impatience; and when "approaching" (which is, all of us abreast, upon a slow walk, and in a straight line towards the herd, until they discover us and run) they all seem to have caught entirely the spirit of the chase, for the laziest nag amongst them prances with an elasticity in his step, champing his bit, his ears erect, his eyes strained out of his head, and fixed upon the game before him, whilst he trembles under the saddle of his rider. In this way we carefully and silently marched, until within some forty or fifty rods, when the herd discovering us, wheeled and laid their course in a mass. At this instant we started (and all *must* start, for no one could check the fury of those steeds at that moment of excitement), and away all sailed, and over the prairie flew, in a cloud of dust which was raised by their trampling hoofs. McKenzie was foremost in the throng, and soon dashed off amidst the dust and was out of sight; he was after the fattest and the fastest. I had discovered a huge bull whose shoulders towered above the whole band, and I picked my way through the crowd to get alongside of him. I went not for "meat," but for a *trophy*; I wanted his head and horns. I dashed along through the thundering mass, as they swept away over the plain, scarcely able to tell whether I was on a buffalo's back or my horse's, hit, and hooked, and jostled about, till at length I found myself alongside of my game, when I gave him a shot as I passed him. I saw guns flash in several directions about me, but I heard them not. Amidst the trampling throng Monsieur Chardon had wounded a stately bull, and at this moment was passing him again with his piece leveled for another shot. They were both at full speed and I also, within the reach of the muzzle of my gun, when the bull instantly turned receiving the horse upon his horns, and the ground received poor Chardon, who made a frog's leap of some twenty feet or more over the bull's back and almost under my horse's heels.

I wheeled my horse as soon as possible and rode back where lay poor Chardon gasping to start his breath again, and within a few paces of him his huge victim, with his heels high in the air, and the horse lying across him. I dismounted instantly, but Chardon was raising himself on his hands, with his eyes and mouth full of dirt, and feeling for his gun, which lay about thirty feet in advance of him. "Heaven spare you! are you hurt, Chardon?" "Hi—hic—hic—hic—hic—hic—no—hic—no—no, I believe not. Oh, this is not much, Monsieur Cataline, this is nothing new; but this is a hard piece of ground here—hic—oh! hic!" At this the poor fellow fainted, but in a few moments arose, picked up his gun, took his horse by the bit, which then opened its eyes, and with a hic and an ugh—ughk, sprang upon its feet, shook off the dirt, and here we were all upon our legs again, save the bull, whose fate had been more sad than that of either.

I turned my eyes in the direction where the herd had gone, and our companions in pursuit, and nothing could be seen of them, nor indication, except the cloud of dust which they left behind them. At a little distance on the right, however, I beheld my huge victim endeavoring to make as much headway as he possibly could, from this dangerous ground, upon three legs. I galloped off to him, and at my approach he wheeled around and bristled up for battle. He seemed to know perfectly well that he could not escape from me, and resolved to meet his enemy and death as bravely as possible.

I found that my shot had entered him a little too far forward, breaking one of his shoulders and lodging in his breast, and from his very great weight it was impossible for him to make much advance upon me. As I rode up within a few paces of him he would bristle up with fury enough in his looks alone almost to annihilate me, and

making one lunge at me would fall upon his neck and nose, so that I found the sagacity of my horse alone enough to keep me out of reach of danger; and I drew from my pocket my sketch book, laid my gun across my lap, and commenced taking his likeness.—G. C.

407. Dying buffalo; sinking down on his haunches.

(Plate 10, page 25, vol. 1, Catlin's Eight Years.)

He stood stiffened up and swelling with awful vengeance, which was sublime for a picture, but which he could not vent upon me. I rode around him and sketched him in numerous attitudes. Sometimes he would lie down, and I would then sketch him; then throw my cap at him, and, rousing him on his legs, rally a new expression, and sketch him again.

In this way I added to my sketch-book some invaluable sketches of this grim-visaged monster, who knew not that he was standing for his likeness.

No man on earth can imagine what is the look and expression of such a subject before him as this was. I defy the world to produce another animal that can look so frightful as a huge buffalo bull, when wounded as he was, turned around for battle, and swelling with rage, his eyes bloodshot, and his long, shaggy main hanging to the ground, his mouth open, and his horrid rage hissing in streams of smoke and blood from his mouth and through his nostrils, as he is bending forward to spring upon his assailant.

After I had had the requisite time and opportunity for using my pencil, McKenzie and his companions came walking their exhausted horses back from the chase, and in our rear came four or five carts to carry home the meat. The party met from all quarters around me and my buffalo bull, whom I then shot in the head and finished. And being seated together for a few minutes, each one took a smoke of the pipe and recited his exploits, and his "coups" or deaths, when all parties had a hearty laugh at me, as a novice, for having aimed at an old bull, whose flesh was not suitable for food, and the carts were escorted on the trail to bring away the meat. I rode back with Mr. McKenzie, who pointed out five cows which he had killed, and all of them selected as the fattest and slickest of the herd. This astonishing feat was all performed within the distance of one mile—all were killed at full speed, and every one shot through the heart. In the short space of time required for a horse under "full whip," to run the distance of one mile he had discharged his gun five, and loaded it four times, selected his animals, and killed at every shot. There were six or eight others killed at the same time, which altogether furnished, as will be seen, abundance of freight for the carts, which returned, as well as several pack-horses, loaded with the choicest parts which were cut from the animals, and the remainder of the carcasses left a prey for the wolves.

Such is the mode by which white men live in this country; such the way in which they get their food, and such is one of their delightful amusements, at the hazard of every bone in one's body, to feel the fine and thrilling exhilaration of the chase for a moment, and then as often to upbraid and blame himself for his folly and imprudence.

From this scene we commenced leisurely wending our way back, and dismounting at the place where we had stripped, each man dressed himself again, or slung his extra articles of dress, &c., across his saddle, astride of which he sat, and we rode back to the fort, reciting as we rode, and for twenty-four hours afterwards, deeds of chivalry and chase, and hair breadth escapes which each and either had fought and run on former occasions. McKenzie, with all the true character and dignity of a leader, was silent on these subjects, but smiled while those in his train were reciting for him the astonishing and almost incredible deeds of his sinewy arms, which they had witnessed in similar scenes, from which I learned (as well as from my own observations) that he was reputed (and actually was) the most distinguished, of all the white men who have flourished in these regions, in the pursuit of the buffalo.

On our return to the fort a bottle or two of wine were set forth upon the table, and around it a half a dozen parched throats were soon moistened, and good cheer ensued. Bâtiste, Défonde, Chardon, &c., retired to their quarters, enlarging smoothly upon the events of our morning's work, which they were reciting to their wives and sweethearts, when about this time the gate of the fort was thrown open, and the procession of carts and pack-horses laden with buffalo meat made its entrée, gladdening the hearts of a hundred women and children, and tickling the noses of as many hungry dogs and puppies who were stealing in and smelling at the tail of the procession. The door of the ice-house was thrown open, the meat was discharged into it, and I, being fatigued, went asleep.—Pages 25-28, vol. 1, Catlin's Eight Years.

408. Buffalo chase ; single death ; an Indian just drawing his arrow to its head.*
(Plate No. 107, page 252, vol. 1, Catlin's Eight Years.)

INDIAN MOUNT AND MANNER OF HUNTING THE BUFFALO.

As my visit to these parts of the great far West has brought me into the heart of the buffalo country, where I have had abundant opportunities of seeing this noble animal in all its phases, its habits of life, and every mode of its death, I shall take the liberty of being yet a little more particular, and of rendering some further accounts of scenes which I have witnessed in following out my sporting propensities in these singular regions.

The chief hunting amusement of the Indians in these parts consists in the chase of the buffalo, which is almost invariably done on horseback, with bow and lance. In this exercise, which is highly prized by them, as one of their most valued amusements, as well as for the principal mode of procuring meat for their subsistence, they become exceedingly expert, and are able to slay these huge animals with apparent ease.

The Indians in these parts are all mounted on small, but serviceable horses, which are caught by them on the prairies, where they are often running wild in numerous bands. The Indian, then, mounted on his little wild horse, which has been through some years of training, dashes off at full speed amongst the herds of buffaloes, elks, or even antelopes, and deals his deadly arrows to their hearts from his horse's back. The horse is the fleetest animal of the prairie, and easily brings his rider alongside of his game, which falls a certain prey to his deadly shafts at the distance of a few paces.

In the chase of the buffalo, or other animal, the Indian generally "strips" himself and his horse by throwing off his shield and quiver and every part of his dress, which might be an incumbrance to him in running ; grasping his bow in his left hand, with five or six arrows drawn from his quiver, and ready for instant use. In his right hand (or attached to the wrist) is a heavy whip, which he uses without mercy, and forces his horse alongside of his game at the swiftest speed.

* In 1838 Mr. Catlin had his gallery on exhibition in New York, at Stuyvesant Institute. Keokuk, his wife, son, and some twenty warriors (on a visit to Washington) were present, also some Sioux, with Mr. Le Clair, the interpreter. Mr. Catlin says: "In a few minutes afterwards I was exhibiting several of my paintings of buffalo hunts and describing the modes of slaying them with bows and arrows, when I made the assertion, which I had often been in the habit of making, that there were many instances where the arrow was thrown entirely through the buffalo's body, and that I had several times witnessed this astonishing feat. (See No. 408.) I saw evidently, by the motions of my audience, that many doubted the correctness of my assertion, and I appealed to Keokuk, who rose up, when the thing was explained to him, and said that it had repeatedly happened amongst his tribe, and he believed that one of his young men by his side had done it. The young man instantly stepped up on the bench, and took a bow from under his robe, with which, he told the audience, he had driven his arrow quite through a buffalo's body ; and, there being forty of the Sioux from the Upper Missouri also present, the same question was put to them, when the chief arose, and, addressing himself to the audience, said that it was a thing very often done by the hunters in his tribe."—T. D.

BUFFALO CHASE; "A SURROUND" BY MINNATAREES, WITH ARROWS AND LANCES, 1832.

No. 409, page 287.

(Plate 79, Vol. I, Catlin's Eight Years.)

These horses are so trained that the Indian has little use for the rein, which hangs on the neck, whilst the horse approaches the animal on the right side (Plate 107, No. 408), giving his rider the chance to throw his arrow to the left, which he does at the instant when the horse is passing, bringing him opposite to the heart, which receives the deadly weapon "to the feather." When pursuing a large herd the Indian generally rides close in the rear until he selects the animal he wishes to kill, which he separates from the throng as soon as he can by dashing his horse between it and the herd and forcing it off by itself, where he can approach it without the danger of being trampled to death, to which he is often liable by too closely escorting the multitude.

In No. 408 I have fairly represented the mode of *approaching*, at the instant the arrow is to be thrown, and the striking disparity between the size of a large bull of two thousand pounds' weight and the Indian horse, which, it will be borne in mind, is but a pony.

No bridle whatever is used in this country by the Indians, as they have no knowledge of a bit. A short halter, however, which answers in place of a bridle, is in general use, of which they usually form a noose around the under jaw of the horse, by which they get great power over the animal, and which they generally use to stop rather than guide the horse. This halter is called by the French traders in the country *l'arrêt*, the stop, and has great power in arresting the speed of a horse, though it is extremely dangerous to use too freely as a guide, interfering too much with the freedom of his limbs for the certainty of his feet and security of his rider.

When the Indian, then, has directed the course of his steed to the animal which he has selected, the training of the horse is such that it knows the object of its rider's selection and exerts every muscle to give it close company, while the halter lies loose and untouched upon his neck and the rider leans quite forward and off from the side of his horse, with his bow drawn and ready for the deadly shot, which is given at the instant he is opposite to the animal's body. The horse being instinctively afraid of the animal (though he generally brings his rider within the reach of the end of his bow), keeps his eye strained upon the furious enemy he is so closely encountering, and the moment he has approached to the nearest distance required and has passed the animal, whether the shot is given or not, he gradually sheers off to prevent coming on to the horns of the infuriated beast, which often are instantly turned and presented for the fatal reception of its too familiar attendant. These frightful collisions often take place, notwithstanding the sagacity of the horse and the caution of its rider, for in these extraordinary (and inexpressible) exhilarations of chase, which seem to drown the prudence alike of instinct and reason, both horse and rider often seem rushing on to destruction as if it were mere pastime and amusement.

I have always counted myself a prudent man, yet I have often *waked* (as it were) out of the delirium of the chase, into which I had fallen as into an agitated sleep, and through which I had passed as through a delightful dream, where to have died would have been but to have remained riding on without a struggle or a pang. In some of these, too, I have arisen from the prairie, covered with dirt and blood, having severed company with gun and horse, the one lying some twenty or thirty feet from me with a broken stock and the other coolly browsing on the grass at a half mile distance, without man and without other beasts remaining in sight.—Pages 21–23, vol. 1, Catlin's Eight Years.

For the novice in these scenes there is much danger of his limbs and his life, and he finds it a hard and desperate struggle that brings him in at the death of these huge monsters, except where it has been produced by hands that have acquired more sleight and tact than his own. With the Indian, who has made this the every-day sport and amusement of his life, there is less difficulty and less danger; he rides without "losing his breath," and his unagitated hand deals certainty in its deadly blows.

409. Buffalo chase; surround, where I saw three hundred killed in a few minutes by the Minatarees with arrows and lances only. Painted in 1832.

(Plate No. 79, page 200, vol. 1, Catlin's Eight Years.)

BUFFALO CHASE ON UPPER MISSOURI, SUMMER OF 1832.

The Minatarees, as well as the Mandans, had suffered for some months past for want of meat, and had indulged in the most alarming fears that the herds of buffaloes were emigrating so far off from them that there was great danger of their actual starvation, when it was suddenly announced through the village one morning at an early hour that a herd of buffaloes was in sight, when a hundred or more young men mounted their horses, with weapons in hands, and steered their course to the prairies. The chief informed me that one of his horses was in readiness for me at the door of his wigwam, and that I had better go and see the curious affair. I accepted his polite offer, and, mounting the steed, galloped off with the hunters to the prairies, where we soon descried at a distance a fine herd of buffaloes grazing, when a halt and a council were ordered, and the mode of attack was agreed upon. I had armed myself with my pencil and my sketch-book only, and consequently took my position generally in the rear, where I could see and appreciate every maneuver.

The plan of attack, which in this country is familiarly called a *surround*, was explicitly agreed upon, and the hunters who were all mounted on their "buffalo horses" and armed with bows and arrows or long lances, divided into two columns, taking opposite directions, and drew themselves gradually around the herd at a mile or more distance from them, thus forming a cicle of horsemen at equal distances apart, who gradually closed in upon them with a moderate pace at a signal given. The unsuspecting herd at length "got the wind" of the approaching enemy and fled in a mass in the greatest confusion. To the point where they were aiming to cross the line the horsemen were seen at full speed, gathering and forming in a column, brandishing their weapons and yelling in the most frightful manner, by which means they turned the black and rushing mass which moved off in an opposite direction, where they were again met and foiled in a similar manner and wheeled back in utter confusion, by which time the horsemen had closed in from all directions, forming a continuous line around them, whilst the poor affrighted animals were eddying about in a crowded and confused mass, hooking and climbing upon each other, when the work of death commenced. I had rode up in the rear and occupied an elevated position at a few rods' distance, from which I could (like the general of a battlefield) survey from my horse's back the nature and the progress of the grand *mêlée*; but (unlike him) without the power of issuing a command or in any way directing its issue.

In this grand turmoil (No. 469) a cloud of dust was soon raised, which in parts obscured the throng where the hunters were galloping their horses around and driving the whizzing arrows or their long lances to the hearts of these noble animals, which, in many instances, becoming infuriated with deadly wounds in their sides, erected their shaggy manes over their blood-shot eyes and furiously plunged forward at the sides of their assailants' horses, sometimes goring them to death at a lunge and putting their dismounted riders to flight for their lives; sometimes their dense crowd was opened, and the blinded horsemen, too intent on their prey amidst the cloud of dust, were hemmed and wedged in amidst the crowding beasts, over whose backs they were obliged to leap for security, leaving their horses to the fate that might await them in the results of this wild and desperate war. Many were the bulls that turned upon their assailants and met them with desperate resistance; and many were the warriors who were dismounted and saved themselves by the superior muscles of their legs; some who were closely pursued by the bulls, wheeled suddenly around and snatching the part of a buffalo robe from around their waists, threw it over the horns and the eyes of the infuriated beast, and darting by its side drove the arrow or the lance to its heart. Others suddenly dashed off upon the prairies by the side of the affrighted animals which had escaped from the throng, and closely escorting them for a few rods, brought down their hearts' blood in streams and their huge carcasses upon the green and enameled turf.

In this way this grand hunt soon resolved itself into a desperate battle, and in the

space of fifteen minutes resulted in the total destruction of the whole herd, which in all their strength and fury were doomed, like every beast and living thing else, to fall before the destroying hands of mighty man.

I had sat in trembling silence upon my horse, and witnessed this extraordinary scene, which allowed not one of these animals to escape out of my sight. Many plunged off upon the prairie for a distance, but were overtaken and killed; and although I could not distinctly estimate the number that were slain, yet I am sure that some hundreds of these noble animals fell in this grand *mêlée*.

The scene after the battle was over was novel and curious in the extreme; the hunters were moving about amongst the dead and dying animals, leading their horses by their halters, and claiming their victims by their private marks upon their arrows, which they were drawing from the wounds in the animals' sides.

Amongst the poor affrighted creatures that had occasionally dashed through the ranks of their enemy and sought safety in flight upon the prairie (and, in some instances, had undoubtedly gained it), I saw them stand awhile, looking back, when they turned, and, as if bent on their own destruction, retraced their steps, and mingled themselves and their deaths with those of the dying throng. Others had fled to a distance on the prairies, and for want of company, of friends or of foes, had stood and gazed on till the battle scene was over, seemingly taking pains to stay, and hold their lives in readiness for their destroyers, until the general destruction was over, when they fell easy victims to their weapons, making the slaughter complete.

After this scene, and after arrows had been claimed and recovered, a general council was held, when all hands were seated on the ground and a few pipes smoked, after which all mounted their horses and rode back to the village.

A deputation of several of the warriors was sent to the chief, who explained to him what had been their success, and the same intelligence was soon communicated by little squads to every family in the village, and preparations were at once made for securing the meat. For this purpose some hundreds of women and children, to whose lot fall all the drudgeries of Indian life, started out upon the trail which led them to the battlefield, where they spent the day in skinning the animals and cutting up the meat, which was mostly brought into the villages on their backs, as they tugged and sweated under their enormous and cruel loads.

I rode out to see this curious scene, and I regret exceedingly that I kept no memorandum of it in my sketch-book. Amidst the throng of women and children that had been assembled, and all of whom seemed busily at work, were many superannuated and disabled nags, which they had brought out to assist in carrying in the meat, and at least one thousand semi-loup dogs and whelps, whose keen appetites and sagacity had brought them out to claim their shares of this abundant and sumptuous supply.

I staid and inspected this curious group for an hour or more, during which time I was almost continually amused by the clamorous contentions that arose, and generally ended in desperate combats, both amongst the dogs and women, who seemed alike tenacious of their local and recently acquired rights, and disposed to settle their claims by "tooth and nail"—by manual and brute force.

When I had seen enough of this I rode to the top of a beautiful prairie bluff, a mile or two from the scene, where I was exceedingly amused by overlooking the route that laid between this and the village, which was over the undulating green fields for several miles that laid beneath me; over which there seemed a continual string of women, dogs, and horses for the rest of the day, passing and repassing as they were busily bearing home their heavy burdens to the village, and in their miniature appearance, which the distance gave them, not unlike to a busy community of ants as they are sometimes seen sacking and transporting the treasures of a cupboard or the sweets of a sugar-bowl.—G. C.

411. Buffalo chase; numerous group; chasing with bows and lances.

(Plate No. 108, page 253, vol. 1, Catlin's Eight Years.)

In Nos. 410 and 411 I have represented a party of Indians in chase of a herd, some of whom are pursuing with lance and others with bows and arrows. The group in the foreground shows the attitude at the instant after the arrow has been thrown and driven to the heart; the Indian at full speed, and the lasso dragging behind his horse's heels. The lasso is a long thong of rawhide, of ten or fifteen yards in length, made of several braids or twists, and used chiefly to catch the wild horse, which is done by throwing over their necks a noose which is made at the end of the lasso, with which they are "choked down." In running the buffaloes, or in time of war, the lasso drags on the ground at the horse's feet, and sometimes several rods behind, so that if a man is dismounted, which is often the case, by the tripping or stumbling of the horse, he has the power of grasping to the lasso, and, by stubbornly holding on to it, of stopping and securing his horse, on whose back he is instantly replaced, and continuing on in the chase.—Page 253, vol. 1, Catlin's Eight Years.

412. Buffalo chase; cow and calf; the bull protecting by attacking the assailants.

During the season of the year whilst the calves are young, the male seems to stroll about by the side of the dam, as if for the purpose of protecting the young, at which time it is exceedingly hazardous to attack them, as they are sure to turn upon their pursuers, who have often to fly to each other's assistance (No. 412). The buffalo calf during the first six months is red, and has so much the appearance of a red calf in cultivated fields that it could easily be mingled and mistaken amongst them. In the fall, when it changes its hair it takes a brown coat for the winter, which it always retains. In pursuing a large herd of buffaloes at the season when their calves are but a few weeks old, I have often been exceedingly amused with the curious maneuvers of these shy little things. Amidst the thundering confusion of a throng of several hundreds or several thousands of these animals, there will be many of the calves that lose sight of their dams; and being left behind by the throng, and the swift passing hunters, they endeavor to secrete themselves, when they are exceedingly put to it on a level prairie, where naught can be seen but the short grass of six or eight inches in height, save an occasional bunch of wild sage, a few inches higher, to which the poor affrighted things will run, and dropping on their knees, will push their noses under it, and into the grass, where they will stand for hours, with their eyes shut, imagining themselves securely hid, whilst they are standing up quite straight upon their hind feet and can easily be seen at several miles' distance. It is a familiar amusement for us accustomed to these scenes, to retreat back over the ground where we have just escorted the herd, and approach these little trembling things, which stubbornly maintain their positions, with their noses pushed under the grass, and their eyes strained upon us, as we dismount from our horses and are passing around them. From this fixed position they are sure not to move until hands are laid upon them, and then for the shins of a novice we can extend our sympathy; or if he can preserve the skin on his bones from the furious buttings of its head, we know how to congratulate him on his signal success and good luck. In these desperate struggles for a moment, the little thing is conquered, and makes no further resistance. And I have often, in concurrence with a known custom of the country, held my hands over the eyes of the calf and breathed a few strong breaths into its nostrils, after which I have, with my hunting companions, rode several miles into our encampment with the little prisoner busily following the heels of my horse the whole way, as closely and as affectionately as its instinct would attach it to the company of its dam.

This is one of the most extraordinary things that I have met with in the habits of this wild country, and although I had often heard of it, and felt unable exactly to believe it, I am now willing to bear testimony to the fact from the numerous instances which I have witnessed since I came into the country. During the time that I resided at this post, in the spring of the year, on my way up the river, I assisted (in

BUFFALO CHASE. BULLS MAKING BATTLE WITH MEN AND HORSES, 1832.

No. 413, page 291.

(Plate 111, Vol. I, Catlin's Eight Years.)

numerous hunts of the buffalo with the fur company's men) in bringing in, in the above manner, several of these little prisoners, which sometimes followed for five or six miles close to our horses' heels, and even into the fur company's fort, and into the stable where our horses were led. In this way, before I left for the headwaters of the Missouri, I think we had collected about a dozen, which Mr. Laidlaw was successfully raising with the aid of a good milch cow, and which were to be committed to the care of Mr. Choteau, to be transported by the return of the steamer to his extensive plantation in the vicinity of Saint Louis. The fate of these poor little prisoners I was informed on my return to Saint Louis * * * afterwards, was a very disastrous one. The steamer having a distance of sixteen hundred miles to perform, and being a week or two on sand bars, in a country where milk could not be procured, they all perished but one, which is now flourishing in the extensive fields of this gentleman, Mr. Choteau.—G. C., pages 25, 26, *ibid*.

413. Buffalo chase ; bulls making battle with men and horses.

(Plate No. 111, pages 254, 255, vol. 1, Catlin's Eight Years.)

The buffalo is a very timid animal, and shuns the vicinity of man with the keenest sagacity. Yet, when overtaken and harassed or wounded, turns upon his assailants with the utmost fury, who have only to seek safety in flight. In their desperate resistance the finest horses are often destroyed ; but the Indian, with his superior sagacity and dexterity, generally finds some effective mode of escape.—G. C.

414. Buffalo hunt, under the wolf-skin mask.

(Plate No. 110, page 254, vol. 1, Catlin's Eight Years.)

The poor buffaloes have their enemy, *man*, besetting and besieging them at all times of the year, and in all the modes that man in his superior wisdom has been able to devise for their destruction. They struggle in vain to evade his deadly shafts, when he dashes amongst them over the plains on his wild horse ; they plunge into the snow-drifts where they yield themselves an easy prey to their destroyers, and they also stand unwittingly and behold him unsuspected under the skin of a white wolf, insinuating himself and his fatal weapons into close company when they are peaceably grazing on the level prairies, and shot down before they are aware of their danger.

While the herd of buffaloes are together they seem to have little dread of the wolf, and allow them to come in close company with them. The Indian takes advantage of this fact, and often places himself under the skin of the animal and crawls for half a mile or more on his hands and knees until he approaches within a few rods of the unsuspecting group, and easily shoots down the fattest of the throng.—G. C.

415. Buffalo chase ; mouth of Yellowstone ; animals dying on the ground passed over, and my man Bâtiste swamped in crossing a creek. Painted in 1832. (No plate.)

416. Buffalo chase in snow-drift, with snow-shoes.

417. Buffalo chase in snow-drift, with snow-shoes, killing them for their robes in great numbers.

(Plate No. 109, page 254, vol. 1, Catlin's Eight Years.)

In the dead of the winters, which are very long and severely cold in this country, where horses cannot be brought in the chase with any avail, the Indian runs upon the surface of the snow by the aid of his snow-shoes, which buoy him up, while the great weight of the buffaloes sinks them down to the middle of their sides, and completely stopping their progress insures them certain and easy victims to the bow or lance of their pursuers, as in Nos. 416 and 417. The snow in these regions often lies during the winter to the depth of three and four feet, being blown away from the tops and sides of the hills in many places, which are left bare for the buffaloes to graze upon, whilst it is

drifted in the hollows and ravines to a very great depth, and rendered almost entirely impassable to these huge animals, which, when closely pursued by their enemies, endeavor to plunge through it, but are soon wedged in and almost unable to move, where they fall an easy prey to the Indian, who runs up lightly upon his snow-shoes and drives his lance to their hearts. The skins are then stripped off to be sold to the fur traders, and the carcasses left to be devoured by the wolves. This is the season in which the greatest number of these animals are destroyed for their robes; they are most easily killed at this time, and their hair or fur being longer and more abundant gives greater value to the robe.

The Indians generally kill and dry meat enough in the fall, when it is fat and juicy, to last them through the winter; so that they have little other object for this unlimited slaughter amid the drifts of snow than that of procuring their robes for traffic with their traders. The snow-shoes are made in a great many forms of two and three feet in length and one foot or more in width, of a hoop or hoops bent around for the frame, with a netting or web woven across with strings of rawhide on which the feet rest, and to which they are fastened with straps somewhat like a skate. With these the Indian will glide over the snow with astonishing quickness, without sinking down, or scarcely leaving his track where he has gone.—G. C.

418. Attack of the bear (grizzly); Indians attacking with lances on horseback.

419. Antelope shooting; decoyed up.

(Plate No. 40, page 76, vol. 1, Catlin's Eight Years.)

The mode by which Bogard and Bâtiste had been entrapping the timid and sagacious antelopes was one which is frequently and successfully practiced in this country, and on this day had afforded them fine sport.

The antelope of this country I believe to be different from all other known varieties, and foras one of the most pleasing living ornaments to this western world. They are seen in some places in great numbers sporting and playing about the hills and dales, and often, in flocks of fifty or a hundred, will follow the boat of the descending *voyageur*, or the traveling caravan, for hours together; keeping off at a safe distance, on the right or left, galloping up and down the hills, snuffing their noses and stamping their feet, as if they were endeavoring to remind the traveler of the wicked trespass he was making on their own hallowed ground.

This little animal seems to be endowed, like many other gentle and sweet-breathing creatures, with an undue share of curiosity, which often leads them to destruction; and the hunter who wishes to entrap them saves himself the trouble of traveling after them. When he has been discovered, he has only to elevate above the tops of the grass, his red or yellow handkerchief on the end of his gun-rod (No. 419) which he sticks in the ground, and to which they are sure to advance, though with great coyness and caution; whilst he lies close, at a little distance, with his rifle in hand, when it is quite an easy matter to make sure of two or three at a shot, which he gets in range of his eye, to be pierced with one bullet.—G. C.

420. Sioux taking muskrats, near the Saint Peter's; killing them with spears. Women and dogs encamped.

421. Bâtiste and I running buffalo; mouth of Yellowstone; a frog's leap. Painted in 1832. (No plate.)

422. My turn now; Bâtiste and I, and a buffalo bull. Painted in 1832. (No plate.)

423. Dying bull in a snow-drift. (See Nos. 416, 417, for description.)

424. Buffalo bulls fighting, in running season. Painted in 1832.

(Plate No. 105, pages 249, 250, vol. 1, Catlin's Eight Years.)

The almost countless herds of these animals that are sometimes met with on these prairies have been often spoken of by other writers, and may yet be seen by any traveler

who will take the pains to visit these regions. The running season, which is in August and September, is the time when they congregate into such masses in some places as literally to blacken the prairies for miles together. It is no uncommon thing at this season, at these gatherings, to see several thousands in a mass, eddying and wheeling about under a cloud of dust, which is raised by the bulls as they are pawing in the dirt or engaged in desperate combats, as they constantly are, plunging and butting at each other in the most furious manner (Plate 105, No. 424). In these scenes the males are continually following the females, and the whole mass are in constant motion; and all bellowing (or "roaring") in deep and hollow sounds, which, mingled altogether, appear, at the distance of a mile or two, like the sound of distant thunder.—G. C. *Ibid.*

425. Buffalo bulls in their wallow; origin of the "fairie circles" on the prairie.
Painted in 1832.

(Plate No. 106, page 250, vol. 1, Catlin's Eight Years.)

During the season whilst they are congregated together in these dense and confused masses the remainder of the country around for many miles becomes entirely vacated, and the traveler may spend many a toilsome day and many a hungry night without being cheered by the sight of one; where, if he retraces his steps a few weeks after, he will find them dispersed, and grazing quietly in little families and flocks, and equally stocking the whole country. Of these quiet little herds, a fair representation will be seen in Plate 106, where some are grazing, others at play or lying down, and others indulging in their wallows. "A bull in his wallow" is a frequent saying in this country, and has a very significant meaning with those who have ever seen a buffalo bull performing ablution, or rather endeavoring to cool his heated sides by tumbling about in a mud-puddle.

In the heat of summer these huge animals, which, no doubt, suffer very much with the great profusion of their long and shaggy hair or fur, often graze on the low grounds in the prairies, where there is a little stagnant water lying amongst the grass, and the ground underneath being saturated with it, is soft, into which the enormous bull, lowered down upon one knee, will plunge his horns, and at last his head, driving up the earth, and soon making an excavation in the ground, into which the water filters from amongst the grass, forming for him in a few moments a cool and comfortable bath, into which he plunges like a hog in his mire.

In this delectable laver he throws himself flat upon his side, and forcing himself violently around, with his horns and his huge hump on his shoulders presented to the sides, he plows up the ground by his rotary motion, sinking himself deeper and deeper in the ground, continually enlarging his pool, in which he at length becomes nearly immersed, and the water and mud about him mixed into a complete mortar, which changes his color, and drips in streams from ever part of him as he rises upon his feet, a hideous monster of mud and ugliness too frightful and too eccentric to be described.

It is generally the leader of the herd that takes upon him to make this excavation, and if not (but another one opens the ground), the leader (who is conqueror) marches forward, and driving the other from it plunges himself into it; and having cooled his sides, and changed his color to a walking mass of mud and mortar, he stands in the pool until inclination induces him to step out and give place to the next in command, who stands ready; and another, and another, who advance forward in their turns, to enjoy the luxury of the wallow, until the whole band (sometimes a hundred or more) will pass through it in turn, each one throwing his body around in a similar manner, and each one adding a little to the dimensions of the pool, while he carries away in his hair an equal share of the clay, which dries to a gray or whitish color, and gradually falls off. By this operation, which is done perhaps in the space of half an hour, a circular excavation of fifteen or twenty feet in diameter and two feet in depth is

completed and left for the water to run into, which soon fills to the level of the ground.

To these sinks the waters lying on the surface of the prairies are constantly draining, and in them lodging their vegetable deposits, which, after a lapse of years, fill them up to the surface with a rich soil, which throws up an unusual growth of grass and herbage, forming conspicuous circles which arrest the eye of the traveler. * * *

Many travelers who have penetrated not quite far enough into the western country to see the habits of these animals, and the manner in which these mysterious circles are made, but who have seen the prairies strewed with their bleached bones, and have beheld these strange circles, which often occur in groups, and of different sizes have come home with beautiful and ingenious theories (which *must needs be made*) for the origin of these singular and unaccountable appearances, which, for want of a rational theory, have generally been attributed to fairy feet, and gained the appellation of fairy circles.

Many travelers, again, have supposed that these rings were produced by the dances of the Indians, which are oftentimes (and in fact most generally) performed in a circle; yet a moment's consideration disproves such a probability, inasmuch as the Indians always select the ground for their dancing near the sites of their villages, and that always on a dry and hard foundation, when these fairy circles are uniformly found to be on low and wet ground.

426. Grouse shooting, on the Missouri prairies. Painted in 1834.

OTHER SPORTING SCENES IN THE GALLERY.

Nos. 372, 400, 461, 467, 468, 470, 485, and 491, herein, are sporting scenes, describing the hunting of buffalo, elk, and other game. The numbering of the Catlin gallery is left as it was marked by Mr. Catlin, and as given in his catalogue.

BUFFALO DANCE—MANDANS.

For an interesting description of this and of a buffalo hunt by the Mandans, see No. 440, herein.

REVIEW OF THE BUFFALO AND BUFFALO COUNTRY, 1832-1839.

It is truly a melancholy contemplation for the traveler in this country to anticipate the period, which is not far distant, when the last of these noble animals, at the hands of white and red men, will fall victims to their cruel and improvident rapacity, leaving these beautiful green fields a vast and idle waste, unstocked and unpeopled for ages to come, until the bones of the one and the traditions of the other will have vanished, and left scarce an intelligible trace behind.

That the reader should not think me visionary in these contemplations, or romancing in making such assertions I will hand him the following item of the extravagances which are practiced in these regions and rapidly leading to the results which I have just named:

When I first arrived at this place, on my way up the river, which was in the month of May, 1832, and had taken up my lodgings in the fur company's fort, Mr. Laidlaw, of whom I have before spoken, and also his chief clerk, Mr. Halsey, and many of their men, as well as the chiefs of the Sioux, told me that only a few days before I arrived (when an immense herd of buffaloes had showed themselves on the opposite side of the river, almost blackening the plains for a great distance) a party of five or six hundred Sioux Indians on horseback forded the river about midday, and spending a few hours amongst them, recrossed the river at sundown and came into the fort

with fourteen hundred fresh buffalo tongues, which were thrown down in a mass, and for which they required but a few gallons of whisky, which was soon demolished, indulging them in a little and harmless carouse.

This profligate waste of the lives of these noble and useful animals, when, from all that I could learn, not a skin or a pound of the meat (except the tongues) was brought in, fully supports me in the seemingly extravagant predictions that I have made as to their extinction, which I am certain is near at hand. In the above extravagant instance, at a season when their skins were without fur and not worth taking off, and their camp was so well stocked with fresh and dried meat that they had no occasion for using the flesh, there is a fair exhibition of the improvident character of the savage, and also of his recklessness in catering for his appetite so long as the present inducements are held out to him in his country for its gratification.

In this singular country, where the poor Indians have no laws or regulations of society making it a vice or an impropriety to drink to excess, they think it no harm to indulge in the delicious beverage as long as they are able to buy whisky to drink. They look to white men as wiser than themselves, and able to set them examples; they see none of these in their country but sellers of whisky, who are constantly tendering it to them, and most of them setting the example by using it themselves; and they easily acquire a taste, that to be catered for, where whisky is sold at sixteen dollars per gallon, soon impoverishes them, and must soon strip the skin from the last buffalo's back that lives in their country, to "be dressed by their squaws," and vended to the traders for a pint of diluted alcohol.—Pages 256, 257, vol. 1, Catlin's Eight Years.

Thus much I wrote of the buffaloes, and of the accidents that befall them, as well as of the fate that awaits them; and before I closed my book I strolled out one day to the shade of a plum tree, where I laid in the grass on a favorite bluff, and wrote thus:

It is generally supposed, and familiarly said, that a man falls into a reverie, but I seated myself in the shade a few minutes since resolved to force myself into one, and for this purpose I laid open a small pocket map of North America, and excluding my thoughts from every other object in the world I soon succeeded in producing the desired illusion. This little chart over which I bent was seen in all its parts as nothing but the green and vivid reality. I was lifted up upon an imaginary pair of wings, which easily raised and held me floating in the open air, from whence I could behold beneath me the Pacific and the Atlantic Oceans, the great cities of the East, and the mighty rivers. I could see the blue chain of the Great Lakes at the north; the Rocky Mountains, and beneath them and near their base the vast and almost boundless plains of grass, which were speckled with the bands of grazing buffaloes.

The world turned gently around and I examined its surface; continent after continent passed under my eye, and yet, amidst them all, I saw not the vast and vivid green that is spread like a carpet over the western wilds of my own country. I saw not elsewhere in the world the myriad herds of buffaloes—my eyes scanned in vain, for they were not. And when I turned again to the wilds of my native land, I beheld them all in motion. For the distance of several hundred miles from north to south they were wheeling about in vast columns and herds, some were scattered, and ran with furious wildness—some lay dead, and others were pawing the earth for a hiding place—some were sinking down and dying, gushing out their life's blood in deep drawn sighs, and others were contending in furious battle for the life they possessed and the ground that they stood upon. They had long since assembled from the thickets and secret haunts of the deep forest, into the midst of the treeless and bushless plains as the place for their safety. I could see in a hundred places, amid the wheeling bands and on their skirts and flanks, the leaping wild horse darting among them. I saw not the arrows nor heard the twang of the sinewy bows that sent them, but I saw their victims fall. On other steeds that rushed along their sides

I saw the glistening lances which seemed to lay across them, their blades were blazing in the sun till dipped in blood, and then I lost them. In other parts (and there were many) the vivid flash of fire-arms was seen, their victims fell too, and over their dead bodies hung suspended in air little clouds of whitened smoke from under which the flying horsemen had darted forward to mingle again with, and deal death to, the trampling throng.

So strange were men mixed (both red and white) with the countless herds that wheeled and eddied about that all below seemed one vast extended field of battle—whole armies, in some places, seemed to blacken the earth's surface; in other parts, regiments, battalions, wings, platoons, rank and file, and Indian file, all were in motion, and death and destruction seemed to be the watch-word amongst them. In their turmoil they sent up great clouds of dust, and with them came the mingled din of groans and trampling hoofs, that seemed like the rumbling of a dreadful cataract or the roaring of distant thunder. Alternate pity and admiration harrowed up in my bosom and my brain many a hidden thought, and amongst them a few of the beautiful notes that were once sung, and exactly in point, "*Quadrupedante putrem sonitū quatit ungula campum.*" Even such was the din amidst the quadrupeds of these vast plains; and from the craggy cliffs of the Rocky Mountains also were seen descending into the valley the myriad Tartars who had not horses to ride, but before their well-drawn bows the fattest of herds were falling. Hundreds and thousands were strewn upon the plains, they were flayed, and their reddened carcasses left, and about them bands of wolves and dogs and buzzards were seen devouring them. Contiguous, and in sight, was the distant and feeble smoke of wigwams and villages, where the skins were dragged and dressed for white man's luxury; where they were all sold for whisky, and the poor Indians laid drunk and were crying. I cast my eyes into the towns and cities of the East, and there I beheld buffalo robes hanging at almost every door for traffic; and I saw also the curling smoke of a thousand stills, and I said, "Oh, insatiable man, is thy avarice such! wouldst thou tear the skin from the back of the last animal of this noble race, and rob thy fellowman of his meat, and for it give him poison! * * *

Many are the rudenesses and wilds in nature's works which are destined to fall before the deadly ax and desolating hands of cultivating man; and so amongst her ranks of living, of beasts and human, we often find noble stamps, or beautiful colors, to which our admiration clings; and even in the overwhelming march of civilized improvements and refinements do we love to cherish their existence, and lend our efforts to preserve them in their primitive rudeness. Such of nature's works are always worthy of our preservation and protection; and the further we become separated (and the face of the country) from that pristine wildness and beauty, the more pleasure does the mind of enlightened man feel in recurring to those scenes, where he can have them preserved for his eyes and his mind to dwell upon.

Of such "rudenesses and wilds" nature has nowhere presented more beautiful and lovely scenes than those of the vast prairies of the West; and of man and beast, no nobler specimens than those who inhabit them—the Indian and the buffalo—joint and original tenants of the soil, and fugitives together from the approach of civilized man. They have fled to the great plains of the West, and there, under an equal doom, they have taken up their last abode, where their race will expire and their bones will bleach together.

It may be that power is right and veracity a virtue, and that these people and these noble animals are righteously doomed to an issue that will not be averted. It can be easily proved—we have a civilized science that can easily do it, or anything else that may be required, to cover the iniquities of civilized man in catering for his unholy appetites. It can be proved that the weak and ignorant have no rights; that there can be no virtue in darkness; that God's gifts have no meaning or merit until they are appropriated by civilized man—by him brought into the light and converted to his use and luxury. We have a mode of reasoning (I forget what it is called) by which all this can be proved, and even more. The word and the system are entirely

of civilized origin; and latitude is admirably given to them in proportion to the increase of civilized wants, which often require a judge to overrule the laws of nature—I say we can prove such things, but an Indian cannot. It is a mode of reasoning unknown to him in his nature's simplicity, but admirably adapted to subserve the interests of the enlightened world, who are always their own judges when dealing with the savage; and who, in the present refined age, have many appetites that can only be lawfully indulged by proving God's laws defective.

It is not enough in this polished and extravagant age that we get from the Indian his lands and the very clothes from his back, but the food from their mouths must be stopped to add a new and useless article to the fashionable world's luxuries. The ranks must be thinned, and the race exterminated of this noble animal, and the Indians of the great plains left without the means of supporting life, that white men may figure a few years longer enveloped in buffalo robes; that they may spread them for their pleasure and elegance, over the backs of their sleighs, and trail them ostentatiously amidst the busy throng as things of beauty and elegance that had been made for them.

Reader, listen to the following calculations, and forget them not: The buffaloes (the quadrupeds from whose backs your beautiful robes were taken, and whose myriads were once spread over the whole country, from the Rocky Mountains to the Atlantic Ocean) have recently fled before the appalling appearance of civilized man, and taken up their abode and pasturage amid the almost boundless prairies of the West. An instinctive dread of their deadly foes, who made an easy prey of them whilst grazing in the forest, has led them to seek the midst of the vast and treeless plains of grass, as the spot where they would be least exposed to the assaults of their enemies; and it is exclusively in those desolate fields of silence (yet of beauty) that they are to be found, and over these vast steppes, or prairies, have they fled, like the Indian, towards the setting sun, until their bands have been crowded together and their limits confined to a narrow strip of country on this side of the Rocky Mountains.

This strip of country, which extends from the province of Mexico to Lake Winnipeg on the north, is almost one entire plain of grass, which is, and ever must be, useless to cultivating man. It is here, and here chiefly, that the buffaloes dwell; and with and hovering about them, live and flourish the tribes of Indians whom God made for the enjoyment of that fair land and its luxuries.

It is a melancholy contemplation for one who has traveled, as I have, through these realms, and seen this noble animal in all its pride and glory, to contemplate it so rapidly wasting from the world, drawing the irresistible conclusion, too, which one must do, that its species is soon to be extinguished, and with it the peace and happiness (if not the actual existence) of the tribes of Indians who are joint tenants with them in the occupancy of these vast and idle plains.

And what a splendid contemplation too, when one (who has traveled these realms, and can duly appreciate them) imagines them as they might in future be seen (by some great protecting policy of Government) preserved in their pristine beauty and wildness, in a magnificent park, where the world could see for ages to come the native Indian in his classic attire, galloping his wild horse, with sinewy bow and shield and lance, amid the fleeting herds of elks and buffaloes. What a beautiful and thrilling specimen for America to preserve and hold up to the view of her refined citizens and the world, in future ages, *a nation's park*, containing man and beast in all the wildness and freshness of their nature's beauty!

I would ask no other monument to my memory, nor any other enrollment of my name amongst the famous dead, than the reputation of having been the founder of such an institution.

Such scenes might easily have been preserved, and still could be cherished on the great plains of the West, without detriment to the country or its borders; for the tracts of country on which the buffaloes have assembled are uniformly sterile, and of no available use to cultivating man.

It is on these plains, which are stocked with buffaloes, that the finest specimens of the Indian race are to be seen. It is here that the savage is decorated in the richest costume. It is here, and here only, that his wants are all satisfied, and even the luxuries of life are afforded him in abundance. And here also is he the proud and honorable man (before he has had teachers or laws about the important wants which beget meanness and vice), stimulated by ideas of honor and virtue, in which the God of Nature has certainly not curtailed him.

There are, by a fair calculation, more than three hundred thousand Indians who are now subsisted on the flesh of the buffaloes, and by those animals supplied with all the luxuries of life which they desire, as they know of none others. The great variety of uses to which they convert the body and other parts of that animal are almost incredible to the person who has not actually dwelt amongst these people and closely studied their modes and customs. Every part of their flesh is converted into food, in one shape or another, and on it they entirely subsist. The robes of the animals are worn by the Indians instead of blankets; their skins, when tanned, are used as coverings for their lodges and for their beds; undressed, they are used for constructing canoes, for saddles, for bridles, for arrets, lassos, and thongs. The horns are shaped into ladles and spoons; the brains are used for dressing the skins; their bones are used for saddle-trees, for war-clubs, and scrapers for graining the robes, and others are broken up for the marrow-fat which is contained in them. Their sinews are used for strings and backs to their bows, for thread to string their beads and sew their dresses. The feet of the animals are boiled, with their hoofs, for the glue they contain, for fastening their arrow-points, and many other uses. The hair from the head and shoulders, which is long, is twisted and braided into halters, and the tail is used for a fly-brush. In this wise do these people convert and use the various parts of this useful animal, and with all these luxuries of life about them, and their numerous games, they are happy (God bless them) in the ignorance of the disastrous fate that awaits them.

Yet this interesting community, with its sports, its wildnesses, its languages, and all its manners and customs, could be perpetuated, and also the buffaloes, whose numbers would increase and supply them with food for ages and centuries to come, if a system of non-intercourse could be established and preserved. But such is not to be the case, the buffaloes' doom is sealed, and with their extinction must assuredly sink into real despair and starvation the inhabitants of these vast plains, which afford for the Indians no other possible means of subsistence; and they must at last fall a prey to wolves and buzzards, who will have no other bones to pick.

It seems hard and cruel (does it not?) that we civilized people, with all the luxuries and comforts of the world about us, should be drawing from the backs of these useful animals the skins for our luxury, leaving their carcasses to be devoured by the wolves; that we should draw from that country, some one hundred and fifty or two hundred thousand of their robes annually, the greater part of which are taken from animals that are killed expressly for the robe, at a season when the meat is not cured and preserved, and for each of which skins the Indian has received but a pint of whisky.

Such is the fact, and that number, or near it, are annually destroyed in addition to the number that is necessarily killed for the subsistence of three hundred thousand Indians, who live entirely upon them. It may be said, perhaps, that the fur trade of these great western realms, which is now limited chiefly to the purchase of buffalo robes, is of great and national importance, and should and must be encouraged. To such a suggestion I would reply, by merely inquiring (independently of the poor Indians' disasters), how much more advantageously would such a capital be employed, both for the weal of the country and for the owners, if it were invested in machines for the manufacture of woollen robes of equal and superior value and beauty; thereby encouraging the growers of wool, and the industrious manufacturer, rather than cultivating a taste for the use of buffalo skins, which is just to be acquired, and then,

from necessity, to be dispensed with, when a few years shall have destroyed the last of the animals producing them.

It may be answered, perhaps, that the necessities of life are given in exchange for these robes; but what, I would ask, are the necessities in Indian life, where they have buffaloes in abundance to live on? The Indian's necessities are entirely artificial—are all created; and when the buffaloes shall have disappeared in his country, which will be within eight or ten years, I would ask, who is to supply him with the necessities of life then? And I would ask, further (and leave the question to be answered ten years hence), when the skins shall have been stripped from the back of the last animal, who is to resist the ravages of three hundred thousand starving savages, and in their trains, one million five hundred thousand wolves, whom direst necessity will have driven from their desolate and gameless plains to seek for the means of subsistence along our exposed frontier? God has everywhere supplied man, in a state of nature, with the necessities of life, and before we destroy the game of his country, or teach him new desires, he has no wants that are not satisfied.

Amongst the tribes who have been impoverished and repeatedly removed the necessities of life are extended with a better grace from the hands of civilized man. Ninety thousand of such have already been removed, and they draw from Government some five or six hundred thousand dollars annually in cash, which money passes immediately into the hands of white men, and for it the necessities of life may be abundantly furnished. But who, I would ask, are to furnish the Indians who have been instructed in this unnatural mode, living upon such necessities, and even luxuries of life, extended to them by the hands of white men, when those annuities are at an end, and the skin is stripped from the last of the animals which God gave them for their subsistence?

Reader, I will stop here, lest you might forget to answer these important queries—these are questions which I know will puzzle the world—and, perhaps, it is not right that I should ask them.—Pages 258, 259, 264, vol. 1, Catlin's Eight Years.

THE EXTINCTION OF THE BUFFALO IN THE UNITED STATES.

The buffalo may now (May, 1887) be said to be practically extinct in the United States. Here and there in two or three isolated spots in Montana, Colorado, and Idaho occasionally a dozen may be seen. The hunter, merciless sportsman, Indian, and civilization have all contributed to this result. Recently it was stated that an enterprising ranchman in the vicinity of Fort Peck, Mont., had a herd of seventy-five carefully guarded, and from which the exhibitions and zoological gardens may expect a supply in the future. Several bands are said to be at present roaming in the northwestern part of the Dominion of Canada. The occasional small bands seen in Idaho and Montana are probably wanderers from these. In May, 1886, the Smithsonian Institution dispatched Mr. W. T. Hornaday, with a small expedition, to Idaho and Montana, to secure, if possible, a few specimens of the buffalo for the National Museum. His expedition is thus noticed in *Science* for June, 1886:

The National Museum has sent its chief taxidermist, Mr. William T. Hornaday, on a hunting tour through the far West, for the purpose of obtaining specimens of the buffalo before this animal becomes extinct in this country. Mr. Hornaday took with him as an assistant Mr. A. H. Forney, an attaché of the museum. The party reached Miles City, Mont., May 12. Some Crow Indians are said to have killed four buffalo on the Musselshell River above six weeks ago. It is firmly believed by

many good authorities that there are not now more than from fifty to one hundred buffaloes in the whole of Montana, outside of the National Park, where there are probably from two to three hundred head. Hunters lie in wait outside the limits of the National Park, waiting for these animals to cross the line, when they lose no time in dispatching them as soon as possible. A stampede may occur at any time, which may result in all the buffaloes now in the park leaving; and if such were the case, very few, if any, would escape.

Mr. Hornaday and his party were received by the commanding officer at Fort Keogh, and furnished with a six-mule team, a driver, and escort. The plan of route is to cross the Yellowstone at Miles City, proceeding up Sunday Creek and Hunter's Creek to its source; thence across to Big Dry River, following it down to the Big Bend; thence across and westward up Big Timber Creek, and eventually across to the Musselshell River, which it is proposed to explore almost its whole length. There is said to be a small herd of from eight to twelve buffaloes in Southwestern Dakota. Skins of buffalo heads are now valued by taxidermists in Dakota at \$50 each. Mr. Hornaday's expedition resulted in three skeletons of bull buffaloes and some skulls. He found traces of about twenty buffalos in all of Montana, and these Indians were following closely. The Zoological Garden at Philadelphia contains a number of live buffalo, good specimens, which furnish study for artists and naturalists. Within twenty years the buffalo was considered almost inexhaustible. The trade in buffalo robes within five years was more than 100,000 per year, which represented an annual slaughter of that number of animals. Last year it did not exceed 5,000, and this year, 1886, western robe-dealers are getting their supplies from the reserve stock in the eastern market. The Indian and white man combined will have extinguished in a decade the bison.

AMUSEMENTS AND CUSTOMS.

[Nos. 427-501.]

INDIAN BALL PLAY.

I have made it a uniform rule, whilst in the Indian country, to attend every ball-play I could hear of, if I could do it by riding a distance of twenty or thirty miles; and my usual custom has been on such occasions to straddle the back of my horse and look on to the best advantage. In this way I have sat, and oftentimes reclined, and almost dropped from my horse's back, with irresistible laughter at the succession of droll tricks and kicks and scuffles which ensue, in the almost superhuman struggles for the ball. These plays generally commence at 9 o'clock, or near it, in the morning; and I have more than once balanced myself on my pony, from that time till near sundown, without more than one minute of intermission at a time, before the game has been decided.—Page 123, vol. 2, Catlin's Eight Years.

427. Ball-play dance, Choctaw.—Men and women dance around their respective stakes, at intervals, during the night preceding the play; four conjurers sit all night and smoke to the Great Spirit at the point where the ball is to be started and stake-holders guard the goods staked. Painted in 1832.

(Plate No. 223, page 125, vol. 2, Catlin's Eight Years.)

428. Ball-play of the Choctaws; ball up; one party painted white; each has two sticks, with a web at their ends, in which they catch the ball and throw it; they all have tails of horse-hair or quills attached to their girdles or belts. Painted in 1832.

(Plate No. 225, page 126, vol. 2, Catlin's Eight Years.)

Each party has a limit, or *bye*, beyond which it is their object to force the ball, which, if done, counts them one for game.

CHOCTAW BALL-PLAY DANCE AROUND THE STAKES.

No. 427, page 300.

(Plate 223, Vol. II, Catlin's Eight Years.)

CHOCTAW BALL PLAY, "BALL UP."

No. 428, page 300.

(Plate 225, Vol. II, Catlin's Eight Years.)

CHOCTAW BALL PLAY, "BALL DOWN".

(Plate 226, Vol. II, Catlin's Eight Years.)

429. Ball-play; same as 428, excepting that the ball is *down*; which changes the scene. Painted in—.

(Plate No. 226, page 126, vol. 2, Catlin's Eight Years.)

From Choctaw Nation, Indian Territory, 1832.—These people seem, even in their troubles, to be happy, and have, like all the other remnants of tribes, preserved with great tenacity their different games, which, it would seem, they are everlastingly practicing for want of other occupations or amusements in life.

While I was staying at the Choctaw Agency, in the midst of their nation, it seemed to be a sort of season of amusements—a kind of holiday—when the whole tribe almost were assembled around the establishment, and from day to day we were entertained with some games or feats that were exceedingly amusing: horse-racing, dancing, wrestling, foot-racing, and ball-playing were amongst the most exciting, and of all the catalogue the most beautiful was decidedly that of ball-playing. This wonderful game, which is the favorite one amongst all the tribes, and with these southern tribes played exactly the same, can never be appreciated by those who are not happy enough to see it.

It is no uncommon occurrence for six or eight hundred or a thousand of these young men to engage in a game of ball, with five or six times that number of spectators, of men, women, and children, surrounding the ground and looking on. And I pronounce such a scene, with its hundreds of nature's most beautiful models, denuded, and painted of various colors, running and leaping into the air, in all the most extravagant and varied forms, in the desperate struggles for the ball, a school for the painter or sculptor equal to any of those that ever inspired the hand of the artist in the Olympian games or the Roman forum.

It is impossible for pen and ink alone, or brushes, or even with their combined efforts, to give more than a caricature of such a scene, but such as I have been able to do I have put upon the canvas, and in the slight outlines which I have here attached in Plates 224, 225, 226 (pages 427, 428, and 429), taken from those paintings (for the coloring to which the reader must look to my pen), I will convey as correct an account as I can, and leave the reader to imagine the rest, or look to other books or what I may have omitted.

While at the Choctaw Agency it was announced that there was to be a great play a certain day within a few miles, on which occasion I attended and made the three sketches which are hereto annexed; and also the following entry in my note-book, which I literally copy out:

Monday afternoon, at 3 o'clock, I rode out with Lieutenants S. and M., to a very pretty prairie about 6 miles distant, to the ball-play ground of the Choctaws, where we found several thousand Indians encamped. There were two points of timber about half a mile apart, in which the two parties for the play, with their respective families and friends, were encamped; and lying between them the prairie on which the game was to be played. My companions and myself, although we had been apprised that to see the whole of a ball-play we must remain on the ground all the night previous, had brought nothing to sleep upon, resolving to keep our eyes open and see what transpired through the night. During the afternoon we loitered about amongst the different tents and shanties of the two encampments, and afterwards, at sundown, witnessed the ceremony of measuring out the ground and erecting the byes or goals which were to guide the play. Each party had their goal made with two upright posts, about twenty-five feet high and six feet apart, set firm in the ground, with a pole across at the top. These goals were about forty or fifty rods apart; and at a point just half way between was another small stake driven down, where the ball was to be thrown up, at the firing of a gun, to be struggled for by the players. All this preparation was made by some old men who were, it seems, selected to be the judges of the play, who drew a line from one bye to the other; to which directly came from

the woods, on both sides, a great concourse of women and old men, boys and girls, and dogs and horses, where bets were to be made on the play. The betting was all done across this line, and seemed to be chiefly left to the women, who seemed to have martialed out a little of everything that their houses and their fields possessed. Goods and chattels—knives, dresses, blankets, pots and kettles, dogs and horses, and guns—and all were placed in the possession of stake-holders who sat by them and watched them all night, preparatory to the play.

"The sticks with which this tribe play are bent into an oblong hoop at the end, with a sort of slight web of small thongs tied across to prevent the ball from passing through. The players hold one of these in each hand, and by leaping into the air they catch the ball between the two nettings and throw it, without being allowed to strike it or catch it in their hands.

"The mode in which these sticks are constructed and used will be seen in the portrait of *Tullock-chish-ko* (He who Drinks the Juice of the Stone), the most distinguished ball-player of the Choctaw Nation (Plate 223, No. 399), represented in his ball-play dress, with his ball-sticks in his hands. In every ball-play of these people it is a rule of the play that no man shall wear moccasins on his feet, or any other dress than his breech-cloth around his waist, with a beautiful bead belt, and tail made of white horse-hair or quills, and a mane on the neck, of horse-hair, dyed of various colors.

"This game had been arranged and 'made up' three or four months before the parties met to play it, and in the following manner: The two champions who led the two parties, and had the alternate choosing of the players through the whole tribe, sent runners, with the ball-sticks most fantastically ornamented with ribbons and red paint, to be touched by each one of the chosen players, who thereby agreed to be on the spot at the appointed time and ready for the play. The ground having been all prepared and preliminaries of the game all settled, and the bettings all made, and goods all 'staked,' night came on without the appearance of any players on the ground. But soon after dark a procession of lighted flambeaux was seen coming from each encampment to the ground, where the players assembled around their respective byes, and at the beat of the drums and chants of the women, each party of players commenced the 'ball-play dance' (Plates 224 to 441). Each party danced for a quarter of an hour around their respective byes, in their ball-play dress, rattling their ball-sticks together in the most violent manner, and all singing as loud as they could raise their voices, whilst the women of each party who had their goods at stake formed into two rows on the line between the two parties of players and danced also, in an uniform step, and all their voices joined in chants to the Great Spirit, in which they were soliciting his favor in deciding the game to their advantage; and also encouraging the players to exert every power they possessed in the struggle that was to ensue. In the meantime four old *medicine men*, who were to have the starting of the ball, and who were to be judges of the play, were seated at the point where the ball was to be started, and busily smoking to the Great Spirit for their success in judging rightly and impartially between the parties in so important an affair.

"This dance was one of the most picturesque scenes imaginable, and was repeated at intervals of every half hour during the night, and exactly in the same manner; so that the players were certainly awake all the night, and arrayed in their appropriate dress, prepared for the play, which was to commence at 9 o'clock the next morning. In the morning, at the hour, the two parties and all their friends were drawn out and over the ground; when at length the game commenced, by the judges throwing up the ball at the firing of a gun; when an instant struggle ensued between the players, who were some six or seven hundred in numbers, and were mutually endeavoring to catch the ball in their sticks, and throw it home and between their respective stakes, which, when successfully done, counts one for game. In this game every player was dressed alike, that is, divested of all dress except the girdle and

the tail, which I have before described ; and in these desperate struggles for the ball, when it is *up* (Plate 225), where hundreds are running and leaping, actually over each other's heads, and darting between their adversaries' legs, tripping and throwing, and foiling each other in every possible manner, and every voice raised to the highest key, in shrill yelps and barks), there are rapid successions of feats and of incidents that astonished and amuse far beyond the conception of any one who has not had the singular good luck to witness them. In these struggles every mode is used that can be devised to oppose the progress of the foremost, who is likely to get the ball ; and these obstructions often meet desperate individual resistance, which terminates in a violent scuffle, and sometimes in fisticuffs, when their sticks are dropped, and the parties are unmolested whilst they are settling it between themselves, unless it be by a general *stampede*, to which they are subject who are down, if the ball happens to pass in their direction. Every weapon, by a rule of all ball-plays, is laid by in their respective encampments, and no man allowed to go for one ; so that the sudden broils that take place on the ground are presumed to be as suddenly settled without any probability of much personal injury ; and no one is allowed to interfere in any way with the contentious individuals.

"There are times when the ball gets to the ground (Plate 226), and such a confused mass rushing together around it, and knocking their sticks together, without the possibility of any one getting or seeing it for the dust that they raise, that the spectator loses his strength and everything else but his senses ; when the condensed mass of ball-sticks and shins and bloody noses is carried around the different parts of the ground, for a quarter of an hour at a time, without any one of the mass being able to see the ball ; and which they are often thus scuffling for, several minutes after it has been thrown off and played over another part of the ground.

"For each time that the ball was passed between the stakes of either party one was counted for their game, and a halt of about one minute, when it was again started by the judges of the play, and a similar struggle ensued ; and so on until the successful party arrived to one hundred, which was the limit of the game, and accomplished at an hour's sun, when they took the stakes ; and then, by a previous agreement, produced a number of jugs of whisky, which gave all a wholesome drink, and sent them all off merry and in good humor, but not drunk."—G. C.

430. Ball-play of the Sioux Women, Prairie du Chien. Calicoes and other presents are placed on a pole by the men ; the women choose sides, and play for them, to the great amusement of the men. Painted in 1836, at Prairie du Chien, Wisconsin.

(Plate No. 252, page 145, vol. 2, Catlin's Eight Years.)

In this play there are two balls attached to the ends of a string 18 inches in length ; the women have a stick in each hand, on which they catch the string and throw it.

With *Wa-be-shah's* band of Sioux, who were receiving annuities.

After the men (Sioux) had enjoyed their surfeit of whisky, and wanted a little more amusement, and felt disposed to indulge the weaker sex in a little recreation also, it was announced amongst them and through the village that the women were going to have a ball-play.

For this purpose the men, in the very liberal trades they were making, and filling their canoes with goods delivered to them on a year's credit, laid out a great quantity of ribbons and calicoes, with other presents well adapted to the wants and desires of the women, which were hung on a pole resting on crotches, and guarded by an old man, who was to be judge and umpire of the play which was to take place amongst the women, who were divided into two equal parties, and were to play a desperate game of ball for the valuable stakes that were hung before them.

In the ball-play of the women, they have two balls attached to the ends of a string about a foot and a half long, and each woman has a short stick in each hand on which she catches the string with the two balls and throws them, endeavoring to

force them over the goal of her own party. The men are more than half drunk when they feel liberal enough to indulge the women in such an amusement, and take infinite pleasure in rolling about on the ground and laughing to excess, whilst the women are tumbling about in all attitudes, and scuffling for the ball. The game of hunt the slipper even loses its zest after witnessing one of these, which sometimes last for hours together, and often exhibits the hottest contest for the balls exactly over the heads of the men, who, half from whisky and half from inclination, are lying in groups and flat upon the ground.—G. C.

- 431. Game of "Tchung-kee,"** of the Mandans, the principal and most valued game of that tribe. Painted in 1832, at the Mandan village.
(Plate No. 59, page 133, vol. 1, Catlin's Eight Years.)

A beautiful athletic exercise, and one on which they often bet and risk all their personal goods and chattels.

The games and amusements of these people (the Mandans) are in most respects like those of other tribes, consisting of ball-plays, game of the moccasin, of the platter, feats of archery, horse-racing, &c.; and they have yet another, which may be said to be their favorite amusement, and unknown to the other tribes about them. The game of *tchung-kee*, a beautiful athletic exercise, which they seem to be almost unceasingly practicing whilst the weather is fair and they have nothing else of moment to demand their attention. This game is decidedly their favorite amusement, and is played near to the village on a pavement of clay which has been used for that purpose until it has become as smooth and hard as a floor. For this game two champions form their respective parties by choosing alternately the most famous players until their requisite numbers are made up. Their bettings are then made, and their stakes are held by some of the chiefs or others present. The play commences with two (one from each party), who start off upon a trot abreast of each other, and one of them rolls in advance of them, on the pavement, a little ring of two or three inches in diameter, cut out of a stone, and each one follows it up with his *tchung-kee* (a stick of six feet in length, with little bits of leather projecting from its sides of an inch or more in length), which he throws before him as he runs, sliding it along upon the ground after the ring, endeavoring to place it in such a position when it stops that the ring may fall upon it and receive one of the little projections of leather through it, which counts for game one, or two, or four, according to the position of the leather on which the ring is lodged. The last winner always has the rolling of the ring, and both start and throw the *tchung-kee* together. If either fails to receive the ring, or to lie in a certain position, it is a forfeiture of the amount of the number he is nearest to, and he loses his throw, when another steps into his place. This game is a very difficult one to describe so as to give an exact idea of it, unless one can see it played. It is a game of great beauty and fine bodily exercise, and these people become excessively fascinated with it, often gambling away everything they possess, and even sometimes, when everything else was gone, have been known to stake their liberty upon the issues of these games, offering themselves as slaves to their opponents in case they get beaten.—G. C.

- 432. Horse-racing,** Mandan, on a race-course back of the village, in use on every fair day. Painted in 1832 at Mandan village, Upper Missouri.
(Plate No. 61, page 143, vol. 1, Catlin's Eight Years.)

THE INDIAN HORSE OF THE UPPER MISSOURI, AND RACING.

The horses which the Indians ride in this country are invariably the wild horses, which are found in great numbers on the prairies, and have unquestionably strayed from the Mexican borders, into which they were introduced by the Spanish invaders of that country, and now range and subsist themselves, in winter and summer, over the vast plains of prairie that stretch from the Mexican frontiers to Lake Winnipeg on

(Plate 60, Vol. I, Catlin's Eight Years.)

the north, a distance of 3,000 miles. These horses are all of small stature, of the pony order, but a very hardy and tough animal, being able to perform for the Indians a continual and essential service.

They are taken with the lasso, which is a long halter or thong, made of raw hide, of some 15 or 20 yards in length, and which the Indians throw with great dexterity, with a noose at one end of it, which drops over the head of the animal they wish to catch whilst running at full speed, when the Indian dismounts from his own horse, and holding to the end of the lasso chokes the animal down, and afterwards tames and converts him to his own use.

Scarcely a man in these regions is to be found who is not the owner of one or more of these horses, and in many instances of eight, ten, or even twenty, which he values as his own personal property.

The Indians are hard and cruel masters; and added to their cruelties is the sin, that is familiar in the Christian world, of sporting with the limbs and lives of these noble animals. Horse-racing here, as in all more enlightened communities, is one of the most exciting amusements and one of the most extravagant modes of gambling.

I have been this day a spectator to scenes of this kind, which have been enacted in abundance, on a course which they have just back of their village; and although I never had the least taste for this cruel amusement in my own country, yet I must say I have been not a little amused and pleased with the thrilling effect which these exciting scenes have produced amongst so wild and picturesque a group.

I have made a sketch of the ground and the group as near as I could (No. 432), showing the manner of starting and coming out, which vary a little from the customs of the known world; but in other respects I believe a horse race is the same all the world over.—G. C.

433. Foot-Race, Mandans, on the same ground, and as often run. Painted in 1832, Mandan Village, Upper Missouri.

(See No. 432, herein.)

434. Canoe Race, Chippeways, in bark canoes, near the Sault de St. Marie; an Indian regatta, a thrilling scene. Painted in 1836.

(Plate No. 267, page 162, vol. 2, Catlin's Eight Years.)

In Plate 267 is seen one of their favorite amusements at this place, which I was lucky enough to witness a few miles below the Sault, when high bettings had been made, and a great concourse of Indians had assembled to witness an Indian regatta or canoe race, which went off with great excitement, firing of guns, yelping, &c. The Indians in this vicinity are all Chippeways, and their canoes all made of birch bark, and chiefly of one model; they are exceedingly light, as I have before described, and propelled with wonderful velocity.—G. C.

435. Archery of the Mandans. Painted July 3, 1832.

(Plate No. 60, page 141, vol. 1, Catlin's Eight Years.)

The strife is to prove who can get the greatest number of arrows flying in the air at a time, before the first one reaches the ground. The most of these are portraits closely studied from nature. I have seen some of them get eight arrows in the air at one time.

From the Mandan village, July, 1832.—This day has been one of unusual mirth and amusement amongst the Mandans, and whether on account of some annual celebration or not, I am as yet unable to say, though I think such is the case; for these people have many days which, like this, are devoted to festivities and amusements.

Their lives, however, are lives of idleness and ease, and almost all their days and hours are spent in innocent amusements. Amongst a people who have no office hours to attend to—no professions to study, and of whom but very little time is required in the chase, to supply their families with food, it would be strange if they did not practice many games and amusements, and also become exceedingly expert in them.

I have this day been a spectator of games and plays until I am fatigued with looking on, and also by lending a hand, which I have done, but with so little success as only to attract general observations, and as generally to excite the criticisms and laughter of the squaws and little children.

I have seen a fair exhibition of their archery this day, in a favorite amusement which they call the game of the arrow (see Plate 60), where the young men who are the most distinguished in this exercise, assemble on the prairie at a little distance from the village, and having paid each one his entrance fee, such as a shield, a robe, a pipe, or other article, step forward in turn, shooting their arrows into the air, endeavoring to see who can get the greatest number flying in the air at one time, thrown from the same bow. For this, the number of eight or ten arrows are clenched in the left hand with the bow, and the first one which is thrown is elevated to such a degree as will enable it to remain the longest time possible in the air, and while it is flying, the others are discharged as rapidly as possible; and he who succeeds in getting the greatest number up at once, is best, and takes the goods staked.

In looking on at this amusement, the spectator is surprised; not at the great distance to which the arrows are actually sent; but at the quickness of fixing them on the string, and discharging them in succession, which is no doubt, the result of great practice, and enables the most expert of them to get as many as eight arrows up before the first one reaches the ground.

THE BOW USED ON HORSEBACK.

For the successful use of the bow, as it is used through all this region of country on horseback, and that invariably at full speed, the great object of practice is to enable the bowman to draw the bow with suddenness and instant effect; and also to repeat the shots in the most rapid manner. As their game is killed from their horses' back while at the swiftest rate, and their enemies fought in the same way, and as the horse is the swiftest animal of the prairie, and always able to bring his rider alongside, within a few paces of his victim; it will easily be seen that the Indian has little use in throwing his arrow more than a few paces; when he leans quite low on his horse's side, and drives it with astonishing force, capable of producing instant death to the buffalo, or any other animal in the country. The bows which are generally in use in these regions I have described in a former letter, and the results produced by them at the distance of a few paces is almost beyond belief, considering their length, which is not often over 3, and sometimes not exceeding $2\frac{1}{2}$ feet. It can easily be seen, from what has been said, that the Indian has little use or object in throwing the arrow to any great distance. And as it is very seldom that they can be seen shooting at a target, I doubt very much whether their skill in such practice would compare with that attained to in many parts of the civilized world; but with the same weapon, and dashing forward at fullest speed on the wild horse, without the use of the rein, when the shot is required to be made with the most instantaneous effect, I scarcely think it possible that any people can be found more skilled, and capable of producing more deadly effects with the bow.—G. C.

- 436. Dance of the Chiefs, Sioux;** a very unusual thing, as the dancing is generally left to the young men, given to me expressly as a compliment by the chiefs that I might make a painting of it. Painted in 1832. Upper Missouri; mouth of Teton River.

(Plate No. 100, pages 237, 238, vol. 1, Catlin's Eight Years.)

During the time that I was engaged in painting my portraits I was occasionally inducing the young men to give me their dances, a great variety of which they gave me by being slightly paid, which I was glad to do in order to enable me to study their character and expression thoroughly, which I am sure I have done; and I shall take pleasure in showing them to the world when I get back. The dancing is generally done by the young men, and considered undignified for the chiefs or doctors to join

in. Yet so great was my medicine that chiefs and medicine-men turned out and agreed to compliment me with a dance (Plate 100, No. 436). I looked on with great satisfaction, having been assured by the interpreters and traders that this was the highest honor they had ever known them to pay to any stranger amongst them.

In this dance, which I have called "the dance of the chiefs," for want of a more significant title, was given by fifteen or twenty chiefs and doctors, many of whom were very old and venerable men. All of them came out in their head-dresses of war-eagle quills, with a spear or staff in the left hand and a rattle in the right. It was given in the midst of the Sioux village, in front of the head chief's lodge; and beside the medicine-men, who beat on the drum and sang for the dance, there were four young women standing in a row and chanting a sort of chorus for the dancers, forming one of the very few instances that I ever have met where the women are allowed to take any part in the dancing, or other game or amusement, with the men.

This dance was a very spirited thing, and pleased me much, as well as all the village, who were assembled around to witness what most of them never before had seen, their aged and venerable chiefs united in giving a dance.—G. C.

437. Dog-Dance, Sioux. Painted in July, 1835, at Fort Snelling.

(Plate No. 237, page 136, vol 2, Catlin's Eight Years.)

The dog's liver and heart are taken raw and bleeding, and placed upon a crotch; and, being cut into slips, each man dances up to it, bites off and swallows a piece of it, boasting at the same time that he has thus swallowed a piece of the heart of his enemy whom he has slain in battle.

SIoux AND CHIPPEWA DANCES.

The Fourth of July was hailed and celebrated by us at this place (Fort Snelling, falls of Saint Anthony, 1835), in an unusual and not uninteresting manner. With the presence of several hundreds of the wildest of the Chippeways and as many hundreds of the Sioux, we were prepared with material in abundance for the novel—for the wild and grotesque—as well as for the grave and ludicrous. Major Taliaferro, the Indian agent, to aid my views in procuring sketches of manners and customs, represented to them that I was a great Medicine-man, who had visited and witnessed the sports of a vast many Indians of different tribes, and had come to see whether the Sioux and Chippeways were equal in a ball-play, &c., to their neighbors, and that if they would come in on the next day (Fourth of July), and give us a ball-play and some of their dances, in their best style, he would have the *big gun* fired twenty-one times (the customary salute for that day), which they easily construed into a high compliment to themselves. This, with still stronger inducements, a barrel of flour, a quantity of pork and tobacco, which I gave them, brought the scene about on the day of independence, as follows: About 11 o'clock (the usual time for Indians to make their appearance on any great occasion), the young men who were enlisted for ball-play made their appearance on the ground with ball-sticks in hand, with no other dress on than the flap, and attached to a girdle or ornamental sash, a tail, extending nearly to the ground, made of the choicest arrangement of quills and feathers or of the hair of white horses' tails. After an excited and warmly contested play of two hours, they adjourned to a place in front of the agent's office, where they entertained us for two or three hours longer with a continued variety of their most fanciful and picturesque dances. They gave us the *Beggar's-dance*, the *Buffalo-dance*, the *Bear-dance*, the *Eagle-dance*, and the *dance of the braves*.—G. C.

DOG-DANCE.

Several days after this the plains of Saint Anthony rang with the continual sounds of drums and rattles, in time with the thrilling yells of the dance, until it had doubly ceased to be novelty. General Patterson, of Philadelphia, and his family, ar-

rived about this time, however, and a dance was got up for their amusement; and it proved to be one of an unusual kind, and interesting to all. Considerable preparation was made for the occasion, and the Indians informed me that if they could get a couple of dogs that were of no use about the garrison they would give us their favorite, the *Dog dance*. The two dogs were soon produced by the officers, and in presence of the whole assemblage of spectators they butchered them and placed their two hearts and livers entire and uncooked on a couple of crotches about as high as a man's face (No. 437). These were then cut into strips, about an inch in width, and left hanging in this condition, with the blood and smoke upon them. A spirited dance then ensued; and, in a confused manner, every one sung forth his own deeds of bravery in ejaculatory gutturals, which were almost deafening; and they danced up, two at a time, to the stakes, and after spitting several times upon the liver and hearts caught a piece in their mouths, bit it off, and swallowed it. This was all done without losing the step (which was in time to their music), or interrupting the times of their voices.

Each and every one of them in this wise bit off and swallowed a piece of the livers, until they were demolished, with the exception of the two last pieces hanging on the stakes, which a couple of them carried in their mouths and communicated to the mouths of the two musicians, who swallowed them. This is one of the most valued dances amongst the Sioux, though by no means the most beautiful or most pleasing. The beggar's dance, the discovery dance, and the eagle dance are far more graceful and agreeable. The dog dance is one of distinction, inasmuch as it can only be danced by those who have taken scalps from the enemy's heads, and come forward boasting that they killed their enemy in battle and swallowed a piece of his heart in the same manner.—G. C.

438. Scalp dance, Sioux; women in the center, holding the scalps on poles, and warriors dancing around, brandishing their war weapons in the most frightful manner, and yelping as loud as they can scream. Painted in 1832 at Sioux camp, mouth of Teton River, Upper Missouri.

(Plate No. 104, p. 245, vol. 1, Catlin's Eight Years.)

SCALP DANCE.

The *Scalp dance* (No. 438) is given as a celebration of a victory, and amongst this tribe, as I learned whilst residing with them, danced in the night by the light of their torches and just before retiring to bed. When a war party returns from a war excursion bringing home with them the scalps of their enemies they generally "dance them" for fifteen nights in succession, vaunting forth the most extravagant boasts of their wonderful prowess in war, whilst they brandish their war weapons in their hands. A number of young women are selected to aid (though they do not actually join in the dance) by stepping into the center of the ring and holding up the scalps that have been recently taken whilst the warriors dance (or rather jump) around in a circle, brandishing their weapons, and barking and yelping in the most frightful manner, all jumping on both feet at a time with a simultaneous stamp and blow and thrust of their weapons, with which it would seem as if they were actually cutting and carving each other to pieces. During these frantic leaps, and yelps, and thrusts, every man distorts his face to the utmost of his muscles, darting about his glaring eye-balls and snapping his teeth as if he were in the heat (and actually breathing through his inflated nostrils the very hissing death) of battle. No description that can be written could ever convey more than a feeble outline of the frightful effects of these scenes enacted in the dead and darkness of night, under the glaring light of their blazing flambeaux; nor could all the years allotted to mortal man in the least obliterate or deface the vivid impress that one scene of this kind would leave upon his memory.

WHY THE SCALP IS TAKEN.

The precise object for which the scalp is taken is one which is definitely understood, and has already been explained; but the motive (or motives) for which this strict ceremony is so scrupulously held by all the American tribes over the scalp of an enemy is a subject as yet not satisfactorily settled in my mind. There is no doubt but one great object in these exhibitions is public exultation; yet there are several conclusive evidences that there are other and essential motives for thus formally and strictly displaying the scalp. Amongst some of the tribes it is the custom to bury the scalps after they have gone through this series of public exhibitions; which may in a measure have been held for the purpose of giving them notoriety, and of awarding public credit to the persons who obtained them, and now, from a custom of the tribe, are obliged to part with them. The great respect which seems to be paid to them whilst they use them, as well as the pitying and mournful song which they howl to the manes of their unfortunate victims, as well as the precise care and solemnity with which they afterwards bury the scalps, sufficiently convince me that they have a superstitious dread of the spirits of their slain enemies and many conciliatory offices to perform to insure their own peace, one of which is the ceremony above described.—G. C.

439. *Begging dance*, Sacs and Foxes, danced for the purpose of getting presents from the spectators. Painted in 1826, at Rock Island, Ill., at camp of Keokuk's band of Sacs and Foxes.

(Plate No. 293, page 214, vol. 2, Catlin's Eight Years.)

The *Begging dance* is a frequent amusement, and one that has been practiced with some considerable success at this time, whilst there have been so many distinguished and liberal visitors here. It is got up by a number of desperate and long-winded fellows, who will dance and yell their visitors into liberality; or, if necessary, laugh them into it by their strange antics, singing a song of importunity and extending their hands for presents, which they allege are to gladden the hearts of the poor and insure a blessing to the giver.—G. C.

440. *Buffalo dance*, Mandans, with the mask of the buffalo on. Painted at Mandan Village, Dakota, summer of 1832.

(Plate No. 56, page 128, vol. 1, Catlin's Eight Years.)

Danced to make buffalo come when they are like to starve for want of food. Song to the Great Spirit, imploring him to send them buffalo, and they will cook the best of it for him.

From *Mandan village, Upper Missouri, July 1832*.—The Mandans, like all other tribes, lead lives of idleness and leisure, and, of course, devote a great deal of time to their sports and amusements, of which they have a great variety. Of these dancing is one of the principal, and may be seen in a variety of forms, such as the *Buffalo dance*, the *Boasting dance*, the *Begging dance*, the *Scalp dance*, and a dozen other kinds of dances, all of which have their peculiar characters and meanings or objects.

These exercises are exceedingly grotesque in their appearance, and to the eye of a traveler who knows not their meaning or importance they are an uncouth and frightful display of starts and jumps and yelps and jarring gutturals which are sometimes truly terrifying. But when one gives them a little attention, and has been lucky enough to be initiated into their mysterious meaning, they become a subject of the most intense and exciting interest. Every dance has its peculiar step, and every step has its meaning; every dance also has its peculiar song, and that is so intricate and mysterious oftentimes that not one in ten of the young men who are dancing and singing it know the meaning of the song which they are chanting over. None but the medicine men are allowed to understand them, and even they are generally only initiated into these secret arcana on the payment of a liberal stipend for their tuition, which requires much application and study. There is evidently a set song and senti-

ment for every dance, for the songs are perfectly measured and sung in exact time with the beat of the drum, and always with an uniform and invariable set of sounds and expressions which clearly indicate certain sentiments which are expressed by the voice, though sometimes not given in any known language whatever.

They have other dances and songs which are not so mystified, but which are sung and understood by every person in the tribe, being sung in their own language, with much poetry in them, and perfectly metred, but without rhyme. On these subjects I shall take another occasion to say more, and will for the present turn your attention to the style and modes in which some of these curious transactions are conducted.

My ears have been almost continually ringing since I came here with the din of yelping and beating of the drums, but I have for several days past been peculiarly engrossed and my senses almost confounded with the stamping and grunting and bellowing of the buffalo dance, which closed a few days since at sunrise (thank Heaven), and which I must needs describe to you.

Buffaloes, it is known, are a sort of roaming creatures, congregating occasionally in huge masses, and strolling away about the country from east to west, or from north to south, or just where their whims or strange fancies may lead them; and the Mandans are sometimes, by this means, most unceremoniously left without anything to eat; and being a small tribe, and unwilling to risk their lives by going far from home in the face of their more powerful enemies, are oftentimes left almost in a state of starvation. In any emergency of this kind, every man musters and brings out of his lodge his mask (the skin of a buffalo's head with the horns on), which he is obliged to keep in readiness for this occasion; and then commences the buffalo dance, of which I have above spoken, which is held for the purpose of making "buffalo come" (as they term it), of inducing the buffalo herds to change the direction of their wanderings, and bend their course towards the Mandan village, and gaze about on the beautiful hills and bluffs in its vicinity, where the Mandans can shoot them down and cook them as they want them for food.

For the most part of the year, the young warriors and hunters, by riding out a mile or two from the village, can kill meat in abundance; and sometimes large herds of these animals may be seen grazing in full view of the village. There are other seasons also when the young men have ranged about the country as far as they are willing to risk their lives, on account of their enemies, without finding meat. This sad intelligence is brought back to the chiefs and doctors, who sit in solemn council, and consult on the most expedient measures to be taken, until they are sure to decide upon the old and only expedient which "never has failed."

The chief issues his order to his runners or criers, who proclaim it through the village—and in a few minutes the dance begins. The place where this strange operation is carried on is in the public area in the center of the village, and in front of the great medicine or mystery lodge. About ten or fifteen Mandans at a time join in the dance, each one with the skin of the buffalo's head (or mask) with the horns on, placed over his head, and in his hand his favorite bow or lance, with which he is used to slay the buffalo.

I mentioned that this dance always had the desired effect, that it never fails, nor can it, for it cannot be stopped (but is going incessantly day and night) until "buffalo come." Drums are beating and rattles are shaken, and songs and yells are shouted incessantly, and lookers-on stand ready with masks on their heads, and weapons in hand, to take the place of each one as he becomes fatigued, and jumps out of the ring.

During this time of general excitement, spies or lookers are kept on the hills in the neighborhood of the village, who, when they discover buffaloes in sight, give the appropriate signal, by "throwing their robes," which is instantly seen in the village, and understood by the whole tribe. At this joyful intelligence there is a shout of thanks to the Great Spirit, and more especially to the mystery-man, and the dancers, who have been the immediate cause of their success! There is then a brisk prepara-

tion for the chase—a grand hunt takes place. The choicest pieces of the victims are sacrificed to the Great Spirit, and then a surfeit and a carouse.

These dances have sometimes been continued in this village two or three weeks without stopping an instant, until the joyful moment when buffaloes made their appearance. So they never fail; and they think they have been the means of bringing them in.

Every man in the Mandan village (as I have before said) is obliged by a village regulation to keep the mask of the buffalo hanging on a post at the head of his bed, which he can use on his head whenever he is called upon by the chiefs to dance for the coming of buffaloes. The mask is put over the head, and generally has a strip of the skin hanging to it, of the whole length of the animal, with the tail attached to it, which, passing down over the back of the dancer, is dragged on the ground. When one becomes fatigued of the exercise, he signifies it by bending quite forward, and sinking his body towards the ground; when another draws a bow upon him and hits him with a blunt arrow, and he falls like a buffalo—is seized by the bystanders, who drag him out of the ring by the heels, brandishing their knives about him; and having gone through the motions of skinning and cutting him up, they let him off, and his place is at once supplied by another, who dances into the ring with his mask on; and by this taking of places, the scene is easily kept up night and day, until the desired effect has been produced, that of "making buffalo come."

The day before yesterday however, readers, which, though it commenced in joy and thanksgiving to the Great Spirit for the signal success which had attended their several days of dancing and supplication, ended in a calamity which threw the village of the Mandans into mourning and repentant tears, and that at a time of scarcity and great distress. The signal was given into the village on that morning from the top of a distant bluff, that a band of buffaloes were in sight, though at a considerable distance off, and every heart beat with joy, and every eye watered and glistened with gladness.

The dance had lasted some three or four days, and now, instead of the doleful tap of the drum and the begging chants of the dancers, the stamping of horses was heard as they were led and galloped through the village—young men were throwing off their robes and their shirts, were seen snatching a handful of arrows from their quivers, and stringing their sinewy bows, glancing their eyes and their smiles at their sweethearts, and mounting their ponies. * * * A few minutes there had been of bustle and boasting, whilst bows were twanging and spears were polishing by running their blades into the ground—every face and every eye was filled with joy and gladness—horses were pawing and snuffing in fury for the onset, when Louison Frénié, an interpreter of the fur company, galloped through the village with his rifle in his hand and his powder-horn at his side; his head and waist were bandaged with handkerchiefs, and his shirt sleeves rolled up to his shoulders—the hunter's yell issued from his lips and was repeated through the villager; he flew to the bluffs, and behind him and over the graceful swells of the prairie, galloped the emulous youths, whose hearts were beating high and quick for the onset.

In the village, where hunger had reigned, and starvation was almost ready to look them in the face, all was instantly turned to joy and gladness. The chiefs and doctors who had been for some days dealing out minimum rations to the community from the public crib, now spread before their subjects the contents of their own private *caches*, and the last of every thing that could be mustered, that they might eat a thanksgiving to the Great Spirit for his goodness in sending them a supply of buffalo meat. A general carouse of banqueting ensued, which occupied the greater part of the day, and their hidden stores, which might have fed an emergency for several weeks, were pretty nearly used up on the occasion—bones were half-picked, and dishes half-emptied and then handed to the dogs. I was not forgotten, neither, in the general surfeit; several large and generous wooden bowls of pemican, and other palatable food were sent to my painting-room, and I received them in this time of scarcity with great pleasure.

MANDAN HUNTERS SURPRISED BY SIOUX AND KILLED.

After this general indulgence was over, and the dogs had licked the dishes, their usual games and amusements ensued, and hilarity and mirth and joy took possession of and reigned in every nook and corner of the village; and, in the midst of this, screams and shrieks were heard, and echoed everywhere. Women and children scrambled to the tops of their wigwams, with their eyes and their hands stretched in agonizing earnestness to the prairie, whilst blackened warriors ran furiously through every winding maze of the village, and issuing their jarring gutturals of vengeance, as they snatched their deadly weapons from their lodges, and struck the reddened post as they furiously passed it by. Two of their hunters were bending their course down the sides of the bluff toward the village, and another broke suddenly out of a deep ravine, and yet another was seen dashing over and down the green hills, and all were goading on their horses at full speed; and then came another and another, and all entered the village amid shouts and groans of the villagers who crowded around them; the story was told in their looks, for one was bleeding, and the blood that flowed from his naked breast had crimsoned his milk-white steed as it had dripped over him; another grasped in his left hand a scalp that was reeking in blood, and in the other his whip; another grasped nothing save the reins in one hand and the mane of the horse in the other, having thrown his bow and his arrows away and trusted to the fleetness of his horse for his safety; yet the story was audibly told, and the fatal tragedy recited in irregular and almost suffocating ejaculations—the names of the dead were in turns pronounced and screams and shrieks burst forth at their recital—murmurs and groans ran through the village, and this happy little community were in a moment smitten with sorrow and distraction.

Their proud band of hunters who had started full of glee and mirth in the morning had been surrounded by their enemy, the Sioux, and eight of them killed. The Sioux, who had probably reconnoitered their village during the night, and ascertained that they were dancing for buffaloes, laid a stratagem to entrap them, in the following manner: Some six or eight of them appeared the next morning (on a distant bluff, in sight of their sentinel) under the skins of buffaloes, imitating the movements of those animals whilst grazing; and being discovered by the sentinel, the intelligence was telegraphed to the village, which brought out their hunters as I have described. The masked buffaloes were seen grazing on the top of a high bluff, and when the hunters had approached within half a mile or so of them they suddenly disappeared over the hill. Louison Frénié, who was leading the little band of hunters, became at that moment suspicious of so strange a movement, and came to a halt * * * “Look!” said a Mandan, pointing to a little ravine to the right and at the foot of the hill, from which suddenly broke some forty or fifty furious Sioux, on fleet horses and under full whip, who were rushing upon them; they wheeled and in front of them came another band more furious from the other side of the hill. They started for home, poor fellows, and strained every nerve, but the Sioux were too fleet for them; and every now and then the whizzing arrow and the lance were heard to rip the flesh of their naked backs, and a grunt and a groan as they tumbled from their horses. Several miles were run in this desperate race, and Frénié got home, and several of the Mandans, though eight of them were killed and scalped by the way.

So ended that day and the hunt; but many a day and sad will last the grief of those whose hearts were broken on that unlucky occasion.

This day, though, my readers, has been one of a more joyful kind, for the Great Spirit, who was indignant at so flagrant an injustice, has sent the Mandans an abundance of buffaloes; and all hearts have joined in a general thanksgiving to Him for His goodness and justice.—Pages 126–130, vol. 1, Catlin's Eight Years.

(See No. 427—for description.)

DANCE TO THE BERTASHE, SAC AND FOX.

No. 442, page 313.

(Plate 296, Vol. II, Catlin's Eight Years.)

- 442. Dance to the Berdashe, Sac and Fox.** An unaccountable and ludicrous custom amongst the Sacs and Foxes which admits not of an entire explanation. Painted in 1836, at Rock Island, Sept. 1836.

(Plate No. 296, page 215, vol. 2, Catlin's Eight Years.)

Dance to the Berdashe (Plate 296) is a very funny and amusing scene, which happens once a year or oftener, as they choose, when a feast is given to the *Berdashe*, as he is called in French (or *I-coo-coo-a*, in their own language), who is a man dressed in woman's clothes, as he is known to be all his life, and for extraordinary privileges which he is known to possess he is driven to the most servile and degrading duties, which he is not allowed to escape; and he being the only one of the tribe submitting to this disgraceful degradation, is looked upon as a *medicine* and sacred, and a feast is given to him annually; and initiatory to it a dance by those few young men of the tribe who can dance forward and publicly make their boast (without the denial of the *Berdashe*) that *Agh-whi-ec-choos-cum-me hi-anh-dwac-cumme-ke on-daig-nun-ehow ixt. Che-ne-a'hkt ah-per-ian I-coo-coo-a wi-an-gurotst whow-icht-ne-act-ar-rah, ne-act-gun-he k'dow-k's dow-on-daig-o-ewhicht nun-go-was-see.*

Such, and such only, are allowed to enter the dance and partake of the feast, and as there are but a precious few in the tribe who have legitimately gained this singular privilege, or willing to make a public confession of it, it will be seen that the society consists of quite a limited number of "odd fellows."

This is one of the most unaccountable and disgusting customs that I have ever met in the Indian country, and so far as I have been able to learn belongs only to the Sioux and Sacs and Foxes—perhaps it is practiced by other tribes, but I did not meet with it; and for further account of it I am constrained to refer the reader to the country where it is practiced, and where I should wish that it might be extinguished before it be more fully recorded.—Pages 214, 215, vol. 2, Catlin's Eight Years.

- 443. Beggars' Dance, Sioux, for presents.** Painted in 1832 at mouth of Teton River.

(Plate No. 103, page 245, vol. 1, Catlin's Eight Years.)

Dancing is done here too, as it is oftentimes done in the enlightened world, to get favors—to buy the world's goods; and in both countries danced with about equal merit, except that the Indian has surpassed us in honesty by christening it in his own country, the "*beggar's dance*." This spirited dance (Plate 103) was given, not by a set of *beggars* though, literally speaking, but by the first and most independent young men in the tribe, beautifully dressed (*i. e.*, not dressed at all, except with their breech clouts or *kelts*, made of eagles' and ravens' quills), with their lances and pipes and rattles in their hands, and a medicine-man beating the drum, and joining in the song at the highest key of his voice. In this dance every one sings as loud as he can halloo; uniting his voice with the others in an appeal to the Great Spirit to open the hearts of the bystanders to give to the poor, and not to themselves; assuring them that the Great Spirit will be kind to those who are kind to the helpless and poor.—G. C.

- 444. Dance to the Medicine-Bag of the Brave, Sacs and Foxes.** Painted in 1836.

(Plate No. 297, page 215, vol. 2, Catlin's Eight Years.)

Warriors returned from battle, with scalps, dance in front of the widow's lodge, whose husband has been killed. They sing to his medicine-bag, which is hung on a bush, and throw presents to the widow.

Dance to the Medicine of the Brave (Plate 297). This is a custom well worth recording, for the beautiful moral which is contained in it. In this plate is represented a party of Sac warriors who have returned victorious from battle, with scalps they have taken from their enemies, but having lost one of their party, they appear and dance in front of his wigwam, fifteen days in succession, about an hour on each day, when the widow hangs his *medicine-bag* on a green bush which she erects before her door, under which she sits and cries, whilst the warriors dance and brandish the

scalps they have taken, and at the same time recount the deeds of bravery of their deceased comrade in arms, whilst they are throwing presents to the widow to heal her grief and afford her the means of a living.—G. C.

445. Brave's Dance, Boasting, &c., Sioux. Painted in 1835, at Fort Snelling.
(No plate. Pages 135, 136, vol. 2, Catlin's Eight Years.)

The last dance is peculiarly beautiful, and exciting to the feelings in the highest degree.

At intervals they stop, and one of them steps into the ring and vociferates as loud as possible, with the most significant gesticulations, the feats of bravery which he has performed during his life. He boasts of the scalps he has taken, of the enemies he has vanquished, and at the same time carries his body through all the motions and gestures which have been used during these scenes when they were transacted. At the end of his boasting all assent to the truth of his story, and give in their approbation by the guttural "*vaugh!*" and the dance again commences. At the next interval, another makes his boasts, and another, and another, and so on.

During this scene a little trick was played off in the following manner, which produced much amusement and laughter. A woman of goodly size, and in woman's attire, danced into the ring (which seemed to excite some surprise, as women are never allowed to join in the dance), and commenced "sawing the air," and boasting of the astonishing feats of bravery she had performed—of the incredible number of horses she had stolen, of the scalps she had taken, &c.—until her feats surpassed all that had ever been heard of—sufficient to put all the warriors who had boasted to the blush. They all gave assent, however, to what she had said, and apparently credence too; and to reward so extraordinary a feat of female prowess they presented to her a kettle, a cradle, beads, ribbons, &c. After getting her presents, and placing them safely in the hands of another matron for safe keeping, she commenced disrobing herself; and, almost instantly divesting herself of a loose dress, in the presence of the whole company, came out in a soldier's coat and pantaloons, and laughed at them excessively for their mistake. She then commenced dancing and making her boasts of her exploits, assuring them that she was a man, and a great brave. They all gave unqualified assent to this, acknowledged their error, and made her other presents of a gun, a horse, of tobacco, and a war-club. After her boasts were done, and the presents secured as before, she deliberately threw off the pantaloons and coat, and presented herself at once, and to their great astonishment and confusion, in a beautiful woman's dress. The tact with which she performed these parts, so uniformly pleased that it drew forth thundering applause from the Indians, as well as from the spectators; and the chief stepped up and crowned her head with a beautiful plume of the eagle's quill, rising from a crest of the swan's down. My wife, who was traveling in this part of the country with me, was a spectator of these scenes, as well as the ladies and officers of the garrison, whose polite hospitality we are at this time enjoying.—G. C.

446. Green Corn Dance, Minnatarree—Sacrificing the first kettle to the Great Spirit.
Painted in 1832 at Minatarree Village, Dak., eight miles from the Mandan Village, on the Missouri River.
(Plate No. 75, page 189, vol. 1, Catlin's Eight Years.)

Four medicine-men, whose bodies are painted with white clay, dance around the kettle until the corn is well boiled; and they then burn it to cinders, as an offering to the Great Spirit. The fire is then destroyed, and *new fire* created by rubbing two sticks together, with which the corn for their own feast is cooked.

I mentioned that I found these people raising abundance of corn or maize; and I have happened to visit them in the season of their festivities, which annually take place when the ears of corn are of the proper size for eating. The green corn is considered a great luxury by all those tribes who cultivate it; and is ready for eating as soon as the ear is of full size, and the kernels are expanded to their full growth,

but are yet soft and pulpy. In this green state of the corn, it is boiled and dealt out in great profusion to the whole tribe, who feast and surfeit upon it whilst it lasts; rendering thanks to the Great Spirit for the return of this joyful season, which they do by making sacrifices, by dancing, and singing songs of thanksgiving. This joyful occasion is one valued alike, and conducted in a similar manner, by most of the tribes who raise the corn, however remote they may be from each other. It lasts but for a week or ten days; being limited to the longest term that the corn remains in this tender and palatable state; during which time all hunting, and all war excursions, and all other avocations, are positively dispensed with; and all join in the most excessive indulgence of gluttony and conviviality that can possibly be conceived. The fields of corn are generally pretty well stripped during this excess, and the poor improvident Indian thanks the Great Spirit for the indulgence he has had, and is satisfied to ripen merely the few ears that are necessary for his next year's planting, without reproaching himself for his wanton lavishness, which has laid waste his fine field, and robbed him of the golden harvest, which might have gladdened his heart, with those of his wife and little children, through the cold and dreariness of winter.

The most remarkable feature of these joyous occasions is the *Green-corn dance*, which is always given as preparatory to the feast, and by most of the tribes in the following manner:

At the usual season, and the time when from outward appearance of the stalks and ears of corn it is supposed to be nearly ready for use, several of the old women who are the owners of fields or patches of corn (for such are the proprietors and cultivators of all crops in Indian countries, the men never turn their hands to such degrading occupations) are delegated by the medicine-men to look at the corn-fields every morning at sun-rise and bring into the council-house, where the kettle is ready, several ears of corn, the husks of which the women are not allowed to break open or even to peep through. The women then are from day to day discharged and the doctors left to decide, until from repeated examinations they come to the decision that it will do; when they dispatch runners or criers, announcing to every part of the village or tribe that the Great Spirit has been kind to them, and they must all meet on the next day to return thanks for his goodness. That all must empty their stomachs and prepare for the feast that is approaching.

On the day appointed by the doctors, the villagers are all assembled, and in the midst of the group a kettle is hung over the fire and filled with the green corn, which is well boiled, to be given to the Great Spirit, as a sacrifice necessary to be made before any one can indulge the cravings of his appetite. Whilst this first kettleful is boiling, four medicine-men, with a stalk of the corn in one hand and a rattle (she-she-quoi) in the other, with their bodies painted with white clay, dance around the kettle, chanting a song of thanksgiving to the Great Spirit to whom the offering is to be made. (Plate 75, No. 446.) At the same time a number of warriors are dancing around in a more extended circle, with stalks of the corn in their hands, and joining also in the song of thanksgiving, whilst the villagers are all assembled and looking on. During this scene there is an arrangement of wooden bowls laid upon the ground, in which the feast is to be dealt out, each one having in it a spoon made of the buffalo or mountain-sheep's horn.

In this wise the dance continues until the doctors decide that the corn is sufficiently boiled; it then stops for a few moments, and again assumes a different form and a different song, whilst the doctors are placing the ears on a little scaffold of little sticks, which they erect immediately over the fire, where it is entirely consumed, as they join again in the dance around it.

The fire is then removed, and with it the ashes, which together are buried in the ground, and new fire is originated on the same spot where the old one was, by friction, which is done by a desperate and painful exertion by three men seated on the ground, facing each other, and violently drilling the end of a stick into a hard block of wood by rolling it between the hands, each one catching it in turn from the others without allowing the motion to stop until smoke, and at last a spark of fire is seen and caught

in a piece of punk, when there is great rejoicing in the crowd. With this a fire is kindled, and the kettleful of corn again boiled for the feast, at which the chiefs, doctors, and warriors are seated; and after this an unlimited license is given to the whole tribe, who surfeit upon it and indulge in all their favorite amusements and excesses until the fields of corn are exhausted, or its ears have become too hard for their comfortable mastication.

Such are the general features of the green corn festivity and dance amongst most of the tribes; and amongst some there are many additional forms and ceremonies gone through preparatory to the indulgence in the feast.

Some of the southern tribes concoct a most bitter and nauseating draught, which they call *asceola* (the black drink), which they drink to excess for several days previous to the feast, ejecting everything from their stomachs and intestines, enabling them, after this excessive and painful purgation, to commence with the green corn upon an empty and keen stomach.—Pages 186, 187, vol. 1, Catlin's Eight Years.

447. Bear Dance, Sioux, preparing for a bear hunt; song to the Great Spirit, praying for success. Painted in 1832.

(Plate No. 102, page 244, vol. 1, Catlin's Eight Years.)

The Sioux, like all the others of these western tribes, are fond of bear's meat, and must have good stores of the bear's grease laid in to oil their long and glossy locks, as well as the surface of their bodies. And they all like the fine pleasure of a bear hunt, and also a participation in the bear dance, which is given several days in succession previous to their starting out, and in which they all join in a song to the Bear Spirit, which they think holds somewhere an invisible existence, and must be consulted and conciliated before they can enter upon their excursion with any prospect of success. For this grotesque and amusing scene one of the chief medicine-men placed over his body the entire skin of a bear, with a war eagle's quill on his head, taking the lead in the dance, and looking through the skin which formed a mask that hung over his face. Many others in the dance wore masks on their faces, made of the skin from the bear's head, and all, with the motions of their hands, closely imitated the movements of that animal, some representing its motion in running and others the peculiar attitude and hanging of the paws when it is sitting up on its hind feet and looking out for the approach of an enemy. This grotesque and amusing masquerade oftentimes is continued at intervals for several days previous to the starting of a party on the bear hunt, who would scarcely count upon a tolerable prospect of success without a strict adherence to this most important and indispensable form.—G. C.

448. Discovery Dance, Sacs and Foxes, a pantomime; pretending to discover game or an enemy. A very picturesque and pleasing dance. Painted in 1836.

(Plate No. 295, page 214, vol. 2, Catlin's Eight Years.)

The *Discovery dance* has been given here amongst various others, and pleased the bystanders very much. It was exceedingly droll and picturesque, and acted out with a great deal of pantomimic effect, without music or any other noise than the patting of their feet, which all came simultaneously on the ground in perfect time, whilst they were dancing forward two or four at a time, in a skulking posture, overlooking the country, and professing to announce the approach of animals or enemies which they have discovered by giving the signals back to the leader of the dance.—G. C.

449. Eagle Dance, Choctaw, holding the eagle's tail in the hand, and bodies painted white. Given in honor of that valiant bird. Painted in 1834, in the Choctaw Nation, Indian Territory.

(Plate No. 227, page 126, vol. 2, Catlin's Eight Years.)

After this exciting day [described in the dances Nos. 427, 428, 429, herein] the concourse was assembled in the vicinity of the agency house, where we had a great va-

(Plate 227, Vol. II, Catlin's Eight Years.)

SLAVE DANCE, SAC AND FOX.

No. 450, page 317.

(Plate 231, Vol. II, Catlin's Eight Years.)

riety of dances and other amusements, the most of which I have described on former occasions. One, however, was new to me, and I must say a few words of it. This was the *Eagle dance*, a very pretty scene, which is got up by their young men in honor of that bird, for which they seem to have a religious regard. This picturesque dance was given by twelve or sixteen men, whose bodies were chiefly naked and painted white with white clay, and each one holding in his hand the tail of the eagle, while his head was also decorated with an eagle's quill (Plate 227, No. 449). Spears were stuck in the ground, around which the dance was performed by four men at a time, who had simultaneously, at the beat of the drum, jumped up from the ground where they had all sat in rows of four, one row immediately behind the other, and ready to take the place of the first four when they left the ground fatigued, which they did by hopping or jumping around behind the rest, and taking their seats, ready to come up again in their turn, after each of the other sets had been through the same forms.

In this dance the steps, or rather jumps, were different from anything I had ever witnessed before, as the dancers were squat down, with their bodies almost to the ground, in a severe and most difficult posture, as will have been seen in the drawing.—G. C.

450. Slave Dance, Sacs and Foxes. A society of young men who volunteer to be slaves for two years, and elect their chief or master; they are then exempt from slavish duties during the remainder of their lives, and are allowed to go on war parties. Painted in 1836.

(Plate No. 291, page 213, vol. 2, Catlin's Eight Years.)

The *Slave dance* is a picturesque scene, and the custom in which it is founded a very curious one. This tribe has a society which they call the *slaves*, composed of a number of the young men of the best families in the tribe, who volunteer to be slaves, for the term of two years, and subject to perform any menial service that the chief may order, no matter how humiliating or how degrading it may be; by which, after serving their two years, they are exempt for the rest of their lives, on war parties or other excursions, or wherever they may be, from all labor or degrading occupations, such as cooking, making fires, &c.

These young men elect one from their numbers to be their master, and all agree to obey his command, whatever it may be, and which is given to him by one of the chiefs of the tribe. On a certain day or season of the year they have to themselves a great feast, and preparatory to it the above-mentioned dance.—G. C.

451. Snow-Shoe Dance, Ojibbeway; danced at the first fall of snow, with snow-shoes on the feet. Painted in 1835, at Fort Snelling, Minn.

(Plate No. 243, page 140, vol. 2, Catlin's Eight Years.)

Song of thanks to the Great Spirit.

Many were the dances given to me on different places, of which I may make further use and further mention on future occasions, but of which I shall name but one at present, the *Snow-shoe dance* (Plate 243), which is exceedingly picturesque, being danced with the snow-shoes under the feet, at the falling of the first snow in the beginning of winter, when they sing a song of thanksgiving to the Great Spirit for sending them a return of snow, when they can run on their snow-shoes in their valued hunts and easily take the game for their food.—G. C.

452. Brave's Dance, Ojibbeway; bragging and boasting. (Painted in 1835. No plate).

453. Pipe Dance, Assineboins. Each dancer is "smoked" by the chief, who sits smoking his pipe, and is then pulled up into the dance.

(Plate No. 32, page 55, vol. 1, Catlin's Eight Years.)

On a hard-trodden pavement in front of their village, which place is used for all their public meetings and many of their amusements, the young men who were to compose the dance had gathered themselves around a small fire, and each one seated on a buffalo robe spread upon the ground. In the center and by the fire was seated a dignitary, who seemed to be a chief (perhaps a doctor or medicine man), with a long pipe in his hand, which he lighted at the fire and smoked incessantly, grunting forth at the same time, in half-strangled gutturals, a sort of song which I did not get translated to my satisfaction, and which might have been susceptible of none. While this was going on another grim-visaged fellow in another part of the group commenced beating on a drum or tambourine, accompanied by his voice; when one of the young men seated sprang instantly to his feet and commenced singing in time with the taps of the drum, and leaping about on one foot and the other in the most violent manner imaginable. In this way he went several times around the circle, bowing and brandishing his fist in the faces of each one who was seated, until at length he grasped one of them by the hands and jerked him forcibly up upon his feet, who joined in the dance for a moment, leaving the one who had pulled him up to continue his steps and his song in the center of the ring whilst he danced around in a similar manner; jerking up another and then joining his companion in the center, leaving the third and fourth, and so on, to drag into the ring, each one his man, until all were upon their feet, and at last joined in the most frightful gesticulations and yells that seemed almost to make the earth quake under our feet. This strange manœuvre, which I did but partially understand, lasted for half or three-quarters of an hour, to the great amusement of the gaping multitude who were assembled around, and broke up with the most piercing yells and barks like those of so many affrightened dogs.—G. C., page 55, vol. 1, Catlin's Eight Years.

454. Straw Dance, Sioux; children made to dance with burning straws tied to their bodies to make them tough and brave. Painted in 1832. (No plate.)

455. Sham Fight, Mandan boys; school of practice every morning at sunrise back of the village; instructed in it by the chiefs and braves. Painted in 1832. (Plate No. 57, page 131, vol. 1, Catlin's Eight Years.)

OTHER MANDAN DANCES AND AMUSEMENTS.

In my last letter I gave an account of the buffalo dance (see No. 440), and in future epistles may give some descriptions of a dozen other kinds of dance, which these people have in common with other tribes; but in the present letter I shall make an endeavor to confine my observations to several other customs and forms, which are very curious and peculiar to the Mandans.

Of these, one of the most pleasing is the *Sham fight* and sham scalp-dance of the Mandan boys, which is a part of their regular exercise, and constitutes a material branch of their education. During the pleasant mornings of the summer the little boys between the age of seven and fifteen are called out to the number of several hundred, and being divided into two companies, each of which is headed by some experienced warrior, who leads them on in the character of teacher. They are led out into the prairie at sunrise, when this curious discipline is regularly taught them. Their bodies are naked, and each one has a little bow in his left hand, and a number of arrows made of large spears of grass, which are harmless in their effects. Each one has also a little belt or girdle around his waist, in which he carries a knife made of a piece of wood and equally harmless; on the tops of their heads are slightly attached small tufts of grass, which answer as scalps, and in this plight they follow the dictates of their experienced leaders, who lead them through the judicious evolutions of Indian warfare; of feints, of retreats, of attacks, and at last to a general fight. Many manœuvres are gone through, and eventually they are brought up face to face, within 15 or 20 feet of each other, with their leaders at their head stimulat-

SHAM FIGHT BY MANDAN BOYS.

No. 455, page 318.

(Plate 57, Vol. I, Catlin's Eight Years.)

ing them on. Their bows are bent upon each other and their missiles flying, whilst they are dodging and fending them off.

If any one is struck with an arrow on any vital part of his body, he is obliged to fall, and his adversary rushes up to him, places his foot upon him, and snatching from his belt his wooden knife, grasps hold of his victim's scalp-lock of grass, and making a feint at it with his wooden knife, twitches it off and puts it into his belt, and enters again into the ranks and front of battle.

This mode of training generally lasts an hour or more in the morning, and is performed on an empty stomach, affording them a rigid and wholesome exercise, whilst they are instructed in the important science of war. Some five or six miles of ground are run over during these evolutions, giving suppleness to their limbs and strength to their muscles, which last and benefit them through life.

After this exciting exhibition is ended, they all return to their village, where the chiefs and braves pay profound attention to their vaunting, and applaud them for their artifice and valor.—G. C.

456. Sham Scalp Dance; by the Mandan boys, danced in the village when they come in (from the Sham Fight No. 455 above), in honor of a sham victory.

Painted in 1832, at Mandan village. (No plate.)

Those who have taken scalps (No. 455) then step forward, brandishing them and making their boast as they enter into the Scalp dance (in which they are also instructed by their leaders or teachers), jumping and yelling, brandishing their scalps, and reciting their sanguinary deeds, to the great astonishment of their tender-aged sweethearts who are gazing with wonder upon them.

457. War Dance of the Sioux. (Painted in 1832. No plate.)

Each warrior, in turn, jumps through the fire, and then advances shouting and boasting, and taking his oath, as he "strikes the reddened post."

458. Foot War Party in Council, Mandan. Stopping to rest and take a smoke; chief with a war-eagle head-dress on; their shields and weapons lying on the ground behind them. Painted in 1832.

(Plate No. 63, page 143, vol. 1, Catlin's Eight Years.)

Mandan village, summer of 1832.—Many have been the amusements of this day to which I have been an eye-witness; I have learned the cause of this unusual expression of hilarity and mirth, which was no more nor less than the safe return of a small war party, who had been so long out without any tidings having been received of them that they had long since been looked upon as sacrificed to the fates of war and lost. This party was made up of the most distinguished and desperate young men of the tribe, who had sallied out against the Riccarees, and taken the most solemn oath among themselves never to return without achieving a victory. They had wandered long and faithfully about the country, following the trails of their enemy; when they were attacked by a numerous party and lost several of their men and all their horses. In this condition, to evade the scrutiny of their enemy, who were closely investing the natural route to their village, they took a circuitous range of the country to enable them to return with their lives to their village.

In this plight, it seems, I had dropped my little canoe alongside of them, while descending from the mouth of Yellowstone to this place, not many weeks since, where they had bivouacked or halted to smoke and consult on the best and safest mode of procedure. At the time of meeting them, not knowing anything of their language, they were unable to communicate their condition to me, and more probably were afraid to do so even if they could have done it, from apprehension that we might have given some account of them to their enemies. I rested my canoe an hour or so with them, during which time they treated us with an indifferent reserve, yet respectfully,

and we passed on our way without further information of them or their plans than the sketch that I there made (Plate 63), and which I shall preserve and value as one of the most pleasing groups I ever had the pleasure to see. Seated on their buffalo robes, which were spread upon the grass, with their respective weapons lying about them, and lighting their pipes at a little fire which was kindled in the center, the chief or leader of the party, with his arms stacked behind him and his long head-dress of war-eagles' quills and ermine falling down over his back, whilst he sat in a contemplative and almost desponding mood, was surely one of the most striking and beautiful illustrations of a natural hero that I ever looked upon.

These gallant fellows got safely home to their village, and the numerous expressions of joy for their return which I have this day witnessed have so much fatigued me that I write brief, and close my letter here.—G. C.

459. Camanchee War Party; the chief discovering the enemy and urging on his men, at sunrise. Painted in 1834. (No plate.)

460. Religious ceremony. A Sioux, with splints through his flesh, and his body hanging to a pole, with his medicine-bag in his hand, looks at the sun from its rising to its setting. A voluntary cruel self-torture, which entitles him to great respect for the remainder of his life as a *medicine* or *mystery man*. Painted in 1832 at Sioux camp, mouth of Teton River.

(Plate No. 97, page 232, vol. 1, Catlin's Eight Years.)

Another curious and disgusting scene I witnessed in the after part of the day on which we were honored with the dog feast. In this I took no part, but was sufficiently near to it, when standing some rods off, and witnessing the cruel operation. I was called upon by one of the clerks in the establishment to ride up a mile or so, near the banks of the Teton River, in a little plain at the base of the bluffs, where were grouped some fifteen or twenty lodges of the *Tiny-ta-to-ah* band, to see a man (as they said) looking at the sun. We found him naked, except his breech-cloth, with splints or skewers run through the flesh on both breasts, leaning back and hanging with the weight of his body to the top of a pole which was fastened in the ground, and to the upper end of which he was fastened by a cord which was tied to the splints. In this position he was leaning back, with nearly the whole weight of his body hanging to the pole, the top of which was bent forward, allowing his body to sink about half way to the ground (Plate No. 460). His feet were still upon the ground, supporting a small part of his weight; and he held in his left hand his favorite bow, and in his right, with a desperate grip, his medicine-bag. In this condition, with the blood trickling down over his body, which was covered with white and yellow clay, and amidst a great crowd who were looking on, sympathizing with and encouraging him, he was hanging, and looking at the sun, without paying the least attention to any one about him. In the group that was reclining around him were several *mystery-men*, beating their drums and shaking their rattles, and singing as loud as they could yell, to encourage him and strengthen his heart to stand and look at the sun from its rising in the morning till its setting at night; at which time, if his heart and strength have not failed him, he is cut down, receives the liberal donation of presents (which have been thrown into a pile before him during the day), and also the name and the style of a doctor or *medicine-man*, which lasts him and insures him respect through life.

This most extraordinary and cruel custom I never heard of amongst any other tribe, and never saw an instance of it before or after the one I have just named. It is a sort of worship or penance of great cruelty; disgusting and painful to behold, with only one palliating circumstance about it, which is, that it is a voluntary torture and of very rare occurrence. The poor and ignorant, misguided, and superstitious man who undertakes it puts his everlasting reputation at stake upon the issue,

for when he takes his stand he expects to face the sun, and gradually turn his body in listless silence till he sees it go down at night; and if he faints and falls, of which there is imminent danger, he loses his reputation as a brave or mystery man, and suffers a signal disgrace in the estimation of the tribe, like all men who have the presumption to set themselves up for brave or mystery men and fail justly to sustain the character.—G. C.

461. Dragoons on the march, and a band of buffalo breaking through their ranks.

Painted in 1834, on march of First Dragoons, Colonel Dodge, on the Washita.

(Plate No. 158, page 57, vol. 2, Catlin's Eight Years.)

During this march over one of the most lovely and picturesque countries in the world [from Fort Gibson to base of Rocky Mountains, 1834] we had enough continually to amuse and excite us. The whole country seemed at times to be alive with buffaloes and bands of wild horses.

We had with us about thirty Osage and Cherokee, Seneca and Delaware Indians, employed as guides and hunters for the regiment; and with the war party of ninety or a hundred Camanches we formed a most picturesque appearance while passing over the green fields, and consequently caused sad havoc amongst the herds of buffaloes, which we were almost hourly passing. We were now out of the influence and reach of breadstuffs and subsisted ourselves on buffalo's meat altogether; and the Indians of the different tribes, emulous to show their skill in the chase, and prove the mettle of their horses, took infinite pleasure in dashing into every herd that we approached; by which means the regiment was abundantly supplied from day to day with fresh meat.

In one of those spirited scenes when the regiment were on the march, and the Indians with their bows and arrows were closely plying a band of these affrighted animals, they made a bolt through the line of the dragoons, and a complete breach, through which the whole herd passed, upsetting horses and riders in the most amusing manner (No. 461) and receiving such shots as came from those guns and pistols that were aimed and not fired off into the empty air.—G. C.

462. Prairie Dog Village.—Myriads of the curious little animals sometimes are found in one village, which will extend several miles. The animals are about twice the size of a rat, and not unlike it in appearance and many of their habits. They dig holes in the ground, and the dirt which is thrown up makes a little mound, on which they sit and bark when danger approaches. They feed upon the grass, which is their only food. Painted on voyage to Upper Missouri, 1832.

(Plate No. 42, page 76, vol. 1, Catlin's Eight Years.)

On Sunday departed from our encampment in the Grand Détour, and, having passed for many miles through a series of winding and ever-varying bluffs and fancied ruins, like such as has already been described, our attention was more than usually excited by the stupendous scene called by the voyagers "the Grand Dome," which was lying in full view before us.

Our canoe was here hauled ashore, and a day whiled away again among these clay-built ruins.

We clambered to their summits and enjoyed the distant view of the Missouri for many miles below wending its way through the countless groups of clay and grass-covered hills, and we wandered back on the plains in a toilsome and unsuccessful pursuit of a herd of buffaloes, which we discovered at some distance. Though we were disappointed in the results of the chase, yet we were in a measure repaid in amusements, which we found in paying a visit to an extensive village of prairie dogs, and of which I should render some account. * * *

Their habits are one and the same wherever found; their houses or burrows

are all alike, and their location is uniformly on a level or desolate prairie without timber. * * *

The prairie dog of the American prairies is undoubtedly a variety of the marmot, and probably not unlike those which inhabit the vast steppes of Asia. It bears no resemblance to any variety of dogs, except in the sound of its voice, when excited by the approach of danger, which is something like that of a very small dog, and still much more resembling the barking of a gray squirrel.

The size of these curious little animals is not far from that of a very large rat, and they are not unlike in their appearance. As I have said, their burrows are uniformly built in a lonely desert, and away both from the proximity of timber and water. Each individual, or each family, dig their hole in the prairie to the depth of 8 or 10 feet, throwing up the dirt from each excavation in a little pile in the form of a cone, which forms the only elevation for them to ascend, where they sit to bark and chatter when an enemy is approaching their village. These villages are sometimes of several miles in extent, containing (I would almost say) myriads of their excavations and little dirt hillocks, and to the ears of their visitors the din of their barkings is too confused and too peculiar to be described.

In the present instance we made many endeavors to shoot them, but found our efforts to be entirely in vain. As we were approaching them at a distance, each one seemed to be perched up on his hind feet on his appropriate domicile, with a significant jerk of his tail at every bark, positively disputing our right of approach. I made several attempts to get near enough to "draw a bead" upon one of them, and just before I was ready to fire (and as if they knew the utmost limits of their safety) they sprang down into their holes, and, instantly turning their bodies, showed their ears and the ends of their noses as they were peeping out at me, which position they would hold until the shortness of the distance subjected their scalps to danger again from the aim of a rifle, when they instantly disappeared from our sight, and all was silence thereafter about their premises as I passed them over, until I had so far advanced by them that their ears were again discovered, and at length themselves, at full length, perched on the tops of their little hillocks and threatening as before, thus gradually sinking and rising like a wave before and behind me.

The holes leading down to their burrows are 4 or 5 inches in diameter, and run down nearly perpendicular, where they undoubtedly communicate into something like a subterraneous city (as I have formerly learned from fruitless endeavors to dig them out), undermined and vaulted, by which means they can travel for a great distance under the ground without danger from pursuit.

Their food is simply the grass in the immediate vicinity of their burrows, which is cut close to the ground by their flat, shovel teeth, and, as they sometimes live 20 miles from any water, it is to be supposed that they get moisture enough from the dew on the grass, on which they feed chiefly at night, or that (as is generally supposed) they sink wells from their underground habitations, by which they descend low enough to get their supply. In the winter they are for several months invisible, existing undoubtedly in a torpid state, as they certainly lay by no food for that season, nor can they procure any. These curious little animals belong to almost every latitude in the vast plains of prairie in North America, and their villages, which I have sometimes encountered in my travels, have compelled my party to ride several miles out of our way to get by them, for their burrows are generally within a few feet of each other, and dangerous to the feet and the limbs of our horses.

463. Smoking Horses, a curious custom of the Sacs and Foxes. Foxes going to war come to the Sacks to beg for horses; they sit in a circle and smoke, and the young men ride around them and cut their shoulders with their whips until the blood runs, then dismount and present a horse. Painted in 1836, at Rock Island.

(Plate No. 292, page 213, vol. 2, Catlin's Eight Years.)

"SMOKING HORSES" BY SAC AND FOX INDIANS, 1838.

No. 463, page 322.

(Plate 292, Vol. II, Catlin's Eight Years.)

Smoking horses (Plate 292, No. 463) is another of the peculiar and very curious customs of this tribe. When General Street and I arrived at Kee-o-kuk's village we were just in time to see this amusing scene on the prairie a little back of his village. The Foxes, who were making up a war-party to go against the Sioux, and had not suitable horses enough by twenty, had sent word to the Sacs the day before (according to an ancient custom) that they were coming on that day, at a certain hour, to *smoke* that number of horses, and they must not fail to have them ready. On that day and at the hour the twenty young men who were beggars for horses were on the spot, and seated themselves on the ground in a circle, where they went to smoking. The villagers flocked around them in a dense crowd, and soon after appeared on the prairie, at half a mile distance, an equal number of young men of the Sac tribe, who had agreed each to give a horse, and who were then galloping them about at full speed, and gradually, as they went around in a circuit, coming in nearer to the center, until they were at last close around the ring of young fellows seated on the ground. Whilst dashing about thus, each one, with a heavy whip in his hand, as he came within reach of the group on the ground, selected the one to whom he decided to present his horse, and, as he passed him, gave him the most tremendous cut with his lash over his naked shoulders; and as he darted around again he plied the whip as before, and again and again with a violent crack, until the blood could be seen trickling down over his naked shoulders, upon which he instantly dismounted and placed the bridle and whip in his hands, saying, "Here, you are a beggar; I present you a horse, but you will carry my mark on your back." In this manner they were all in a little time whipped up, and each had a good horse to ride home and into battle. His necessity was such that he could afford to take the stripes and the scars as the price of the horse, and the giver could afford to make the present for the satisfaction of putting his mark upon the other, and of boasting of his liberality, which he has always a right to do when going into the dance, or on other important occasions.—G. C.

464. Mandans Attacking a Party of Riccarees, whom they had driven into a ravine near the Mandan village, where they killed the whole number. Painted in 1832. (No plate.)

The Mandans and Riccarees were almost constantly at war prior to 1862.

465. Chippeways Making the Portage around the Falls of Saint Anthony, with two hundred bark canoes, in 1835. Painted in 1832.

(Plate No. 239, page 138, vol. 2, Catlin's Eight Years.)

After the business and amusements of this great treaty between the Chippeways and Sioux were all over, the Chippeways struck their tents by taking them down and rolling up their bark coverings, which, with their bark canoes, turned up amongst their wigwams, were carried to the water's edge, and all things being packed in, men, women, dogs, and all were swiftly propelled by paddles to the Falls of Saint Anthony, where we had repaired to witness their mode of passing the cataract by *making* (as it is called) *the portage*, which we found to be a very curious scene, and was done by running all their canoes into an eddy below the fall, as near as they could get by paddling, when all were landed and everything taken out of the canoes (Plate 234, No. 465), and, with them, carried by the women around the fall and half a mile or so above, where the canoes were put into the water again; and goods and chattels being loaded in, and all hands seated, the paddles were again put to work, and the light and bounding crafts proceeded upon their voyage.—G. C., 1835.

466. Camanchees Moving (at Great Comanche Village), and **Dog Fight**; dogs, as well as horses, drag the lodge-poles with packs upon them. Painted in 1834, when with First Dragoons.

(Plate No. 166, page 66, vol. 2, Catlin's Eight Years.)

These fights generally begin with the dogs, and end in desperate battles amongst the squaws, to the great amusement of the men.

In speaking, just above, of the mode of moving their wigwams and changing their encampments, I should have said a little more, and should also have given to the reader a sketch of one of these extraordinary scenes which I have had the good luck to witness (Plate 166, No. 466) when several thousands were on the march, and furnishing one of those laughable scenes which daily happen where so many dogs and so many squaws are traveling in such a confused mass, with so many conflicting interests and so many local and individual rights to be pertinaciously claimed and protected. Each horse drags his load, and each dog, *i. e.*, each dog that will do it (and there are many that will not), also dragging his wallet on a couple of poles, and each squaw with her load, and all together (notwithstanding their burdens) cherishing their pugnacious feelings, which often bring them into general conflict, commencing usually amongst the dogs, and sure to result in fisticuffs of the women; whilst the men, riding leisurely on the right or the left, take infinite pleasure in overlooking these desperate conflicts, at which they are sure to have a laugh, and in which as sure never to lend a hand.—G. C.

467. White Wolves attacking a buffalo bull.

(Plate 113, page 257, vol. 1, Catlin's Eight Years.)

468. White Wolves; a parley. Painted in 1832.

(Plate No. 114, page 258, vol. 1, Catlin's Eight Years.)

Red men and white have aimed destruction at the race of these animals (buffaloes), and with them beasts have turned hunters of buffaloes in this country, slaying them, however, in less numbers and for far more laudable purpose than that of selling their skins. The white wolves, of which I have spoken in a former epistle, follow the herds of buffaloes, as I have said, from one season to another, glutting themselves on the carcasses of those that fall by the deadly shafts of their enemies, or linger with disease or old age to be dispatched by these sneaking cormorants, who are ready at all times kindly to relieve them from the pangs of a lingering death.

Whilst the herd is together the wolves never attack them, as they instantly gather for combined resistance, which they effectually make. But when the herds are traveling it often happens that an aged or wounded one lingers at a distance behind, and when fairly out of sight of the herd is set upon by these voracious hunters, which often gather to the number of fifty or more, and are sure at last to torture him to death and use him up at a meal. The buffalo, however, is a huge and furious animal, and when his retreat is cut off makes desperate and deadly resistance, contending to the last moment for the right of life, and oftentimes deals death by wholesale to his canine assailants, which he is tossing into the air or stamping to death under his feet (Plate 113, No. 467).

During my travels in these regions I have several times come across such a gang of these animals surrounding an old or a wounded bull, where it would seem from appearances that they had been for several days in attendance, and at intervals desperately engaged in the effort to take his life. But a short time since, as one of my hunting companions and myself were returning to our encampment with our horses loaded with meat, we discovered at a distance a huge bull encircled with a gang of white wolves. We rode up as near as we could without driving them away, and being within pistol shot we had a remarkably good view, where I sat for a few moments and made a sketch in my note-book (Plate 114, No. 468); after which we rode up and gave the signal for them to disperse, which they instantly did, withdrawing themselves to the distance of fifty or sixty rods, when we found, to our great surprise, that the animal had made desperate resistance until his eyes were entirely eaten out of his head, the grizzle of his nose was mostly gone, his tongue was half eaten off, and the skin and flesh of his legs torn almost literally into strings. In this tattered

and torn condition the poor old veteran stood bracing up in the midst of his devourers, who had ceased hostilities for a few minutes to enjoy a sort of parley, recovering strength and preparing to resume the attack in a few moments again. In this group some were reclining to gain breath, whilst others were sneaking about and licking their chaps in anxiety for a renewal of the attack, and others, less lucky, had been crushed to death by the feet or the horns of the bull. I rode nearer to the pitiable object as he stood bleeding and trembling before me, and said to him, "Now is your time, old fellow, and you had better be off." Though blind and nearly destroyed, there seemed evidently to be a recognition of a friend in me, as he straightened up, and, trembling with excitement, dashed off at full speed upon the prairie in a straight line. We turned our horses and resumed our march, and when we had advanced a mile or more we looked back and on our left, where we saw again the ill-fated animal surrounded by his tormentors, to whose insatiable voracity he unquestionably soon fell a victim.

(See also Nos. 404 to 426, herein, for other buffalo-hunting and sporting scenes.)

469. My Horse Charley and I, at sunrise, near the Neosho, on an extensive prairie, encamping on the grass, my saddle for a pillow, two buffalo skins for my bed, my gun in my arms, a coffee-pot and a tin cup, a fire made of buffalo dung (chips), and Charley, a Camanchee claybank (yellow) mustang picketed near me. With him alone I crossed the prairie from Fort Gibson, on the Arkansas, to Saint Louis, 550 miles. Painted in 1834-'35.

(Plate No. 184, page 89, vol. 2, Catlin's Eight Years.)

This horse Mr. Catlin rode during the entire summer of 1834 on his journey with the First Dragoons. (See "Itinerary, 1834.") He left Fort Gibson in October, 1834, for the journey above noted, after a severe illness—a fever.

So, alone, without other living being with me than my affectionate horse Charley, I turned my face to the north and commenced on my long journey, with confidence full and strong that I should gain strength daily; and no one can ever know the pleasure of that moment, which placed me alone upon the boundless sea of waving grass over which my proud horse was prancing, and I, with my life in my own hands, commenced to steer my course to the banks of the Missouri.

For the convalescent rising and escaping from the gloom and horrors of a sick bed, astride of his strong and trembling horse, carrying him fast and safely over green fields spotted and tinted with waving wild flowers, and through the fresh and cool breezes that are rushing about him as he daily shortens the distance that lies between him and his wife and little ones, there is an exquisite pleasure yet to be learned by those who never have felt it.

Day by day I thus pranced and galloped along the whole way through waving grass and green fields, occasionally dismounting and lying in the grass an hour or so, until the grim shaking and chattering of an ague chill had passed off, and through the nights slept on my bear-skin spread upon the grass, with my saddle for my pillow and my buffalo robe drawn over me for my covering. My horse Charley was picketed near me at the end of his lasso, which gave him room for his grazing, and thus we snored and nodded away the nights, and never were denied the doleful serenades of the gangs of sneaking wolves that were nightly perambulating our little encampment and stationed at a safe distance from us at sunrise in the morning, gazing at us and impatient to pick up the crumbs and bones that were left when we moved away from our feeble fire that had faintly flickered through the night, and in the absence of timber had been made of dried buffalo dung (or chips). (Plate 189, No. 469.)

This Charley was a noble animal, of the Camanchee wild breed, of claybank color, and from our long and tried acquaintance we had become very much attached to each other and acquired a wonderful facility both of mutual accommodation and of construing each other's views and intentions. In fact, we had been so long tried together that there would have seemed to the spectator almost an unity of interest, and, at all events, an unity of feeling on the subject of attachment, as well as on that of mutual dependence and protection.

I purchased this very showy and well-known animal of Colonel Burbank, of the Ninth Regiment, and rode it the whole distance to the Camanchee villages and back again, and at the time when most of the horses of the regiment were drooping and giving out by the way Charley flourished and came in in good flesh and good spirits.

On this journey, while he and I were twenty-five days alone, we had much time and the best of circumstances under which to learn what we had as yet overlooked in each other's characters, as well as to draw great pleasure and real benefit from what we already had learned of each other in our former travels.

I generally halted on the bank of some little stream at half an hour's sun, where feed was good for Charley and where I could get wood to kindle my fire and water for my coffee. The first thing was to undress Charley and drive down his picket, to which he was fastened, to graze over a circle that he could inscribe at the end of his lasso. In this wise he busily fed himself until nightfall, and after my coffee was made and drank I uniformly moved him up, with his picket by my head, so that I could lay my hand upon his lasso in an instant in case of any alarm that was liable to drive him from me. One of these evenings when he was grazing as usual he slipped the lasso over his head and deliberately took his supper at his pleasure wherever he chose to prefer it as he was strolling around. When night approached I took the lasso in my hand and endeavored to catch him, but I soon saw that he was determined to enjoy a little freedom, and he continually evaded me until dark, when I abandoned the pursuit, making up my mind that I should inevitably lose him and be obliged to perform the rest of my journey on foot. He had led me a chase of half a mile or more, when I left him busily grazing and returned to my little solitary bivouac and laid myself on my bear-skin and went to sleep.

In the middle of the night I waked whilst I was lying on my back, and on half opening my eyes I was instantly shocked to the soul by the huge figure (as I thought) of an Indian standing over me and in the very instant of taking my scalp! The chill of horror that paralyzed me for the first moment held me still till I saw there was no need of my moving—that my faithful horse Charley had played shy till he had filled his belly, and had then moved up, from feelings of pure affection or from instinctive fear, or possibly from a due share of both, and taken his position with his forefeet on the edge of my bed, with his head hanging directly over me, while he was standing fast asleep!

My nerves, which had been most violently shocked, were soon quieted, and I fell asleep, and so continued until sunrise in the morning, when I waked and beheld my faithful servant at some considerable distance busily at work picking up his breakfast amongst the canebrake along the bank of the creek. I went as busily to work preparing my own, which was eaten, and after it I had another half hour of fruitless endeavors to catch Charley, whilst he seemed mindful of success on the evening before and continually tantalized me by turning around and around and keeping out of my reach. I recollected the conclusive evidence of his attachment and dependence which he had voluntarily given in the night, and I thought I would try them in another way. So I packed up my things and slung the saddle on my back, trailing my gun in my hand, and started on my route. After I had advanced a quarter of a mile I looked back and saw him standing with his head and tail very high, looking alternately at me and at the spot where I had been encamped and left a little fire burning. In this condition he stood and surveyed the prairies around for a while as I continued on. He at length walked with a hurried step to the spot, and seeing

everything gone began to neigh very violently, and at last started off at fullest speed and overtook me, passing within a few paces of me and wheeling about at a few rods' distance in front of me, trembling like an aspen leaf.

I called him by his familiar name, and walked up to him with the bridle in my hand, which I put over his head as he held it down for me, and the saddle on his back, as he actually stooped to receive it. I was soon arranged and on his back, when he started off upon his course as if he was well contented and pleased, like his rider, with the manœuver which had brought us together again and afforded us mutual relief from our awkward positions. Though this alarming freak of Charley's passed off and terminated so satisfactorily, yet I thought such rather dangerous ones to play, and I took good care after that night to keep him under my strict authority, resolving to avoid further tricks and experiments till we got to the land of cultivated fields and steady habits.

On the night of this memorable day Charley and I stopped in one of the most lovely little valleys I ever saw, and, even far more beautiful than could have been imagined by mortal man—an enchanting little lawn of five or six acres, on the banks of a cool and rippling stream that was alive with fish, and every now and then a fine brood of young ducks, just old enough for delicious food and too unsophisticated to avoid an easy and simple death. This little lawn was surrounded by bunches and copses of the most luxuriant and picturesque foliage, consisting of the lofty *bois d'arc*s and elms, spreading out their huge branches as if offering protection to the rounded groups of cherry and plum trees that supported festoons of grape-vines, with their purple clusters, that hung in the most tempting manner over the green carpet that was everywhere decked out with wild flowers of all tints and of various sizes, from the modest wild sunflowers, with their thousand tall and drooping heads, to the lilies that stood and the violets that crept beneath them. By the side of this cool stream Charley was fastened, and near him my bear-skin was spread in the grass, and by it my little fire, to which I soon brought a fine string of perch from the brook; from which, and a broiled duck, and a delicious cup of coffee I made my dinner and supper, which were usually united in one meal at half an hour's sun. After this I strolled about this sweet little paradise, which I found was chosen not only by myself but by the wild deer, which were repeatedly rising from their quiet lairs and bounding out and over the graceful swells of the prairies which hemmed in and framed this little picture of sweetest tints and most masterly touches.

The Indians also, I found, had loved it once, and left it; for here and there were their solitary and deserted graves, which told, though briefly, of former haunts and sports and perhaps of wars and deaths that have once rung and echoed through this little silent vale.—G. C.

Mr. Catlin and Charley reached Saint Louis safely in November, 1834, where Charley was sold.

470. Sioux Worshipping at the Red Boulders; a large boulder and two small ones, bearing some resemblance to a buffalo cow and two calves, painted red by the Indians, and regarded by them with superstitious reverence, near the Coteau des Prairies. Painted in 1836.

(See also Nos. 337 and 336, herein.)

471. Camanchee (Comanche) Warrior Lancing an Osage, at full speed. Painted in 1834, while on First Dragoon tour. (No plate.)

472. Camanches giving the Arrows to the Medicine Rock. Painted in 1834, at Great Comanche Village.

(No plate.)

A curious superstition of the Camanches: Going to war, they have no faith in their success, unless they pass a celebrated painted rock, where they appease the spirit of

war (who resides there), by riding by it at full gallop, and sacrificing their best arrow by throwing it against the side of the ledge.

473. Bâtiste, Bogard, and I, approaching Buffalo, on the Missouri (coming down).
Painted in 1832. (Plate No. 125, page 13, vol. 2, Catlin's Eight Years.)

We met immense numbers of buffaloes in the early part of our voyage, and used to land our canoe almost every hour in the day, and oftentimes all together approach the unsuspecting herds, through some deep and hidden ravine within a few rods of them, and, at the word "pull tigger," each of us bring down our victim.—G. C.

474. Wi-jun-jon, the Pigeon's Egg Head. An Assineboin chief, going to and returning from Washington. Painted in 1832, on Upper Missouri.

(Plates Nos. 271, 272, page 196, vol. 2, Catlin's Eight Years.)

(See also No. 179.)

This man was taken to Washington City in 1831 in a beautiful Indian dress by Major Sanford, the Indian agent, and returned to his country the next spring, 1833, in a colonel's uniform. He lectured a while to his people on the customs of the whites, when he was denounced by them for telling lies, which he had learned of the whites, and was by his own people put to death at the mouth of the Yellowstone. Major Sanford and his Indians, including Wi-jun-Jon, were fellow-passengers on the steamer Yellowstone, in 1832, to the Upper Missouri.

THE STORY OF WI-JUN-JON.*

"Wi-jun-jon (the Pigeon's Egg Head) was a brave and a warrior of the Assineboines, young, proud, handsome, valiant, and graceful. He had fought many a battle and won many a laurel. The numerous scalps from his enemies' heads adorned his dress, and his claims were fair and just for the highest honors that his country could bestow upon him, for his father was chief of the nation.

"*Le même! de same—mon frère—mon ami! Bien, I am composé; go on, monsieur.*"

"Well, this young Assineboin, the 'Pigeon's Egg Head,' was selected by Major Sanford, the Indian agent, to represent his tribe in a delegation which visited Washington City under his charge in the winter of 1831-'32. With this gentleman, the Assineboin, together with representatives from several others of those Northwestern tribes, descended the Missouri River several thousand miles on their way to Washington.

"While descending the river in a Mackinaw boat from the mouth of Yellowstone, Wi-jun-jon and another of his tribe who was with him, at the first approach to the civilized settlements, commenced a register of the white men's houses (or cabins) by cutting a notch for each on the side of a pipe-stem, in order to be able to show when they got home how many white men's houses they saw on their journey. At first the cabins were scarce; but continually as they advanced down the river more and more rapidly increased in numbers, and they soon found their pipe-stem filled with marks, and they determined to put the rest of them on the handle of a war-club, which they soon got marked all over likewise; and at length, while the boat was moored at the shore for the purpose of cooking the dinner of the party, Wi-jun-jon and his companion stepped into the bushes and cut a long stick, from which they peeled the bark; and when the boat was again under way they sat down and with much labor copied the notches onto it from the pipe-stem and club, and also kept adding a notch for every house they passed. This stick was soon filled, and in a day or two several others, when at last they seemed much at a loss to know what to do with their troublesome records, until they came in sight of Saint Louis, which is a town of fifteen thou-

WIJUN-JON, GOING TO AND RETURNING FROM WASHINGTON, 1832.

An Assinaboine chief. No. 474, page 328.
(Plates 271, 272, Vol. II, Catlin's Eight Years.)

sand inhabitants, upon which, after consulting a little, they pitched their sticks overboard into the river.

"I was in Saint Louis at the time of their arrival, and painted their portraits while they rested in that place. Wi-jun-jon was the first, who reluctantly yielded to the solicitations of the Indian agent and myself and appeared as sullen as death in my painting-room, with eyes fixed like those of a statue upon me, though his pride had plumed and tinted him in all the freshness and brilliancy of an Indian's toilet. In his nature's uncowering pride he stood a perfect model, but superstition had hung a lingering curve upon his lip, and pride had stiffened it into contempt. He had been urged into a measure against which his fears had pleaded, yet he stood unmoved and unflinching amid the struggles of mysteries that were hovering about him, foreboding ills of every kind and misfortunes that were to happen to him in consequence of this operation.

"He was dressed in his native costume, which was classic and exceedingly beautiful (Plate 271); his leggings and shirt were of the mountain-goat skin, richly garnished with quills of the porcupine and fringed with locks of scalps taken from his enemies' heads. Over these floated his long hair in plaits that fell nearly to the ground; his head was decked with the war-eagle's plumes, his robe was of the skin of the young buffalo bull, richly garnished and emblazoned with the battles of his life; his quiver and bow were slung, and his shield of the skin of the bull's neck.

"I painted him in this beautiful dress, and so also the others who were with him; and after I had done, Major Sanford went on to Washington with them, where they spent the winter.

"Wi-jun-jon was the foremost on all occasions—the first to enter the levee, the first to shake the President's hand and make his speech to him, the last to extend the hand to them, but the first to catch the smiles and admiration of the gentler sex. He traveled the giddy maze and beheld among the buzzing din of civil life their tricks of art, their handiworks, and their finery. He visited their principal cities; he saw their forts, their ships, their great guns, steamboats, balloons, &c., and in the spring returned to Saint Louis, where I joined him and his companions on their way back to their own country.

"Through the politeness of Mr. Chouteau, of the American Fur Company, I was admitted (the only passenger except Major Sanford and his Indians) to a passage in their steamboat on her first trip to the Yellowstone; and when I had embarked and the boat was about to depart, Wi-jun-jon made his appearance on deck in a full suit of regimentals! He had in Washington exchanged his beautifully garnished and classic costume for a full dress *en militaire* (see Plate 272). It was, perhaps, presented to him by the President. It was broadcloth of the finest blue, trimmed with lace of gold. On his shoulders were mounted two immense epaulettes; his neck was strangled with a shining black stock, and his feet were pinioned in a pair of waterproof boots with high heels, which made him 'step like a yoked hog.'

"'Ha-ha-hagh (pardon, Monsieur Cataline, for I am almost laugh)—well, he was a fine gentleman, ha?'

"On his head was a high-crowned beaver hat, with a broad silver lace band, surmounted by a huge red feather, some two feet high; his coat collar, stiff with lace, came higher up than his ears, and over it flowed, down towards his haunches, his long Indian locks, stuck up in rolls and plaits, with red paint.

"'Ha-ha-hagh-agh-ah.'

"Hold your tongue, Ba'tiste.

"'Well, go on—go on.'

"A large silver medal was suspended from his neck by a blue ribbon, and across his right shoulder passed a wide belt, supporting by his side a broadsword.

"'Diable!'

"On his hands he had drawn a pair of white kid gloves, and in them held, a blue umbrella in one, and a large fan in the other. In this fashion was poor Wi-jun-jon

metamorphosed, on his return from Washington; and, in this plight was he strutting and whistling Yankee Doodle, about the deck of the steamer that was wending its way up the mighty Missouri, and taking him to his native land again, where he was soon to light his pipe and cheer the wigwam fireside with tales of novelty and wonder.

"Well, Ba'tiste, I traveled with this new-fangled gentleman until he reached his home, two thousand miles above Saint Louis, and I could never look upon him for a moment without excessive laughter at the ridiculous figure he cut—the strides, the angles, the stiffness of this traveling beau! Oh, Ba'tiste, if you could have seen him you would have split your sides with laughter; he was 'puss in boots,' precisely!

"By gar, he is good compare! Ha-ha, monsieur: (pardón) I am laugh; I am see him w'en he is arrive in Yellowstone; you know I was dere. I am laugh much w'en he is got off de boat, and all de Assineboines was dere to look. Oh, diable! I am laugh almost to die; I am split!—suppose he was pretty stiff, ha?—'cob on spindle,' ha? Oh, by gar, he is coot pour laugh—pour rire?"

"After Wi-jun-jon had got home, and passed the usual salutations among his friends, he commenced the simple narration of scenes he had passed through, and of things he had beheld among the whites; which appeared to them so much like fiction that it was impossible to believe them, and they set him down as an impostor. 'He has been 'they said' among the whites, who are great liars, and all he has learned is to come home and tell lies.' He sank rapidly into disgrace in his tribe; his high claims to political eminence all vanished; he was reputed worthless—the greatest liar of his nation; the chiefs shunned him and passed him by as one of the tribe who was lost; yet the ears of the gossiping portion of the tribe were open, and the camp-fire circle and the wigwam fireside gave silent audience to the whispered narratives of the 'traveled Indian.' * * *

"The next day after he had arrived among his friends the superfluous part of his coat (which was a laced frock) was converted into a pair of leggings for his wife; and his hat-band of silver lace furnished her a magnificent pair of garters. The remainder of the coat, curtailed of its original length, was seen buttoned upon the shoulders of his brother, over and above a pair of leggings of buckskin; and Wi-jun-jon was parading about among his gaping friends with a bow and quiver slung over his shoulders, which, *sans* coat, exhibited a fine linen shirt with studs and sleeve-buttons. His broadsword kept its place, but about noon his boots gave way to a pair of garished moccasins; and in such plight he gossiped away the day among his friends, while his heart spoke so freely and so effectually from the bung-hole of a little keg of whisky, which he had brought the whole way (as one of the choicest presents made him at Washington), that his tongue became silent.

"One of his little fair *innamoratas*, or 'catch-crumbs,' such as live in the halo of all great men, fixed her eyes and her affections upon his beautiful silk braces, and the next day, while the keg was yet dealing out its kindnesses, he was seen paying visits to the lodges of his old acquaintance, swaggering about, with his keg under his arm, whistling Yankee Doodle and Washington's Grand March; his white shirt, or that part of it that had been flapping in the wind, had been shockingly tithed; his pantaloons of blue, laced with gold, were razed into a pair of comfortable leggings; his bow and quiver were slung, and his broadsword, which trailed on the ground, had sought the center of gravity, and taken a position between his legs, and dragging behind him, served as a rudder to steer him over the 'earth's troubled surface.'

"Ha-hah-hagh——ah——o——oo——k, eh bien."

"Two days' revel of this kind had drawn from his keg all its charms; and in the mellowness of his heart, all his finery had vanished, and all of its appendages, except his umbrella, to which his heart's strongest affections still clung, and with it, and under it, in rude dress of buckskin, he was afterwards to be seen, in all sorts of weather, acting the fop and the beau as well as he could, with his limited means. In this plight, and in this dress, with his umbrella always in his hand (as the only re-

maining evidence of his *quondam* greatness), he began in his sober moments to entertain and instruct his people by honest and simple narratives of things and scenes he had beheld during his tour to the East but which (unfortunately for him); were to them too marvellous and improbable to be believed. He told the gaping multitude, that were constantly gathering about him, of the distance he had traveled; of the astonishing number of houses he had seen; of the towns and cities, with all their wealth and splendor; of traveling on steamboats, in stages, and on railroads. He described our forts and seventy-four gun ships which he had visited; their big guns; our great bridges; our great council-house at Washington, and its doings; the curious and wonderful machines in the Patent Office (which he pronounced the greatest medicine place he had seen); he described the great war parade which he saw in the city of New York; the ascent of the balloon from Castle Garden; the numbers of the white people; the beauty of the white squaws; their red cheeks, and many thousands of other things, all of which were so much beyond their comprehension that they could not be true,' and 'he must be the very greatest liar in the whole world.'

"But he was beginning to acquire a reputation of a different kind. He was denominated a *medicine-man*, and one too of the most extraordinary character, for they deemed him far above the ordinary sort of human beings, whose mind could invent and conjure up for their amusement such an ingenious fabrication of novelty and wonder. He steadily and unostentatiously persisted, however, in this way of entertaining his friends and his people, though he knew his standing was affected by it. He had an exhaustless theme to descant upon through the remainder of his life; and he seemed satisfied to lecture all his life for the pleasure which it gave him.

"So great was his medicine, however, that they began, chiefs and all, to look upon him as a most extraordinary being, and the customary honors and forms began to be applied to him, and the respect shown him that belongs to all men in the Indian country who are distinguished for their medicine or mysteries. In short, when all became familiar with the astonishing representations that he made, and with the wonderful alacrity with which 'he created them,' he was denominated the very greatest of medicine, and not only that, but the lying medicine. That he should be the greatest of medicine, and that for lying merely, rendered him a prodigy in mysteries that commanded not only respect, but at length (when he was more maturely heard and listened to) admiration, awe, and at last dread and terror, which altogether must needs conspire to rid the world of a monster whose more than human talents must be cut down to less than human measurement.

"'W'at! Monsieur Cataline, dey 'av' not try to kill him?'

"Yes, Ba'tiste, in this way the poor fellow had lived, and been for three years past continually relating the scenes he had beheld in his tour to the '*Far East*,' until his medicine became so alarmingly great that they were unwilling he should live; they were disposed to kill him for a wizard. One of the young men of the tribe took the duty upon himself, and, after much perplexity, hit upon the following plan, to wit: He had fully resolved, in conjunction with others who were in the conspiracy, that the medicine of Wi-jun-jon was too great for the ordinary mode, and that he was so great a liar that a rifle bullet would not kill him. While the young man was in this distressing dilemma, which lasted for some weeks, he had a dream one night, which solved all difficulties; and in consequence of which he loitered about the store in the fort, at the mouth of the Yellowstone, until he could procure, by stealth (according to the injunction of his dream), the handle of an iron pot, which he supposed to possess the requisite virtue, and taking it into the woods, he there spent a whole day in straightening and filing it, to fit it into the barrel of his gun; after which, he made his appearance again in the fort, with his gun under his robe, charged with the pot handle, and getting behind poor Wi-jun-jon, whilst he was talking with the trader placed the muzzle behind his head and blew out his brains!

* Most unfortunately for this poor fellow, the other one of his tribe who traveled with him, and could have borne testimony to the truth of his statements, died of the quinsy on his way home.

“*Sacré vengeance ! Oh, mon Dieu ! Let me cry—I shall cry always, for evare. Oh, he is not true, I hope ? No, monsieur, no !*”

“Yes, Ba’tiste, it is a fact ; thus ended the days and the greatness and all the pride and hopes of Wi-jun-jon, the ‘Pigeon’s Egg Head,’ a warrior and a brave of the valiant Assinaboines, who traveled eight thousand miles to see the President and all the great cities of the civilized world ; and who, for telling the truth, and nothing but the truth, was, after he got home, disgraced and killed for a wizard. * * *

“Now, my friend Ba’tiste, * * * I myself feel sad at the poor fellow’s unhappy and luckless fate ; for he was a handsome, an honest, and a noble Indian. This man’s death, Ba’tiste, has been a loss to himself, to his friends, and to the world, but you and I may profit by it, nevertheless, if we bear it in mind—we may profit by his misfortune, if we choose. We may call it a ‘caution ;’ for instance, when I come to write your book, as you have proposed, the fate of this poor fellow, who was relating no more than what he actually saw, will caution you against the imprudence of telling all that you actually know, and narrating all that you have seen, lest like him you sink into disgrace for telling the truth. You know, Ba’tiste, that there are many things to be seen in the kind of life that you and I have been living for some years past which it would be more prudent for us to suppress than to tell.”

475. Butte de Mort. Upper Missouri, a great burial-place of the Sioux, called by the French “*Butte de mort,*” hill of death. Painted in 1834.

Regarded by the Indians with great dread and superstition. There are several thousand buffalo and human skulls, perfectly bleached and curiously arranged about it. “The Butte des Morts—Hill of the dead—near the banks of the Fox River, in Winnebago County, Wisconsin, a large and apparently artificial mound, said to contain the remains of Indian warriors killed in ancient battles. Its notoriety dates back of all written history, however early, of this part of the northwest, and gathers about it the charms of many traditions.—H. W. Beckwith.

476. Rain-making amongst the Mandans, a very curious custom. Medicine-men performing their mysteries inside of the lodge, and young men volunteer to stand upon the lodge from sunrise until sundown, in turn, commanding it to rain. Painted at Mandan Village, 1832.

(Plate No. 58, page 134, vol. 1, Catlin’s Eight Years.)

Each one has to hazard the disgrace which attaches (when he descends at sundown) to a fruitless attempt ; and he who succeeds acquires a lasting reputation as a *mystery* or *medicine-man*. They never fail to make it rain ! as this ceremony continues from day to day until rain comes.

Did you ever hear of rain-makers ? If not, sit still, and read on ; but laugh not. Keep cool and sober, or else you may laugh in the beginning, and cry at the end of my story. Well, I introduce to you a new character—not a doctor or a high-priest, yet a *medicine-man*, and one of the highest and most respectable order, a *rain-maker* ! Such dignitaries live in the Mandan nation, aye, and *rain-stoppers* too ; and even those also amongst their *conjurati*, who, like Joshua of old, have even essayed to stop the sun in his course ; but from the inefficiency of their *medicine* or *mystery*, have long since descended into insignificance.

The Mandans raise a great deal of corn, * * * but sometimes a most disastrous drought visits the land, destructive to their promised harvest. Such was the case when I arrived at the Mandan village on the steamboat Yellowstone. Rain had not fallen for many a day, and the dear little girls and the ugly old squaws, altogether (all of whom had fields of corn), were groaning and crying to their lords, and imploring them to intercede for rain, that their little respective patches, which were now turning pale and yellow, might not be withered, and they be deprived of the pleasure of their customary annual festivity, and the joyful occasion of the “roasting ears,” and the green-corn dance.

RAIN-MAKING AMONG THE MANDANS, 1832.

No. 476, page 332.

(Plate 58, Vol. I, Catlin's Eight Years)

The chiefs and doctors sympathized with the complaints of the women, and recommended patience. Great deliberation, they said, was necessary in these cases; and though they resolved on making the attempt to produce rain for the benefit of the corn, yet they very wisely resolved that to begin too soon might insure their entire defeat in the endeavor, and that the longer they put it off the more certain they would feel of ultimate success. So, after a few days of further delay, when the importunities of the women had become clamorous, and even mournful, and almost insupportable, the *medicine-men* assembled in the council-house, with all their mystery apparatus about them, with an abundance of wild sage and other aromatic herbs, with a fire prepared to burn them, that their savory odors might be sent forth to the Great Spirit. The lodge was closed to all the villagers, except some ten or fifteen young men who were willing to hazard the dreadful alternative of making it rain or suffer the everlasting disgrace of having made a fruitless essay.

They only were allowed as witnesses to the *hocus pocus* and conjuration devised by the doctors inside of the medicine-lodge; and they were called up by lot, each one in his turn, to spend a day upon the top of the lodge, to test the potency of his medicine; or, in other words, to see how far his voice might be heard and obeyed amongst the clouds of the heavens; whilst the doctors were burning incense in the wigwam below, and with their songs and prayers to the Great Spirit for success were sending forth grateful fumes and odors to Him "who lives in the sun and commands the thunders of heaven." *Wah-kee* (the Shield) was the first who ascended the wigwam at sunrise; and he stood all day, and looked foolish as he was counting over and over his string of mystery-beads; the whole village were assembled around him and praying for his success. Not a cloud appeared; the day was calm and hot; and at the setting of the sun he descended from the lodge and went home; "his *medicine* was not good," nor can he ever be a *medicine-man*.

Om-pah (the Elk) was the next. He ascended the lodge at sunrise the next morning. His body was entirely naked, being covered with yellow clay. On his left arm he carried a beautiful shield, and a long lance in his right; and on his head the skin of a raven, the bird that soars amidst the clouds and above the lightning's glare. He flourished his shield and brandished his lance and raised his voice, but in vain; for at sunset the ground was dry and the sky was clear; the squaws were crying, and their corn was withering at its roots.

War-rah-pa (the Beaver) was the next. He also spent his breath in vain upon the empty air, and came down at night; and *Wak-a-dah-ha-hee* (the White Buffalo's Hair) took the stand the next morning. He is a small but beautifully-proportioned young man. He was dressed in a tunic and leggings of the skins of the mountain-sheep, splendidly garnished with quills of the porcupine, and fringed with locks of hair taken by his own hand from the heads of his enemies. On his arm he carried his shield, made of the buffalo's hide; its boss was the head of the war-eagle, and its front was ornamented with "red chains of lightning." In his left hand he clenched his sinewy bow and one single arrow. The villagers were all gathered about him; when he threw up a feather to decide on the course of the wind, and he commenced thus: "My friends! people of the pheasants! you see me here a sacrifice. I shall this day relieve you from great distress, and bring joy amongst you; or I shall descend from this lodge when the sun goes down, and live amongst the dogs and old women all my days. My friends! you saw which way the feather flew, and I hold my shield this day in the direction where the wind comes; the lightning on my shield will draw a great cloud, and this arrow, which is selected from my quiver, and which is feathered with the quill of the white swan, will make a hole in it. My friends! this hole in the lodge at my feet shows me the *medicine-men*, who are seated in the lodge below me and crying to the Great Spirit; and through it comes and passes into my nose delightful odors, which you see rising in the smoke to the Great Spirit above, who rides in the clouds and commands the winds! Three days they have sat here, my friends, and nothing has been done to relieve your distress. On the first day was

Wah-kee (the Shield); he could do nothing; he counted his beads and came down, his medicine was not good, his name was bad, and it kept off the rain. The next was *Om-pah* (the Elk); on his head the raven was seen, who flies above the storm, and he failed. *War-rah-pa* (the Beaver) was the next, my friends; the beaver lives under the water, and he never wants it to rain. My friends! I see you are in great distress, and nothing has yet been done. This shield belonged to my father, the White Buffalo; and the lightning you see on it is red; it was taken from a black cloud, and that cloud will come over us to-day. I am the White Buffalo's Hair, and I am the son of my father."

In this manner flourished and maneuvered *Wak-a-dah-ha-hee* (the White Buffalo's Hair), alternately addressing the audience and the heavens, and holding converse with the winds and the "*je-bi*" (spirits) that are floating about in them, stamping his foot over the heads of the magi, who were involved in mysteries beneath him, and invoking the spirits of darkness and light to send rain to gladden the hearts of the Mandans.

It happened on this memorable day about noon that the steamboat *Yellowstone*, on her first trip up the Missouri River, approached and landed at the Mandan village, as I have described in a former epistle. I was lucky enough to be a passenger on this boat, and helped to fire a salute of twenty guns of twelve pounds caliber when we first came in sight of the village, some three or four miles below. These guns introduced a new sound into this strange country, which the Mandans at first supposed to be thunder; and the young man upon the lodge, who turned it to good account, was gathering fame in rounds of applause, which were repeated and echoed through the whole village. All eyes were centered upon him; chiefs envied him; mothers' hearts were beating high whilst they were decorating and leading up their fair daughters to offer him in marriage on his signal success. The medicine-men had left the lodge, and came out to bestow upon him the envied title of "*medicine-man*" or "*doctor*," which he had so deservedly won. Wreaths were prepared to decorate his brows, and eagle's plumes and calumets were in readiness for him; his friends were all rejoiced; his enemies wore on their faces a silent gloom and hatred; and his old sweethearts, who had formerly cast him off, gazed intensely upon him as they glowed with the burning fever of repentance.

During all this excitement, *Wak-a-dah-ha-hee* kept his position, assuming the most commanding and threatening attitude; brandishing his shield in the direction of the thunder (Plate 58, No. 476). Although there was not a cloud to be seen, until he (poor fellow), being elevated above the rest of the village, espied, to his inexpressible amazement, the steamboat plowing its way up the windings of the river below; puffing her steam from her pipes, and sending forth the thunder from a twelve-pounder on her deck! * * * The White Buffalo's Hair stood motionless and turned pale, he looked a while, and turned to the chief and to the multitude, and addressed them with a trembling lip, "My friends, we will get no rain! there are, you see, no clouds; but my medicine is great—I have brought a *thunder boat*! look and see it! the thunder you hear is out of her mouth, and the lightning which you see is on the waters!"

At this intelligence the whole village flew to the tops of their wigwams, or to the bank of the river, from whence the steamer was in full view, and plowing along, to their utter dismay and confusion.

In this promiscuous throng of chiefs, doctors, women, children, and dogs, was *Wak-a-dah-ha-hee* (the White Buffalo's Hair), having descended from his high place to mingle with the frightened throng.

Dismayed at the approach of so strange and unaccountable an object, the Mandans stood their ground but a few moments; when, by an order of the chiefs, all hands were ensconced within the piquets of their village, and all the warriors armed for desperate defense. A few moments brought the boat in front of the village, and all was still and quiet as death; not a Mandan was to be seen upon the banks. The steamer was moored, and three or four of the chiefs soon after walked boldly down

the bank and on to her deck, with a spear in one hand and the calumet, or pipe of peace, in the other. The moment they stepped on board they met (to their great surprise and joy) their old friend, Major Sanford, their agent, which circumstance put an instant end to all their fears. The villagers were soon apprised of the fact, and the whole race of the beautiful and friendly Mandans was paraded on the bank of the river, in front of the steamer.

The rain maker, whose apprehensions of a public calamity brought upon the nation by his extraordinary medicine, had, for the better security of his person from apprehended vengeance, secreted himself in some secure place, and was the last to come forward, and the last to be convinced that this visitation was a friendly one from the white people; and that his medicine had not in the least been instrumental in bringing it about. This information, though received by him with much caution and suspicion, at length gave him great relief, and quieted his mind as to his danger. Yet still in his breast there was a rankling thorn, though he escaped the dreaded vengeance which he had a few moments before apprehended as at hand; as he had the mortification and disgrace of having failed in his mysterious operations. He set up, however (during the day, in his conversation about the strange arrival), his medicines, as the cause of its approach; asserting everywhere, and to everybody, that he knew of its coming, and that he had by his magic brought the occurrence about. This plea, however, did not get him much audience; and, in fact, everything else was pretty much swallowed up in the guttural talk, and bustle, and gossip about the mysteries of the "thunder-boat"; and so passed the day, until just at the approach of evening, when the White Buffalo's Hair (more watchful of such matters on this occasion than most others) observed that a black cloud had been jutting up in the horizon, and was almost directly over the village. In an instant his shield was on his arm, and his bow in his hand, and he again upon the lodge. Stiffened and braced to the last sinew, he stood, with his face and shield presented to the cloud, and his bow drawn. He drew the eyes of the whole village upon him as he vaunted forth his superhuman powers, and at the same time commanding the cloud to come nearer, that he might draw down its contents upon the heads and the cornfields of the Mandans. In this wise he stood, waving his shield over his head, stamping his foot and frowning as he drew his bow and threatened the heavens, commanding it to rain—his bow was bent, and the arrow drawn to its head, was sent to the cloud, and he exclaimed, "My friends, it is done! Wak-a-dah-hee's arrow has entered that black cloud, and the Mandans will be wet with the water of the skies! His predictions were true; in a few moments the cloud was over the village, and the rain fell in torrents. He stood for some time wielding his weapons and presenting his shield to the sky; while he boasted of his power and the efficacy of his medicine to those who had been about him, but were now driven to the shelter of their wigwams. He at length finished his vaunts and his threats, and descended from his high place (in which he had been perfectly drenched), prepared to receive the honors and the homage that were due to one so potent in his mysteries, and to receive the style and title of *medicine-man*. This is one of a hundred different modes in which a man in Indian countries acquires the honorable appellation.

This man had made it rain, and of course was to receive more than usual honor, as he had done much more than ordinary men could do. All eyes were upon him, and all were ready to admit that he was skilled in the magic art; and must be so nearly allied to the Great or Evil Spirit, that he must needs be a man of great and powerful influence in the nation, and well entitled to the style of doctor or *medicine-man*.

Readers, there are two facts relative to these strange transactions, which are infallibly true, and should needs be made known. The first is, that when the Mandans undertake to make it rain, *they never fail to succeed*, for their ceremonies never stop until rain begins to fall. The second is equally true, and is this—that he who has once made it rain never attempts it again; his medicine is undoubted; and on future occasions of the kind he stands aloof who has once done it in presence of the whole

village, giving an opportunity to other young men who are ambitious to signalize themselves in the same way.

During the memorable night of which I have just spoken the steamboat remained by the side of the Mandan village, and the rain that had commenced falling continued to pour down its torrents until midnight; black thunder roared, and livid lightning flashed until the heavens appeared to be lit up with one unceasing and appalling glare. In this frightful moment of consternation, a flash of lightning buried itself in one of the earth-covered lodges of the Mandans and killed a beautiful girl. Here was food and fuel fresh for their superstitions; and a night of vast tumult and excitement ensued. The dreams of the new-made medicine-man were troubled, and he had dreadful apprehensions for the coming day—for he knew that he was subject to the irrevocable decree of the chiefs and doctors, who canvass every strange and unaccountable event with close and superstitious scrutiny, and let their vengeance fall without mercy upon its immediate cause.

He looked upon his well-earned fame as likely to be withheld from him; and also considered that his life might perhaps be demanded as the forfeit for this girl's death, which would certainly be charged upon him. He looked upon himself as culpable, and supposed the accident to have been occasioned by his criminal desertion of his post when the steamboat was approaching the village. Morning came and he soon learned from some of his friends the opinions of the wise men, and also the nature of the tribunal that was preparing for him; he sent to the prairie for his three horses, which were brought in, and he mounted the medicine-lodge, around which, in a few moments, the villagers were all assembled. "My friends! (said he) I see you all around me, and I am before you; my medicine, you see, is great—it is too great—I am young, and I was too fast—I knew not when to stop. The wigwam of Mah-sish is laid low, and many are the eyes that weep for *Ko-ka* (the Antelope). *Wak-a-dah-ha-hee* gives three horses to gladden the hearts of those who weep for *Ko-ka*; his medicine was great—his arrow pierced the black cloud, and the lightning came, and the thunder-boat also! who says the medicine of *Wak-a-dah-ha-hee* is not strong?"

At the end of this sentence an unanimous shout of approbation ran through the crowd, and the Hair of the White Buffalo descended amongst them, where he was greeted by shakes of the hand; and amongst whom he now lives and thrives under the familiar and honorable appellation of the "*Big Double Medicine*."

477. Smoking the Shield (Sioux); a young warrior, making his shield, invites his friends to a carouse and a feast, who dance around his shield as it is smoking and hardening over a fire built in the ground. Painted 1832, at mouth of Teton River.

(No plate.)

I am soon to unfold the process of "*smoking the shield*." This is a very curious, as well as an important operation in their estimation. For this purpose a young man about to construct him a shield digs a hole of 2 feet in depth in the ground, and as large in diameter as he designs to make his shield. In this he builds a fire, and over it, a few inches higher than the ground, he stretches the raw hide horizontally over the fire, with little pegs driven through holes made near the edges of the skin. This skin is at first twice as large as the size of the required shield; but having got his particular and best friends (who are invited on the occasion) into a ring, to dance and sing around it, and solicit the Great Spirit to instill into it the power to protect him harmless against his enemies, he spreads over it the glue, which is rubbed and dried in as the skin is heated; and a second busily drives other and other pegs, inside of those in the ground, as they are gradually giving way and being pulled up by the contraction of the skin. By this curious process, which is most dexterously done, the skin is kept tight whilst it contracts to one-half of its size, taking up the glue and increasing in thickness until it is rendered as thick and hard as required (and his friends have pleaded long enough to make it arrow and almost ball proof), when

SAC AND FOX INDIANS SAILING IN CANOES, WITH BLANKETS FOR SAILS.

No. 479, page 337.

(Plate 294, Vol. II, Catlin's Eight Years.)

the dance ceases and the fire is put out. When it is cooled and cut into the shape that he desires it is often painted with his *medicine* or *totem* upon it, the figure of an eagle, an owl, a buffalo or other animal, as the case may be, which he trusts will guard and protect him from harm; it is then fringed with eagle's quills, or other ornaments he may have chosen, and *slung* with a broad leather strap that crosses his breast. These shields are carried by all the warriors in these regions for their protection in battles, which are almost invariably fought from their horses' backs.—G. C., page 241, vol. 1, Catlin's Eight Years.

478. The Thunder's Nest. Nid du Tonnerre, and a party cautiously approaching it, Coteau des Prairies. Painted in 1836.

(No plate. Page 206, vol. 2, Catlin's Eight Years.)

Tradition of the Sioux is that in this little bunch of bushes the thunders are hatched out by quite a small bird, about as large, say their *medicine-men*, who profess to have seen it, as the end of a man's thumb. She sits on her eggs, and they hatch out in claps of thunder. No one approaches within several rods of the place.—G. C.

(See Nos. 336 and 337.)

479. Sac and Fox Indians sailing in canoes, by holding up their blankets. Painted in 1836 at Rock Island.

(Plate No. 294, page 214, vol. 2, Catlin's Eight Years.)

The Sacs and Foxs, like all other Indians, are fond of living along the banks of rivers and streams, and, like all others, are expert swimmers and skillful canoemen.

Their canoes, like those of the Sioux and many other tribes, are dug out from a log, and generally made extremely light; and they dart them through the coves and along the shores of the rivers with astonishing quickness. I was often amused at their freaks in their canoes whilst traveling; and I was induced to make a sketch of one which I frequently witnessed, that of sailing with the aid of their blankets which the men carry; and when the wind is fair stand in the bow of the canoe and hold by two corners, with the other two under the foot or tied to the leg (Plate 294, No. 479), while the women sit in the other end of the canoe and steer it with their paddles.—G. C.

480. Grand Tournament of the Camanches, and a sham fight in a large encampment on the borders of Texas. Painted in 1834, on First Dragoon campaign.

(No plate.)

481. Bogard, Bâtiste, and I, traveling through a Missouri bottom, grass 10 feet high. Painted in 1832.

482. Band of Sioux moving. Painted in 1835.

(No plate.)

483. Bogard, Bâtiste, and I, descending the Missouri River. Painted in 1832.

484. Bogard, Bâtiste, and I, eating our breakfast on a pile of driftwood, Upper Missouri. Painted in 1832.

485. Medicine Buffalo of the Sioux, the figure of a buffalo cut out of the turf on the prairie, and visited by the Indians going on a buffalo hunt.

486. Bogard, Bâtiste, and I, chasing a herd of buffalo in high grass, on a Missouri bottom. Painted in 1832.

(No plate.)

487. Feats of Horsemanship. Camanches throwing themselves on the side of their horses, while at full speed, to evade their enemies' arrows—a most wonderful feat. Painted in 1834 at Great Camanche village, campaign with First Dragoons.

(Plate No. 167, page 65, vol. 2, Catlin's Eight Years.)

The Camanches, like the Northern tribes, have many games, and in pleasant weather seem to be continually practicing more or less of them on the prairies back of and contiguous to their village.

In their ball-plays and some other games they are far behind the Sioux and others of the northern tribes; but in racing horses and riding they are not equaled by any other Indians on the continent. Racing horses, it would seem, is a constant and almost incessant exercise, and their principal mode of gambling; and perhaps a more finished set of jockeys are not to be found. The exercise of these people, in a country where horses are so abundant and the country so fine for riding, is chiefly done on horseback; and it "stands to reason" that such a people, who have been practicing from their childhood, should become exceedingly expert in this wholesome and beautiful exercise. Amongst their feats of riding there is one that has astonished me more than anything of the kind I have ever seen or expect to see in my life—a stratagem of war learned and practiced by every young man in the tribe, by which he is able to drop his body upon the side of his horse at the instant he is passing, effectually screened from his enemies' weapons (Plate 167, No. 487) as he lays in a horizontal position behind the body of his horse, with his heel hanging over the horse's back, by which he has the power of throwing himself up again and changing to the other side of the horse if necessary. In this wonderful condition he will hang whilst his horse is at fullest speed, carrying with him his bow and shield, and also his long lance of 14 feet in length, all or either of which he will wield upon his enemy as he passes, rising and throwing his arrows over the horse's back,* or with equal ease and equal success under the horse's neck.

This astonishing feat which the young men have been repeatedly playing off to our surprise as well as amusement, whilst they have been galloping about in front of our tents, completely puzzled the whole of us, and appeared to be the result of magic rather than of skill acquired by practice. I had several times great curiosity to approach them to ascertain by what means their bodies could be suspended in this manner, where nothing could be seen but the heel hanging over the horse's back. In these endeavors I was continually frustrated, until one day I coaxed a young fellow up within a little distance of me by offering him a few plugs of tobacco, and he in a moment solved the difficulty so far as to render it apparently more feasible than before, yet leaving it one of the most extraordinary results of practice and persevering endeavors. I found on examination that a short hair halter was passed around under the neck of the horse and both ends tightly braided into the mane on the withers, leaving a loop to hang under the neck and against the breast, which, being caught up in the hand, makes a sling into which the elbow falls, taking the weight of the body on the middle of the upper arm. Into this loop the rider drops suddenly and fearlessly, leaving his heel to hang over the back of the horse to steady him and also to restore him when he wishes to regain his upright position on the horse's back.

Besides this wonderful art these people have several other feats of horsemanship which they are continually showing off, which are pleasing and extraordinary and of which they seem very proud. A people who spend so very great a part of their lives actually on their horses' backs must needs become exceedingly expert in everything that pertains to riding, to war, or to the chase; and I am ready without hesitation

* Since writing the above I have conversed with some of the young men of the Pawnees who practice the same feat, and who told me they could throw the arrow from under the horse's belly and elevate it upon an enemy with deadly effect.

This feat I did not see performed, but from what I did see I feel inclined to believe that these young men were boasting of no more than they were able to perform.

COMANCHE FEATS OF HORSEMANSHIP.

No. 487, page 338.
(Plate 167, Vol. II, Catlin's Eight Years.)

to pronounce the Camanches the most extraordinary horsemen that I have seen yet in all my travels, and I doubt very much whether any people in the world can surpass them.—G. C.

488. Camanche War Party, meeting the dragoons, and one of their bravest men advancing to shake hands with Colonel Dodge, with a piece of white buffalo-skin on the point of his lance, on the Mexican frontier, 1835. Painted in 1834, on First Dragoon expedition.

(Plate No. 157, page 53, vol. 2, Catlin's Eight Years.)

On the fourth day of our march from the mouth of Lake Washita we discovered many fresh signs of buffaloes, and at last immense herds of them grazing on the distant hills. Indian trails were daily growing fresh, and their smokes were seen in various directions ahead of us, and on the same day at noon we discovered a large party at several miles distance, sitting on their horses and looking at us. From the glistening of the blades of their lances, which were blazing as they turned them in the sun, it was at first thought that they were Mexican cavalry, who might have been apprised of our approach into their country, and had advanced to contest the point with us. On drawing a little nearer, however, and scanning them closer with our spy-glasses, they were soon ascertained to be a war party of Camanches, on the look out for their enemies.

The regiment was called to a halt, and the requisite preparations made and orders issued. We advanced in a direct line towards them until we had approached to within two or three miles of them, when they suddenly disappeared over the hill, and soon after showed themselves on another mound farther off and in a different direction. The course of the regiment was then changed, and another advance towards them was commenced, and, as before, they disappeared and showed themselves in another direction. After several such efforts, which proved ineffectual, Colonel Dodge ordered the command to halt, while he rode forward with a few of his staff and an ensign carrying a white flag. I joined this advance, and the Indians stood their ground until we had come within half a mile of them and could distinctly observe all their numbers and movements. We then came to a halt, and the white flag was sent a little in advance and waved as a signal for them to approach, at which one of their party galloped out in advance of the war party, on a milk white horse, carrying a piece of white buffalo-skin on the point of his long lance in reply to our flag.

This moment was the commencement of one of the most thrilling and beautiful scenes I ever witnessed. All eyes, both from his own party and ours, were fixed upon the maneuvers of this gallant little fellow, and he well knew it.

The distance between the two parties was perhaps half a mile, and that a beautiful and gently sloping prairie, over which he was for the space of a quarter of an hour reining and spurring his maddened horse, and gradually approaching us by tacking to the right and the left, like a vessel beating against the wind. He at length came prancing and leaping along until he met the flag of the regiment, when he leaned his spear against it, looking the bearer full in the face, when he wheeled his horse, and dashed up to Colonel Dodge (Plate 157, No. 488), with his extended hand, which was instantly grasped and shaken.

We all had him by the hand in a moment, and the rest of the party seeing him received in this friendly manner, instead of being sacrificed, as they undoubtedly expected, started under full whip in a direct line towards us, and in a moment gathered, like a black cloud, around us! The regiment then moved up in regular order, and a general shake of the hand ensued, which was accomplished by each warrior riding along the ranks and shaking the hand of every one as he passed. This necessary form took up considerable time, and during the whole operation my eyes were fixed upon the gallant and wonderful appearance of the little fellow who bore us the white flag on the point of his lance. He rode a fine and spirited wild horse, which was as white as the drifted snow, with an exuberant mane, and its long and bushy tail sweeping

the ground. In his hand he tightly drew the reins upon a heavy Spanish bit, and at every jump plunged into the animal's sides, till they were in a gore of blood, a huge pair of spurs, plundered, no doubt, from the Spaniards in their border wars, which are continually waged on the Mexican frontiers. The eyes of this noble little steed seemed to be squeezed out of its head; and its fright and its agitation had brought out upon its skin a perspiration that was fretted into a white foam and lather. The warrior's quiver was slung on the warrior's back, and his bow grasped in his left hand, ready for instant use, if called for. His shield was on his arm, and across his thigh, in a beautiful cover of buckskin, his gun was slung—and in his right hand his lance of 14 feet in length.

Thus armed and equipped was this dashing cavalier, and nearly in the same manner all the rest of the party; and very many of them leading an extra horse, which we soon learned was the favorite war-horse; and from which circumstances altogether we soon understood that they were a war-party in search of their enemy.

After a shake of the hand we dismounted, and the pipe was lit and passed around. And then a "talk" was held, in which we were aided by a Spaniard we luckily had with us who could converse with one of the Camanches, who spoke some Spanish.

Colonel Dodge explained to them the friendly motives with which we were penetrating their country, that we were sent by the President to reach their villages; to see the chiefs of the Camanches and Pawnee Piets, to shake hands with them, and to smoke the pipe of peace, and to establish an acquaintance, and consequently a system of trade that would be beneficial to both.—G. C.

The Camanches afterwards abandoned their war expedition and conducted Colonel Dodge and his command to their village. (See No. 353.)

489. An Indian wedding, Assinaboine; young man making presents to the father of the girl. Painted in 1832.

(No plate.)

490. Crow at his toilet, oiling his long hair with bear's grease. Painted 1832.

(No plate.)

491. Crow Lodge, of twenty-five buffalo-skins, beautifully ornamented.

This splendid lodge, with all its poles and furniture, was brought from the foot of the Rocky Mountains.

This lodge is now in the National Museum. Mr. Catlin procured it in 1832 and took it to Europe. He thus describes it:

A CROW LODGE OR WIGWAM.

A very splendid thing, brought from the foot of the Rocky Mountains, 25 feet in height, made of buffalo-skins, garnished and painted. The poles (thirty in number) of pine, cut in the Rocky Mountains, have been long in use, were purchased with the lodge, and brought the whole distance. This *wigwam* stands in the middle of the gallery, and will shelter eighty or more persons.

This was brought back to the United States by Mr. Harrison in 1852-53. In the plate showing the gallery, page 8, herein, a view of this wigwam is given.

492. Pawnee Lodge, thatched with prairie grass, in form of a straw beehive. Painted in 1834.

(No plate.)

(See also No. 343, herein, great Pawnee village.)

493. Camanche Lodge, of buffalo-skins. Painted in 1834.

(No plate.)

(See also No. 346, herein, Great Camanchee village.)

CROW LODGE.

Same form used by all of the Northwest and Western North American Indians. No. 491, pages 340, 397.
(Plate 20, Vol. I, Catlin's Eight Years.)

494. Dog Feast, Sioux; a religious feast. Given to Mr. Sanford (Indian agent), Mr. Choteau, Mr. McKenzie, and myself in a Sioux village 1,400 miles above Saint Louis, 1832. The only food was dog's meat, and this is the highest honor they can confer on a stranger. Painted at a Sioux village at the mouth of Teton River, 1832.

(Plate No. 96, page 228, vol. 1, Catlin's Eight Years.)

After I had been several weeks busily at work with my brush in this village, and pretty well used to the modes of life in these regions, and also familiarly acquainted with all the officers and clerks of the establishment, it was announced one day that the steamer which we had left was coming in the river below, where all eyes were anxiously turned and all ears were listening, when at length we discovered the puffing of her steam, and at last heard the thundering of cannon which were being fired from her deck.

The excitement and dismay caused amongst six thousand of these wild people [Sioux] when the steamer came up in front of their village was amusing in the extreme. The steamer was moored at the shore, however, and when Mr. Chouteau and Major Sanford, their old friend and agent, walked ashore, it seemed to restore their confidence and courage, and the whole village gathered in front of the boat, without showing much further amazement or even curiosity about it.

The steamer rested a week or two at this place before she started on her voyage for the headwaters of the Missouri, during which time there was much hilarity and mirth indulged in amongst the Indians, as well as with the hands employed in the service of the Fur Company. The appearance of a steamer in this wild country was deemed a wonderful occurrence, and the time of her presence here looked upon and used as a holiday. Some sharp encounters amongst the trappers, who come in here from the mountains, loaded with packs of furs, with sinews hardened by long exposure, and seemingly impatient for a *fight*, which is soon given them by some bullying fisticuff fellow, who steps forward and settles the matter in a ring, which is made and strictly preserved for *fair play*, until hard raps and bloody noses and blind eyes "*settle the hash*" and satisfy his trappership to lay in bed a week or two, and then graduate a sober and a civil man.

Amongst the Indians we have had numerous sights and amusements to entertain, and some to shock us. Shows of dances, ball plays, horse-racing, foot-racing, and wrestling in abundance. Feasting, fasting, and prayers we have also had, and penance and tortures, and almost everything short of self-immolation.

Some few days after the steamer had arrived, it was announced that a grand feast was to be given to the *great white chiefs* who were visitors amongst them, and preparations were made accordingly for it. The two chiefs brought their two tents together, forming them into a semi-circle, inclosing a space sufficiently large to accommodate one hundred and fifty men, and sat down with that number of the principal chiefs and warriors of the Sioux nation, with Mr. Chouteau, Mr. Sanford, the Indian agent, Mr. McKenzie, and myself, whom they had invited in due time, and placed on elevated seats in the center of the crescent, while the rest of the company all sat upon the ground, and mostly cross-legged, preparatory to the feast being dealt out.

In the center of the semi-circle was erected a flag-staff, on which was waving a white flag, and to which also was tied the calumet, both expressive of their friendly feelings towards us. Near the foot of the flag-staff were placed in a row on the ground, six or eight kettles, with iron covers on them, shutting them tight, in which were prepared the viands for our *voluptuous* feast. Near the kettles, and on the ground also, bottom side upwards, were a number of wooden bowls, in which the meat was to be served out; and in front, two or three men, who were there placed as waiters, to light the pipes for smoking, and also to deal out the food.

In these positions things stood, and all sat, with thousands climbing and crowding around for a peep at the grand pageant, when at length Ha-wan-je-tah (the one

horn), head chief of the nation, rose in front of the Indian agent, in a very handsome costume, and addressed him thus:

"My father, I am glad to see you here to-day; my heart is always glad to see my father when he comes; our great father who sends him here is very rich, and we are poor. Our friend Mr. McKenzie, who is here, we are also glad to see; we know him well, and we shall be sorry when he is gone. Our friend who is on your right hand we all know is very rich; and we have heard that he owns the great medicine-canoe; he is a good man, and a friend to the red man. Our friend the *White Medicine*, who sits with you, we did not know; he came amongst us a stranger, and he has made me very well; all the women know it, and think it good; he has done many curious things, and we have all been pleased with him; he has made us much amusement and we know he is great medicine.

"My father, I hope you will have pity on us; we are very poor. We offer you to-day, not the best that we have got, for we have plenty of good buffalo hump and marrow, but we give you our hearts in this feast; we have killed our faithful dogs to feed you, and the Great Spirit will seal our friendship. I have no more to say."

After these words he took off his beautiful war-eagle head-dress, his shirt and leggings, his necklace of grizzly bears' claws, and his moccasins, and tying them together, laid them gracefully down at the feet of the agent as a present, and laying a handsome pipe on top of them, he walked around into an adjoining lodge, where he got a buffalo robe to cover his shoulders, and returned to the feast, taking his seat which he had before occupied.

Major Sanford then rose and made a short speech in reply, thanking him for the valuable present which he had made him, and for the very polite and impressive manner in which it had been done, and sent to the steamer for a quantity of tobacco and other presents, which were given to him in return. After this, and after several others of the chiefs had addressed him in a similar manner, and, like the first, disrobed themselves and thrown their beautiful costumes at his feet, one of the three men in front deliberately lit a handsome pipe and brought it to Ha-wan-je-tah to smoke. He took it, and after presenting the stem to the north, to the south, to the east, and the west, and then to the sun that was over his head, and pronounced the words, "How! how! how!" drew a whiff or two of smoke through it, and holding the bowl of it in one hand and its stem in the other, he then held it to each of our mouths as we successively smoked it; after which it was passed around through the whole group, who all smoked through it, or as far as its contents lasted, when another of the three waiters was ready with a second, and at length a third one, in the same way, which lasted through the hands of the whole number of guests. This smoking was conducted with the strictest adherence to exact and established form, and the feast the whole way to the most positive silence. After the pipe is charged and is being lit, until the time that the chief has drawn the smoke through it, it is considered an evil omen for any one to speak; and if any one break silence in that time, even in a whisper, the pipe is instantly dropped by the chief, and their superstition is such that they would not dare to use it on this occasion, but another one is called for and used in its stead. If there is no accident of the kind during the smoking, the waiters then proceed to distribute the meat, which is soon devoured in the feast.

In this case the lids were raised from the kettles, which were all filled with dog's meat alone. It being well cooked, and made into a sort of a stew, sent forth a very savory and pleasing smell, promising to be an acceptable and palatable food. Each of us civilized guests had a large wooden bowl placed before us, with a huge quantity of dogs' flesh floating in a profusion of soup, or rich gravy, with a large spoon resting in the dish, made of the buffalo's horn. In this most difficult and painful dilemma we sat, all of us knowing the solemnity and good feeling in which it was given, and the absolute necessity of falling to and devouring a little of it. We all tasted it a few times, and resigned our dishes, which were quite willingly taken, and passed around with others to every part of the group, who all ate heartily of the *delicious viands*, which were soon dipped out of the kettles and entirely devoured; after which each

one arose as he felt disposed, and walked off without uttering a word. In this way the feast ended, and all retired silently and gradually until the ground was left vacant to the charge of the waiters or officers who seemed to have charge of it during the whole occasion.

The feast was unquestionably given to us as the most undoubted evidence they could give us of their friendship, and we who knew the spirit and feeling in which it was given could not but treat it respectfully, and receive it as a very high and marked compliment.

Since I witnessed it on this occasion I have been honored with numerous entertainments of the kind amongst the tribes which I have visited towards the sources of the Missouri, and all conducted in the same solemn and impressive manner; from which I feel authorized to pronounce the *dog feast* a truly religious ceremony, wherein the poor Indian sees fit to sacrifice his faithful companion to bear testimony to the sacredness of his vows of friendship, and invite his friend to partake of its flesh, to remind him forcibly of the reality of the sacrifice and the solemnity of his professions.

The dog, amongst all Indian tribes, is more esteemed and more valued than amongst any part of the civilized world; the Indian, who has more time to devote to his company, and whose untutored mind more nearly assimilates to that of his faithful servant, keeps him closer company, and draws him nearer to his heart; they hunt together, and are equal sharers in the chase; their bed is one; and on the rocks and on their coats of arms they carve his image as the symbol of fidelity. Yet with all of these he will end his affection with this faithful follower, and with tears in his eyes offer him as a sacrifice to seal the pledge he has made to man; because a feast of venison, or of buffalo meat, is what is due to every one who enters an Indian's wigwam, and of course conveys but a passive or neutral evidence that generally goes for nothing.

I have sat at many of these feasts, and never could but appreciate the moral and solemnity of them. I have seen the master take from the bowl the head of his victim, and descant on its former affection and fidelity with tears in his eyes. And I have seen guests at the same time by the side of me jesting and sneering at the poor Indian's folly and stupidity; and I have said in my heart that they never deserved a name so good or so honorable as that of the poor animal whose bones they were picking.

At the feast which I have been describing above each of us tasted a little of the meat and passed the dishes on to the Indians, who soon demolished everything they contained. We all agreed that the meat was well cooked, and seemed to be well-flavored and palatable food, and no doubt could have been eaten with a good relish if we had been hungry and ignorant of the nature of the food we were eating.

The flesh of these dogs, though apparently relished by the Indians, is undoubtedly inferior to the venison and buffalo's meat, of which feasts are constantly made where friends are invited, as they are in civilized society, to a pleasant and convivial party; from which fact alone it would seem clear that they have some extraordinary motive, at all events, for feasting on the flesh of that useful and faithful animal, even when, as in the instance I have been describing, their village is well supplied with fresh and dried meat of the buffalo. The dog feast is given, I believe, by all tribes in North America, and by them all this faithful animal, as well as the horse, is sacrificed in several different ways to appease offended spirits or deities, whom it is considered necessary that they should conciliate in this way, and when done is invariably done by giving the best in the herd or the kennel.—Pages 227-231, vol. 1, Catlin's Eight Years.

495. An Indian Council, Sioux, chiefs in profound deliberation. Painted in 1832.
(No plate.)

496. Camanche war party, mounted on wild horses, armed with shields, bows, and lances. Painted in 1834, on First Dragoon campaign.

501. Breaking down the Wild Horse, with hobbles on his fore feet, and the lasso around his under jaw. Painted in 1834, on First Dragoon Expedition.

(Plate No. 162, page 59-61, vol. 2, Catlin's Eight Years.)

MR. CATLIN'S NOTES ON NOS. 499, 500, AND 501, AND ON THE WILD HORSE OF THE COMANCHES.

The tract of country over which we passed, between the False Washita and this place, is stocked, not only with buffaloes, but with numerous bands of wild horses, many of which we saw every day. There is no other animal on the prairies so wild and so sagacious as the horse, and none other so difficult to come up with. So remarkably keen is their eye that they will generally run 'at the sight' when they are a mile distant, being no doubt able to distinguish the character of the enemy that is approaching when at that distance, and when in motion will seldom stop short of three or four miles. I made many attempts to approach them by stealth when they were grazing and playing their gambols, without ever having been more than once able to succeed. In this instance I left my horse and with my friend Chadwick skulked through a ravine for a couple of miles, until we were at length brought within gun-shot of a fine herd of them, when I used my pencil for some time, while we were under cover of a little hedge of bushes which effectually screened us from their view. In this herd we saw all the colors, nearly, that can be seen in a kennel of English hounds. Some were milk white, some jet black; others were sorrel, and bay, and cream color; many were of an iron gray; and others were pied, containing a variety of colors on the same animal. Their manes were very profuse and hanging in the wildest confusion over their necks and faces, and their long tails swept the ground. (See Plate 160, No. 499.)

CREASING A WILD HORSE.

After we had satisfied our curiosity in looking at these proud and playful animals we agreed that we would try the experiment of 'creasing' one, as it is termed in this country, which is done by shooting them through the gristle on the top of the neck, which stuns them so that they fall and are secured with the hobbles on the feet, after which they rise again without fatal injury. This is a practice often resorted to by expert hunters, with good rifles, who are not able to take them in any other way. My friend Joe and I were armed on this occasion each with a light fowling-piece, which have not quite the preciseness in throwing a bullet that a rifle has,

and having both leveled our pieces at the withers of a noble, fine-looking iron-gray, we pulled trigger, and the poor creature fell, and the rest of the herd were out of sight in a moment. We advanced speedily to him, and had the most inexpressible mortification of finding that we never had thought of hobbles or halters to secure him, and in a few moments more had the still greater mortification, and even anguish, to find that one of our shots had broken the poor creature's neck, and that he was quite dead.

The laments of poor Chadwick for the wicked folly of destroying this noble animal were such as I never shall forget; and so guilty did we feel that we agreed that when we joined the regiment we should boast of all the rest of our hunting feats, but never make mention of this.

The usual mode of taking the wild horses is by throwing the lasso whilst pursuing them at full speed (Plate 161, No. 500), and dropping a noose over their necks, by which their speed is soon checked, and they are "choked down." The lasso is a thong of rawhide, some ten or fifteen yards in length, twisted or braided, with a noose fixed at the end of it, which, when the coil of the lasso is thrown out, drops with great certainty over the neck of the animal, which is soon conquered.

The Indian, when he starts for a wild horse, mounts one of the fleetest he can get, and coiling his lasso on his arm, starts off under the "full whip," till he can enter the band, when he soon gets it over the neck of one of the number, when he instantly dismounts, leaving his own horse, and runs as fast as he can, letting the lasso pass out gradually and carefully through his hands, until the horse falls for want of breath and lies helpless on the ground, at which time the Indian advances slowly towards the horse's head, keeping his lasso tight upon its neck, until he fastens a pair of hobbles on the animal's two forefeet, and also loosens the lasso (giving the horse chance to breathe), and gives it a noose around the under jaw, by which he gets great power over the affrighted animal, which is rearing and plunging when it gets breath, and by which, as he advances hand over hand towards the horse's nose (Plate 162, No. 510), he is able to hold it down and prevent it from throwing itself over on its back, at the hazard of its limbs. By this means he gradually advances until he is able to place his hand on the animal's nose and over its eyes, and at length to breath in its nostrils, when it soon becomes docile and conquered, so that he has little else to do than to remove the hobbles from its feet and lead or ride it into camp.

This breaking down or taming, however, is not without the most desperate trial on the part of the horse, which rears and plunges in every possible way to effect its escape, until its power is exhausted and it becomes covered with foam, and at last yields to the power of man and becomes his willing slave for the rest of its life. By this very rigid treatment the poor animal seems to be so completely conquered that it makes no further struggle for its freedom, but submits quietly ever after, and is led or rode away with very little difficulty. Great care is taken, however, in this and in subsequent treatment not to subdue the spirit of the animal, which is carefully preserved and kept up, although they use them with great severity, being, generally speaking, cruel masters.

The wild horse of these regions is a small but very powerful animal, with an exceedingly prominent eye, sharp nose, high nostril, small feet, and delicate leg, and undoubtedly have sprung from a stock introduced by the Spaniards at the time of the invasion of Mexico, which, having strayed off upon the prairies, have run wild and stocked the plains from this to Lake Winnipeg, two or three thousand miles to the north.*

This useful animal has been of great service to the Indians living on these vast

* There are many very curious traditions about the first appearance of horses amongst the different tribes, and many of which bear striking proof of the above fact. Most of the tribes have some story about the first appearance of horses, and amongst the Sioux they have beautifully recorded the fact by giving it the name of *Shonk-a-wakon* (the medicine dog).—G. C.

plains, enabling them to take their game more easily, to carry their burdens, &c., and no doubt render them better and handier service than if they were of a larger and heavier breed. Vast numbers of them are also killed for food by the Indians, at seasons when buffaloes and other game are scarce. They subsist themselves both in winter and summer by biting at the grass, which they can always get in sufficient quantities for their food.

Whilst on our march we met with many droves of these beautiful animals, and several times had the opportunity of seeing the Indians pursue them and take them with the lasso. The first successful instance of the kind was effected by one of our guides and hunters, by the name of Beatte, a Frenchman, whose parents had lived nearly their whole lives in the Osage village, and who himself had been reared from infancy amongst them, and in a continual life of Indian modes and amusements had acquired all the skill and tact of his Indian teachers, and probably a little more, for he is reputed, without exception, the best hunter in these western regions.

This instance took place one day whilst the regiment was at its usual halt of an hour in the middle of the day.

When the bugle sounded for a halt and all were dismounted, Beatte and several others of the hunters asked permission of Colonel Dodge to pursue a drove of horses which were then in sight, at a distance of a mile or more from us. The permission was given and they started off, and by following a ravine approached near to the unsuspecting animals, when they broke upon them and pursued them for several miles, in full view of the regiment. Several of us had good glasses, with which we could plainly see every movement and every maneuver. After a race of two or three miles Beatte was seen with his wild horse down, and the band and the other hunters rapidly leaving him.

Seeing him in this condition I galloped off to him as rapidly as possible, and had the satisfaction of seeing the whole operation of "breaking down" and bringing in the wild animal, and in Plate 162, No. 501, I have given a fair representation of the mode by which it was done. When he had conquered the horse in this way, his brother, who was one of the unsuccessful ones in the chase, came riding back and leading up the horse of Beatte, which he had left behind, and after staying with us a few minutes assisted Beatte in leading his conquered wild horse towards the regiment, where it was satisfactorily examined and commented upon, as it was trembling and covered with white foam, until the bugle sounded the signal for marching, when all mounted, and with the rest Beattie, astride of his wild horse, which had a buffalo skin girted on its back, and a halter, with a cruel noose around the under jaw. In this manner the command resumed its march, and Beatte astride of his wild horse, on which he rode quietly and without difficulty until night—the whole thing, the capture and breaking, all having been accomplished within the space of one hour, our usual and daily halt at midday.

Several others of these animals were caught in a similar manner during our march by others of our hunters, affording us satisfactory instances of this most extraordinary and almost unaccountable feat.

The horses that were caught were by no means very valuable specimens, being rather of an ordinary quality; and I saw to my perfect satisfaction that the finest of these droves can never be obtained in this way, as they take the lead at once when they are pursued, and in a few moments will be seen half a mile or more ahead of the bulk of the drove which they are heading off. There is not a doubt but there are many very fine and valuable horses amongst these herds, but it is impossible for the Indian or other hunter to take them, unless it be done by 'creasing' them, as I have before described, which is often done, but always destroys the spirit and character of the animal.

GREAT CAMANCHEE (COMANCHE) VILLAGE. (SEE NO. 353.)

No sooner were we encamped here (or, in other words, as soon as our things were thrown upon the ground) Major Mason, Lieutenant Wheelock, Captain Brown, Captain Duncan, my friend Chadwick, and myself galloped off to the village and through it in the greatest impatience to the prairies, where there were at least three thousand horses and mules grazing, all of us eager and impatient to see and to appropriate the splendid *Arabian horses* which we had so often heard were owned by the Camanche warriors. We galloped around busily, and glanced our eyes rapidly over them, and all soon returned to the camp quite crestfallen, and satisfied that, although there were some tolerable nags amongst this medley group of all colors and all shapes, the beautiful Arabian we had so often heard of at the East as belonging to the Camanches, must either be a great way farther south than this or else it must be a *horse of the imagination*.

The Camanche horses are generally small, all of them being of the wild breed, and a very tough and serviceable animal; and, from what I can learn here of the chiefs, there are yet, farther south, and nearer the Mexican borders, some of the noblest animals in use of the chiefs, yet I do not know that we have any more reason to rely upon this information than that which had made our horse-jockeys that we have with us to run almost crazy for the possession of those we were to find at this place. Amongst the immense herds we found grazing here, one-third, perhaps, are mules, which are much more valuable than the horses.

Of the horses the officers and men have purchased a number of the best by giving a very inferior blanket and butcher's knife, costing in all about \$4! These horses in our cities at the East, independent of the name, putting them upon their merits alone, would be worth from \$80 to \$100 each, and not more.

A vast many of such could be bought on such terms, and are hourly brought into camp for sale. If we had goods to trade for them and means of getting them home, a great profit could be made, which can easily be learned from the following transaction that took place yesterday: A fine-looking Indian was hanging about my tent very closely for several days, and continually scanning an old and half-worn cotton umbrella, which I carried over me to keep off the sun, as I was suffering with fever and ague, and at last proposed to purchase it of me with a very neat-limbed and pretty-pied horse which he was riding. He proposed at first that I should give him a knife and the umbrella, but as I was not disposed for the trade (the umbrella being so useful an article to me that I did not know how to part with it, not knowing whether there was another in the regiment), he came a second time, and offered me the horse for the umbrella alone, which offer I still rejected, and he went back to the village and soon returned with another horse of a much better quality, supposing that I had not valued the former one equal to the umbrella.

With this he endeavored to push the trade, and after I had with great difficulty made him understand that I was sick, and could not part with it, he turned and rode back towards the village, and in a short time returned again with one of the largest and finest mules I ever saw, proposing that, which I also rejected, when he disappeared again.

In a few moments my friend Captain Duncan, in whose hospitable tent I was quartered, came in, and the circumstance being related to him, started up some warm jockey feelings, which he was thoroughly possessed of, when he instantly sprang upon his feet, and exclaimed, "D—n the fellow! where is he gone? Here, Gosset! get my old umbrella out of the pack; I rolled it up with my wiper and the frying pan; get it as quick as lightning!" With it in his hand, the worthy captain soon overtook the young man, and escorted him into the village, and returned in a short time—not with the mule, but with the second horse that had been offered to me.—G. C.

CERTIFICATES AS TO THE AUTHENTICITY OF THE LANDSCAPES—BUFFALO HUNTING SCENES, &c.—Nos. 311 TO 501.

The landscapes, buffalo-hunting scenes, &c., above mentioned, I have seen, and, although it has been thirty years since I traveled over that country, yet a considerable number of them I recognized as faithful representations, and the remainder of them are so much in the peculiar character of that country as to seem entirely familiar to me.

SAINT LOUIS, MO.

WM. CLARK,
Superintendent of Indian Affairs.

The landscape views on the Missouri, buffalo hunts, and other scenes, taken by my friend Mr. Catlin, are correct delineations of the scenes they profess to represent, as I am perfectly well acquainted with the country, having passed through it more than a dozen times. And further I know that they were taken on the spot, from nature, as I was present when Mr. Catlin visited that country:

JOHN F. A. SANFORD,
U. S. Sub. Indian Agent.

It gives me great pleasure to be able to pronounce the landscape views, views of hunting, and other scenes taken on the Upper Missouri, by Mr. Catlin, to be correct delineations of the scenery they profess to represent; and although I was not present when they were taken in the field, I was able to identify almost every one between Saint Louis and the Grand Bend of the Missouri.

J. L. BEAN,
Sub-Agent of Indian Affairs.

I have seen Mr. Catlin's collection of Indian portraits, many of which were familiar to me, and painted in my presence in their villages. I have spent the greater part of my life amongst the tribes and individuals he has represented, and I do not hesitate to pronounce them correct likenesses and easily recognized; also the sketches of their manners and customs I think are excellent, and the landscape views on the Missouri and Mississippi are correct representations.

K. M'KENZIE,
Of the Am. Fur Company, Mouth of Yellowstone.

I have examined a series of paintings by Mr. Catlin, representing Indian buffalo hunts, landscapes, &c., and from an acquaintance of twenty-seven years with such scenes as are represented, I feel qualified to judge them, and do unhesitatingly pronounce them good and unexaggerated representations.

JNO. DOUGHERTY,
Indian Agent for Pawnees, Omahas, and Oloes.

BIRD'S-EYE VIEW OF THE MANDAN VILLAGE 1,800 MILES ABOVE SAINT LOUIS,
ON THE WEST BANK OF THE MISSOURI RIVER, 1832.

No. 502, page 349.
(Plate 47, Vol. I, Catlin's Eight Years.)

THE MANDANS, THEIR APPEARANCE AND CUSTOMS.

[Pictures Nos. 502, 504, 505, 506, and 507.]

MANDAN VILLAGE.

502. Mandan Village, a bird's-eye view of the, eighteen hundred miles above Saint Louis, on the west bank of the Missouri River, now near Mandan, Dakota. This is the main Mandan village, or largest one. Painted in 1832.

(Plate No. 47, page 87, vol. 1, Catlin's Eight Years.)

The lodges are covered with earth, and so compactly fixed by long use, that men, women, and children recline and play upon their tops in pleasant weather.

These lodges vary in size from forty to fifty feet in diameter, and are all of a circular form. The village is protected in front by the river, with a bank forty feet high, and on the back part by a picket of timber set firmly in the ground. Back of the village, on the prairie, are seen the scaffolds on which their dead bodies are laid to decay, being wrapped in several skins of buffalo, and tightly bandaged.

In the middle of the village is an open area of one hundred and fifty feet in diameter, in which their public games and festivals are held. In the center of that is their big canoe, a curb made of planks, which is an object of religious veneration. Over the medicine (or mystery) lodge are seen hanging on the tops of poles several sacrifices to the Great Spirit of blue and black cloths, which have been bought at great prices, and there left to hang and decay.

In my last I gave some account of the village, and the customs and appearances of this strange people—and I will now proceed to give further details on that subject.

I have this morning perched myself upon the top of one of the earth-covered lodges which I have before described, and having the whole village beneath and about me (Plate 47), with its sachems, its warriors, its dogs, and its horses in motion, its medicines (or mysteries) and scalp-poles waving over my head, its piquets, its green fields and prairies, and river in full view, with the din and bustle of the thrilling panorama that is about me I shall be able, I hope, to give some sketches more to the life than I could have done from any effort of recollection.

I said that the lodges or wigwams were covered with earth—were of 40 or 60 feet in diameter, and so closely grouped that there was but just room enough to walk and ride between them; that they had a door by which to enter them, and a hole in the top for the admission of light, and for the smoke to escape; that the inmates were at times grouped upon their tops in conversations and other amusements, &c.; and yet you know not exactly how they look, nor what is the precise appearance of the strange world that is about me. There is really a newness and rudeness in everything that is to be seen. There are several hundred houses or dwellings about me, and they are purely unique, they are all covered with dirt, the people are all red, and yet distinct from all other red folks I have seen. The horses are wild, every dog is a wolf, the whole moving mass are strangers to me; the living, in everything, carry an air of intractable wildness about them, and the dead are not buried, but dried upon scaffolds.

The groups of lodges around me present a very curious and pleasing appearance, resembling in shape (more nearly than anything else I can compare them to) so many potash-kettles inverted. On the tops of these are to be seen groups standing and reclining, whose wild and picturesque appearance it would be difficult to describe. Stern warriors, like statues, standing in dignified groups, wrapped in their painted

robes, with their heads decked and plumed with quills of the war eagle; extending their long arms to the east or the west, the scenes of their battles, which they are recounting over to each other. In another direction, the wooing lover, softening the heart of his fair *Taih-nah-tai-a* with the notes of his simple lute. On other lodges, and beyond these, groups are engaged in games of the "moccasin," or the "platter." Some are to be seen manufacturing robes and dresses, and others, fatigued with amusements or occupations, have stretched their limbs to enjoy the luxury of sleep, whilst basking in the sun. With all this wild and varied medley of living beings are mixed their dogs, which seem to be so near an Indian's heart as almost to constitute a material link of his existence.

In the center of the village is an open space or public area of one hundred and fifty feet in diameter and circular in form, which is used for all public games and festivals, shows, and exhibitions; and also for their "annual religious ceremonies," which are soon to take place, and of which I shall hereafter give some account. The lodges around this open space front in with their doors towards the center, and in the middle of this circle stands an object of great religious veneration, as I am told, on account of the importance it has in the conduction of those annual religious rites.

This object is in form of a large hogshhead, some eight or ten feet high, made of planks and hoops, containing within it some of their choicest medicines or mysteries, and religiously preserved unhacked or scratched as a symbol of the *Big Canoe* as they call it.

One of the lodges fronting on this circular area and facing this strange object of their superstition, is called the medicine lodge, or council house. It is in this sacred building that these wonderful ceremonies, in commemoration of the flood, take place. I am told by the traders that the cruelties of these scenes are frightful and abhorrent in the extreme; and that this huge wigwam, which is now closed, has been built exclusively for this grand celebration. I am every day reminded of the near approach of the season for this strange affair, and as I have not yet seen any thing of it, I cannot describe it; I know it only from the relations of the traders who have witnessed parts of it; and their descriptions are of so extraordinary a character, that I would not be willing to describe until I can see for myself, which will, in all probability, be in a few days.

In ranging the eye over the village from where I am writing, there is presented to the view the strangest mixture and medley of unintelligible trash (independent of the living beings that are motion), that can possibly be imagined. On the roofs of the lodges, besides the groups of living, are buffaloes' skulls, skin canoes, pots and pottery, sleds, and sledges, and suspended on poles, erected some twenty feet above the doors of their wigwams, are displayed in a pleasant day, the scalps of warriors preserved as trophies, and thus proudly exposed as evidence of their warlike deeds. In other parts are raised on poles the warriors' pure and whitened shields and quivers, with medicine-bags attached, and here and there a sacrifice of red cloth, or other costly stuff, offered up to the Great Spirit, over the door of some benignant chief, in humble gratitude for the blessings which he is enjoying. Such is a part of the strange medley that is before and around me, and amidst them and the blue streams of smoke that are rising from the tops of these hundred "coal-pits," can be seen in distance, the green and boundless, treeless, bushless prairie, and on it, and contiguous to the piquet which incloses the village, a hundred scaffolds on which their "dead live," as they term it.—G. C.

MANDAN RELIGIOUS CEREMONIES.

Pictures Nos. 504, 505, 506, 507.

The annual religious ceremony of four days, of which I have so often spoken, and which I have so long been wishing to see, has at last been enacted in this village;

* From letter 22, written from Mandan Village, Upper Missouri, July 16-20, 1832.

and I have, fortunately, been able to see and to understand it in most of its bearings, which was more than I had reason to expect, for no white man, in all probability, has ever been before admitted to the medicine-lodge during these most remarkable and appalling scenes.

Well and truly has it been said that the Mandans are a strange and peculiar people, and most correctly had I been informed that this was an important and interesting scene by those who had on former occasions witnessed such parts of it as are transacted out of doors and in front of the medicine-lodge.

Since the date of my last letter I was lucky enough to have painted the medicine-man, who was high priest on this grand occasion, or conductor of the ceremonies, who had me regularly installed doctor of medicine, and who, on the morning when these grand refinements in mysteries commenced, took me by the arm and led me into the medicine-lodge, where the fur-trader, Mr. Kipp, and his two clerks accompanied me in close attendance for four days, all of us going to our own quarters at sundown and returning again at sunrise the next morning.

I took my sketch-book with me, and have made many and faithful drawings of what we saw, and full notes of everything as translated to me by the interpreter; and since the close of that horrid and frightful scene, which was a week ago or more I have been closely ensconced in an earth-covered wigwam with a fine skylight over my head, with my palette and brushes endeavoring faithfully to put the whole of what we saw upon canvass, which my companions all agree to be critically correct, and of the fidelity of which they have attached their certificates to the backs of the paintings. I have made four paintings of these strange scenes, containing several hundred figures, representing the transactions of each day. * * *

I shudder at the relation or even at the thought of these barbarous scenes, and am almost ready to shrink from the task of reciting them after I have so long promised some account of them. I entered the medicine-house of these scenes as I would have entered a church, and expected to see something extraordinary and strange, yet in the form of worship or devotion, but alas! little did I expect to see the interior of their holy temple turned into a slaughter-house and its floors strewed with the blood of its fanatic devotees. Little did I think that I was entering a house of God, where His blinded worshipers were to pollute its sacred interior with their blood and propitiatory suffering and tortures, surpassing, if possible, the cruelty of the rack or the inquisition, but such the scene has been, and as such I will endeavor to describe it.

The Mandan religious ceremony then, as I believe it is very justly denominated, is an annual transaction, held in their medicine-lodge once a year, as a great religious anniversary, and for several distinct objects, as I shall in a few minutes describe; during and after which they look with implicit reliance for the justification and approval of the Great Spirit.

INDIAN RELIGIOUS BELIEF.

All of the Indian tribes, as I have before observed, are religious—are worshipful—and many of them go to almost incredible lengths (as will be seen in the present instance, and many others I may recite) in worshipping the Great Spirit; denying and humbling themselves before Him for the same purpose, and in the same hope as we do—perhaps in a more rational and acceptable way.

The tribes, so far as I have visited them, all distinctly believe in the existence of a Great (or Good) Spirit, an Evil (or Bad) Spirit, and also in a future existence and future accountability, according to their virtues and vices in this world. So far the North American Indians would seem to be one family, and such an unbroken theory amongst them; yet with regard to the manner and form, and time and place of that accountability—to the constructions of virtues and vices, and the modes of appeasing and propitiating the Good and Evil Spirits, they are found with all the changes and variety which fortuitous circumstances, and fictions, and fables have wrought upon them.

If, from their superstitious and their ignorance, there are oftentimes obscurities and mysteries thrown over and around their system, yet these affect not the theory itself, which is everywhere essentially the same, and which, if it be not correct, has this much to command the admiration of the enlightened world, that they worship with great sincerity, and all according to one creed.

MANDAN RELIGIOUS BELIEF.

The Mandans believe in the existence of a Great (or Good) Spirit, and also of an Evil Spirit, who they say existed long before the Good Spirit, and is far superior in power. They all believe also in a future state of existence and a future administration of rewards and punishments, and (so do all other tribes that I have yet visited) they believe those punishments are not eternal, but commensurate with their sins.

These people living in a climate where they suffer from cold in the severity of their winters have very naturally reversed our ideas of heaven and hell. The latter they describe to be a country very far to the north, of barren and hideous aspect, and covered with eternal snows and ice. The torments of this freezing place they describe as most excruciating; whilst heaven they suppose to be in a warmer and delightful latitude, where nothing is felt but the keenest enjoyment, and where the country abounds in buffaloes and other luxuries of life. The Great or Good Spirit they believe dwells in the former place for the purpose of there meeting those who have offended him, increasing the agony of their sufferings by being himself present, administering the penalties. The Bad or Evil Spirit they at the same time suppose to reside in paradise, still tempting the happy; and those who have gone to the regions of punishment they believe to be tortured for a time proportioned to the amount of their transgressions, and that they are then to be transferred to the land of the happy, where they are again liable to the temptations of the Evil Spirit, and answerable again at a future period for their new offenses.

OBJECTS OF MANDAN RELIGIOUS CEREMONIES.

Such is the religious creed of the Mandans, and for the purpose of appeasing the Good and Evil Spirits, and to secure their entrance into those fields Elysian, or beautiful hunting grounds, do the young men subject themselves to the horrid and sickening cruelties to be described in the following pages.

There are other three distinct objects for which these religious ceremonies are held, which are as follows:

First, they are held annually as a celebration of the event of the subsiding of the flood, which they call *Mee-nee-ro-ka-ha-sha* (sinking down or settling of the waters).

Secondly, for the purpose of dancing what they call *Bel-lohck-na-pic* (the bull-dance); to the strict observance of which they attribute the coming of buffaloes to supply them with food the coming season.

Thirdly, and lastly, for the purpose of conducting all the young men of the tribe, as they annually arrive to the age of manhood, through an ordeal of privation and torture, which, while it is supposed to harden their muscles and prepare them for extreme endurance, enables the chiefs who are spectators to the scene, to decide upon their comparative bodily strength and ability to endure the extreme privations and sufferings that often fall to the lots of Indian warriors; and that they may decide who is the most hardy and best able to lead a war-party in case of extreme exigency.

This part of the ceremony, as I have just witnessed it, is truly shocking to behold, and will almost stagger the belief of the world when they read of it. The scene is too terrible and too revolting to be seen or to be told, were it not an essential part of a whole, which will be new to the civilized world, and therefore worth their knowing.
